Medina, a small river in the Isle of Wight, England, almost dividing the island in two. On its banks stands Newport, the chief town of the island, and Cowes stands on the estuary.

Medinet-el-Fayum, a city of Upper Egypt and capital of the Fayum province. It is a large trading centre. Pop. 21,800.

Mediterranean Sea, so called by its lying in the presumed middle of the earth, surrounded by Europe, Asia, and Africa; the largest enclosed sea in the world. Its communication with the Atlantic is Gibraltar Strait, 9 m. wide; it is linked with the Black Sea through the Dardanelles, and in 1869 a canal through the isthmus of Suez connected it with the Red Sea. It is 2,200 m. long by 1,200 m. broad, the S. shores regular; the N. with many gulfs, and two great inlets, the Aegean and Adriatic Seas. The Balearic Is., Cordoa, Sardinia, Sicily, Malta, Cyprus, and Crete, the Ionian Is., and the Archipelago are the chief islands; the Rhône, Po, and Nile the chief rivers that discharge into it. A ridge between Sicily and Cape Bon divides it into two great basins; it is practically tideless, and saltier than the Atlantic: its waters too are warm. Northerly

winds prevail in the E. with certain regular variations. In recent years it has become the centre of gravity of European politics, as a result of Italian aspirations in Africa and the near East, and the Civil War in Spain.

Medjidie, a former Turkish order of knighthood instituted in 1852 by the Sultan Abd-ul-Medjid, as a reward of merit in civil or military service.

Medlar (*Pyrus*, or *Mespilus germanica*), a common deciduous shrub found in hedges in most parts of Europe. The fruit, which is about an inch in diameter, grows on the points of the main or side shoots, and is depressed and concave on top. The Nottingham cultivated variety is considered the best. The fruit is harsh and astringent. It is not eaten until "bletted," i.e., until it is brown and decay has set in.

Medmenham, a village of Buckinghamshire, 60 m. from London. The former Cistercian abbey was tenanted during the 18th Century by a band of men of fashion under the designation of the "Monks of St. Francis," better known as the "Hell Fire Club," led by Sir Francis Dashwood, John Wilkes and others, who converted it into a convivial retreat and there celebrated their orgies. Pop. 400.

Medoc, a district in the dept. of the Gironde, to the S. of the estuary of that name, in the S. of France, famous for its wines.

Medusa, one of the three Gorgons (q.v.), who offended Athena, so that the goddess changed her hair into hideous serpents, and gave to her eyes the power of turning anyone into stone who looked into them. Perseus (q.v.) cut off her head by the help of Athena.

Medway, a river in Kent, England, rising in Sussex, and after a NE. course of 58 m. falling into a tidal estuary of the Thames mouth at Sheerness.

Meerscham (lit. sea-foam), a fine white clay, hydrated silicate of magnesia, found in Asia Minor, Morocco and elsewhere. It is used mainly for making tobacco pipe bowls.

Meerut, an Indian town in the North-West Province, on the Nuddi, 40 m. N.E. of Delhi; is capital of a district of the same name, and an important military station; it is noted as the scene of the outbreak of the Mutiny in 1857. Pop. c. 137,000.

Megalithic Age, the age of ancient stone monuments or structures of large stones, such as the early Cyclopean architecture in ancient Greece. Such monuments were generally sepulchral, they are classified into dolmens, circles, menhirs etc. Examples in Britain include Stonehenge.

Megalomania, a disordered mental condition in which the patient is afflicted with the delusion that he is a person of the highest position or importance or endowed with vast riches. The latter delusion is frequent in cases of general paralysis.

Megalosaurus, gigantic extinct carnivorous dinosaur, about 48 ft. long; it walked on its hind legs and preyed upon the herbivorous dinosaurs.

Megaphone, a long tunnel-shaped instrument for carrying sound over long distances. The less elaborate megaphones are commonly used to make announcements at sporting events. The instrument was invented by Edison. Electrical amplifiers have now largely replaced them.

Megaritis, a small but populous state of ancient Greece, S. of Attica, whose inhabitants were adventurous seafarers, credited with deceitful propensities. The capital, Megara, famous for white marble and fine clay, was the birthplace of Euclid.

Megatherium, an extinct genus of the sloth, some 18 or 20 ft. in length and 8 ft. in height; its remains are mostly found in S. America.

MEGATHERIUM

Megiddo,

an ancient city of Palestine, at which both Josiah and Ahaziah died. Excavations have revealed tombs and much of a well-built ancient town. In the World War it was captured by Allenby in 1918.

Mehemet Ali, pasha of Egypt, born in Albania; entered the Turkish army, rose into favour and seized the pashalik, the Sultan exacting an annual tribute in acknowledgment of his suzerainty; the Mamelukes proving unruly, he slaughtered them wholesale in 1811. He maintained two wars with the Sultan for the possession of Syria, with Ibrahim Pasha, his son, for lieutenant. Compelled to give up the struggle, he instituted a series of reforms in Egypt, and secured from the Sultan the hereditary rule of Egypt for his family. (1769-1849).

Meighen, Arthur, Canadian statesman; born at Anderson, Ontario, and educated at Toronto University. A barrister, he entered the Dominion Parliament as a Conservative in 1908, becoming Solicitor-General, 1913; Secretary of State, later Minister of Interior, 1917; Prime Minister in 1920-1921, and again in 1926. Leader of government in Senate, 1932-1935. (1874-).

Meissen, a town of Saxony, on the Elbe, Upper Elbe, 15 m. NW. of Dresden; has a very fine Gothic cathedral and an old castle. There is a large porcelain factory, where Dresden china was made, besides manufactures of iron. Pop. 47,000.

Meissonier, Jean Louis Ernest, French painter, born in Lyons; began as a book illustrator, practising the while and perfecting his art as a figure painter, in which he achieved signal success, from his "Chess-player" series and military pieces to his designs for the decoration of the Pantheon. (1815-1891).

Meistersänger, or Meistersingers, a guild founded in Germany in the 15th Century or earlier for the cultivation of poetry, of which Hans Sachs (q.v.) was the most famous member.

Mekong, or Cambodia, is the chief river of Siam. Its source in the mountains of Chiamdo is unexplored. Its course, 3,000 m., is southerly to the China Sea; the last 500 m. are navigable.

Melanchthon, Philip, Protestant Reformer, born in the Palatinate of the Rhine; met Luther at Wittenberg, where he was professor of Greek. He wrote the first Protestant work in dogmatic theology, entitled *Loci Communes*, and drew up the "Augsburg Confession." The sweetness of temper for which he was distinguished, together with his soberness as a thinker, had a moderating influence on Luther, and contributed much to the progress of the Reformation. He combined the humanist with the Reformer. (1497-1560).

PHILIP MELANCHTHON

Melanesia, general name for the group of crystalline, coralline, and volcanic islands in the W. of Polynesia, all S. of the equator, inhabited by the Melanesian or dark oceanic race; includes the Fiji Is., New Britain and New Hebrides and part of New Guinea.

Melba, Dame Nellie, Australian operatic singer, born in Melbourne; made her first appearance when she was only six; studied in Paris in 1882 and appeared in opera for the first time in Brussels in 1887; often appeared in opera in London; received the D.B.E. for her charitable work in the World War. (1861-1931).

Melbourne, the capital of Victoria, Australia, on the R. Yarra and at the head of Port Phillip Bay; second largest city in Australia. It is well planned and built in broad regular streets with much architectural beauty, and contains many buildings of imposing appearance; was the seat of the Commonwealth Government till 1927, when this honour was transferred to Canberra. First settled in 1835, it was incorporated in 1842. Some of its streets are world-famed for their wonderful avenues of trees which extend for miles. It contains a large number of factories and is a great commercial and railway centre. Its shipping interests are very large, and it has wharves both at Port Melbourne and along the banks of the Yarra R. Pop. 1,018,000.

Melbourne, a small town of Derbyshire, shire, England, 8 m. S.E. of Derby, manufacturing silk fabrics, boots, shoes and hosiery. In the former castle John, Duc de Bourbon, taken at the battle of Agincourt, was detained 18 years. Pop. 3,700.

Melbourne, William Lamb, Viscount, English statesman, born in London; educated at Cambridge and Glasgow Universities; entered Parliament as a Whig in 1805, but was Chief Secretary for Ireland in the Governments of Canning, Goderich, and Wellington; succeeding to the title in 1828, he reverted to his old party; was Home Secretary under Earl Grey in 1830, and was himself Prime Minister for four months in 1834, and then from 1835 till 1841, when he retired from public life. (1779-1848.)

Melchett, Alfred Moritz Mond, first Baron, British industrialist, largely responsible for the formation of Imperial Chemical Industries, Ltd.; elected to Parliament as a Liberal in 1906, became Minister of Health in 1921, changed to the Conservative party in 1927 and was raised to the peerage the following year. He was a prominent Zionist. (1868-1930).

Melchizedek (i.e., king of righteousness or justice), a priest-king of Salem, to whom Abraham, as recorded in Genesis, did homage and paid tithes.

Meleager, a Greek mythical hero, who slew a wild boar which devastated his country; his life depended on the burning down of a brand that was blazing on the hearth at the time of his birth, but which his mother at once snatched from the flames. He killed his uncle in a quarrel, and his mother, to be avenged on him for slaying her brothers, threw the brand back into the fire, and on the instant he breathed his last.

Mellon, Andrew William, American banker and politician, born in Pittsburg; industrial development made his banking business prosper, and he became one of the three or four wealthiest men in the world. In 1921 he became Secretary of the Treasury, and he later came to London as American ambassador. He presented to America an art collection estimated to be worth \$10,000,000. In 1911 he founded the Mellon Institute at Pittsburg, the world's largest institute for scientific research; the building was dedicated in 1937. (1855-1937.)

Melodrama, originally a play with remarkable for rapid and incessant action, sensational situations, and violently expressed emotion, with marked contrast between hero and villain. Thomas Holcroft is credited with introducing this genre to the English stage with plays such as *Deaf and Dumb*, adapted from the French *melodrame* by Bouilly, and *The Tale of Mystery* in 1803. The elements of melodrama had, however, existed long before, and were present in much Elizabethan tragedy and in late 18th-Century romantic drama. Famous Victorian melodramas, which have been revived with success in late years, include *Sweeney Todd*, *The Demon Barber of Fleet Street*, and *Maria Marten, or the Murder in the Red Barn*.

Melon (*Cucumis melo*), a tropical vine of the order Cucurbitaceae, with a large green, yellow or white succulent fruit. It is largely grown in Mediterranean countries and in America, and in Britain under glass.

Melpomene, the one of the nine muses which presides over tragedy.

Melrose, a small town in Roxburghshire, shire, Scotland, at the foot of the Eldons, on the S. bank of the Tweed, famed for its abbey, founded by David I. in 1136; it is celebrated by Sir Walter Scott in his *Lay of the Last Minstrel*. Pop. 2,000.

Melton Mowbray, a town in Leicestershire, England, 15 m. N.E. of Leicester, the centre of a great hunting district; celebrated for its pork pies. Pop. 10,500.

Melville, Herman, American author, born in New York, went to sea in early life; wrote *Typee*, *Moby Dick* and other stories of sea life and adventure. (1819-1891).

Memel, or Klaipėda, Baltic seaport at the mouth of the Kurisches Haft. Before the World War the town, with a strip of territory beyond the Niemen, belonged to Germany. After the War it was assigned to the League of Nations and administered by the Conference of Ambassadors for three years; but in 1923 it was handed over to Lithuania on condition that it received a considerable measure of autonomy. Since then Nazi influence has prevailed at recent elections to the Diet. Timber is exported in large quantities and there are chemical works and shipbuilding yards. Pop. (town) 38,000.

Memling, Hans, painter of Flemish school; born either at Munsing, near Aschaffenburg, Bavaria; or at Memelinc, near Aikmaer, Holland. He worked mainly at Bruges, and is renowned as a colourist. His work is still largely represented at Bruges. (c. 1430-1494).

Memnon, in Greek mythology, a son of Tithonus and Aurora, who was slain by Achilles at Troy. At his death Aurora besought Zeus to immortalize his memory, and ever since the earth bears witness to her weeping in the dews of the morning. A statue to his memory was erected near Thebes, in Egypt, and was fabled to emit a musical sound every time the first ray of the sun fell on it.

Memory, the mental processes involved in the recollection and representation of past experience. The function is performed by the mind, but does not depend upon a separate faculty. A fundamental principle of memorization of any subject is that it must be understood, while the pre-

existence of other associated experiences is of material assistance in fixing it upon the mind. Concentration or attention is essential to rapid memorization. A faulty method of learning by memory, especially a lengthy passage of poetry, for example, is to learn a section at a time. Psychology has proved that repetition of the entire passage until complete mastery is assured, is more reliable.

Memphis, an ancient city of Egypt, of which it was at certain periods the capital; it was founded by Menes at the apex of the delta of the Nile, and contained 700,000 inhabitants; famous for its pyramids, the Serapeum and temples.

Memphis, city and port in Tennessee, U.S.A., on the Mississippi, 326 m. above New Orleans, accessible to the largest vessels; is also a great railway centre, and therefore of great commercial importance; has many industries, and a great cotton market. Pop. 253,000.

Menai Strait, a picturesque channel Anglesey from Caernarvonshire, 14 m. long and at its narrowest 200 yards wide; is crossed by a suspension bridge (1825) and the Britannia Tubular Railway Bridge (1850).

Menander, a Greek comic poet, born in Athens, of his works, which were numerous, we have only some fragments; they were largely used by the Latin poet Terence in the construction of his plays. (342-291 B.C.).

Mencius, or Meng-Tze, a celebrated Chinese sage, greatly honoured by Confucianists; his teachings were collected by his followers in a book entitled the *Book of Meng-tze*. (372-289 B.C.).

Mendel, Gregor Johann, Austrian cleric on heredity laid the foundations of the modern scientific study of the subject (see Mendelism). The value of his work was not recognised until several years after his death. (1822-1884).

Mendeleëff, Dmitri Ivanovich, Russian chemist, born at Tobolsk; was the first to arrange the chemical elements in a table in order of atomic mass and to observe the periodicity they displayed when so arranged. Certain unknown elements were subsequently discovered and found to have the properties assigned to them by Mendeleëff. His table remains the basis of atomic theory. (1834-1907).

Mendelism, the theory of heredity (q.v.), setting forth that certain "dominant" characteristics are inherited by hybrids rather than characteristics intermediate between those of the two parents. The offspring of the first generation inherits the dominant while part of the offspring of the second generation exhibits the opposite or "recessive" characteristics. If those possessing recessive characteristics unite, the dominant recur in the offspring. Mendelian theory has proved of great practical value in the deliberate breeding of animals and plants for desirable characteristics.

Mendelssohn-Bartholdy, Felix, celebrated German composer, grandson of Moses Mendelssohn, born in Hamburg; appeared publicly as a pianist at 13 and began to compose at an early age, producing the *Middlemarch Night's Dream* overture at 17. His compositions consisted of symphonies, operas, oratorios (including *St. Paul* and *Elisabeth*), and church music. A tour in Scotland inspired the *Hebrides* overture. (1809-1847)

MEDELSSOHN

Mendip Hills, in the N. of Somerset, set, England, extend from a little SW. of Frome to Hutton, S. of Weston-super-Mare, a distance of about 25 m.; the highest point is Blackdown Hill, 1,068 ft. above sea-level.

Mendoza, province in the extreme W. of Argentina; has the Andes in the W., Aconcagua (23,500 ft.), the highest peak in the New World. Otherwise consists chiefly of pampas, fertile only where irrigated from the small Mendoza River; there vines flourish. Copper is plentiful, coal and oil are found. Area, 57,500 sq. m. Pop. 445,000. **Mendoza** the capital, 640 m. W. of Buenos Aires by rail, is on the Trans-Andine route to Chile, with which it trades. Pop. 77,000.

Menelaus, king of Sparta, the brother of Agamemnon and the husband of Helen, the carrying away of whom by Paris led to the Trojan War.

Menelik II., Emperor of Abyssinia, claiming descent from Menelik I., reputed son of Solomon and the Queen of Sheba, was born at Ankobar; son of Melcoth, King of Shoa, whom he succeeded in 1865. He became ruler of Abyssinia on the death of the Emperor John in 1889. He defeated the Italians at Adowa, 1896, as a result of which Italy recognised Abyssinian independence. (c. 1842-1913).

Menhir, a standing stone, erected in connection with funerary rites; examples occur in Brittany, Scotland, and elsewhere.

Menin Gate, the gate at Ypres leading to Menin, and to the scene of some of the severest fighting of the World War. Through it many thousands of British troops passed from 1914 to 1918, and on its site a memorial gateway in honour of the 56,000 of them who have no known grave was unveiled in 1927. Sir Reginald Blomfield designed the memorial, which bears the name of every officer and man it commemorates.

Meningitis, an inflammation of the meninges or membranes that invest the brain and spinal cord, due to infection by germs. Four different types are recognised. Simple acute meningitis is caused by injury to certain parts, e.g., the middle ear, the inflammation extending to the brain, or as a complication following certain fevers. The earliest symptoms are headache, followed by feverishness and general prostration. Constriction of the neck is followed by convulsions, and squint is often noticed. Septic meningitis is most often fatal. Tuberculous meningitis is due to tubercular disease in a bone or gland. It is most frequent in young children and has a slow and insidious onset. After two weeks' drowsiness the child becomes comatose, and after eight weeks the disease is almost always fatal. See also *Cerebro-Spinal Fever*.

Mennonites, a Protestant sect founded at Zurich by a priest, Menno Simons, about 1535, with a creed that combines the tenets of the Baptists with those of the Quakers; they maintain a rigorous church discipline. Communities are to be found to-day in Germany and the U.S.A.

Mensheviks, name given in Russia to opposition to Bolsheviks; it originated with a division in the Russian Social-Democratic Party in 1903. Their views were reformist rather than revolutionary, and they worked for the coming of Socialism by non-revolutionary methods.

Menstruation, the discharge of blood from the uterus of women which occurs about every 28 days during the period of fertility, commencing at puberty (in Europe usually at 14 or 15) and ceasing at the menopause, which commonly occurs between the ages of 40 and 50. It

ceases on conception, commencing again after the end of the period of lactation, or sometimes after childbirth. Disorders of the function include amenorrhoea, or absence of the menstrual flow; dysmenorrhoea, or its accompaniment with pain; or an unusual degree of discomfort and menorrhagia, or excessive menstrual flow.

Mensuration, the branch of mathematics concerned with ascertaining lengths of straight lines, areas of surfaces, and volumes of solids. The term is commonly restricted to the measurement of surfaces, solids and regular figures. The measurement of irregular lines is dealt with by that part of the integral calculus termed rectification.

Menthol, a crystalline substance obtained from the oil of peppermint, used in nervous affections, such as neuralgia, as a counter-irritant, and for relieving headaches and asthma.

Mentone, a town and seaport in France, on the Mediterranean, 1½ m. from the Italian border; was under the princes of Monaco till 1848, when it subjected itself to Sardinia, which afterwards handed it over to France; protected by the Alps, the climate is delightful and renders it a favourite health resort in winter and spring; it exports olive-oil and fruit. Pop. c. 15,000.

Mentor, a friend of Ulysses, left by him in charge of his young son Telemachus; hence his name is used as a general term for a friendly guide, especially of an older in relation to a younger person.

Mercantile Marine, the body of officers and men engaged in cargo shipping as distinct from naval service on the one hand and passenger shipping on the other; though in practice the term is often used to cover all shipping other than the Royal Navy. In 1927 the total tonnage of merchant vessels of 100 tons and over was for the world 66½ millions, of which over 20½ millions was in British ownership. In 1935 the British mercantile marine employed over 152,000 seamen. Merchant shipping law is administered by a special branch of the Board of Trade, which has representatives at all important ports and docks.

Mercator, the Latinised name of Gerardus Mercator, a celebrated Dutch geographer who invented the map-projection which bears his name, and which plots latitude and longitude by parallel straight lines at right angles to each other. (1512-1592).

Mercenaries, originally hired soldiers, as distinguished from feudal levies, now bodies of paid troops in the service of a State of which they are not subjects; the Scots Guards in France from the 15th to 18th Centuries were famous, and Swiss auxiliaries once belonged to most European armies; William III. had Dutch mercenaries in England; under the Georges, Germans were hired and used in the American War, the Irish rebellion, and the Napoleonic struggle; in the Crimean War German, Swiss, and Italian soldiers were enrolled. See also *Foreign Legion*.

Mercerisation, a process, of treating cotton yarn or cotton fabrics invented by John Mercer in 1851. It consists of passing the material first through a solution of caustic soda and then through cold water, thus causing it to contract so as to improve it for dyeing purposes.

Merchant Taylors' School, famous English public school, founded in Suffolk Lane in the City of London in 1541, by the Master, Wardens, and Court of Assistants of the Worshipful Company of Merchant Taylors who are still the governing body. It moved in 1875 to Charterhouse Square from which it moved to its present

site of Sandy Lodge, Northwood, Middlesex, in 1933. The number of boys is limited to 500 and includes 50 boarders. Eight entrant scholarships are offered annually. There are also each year scholarships and Exhibitions to a value of not more than £200. Many famous men have been scholars at the school, including Edmund Spenser, Robert Clive and James Bishop of London.

Mercia, one of the three chief kingdoms of Anglo-Saxon England, eventually comprising most of the Midlands; founded by Angle settlers in the Upper Trent Valley (now S. Staffordshire) in the 6th Century. It rose to greatness under Penda, 628-655, and subsequently succeeded Northumberland in the supremacy. Under Offa, 757-795, it maintained its independence, but after the death of Cenwulf, 819, waned in turn before Wessex and the Danes.

Mercier, Désiré Joseph, Belgian ecclesiastic, who as Cardinal Archbishop of Malines opposed the German invasion of his country and issued an appeal to his compatriots to remain loyal to their king; he was partly responsible for the "Malines Conversations" (q.v.). (1851-1926).

Mercury, the Roman equivalent of the Greek God Hermes, the son of Jupiter and Maia, the messenger of the gods, the patron of merchants and travellers, and the conductor of the souls of the dead to the nether world.

Mercury, the planet of the solar system nearest to the sun, round which it revolves in 88 days at a mean distance of 36 million miles. It has a diameter of 3,000 miles and mass one twenty-fifth that of the earth. Owing to its proximity to the sun it is but rarely visible, and then either just before sunrise or just after sunset.

Mercury, a metallic chemical element belonging to the same group as cadmium and zinc and distinguished by its low melting-point, which renders it liquid under ordinary conditions. Symbol: Hg; atomic number 80; atomic weight 200.61. Mercury or quicksilver (i.e., "living" silver) occurs native, as at Almaden, in Spain, and also as its sulphide, cinnabar, in Spain, Italy, Mexico and S. America; from cinnabar the metal is obtained by roasting in a current of air. It is very poisonous in both the liquid and the vapour states, and this property is shared by its compounds, e.g., mercurous chloride or calomel (used in medicine as a purgative), mercuric chloride, or corrosive sublimate (used in dilute solution as an antiseptic); and mercuric fulminate, used as a detonator since it explodes on being struck. Solutions of other metals in mercury are known as amalgams.

Meredith, George, English poet and novelist, born in Hampshire; began his literary career in 1851 as a poet. His novels appeal only to a select few, but by them they are regarded with admiration. *The Order of Richard Feverel*, published in 1859, is by many considered his best, others being *The Egoist*, *Diana of the Crossways*, and *Evan Harrington*. (1828-1909).

Merganser, a genus (*Mergus*) of ducks (*Mergus merganser*) is a typical species. The head is crested in the male, and the colouring vivid. The red-breasted merganser (*M. serrator*) has a green head, red breast, and back plumage black edged with white.

Meridian, an imaginary great circle passing through the poles at right angles to the equator; the Meridian of Greenwich is the point from which longitudes are calculated.

Mérimée, Prosper, French writer, born in Paris; abandoned law for literature; became under Louis Philippe inspector-general of historical documents. He wrote stories, historical dissertations, and

travels, among other works *Guzla, Chronicles of Charles IX.*, the *History of Don Pedro, King of Castile, Letters to an Unknown*, *Colomba* and *Carmen*. (1803-1870).

Merino, a species of sheep, native to Spain, raised chiefly for its wool. The flesh is of little value.

Merioneth, a mountainous county of Cardigan Bay, between Caernarvon and Cardigan. Lofly peaks including Aran Mawddwy, Cader Idris, and Aran Benllyn and the rivers, Dee and Dovey, and Lake Bala, afford picturesque scenery. The soil is fit only for sheep-grazing; but there are slate and limestone quarries, manganese and gold mines. Festiniog is the largest town. The county town, Dolgelly, on the Wnion, has woollen and tweed manufactures. Area, 660 sq. m. Pop. 43,200.

Merit, The Order of, a British order instituted in 1902, limited in number to 24 men and women of eminent distinction; it confers no precedence; the ribbon is blue and crimson.

Merlin, a legendary Welsh prophet and magician, child of a wizard and a princess, who lived in the 5th Century, and was subsequently a prominent personage at King Arthur's court; prophecies attributed to him existed as far back as the 14th Century; Tennyson represents him as bewitched by Vivien.

Merlin (*Falco asalon*), a species of small falcon, which breeds on moors in the British Isles, nesting on the ground. The adult male is about 10 in. in length. The plumage of the male is lead colour streaked with black, throat nearly white, under-wing coverts rufous-brown; of the female, brown with brown and mottled underparts. It preys on small birds. The Red-headed Merlin (*Falco chiqueira*) is an Indian species.

MERLIN

Mermaids and **Mermen** (i.e., sea-maids and sea-men), a class of beings fabled to inhabit the sea, with a human body as far as the waist, ending in the tail of a fish; the females of them represented above the surface of the sea combing their long hair with one hand and holding a mirror with the other. They are supposed to be endowed with the gift of prophecy, and to be of an amorous temper. The belief in these half-human creatures is traced back to Oannes, the fish-god of the Babylonians, though certain sea-beasts with a semi-human expression especially the sea-mammals known as dugongs may have given rise to it.

Meroë, or **Meroe**, a wide tract of Upper Nubia between the Nile and the Blue Nile, and the Atbara rivers. Ruins on the Nile, 28 m. N.E. of Shendi, are believed to be those of Meroë, the ancient capital of Ethiopia.

Mervingsians, a name given to the Merovingians, first dynasty that ruled over France after the downfall of the Roman empire, until A.D. 750; being derived from Merwig, the founder of the family.

Merrimac, a river in New Hampshire, U.S.A., which rises in the White mountains and flows by a course of about 150 m. into the Atlantic near Newburyport. It supplies water-power for industrial purposes. Lowell, Lawrence, Manchester and Concord are among the towns on its banks.

Merriman, Henry Seton, pseudonym of Hugh Stowell Scott, novelist, son of a Newcastle-on-Tyne shipowner. Spent some time in an underwriter's office. Among his more important works are *The Sowers*, *In Kedar's Tent*, *Barlasch of the Guard*. (1862-1903).

Mersey, English river, rising in NW. Derbyshire, flows westward 70 m. between Lancashire and Cheshire to the Irish Sea; is of great commercial importance, having Liverpool on its estuary. Its chief tributary is the Irwell, on which stands Manchester. Its estuary from Birkenhead to Liverpool is crossed by a railway tunnel, opened in 1886, and by a vehicular tunnel, 2 m. in length, opened 1934.

Merthyr Tydfil, industrial town in Glamorganshire, S. Wales, on the Taff, 15 m. NW. of Cardiff; is the centre of great coalfields and of enormous iron and steel works; its industrial life has suffered greatly since the economic crisis of 1931. Pop. 65,600.

Merv (or *Meru*), an oasis in the Turkoman S.S.R., occupied by Russia in 1883, 60 m. long by 40 m. broad, producing cereals, cotton, silk, etc.; breeds horses, camels, sheep. The town of the same name, on the Trans-Caspian railway, has a pop. of c. 10,000.

Meshed, a walled city, capital of the province of Khorassan, in N. Iran. It stands in a fertile plain; the mausoleum of the Imam Riza is visited by pilgrims. The city, a commercial centre, has manufactures of velvets, silks and carpets. Pop. 140,000.

Mesmer, Friedrich Anton, a German physician, born near Constance; trained for the Church, but took to medicine; was the founder of animal magnetism, called *mesmerism* after him, his experiments in connection with which created a great sensation, particularly in Paris. His system was reported on unfavourably by a committee of enquiry, and he retired into obscurity. (1733-1815).

Mesmerism, or animal magnetism, name first given (from Anton Mesmer, *q.v.*) to the practice, now called hypnotism (*q.v.*) of inducing artificial or hypnotic sleep for therapeutic purposes.

Mesopotamia, the former name of the territory "between the rivers" Euphrates and Tigris, now included in Iraq (*q.v.*). It was in pre-classical times the centre of a series of great civilizations, centering on Sumer, Nineveh, Babylon, and other great cities.

Message, André Charles Prosper, French composer of operas born at Montluçon; a pupil of Saint-Saëns; director of Opera at Paris from 1907-1914. His works include *La Basoche*, *Véronique*, *Fortunio* and *L'Amour Masqué*. (1853-1929).

Messalina, a Roman empress, the wife of Claudius I.; a byword for cruelty and licentiousness; she was killed by the Emperor's order after the exposure of her infidelity in A.D. 48.

Messenia, a province of Greece, mainly the fertile peninsula between the Gulfs of Arcadia and Coron. The Messenians after two long wars were conquered in 608 B.C. by the Spartans and fled to Sicily, giving their name to Messina (*q.v.*). Pop. of present province, 248,000.

Messiah (i.e., the Anointed One), the leader to whom the Jews looked forward as restorer of their national glory. In the view of Christians the prophecies relating to him were fulfilled in the person of Jesus Christ, to whom the title is therefore applied. Claimants to the Messiahship have arisen from time to time among the Jews, the most famous being Sabbatai Zevi in the 17th Century.

Messina, ancient city on a bay at the strait of the same name, which separates the island from Italy; has a 13th Century cathedral, two old castles, and a university, founded 1549. It manufactures light textiles, coral ornaments, and fruit essences, and has

an excellent harbour. In 1908 it was the scene of a great earthquake, in which over 70,000 people perished. Pop. 183,000.

Messina, Strait of, 24 m. long and at separates Sicily from the Italian mainland; here were the Scylla and Charybdis of the ancients.

Messines Ridge, a spur of rising Ypres, Belgium, captured by the Germans in the World War after severe fighting in Nov., 1914, and the scene of further fighting in June, 1917, and April, 1918.

Message, a dwelling-house with buildings and land attached for the use of the household.

Metabolism, name given to the continually in progress in the cells of living matter, and essential to life. Constructive metabolism, or the changes involved in building up protoplasm from food, is known as *anabolism*, and the destructive process as *katabolism*.

Meta Fuel, a white solid made by to ice-cold acetaldehyde, (*q.v.*). It burns with a non-luminous flame, and is therefore used as a solid substitute for methylated spirit in heating lamps.

Metallurgy, the extraction of metals from their ores and the subsequent purification of the crude products. A few metals, such as gold, platinum and mercury, occur in a more or less pure form, but most are found as oxides (e.g., iron, aluminium) or as sulphides (e.g., lead, copper, zinc, nickel). The ores are subjected to a preliminary roasting, which drives off moisture and volatile impurities, and also, in the case of a sulphide, converts the ore into an oxide. The oxide is then mixed with carbon and heated in a furnace; in this way gaseous oxides of carbon are formed and escape, while the fused metal sinks to the bottom.

The crude metal is purified in various ways, e.g., by electrolysis. Electrical methods are also being increasingly used for the actual extraction of metals: thus aluminium is obtained electrolytically from aluminium oxide, sodium from sodium hydroxide, and calcium from calcium chloride. With certain metals, special methods are employed; thus in the purification of nickel the crude metal is heated in a stream of carbon monoxide gas, with which it forms the volatile product nickel carbonyl. This passes on, leaving impurities behind, and is then heated to a higher temperature, when it splits up again into nickel and carbon monoxide (Mond Process for nickel).

In Spain, copper is extracted from copper sulphate solution by the addition of scrap iron, which passes into solution as iron sulphate while the copper is deposited in the form of a powder.

Metals. Metallic elements are distinguished from non-metals (i) by possessing high specific gravity, melting-point and boiling-point, a peculiar metallic lustre, and the capability of taking a brilliant polish, (ii) by being malleable and ductile and good conductors of heat and electricity, and (iii) by the fact that their chlorides are true salts, usually stable in the presence of water, and that their normal oxides are basic, reacting with acids to form salts and water. There are, however, many exceptional metals, e.g., sodium, which is lighter than water and has low melting and boiling points, and bismuth, which is brittle and forms a chloride that is decomposed in water. The principal metals are sodium, potassium, calcium, iron, copper, silver, gold, magnesium, zinc, lead, tin, aluminium, nickel and chromium. A mixture of metals is called an alloy, e.g., brass (a mixture of copper and zinc).

Metamorphic Rocks, those igneous or sedimentary rocks which have been altered by extreme heat, moisture or pressure, e.g., sandstones are changed into quartzite, limestones into marble, clays into slates, and granites into gneisses.

Metaphysics, the science of being as the ultimate grounds of all other forms of knowledge. It is a branch of philosophy which deals with the fundamental principles that underlie reality. It deals with the relations between cause and effect, investigates the true nature of time (q.v.) and space (q.v.) and discusses the question whether reality is given in experience. The problems dealt with by metaphysics existed long before the term was invented. Literally the term (which is, properly, "metaphysic") means "after physics" and was applied to those writings of Aristotle which appeared after his *First Philosophy*.

Metazoa, that division of the animal multicellular organisms, as distinct from Protozoa, or unicellular organisms; but the term is more generally restricted to invertebrate multicellular animals.

Metempsychosis, or "transmigration of souls," the belief that the human soul after death passes into the body of another human being or an animal. In a broader sense it implies a conviction that the human phase is only one of a series of incarnations both in the past and the future. The belief is found in Indian religions, and was held by the ancient Egyptians as well as among some other peoples.

Meteorite, the name given to meteors which reach the surface of the earth before complete vaporization occurs. During their fall meteorites appear as fireballs, and set up sound-waves similar to thunderclaps. Their constituents are nickel, chromium, magnesium and a large proportion of iron.

Meteorology, that branch of natural science which deals with the factors influencing weather and climate. It was first established on scientific lines through the invention of the thermometer by Galilei and of the barometer by Torricelli, Boyle, Hooke, Pascal and others. The Meteorological Office of London was established in 1854, under the control of the Board of Trade; it is now a department of the Air Ministry. From the collation of weather reports, barometric heights, direction of winds, thermometer readings, and similar data, received from numerous and widely distributed observers, the prediction of weather over a few hours now reaches a high degree of certainty and precision, while longer forecasts, though less reliable, can often be made with some confidence.

The principal factor in making the forecast is a study of the distribution of the various pressures of the atmosphere at the time concerned. Spots at which the pressure is identical are plotted on the map and joined by isobars (q.v.). It is often noticed that many of the isobars form closed rings, approximately circular or elliptical in shape, such an arrangement, surrounding a region of lower pressure, being known as a depression or cyclone.

In the Northern hemisphere, a depression is marked by winds blowing in a counter-clockwise direction round its centre, and is usually accompanied by rain and a higher temperature than is general for the time of year; it moves more or less as a whole, most frequently from W. to E. In an anticyclone the pressure is high, the isobars are widely separated, and, in the Northern hemisphere,

the winds (much lighter than in a depression, or even scarcely perceptible) blow in a clockwise direction. A main depression is often accompanied by secondaries, which give rise to stormy weather with high winds, thunderstorms etc.

Meteors, small pieces of solid matter which appear in the earth's atmosphere as "shooting stars"; their size varies from a few ounces to several tons; as a rule they commence to glow when about 80 m. from the earth, owing to the friction of the air; they are usually destroyed during flight, but occasionally one reaches the ground; they appear to enter the atmosphere at a speed of about 30 m. per hour.

Methane, a simple hydrocarbon produced by decaying vegetable matter, and called "marsh gas" from its natural occurrence in swampy areas. It also occurs in mines as "firedamp"; with air it forms an explosive mixture which is responsible for many mining disasters.

Methodists, a body of Christians ecclesiastically governed by a Conference with subordinate district synods, and professing evangelical principles, which they teach agreeably to the theology of Arminius; the name is also given to the followers of Whitefield, who are Calvinists in certain respects. The movement was founded in 1729 at Oxford. Their doctrines are substantially those of the Church

Primitive Methodists, Methodist New Connexion, and others; several of these united in 1907 to form the United Methodists, and in 1932 this body united with the Wesleyan Methodists and Primitive Methodists to form the Methodist Church. Methodists are numerous in N. America, where the leading body is the Methodist Episcopal Church. In the world to-day there are approximately 13 million Methodists.

Methuen, Paul Sandford, third Baron, British soldier, fought with distinction in Ashanti, Egypt, Bechuanaland and in the Boer War; Governor of Natal, 1909-1915; and of Malta, 1915-1919. (1845-1932).

Methuselah, father of Noah; according to the book of Genesis he reached the unusual age of 969.

Methyl Alcohol, an alcohol obtained by distilling monohydric alcohols with dilute potash, and prepared mainly from the products of the distillation of hard woods.

Methylated Spirits, ethyl (ordinary) alcohol containing about 10 per cent. of methyl alcohol (wood spirit), and small quantities of paraffin oil and pyridine to render it unfit for drinking; it is not subject to the tax on pure spirit and is used for many industrial purposes.

Metre, the name given to the unit of length in the metric or decimal system, equal to 39.37 English inches, the tenths, the hundredths, and the thousandths of which are called from the Latin respectively decimetres, centimetres, and millimetres, while ten times, a hundred times, and a thousand times are called from the Greek respectively decametres, hectometres, and kilometres. A metre was taken as one forty-millionth part of the earth's circumference.

Metric System, the system of measures in use in almost all Western countries except Great Britain and the U.S.A. It is based on the metre, a unit of length of about 39 in.; the litre, a unit of capacity of about 1½ pints; and the gram, of which 1,000 make 1 kilogram, roughly 2½ pounds. These units are divided or multiplied on a decimal system.

from the East to visit the infant Jesus (Matt. ii) are known as the Three Magi. Traditionally their names were Gaspar, who brought frankincense, the emblem of divinity; Melchior, who brought gold, the emblem of royalty; and Balthasar, a negro, who brought myrrh, the emblem of mortality. Their bodies are alleged to have been translated in the Middle Ages to Cologne, where their bones are still shown in the Cathedral.

Magic, the supposed art of influencing the course of nature or future events by occult means; the word is derived from the "Magi" (q.v.) who were believed to be skilled in enchantment. Magic, extensively practised by primitive man, is one of the main sources from which has grown religion on the one hand and natural science on the other. It has been practised in one form or another in every age and country; and has frequently been developed into an elaborate system. "Black" magic is that directed to the production of harmful or undesirable effects, or which involves supposed communication with evil spirits. "White" magic is either beneficent or neutral, and includes such widely different practices as astrology and conjuring.

Magic Lantern, a device for casting diagrams from an illuminated slide on to a screen, for entertainment or instruction. The lantern has a concave mirror to increase the intensity of the light (generally an incandescent lamp or an arc), a condensing lens which distributes the light over the slide, and a projection lens to focus the image on the slide. The slide is a transparent positive of the required picture printed from a glass negative on to a glass plate.

Magistrate, one in whom is vested authority in affairs of civil government; in other words, an administrator of the law. In this sense the King is the first magistrate in a monarchical state, while in a republic the President is the chief magistrate. The word is now more usually applied to subordinate officers to whom a part of executive judicial power is delegated; in England it means, specifically, a minor judicial officer, such as a justice of the peace, a stipendiary, or a police magistrate; in Scotland a provost or bailie of a burgh. Prior to the Local Government Act, 1888, the administrative work of the county fell to the lot of the justices or magistracy, but that Act, while leaving them their judicial functions, took away the bulk of their administrative functions. (See also *Justices of the Peace*).

Magna Carta, "the great charter," John by the barons of England at Runnymede on June 15, 1215, that guaranteed various rights and privileges to the subjects of the realm, and established the supremacy of the law over the will of the monarch; it has ever since been looked upon as the foundation-stone of English political liberties.

Magna Græcia (Great Greece), name given in classical times to the southern part of Italy, which had been extensively colonized by the Greeks.

Magnalium, a light, easily-worked alloy of aluminium (about 95 per cent.) and magnesium (about 5 per cent.). It is used in the construction of aircraft, internal combustion engines, etc.

Magnesia, the old-fashioned name for a number of varieties of magnesium compounds. Thus *calcined magnesia* is magnesium oxide, MgO ; *magnesia alba levis* is a white powder precipitated on addition of sodium carbonate to a cold solution of magnesium sulphate; *magnesia alba powderosa* is a somewhat similar compound obtained by adding sodium carbonate solution to a boiling concentrated solution of magnesium sulphate.

U.E.

Fluid magnesia is a solution of magnesia bicarbonate. Calcined magnesia is used as a refractory lining for electric furnaces; the other varieties find application in medicine for the relief of minor ailments of the alimentary canal.

Magnesium, a metallic chemical element, related to beryllium, calcium and zinc. Symbol Mg ; atomic number 12; atomic weight 24.32. Being chemically very active, it is not found free in nature. It is, however, widely distributed in the form of its compounds, e.g., dolomite (a double carbonate of magnesium aluminate), magnesite, spinel (magnesium aluminate), and asbestos or calcium magnesium silicate. It is also one of the constituent elements of the green colouring matter (chlorophyll) of plants, and is therefore essential to plant life. It is a silvery-white metal which burns with an intensely brilliant white light and is therefore used in fireworks, star-shells, flashlights, etc. It is also an ingredient of many alloys, e.g., magnalium (q.v.).

Magnesium Sulphate. See *Epsom salt*.

Magnetic Induction, a magnet's power of producing magnetism in pieces of iron or steel near it.

Magnetic Poles, (of the earth), two nearly opposite points on the earth's surface, where the dip of the needle is 90° . They are at a considerable distance from the geographical poles, and their positions are not constant.

Magnetism. Magnets have been known since classical times, and

owe their name to the fact that lumps of natural magnet-stone (lodestone, i.e., "way-stone" or "guiding-stone,"—chemically, magnetite) were found in the earth near Magnes (the modern Manissa, near Smyrna). The use of lodestone in compasses was quickly superseded when it was discovered that a steel needle could itself be magnetized by rubbing it (always in the same direction) with a fragment of lodestone, and in the 12th Century Alexander Neckham describes the pivoted needle that was carried on ships to show sailors their course. The modern science of magnetism began with William Gilbert, who, in 1600, published his celebrated treatise *On the Magnet and on that Great Magnet the Earth*.

It is a peculiar fact, hitherto unexplained, that the earth behaves as though it were a huge magnet, with poles near (but not at) the N. and S. geographical poles. Upon this behaviour, the use of the magnetic compass depends, the N.-seeking pole of the compass needle pointing towards the N. magnetic pole of the Earth, and the S.-seeking towards the S. Every magnet is surrounded by a region in which its influence may be experienced, and this is known as its magnetic field. A magnetic field may be mapped by sprinkling iron filings in the field and observing their subsequent conformation.

If a coil of insulated wire is wound round a piece of soft iron and a direct current of electricity is passed through the coil, the iron is found to be a magnet as long as the current is passing, but loses its magnetism as soon as the circuit is broken; this property is made use of in various instruments, e.g., the electric bell. A similar coil of wire, without the iron, and free to rotate in a horizontal plane, is found to behave like a compass needle when the current is flowing; it is, in fact, a magnet. If the coil forms a closed circuit, without a

MAGNET
(showing
field of force)

X

supply of electricity, a momentary current is induced in it if a magnet is suddenly pushed into it. This fact, discovered by Faraday, is the principle of the dynamo or generator.

Magneto, an apparatus for generating electric currents to produce ignition in an internal combustion engine. It is used in aeroplanes, tractors, motor boats, etc., but has generally been superseded in motor cars by a coil and battery circuit.

Magnificat, *The*, the hymn of the Virgin Mary (Luke i, 46-55); used as part of the evening service in both the Anglican and Roman Catholic Churches, and often sung to elaborate musical settings.

Magnitude, in astronomy the measure of a star's brightness. Ptolemy, in cataloguing the stars, assigned the fifteen brightest known to him to the first magnitude, and those just visible to the naked eye to the sixth. On the modern scale, those of the first magnitude are 2½ times as bright as those of the second, those of the second 2½ times as bright as the third, and so on. Some have a fractional or even negative magnitude, e.g., that of the sun is minus twenty-six; the absolute magnitude is the intrinsic brightness, making allowance for the star's distance.

Magnolia, the typical genus of the *Magnolia*, natural order Magnoliaceae, comprising 21 species of trees and shrubs native to China, Japan and North America. They bear large flowers and foliage, on account of which they are cultivated in England. Some hybrid varieties have been developed.

Magpie (*Pica pica*),

a familiar bird of the crow (Corvidae) family, common in the British Isles. It is about 18 in. long, has a long glossy tail, greenish-black plumage and black and white wings and underparts.

MAGPIE

Magyars, the dominant race in Hungary, a garr, a people of Finno-Ugric stock who appear to have migrated from the plains of Central Asia.

Mahabharata, one of the two great Indian, epic poems of ancient India, a work of slow growth, with no single author. It relates the story of a war between two peoples in Northern India, in the early days of the Aryan settlement, and consists of upwards of 100,000 verses.

Mahaffy, Sir John Pentland, Irish scholar, born in Switzerland. He was educated in Germany and in 1856 entered Trinity College, Dublin, where he became a fellow in 1864. In 1871 he became Professor of Ancient History and was knighted in 1918. His published works include *Greece from Homer to Menander*, *History of Classical Greek Literature*, and *Alexander's Empire*. (1839-1918).

Mahadi, a great Indian river which, after flowing eastward for over 500 m., the last 300 of which are navigable, falls into the Bay of Bengal near Cape Palmyras. Its volume in flood is enormous, and renders it invaluable for irrigation.

Mahatma, literally "great soul," Indian name, used also by the Theosophists, for a prominent religious teacher; in recent times it has frequently been applied to Gandhi.

Mahdi, a religious teacher and revivalist, equivalent in many ways to the Jewish Messiah, whom certain Mohammedan sects expect to arise in a future age and lead

them against the infidel world. The name was applied particularly to Mohammed Ahmed, a fanatic born in Dongola about 1843 who claimed the title, and at the head of an army of dervishes raised his standard in the Sudan. He was unsuccessfully opposed by the Egyptians, and Khartoum, occupied by them, fell into his hands, General Gordon being slain just as the British relief army under Lord Wolseley approached its walls in 1885, a few months after which Ahmed died at Omdurman.

Mah Jongg, a Chinese game played with 144 domino-like pieces, or tiles, usually by four players. The pieces are arranged in six suits, and counters are used. The game had an era of popularity in America and Europe in the nineteenth century.

Mahler, Gustav, Austrian musical composer, of Jewish antecedents, born at Kalischt. He conducted from 1880 in various parts of Europe, and in 1897 became director of the Court Opera at Vienna. Visited England and conducted German opera at Drury Lane, 1892. He composed several symphonies, and the famous *Lied von der Erde*. (1860-1911).

Mahmud II, Sultan of Turkey; came to the throne in 1809; crushed a rebellion on his accession by putting to death his brother, on whose behalf the Janissaries had risen; introduced various military and administrative reforms; by his defeat at Navarino in 1827 he lost Greece, which declared its independence, and at his death was in conflict with Mehemet Ali, Governor of Egypt. (1785-1839).

Mahmud of Ghazni, Sultan of Afghanistan from 999, who, after deposing his brother Ismail, founded a powerful Afghan state from which he made repeated raids into India. (d. 1030).

Mahogany, a name applied to a number of timbers of various botanical origins. The true mahogany is the wood of *Suiclenia Mahogani*, a tree indigenous to tropical America. The colour varies from yellow to a rich red brown; it is very hard and fine-grained and can be highly polished; hence its great popularity for furniture. Other varieties include the *Suiclenia macrophylla* of British Honduras, and "Spanish" mahogany, grown in the West Indies. The *Khaya senegalensis*, or African mahogany, grows in Nigeria and Uganda.

Mahomet. See Mohammed.

Mahony, Francis, Irish author, born in Cork, a priest, who became known by his *nom de plume* of Father Prout; contributed to *Fraser's Magazine*, and was foreign correspondent to the *Daily News* and the *Globe*; his poem *The Bells of Shandon* is well-known. (1804-1866).

Mahrattas, Hindu race in Central India, which in the 18th Century secured power over a large part of that country, but came into conflict with the British, and were finally subdued in 1843. Their successors still rule in Gwalior, Indore, and Baroda.

Maia, in Greek mythology, the daughter of Atlas, the eldest of the seven Pleiades (q.v.), and the mother by Zeus of Hermes.

Maiden, The, an instrument of execution, resembling the guillotine, that appears to have been in use in Scotland during the 15th and 16th Centuries; one is preserved in the Antiquarian Museum, Edinburgh.

Maiden Castle, a prehistoric hill-fort, top earthwork in Dorsetshire, England, near Dorchester. It was inhabited from neolithic times and was finally captured and destroyed by the Romans.

Maidenhair Fern, the common ferns of the genus *Adiantum* of the order Polypodiaceae, comprising 190 species of world-wide distribution but especially abundant in tropical America, *Adiantum Capillus-veneris*, a small, delicate European fern with many spreading capillary branches, used for ornament, is occasionally found in Britain.

MAIDENHAIR FERN

Maidenhead, market town of Berkshire, on the right bank of the Thames, 25 m. W. of London. It is a popular river resort, famous for the beautiful woods in the neighbourhood; regattas are held annually. Pop. 24,000.

Maid of Norway, daughter of Eric II., king of Norway, and through her mother heiress to the Scottish crown; died on her passage to Scotland in 1240.

Maid of Orleans, Joan of Arc, so defence of Orleans against the English. See *Joan of Arc*.

Maidstone, county town of Kent, on the Medway, 30 m. S.E. of London; has several fine old churches and historical buildings, a grammar school and a school of art and music, numerous paper-mills and breweries, and does a large trade in hops. Pop. 47,000.

Maimonides, Moses, Spanish-Jewish born at Cordova; was a man of immense learning, and physician to the Sultan of Egypt; codified the principles of the Jewish faith, and drew up the "thirteen principles" which became its recognised summary; his best-known work is *Moreh Nebuchim*, or *The Guide of the Perplexed*. (1135-1204).

Main, the largest of the right-bank tributaries of the river Rhine, Germany, 310 m. in length and navigable for about 200 m.; it flows by Würzburg and Frankfurt to meet the Rhine at Mainz.

Maine, the most N.E. State in the American Union lies between Quebec and New Hampshire on the W. and New Brunswick and the Atlantic on the E., and is a little larger than Ireland; a picturesque State, with high mountains in the W. (Katahdin 5,000 ft.), many large lakes, including Moosehead, numerous rivers, and a much indented rocky coast. The climate is severe but healthy, the soil only in some places fertile. The rainfall is abundant; hunting and shooting are good. Dense forests cover two N.; potatoes, oats, hay and apples are the chief crops. The principal industries are the making of paper, boots and shoes, and textiles; the fisheries are valuable; timber, building stone, cattle, wool, and ice are exported. Early Dutch, English and French settlements were unsuccessful till 1630. From 1651 Maine was part of Massachusetts, till made a separate State in 1820. The population is English-Furitan and French-Canadian in origin. The capital is Augusta; Portland is the largest city and chief seaport; Lewiston has cotton manufactures. Area, 32,560 sq. m. Pop. 797,000.

Maine, former French province, S. of Normandy, its chief town being Le Mans. It was captured by William the Conqueror from the French King in 1073; Henry II. inherited it from his mother, Matilda, wife of Geoffrey of Anjou. In 1445 the English ceded the province to René, Count of Anjou, and in 1481 it was annexed to France. It is now represented by the depts. of Sarthe and Mayenne.

Maine, Sir Henry, English jurist, legal and Professor of Jurisprudence at Oxford; wrote on *Ancient Law*, and important works on ancient institutions generally. His *Ancient Law* is chiefly notable for its brilliant identification of modern with ancient institutions through the (then) new method of evolution and it was really this work which earned for him his knighthood. (1822-1888).

Maine-et-Loire, dept. of N.W. France, watered by the rivers Loire and Maine; mainly agricultural, producing cereals, fruits, flax and hemp, with textile manufactures. Capital, Angers. Area, 2,810 sq. m. Pop. 477,700.

Maintenance, Cap of, an ermine-lined, crimson velvet cap used in the Coronation ceremony of British monarchs.

Maintenon, Françoise d'Aubigné, Marquise de, born in the prison of Niort, where her father was incarcerated as a Protestant; became a Catholic, married the poet Scarron in 1652, but was widowed in 1660; was entrusted with the education of the children of Louis XIV. and was secretly married to him in 1684. She exercised a great influence over him, and on his death in 1715 retired into the Convent of St. Cyr, which she had herself founded. (1635-1719).

Mainz, Rhine, opposite the mouth of the Main, one of the oldest cities in Germany, and the centre from which Christianity spread over that country; it has a magnificent cathedral, restored in 1878; a large transit trade is done, and the making of furniture, leather goods, and machinery are important industries; Gutenberg (q.v.) was a native. Pop. 143,000.

Maistre, Joseph, Comte de, French writer, born in Chambéry, was ambassador at St. Petersburg from 1803 to 1817; wrote numerous works, especially in defence of Catholicism, the chief *Du Pape* and *Soirées de St. Petersburg*. (1754-1821).

Maitland, Frederic William, English legal historian, born in London; educated at Eton, and Trinity College, Cambridge; Reader of English Law, Cambridge, 1884; Downing Professor, 1888; founded 1887, the Selden Society, for the study of the history of English law; edited many of its publications, and threw a new light on many ancient legal institutions, by applying the evolutionary principle. (1850-1906).

Maize, a cereal grass, *Zea Mays*, also called mealies and Indian corn; in America it is called simply corn. It appears to have originated from Mexico but is now extensively cultivated in other tropical and sub-tropical parts of the world.

There are wide variations in the colour and shape of the grain of different varieties, the colour ranging from yellow to white and the shape from spherical to almost flat. The type chiefly grown in Kenya and other E. African territories and in S. Rhodesia is a flat white "dent" maize. The seeds and stems yield respectively animal food and ensilage. The hulled corn for human consumption is known as frumenty. Dextrine, glucose, maltose and dextrose are other products from the plant.

MAIZE

Majolica, a kind of enamelled pottery imported into Italy from Majorca, known also as faience from its manufacture at Faenza, and applied also to vessels made of coloured clay in imitation.

Major, a commissioned army officer rank, lying next above captain and below lieutenant-colonel; in rank he is the lowest of the field officers. In the British infantry one major is second-in-command of the regiment while two hold company commands. His badge is a crown.

Majorca, the largest of the Balearic Is., is 130 m. N.E. of Cape San Antonio, in Spain; mountains in the N. rise to 5,000 ft., their slopes covered with olives, oranges, and vines; the plains are extremely fertile, and the climate mild and equable; manufactures of cotton, silk, and shoes are the industries; the capital, Palma, is on the S. coast, at the head of a large bay of the same name. The island was a stronghold of the insurgents during the Spanish Civil War which broke out in 1936. Pop. c. 240,000.

Major-General, in the British army, a lieutenant-general in rank; holds a divisional command and his badge is a crossed sword and baton surmounted by a star.

Majuba Hill, a spur of the Drakensberg in Natal, famous as the scene of a defeat of a small British force under Sir G. Colley in a night attack in the first Anglo-Boer War, 1881.

Malabar, district of India, in the W. of the Ghats down to the Indian Ocean, and extending along the coast for 145 m.; very rainy; covered with vast forests of teak; produces rice, coffee, and pepper. Calicut is the chief town. Pop. c. 2,500,000.

Malacca, one of the British Straits Settlements in the S. of the Malay Peninsula, a Portuguese possession from 1511 until 1641, when the Dutch captured it, being driven out by the British in 1795; restored to the Dutch in 1818, it finally became British in 1824. Rice, tapioca, rubber, and fruit are produced, and tin mined. Area, 640 sq. m. Pop. 212,000. The capital of the same name, about 100 m. N.W. of Singapore, has a pop. of 38,000.

Malachi, the last of the "Twelve Minor Prophets" of the Old Testament, a book of unknown authorship, the name meaning "My Messenger." It is an appeal for greater sincerity in devotion to Jehovah, and was written after the Temple had been rebuilt.

Malachite, a copper ore, found chiefly in Russia, consisting chemically of the basic carbonate of copper. Good specimens are used for decorative jewellery, etc., since the substance is of a fine green colour and can easily be cut and polished.

Malachy, St., archbishop of Armagh in the 12th Century; full name Malachy O'Morgair; was a friend of St. Bernard, who wrote his *Life* and in whose arms he died at Clairvaux; a famous series of prophecies relating to future popes goes by his name, but is a forgery. (1094-1148).

Malaga, Spanish seaport, 66 m. N.E. of Gibraltar, an ancient Phœnician town; it exports olive-oil, wine, raisins, lead, etc., and manufactures cotton, linen, machinery, pottery, etc.; its magnificent climate makes it an excellent health resort. Pop. 204,000.

Malaria, a morbid condition, also known as marsh or jungle fever, common in tropical swampy regions, such as the Gold Coast, Honduras and Ceylon, but also well known in Palestine, Italy and parts of America, and carried by certain mosquitoes—particularly *Anopheles*—and gnats. It affects the system through the blood often as long as 12 months after the subject has been exposed to it, and may exert its influence throughout life. It induces ague, intermittent fevers and some kinds of yellow fever, while certain forms are characterized by particular

kinds of periodicity. Preventive measures include the installation of tanks with fish to devour the larvae of the mosquito, the reclamation of swampy land, and so forth. The sole known effective remedy for the disease is quinine. As a prophylactic, doses up to 3 or 4 grains are taken regularly by persons living in regions, such as Ceylon, where malaria is endemic.

Malaya, or British Malaya, the southern portion of the Malay Peninsula, comprising (1) the colony of the Straits Settlements, viz., Singapore, Penang, Malacca, Labuan, Wellesley Province, Christmas and Cocos Islands; (2) the Federated Malay States, viz., Perak, Selangor, Negri Sembilan and Pahang; (3) the Unfederated Malay States, viz., Johore, Kedah, Perlis, Kelantan, and Trengganu. The total area is about 51,000 sq. m. Trading is chiefly in the hands of Chinese. Crops include rubber, coconuts, areca nuts, coffee, tea, spices and tobacco, and the minerals gold, tin, coal, tungsten ores, iron ore, and phosphates. Pop. c. 4,800,000.

Malay Archipelago, the group of hundreds of islands stretching from the Malay Peninsula S.E. to Australia between the North Pacific and the Indian Ocean, of which Borneo, Sumatra, Java, and Celebes are the largest. They are divided between Great Britain and the Netherlands.

Malay Peninsula, the easternmost peninsula of S. Asia, comprising British Malaya and the portion of Siam immediately to the N. as far as the Kra isthmus. The total length is about 700 m. The chief products are rubber, rice, tea and tin.

Malays, the native inhabitants of the neighbouring islands, a mixed people of Mongolian, Negro and Australoid elements. They are of a dark-brown or tawny complexion, short of stature, having flat faces, black coarse hair, and high cheek-bones; the more civilised of them are Mohammedans.

Malcolm Canmore, Scottish king, son of Duncan whom Macbeth slew, succeeded his father in 1040 as King of Cumbria and Lothian, and in 1057, on Macbeth's death, became King of Scotland. After 1066 his reign was one long conflict with the Normans in England; in 1093 he was slain in battle at Alnwick. His second wife was the saintly Margaret, whose influence did much to bring Scotland into touch with European civilisation. There were other Malcolms, Kings in Scotland, ruling over the Southern part of the country.

Maldiv Islands, a chain of several islands in the Indian Ocean stretching 550 m. southward from a point 300 m. S.W. of Cape Comorin, a dependency of Ceylon; grain and fruits are produced; the people are Mohammedans. Pop. 80,000.

Maldon, a municipal borough and an ancient market town of Essex, on the R. Blackwater. Malt, flour-milling, boat-building and fisheries are carried on. It is a favourite yachting centre. Pop. 8,600.

Malebranche, Nicolas, French philosopher, born in Paris; in early life a priest of the Oratorian congregation. His famous work, *De la Recherche de la Vérité*, published in 1675, seeks to bridge over the gulf which separates mind from matter by establishing that the mind immediately perceives God, and sees all things in Him. (1638-1715).

Male Fern, a common hardy fern of the order Polypodiaceae, found wild in Britain and elsewhere in the northern hemisphere. It has light green lance-shaped fronds that may reach a length of 4 ft.

Malesherbes, *Lameignon de*, French Paris; adviser of Louis XVI, and his defender at his trial, for performing which office he was afterwards guillotined. He had been censor of the press, and to his liberal-minded censorship the world owes the publication of the *Encyclopédie*. (1721-1794).

Malherbe, *François de*, a French lyric poet and miscellaneous writer, born in Caen; is from his correct though affected style regarded as one of the reformers of the French language. (1555-1628).

Malic Acid, an acid, discovered by Scheele in 1785, which occurs in the juice of many unripe fruits, e.g., apples (whence the name, from the Latin *malum*) and gooseberries. It is a white crystalline solid, readily soluble in water.

Malice, in law, indicates not merely evil will but criminal intention. Sometimes the mere doing of a thing is made a crime by statute and intention is immaterial—e.g., abducting a girl under 16 years of age; but where a vicious will (*mens rea*) is essential, it may be manifested by criminal intention or criminal negligence. Criminal intention or malice in the technical sense is simply the design of doing an act forbidden by the criminal law without just cause or excuse. Malice in this sense is thus found not only where the mind is actively in fault but also where there is culpable inattention or negligence. Malice may be "express" or "in fact" as where a person deliberately and with formed design kills another; or "implied" or "in law" as where one wilfully poisons another though no enmity can be proved. Malice is "presumed" in homicide, and therefore it lies on the accused to prove that the killing was justifiable or excusable.

Malines, or *Mechlin*, a Belgian City on the Dyle, 14 m. S. of Antwerp; manufactures lace and tapestry; has an ancient cathedral and various art treasures. Pop. 62,000.

Malines Conversations, unofficial negotiations between Roman Catholic and Anglican ecclesiastics to explore the possibilities of a reunion of the churches, opened at Malines in 1920 and lasting over several years. Lord Halifax (*q.v.*) was one of the chief negotiators on the Anglican side.

Mallard, the wild duck (*Anas boschas*); more especially the drake; the parent stock of our tame breed of duck. The male has a glossy green head and neck, and is grey or white underneath; the female is speckled, brown and buff. The bird migrates in large numbers in late autumn.

Mallarmé, *S t 4-*, French poet, leader of the Symbolist school, born in Paris; Professor of English at Tournon, and elsewhere from 1862 to 1892. His *Après-Midi d'un Faune* appeared 1876; French translation of Poe's poems, 1888; *Vers et Prose*, 1893; complete works, 1897. (1842-1898).

Mallee, a short, scrubby eucalyptus tree which grows in desert districts of Australia; eucalyptus oil is obtained from it.

Mallow, a town in the province of Cork, Eire (Ireland). There are mineral springs which are much visited in autumn. Pop. 4,500.

Mallow, the common name of plants of the genus *Malva*, natural order Malvaceae, comprising 30 species, 3 of which are found in Britain. They are some-

what weedy perennials. The common or Large Mallow (*Malva sylvestris*) bears a flower with a purple centre, five long and narrow petals, mauve streaked with purple; the sepals are green; it is much visited by insects for the honey it secretes. The Small Mallow (*M. rotundifolia*) also occurs, as well as the Musk Mallow (*M. moschata*) which bears rose-pink flowers. The Marsh-Mallow is the species *Aithaea officinalis* of the same natural order. The Tree-Mallow (*Lavatera arborea*) bearing pink purple-veined flowers in summer and autumn also occurs in Britain on rocks by the coast.

Malmédy, a town of Belgium in the province of Liège. It was ceded by Germany to Belgium by the Treaty of Versailles, 1919. Pop. 5,400.

Malmesbury, a borough and market town in Wiltshire on the Lower Avon, 10 m. N. of Chippenham, famous for the remains of its Benedictine Abbey, said to have been founded in the 6th Century. The historian, William of Malmesbury, died here in 1142. Pop. 2,300.

Malmesbury, *William of*, English chronicler of the 12th Century, and one of the chief authorities for the history of his time; his chief works were *Gesta Regum Anglorum* and *Gesta Pontificum Anglorum*, followed by his *Historia Novella*. (c. 1093-1143).

Malmö, important seaport and third town of Sweden, opposite Copenhagen; ships farm produce, cement, matches and timber; has cigar and sugar factories, and some shipbuilding. Pop. 144,000.

Malmsey, a strong sweet white wine, named from Malvasia in Greece, and afterwards made in Madeira, the Azores and Sicily, from grapes which have been left to shrivel on the vine.

Malory, *Sir Thomas*, English author, flourished in the latter part of the 15th Century; a Warwickshire knight; was the author of *Morte d'Arthur*, a prose translation and collection of Arthurian legends which was finished in the ninth year of Edward IV., and printed fifteen years after by Caxton.

Malpighi, *Marcello*, Italian anatomist and professor of Medicine; noted for his discovery of the corpuscles of the kidney and the spleen, named after him. (1628-1694).

Malplaquet, a hamlet in the dept. of Marbrough and Prince Eugene were victorious in 1709 over the French, under Villars, in one of the most famous battles of the Seven Years War.

Malt, grain, usually of barley, steeped in water and fermented, by which the starch of the grain is converted into saccharine matter, dried on a kiln, and then used in brewing (*q.v.*) ale, stout, beer or porter, and in the distillation (*q.v.*) of whisky. Brown or amber malts are used to give colour to mild ales, while black or chocolate malts give the dark colour to porter and stout.

Malta, a small British island in the Mediterranean, 80 m. S. of Sicily; a strongly fortified and most important naval station, headquarters of the British Mediterranean fleet; was annexed to Britain in 1814. The island is treeless, and with few streams, but fertile, and has many wells. Wheat, potatoes, and fruit are largely cultivated, and filigree work and cotton manufactured. The people, who are Roman Catholics, are said to be descended from the ancient Carthaginians. There is a university at Valetta, the capital. In 1921 a more liberal constitution was granted, but owing to defects in its working and to interference in politics by the clergy and later by pro-

Italian influences this has been twice suspended, in 1930 and in 1933, and legislative power vested exclusively in the Governor. In 1938 a measure of Crown Colony Government was granted, but the new Maltese Legislature will not have power to legislate on the language question. Maltese is the language of general intercourse, and with English is the official language, Italian having been deposed from parity with them. The small islands of Gozo and Comino are included in the colony. Area (of 3 islands), 122 sq. m. Pop. 262,000.

Malta Fever, a febrile disease which in Malta and the Mediterranean coasts generally, having probably been spread by Maltese goats. The symptoms are high temperature, rheumatic pains and debility. The cause is a micro-organism discovered by Sir David Bruce.

Maltese Terrier, properly Maltese small lap-dogs of Maltese origin. The type has been preserved for more than two thousand years. It has a white, silky coat which naturally parts from head to tail, long drooping ears, head short and full, eyes dark, and legs short.

Malthus, Thomas Robert, an English in Surrey; is famous as the author of an *Essay on the Principle of Population*, of which the first edition appeared in 1798, and the final, greatly enlarged, in 1803. This work aimed at showing how the progress of the race was held in check by the limited supply of the means of subsistence and suggested that the human race increased more rapidly than its food supply. From him Malthusianism, or the conscious and deliberate limitation of the birth rate, takes its name. (1766-1834).

Malton, market town and urban district on an eminence on the N. bank of the river Derwent. In 1138 it was burned down by Thurstan, Archbishop of York, who besieged the town in order to drive out the Scots. Pop. 4,400.

Maltose, or Malt-Sugar, a disaccharide of starch, e.g., by the enzyme diastase in malt. It is a solid substance crystallizing in white needles, and is converted by the enzyme maltase (e.g., in yeast) into glucose or grape-sugar.

Malvern, Great, a watering-place in the Malvern Hills, much frequented by invalids; the first hydropathic establishment in the country was opened here in 1842. There is a famous public school, founded in 1665. Every year a festival of drama is held here. Pop. 16,700.

Mamelukes, originally slaves from the regions of the Caucasus, captured in war or bought in the market-place, who from being the bodyguard of the Sultan in Egypt in the 13th Century, rose to rule the country and choose the Sultans from their own number until 1517. They remained powerful thereafter, and resisted Bonaparte, who defeated them, at the battle of the Pyramids in 1798, but recovering their power after his withdrawal they were annihilated in 1805 and 1811 by Mehmet Ali, who became Viceroy of Egypt under the Porte.

Mammals, or Mammalia, the highest kingdom of animals; the females are characterized by the possession of mammae (teats) enabling them to suckle their young. They are usually marked by a peculiar cranial conformation, a highly developed brain, a hairy body, and by having two sets of teeth in their lifetime, the "milk teeth" and permanent teeth. The class, which is sometimes popu-

larly but erroneously called quadrupeds, includes some sea animals (whales, dolphins, etc.), and flying animals (bats). There are some 5,000 living species, and many more known only as fossils; and they are distributed over the whole globe. They are divided into Primates (monkeys, apes and man); Chiroptera (bats); Carnivora (cats, dogs, bears, etc.); Insectivora (insect-eaters); Rodentia (gnawing animals); Ungulata (hoofed animals); Edentata (sloths, etc.); Sirenia (dugongs and manatees); Cetacea (whales and porpoises); Marsupialia (Kangaroos, etc.), and Monotremata (the echidna and ornithorhynchus).

Mammoth,

an extinct long-haired elephant-like mammal of enormous size found fossilised in Northern Europe and Asia in deposits together with human remains, and yielding a supply of fossil ivory; its tusks have a length sometimes exceeding 10 ft.

MAMMOTH

Mammoth Cave, a cave in Kentucky, U.S.A., the largest in the world, several miles in extent, and rising at one point to 300 ft. in height, with numerous side branches leading into grottoes traversed by rivers, which here and there collect into lakes.

Man, a quadruped of the order Primates, whose forelimbs have been specialised as tools and are not used for progression; he thus has an erect posture. He is also differentiated from other mammals by his exceptional mental development, his opposable thumb, and prominent chin. The use of articulate speech and the possession of a moral sense, and possibly the faculty of laughter, also appear to be peculiar to him. He is remarkable for his scanty growth of hair; his skin-colour ranges from pinkish-white through yellow and brown to black. His food covers a wide range of animal and vegetable substances; unlike any other animal he submits much of it to the action of heat before consuming it. He is found in all parts of the globe except the extreme Arctic and Antarctic regions. He lives in communities; the development of his hands and the possibility of communication of thoughts and ideas between individuals of the species consequent upon his faculty of speech have enabled him to exercise considerable mastery over his environment and to use the products and forces of Nature for his own ends. Man appears to have developed from a lemur-like ancestor, and the oldest fossil remains of a man-like creature so far known suggest that he has existed for at least a million years. All living men belong to a single species, *Homo sapiens*, but there have in the past been other species—*Homo neanderthalensis*, *Homo primigenius*, etc.—which are now extinct. See also Races of Mankind.

Man, Isle of, a small island in the Irish Sea, 35 m. W. of Cumberland, and about the same distance E. of Ireland; from its equable climate and picturesque scenery is a favourite holiday resort; it has lead mines at Laxey and Foxdale; fishing and cattle-grazing are profitable industries. The people are of mixed Celtic and Norse extraction, and until a century ago spoke a Celtic language, Manx. The island has its own government, the Court of Tynwald, comprising a Council composed of the Bishop, deans, etc., and an elected House of Keys, and a Lieutenant-Governor; and is not bound by acts of the British parliament. The capital is Douglas. Area, 220 sq. m. Pop. 49,500.

Managua, the capital of the state of Nicaragua and the chief town of the department of the same name. It is situated on Lake Nicaragua. The town was almost entirely destroyed by earthquake on March 31, 1931. It is being rebuilt and has a university and considerable commerce. Pop. about 80,000.

Manaos, the capital and river port of the state of Amazonas on the Rio Negro, Brazil. Its exports include rubber, Brazil nuts, cocoa and hides. Pop. 89,000.

Manasseh, Ben Israel, a Jewish author, born in Lisbon; settled at Amsterdam; wrote several works in the interest of Judaism, and induced Cromwell to permit the re-settlement of Jews in England, from which they had been excluded for several centuries. (1604-1657).

Manatee, or *Sea-Cow*, the three species of the genus *Manatus* of the order Sirenia. They are inoffensive animals and inhabit the shallow coastal waters of tropical America and Africa feeding on aquatic vegetation. The body is naked and stout, shaped like a whale's, and has a shovel-shaped tail. They have paddles as forelimbs and digits with flat nails; the eyes and ears are small. Manatees are valued for their skin, flesh and oil. The three species are the *Manatus senegalensis* of Africa, the *M. americanus* of America and the *M. inunguis* of the Amazon.

MANATEE

Manche, *la*, the French name for the English Channel, so called from its resemblance to a sleeve, which is the meaning of the French name.

Manchester, on the Irwell, in the SE. of Lancashire, 30 m. E. of Liverpool, the centre of the English cotton-manufacturing district, with many other textile and related industries, is the fourth largest city of England. It has many fine buildings, including a Gothic Town Hall and Assize Court House; there is a picture-gallery, several excellent schools, and the famous John Rylands library; Owens College was the nucleus of Manchester University. The city grew enormously during the Industrial Revolution, and its industrial struggles in the beginning of the 19th Century were severe, and included the famous "Peterloo massacre." The famous Ship Canal, which connects it with the Mersey estuary, makes it a port of first importance. The railway to Liverpool was one of the first in England. Pop. 744,000.

Manchester, a town in the county of Hillsborough, New Hampshire, U.S.A., on the Merrimac R. Its manufactures include paper, foundries, and weaving. Pop. 76,900.

Manchester Ship Canal, a canal between Liverpool and Manchester, the construction of which, sanctioned by Parliament in 1885, converted Manchester into a port. The course is via Eastham, Runcorn and Latchford, and it is linked with natural water-courses. Its length is 35½ m., depth 28-30 ft., and the narrowest width, apart from the locks, 120 ft. At Manchester the dock accommodation covers 100 acres, with a quay area of 150 acres. The quays have a total length of 6 m. It cost £15,500,000 to build.

Manchukuo. See Manchuria.

Manchuria, region of NE. Asia, lying between Mongolia and Korea, with the Amur R. on the N. and the Yellow Sea on the S., is five times the size of England and Wales. The N., central and E. parts are mountainous; the Sungari is the largest river; the soil is fertile, producing

large crops of millet, maize, hemp, etc., but the climate in winter is severe. Pine forests abound; the country is rich in gold, silver, coal, and iron; beans, silks, skins, and furs are exported; cotton and other manufactures are rapidly increasing. The chief towns are Hsinking (the capital), Mukden, Harbin, and Antung. Until the fall of the Chinese Empire in 1911 the country was part of China, Russian influence having been replaced by Japanese after the war of 1905.

In 1930 Japan alleged that her interests, especially in the S. Manchuria railway, were being jeopardised by Chinese action, and began the military occupation of the area, overcoming Chinese resistance, and setting up in 1932 a new Japanese-protected state of Manchukuo, consisting of the former provinces of Fengting, Kirin, Heilungchiang, and Jehol, the former Chinese Emperor being set up as, first, President, and in 1934, hereditary Emperor of the state. A League of Nations commission of enquiry under Lord Lytton was sent out, and reported unfavourably to Japan, but no action was taken. The state of Manchukuo has an area of 480,000 sq. m. and a pop. of 34,350,000; the population is mainly Chinese, but Japanese and Koreans are immigrating in large numbers.

Manchus, Manchuria (*q.v.*), only a fraction of the present population which consists mainly of Chinese immigrants. The Manchus proper are a Tungusian race with Mongolian characteristics; they invaded China in the 17th Century, and a Manchu dynasty ruled there until the advent of the Chinese Republic in 1911.

Mandalay, capital of Upper Burma, on the country, 360 m. N. of Rangoon, was seized by the British in 1885. The Araacan Pagoda, with a brazen image of the Buddha, attracts many pilgrims, and Buddhist monasteries cluster outside the town. There are silk-weaving, gold, silver, ivory, and wood work, gong-casting and sword-making industries. Pop. 148,000.

Mandamus, in law, an order of the corporation or inferior court to do something pertaining to their office; but generally used of a writ of mandamus from the High Court to test the legality of an inferior court's action in some case of a public nature in respect of which no other legal remedy exists.

Mandarin, the name given by foreigners to Chinese official functionaries, of which under the Empire there were some nine orders, distinguished by the buttons on their caps; the name is also applied to the standard form of the Chinese language used for official purposes. Also the name of a small sweet orange from which a liqueur is made.

Mandated Territories, these which as a result of the World War ceased to be under the sovereignty of the Central Powers and which by agreement of the Allied and Associated Powers were mandated to various countries, the mandates being formally submitted to the League of Nations for approval. Great Britain received mandates for Iraq, Palestine, Tanganyika Territory, part of the Cameroons and of Togoland, and Trans-Jordan; France received Syria, part of the Cameroons and of Togoland; German SW. Africa went to the Union of South Africa; all the former German possessions in the Pacific S. of the equator, excepting Nauru and Samoa, went to Australia; Samoa to New Zealand; Nauru to Great Britain; and all Pacific possessions N. of the equator were assigned to Japan. Under the provisions of the mandates, the Mandatory is enjoined to submit an annual report of progress to the Permanent Mandates Commission of the

League of Nations, thereby affording a guarantee of the equitableness of the system. Britain has relinquished the mandate for Iraq, which is now independent; and that for Syria is to be relinquished by France in 1939; Japan, having left the League of Nations, now looks upon the territories mandated to her as her own possessions.

Mandeville, Bernard de, Anglo-Dutch writer, born in Dordrecht, Netherlands, who came to London to practise medicine, and wrote the *Fable of the Bees*, a cynical treatise on vice and virtue directed against the ethics of Shaftesbury (q.v.). (1670-1733).

Mandeville, Sir John, English adventurer, who from his own account travelled over 30 years in the East and wrote a narrative of the marvels he experienced in a book of voyages and travels published in 1356. The authorship of this book has been questioned, it being affirmed that the actual author was Jean de Burgoyne, of Liège, while there is evidence that much of the matter has been borrowed from other narratives.

Mandoline, musical instrument of the string family, Italian in origin; it has a short finger-board and pear-shaped body, and is played with a plectrum.

Mandrake (*Mandragora*), a small genus of hardy herbaceous perennial plants of the order Solanaceae comprising 3 species native to the Mediterranean arcas and the Himalayas. The Common Mandrake or Devil's Apples (*Mandragora officinalis*) bears blue or white flowers in May. All kinds of wonderful properties were formerly attributed to these plants and for long they were deemed typical of all manner of dreadful things; but there is some little doubt as to what plant the ancients really meant when they spoke of the mandragora, to which they ascribed marvellous virtues. Soporific qualities were attributed to it and it formed an ingredient in love-potions.

Mandrill (*Papio maimon*), a ferocious variety of baboon found in W. Africa. It has naked cheeks striped in blue and vermilion, a short tail and ischial callosities of a bright red colour. Mandrills associate in large numbers and often plunder villages and growing crops.

Manes, the general name given by the Romans to the departed spirits of good men who are conceived of as dwelling in the nether world, and as now and again ascending to the upper.

Manet, Édouard, French artist. Son of a Paris magistrate, he studied under Couture, travelled round Europe, settled down and produced paintings in a natural style, exhibiting at the Salon from 1861. (1832-1883).

Manganese, a metallic chemical element discovered by Gahn in 1774. Symbol Mn; atomic number 25; atomic weight 54.95. It finds little application except in the manufacture of alloys; but here its importance is considerable. Manganese steel is extremely hard and tough, and has proved invaluable for railway metals, protective helmets for military purposes, and many similar objects. Among the compounds of manganese, the chief are the permanganates of sodium and potassium. Both of these salts are powerful germicides, and a solution of the former is sold, under a trade name, for disinfection. Potassium permanganate is an almost black crystalline solid, which—like the sodium salt—dissolves in

water to give a deep purple solution. Manganese dioxide is used in the laboratory as a catalyst in the preparation of oxygen by the action of heat on potassium chlorate, and also for preparing chlorine from hydrochloric acid.

Manganin, an alloy of 7 parts of copper and a small proportion of nickel; it is used for resistance coils in electricity, as the conductivity varies very little with change of temperature.

Mange, a disease of the skin occurring in dogs, cats, horses and cattle; it is similar to the itch in human beings. The disease is produced both by the carcioptic mite and by a mite which infests the capillary follicles. It is very contagious and necessitates the burning of the patient's clothing and bedding.

Mangin, Charles Marie Emmanuel, French general, born at Sarrebourg; served in the Sudan (1895-1898), Tonking (1901-1904), West Africa (1907-1911) and Morocco (1912-1913); and in the World War organised the army of French colonial troops. In command of the 8th Infantry Brigade, he gained successes at Verdun in 1916; from the end of 1917 he commanded the 10th Army and after the armistice, the army of the Rhine. (1866-1925).

Mango, the fruit (a large drupe) of the natural order Anacardiaceae, grown abundantly in the tropics though native to the East Indies. It is used as an ingredient of chutney.

Mangold-Wurzel, a coarse kind of beet, pale yellow in colour, larger than the garden beet, and grown as cattle feed. It is derived from the sea-beet (*Beta maritima*).

Mangosteen (*Garcinia mangostana*), a tropical evergreen fruit tree of the order Guttiferae, whose delicately-flavoured brown fruits, not unlike oranges, are eaten in the East.

Mangrove (*Rhizophora*), a tropical tree with thick leaves, large flowers and an edible fruit. Its bark is used in medicine and as a dyestuff. The netlike formation of the widely-spreading roots about which decaying vegetable matter easily collects, cause the tree to be planted in swampy regions as an aid to land reclamation.

Manhattan, a long island at the mouth of the Hudson, on which a great part of New York stands.

Mani, or **Manes**, the founder of Manichæism (q.v.), a native of Ecbatana in Persia at the court of whose king, Sapor I, he preached. He was crucified A.D. 374.

Mania, a term applied to insanity characterized by mental exaltation. In simple mania the brain over-functions and the patient is talkative and displays a marked absence of sustained purpose, though unweariness in mental activity. The degree of insanity is mild. In acute mania the motor functions of the brain are affected and the patient is increasingly active, incoherent in speech, and while seemingly untiring in both mind and body, gradually becomes exhausted with possibly fatal results.

Manichæism, a religious system founded by Mani, a Persian, which ascribes the created universe to two antagonistic principles, the one essentially good—God, spirit, light; the other essentially evil—the devil, matter, darkness. It was based in part on Zoroastrianism, and was for a time a serious rival to Christianity, especially in the E.; the Albigenses in Southern France were largely Manichæan in their belief. St. Augustine (q.v.) of Hippo was a Manichee before his conversion to Christianity.

MANDRILL

Manila, capital of the Philippine Is.; at the head of a great bay on the W. coast of Luzon; is hot, but not unhealthy; suffers severely from storms and earthquakes, and is largely built of wood. It has a cathedral, university, and observatory. Its main industry is cigar-making; the exports include manila hemp, sugar, and coffee. The population, chiefly Tagals, includes Chinese, Spaniards and Europeans. In the Spanish-American War of 1898 Admiral Dewey captured the city. Pop. 378,000.

Manila Hemp, a fibre from the leaf stalks of *Musa textilis*, a plant of the Philippine Is. It is mostly used for making ropes, twine, etc., but the finer qualities are woven for sails, scarves and other wearing apparel.

Manipur, a native state of India between Burma and Assam. It has an area of 8,400 sq. m. and a population of 445,000 of whom one-third are animistic tribes.

Manitoba, a "prairie" province of Canada, with the United States on its S. border, Saskatchewan on the W., and Ontario on the E.; the S. is a level prairie and arable country, scantily wooded but well watered, having three large lakes, Winnipeg, Winnipegosis, and Manitoba, and three large rivers, Assiniboine, Souris and Red R. The soil is very fertile, producing fine wheat; mixed farming, dairy, cattle, and sheep farming are carried on successfully. Coal is found in the S., and gold, copper and zinc in the N.; fishing is pursued on the lakes and rivers. Constituted a province in 1870, Manitoba was the scene of the Riel rebellion, quelled that same year. In 1912 its territory was greatly extended. The capital is Winnipeg, the seat of a university and of extensive flourmills. Area, 251,800 sq. m. Pop. 700,000.

Manlius, *Marcus*, surnamed *Capitolinus*, a Roman hero who, in 390 B.C., saved Rome from an attack of the Gauls, and was afterwards for treason thrown down the Tarpeian Rock.

Mann, *Thomas*, German novelist, born in 19; practised literature while engaged in an insurance office. After issuing several minor works became famous with *Ruedenbrooks*, 1903—a long novel describing experiences of an old Lübeck family. Other works: *Der Tod in Venedig* (Death in Venice), *Der Zauberberg* (The Magic Mountain), 1924. Nobel prize winner, 1929. He left Germany after the rise of the Nazis. (1875—).

Mann, *Tom*, British labour leader; born at Foleshill, Warwickshire; in youth worked on a farm, in a mine, and as an engineering apprentice, joining in 1881 the Amalgamated Society of Engineers, of which he was Secretary from 1918 to 1921. Became a Socialist in 1885, and was one of the leaders of the 1889 Dock Strike, becoming president of the Dockers' Union in 1890. From 1894 to 1896 secretary of the Independent Labour Party; from 1899 to 1902 kept a London tavern. In 1902 went to Australia and later to South Africa, returning to England in 1910 to lead the Syndicalist movement; in 1912 was imprisoned for exhorting soldiers against action in labour disputes. In 1917, having become a Communist, visited the interior of China on a revolutionary mission. (1856—).

Manna, the food with which the Israelites were miraculously fed in the wilderness, a term said to mean "What is this?" being the expression of surprise of the Israelites on first seeing it, but more credibly derived from the Hebrew *mdn*, a gift; identified with a species of tamarisk from the stem of which exudes a saccharine sap.

Mannheim, German city in Baden, on the Rhine, 55 m. above Mainz; has manufactures of tobacco, chemi-

cals, and iron goods, and a growing river trade. An old historical city, it was formerly capital of the Rhenish Palatinate, and a resort of Protestant refugees; later the capital of the Grand Dukes of Baden. Pop. 273,000.

Manning, *Henry Edward*, cardinal, born in Hertfordshire; Fellow of Merton, Oxford, and a leader in the Tractarian Movement there; became rector in Sussex; married, and became Archdeacon of Chichester; dissatisfied with the state of matters in the Church of England, in 1851 he joined the Church of Rome, became Archbishop of Westminster in 1865, and Cardinal in 1875; was a strong supporter of infallibility at the Vatican Council of 1870; interested in social questions. (1808-1892).

Manoel I. ("the Happy"), king of Portugal 1495-1521; sent Vasco da Gama round the Cape of Good Hope to India, 1497; Cabral on the voyage in which he discovered South America, 1500; Corte Real to Labrador, 1500; Almeida, and Albuquerque to the East Indies, 1505. (1469-1521).

Manoel II., king of Portugal 1908-1919; son of King Carlos I., on whose assassination he succeeded to the throne, being expelled from the country two years later on the establishment of the Republic; afterwards resided in England at Twickenham, engaged in literature, and in 1913 married Princess Augusta Victoria of Hohenzollern. (1889-1932).

Manometer, an instrument for determining the pressure of gases or vapours. A common form is a bent glass tube open at both ends and containing mercury at the angle. When gas or vapour is applied to one end the mercury rises in the other. Manometers which measure gaseous pressure by the tension of a spring are used for steam-gauges.

Manor, under the feudal MANOR system of land tenure, a piece of land held by a lord who occupied so much as was necessary for the use of his family and granted the remainder to tenants for stipulated rents or services. The manor was usually granted by the sovereign to the lord of the manor, who could hold a court of his tenants and impose fines for misdemeanours, and later exercised criminal jurisdiction. After the Norman Conquest the King's Courts absorbed much of the power of the manorial courts. In 1223 the granting of new manors ceased under the statute of *Quia Emptores*. Labourers on the manor were serfs who had no freedom.

Mans, capital of the French dept. of Le Sarthe, on the R. Sarthe, 170 m. SW. of Paris; has a magnificent cathedral; is an important railway centre, and has tobacco and textile factories. It was the scene of a great French defeat by the Germans in January, 1871. It is the scene of an annual motor race. Pop. 85,000.

Mansard, the name of two French architects, born in Paris—*François*, who constructed the Bank of France (1598-1666), and *Jules* *Marc-Aurèle*, his grand-nephew, architect of the dome of the Invalides and of the palace and chapel of Versailles. (c. 1646-1708). *François* was the designer of a type of roof, consisting of 4 planes inclined to one another and hinging on one another and usually provided with dormer windows (q.v.); popular in France in the 17th Century.

Mansfield, market-town of Nottinghamshire, England, 14 m. N. of Nottingham, in the centre of a mining district, with iron and lace-thread manufactures. Pop. 46,000.

Mansfield, Katherine, English writer, born in New Zealand; her several collections of short stories include *Miss, The Garden Party, Something Childish*. She was the wife of John Middleton Murry (1889-1923).

Mansfield, William Murray, Earl of, Lord Chief Justice of England, born in Perth, called to the bar in 1730; distinguished himself as a lawyer, entered Parliament in 1743, and became Solicitor-General; accepted the chief-justiceship in 1756; was impartial as a judge, and is acknowledged as the founder of present-day commercial law; raised to the peerage in 1776, and resigned his judgeship in 1789. (1705-1793).

Mansion House, in the Poultry, the official residence of the Lord Mayor of London, erected in 1739 at a cost of £42,638, with a banquetting-room accommodating 400 guests.

Manslaughter, is the unlawful killing of another without malice (q.v.) aforethought, express or implied; and is said to be voluntary or involuntary. Voluntary manslaughter is where death is caused by a sudden act of revenge whilst the accused is still under provocation; and it differs from excusable homicide in self-defence, because there has been no attempt to get away before killing in self-preservation the person who gives the provocation. Killing through culpable negligence is also manslaughter. In Scots law, the term is not used; the cardinal division of criminal homicide is into murder and culpable homicide. The punishment for manslaughter is up to penal servitude for life.

Mansurah, a city of Lower Egypt and Dakhla on the Nile about 25 m. from Damiatta. It is a centre of trade in cereals, grain and cotton. Pop. 68,700.

Mantegna, Andrea, an Italian painter and engraver, born in Padua. His works were numerous, many of them altar pieces and frescoes, his greatest "The Triumph of Caesar." He was a man of versatile genius, was sculptor and poet as well as painter, and his influence on Italian art was great. (1431-1506).

Mantes, town in dept. Seine-et-Oise, France, with manufactures of brushes, baskets, etc. It was here that William the Conqueror received his death wound. Pop. c. 11,000.

Mantilla, a head-covering, commonly of lace, worn by women in Spain. It is used as a veil, and is draped around the shoulders. The term is also used to denote a woman's light shoulder cloak.

Mantis (Mantidae), a family of carnivorous orthopterous insects. The European Praying Mantis (*Mantis religiosa*) is so called from the attitude of its forelegs, as of a person at prayer, while lying in wait for its prey.

Mantling, or lambrequin, in heraldry, the ornamental drapery flowing from the helm or crest in a coat-of-arms.

Mantra, the Hindun name for a religious poetical incantation or charm, especially a verse from the Vedas used for that purpose.

Mantua, city in Italy, in SE. Lombardy, on two islands in the R. Mincio, 83 m. E. of Milan, has a fine cathedral, and many other medieval buildings; there are saltpetre refineries, weaving and tanning industries. Virgil was born herein 70 B.C. Pop. 40,500.

Manu, Code of, a Hindu book, containing a code of religious and social legislation, dating in its present form from about the 1st Century B.C. It expounds the doctrines of Brahminism, inculcating "sound, solid, and practical morality," and contains evidence of the progress of civilisation among the Aryans from their first establishment in the valley of the Ganges. Manu, the alleged author, appears to have been a primitive mythological personage, conceived of as the ancestor and legislator of the human race.

Manure, any material used for treating the soil in order to increase the productivity of plants. Manure is necessary to replace the ash-constituents and air-food of exhausted soil, though to some extent this replacement proceeds naturally through decomposition of mineral matter, the absorption of carbonic acid, etc. The natural supply of plant food in soils has long been supplemented by the application of manures and by waste products of the farm or of industrial processes; but modern scientific research has revealed the nature of the principal plant foods and shown that such foods could be added to the soil in the form of simple chemical compounds almost equally beneficially.

Manzoni, Alessandro, Italian poet and novelist. Born in Milan; converted in early life from scepticism to Catholicism; wrote a volume of hymns entitled *Inni Sacri*, and a tragedy, *Adelchi*, his masterpiece, as also a novel, *I Promessi Sposi*, which gave him a European reputation. In 1860 was made a senator of the kingdom of Italy. (1785-1873).

Maoris, the natives of New Zealand, a Polynesian race, who appear to have reached that country from Hawaii; a well-developed, intelligent and brave people, now numbering about 80,000, and completely civilised. They are said to have been cannibals before their Europeanization; they were formerly famous for their custom of elaborately tattooing their faces and bodies.

Maori Wars, conflicts between the settlers of New Zealand and the aborigines over boundaries. They were fought from 1843-1847, 1863-1864, and 1869-1870.

Map, a plane diagram depicting the physical or other features of the whole, or any part, of the earth's surface. The system on which the meridians and parallels (see *Latitude and Longitude*) of a map are drawn is called the projection. One of the most common is Mercator's Projection, in which meridians and parallels are depicted as straight lines at right angles to each other. This scale is exaggerated in high latitudes, but is universally used at sea, since a ship keeping a constant course follows a straight line on the map or chart. A conical projection has the meridians represented by straight lines converging on a centre and parallels by concentric circles at right angles to these lines. A modified conical projection is the orthomorphic, with two standard parallels, usually called Lambert's second Projection. In the later stages of the World War such maps were used by the Allies. The choice of projection depends upon the purpose of the map. Modern survey maps are now made by a system of aerial photography, a series of photographs, one overlapping another, being taken and the prints assembled.

Map, or *Mapes*, Walter, Welsh author, born probably in Herefordshire. He was a Canon of Lincoln and Archdeacon of Oxford from 1196. His one undoubted literary work is *De Nuptis Curialium*, consisting of rough notes and reminiscences, with gibes at monastic orders and the Roman court. Parts of the Arthurian legend, much satirical verse, and a famous drinking-song, are ascribed to him. (c. 1140-c. 1309.)

PRAYING
MANTIS

Maple, the common name of the trees *Aceraceae*. *Acer campestre* is indigenous in Britain. Other species are Silver, Oregon, Red swamp, Box elder and Sugar Maple. Maple sugar, a coarse sugar used in Canada and in Western states of U.S.A., is obtained by making incisions in the stem of the sugar maple (*A. saccharinum*) and evaporating and crystallizing the sap which flows therefrom. Good timber is obtained from the Oregon, Box elder and other kinds.

MAPLE

Marabou, a stork of the genus *Leptoptilus*. There are two species; *Leptoptilus marabou*, a native of Western Africa and *Leptoptilus dubius* the adjutant bird (q.v.) of India. The tail-covert feathers of both are used by milliners.

Marabouts, a sect of Mohammedan venerated in N. Africa, believed to possess supernatural power, particularly in curing diseases, and exercising at times considerable political influence.

Maracaibo, a Venezuelan city on the Lake Maracaibo; has handsome streets and buildings, and exports coffee and valuable woods. The lake of Maracaibo is a large freshwater lake in the W. of Venezuela, connected with the Gulf of Maracaibo by a wide strait, across which stretches an effective bar. Pop. 110,000.

Marañon, one of the head-waters of the Amazon, rising in Lake Lauricocha, Peru, and flowing N. and E. till it joins the Ucayali and forms the Amazon; the name is sometimes given to the whole river.

Maraschino, the fermented juice of the *marasca* cherry which was originally distilled as a cordial in Dalmatia. It is flavoured with broken kernels. It is now produced in other countries.

Marat, Jean Paul, French revolutionary leader, born in Neuchâtel, his father an Italian, his mother a Genevese; studied medicine at Bordeaux, and afterwards practised in London and Paris, was arrested and imprisoned in 1789, and while subsequently hiding in Paris sewers contracted a skin disease; was prominent in demanding the death of Louis XVI, and a popular hero, but was assassinated by Charlotte Corday (q.v.) one evening as he sat in his bath. (1743-1793).

Marathon, a village, 22 m. N.E. of Athens, on the sea border of a plain where the Greeks under Miltiades defeated the Persians under Darius in 490 B.C. The plain on which the battle was fought extends between mountains on the W. and the sea on the E.

Marathon Race, Olympic Games held every fourth year in various parts of the world. It is also the name for similar races wherever held, generally over a course of 21 m. The name is derived from the classical story of Pheidippides, who ran from Marathon (q.v.) to Athens with news of the battle, and was killed.

Marazion, or Marazion Jew, small town facing St. Michael's Mount, 3 m. from Penzance. It was burnt by the French in 1513, and again in 1549 during the Arundel rebellion in the reign of Henry VIII. Its name has been thought to commemorate the site of an ancient Jewish settlement. Pop. c. 1,000.

Marble, a calcareous stone of compact texture which can be highly polished. It consists of granules of uniform size which, in severance, split along the

rhombohedral cleavage plane presenting glistening facets. Marbles are metamorphosed limestones. They are of great economic value on account of their durability and many records on marble are of great antiquity. Marble is used for statuary and in ornamental architecture. Its distribution is very wide.

Marble Arch, a London landmark as a gateway to Buckingham Palace, and in 1850 removed to its present position by the N.E. corner of Hyde Park, London.

Marburg, German university town in Hesse-Nassau, on the Lahn, 40 m. N.E. of Limburg; has many old buildings; its Gothic church contains St. Elizabeth's tomb; Luther and Zwingli held a conference in the castle, 1529; William Tyndale and Patrick Hamilton were students at its university, which has a fine library. Pop. c. 20,000.

Marcellus, Claudius, Roman general; killed their chief, Viridomarus, with his own hands, whose spoils he dedicated as *spolia opima* to Jupiter; took Syracuse, which long baffled him through the skill of Archimedes, and fell fighting against Hannibal, 208 B.C.; he was five times consul.

March, the third month of our year; was before 1752 reckoned first month as in the Roman calendar, the legal year beginning on the 25th. It is proverbially stormy, and is the season of the spring equinox. It was dedicated to the Roman god Mars, whence the name.

March, market town and urban district of the Isle of Ely, Cambridgeshire, 29 m. N. of Cambridge, on the R. Nene. It is the centre of a corn and fruit growing district. Pop. 11,300.

March, a boundary, used especially of the *Welsh Marches*, and *Scottish Marches*, the border countries between England and Wales and Scotland respectively. The Earl of March (q.v.) took his title from the Welsh Marches, and in the Middle Ages the governors of the border districts were known as Wardens of the Marches. The name is allied to the German "Mark," with a similar meaning, as in the "Mark of Brandenburg." A Marquis was originally the ruler of such a "March."

March, Roger Mortimer, first Earl of Wigmore, Herefordshire; as Viceroy of Ireland in 1316, defeated the rebellion of the Lacys and repulsed Edward Bruce. Antagonised by encroachments of the Despencers in Wales, he rebelled; was imprisoned two years in Tower; escaped to the Continent; became paramour of Edward II.'s queen, Isabella; returned in 1326 and led the movement that deposed the king (soon afterwards murdered). He was made an Earl in 1328, and exercised kingly authority. Captured at Nottingham Castle by Edward III., he was carried to London and hanged. (1287-1330).

Marchand, Jean Baptiste, a French emissary in Africa; was sent in 1890 to explore the sources of the Niger and other districts, and was afterwards appointed to push on to the Nile, where he arrived in 1898, hoisting the French flag at Fashoda, an incident which gave rise to tension with England. He was obliged to retire and find his way back to France. (1863-1934).

Marchesi, Blanche, Baroness Caccamisi, French singer, born in Paris; appeared in Wagnerian and other operas in Berlin, Prague, Paris, and London with great success; afterwards taught singing. (1826-1913).

Marcion, a heretic of the 2nd Century, born in Sinope, in Pontus, who rejected the Jewish elements in Christianity,

refused to acknowledge the Old Testament, and took his stand on the words of Christ and the interpretation of St. Paul. He held that an ascetic life was of the essence of Christianity; his followers were called Marconites.

Marconi, Guglielmo, Marchese, Italian scientist, inventor of wireless telegraphy; born at Bologna of an Irish mother. Studied in Florence and Leghorn, and at Bologna university. He came to England in 1896, and took out the first patent for radiotelegraphy. A company to exploit it was formed in London, 1897. Communication between England and France was established, 1899, and between Cornwall and Newfoundland in 1901. Marconi shared the Nobel Prize for physics in 1909. During the World

War, 1914-18, Marconi was awarded the Order of Merit, 1917. (1874-1937).

Marcus Aurelius, Antoninus, Roman emperor, was adopted by Antoninus Pius, when

the latter was adopted by Hadrian, and married Faustina, daughter of the licentious wife of Antoninus. On the death of Antoninus in 161, he succeeded to the throne, but most of his reign was spent in warring with the Marcomanni and Quadi. He is chiefly famous for his devotion to the Stoic philosophy, and is commonly called "the philosopher."

MARCUS AURELIUS

His *Meditations* is a record of his religious and moral principles, and is a most famous classic. (121-180 A.D.).

Mardi Gras, Shrove Tuesday, the eve of Lent and concluding day of the carnival, marked by a procession through the streets of a prize ox, a burlesque of an old Roman sacrificial custom, together with mock priests, a band, and other merry-makers.

Maremma, of Italy, N. of the Campagna, stretching from Orbitello to Guardistallo, with few villages or roads. Part of it was improved by draining and planting (1824-1844), and is cultivated in summer by the Apennine farmers; in winter it is used for pasturage.

Marengo, a village of N. Italy, S.E. of Alessandria, where Napoleon defeated the Austrians under Baron Melas on June 14, 1800.

Mareotis, Lake, a lagoon in the N. of Egypt, 40 m. long by 18 m. broad, separated from the Mediterranean by a tongue of land on which part of Alexandria is situated.

Mare's Tail (*Hippuris vulgaris*), a water plant of almost cosmopolitan distribution, growing in ponds. The leaves are narrow and pointed, growing in circles up the stem at short distances, the upper ones projecting above the water. The flowers grow from the joint of the leaf and are without petals.

Margaret, Queen of Denmark, Norway, and Sweden, was the daughter of Waldemar IV. of Denmark, whose crown, on his death in 1375, she received in trust for her son Olaf. Her husband, Haakon VII. of Norway, died in 1380, and left her queen; the Swedes deposed their king next year, and offered Margaret the throne, which she accepted, and ultimately brought about the Union of Calmar (1397), which provided for the perpetual union of the three crowns. (1353-1412).

Margaret, the "Maid of Norway," daughter of Eric II. of Norway and Margaret, daughter of Alexander III. of Scotland, affianced to Edward, later Edward II. of England, but died at sea on her way from Norway. (1283-1290).

Margaret, St., a Christian martyr of Antioch, the type of female innocence, represented as a maiden bearing the palm and crown of a martyr and attended by a dragon. Festival, July 30.

Margaret, St., Queen of Scotland, and sister of Edgar Atheling, born in Hungary; brought up at the court of Edward the Confessor; after the conquest sought refuge in Scotland, and married its king, Malcolm Canmore; was a woman of beautiful character and great piety and did much to civilise the country by her devotion and example. She was canonised by Innocent IV. in 1250. Festival, June 10 or November 16. (1047-1093).

Margaret of Anjou, queen of England, and daughter of the good King René of Anjou; was distinguished for the courage she displayed during the Wars of the Roses, though, after a struggle of nearly twenty years, she was defeated at Tewkesbury and committed to the Tower, from which, after four years of incarceration, she was afterwards released by ransom. (1430-1482).

Margaret of Navarre, Queen of Navarre, sister of Francis I., married in 1527 Henri d'Albret, king of Navarre, by whom she became the mother of Jeanne d'Albret; protected the Protestants, and encouraged learning and the arts. She left a collection of novels, under the name of *Heptameron*, and a number of interesting letters, as well as some poems. (1492-1549).

Margaret of Valois, third daughter of France and Catherine de' Medici; married Henry IV., by whom she was divorced for her immoral conduct. (1553-1615).

Margaret Rose, Princess, second daughter of King George VI. and Queen Elizabeth of England; born at Glamis Castle, Angus, Scotland, Aug. 21, 1930.

Margarine, a butter substitute made from various animal and vegetable oils and fats, frequently with the addition of milk or milk substitutes. Its manufacture and sale are carefully regulated by law, and all butter substitutes exposed for sale must be clearly labelled as margarine.

Margarita, Venezuelan island in the Caribbean Sea, 45 m. long by 20 m. at its greatest breadth. It is mountainous, fertile in the interior, produces maize, cotton and bananas, and there are magnesite deposits. Pearl fishing is a government industry. Capital, Ascunión. The main port and chief commercial centre is Forlamar (pop. 4,900). Pop. c. 50,000.

Margate, a seaport and watering-place, 3 m. W. of the North Foreland, Kent, England, is with its firm sands, bathing facilities, and various attractions a favourite resort of London holiday-makers. It is particularly famous for its beautiful sunsets. There are large almshouses and orphanages, and other charitable institutions. Pop. 40,000.

Margay (*Felis tigrina*), a spotted and striped tiger-cat of South America. It is about the size of a house-cat and can be domesticated. It is useful as a destroyer of rats and mice.

Margrave, ancient German title of a military governor in charge of a frontier or "mark." The title in its territorial sense went out of use in 1806, but was retained as a courtesy title.

Marguerite, name for large species of *Chrysanthemum* of the order Compositae, generally bearing white flowers; especially for the *Chrysanthemum frutescens*, with yellow or white flowers, the best known garden variety.

Mariana, Spanish and political philosopher, born in Talavera; joined the Jesuits in 1554, and taught in their colleges in Rome, Sicily, and Paris; returning to Toledo, he gave himself to literature. His *History of Spain* appeared in 1592 and 1601. For certain theological writings he incurred persecution, and his greatest work *De Rege et Regis Institutione* in which he defended the right of the people to cast out a tyrant, was condemned by the general of his order. (1536-1624).

Maria Theresa, Empress of the Emperor Charles VI., whom on his death in 1740 she succeeded on the throne, associating her husband, Francis of Lorraine, with her in the government as Francis I.; despite the Pragmatic Sanction, which assured her of her dominions in their integrity, she was assailed by competing claimants, in particular by Frederick the Great, who wrested Silesia from her. The war thus occasioned, known as the war of the Austrian Succession, lasted seven years, and was concluded by the Peace of Aix-la-Chapelle in 1748. Backed by France, she soon renewed hostilities in the hope of compelling Frederick to restore what he had taken, but the Seven Years War left things in this respect as they were though she gained some territory, including Galicia and Lodomeria, as a result of the first Partition of Poland. She also secured Bukowina from the Porte and some territory from Bavaria. In the intervals of the wars Maria Theresa introduced many internal reforms including the curbing of abuses of the Church. (1717-1780).

Marie Antoinette, Queen of France, fourth daughter of Maria Theresa; was married in 1770 to the Dauphin, later Louis XVI. Beautiful, haughty, indiscreet and extravagant, she grew in unpopularity until the outbreak of the Revolution. She was guillotined nine months after her husband. (1753-1793).

Marie de' Medici, daughter of the Grand-Duke of Tuscany, born in Florence; was married to Henry IV. of France in 1600, with whom she lived unhappily till his murder in 1610; she was then Regent for seven years. In 1617 her son assumed power as Louis XIII. She was, for two years banished from the court, and on her return so intrigued as to bring about her imprisonment in 1631. Though a lover of art she was neither good wife nor good queen. Escaping from confinement, she died in destitution at Cologne. (1573-1642).

Marie Louise (Leopoldine Françoise Thérèse Joséphine Lucie), second Empress of Napoleon I.; eldest daughter of the Austrian emperor Francis I.; born at Vienna. Napoleon obtained her in marriage, after divorcing Josephine in 1810. In 1811 she bore him "Napoleon II.," the "King of Rome" and "Duke of Reichstadt" (d. 1832). In 1812 she accompanied her husband to Dresden and was nominal regent during his absence in the field. In 1814, on his exile to Elba, she returned to Vienna. The Duchies of Parma, Piacenza, and Guastalla, were reserved for her son; she was ably assisted in their government by Count Neipperg, who married her in 1822. She died in Vienna. (1791-1847).

MARGUERITE

Marienbad, or Mariánské Lázně, a high-lying

Czechoslovakian watering-place 18 m. S. of Carlsbad; it is much frequented for its saline springs. Pop. c. 5,000.

Marigold, a name covering varieties of composite garden flowers. *Calendula officinalis* (or Pot Marigold), indigenous in S. Europe, is common in British gardens. It has orange or lemon-coloured flowers, used to impart a yellow colour to cheese. Other kinds are African (*Tagetes erecta*); Field (*Calendula arvensis*); Marsh (*Calitha palustris*); French (*Tagetes patula*).

POT MARIGOLD

Mariner's Compass. See Compass.

Marines, Royal, the name used to designate certain bodies of troops raised and organised for the dual purpose of serving either on shore or afloat in ships. The first record of such a body is in 1864 when Charles II. embodied the Duke of York and Albany's Maritime Regiment to consist of 1,200 "land soldiers." The present 1st East Lancs., 1st East Surrey, and 1st Duke of Cornwall's Light Infantry all started as marine units. In 1802 marines were designated Royal and their facings altered from white to blue.

Formerly there were two distinct divisions, the Royal Marine Artillery and the Royal Marine Light Infantry, but they were amalgamated in 1923. When serving ashore the Royal Marines are subject to the Army Act and when afloat to the Naval Discipline Act. In the World War the Royal Marines were conspicuous in various places, particularly Gallipoli and the Belgian Coast. They rendered valuable service in the third Battle of Ypres and took part in the famous exploit at Zeebrugge (q.v.).

Mariolatry, Mary; a term used by Protestants, usually in a derogatory sense, to censure what in their view is the undue honour paid to the Virgin Mary by the Greek and Roman communions since the 5th Century, and in recent years imitated by some Anglicans.

Marionette, a jointed puppet, representing a human being or animal, and operated by concealed controls for the purpose of entertainment.

Mariotte, Edmé, a French physicist, born in Dijon; discoverer of the law that the volume of a gas varies inversely as the pressure; it bears the name of Mariotte's law on the Continent and Boyle's law in England. (1630-1684).

Marius, Galus, a celebrated Roman uncle by marriage to Julius Caesar, head of the popular party, and the rival of Sulla; conquered the Teutons and the Cimbr in Gaul, and made a triumphal entry into Rome. Having obtained command of the war against Mithridates, Sulla marched upon the city and drove his rival beyond the walls. He fled the city, and was condemned to his executioner allowed him to escape to Carthage, whence he later returned; and with Cinna organised a general slaughter of the partisans of Sulla. He reorganised the Roman army and made it a power in the field. (155-86 B.C.).

Marjoram (*Origanum*), a genus of small hardy shrubs and perennial herbs of the order Labiales, native of Europe and Mediterranean regions. The Sweet Marjoram, *Origanum Marjorana*, yields an aromatic oil on distillation, used in cookery for flavouring. The Wild or Common Marjoram, *Origanum vulgare*, a native of Europe (including

Britain), bears purple flowers and is commonly grown in old-world gardens, especially the golden-leaved variety, *aurum*.

Mark, a German silver coin, with a pre-war value of 11½d. After the World War the Mark completely lost its value, and eventually was replaced by the Rentenmark, converted at the rate of one trillion marks to one Rentenmark. In 1923 the Rentenmark was established on a gold basis, which after depreciation in the currency crisis of 1931 was replaced by the Reichsmark, with a par value of 11½d., but exchanging in 1938 at about 1s. 7d.

Mark, Gospel according to, probably the earliest of the Gospels to assume its present form. It was used as a source by the authors of the first and third gospels. There seems no reason to question its traditional attribution to Christ's disciple Mark, "the interpreter of Peter." It was written primarily for Gentile readers, and is a vivid but unadorned account of the life of Christ, for the events of whose career it is the principal authority.

Mark, John, the traditional author of the second Gospel, the son of Mary, Barnabas' sister, who ministered to Christ, and whose house in Jerusalem was a place of resort for the disciples of Christ after the resurrection; accompanied Paul and his uncle on their first missionary journey and afterwards accompanied Peter. He is regarded as the founder of the Coptic Church, and his body is said to have been buried in Venice, of which he is the patron saint, the cathedral of that city being named St. Mark's after him. He is represented in Christian art as a man in the prime of life accompanied by a winged lion, with his Gospel in his left hand and a pen in his right. Feast, April 25.

Mark Antony. See Antonius, Marcus.

Market, a public place to which by custom, goods are brought to be exposed for retail sale. Such institutions were of great importance before the rise of modern methods of rapid and easy communication, and could only be established by licence of the Crown. They were generally held at fixed intervals; such names as Newmarket and Stowmarket still commemorate important markets of an earlier day. An annual market, or fair, is still held at many centres in Europe. The name is now most generally used of a place where agricultural and dairy produce is exchanged between the producers or wholesalers and the retail sellers; as Covent Garden (for fruit and vegetables) and Smithfield (for meat) in London.

Market Drayton, a market town of Shropshire, England, with manufactures of agricultural implements, a foundry and cattle market. Blore Heath in the vicinity, was the scene of a battle in the Wars of the Roses. Pop. 4,700.

Market Garden, a piece of land where fruit, vegetables and flowers are grown for sale at a market. Such gardens are usually near large towns, to minimise costs of transport. Success depends upon the right choice of produce for the particular soil, having regard both to quality and quantity. Flower cultivation under present conditions is the most profitable form of market gardening. In fruit gardening apples yield the most permanent results. Vegetable market gardens can be made to yield, given the right conditions, potatoes, cabbages, carrots, turnips, onions, and salads without difficulty.

Market Harborough, manufacturing and market town in Leicestershire, England, 8½ m. from London, in the centre of a hunting country. There is a cattle market, and manufactures of corsets and brushes. Pop. 9,300.

Markham, Mrs., pseudonym of Elizabeth Penrose, author of children's books, second daughter of Rev. Edmund Cartwright (reputed inventor of the power-loom), born in Leicestershire. In 1823 her *History of England*, partly in conversational form, appeared; in 1828, her *History of France*. She died of cancer. (1780-1837).

Markievicz, Constance Georgina, Countess, Irish politician, daughter of Sir Henry Gore-Booth, and wife from 1900 of a Polish count; was active first in the Labour and later in the Sinn Féin movement, and was sentenced to death for her part in the 1916 rebellion, the sentence being commuted to imprisonment. In De Valera's revolutionary government she was Labour Minister. She was the first woman to be elected to the British House of Commons, being returned for St. Patrick's, Dublin, in December, 1918, but she never took the oath or her seat. (1884-1927).

Mark Twain. See Clemens.

Marl, in geology, a sedimentary rock of intermediate composition between the calcareous and the argillaceous rocks, and sometimes called clayey limestone; generally laid down in freshwater lakes, and contains plentiful remains of fresh-water crustacea, gastropods and algae. Red and green marls exist in the trias of England just below the bone-bed. In agriculture, marl means any soil which readily falls to pieces on exposure to the air, even though it has no lime in its composition.

Marlborough, market town in Wiltshire, England, on the Kennet, 38 m. E. of Bristol, with sack and rope making, brewing, and tanning industries, and a famous public school founded in 1343. The Marlborough Downs, near the town, are used for racehorse training. Pop. 3,900.

Marlborough, John Churchill, first statesman, born in Devonshire, and served in

DUKE OF
MARLBOROUGH

Tangier in 1667; sent to help Louis XIV. in his Dutch wars, his courage and ability won him a colonelcy. He married Sarah Jennings in 1678, and 7 years later became Baron Churchill on James II.'s succession. As general he was employed in putting down Monmouth's rebellion; he succeeded to William of Orange in 1688, and received from him the earldom of Marlborough. He was in dis-favour from 1694 till the outbreak of the Spanish Succession War, in which he gained his great renown. Beginning by driving the Spaniards from the Netherlands in 1702, he won a series of important victories—Blenheim 1704, Ramillies 1706, Oudenarde 1708, and Malplaquet 1709—and contributed to enhance the military glory of England. Queen Anne loaded him with honours; large sums of money, Woodstock estate, Blenheim Palace, and a dukedom were bestowed on him. His wife was the Queen's closest friend, and the duke and duchess virtually governed the country, till in 1711 the Queen threw off their influence, and charges of misappropriation of funds forced the duke into retirement. He was restored to many of his offices by George I. in 1714, but for the last 6 years of his life he sank into imbecility. (1650-1722).

Marlborough House, mansion in London, built by Wren for the great Duke of Marlborough c. 1710, and since 1817 Government property. It has been used as a

residence by Edward VII. when Prince of Wales, Queen Alexandra, and Queen Mary, widow of George V.

Marlow, town of Buckinghamshire, Eng., land, on the Thames, 32 m. from London. Marlow Lock, one of the oldest on the Thames, was reconstructed in 1927. There are extensive beech woods and the surrounding scenery is remarkably beautiful. There are paper mills, a brewery, a cabinet factory and annual cattle show. Pop. 5,300.

Marlowe, Christopher, English dramatist and poet; son of a shoe-maker at Canterbury. Besides a love poem entitled *Hero and Leander*, he was the author of 7 plays, the most famous being *Tamburlaine*, *Doctor Faustus*, *The Jew of Malta*, and *Edward the Second*. He made no attempt at comedy. Was killed at Deptford in a brawl. (1564-1593).

Marmalade, a general name for various fruits, especially citrus or those which have an acid taste, such as oranges, lemons, or barberries. The name is derived from Portuguese "marmelo," the quince, from which fruit marmalade was originally prepared. *Vitellaria mammosa* (the marmalade tree) is a West Indian tree of the family Sapotaceae, a milky tree with leathery leaves and large pulpy fruits.

Marmont, Auguste Frédéric, Duke of Ragusa and marshal of France, served under Napoleon; received the title of duke for his successful defence of Ragusa against the Russians in 1805; was present at Wagram, Lützen, Bautzen, and Dresden, but came to terms with the allies after the taking of Paris, which led to Napoleon's abdication in 1814; obliged to flee on Napoleon's return, he came back to France and gave his support to the Bourbons. (1774-1852).

Marmora, Sea of, 175 m. long and 50 m. broad, lies between Europe and Asia Minor, opening into the Aegean through the Dardanelles and into the Baltic through the Bosphorus; the Gulf of Ismid indents the eastern coast. Marmora, the largest island, has marble and alabaster quarries.

Marmoset (*Hapalidae* or *Callithrididae*), a family of small

Anthropoid monkeys found almost exclusively in forest-areas of tropical S. America. The size of the different species varies from a few inches in length to one foot. The tails are long, bushy, and non-prehensile. The fur is thick and soft and of varying colours; the face short, with tufts of fur over the ears. Marmosets live on insects; they are sometimes kept as domestic pets.

MARMOSET

Marmot, the common name of the marmoset, male of the genus *Arctomys* in the squirrel tribe of Rodents, one species the common Marmot (*Arctomys marmota*), being found in the Alpine regions of Europe. They have short bushy tails and the body is about 14 in. long. In colour they are greyish-brown. They commonly live in communities, burrow, and in winter often remain in a torpid state. Insects, roots and other vegetation form their diet. Prairie-Marmots or Prairie-Dogs (s.v.), are rodents of the genus *Cynomys*.

Marne, and Haute-Marne, contiguous departments in the N.E. of France, in the of the Marne R.; in both wine are the chief

products, the best champagne coming from the N. In the former, capital Châlons-sur-Marne, building stone is quarried; there are metal works and tanneries; in the latter, capital Chaumont, are valuable iron mines and manufactures of cutlery and gloves. It was the scene of two important battles in the World War. (See *Marne, Battles of the*.) Area (Marne), 3,170 sq. m.; (Haute-Marne), 2,420 sq. m. Pop. (Marne) 410,000; (Haute-Marne), 188,500.

Marne, Battles of the. The first Battle of the Marne in the World War began on Sept. 6, 1914, during the retreat of the Allies from the Sambre-Meuse line. It lasted seven days, and was really won on the extreme left by the British forces and the 5th French Army. The crisis was reached on Sept. 9. Von Kluck had aimed at dividing the British from the French Army, but British troops moving N.E. caused him to draw back on Château-Thierry. In the centre Foch successfully resisted attacks by Von Bülow, but his wings being driven back, eventually decided to push his centre forward, attacking the famous Prussian Guard. The German retreat now began. The German Army was forced to assume the defensive on the Aisne heights, and German hopes of a speedy victory were destroyed.

The second battle began with a great German attack on May 27, 1918. The line extended from Flanders to the R. Oise. After Ludendorff's successful attack, the French Army retreated to a line from Château-Thierry to Dormans. The 2nd American Division, with U.S.A. marines, counter-attacked and secured the SW. angle of the Salient. Ludendorff's last attempt began on July 16, but Foch's great counter-attack from Château-Thierry to the Aisne drove the German Army back. With their retreat across the Vesle the battle ended.

Maronites, a sect of Syrian Christians, originally Monothelistic heretics, dwelling on the eastern slopes of Lebanon, where they settled in the 17th century, and who joined the Roman Catholic Church in 1445; they maintained a long sanguinary rivalry with their neighbours the Druses (s.v.). A few are now settled in Cyprus. They number at present about 200,000.

Marot, Clément, French poet, born in Cahors; was valet-de-chambre to Margaret of Navarre; his satirical wit often brought him into trouble. His poems have left their impress on both the language and the literature of France, but in his own day he was best known for his metrical versions of the Psalms, which were commonly sung by the Huguenots. (1496-1544).

Marprelate Tracts, a series of scurrilous tracts published under the name of Martin Marprelate, but the work of different writers in the time of Elizabeth, aimed against prelacy. They gave rise to great excitement and some inquiry as to their authorship.

Marque. See *Letter of Marque*.

Marquesas Islands, a group of volcanic mountainous islands in the S. Pacific, 3,600 m. W. of Peru, under French protection since 1842; are peopled by a handsome but savage race, which is rapidly dying out; Chinese immigrants grow cotton. Area, 480 sq. m. Pop. 2,400.

Marquess (*Marquis*), a title of nobility in Great Britain and other European countries, derived from *marcato*, a name given to rulers of the border counties adjoining Wales and Scotland. The first English creations were those of Robert de Vere, Earl of Oxford, as Marquess of Dublin in 1386, and that of the Earl of Somerset as Marquess of Dorset in the following year. A Marquis

ranks below a Duke and above an Earl. At present (1938) there are 27 Imperial, 4 Scottish and 9 Irish marquesses.

Marquetry, the inlaying of pieces of the surface of another. It includes buhl, mosaic, parquetry, etc., and the work is done by cutting designs in low relief in pieces of wood or plates of metal and inserting portions of the second material, which may be ivory, stone, mother-of-pearl, coloured marble, or wood.

Marquette, *Jacques (Père)*, French missionary, sionary and explorer, born in Laon; a Jesuit, he went to Canada in 1686; in 1673 accompanied Joliet in the exploration of the Mississippi, re-discovering the river; died while on a missionary journey to the Indians of the Illinois region. (1637-1675).

Marrakesh, town in Morocco, former capital of the Moorish empire, in the French zone, about 125 m. E. of Mogador and to the N. of the Great Atlas Mts. It is a residence of the Sultan of Morocco and an important trade centre, with manufactures of carpets. Pop. 190,300.

Marriage, in law, the voluntary union of one man and one woman to the exclusion of all others. It is a contract, and during its subsistence the personal rights and duties of the spouses are regulated by law. Varied forms of marriage are found among different peoples: polygamy, or plurality of wives; polyandry, where a woman has several husbands, usually brothers, at the same time, and cross-cousin marriage where the orthodox union is for a man to marry the daughter of his mothers' brother, or of his father's sister.

To-day the monogamous marriage forms the basis of civilised society. In English law marriage cannot now be contracted by a person of either sex under the age of 16. Neither party may be bound by a subsisting legal marriage, be physically incapable of consummating the marriage, or be insane, but a marriage entered into during a lucid interval is not invalid. The parties to a marriage must not be within the prohibited relationships, namely brothers and sisters, uncles and nieces, aunts and nephews, half-blood relationships by affinity. A marriage may be invalidated by fraud or duress. Damages may be awarded for breach of promise.

Before a marriage can take place banns must be published for three successive Sundays in the parish or parishes, in which the two parties have resided for the preceding 15 days, the marriage taking place within 3 months of the last publication. As an alternative, notice may be given to a registrar of the district in which each party has resided for the preceding 7 days. A third necessary preliminary is the issue of a licence by the bishop or local incumbent.

Marriage at a church may take place only between the hours of 8 a.m. and 6 p.m. As soon as the registrar's certificate has been granted, a marriage may take place in any registered place of worship in the presence of the registrar or authorised representative. In Scotland marriages are regular or irregular. The former may be celebrated by a clergyman after the publication of banns, or a notice under the Notices Act of 1878. The latter is a form of marriage consisting of any acknowledgement followed by consummation: it may be registered before a sheriff.

Marrow (tissue), the medulla or fat filling the large intestinal cavities of the bones, especially the longer ones, the spongy tissue, and the articular extremities of these and the short rounded bones. It is an oily fluid contained in vesicles. That which is contained in the tissues is reddish and contains cells from which the red corpuscles of the blood are derived.

Marryat, *Frederick*, novelist, born in Westminster; after service in the royal navy, which he entered in 1806, and in which he attained the rank of commander, he retired in 1830, and commenced a series of novels, *Peter Simple* and *Midshipman Easy* being reckoned the best. (1792-1848).

Mars, the Roman god of war, the reputed father of Romulus, and the recognised protector of the Roman State, identified at length with the Greek Ares.

Mars, the exterior planet of the Solar system nearest the earth, of one-half its diameter, with a mean distance from the sun of 141,500,000 m., round which it takes 686 days to revolve, in a somewhat eccentric orbit, and 24½ hours to revolve on its own axis, which inclines to its equator at an angle of 29°. Examination of it shows that there is 4 times as much land as water on it, the so-called "seas" being now accepted as tracts of vegetation, apparently linked by a series of canals, the latter not actually defined as of objective existence. It is accompanied by 2 satellites, an outer making a revolution round it in 30 hours 18 minutes, and an inner in 7 hours and 38 minutes; they are the smallest heavenly bodies known to science.

Marsala, a seaport of Trapani province of Sicily, 70 m. from Palermo. It is renowned for the wines which take its name. It has also manufactures of soap, cement, and bricks. The district is largely devoted to fruit growing. Pop. 57,000.

Marseillaise, the hymn or march of the French republicans, composed, both words and music, at Strasbourg by Rouget de Lisle one night in April, 1792, and sung by the 600 volunteers from Marseilles who entered Paris on July 30 following. Prohibited during the monarchy and empire, it became eventually the national anthem of France.

Marseilles, second city and first seaport of France, on the shore of the Gulf of Lyons, 27 m. E. of the mouth of the Rhône; has extensive dock accommodation; does great trade in wheat, oil, wine, sugar, textiles, and coal, and manufactures soap, soda, macaroni, and iron. There is a cathedral, picture-gallery, museum, and library, schools of science and art. Founded by colonists from Asia Minor in 600 B.C., it was a Greek city till 300 B.C. After the days of Rome it had many vicissitudes, falling finally to France in 1575, and losing its privilege as a free port in 1660. Always a Radical city, it proclaimed the Commune in 1871. A cholera plague devastated it in 1885. Pop. 914,000.

Marshal, historically, an official who regulated combats in tournaments, or rank and precedence at feasts or processions. This latter function has devolved to some extent on the Earl Marshal of England, who is an hereditary officer of State, the Chief of the College of Arms, and performs important ceremonial functions at the Accession and Coronation of the Monarch. The Earl Marshal or Marshal of Scotland was a State officer who commanded the cavalry under the Constable. There were also law court Marshals, such as the Marshal of the King's Bench who had charge of old King's Bench prison in Southwark, and the Marshal of the Royal Household who heard pleas of the Crown. Field Marshal is the highest title of rank in the British Army; it was instituted in 1736, and the sign of rank is the baton. Marshal is also the highest title in the French, German and Italian Armies.

Marshall Islands, a group of islands of the Pacific under Japanese mandate. There are two groups, of which several islands are uninhabited: Ratak (13 islands) and Ralik (11 islands). Copra is exported. They belonged

Dante's *Vita Nuova* and Goethe's *Faust*. (1816-1909).

Martin, St., bishop of Tours, born in Hungary, was in early life a soldier, and meeting with a naked beggar one cold day in winter divided his military cloak in two, and gave him the half of it; was conspicuous both as monk and bishop for his compassion on the poor; was largely responsible for the spread of Christianity in France. *d.* 397. Festival, Nov. 11.

Martineau, Harriet, English authoress and economist, born in Norwich; she was an "advanced" thinker, and a disciple of Auguste Comte; wrote a number of successful stories bearing on social questions; her best-remembered book is *Facts on the Fjord*. (1802-1876).

Martineau, James, rationalistic theologian, born in Norwich, brother of the preceding; began life as an engineer; was at first a follower of Bentham and then a disciple of Kant. At one time a materialist, he became a theist, and eventually a Unitarian minister. He was a thinker of great power, and did much both to elevate and liberate the philosophy of religion. Author of the *Endeavours after the Christian Life*, *Hours of Thought on Sacred Things*, and *The Seat of Authority in Religion*. (1805-1900).

Martini, Friedrich, Hungarian inventor, born at Mehadia; as an engineer officer in the Austrian Army, fought against Italy in 1859, later becoming a gun manufacturer in Switzerland; won a competition opened by British Government, 1871, for the best rifle; with adaptations it became the Martini-Henry, used till 1889. (1832-1897).

Martinique, a West Indian French possession, one of the Lesser Antilles; has a much-indented, precipitous coast. A mountain range in the centre is densely wooded; the plains are fertile, and produce sugar, coffee, and cotton which with fruit and rum are the exports. The climate is hot and unhealthy. The island has been French, with three short intervals, since 1635; St. Pierre, the chief town, was destroyed in an eruption of the volcano Mont Pelée in 1902. The capital is Fort de France. Area, 385 sq. m. Pop. 247,000.

Martinmas, (*q.v.*) on Nov. 11; a quarter day in Scotland.

Martyr, from the Greek word for suffer, "witness," a term for those who suffer ignominy and death for the Christian religion. Festivals and prayers were offered at their tombs. The cultus of the martyrs rapidly spread, and became the basis of the honour paid to saints and holy men in general by the Roman Catholic and Eastern churches. A collection of the lives of martyrs and other saints is known as a martyrology. By extension the word is now used of any person who suffers or dies for his beliefs or opinions.

Marvell, Andrew, English poet and politician, born in Yorkshire; was first a lyric poet, and in politics much of a Royalist, at last a violent politician on the Puritan side, having become connected with Milton and Cromwell. He wrote a tract *On the Growth of Popery and Arbitrary Government in England* after the Restoration, which brought him into trouble. Being a favourite with the king, the king sought to bribe him, but in vain. He died suddenly, and an unfounded rumour was circulated that he had been poisoned. (1621-1678).

Marx, (Heinrich) Karl, a German Socialist philosopher, born in Trèves, of Jewish descent; was at first a student of philosophy and a disciple of Hegel, but soon abandoned philosophy for social economy on a democratic basis and in a materialistic interest; early adopted socialistic opinions, for

his zeal in which he was driven from Germany, France, and finally Belgium, to settle in London, where he spent the last 30 years of his life; founded the "International" (*q.v.*), and wrote a work *Das Kapital*, which laid the foundations of modern Communist theory. He is buried at Highgate. (1818-1883).

Mary I., Queen of England, was born at Greenwich, daughter of Henry VIII. and Catharine of Aragon. After her mother's divorce she was treated with aversion. During Edward VI.'s reign she lived in retirement, clinging to her Catholic faith. On her accession in 1553 a Protestant plot to put Lady Jane Grey on the throne failed; she began cautiously to restore Catholicism, imprisoning reformers and reinstating the old bishops. On her choosing Philip of Spain for her husband a revolt broke out under Sir Thomas Wyatt, and though easily put down was the occasion for the execution of Lady Jane Grey and the imprisonment of Elizabeth. After her marriage in 1554 the religious reaction gained strength, submission was made to Rome, and persecution began in which 300 persons, including Latimer, Ridley, and Crammer, perished in three years. Ill-health, Philip's cruelty, and her childlessness drove her to melancholy; a war with France led to the loss of Calais in 1558, and she died broken-hearted, a virtuous and pious, but bigoted and relentless woman. (1516-1558).

Mary II., Queen of England, daughter of James II. and Anne Hyde; was married to her cousin William of Orange in 1677, ascended the English throne with him on her father's abdication in 1688, and till her death was his much loved, good, and gentle queen. Greenwich Hospital for disabled sailors, which she built, is her memorial. (1662-1694).

Mary, Olga Pauline Claudine Agnes, consort of King George V. of Great Britain; daughter of the Duke of Teck; born at Kensington Palace on May 26, 1867. She was betrothed to the Duke of Clarence, eldest son of King Edward VII., but after his death, which occurred a month after the engagement was announced, married his younger brother, then Duke of York, and later King George V., on July 6, 1893; to him she bore five sons (the eldest being Edward, Duke of Windsor, the second King George VI.) and one daughter. After the death of her husband she made her home at Marlborough House, London. (1867-).

Mary, Queen of Scots, daughter of James, V. of Scotland, and Mary of Guise, born in Linlithgow, became queen ere she was a week old. She was

sent to France in 1548, and married to the dauphin in 1558, who for a year 1559-1560, was King Francis II. On his death she returned to assume the government in Scotland, now in the throes of the Reformation. She retained her own Catholic faith, but chose Protestant advisers. Against all advice she married her cousin Darnley 1565, who tried to force her to settle the succession on him and his heirs, and had her favourite Rizzio murdered, with Mary's connivance. Her only son, afterwards James VI., was born in 1566. The murder of Darnley took place in February, 1567, being accomplished by Hepburn, Earl of Bothwell, her marriage with whom in May alienated the nobles. They rose, took the queen prisoner, and forced her to abdicate. Next year, escaping, she fled to England, and

MARY
QUEEN OF SCOTS

was there for many years a prisoner. Catholic plots were formed to liberate her and put her in place of Elizabeth on the English throne; at last she was accused of complicity in Babington's conspiracy, tried, found guilty, and executed in Fotheringhay Castle, Feb. 8, 1587. (1542-1587).

Mary, the *Princess Royal*, third child of, and only daughter of King George V. and Queen Mary, born April 25, 1897. She married, on Feb. 28, 1922, Viscount Lascelles, afterwards 6th Earl of Harewood, to whom she has borne two sons, George, Viscount Lascelles (b. Feb. 7, 1923) and the Hon. Gerald Lascelles (b. Aug. 21, 1924).

Mary, the Virgin, mother of Jesus Christ. All that is known of her life is what is recorded in the New Testament, principally the gospel of St. Luke. According to tradition she lived at Ephesus with St. John after the crucifixion, and died there. In Roman Catholic theology her part in the plan of redemption has made her an object of worship next after the Divine Persons.

Maryborough, (1) county town of Co. Leix, Eire (Ireland), on a tributary of the Barrow, 50 m. SW. of Dublin. Pop. 3,200. (2) A town in March county, Queensland, Australia, 178 m. from Brisbane. It is on the R. Mary, 25 m. from its mouth, and in railway connection with mining, pastoral, and sugar-growing districts. Pop. 11,800. (3) A town of Talbot county, Victoria, Australia, 112 m. from Melbourne, a busy railway junction, with railway workshops. Pop. 5,700.

Maryland, an Atlantic State of the U.S.A., one of the 13 original states, occupying the basin of the Potomac and of Chesapeake Bay, with Pennsylvania on the N., Delaware on the E., and the Virginias on the W. and S.; has a much indented coast-line, affording great facilities for navigation. The soil is throughout fertile; on the level coast plains tobacco and fruit, chiefly peaches, are grown; in the undulating central land wheat and maize. The mountains in the W. are well wooded with pine; there are coal-mines in the W., copper and chrome in the midland, and extensive marble quarries; the shad and herring fisheries are valuable. The manufacture of clothing stuffs, meat packing, and metal goods is extensive. The climate of Maryland is temperate. The Johns Hopkins University is in Baltimore. Colonisation began in 1634, and a policy of religious toleration and peace with the Indians led to prosperity; the State was active in the War of Independence, and remained with the North in the Civil War. The capital is Annapolis, but the largest city is Baltimore, a great wheat-shipping port and centre of industry. Cumberland has brick and cement works, and Hagerstown has machine, farm implement, and furniture factories. Area, 12,300 sq. m. Pop. 1,632,000.

Marylebone Cricket Club.

See M.C.C.

Maryport, a market town and seaport of Cumberland, England, at the mouth of the R. Ellen. It has a harbour, docks, a prawn-fishing industry and an iron foundry. There are coal mines near. Pop. 12,400.

Masaccio, or *Tommaso Guidi*, an Italian painter, born in Florence; went when very young to Rome, where he painted in the church of St. Clement a series of frescoes, his greatest work being the frescoes in the Brancacci chapel of the Carmine Church. He was a great master of perspective and colour. (1401-1428).

Masai, a warlike Negro tribe in Africa, Victoria Nyanza, of powerful physique. From about 1850 to 1885 they were a formidable power in E. Africa, asserting themselves

with success against the Arab slave-raiders, but their power declined, largely through internal wars, and they later settled in reserves under British rule and engaged in stock-raising.

Masaryk, *Thomas*, Czechoslovakian statesman, son of a coach builder; trained for the teaching profession. During the World War he worked with Dr. Benes (q.v.) for the liberation of his country from Austria-Hungary, and on the declaration of its independence he became first President in Nov. 1918, retaining that office till 1935, and being admired by all Europe for his skill in managing its international relations. (1850-1937).

Mascagni, *Pietro*, Italian composer, born at Leghorn; wrote his most famous opera *Cavalleria Rusticana* in 1890, since when numerous others have been produced, with less success. (1863-).

Masefield, *John*, British poet, author, and playwright; on the death of Robert Bridges in 1936 he became Poet Laureate. His early days were spent in wandering around the world, many of them as an ordinary sailor, and in 1902 he published *Salt Water Ballads*, which caused a stir by their freshness. His poems are marked by great power and originality. *The Everlasting Mercy*, published in 1911, is his most celebrated poem; among his novels are *Captain Margaret* and *Sard Harker*. (1875-).

Mashonaland, South Africa, a plateau 4,000 ft. high crossed by the Unyukwote, lying to the N.E. of Matabeleland and S. of the Zambezi R., of which its streams are tributaries. It is now a part of the British Colony of Southern Rhodesia, having been under British protection since 1888. The natives are of Bantu stock; the country is very rich in iron, copper, and gold, and has traces of ancient scientific gold-mining.

Mask, *Lough*, lake in Eire (Ireland), about 11 m. long by 3 m. broad, forming a portion of the boundary of Mayo and Galway counties, and remarkable for its beautiful scenery.

Mason, *Alfred Edward Woodley*, novelist, born at Dulwich, London; educated at Dulwich College, and Trinity College, Oxford. Liberal M.P. for Coventry, 1906-1910. His best-known novels are *The Courtship of Morrice Buckler* (1896); *The Four Feathers* (1902); *At the Villa Rose* (1910); *The House of the Arrow* (1924). (1865-).

Mason and Dixon's Line, so-called after two English engineers who surveyed it, 1764-1767, is the boundary separating Maryland from Pennsylvania and Delaware. During the Civil War the name was used of the boundary (not coincident with the real Mason and Dixon's line) dividing the free from the slave-holding states.

Masonry, the art of building in natural stone or artificial stone (concrete), and by extension, in brick, moulded earth (adobe, pisé), etc. The term also refers to the building itself. Stones vary in durability, hardness, etc.; those most commonly used are granite, gneiss, porphyry, marble, limestone, and sandstone. Cut stones are often backed with brick or with rubble masonry, the latter being composed of irregular stone, smaller in size than that used for dressed stone masonry. Rubble masonry may be given a squared facing, but the finest facing given to dressed stone masonry is called ashlar, this being a cut-stone masonry composed of large regular stones, carefully finished with cutting tools. At the present time the use of real stone in masonry has largely given way to that of artificial stone, or reinforced concrete, which can be moulded into any form for decorative work, arches, etc. In masonry

it is all-important that the blocks should be laid truly horizontally, with the joints truly vertical.

Maspero, Gaston Camille Charles, French Egyptologist, born at Paris; made extensive explorations and important discoveries in Egypt; wrote, among works bearing on Egypt, *Histoire Ancienne des Peuples de l'Orient*. (1846-1916).

Masque, a species of dramatic entertainment in which originally the performers wore masks of peculiar forms suggestive of the allegorical character assumed. Its essential feature was the presence of a group of dancers called masquers, who were frequently noblemen or courtiers. They neither spoke nor sang, their function being the creation of "an inspiring show" by their gorgeous costumes and fine presence, enhanced by artistic grouping and decoration. The speech and songs of the masque were always in the hands of a professional entertainer. The poetical background supplied by the genius of such writers as Ben Jonson and Fletcher enhanced the success of the 17th Century Court masques in England. Milton's *Comus* is commonly reputed the finest example of a masque.

Mass, the name given by Roman Catholics (and some Anglicans) to the Christian service commemorating Christ's last Supper. *High Mass* or *Solemn Mass* is the most elaborate form of celebration, with music and incense; *Low Mass* dispenses with these ceremonial accessories. A *Requiem Mass* is one celebrated on behalf of the dead. In Catholic theology the Mass is a real sacrifice of the Body and Blood of Christ, offered to God the Father under the species of bread and wine; attendance at Mass on Sundays and certain great feasts is obligatory on every Catholic. The Mass may only be offered by a duly consecrated priest.

Mass, in physics, the measure of the quantity of matter in a body, as distinguished from *weight*, which is the force of gravity upon a body.

Massachusetts, a New England State of the U.S.A., lies on the Atlantic seaboard between New Hampshire and Vermont on the N. and Rhode I. and Connecticut on the S., with New York on its western border; has a long, irregular coast-line and an uneven surface, rising to the Green Mountains in the W. The scenery is of great beauty, but the soil is in many places poor, the farms raising chiefly hay, potatoes, tobacco, and dairy produce. The winters are severe. Its industries include cotton, woollen, worsted, clothing, leather and leather goods, iron and iron goods, printing. There are several important universities and colleges, including Harvard, Boston, Williams and Amherst. Founded in 1620 by the Pilgrim Fathers, Massachusetts had many hardships in early days, and was long the scene of religious intolerance and persecution. The War of Independence began at Bunker's Hill and Lexington in 1776. The capital and chief seaport is Boston; Worcester has machinery factories, Springfield paper, and Lowell cotton mills; Concord was for long a literary centre. Area, 8,270 sq. m. Pop. 4,250,000.

Mass Action, Law of, in chemistry, discovered in 1864 by Guldberg and Waage, states that the rate of a chemical reaction is proportional to the active masses of the substances taking part in it, i.e., to their concentration in gram-molecules per litre. It has been of great value in the study of chemical dynamics.

Massage, in medicine, a process of kneading, stroking, and rubbing with the fingers and palms of the hands, and to the body as a whole or to locally affected parts, to allay pain, promote circulation, and restore nervous and vital energy.

It was practised in very early times in China and India; was known to the Greeks and Romans, and has been considerably developed in modern times as a therapeutic method.

Massagetae, in classical times a people said to live on the N.E. of the Caspian Sea, and to kill and eat the aged among them, in an expedition against whom, it is said, Cyrus the Great lost his life.

Massawah, seaport and capital of the province of Eritrea, Italian East Africa, situated on a barren island of the Red Sea. It is the chief port of Italian East Africa; pearl-fishing is carried on. Pop. 4,200, chiefly Somalis.

Masséna, André, Duc de Rivoli, Prince of Essling, one of the most illustrious marshals of France, born in Nice. He distinguished himself at Rivoli in 1796, at Zurich in 1799, at the siege of Genoa in 1800, at Eckmühl and at Wagram in 1809, and was named by Napoleon the favoured child of victory. He was recalled from the Peninsula by Napoleon for failing to expel Wellington. (1758-1817).

Massey, William Ferguson, New Zealand politician. Born in Ireland, he emigrated at the age of 14, and went in for farming. His political career started in 1894, when he became a local M.P. In 1903 he became leader of the opposition, and in 1912 Prime Minister, in which capacity he was a member of the Imperial War Cabinet and attended the Peace Conference in 1919. (1856-1925).

Massillon, Jean Baptiste, celebrated French pulpit orator, born at Hyères, Provence; entered the congregation of the Oratory, and was called to Paris. He was made bishop of Clermont, and next year preached before Louis XV., now king, his famous *Petit Catechisme*, a series of ten sermons for Lent. He was a devoted bishop, and the idol of his flock. (1663-1742).

Massinger, Philip, English dramatist. Little is known of his history except that he studied at Oxford, lived in London, and was buried as "a stranger" in St. Saviour's, Southwark. Of his 37 plays only 18 remain and of these the most famous is the comedy entitled *A New Way to Pay Old Debts*. Much of his work, it is alleged, was by way of collaboration with Dekker, Fletcher and other dramatists. (1583-1640).

Master, the title given to the heir of a Scottish peerage below the rank of earl, as Master of Sempill.

Master and Servant. In law a one who has contracted to lease his services to another for a limited period. Servants consist of two classes, those who engage to perform certain duties for certain wages, and apprentices, who may receive something by way of wages, but who have to be taught a trade. The chief classes of servants are: agricultural labourers, operatives or skilled labourers, and menials or domestic servants.

In England, a contract for service for more than a year must be in writing; if for a year and if the servant be discharged without just cause during the year, he may claim wages up to the end of the year; on the other hand, if he leave without cause before the time no wages may be claimed. If he happen within the year to fall sick, or be hurt or disabled in the service of his master, the master cannot, apart from agreement, put him away or abate any part of his wages for that time.

If a domestic servant be engaged under no special contract, a month's warning or payment of a month's wages is all that is necessary to terminate the engagement. Operatives may be discharged or may leave at a week, fortnight or month's notice, according to the

recognised local or trade usage. The grounds on which a servant may be legally discharged without warning are: wilful disobedience of lawful commands, gross immorality, habitual negligence, dishonesty, permanent disability from illness, etc.

A master has no right to chastise a servant, but has the right of moderately correcting an apprentice under age. He is held liable in cases where his servant, in the course of his duty, injures a third party. A master can dismiss a servant without notice and without cause, on payment of wages for the full term of the contract, or for one month if there be no special agreement.

The death of a master terminates the contract, but in Scotland the servant can claim wages for the period of the contract, and in that case must serve the executors. In the case of bankruptcy of the master the servant, if a labourer or workman, is a privileged creditor for wages due, but not exceeding £25. If he be a clerk, shopman, etc., the period is four months, the limit £50.

Master of the Rolls, the custodian of the Record Office and principal Judge of the Court of Appeal; ranking in the English legal hierarchy immediately after the Lord Chief Justice.

Mastic, a brittle transparent resinous substance obtained in liquid form by making incisions in the mastic-tree (*Pistacia Lentiscus*) of the order Anacardiaceae. It is used as the main constituent of varnish and as a stopping in dentistry.

Mastiff, a massive and powerful British dog, weighing 155 to 175 lb.; the head should be broad and square, forehead flat with depression in centre; muzzle short; ears thin; eyes small and wide apart; chest and ribs wide and deep; forelegs straight; loins and back wide and muscular; coat close and short, apricot or silver fawn in colour, with black ears and muzzle.

MASTIFF

Mastodon, one of an extinct species of mammals akin to the elephant, of more primitive type than the mammoth, and belonging to the Miocene and Pleistocene periods.

Mastoid, a mass of bone containing cavities which projects from the side of the human skull behind the ear. The mastoid antrum communicates with the middle ear and if the latter is diseased, is liable to suppurate. Suppuration may follow influenza or be caused by failure to keep the ear clean. The inflammation may cause an abscess and, if this is allowed to burst, grave danger may ensue.

Masurium, a supposed metallic chemical element, the discovery of which was claimed by Noddack and Tacke in 1926. Symbol Ma, atomic number 43, atomic weight undetermined. There is doubt whether the discovery can be authenticated.

Matabeleland, a name (now little used) for the southern part of S. Rhodesia, the area conquered in 1840 by the Zulu Matabele tribes. It became British territory in 1890, native risings in 1893 and 1896 being put down. See Rhodesia.

Matanzas, province of Cuba, E. of E. of Havana, with a large harbour; exports sugar and guavas. Pop. 70,000.

Match, a splint of wood or length of taper capable of ignition. Phosphorus tapers existed in the 18th Century, these being sealed matches which lighted by contact with

the air. The discovery of sulphide of phosphorus revolutionized match-making, and matches which ignite by friction with any surface are tipped with this substance. The "safety-match" resulted from Von Schrotter's discovery in 1855 of amorphous phosphorus, which acts as an oxidising agent to the material with which the match is tipped. Match-making has grown from a cottage occupation to a huge industry, especially in the countries round the Baltic, where the great forests supply matchwood.

Mate (*Ilex paraguayensis*), a species of holly, native of S. America, whose leaves, roasted and powdered, are used for the beverage "mate tea." It has a somewhat bitter flavour and is taken either neat or with lemon or sugar.

Materialism, the theory which, denying the independent existence of spirit, resolves everything within the sphere of being into matter, or into the operation and the effect of the operation of forces latent in it, or into the negative and positive interaction of mere material forces, to the exclusion of intelligent purpose and design. It is the first philosophical attempt to conceive the world as a unity, and is found in Buddhism as well as in the religious systems of the Chinese and Egyptians.

The clearest exposition is that of the Atomists, especially Democritus of Abdera who explained matter as an aggregation of atoms endowed with motion. He formulates the great principles of the indestructibility of matter and of the conservation of force. The doctrine was revived in England by Hobbes, in France by La Mettrie and Helvetius and in Germany as a reaction against the Idealism of Fichte and Hegel by Moleschott and Vogt. Materialists so far have failed to explain satisfactorily either the ultimate nature of the atoms or the phenomena of consciousness by means of atoms and motion.

Mathematics, owes its origin to the antiquity, of the rules for the arithmetical operations of addition, subtraction, multiplication and division, the need for systematic land measurement and the observation of periodical events in the skies which gave rise to a fixed calendar. Its progress was largely held back by the absence of any convenient way of expressing numbers and quantities, and the introduction into Europe about the 10th Century A.D., of the Indo-Arabic system of numerals, 1, 2, 3 . . . together with a special symbol for zero, marked a great advance. Arithmetical calculations were further simplified in the 17th Century by the introduction of logarithms.

About 600 B.C. the Greek, Thales of Miletus, made use of the deductive method in proving some theorems of geometry. Starting from certain axioms or hypotheses which were believed to be self-evident, Thales was able to show what other facts could be demonstrated by logical deduction. The application of the new method quickly led to the development of the subject of geometry (g.e.) and was gradually applied in all branches of mathematics. The 15th Century A.D. saw the growth of the science of algebra, and the following century the foundation of analytical geometry.

From the 17th Century onwards mathematical methods received greater and greater application in the physical sciences, and the problems requiring solution demanded, in their turn, the development of new and powerful branches of mathematics, such as the calculus and differential equations. The growth of mathematics has been particularly rapid during the last two or three centuries, and, at the present day, a mere catalogue of its chief branches would require a long list of subjects.

Mather, Cotton, an American divine, born in Boston; notorious for his belief in witchcraft, and for the persecution he provoked against those charged with it. His book, *Wonders of the Invisible World*, is famous as an attack upon alleged witches. (1663-1728).

Matilda, or **Maud**, daughter of Henry I., Emperor Henry V., on whose decease she was married to Geoffrey Plantagenet of Anjou and became mother of Henry II.; on the death of her father succeeded to the English throne, but was supplanted by Stephen, by whom she was finally defeated. (1102-1167).

Matisse, Henri, French post-impressionist painter, born at Le Cateau. From 1895 to 1899 he worked in the classical tradition, and lived some time in Morocco. Under Gauguin's influence, he joined the Fauvist school, and soon became one of its leaders. (1869-).

Matlock, a watering-place in Derbyshire, on a slope overlooking the Derwent, 15 m. NW. of Derby; famous for over two centuries for its waters. Pop. 16,600.

Matoppos Hills, a range of hills in Matabeland, S. Rhodesia, some 20 m. S. of Bulawayo. Cecil Rhodes is buried here.

Matriarchy, an order of society in precedence, more especially in reckoning descent, over the father. The existence of matriarchal rule, at one time supposed by many writers to have been not uncommon among primitive peoples, is now generally called in question.

Matriculation, in the general sense to membership of any corporate body, but academically it means the formal entry into a university. The matriculation certificate of the University of London makes its holder an undergraduate of that University, and entitles him to become, under certain conditions, an undergraduate member of Manchester, Liverpool, Birmingham and some other universities. The standard of knowledge required by candidates is that which would be expected of a pupil of average ability who had been at a secondary school until reaching the age group of 16 to 18 years. As a preliminary to a course of study for external university degrees, all persons over the age of 16 are eligible. The choice of subjects is wide.

Matrix, the cavity in which anything is formed, and in mineralogy the natural material in which any metal or stone, etc., is embedded. In typography, a mould from which a stereo plate is made; also a mould used in making the face of a letter.

Matron, a term used to denote a married woman or a woman who has reached an age of staid demeanour, whether or not married. The term is particularly applied to women in charge of staffs of homes and such institutions as hospitals and homes for girls. See also **Nursing**. A jury of matrons, composed of married women, may be empanelled to inquire into the truth of a plea of pregnancy advanced in stay of execution by a woman sentenced to capital punishment.

Matsys, Quentin, a Flemish painter, born in Louvain, originally a blacksmith; did altar-pieces, especially that of Antwerp Cathedral, and genre paintings. (1460-1530).

Mattathias, Jewish national hero, the father of the Maccabees (q.v.), who in 170 B.C. refused the request of a Syrian embassy to sacrifice to the Syrian gods, slew the priest who offered to act in his place, and set up in the Judean wilderness the standard of revolt against Syria thus opening

the Maccabean war which eventually brought national independence.

Matter, in physics, is roughly defined as that which has weight and occupies space. The law of the conservation of matter states that matter can neither be created nor destroyed, and in ordinary circumstances this law holds good with extreme accuracy. Modern research has, however, shown that matter may be converted into energy, 1 gram of matter (of whatever kind) yielding 9×10^{10} ergs; the reverse process, viz., the conversion of energy into matter, is also possible. It is therefore more correct to restate the laws of the conservation of matter and energy as follows: the sum total of energy plus matter in the universe is a constant.

Matterhorn, a sharp Alpine peak, 14,780 ft. high, on the Swiss-Italian border, difficult of ascent; first scaled by Whymper, 1865.

Matthew, a tax-collector or publican, one of the twelve apostles of Christ, also known as Levi; generally represented in Christian art as an old man with a large flowing beard, and often as occupied in writing his gospel; Feast, Sept. 21.

Matthew, Gospel according to, the first book of the New Testament, based largely on a collection of sayings of Jesus or "Logia," and on the Gospel according to Mark; it was originally written in Aramaic; both its date and its authorship are uncertain.

Matthias Corvinus, King of Hungary from 1458, born in Klausenburg. Though arbitrary in his measures, he promoted commerce, dispensed justice, fostered culture, and observed sound finance. He founded the University of Budapest, an observatory, and great library, but his reign was full of wars. For nine years he fought the Turks, and took from them Bosnia, Moldavia, and Wallachia. From 1470 till 1478 the struggle was with Bohemia, from which he wrested Moravia, Silesia, and Lusatia; then followed war with Frederick III., the capture of Vienna, 1485, and a large part of Austria, 1487. He made Vienna his capital. (1443-1490).

Maubeuge, a strongly fortified town of France in the dept. of Nord, on the Sambre. In the World War it was taken by the Germans in 1914 and held until Nov. 1918. It has a large arsenal. The industries include metal and marble works. Pop. 22,000.

Maude, Cyril, English actor-manager, the leading comedian of his time; born in London, educated at Charterhouse. First appeared at Denver, Colo., in *East Lynne*, 1884; in England, at the Criterion, 1886, in *The Great Divorce Case*; in first performance of *The Second Mrs. Tanqueray*, 1893; joint-manager at the Haymarket, 1896-1905; built the Playhouse, 1907, which he managed until 1913. (1862-).

Maude, Sir Frederick Stanley, British general. Of Irish birth, he entered the Coldstream Guards, saw service in the Sudan and Boer War, and in Oct. 1914, took command of the 14th brigade in France. He was in charge of the 18th division in Gallipoli, and later in Mesopotamia, where he succeeded Townshend and captured Bagdad, where he contracted fever and died. (1864-1917).

Maugham, William Somerset, English born in Paris; educated at the King's School, Canterbury, and Heidelberg University; studied medicine, but in 1897 published his first novel, *Liza of Lambeth*. Besides several volumes of short stories, he has written many novels and plays, among the former *Of Human Bondage*, and among the latter *Our Betters*, a

social satire performed in New York, 1917, and London, 1932. His autobiography, *The Summing Up*, appeared in 1938. (1874-).

Maumbury Rings, circular earth mounds situated about ½ m. S. of the town of Dorchester, Dorset, England. They form a circle capable of holding 12,000 persons. Excavations carried out 1908-1913 disclose that the original work was an earthen circle, with an interior ditch, dating from the late Neolithic to Early Bronze Age (c. 1800 B.C.). In Roman times the work was converted into the amphitheatre of the town of Durnovaria (the modern Dorchester).

Maundy Thursday, the Thursday before Good Friday, on which day it was customary for princes, rulers and other great persons to wash the feet of a number of poor people, and on which a distribution of alms ("Maundy money") is still made on behalf of the King to a certain number of poor persons.

Maupassant, Guy de, a French novelist, born in Fécamp; served in the Franco-Prussian War, and afterwards gave himself to letters, producing novels, stories, lyrics, and plays; died insane. (1850-1893).

Maurice, Frederick Denison, a liberal theologian and social reformer, born at Normanston, near Lowestoft, the son of a Unitarian minister; for a time edited the *Athenaeum*, and took orders in the English Church in 1834; held professorships in Literature, in Theology, and Moral Philosophy; was a disciple of Coleridge, a Broad Churchman, and with Kingsley, one of the originators of Christian Socialism, and the founder of the Working-Men's College. (1805-1872).

Maurice of Nassau, Dutch statesman, Prince of Orange; one of the most famous generals of his time; was son of William the Silent, on whose assassination he was elected Stadtholder, and became the liberator of the United Provinces of Spain. (1567-1625).

Maurier, Sir Gerald du, English actor-maneer, manager, born at Hampstead; made his first stage appearance in 1894. Among his successes were the parts of Captain Hook in *Peter Pan*, Hamlet, and Brewster, in *Brewster's Millions*. He was knighted in 1912. (1873-1934).

Mauritania, under the Roman empire name of the African country W. of the Muluya R. and N. of the Atlas Mts., from which supplies of corn and timber were obtained.

Mauritius, British possession in the Indian Ocean, 550 m. E. of Madagascar, a volcanic island with mountains 3,000 ft. high, a tableland in the centre, and many short streams. Formerly well wooded, the forests have been cut down to make room for sugar, coffee, maize, and rice plantations; sugar is the main export. The population is very mixed, including many Indians; there are also descendants of French settlers and Europeans. Discovered by the Portuguese about 1510, it was abandoned 90 years later; the Dutch held it for 112 years, and abandoned it in turn. Occupied by the French in 1721, it was captured by Britain in 1810. Area, 720 sq. m. Pop. 405,000. Port Louis (pop. 65,000) in the NW., is the capital and a British naval coaling station.

Maurois, André, pseudonym of Émile Salomon Wilhelm Herzog, French author, born at Elbeuf, educated at Rouen. Knowing English thoroughly, he was an official interpreter during the World War. His

first book, *Les Silences du Colonel Bramble*, 1918, displayed knowledge of English character. Other works are *Lives of Shelley*, *Disraeli and Byron*, and *Poets and Prophets*. (1885-).

Maurras, Charles Marie Phébus, French monarchist writer; born at Martignes (Bouches-du-Rhône); educated at Catholic College of Aix. With Léon Daudet, conducted *L'Action Française* from 1908; imprisoned, 1926. His atheism antagonized the Church; but his authoritarian politics helped to form Italian Fascism. (1868-).

Mausier Rifle, a military rifle with ridges under the receiver in front of the trigger guard. The magazine box, which is movable, may be charged with a single cartridge or with five. It was invented by Paul Mausier, a German, and adopted as the standard rifle of the German Army. The Belgian Army adopted it in 1889, and the Argentine Republic two years later.

Mausolus, a king of Caria, husband of Halicarnassus, raised a monument to his memory, called the Mausoleum, reckoned one of the Seven Wonders of the world. From this is derived the use of the word to cover any large and imposing tomb.

Mauveine, the first of the aniline dyes to be prepared, was obtained by Sir W. H. Perkin in 1856 by the action of chromic acid upon aniline made from coal-tar benzene. The discovery was accidentally made while Perkin was trying to synthesize quinine.

Mawson, Sir Douglas, British explorer. He went to the Antarctic in 1907 with Shackleton, and in 1911 commanded the Australian Antarctic expedition, a venture which ended in failure and of which he was the only survivor. Knighted in 1914, he undertook a fresh voyage in the *Discovery* in 1929. (1882-).

Maxim, Sir Hiram Stevens, inventor, born at Tangerville, Maine, U.S.A., later a naturalized British subject; is best known in connection with the invention of the gun named after him, but among his other inventions are the smokeless powder, the incandescent lamp carbons, and searchlights and he also carried out early experiments in flying. (1840-1916).

Maximilian, Emperor of Mexico, was an Austrian archduke, younger brother of Francis Joseph I., born in Schönbrunn; was made Mexican emperor under French influence in 1863, but roused the Liberal party against him, and at the head of 8,000 men was defeated at Queretaro, taken prisoner, tried by court-martial, and shot. (1832-1867).

Maximilian I. German Emperor, son of Frederick III., acquired Burgundy and Flanders by marriage, which involved him in a war with France; became emperor on the death of his father in 1493; became by marriage Duke of Milan, and brought Spain under the power of his dynasty by the marriage of his son Philip to the daughter of Ferdinand and Isabella. It was he who assembled the Diet of Augsburg at which Luther made appeal to the Pope. (1459-1519).

Max-Müller, Friedrich, philologist, born at Deasau, son of a German poet, Wilhelm Müller; educated at Leipzig and Paris, and came to England in 1846; was appointed Taylorian Professor at Oxford in 1854, and in 1868 professor of Comparative Philology there, a science to which he made large contributions, editing and translating many Hindu, Buddhist and other Eastern works, and writing much on the origin and development of language. (1823-1900).

SIR GERALD
DU MAURIER

Maxton, James, Scottish politician, educated at Glasgow, by profession a teacher. Member of Glasgow Education Authority, and Scottish organizer of Independent Labour Party, 1919-1922; M.P. for Bridgeton from 1922. Is leader of the Independent Labour Party group in Parliament, leading it in secession from the official Labour Party in 1931. (1885-).

JAMES MAXTON

May, the fifth month of the year, so called from the Latin *Maïus*, itself derived from a Sanskrit word signifying to grow, as being the shooting or growing month.

May, Phil, British artist who, after some in Australia, made a name by comic drawing, especially his Cockney studies in *Punch* and other periodicals and his work for the *Graphic*. (1864-1903).

Mayas, an ancient people of Central America whose high pitch of culture is revealed by the monuments, remains of palaces, temples, and pyramids found in Yucatan. At the present time the race is represented strongly in Yucatan, where the language is still spoken.

Mayenne, inland dept. of NW. France; mainly agricultural; cattle and horses are raised, and stone quarried; capital, Laval; area, 1,985 sq. m. Pop. 251,400.

Mayfair, a western district of London, in the City of Westminster, containing some of its most fashionable residential and shopping centres. It includes Curzon Street, Berkeley Square, and Grosvenor Square; it is bounded roughly by Oxford Street, Bond Street, Piccadilly, and Park Lane.

Mayflower, The, the name of the "Pilgrim Fathers" (q.v.) sailed from Plymouth on Sept. 6, 1620, landing at Plymouth Rock, Massachusetts on December 21. This band of English Separatists formed the nucleus of the earliest permanent colony in Massachusetts.

Mayfly. See *Ephemera*.

Maynooth, village in co. Kildare, Eire Dublin; is the seat of a Roman Catholic seminary founded by the Irish Parliament in 1795 on the abolition of the French colleges during the Revolution; an annual grant of £9,000 was made, increased to £26,000 in 1846, but commuted in 1869 for a sum of £1,100,000, when State connection ceased; the college houses 500 students for the priesthood.

Mayo, maritime county in Connaught, Eire (Ireland), between Sligo and Galway; has many indentations, the largest Broadhaven, Blacksod, and Clew Bays, and Achill and Clare Is., with a remarkable peninsula, The Mullet; mountainous in the W. the E. is more level, and has Lough Conn and the Moy R. Much of the county is barren and bog, but crops of cereals and potatoes are raised; cattle are reared on pasture lands. There are valuable slate quarries and manganese mines. Castlebar, in the centre, is the county town; Westport, on Clew Bay, has some shipping. Area, 1,354,000 acres. Pop. 161,000.

Mayors, chairmen of city and borough over which they preside. The office dates back to the time of Henry II. London and several of the large provincial cities have Lord Mayors. The equivalent name in Scotland is Provost.

Mayweed (*Matricaria inodora*), an annual or perennial plant of the order Compositae with finely dissected leaves and with white ray florets and yellow discs. It grows throughout Europe and Asiatic Russia.

May Week, the annual summer inter-collegiate races for the headship of the river held at Cambridge every June, when the college balls also take place.

Mazarin, Jules, Italo-French cardinal and statesman, born in Piacenza, Abruzzi. Having been sent by the Pope on an embassy to France, he gained the favour of Richelieu, whom he succeeded, being naturalized as a Frenchman in 1642. He brought the Thirty Years' War to an end by negotiating the peace of Westphalia, crushed the revolt of the Fronde (q.v.), and imposed on Spain the treaty of the Pyrenees. At first a popular minister, he began to lose favour when cabals were formed against him, and he was dismissed, but he contrived to allay the storm, regained his power, and held it till his death. He died immensely rich, and bequeathed his library, which was a large one, to the College Mazarin. A bible in the Mazarin Library, dated 1456, is known as the "Mazarin Bible." (1602-1661).

Maze, a building or place constructed of egress difficult. Such devices were known to the classical world, existing in Crete and Egypt. There is a well-known maze at Hampton Court made in the reign of William III., the paths of which are bordered with yew trees. See also *Labyrinth*.

Mazeppa, Ivan, hetman of the Cossacks, born in Podolia; became page to John Casimir, king of Poland; was taken by a Polish nobleman, who surprised him with his wife, and tied by him to the back of a wild horse, which galloped off with him to the Ukraine, where he joined a Cossack band, became secretary to their hetman, and finally hetman himself. He won the confidence of Peter the Great, who made him a prince under his suzerainty, but in an evil hour he allied himself with Charles XII. of Sweden; fled to Bender on the defeat of the king at Pultowa in 1709. (1645-1709).

Mazurka, a lively Polish dance, executed by four or eight couples, and much practised in the N. of Germany as well as in Poland; a favourite form of composition with Chopin.

Mazzini, Giuseppe, Italian patriot, born in Genoa, his life spent in political agitation for the regeneration of his country on a democratic basis; was arrested in 1831 and expelled from Italy; organised at Marseilles the secret society of Young Italy whose motto was "God and the People"; lived in Marseilles, Switzerland and London, until on the outbreak of the Revolution in 1848 at Paris he hastened thither to join the movement, which had spread into Italy, where in 1849 he was installed one of a triumvirate in Rome and conducted the defence of the city against France, but refused to join in the capitulation; he returned to London and eventually retired to Geneva. (1805-1872).

M.C.C., the Marylebone Cricket Club, formed about 1787 as a development of the White Conduit Cricket Club, whose members played cricket at White Conduit Fields, Islington. In that year Thomas Lord acquired a ground for the club at what is now Dorset Square. The club's present ground at St. John's Wood was acquired in 1808. During the whole of its existence it has been recognised as the controlling authority of cricket.

Mead, a beverage made by fermenting barley, honey, used in civilised and barbarous Europe from very early times.

Meadow Grass, a general name for grasses of the genus *Poa* of which there are 150 species, 8 being found in Britain. They include some of the commonest grasses, small or tall, with spreading panicles, and some useful pasture grasses. The spikelets have two or more florets.

Meadow Rue (*Thalictrum flavum*), a herbaceous British wild

plant of the natural order Ranunculaceae. It has fine compound leaves. The stems, short or tall, are crowned with numerous small flowers, giving a feathery effect. A number of other allied species, also so called, are grown in gardens as perennials for the sake of their fern-like foliage and attractive flowers.

MEADOW RUE

or Autumn Crocus. See Colchicum.

Meadow Sweet

(*Spiraea Ulmaria*), a plant of the rose (Rosaceae) order, growing wild in Britain. It bears sweetly-scented creamy-white clustered flowers and grows in moist soil, frequently by ditches and ponds. It grows 2 ft. to 4 ft. high. At least one variety (*S. ulmaria flore pleno*) is grown in moist peaty soil in gardens.

Mealie, the South African name for Indian corn or maize (q.v.)

Measles, an acute infective and eruptive fever, caused by a specific germ, as yet unidentified. It is a serious illness, chiefly on account of possible complications, such as broncho-pneumonia, laryngitis, inflammation of the ear, and various nervous disorders. It most commonly occurs in young children, during the winter or spring. The incubation period is generally a fortnight, and quarantine 15 days. The rash appears on the fourth day, spreading from below the ears to the face and over the body; earlier symptoms are acute catarrh of the eyes and nose, an aversion from light, and a fairly high temperature. The rash, consisting of groups of raised spots, begins to subside after 2 days, the temperature returning to normal after a week.

Meath, a county of Leinster, Eire (Ireland), touching the Irish Sea between Louth and Dublin, watered by the Boyne R. and its tributary the Blackwater. The surface is undulating, the soil fertile; some oats and potatoes are grown, but most of the county is under pasture. There is a little linen and coarse woollen industry. The chief towns are Navan, Kells, and the county town, Trim. Meath was in ancient Ireland, one of the five kingdoms into which the country was divided. Area, 903 sq. m. Pop. 61,300.

Meaux, French town, on the Marne, 28 m. N.E. of Paris, a well-built town, with Gothic cathedral; has a large corn and provision trade, and copper and cotton industries; Bossuet was bishop here, and it contains his grave. Pop. 13,000.

Mecca, the birthplace of Mohammed, the capital of Hejaz and the former capital of Arabia; in the midst of sandy valleys, and 60 m. distant from Jeddah, its port; a city to which every Mussulman must make a pilgrimage once in his life. Pop. 80,000.

Mechanics, that branch of physical forces and their effect upon bodies as regards motion, acceleration, equilibrium, etc. The science was founded by Galilei (q.v.), Stevinus (1548-1620), and Newton (q.v.), and the Newtonian system is still entirely adequate for all except the most minutely accurate requirements, where it is supplemented by the

recent work of Einstein. See Statics, Dynamics, Kinetics, Kinematics.

Mecklenburg, a German "land" formed in 1933 by the union of the former states of Mecklenburg-Schwerin and Mecklenburg-Strelitz, on the shores of the Baltic between Schleswig-Holstein and Pomerania; is mostly a level, fertile plain, with numerous small rivers and many lakes. Agriculture is the chief industry; merino sheep are renowned; there are iron-founding, sugar-refining, and tanning works, and amber is found on the coasts. Schwerin (pop. 54,000) on Lake Schwerin, is the capital. Rostock, a busy port on the Baltic has a University. Area, 6,200 sq. m. Pop. 805,000.

Medal, a small plate of metal bearing an inscription or design, struck to commemorate some notable occasion or event; the word to-day has only this specialised sense, but in classical times medals were not differentiated from coins. The art of striking medals reached its height between the 14th and 15th Centuries. Two schools, the Italian and the German, were particularly prominent, the former distinguished by the work of Vittore Pisano, the latter by that of Albrecht Dürer. The 17th Century saw the rise of the French and Dutch schools. In England, medals have been struck since the 16th Century. Since Waterloo (1815), campaign medals have been regularly awarded, as well as medals for valour and distinguished conduct. The Victoria Cross was instituted in 1856, the Conspicuous Gallantry Medal in 1855, the Distinguished Conduct Medal in 1845. There are special medals for the R.A.F. (the Distinguished Flying Medal, 1918), and life-saving medals are awarded by various institutions, the Royal Lifeboat Institution, the Board of Trade, etc. Since Edward VI. there has been an uninterrupted series of Coronation medals.

Medallion, a coin or medal struck to commemorate some particular event. In architecture the name is used of a tablet, in relief, for mural decoration.

Medea, a famous sorceress of Greek legend, daughter of Æetes, king of Colchis, who assisted Jason (q.v.) to acquire the Golden Fleece, and accompanied him back to Greece as his wife. By her art she restored the youth of Eson, the father of her husband, but the latter having abandoned her, she avenged herself on him by putting the children she had by him to death. Her story is the subject of a play by Euripides.

Media, a country on the SW. of the Caspian Sea, originally a province of the Assyrian empire, from which it revolted; was after 150 years of independence annexed to Persia by Cyrus, of which it had formed the NW. portion; it is now part of Iran.

Medici, an illustrious family who attained sovereign power in Florence in the 15th Century, the most celebrated members of which were:

Cosimo de' surnamed the "Father of his country," was exiled for ten years but recalled, and had afterwards a peaceful and prosperous reign; was a student of philosophy, and much interested in literature (1389-1464). **Lorenzo de'**, the Magnificent, did much to demoralise Florence, but patronised literature and the arts (1448-1492). Other celebrated members of the family were Popes Leo X., Clement VII., and Catharine and Mary de' Medici.

Medicine, the science of treating disease with a view to cure, has in the Western world a continuous history since Hippocrates, a Greek of 400 B.C., whose methods have been preserved in the Hippocratic Corpus. The second great figure in medical history was a Roman, Galen, who began to practise in the 2nd Century A.D., and after whom for fourteen centuries medicine remained almost stationary. In the Middle Ages the foremost practitioners were Arabs and Jews. In the 16th Century three men stand out—Paracelsus, a Swiss; Vesalius of Flanders; and Ambroise Paré of France. During the 17th Century special progress was made in anatomy, physiology, chemistry and ophthalmology. In the second half of the 18th Century surgical practice made rapid strides after the discovery of anaesthetics (first widely used by Simpson of Edinburgh), and the antiseptic principles of Lister, who applied the work of Pasteur, the founder of modern bacteriology (see also *Surgery*). The discovery of X-rays towards the end of the century had an immediate effect in the treatment of injuries, lesions, diseased tissues, etc. (See *Radiology*.) During the 20th Century the preventive side of medicine was developed. Laws were made relating to public health, sanitation, and the health of the worker, and clinics were established to deal with tuberculosis, venereal disease, and for maternity and child welfare. Before beginning medical practice the student must have his name entered on the Register of the General Medical Council, and for this certain medical degrees or other recognised qualifications are necessary.

Medicine Hat, a town of Alberta, is found in the district, and among its industries is that of flour-milling. It is an air-port. Pop. 10,300.

Medick (*Medicago*), a genus of clover-like plants with yellow or purple flowers. Some species, including alfalfa or Lucerne (*M. sativa*), are grown as fodder. Six species are found in England, known as medick, nonsuch, burweed, etc.

Medina (*Medina-en-Nabi*), called also Mecca, the city where Mohammed found refuge after his "flight" from Mecca in 632, and lived thereafter. His tomb is in a beautiful and rich mosque called El Haram (i.e., the inviolate), erected on the site of the prophet's house. Pop. c. 20,000.

Medina, a small river in the Isle of Wight, England, almost dividing the island in two. On its banks stands Newport, the chief town of the island, and Cowes stands on the estuary.

Medinet-el-Fayum, a city of Upper Egypt and capital of the Fayum province. It is a large trading centre. Pop. 21,800.

Mediterranean Sea, so called by as lying in the presumed middle of the earth, surrounded by Europe, Asia, and Africa; the largest enclosed sea in the world. Its communication with the Atlantic is Gibraltar Strait, 9 m. wide; it is linked with the Black Sea through the Dardanelles, and in 1869 a canal through the isthmus of Suez connected it with the Red Sea. It is 2,200 m. long by 1,200 m. broad, the S. shores regular; the N. with many gulfs, and two great inlets, the Aegean and Adriatic Seas. The Balearic Is., Corsica, Sardinia, Sicily, Malta, Cyprus, and Crete, the Ionian Is., and the Archipelago are the chief islands; the Rhone, Po, and Nile the chief rivers that discharge into it. A ridge between Sicily and Cape Bon divides it into two great basins; it is practically tideless, and saltier than the Atlantic; its waters too are warm. Northerly

winds prevail in the E. with certain regular variations. In recent years it has become the centre of gravity of European politics, as a result of Italian aspirations in Africa and the near East, and the Civil War in Spain.

Medjidie, a former Turkish order of knighthood instituted in 1852 by the Sultan Abd-ul-Medjid, as a reward of merit in civil or military service.

Medlar (*Pyrus*, or *Mespilus germanica*), a common deciduous shrub found in hedges in most parts of Europe. The fruit, which is about an inch in diameter, grows on the points of the main or side shoots, and is depressed and concave on top. The Nottingham cultivated variety is considered the best. The fruit is harsh and astringent. It is not eaten until "bletted," i.e., until it is brown and decay has set in.

Medmenham, a village of Buckinghamshire, 60 m. from London. The former Cistercian abbey was tenanted during the 18th Century by a band of men of fashion under the designation of the "Monks of St. Francis," better known as the "Hell Fire Club," led by Sir Francis Dashwood, John Wilkes and others, who converted it into a convivial retreat and there celebrated their orgies. Pop. 400.

Medoc, a district in the dept. of the Gironde, to the S. of the estuary of that name, in the S. of France, famous for its wines.

Medusa, one of the three Gorgons (g.v.), originally a beautiful woman who offended Athena, so that the goddess changed her hair into hideous serpents, and gave to her eyes the power of turning anyone into stone who looked into them. Perseus (g.v.) cut off her head by the help of Athena.

Medway, a river in Kent, England, rising in Sussex, and after a N.E. course of 58 m. falling into a tidal estuary of the Thames mouth at Sheerness.

Meerschaum (lit. sea-foam), a fine white clay, hydrated silicate of magnesia, found in Asia Minor, Morocco and elsewhere. It is used mainly for making tobacco pipe bowls.

Meerut, an Indian town in the North-West Provinces, on the Nuddi, 40 m. N.E. of Delhi; is capital of a district of the same name, and an important military station; it is noted as the scene of the outbreak of the Mutiny in 1857. Pop. c. 137,000.

Megalithic Age, the age of ancient or structures of large stones, such as the early Cyclopean architecture in ancient Greece. Such monuments were generally sepulchral, they are classified into dolmens, circles, menhirs etc. Examples in Britain include Stonehenge.

Megalomania, a disordered mental condition in which the patient is afflicted with the delusion that he is a person of the highest position or importance or endowed with vast riches. The latter delusion is frequent in cases of general paralysis.

Megalosaurus, gigantic extinct carnivorous dinosaur, about 48 ft. long; it walked on its hind legs and preyed upon the herbivorous dinosaurs.

Megaphone, a long funnel-shaped instrument for carrying sound over long distances. The less elaborate megaphones are commonly used to make announcements at sporting events. The instrument was invented by Edison. Electrical amplifiers have now largely replaced them.

Megaris, a small but populous state of Attica, ancient Greece, S. of Attica, whose inhabitants were adventurous seafarers, credited with deceitful propensities. The capital, Megara, famous for white marble and fine clay, was the birthplace of Euclid.

Megatherium, an extinct genus of the sloth, some 18 or 20 ft. in length and 8 ft. in height; its remains are mostly found in S. America.

MEGATHERIUM

Megiddo,

an ancient city of Palestine, at which both Josiah and Ahaziah died. Excavations have revealed tombs and much of a well-built ancient town. In the World War it was captured by Allenby in 1918.

Mehemet Ali, pasha of Egypt, born in Albania; entered the Turkish army, rose into favour and seized the pashalik, the Sultan exacting an annual tribute in acknowledgment of his suzerainty; the Mamelukes proving unruly, he slaughtered them wholesale in 1811. He maintained two wars with the Sultan for the possession of Syria, with Ibrahim Pasha, his son, for lieutenant. Compelled to give up the struggle, he instituted a series of reforms in Egypt, and secured from the Sultan the hereditary rule of Egypt for his family. (1769-1849).

Meighen, Arthur, Canadian statesman; born at Anderson, Ontario, and educated at Toronto University. A barrister, he entered the Dominion Parliament as a Conservative in 1908, becoming Solicitor-General, 1913; Secretary of State, later Minister of Interior, 1917; Prime Minister in 1920-1921, and again in 1926. Leader of government in Senate, 1932-1935. (1874-).

Meissen, a town of Saxony, on the Elbe, 15 m. NW. of Dresden; has a very fine Gothic cathedral and an old castle. There is a large porcelain factory, where Dresden china was made, besides manufactures of iron. Pop. 47,000.

Meissonier, Jean Louis Ernest, French painter, born in Lyons; began as a book illustrator, practising the while and perfecting his art as a figure painter, in which he achieved signal success, from his "Chess-player" series and military pieces to his designs for the decoration of the Pantheon. (1815-1891).

Meistersänger, or Meistersingers, a German, in the 15th Century or earlier for the cultivation of poetry, of which Hans Sachs (q.v.) was the most famous member.

Mekong, or Cambodia, is the chief river of Siam. Its source in the mountains of Chiamdo is unexplored. Its course 3,000 m., is southerly to the China Sea; the last 500 m. are navigable.

Melanchthon, Philip, Protestant Reformer, born in the Palatinate of the Rhine; met Luther at Wittenberg, where he was professor of Greek.

He wrote the first Protestant work in dogmatic theology, entitled *Loci Communes*, and drew up the "Augsburg Confession." The sweetness of temper for which he was distinguished, together with his soberness as a thinker, had a moderating influence on Luther, and contributed much to the progress of the Reformation. He combined the humanist with the Reformer. (1497-1560).

PHILIP MELANCHTHON

Melanesia, general name for the group of crystalline, coralline, and volcanic islands in the W. of Polynesia, all S. of the equator, inhabited by the Melanesian or dark oceanic race; includes the Fiji Is., New Britain and New Hebrides and part of New Guinea.

Melba, Dame Nellie, Australian opera-singer, born in Melbourne; made her first appearance when she was only six; studied in Paris in 1882 and appeared in opera for the first time in Brussels in 1887; often appeared in opera in London; received the D.B.E. for her charitable work in the World War. (1861-1931).

Melbourne, the capital of Victoria, Australia, on the R. Yarra and at the head of Port Philip Bay; second largest city in Australia. It is well planned and built in broad regular streets with much architectural beauty, and contains many buildings of imposing appearance; was the seat of the Commonwealth Government till 1927, when this honour was transferred to Canberra. First settled in 1835, it was incorporated in 1842. Some of its streets are world-famed for their wonderful avenues of trees which extend for miles. It contains a large number of factories and is a great commercial and railway centre. Its shipping interests are very large, and it has wharves both at Port Melbourne and along the banks of the Yarra R. Pop. 1,018,000.

Melbourne, a small town of Derbyshire, shire, England, 8 m. S.E. of Derby, manufacturing silk fabrics, boots, shoes and hosiery. In the former castle John, Duc de Bourbon, taken at the battle of Agincourt, was detained 18 years. Pop. 3,700.

Melbourne, William Lamb, Viscount, English statesman, born in London; educated at Cambridge and Glasgow Universities; entered Parliament as a Whig in 1805, but was Chief Secretary for Ireland in the Governments of Canning, Goderich, and Wellington; succeeding to the title in 1828, he reverted to his old party; was Home Secretary under Earl Grey in 1830, and was himself Prime Minister for four months in 1834, and then from 1835 till 1841, when he retired from public life. (1779-1848).

Melchett, Alfred Moritz Mond, first Baron, British industrialist, largely responsible for the formation of Imperial Chemical Industries, Ltd.; elected to Parliament as a Liberal in 1906, became Minister of Health in 1921, changed to the Conservative party in 1927 and was raised to the peerage the following year. He was a prominent Zionist. (1868-1930).

Melchizedek (i.e., king of righteousness or justice), a priest-king of Salem, to whom Abraham, as recorded in Genesis, did homage and paid tithes.

Meleager, a Greek mythical hero, who slew a wild boar which devastated his country; his life depended on the burning down of a brand that was blazing on the hearth at the time of his birth, but which his mother at once snatched from the flames. He killed his uncle in a quarrel, and his mother, to be avenged on him for slaying her brother, threw the brand back into the fire, and on the instant he breathed his last.

Mellon, Andrew William, American banker and politician, born in Pittsburg; industrial development made his banking business prosper, and he became one of the three or four wealthiest men in the world. In 1921 he became Secretary of the Treasury, and he later came to London as American ambassador. He presented to America an art collection estimated to be worth \$10,000,000. In 1911 he founded the Mellon Institute at Pittsburg, the world's largest institute for scientific research; the building was dedicated in 1937. (1855-1937.)

Melodrama, originally a play with music, now a play remarkable for rapid and incessant action, sensational situations, and violently expressed emotion, with marked contrast between hero and villain. Thomas Holcroft is credited with introducing this genre to the English stage with plays such as *Deaf and Dumb*, adapted from the French *melodrame* by Bouilly, and *The Tale of Mystery* in 1803. The elements of melodrama had, however, existed long before, and were present in much Elizabethan tragedy and in late 18th-Century romantic drama. Famous Victorian melodramas, which have been revived with success in late years, include *Sweeney Todd*, *The Demon Barber of Fleet Street*, and *Maria Marten, or the Murder in the Red Barn*.

Melon (*Cucumis melo*), a tropical vine of the order Cucurbitaceae, with a large green, yellow or white succulent fruit. It is largely grown in Mediterranean countries and in America, and in Britain under glass.

Melpomene, the one of the nine muses which presides over tragedy.

Melrose, a small town in Roxburghshire, shire, Scotland, at the foot of the Eldons, on the S. bank of the Tweed, famed for its abbey, founded by David I. in 1136; it is celebrated by Sir Walter Scott in his *Lay of the Last Minstrel*. Pop. 2,000.

Melton Mowbray, a town in Leicestershire, England, 15 m. N.E. of Leicester, the centre of a great hunting district; celebrated for its pork pies. Pop. 10,500.

Melville, Herman, American author, born in New York, went to sea in early life; wrote *Typee*, *Omoo*, *Moby Dick* and other stories of sea life and adventure. (1819-1891).

Memel, or *Klaipėda*, Baltic seaport at the mouth of the Kurisches Haft. Before the World War the town, with a strip of territory beyond the Niemen, belonged to Germany. After the War it was assigned to the League of Nations and administered by the Conference of Ambassadors for three years; but in 1923 it was handed over to Lithuania on condition that it received a considerable measure of autonomy. Since then Nazi influence has prevailed at recent elections to the Diet. Timber is exported in large quantities and there are chemical works and shipbuilding yards. Pop. (town) 38,000.

Memling, Hans, painter of Flemish school; born either at Mummeling, near Aschaffenburg, Bavaria; or at Memelino, near Alkmaar, Holland. He worked mainly at Bruges, and is renowned as a colourist. His work is still largely represented at Bruges. (c. 1480-1494).

Memnon, in Greek mythology, a son of Tithonus and Aurora, who was slain by Achilles at Troy. At his death Aurora besought Zeus to immortalize his memory, and ever since the earth bears witness to her weeping in the dews of the morning. A statue to his memory was erected near Thebes, in Egypt, and was fabled to emit a musical sound every time the first ray of the sun fell on it.

Memory, the mental processes involved in the recollection and representation of past experience. The function is performed by the mind, but does not depend upon a separate faculty. A fundamental principle of memorization of any subject is that it must be understood, while the pre-

existence of other associated experiences is of material assistance in fixing it upon the mind. Concentration or attention is essential to rapid memorization. A faulty method of learning by memory, especially a lengthy passage of poetry, for example, is to learn a section at a time. Psychology has proved that repetition of the entire passage until complete mastery is assured, is more reliable.

Memphis, an ancient city of Egypt, of which it was at certain periods the capital; it was founded by Menes at the apex of the delta of the Nile, and contained 700,000 inhabitants; famous for its pyramids, the Serapeum and temples.

Memphis, city and port in Tennessee, U.S.A., on the Mississippi, 826 m. above New Orleans, accessible to the largest vessels; is also a great railway centre, and therefore of great commercial importance; has many industries, and a great cotton market. Pop. 253,000.

Menai Strait, a picturesque channel Anglesey from Caernarvonshire, 14 m. long and at its narrowest 200 yards wide; is crossed by a suspension bridge (1825) and the Britannia Tubular Railway Bridge (1850).

Menander, a Greek comic poet, born in Athens; of his works, which were numerous, we have only some fragments; they were largely used by the Latin poet Terence in the construction of his plays. (342-291 B.C.).

Mencius, or *Meng-tze*, a celebrated Chinese sage, greatly honoured by Confucianists; his teachings were collected by his followers in a book entitled the *Book of Meng-tze*. (372-289 B.C.).

Mendel, Gregor Johann, Austrian cleric on heredity and biologist; his researches on heredity laid the foundations of the modern scientific study of the subject (see *Mendelism*). The value of his work was not recognised until several years after his death. (1822-1884).

Mendeleeff, Dmitri Ivanovich, Russian chemist, born at Tobolsk; was the first to arrange the chemical elements in a table in order of atomic mass and to observe the periodicity they displayed when so arranged. Certain unknown elements were subsequently discovered and found to have the properties assigned to them by Mendeleeff. His table remains the basis of atomic theory. (1834-1907).

Mendelism, the theory of heredity propounded by Mendel (q.v.), setting forth that certain "dominant" characteristics are inherited by hybrids rather than characteristics intermediate between those of the two parents. The offspring of the first generation inherits the dominant, while part of the offspring of the second generation exhibits the opposite or "recessive" characteristics. If those possessing recessive characteristics unite, the dominant recur in the offspring. Mendelian theory has proved of great practical value in the deliberate breeding of animals and plants for desirable characteristics.

Mendelssohn-Bartholdy, Felix, cele-

brated German composer, grandson of Moses Mendelssohn, born in Hamburg; appeared publicly as a pianist at 12 and began to compose at an early age, producing the *Middlemarch Night's Dream* overture at 17. His compositions consisted of symphonies, operas, oratorios (including *St. Paul* and *Eljah*), and church music. A tour in Scotland inspired the *Hebrides* overture. (1809-1847)

MENDELSSOHN

Mendip Hills, in the N. of Somerset, set, England, extend from a little SW. of Frome to Hutton, S. of Weston-super-Mare, a distance of about 25 m.; the highest point is Blackdown Hill, 1,068 ft. above sea-level.

Mendoza, province in the extreme W. of Argentina; has the Andes in the W., Aconcagua (23,500 ft.), the highest peak in the New World. Otherwise consists chiefly of pampas, fertile only where irrigated from the small Mendoza River; there vines flourish. Copper is plentiful, coal and oil are found. Area, 57,500 sq. m. Pop. 445,000. **Mendoza** the capital, 640 m. W. of Buenos Aires by rail, is on the Trans-Andine route to Chile, with which it trades. Pop. 77,000.

Menelaus, king of Sparta, the brother of Agamemnon and the husband of Helen, the carrying away of whom by Paris led to the Trojan War.

Menelik II., Emperor of Abyssinia, claiming descent from Menelik I., reputed son of Solomon and the Queen of Sheba, was born at Ankobar; son of Melloth, King of Shoa, whom he succeeded in 1865. He became ruler of Abyssinia on the death of the Emperor John in 1889. He defeated the Italians at Adowa, 1896, as a result of which Italy recognised Abyssinian independence. (c. 1842-1913).

Menhir, a standing stone, erected in connection with funerary rites; examples occur in Brittany, Scotland, and elsewhere.

Menin Gate, the gate at Ypres leading to the scene of some of the severest fighting of the World War. Through it many thousands of British troops passed from 1914 to 1918, and on its site a memorial gateway in honour of the 56,000 of them who have no known grave was unveiled in 1927. Sir Reginald Blomfield designed the memorial, which bears the name of every officer and man it commemorates.

Meningitis, an inflammation of the that invests the brain and spinal cord, due to infection by germs. Four different types are recognised. Simple acute meningitis is caused by injury to certain parts, e.g., the middle ear, the inflammation extending to the brain, or as a complication following certain fevers. The earliest symptoms are headache, followed by feverishness and general prostration. Constriction of the neck is followed by convulsions, and squint is often noticed. Septic meningitis is most often fatal. Tuberculous meningitis is due to tubercular disease in a bone or gland. It is most frequent in young children and has a slow and insidious onset. After two weeks' drowsiness the child becomes comatose, and after eight weeks the disease is almost always fatal. See also *Cerebro-Spinal Fever*.

Mennonites, a Protestant sect founded at Zurich by a priest, Menno Simons, about 1535, with a creed that combines the tenets of the Baptists with those of the Quakers; they maintain a rigorous church discipline. Communities are to be found to-day in Germany and the U.S.A.

Mensheviks, name given in Russia to the right-wing Socialists in opposition to Bolsheviks; it originated with a division in the Russian Social-Democratic Party in 1903. Their views were reformist rather than revolutionary, and they worked for the coming of Socialism by non-revolutionary methods.

Menstruation, the discharge of blood from the uterus of women which occurs about every 28 days during the period of fertility, commencing at puberty (in Europe usually at 14 or 15) and ceasing at the menopause, which commonly occurs between the ages of 40 and 60. It

ceases on conception, commencing anew after the end of the period of lactation, or sometimes after childbirth. Disorders of the function include amenorrhoea, or absence of the menstrual flow; dysmenorrhoea, or its accompaniment with pain or an unusual degree of discomfort; and menorrhagia, or excessive menstrual flow.

Mensuration, the branch of mathematics concerned with ascertaining lengths of straight lines, areas of surfaces, and volumes of solids. The term is commonly restricted to the measurement of surfaces, solids and regular figures. The measurement of irregular lines is dealt with by that part of the integral calculus termed rectification.

Menthol, a crystalline substance obtained from the oil of peppermint, used in nervous affections, such as neuralgia, as a counter-irritant, and for relieving headaches and asthma.

Mentone, town and seaport in France, on the Mediterranean, 14 m. from the Italian border; was under the princes of Monaco till 1848, when it subjected itself to Sardinia, which afterwards handed it over to France; protected by the Alps, the climate is delightful and renders it a favourite health resort in winter and spring; it exports olive-oil and fruit. Pop. c. 15,000.

Mentor, a friend of Ulysses, left by him in charge of his young son Telemachus; hence his name is used as a general term for a friendly guide, especially of an older in relation to a younger person.

Mercantile Marine, the body of men engaged in cargo shipping as distinct from naval service on the one hand and passenger shipping on the other; though in practice the term is often used to cover all shipping other than the Royal Navy. In 1937 the total tonnage of merchant vessels of 100 tons and over was for the world 661 millions, of which over 204 millions was in British ownership. In 1935 the British mercantile marine employed over 152,000 seamen. Merchant shipping law is administered by a special branch of the Board of Trade, which has representatives at all important ports and docks.

Mercator, the Latinised name of Gerardus Mercator, a celebrated Dutch geographer who invented the map-projection which bears his name, and which plots latitude and longitude by parallel straight lines at right angles to each other. (1512-1592).

Mercenaries, originally hired soldiers from feudal levies, now bodies of paid troops in the service of a State of which they are not subjects; the Scots Guards in France from the 15th to 18th Centuries were famous, and Swiss auxiliaries once belonged to most European armies; William III. had Dutch mercenaries in England; under the Georges, Germans were hired and used in the American War, the Irish rebellion, and the Napoleonic struggle; in the Crimean War German, Swiss, and Italian soldiers were enrolled. See also *Foreign Legion*.

Mercerisation, a process of treating cotton yarn or cotton fabrics invented by John Mercer in 1851. It consists of passing the material first through a solution of caustic soda and then through cold water, thus causing it to contract so as to improve it for dyeing purposes.

Merchant Taylors' School, famous English public school, founded in Suffolk Lane in the City of London in 1561, by the Master, Wardens, and Court of Assistants of the Worshipful Company of Merchant Taylors who are still the governing body. It moved in 1875 to Charterhouse Square from which it moved to its present

site at Sandy Lodge, Northwood, Middlesex, in 1933. The number of boys is limited to 500 and includes 50 boarders. Eight entrant scholarships are offered annually. There are also each year Scholarships and Exhibitions to a value of not more than £200. Many famous men have been scholars at the school, including Edmund Spenser, Robert Clive and Juxon, Bishop of London.

Mercia, one of the three chief kingdoms of Anglo-Saxon England, eventually comprising most of the Midlands; founded by Angle settlers in the Upper Trent Valley (now S. Staffordshire) in the 6th Century. It rose to greatness under Penda, 626-655, and subsequently succeeded Northumberland in the supremacy. Under Offa, 757-795, it maintained its independence, but after the death of Cenwulf, 819, waned in turn before Wessex and the Danes.

Mercier, Désiré Joseph, Belgian ecclesiastic, who as Cardinal Archbishop of Malines opposed the German invasion of his country and issued an appeal to his compatriots to remain loyal to their king; he was partly responsible for the "Malines Conversations" (q.v.). (1851-1926).

Mercury, the Roman equivalent of the Greek God Hermes, the son of Jupiter and Maia, the messenger of the gods, the patron of merchants and travellers, and the conductor of the souls of the dead to the nether world.

Mercury, the planet of the solar system it revolves in 88 days at a mean distance of 36 million miles. It has a diameter of 3,000 miles and mass one twenty-fifth that of the earth. Owing to its proximity to the sun it is but rarely visible, and then either just before sunrise or just after sunset.

Mercury, a metallic chemical element as cadmium and zinc and distinguished by its low melting-point, which renders it liquid under ordinary conditions. Symbol Hg; atomic number 80; atomic weight 200.61. Mercury or quicksilver (i.e., "living" silver) occurs native, as at Almaden, in Spain, and also as its sulphide, cinnabar, in Spain, Italy, Mexico and S. America; from cinnabar the metal is obtained by roasting in a current of air. It is very poisonous in both the liquid and the vapour states, and this property is shared by its compounds, e.g., mercurous chloride or calomel (used in medicine as a purgative), mercuric chloride, or corrosive sublimate (used in dilute solution as an antiseptic); and mercuric fulminate, used as a detonator since it explodes on being struck. Solutions of other metals in mercury are known as amalgams.

Meredith, George, English poet and novelist, born in Hampshire; began his literary career in 1851 as a poet. His novels appeal only to a select few, but by them they are regarded with admiration. *The Order of Richard Feverel*, published in 1858, is by many considered his best, others being *The Egoist*, *Diana of the Crossways*, and *Evan Harrington*. (1828-1909).

Merganser, a genus (*Mergus*) of ducks (*Mergus merganser*) is a typical species. The head is crested in the male, and the colouring vivid. The red-breasted merganser (*M. serrator*) has a green head, red breast, and back plumage black edged with white.

Meridian, an imaginary great circle right angles to the equator; the Meridian of Greenwich is the point from which longitudes are calculated.

Mérimée, Prosper, French writer, born in Paris; abandoned law for literature; became under Louis Philippe inspector-general of historical documents. He wrote stories, historical dissertations, and

travels, among other works *Guzla, Chronicles of Charles IX.*, the *History of Don Pedro, King of Castile, Letters to an Unknown*, *Colomba* and *Carmen*. (1803-1870).

Merino, a species of sheep, native to Spain, raised chiefly for its wool. The flesh is of little value.

Merioneth, a mountainous county of Cardigan Bay, between Caernarvon and Cardigan. Lofly peaks including Aran Mawddwy, Cader Idris, and Aran Benllyn and the rivers, Dee and Dovey, and Lake Bala, afford picturesque scenery. The soil is fit only for sheep-grazing; but there are slate and limestone quarries, manganese and gold mines. Festiniog is the largest town. The county town, Dolgelly, on the Wnion, has woollen and tweed manufactures. Area, 660 sq. m. Pop. 43,200.

Merit, The Order of, a British order instituted in 1902, limited in number to 24 men and women of eminent distinction; it confers no precedence; the ribbon is blue and crimson.

Merlin, a legendary Welsh prophet and a princess, who lived in the 5th Century, and was subsequently a prominent personage at King Arthur's court; prophecies attributed to him existed as far back as the 14th Century; Tennyson represents him as bewitched by Vivien.

Merlin (*Falco aesalon*), a species of small British falcon, which breeds on moors in the British Isles, nesting on the ground. The adult male is about 10 in. in length. The plumage of the male is lead colour streaked with black, throat nearly white, under-wing coverts rufous-brown; of the female, brown with brown and mottled underparts. It preys on small birds. The Red-headed Merlin (*Falco chiquerra*) is an Indian species.

MERLIN

Mermaids and **Mermen** (i.e., sea-maids and seamen), a class of beings fabled to inhabit the sea, with a human body as far as the waist, ending in the tail of a fish; the females of them represented above the surface of the sea combing their long hair with one hand and holding a mirror with the other. They are supposed to be endowed with the gift of prophecy, and to be of an amorous temper. The belief in these half-human creatures is traced back to Oannes, the fish-god of the Babylonians, though certain sea boasts with a semi-human expression especially the sea-mammals known as dugongs may have given rise to it.

Meroë, or **Merawe**, a wide tract of Upper Nubia between the Nile and the Blue Nile, and the Atbara rivers. Ruins on the Nile, 25 m. N.E. of Shendi, are believed to be those of Meroë, the ancient capital of Ethiopia.

Mervingsians, a name given to the Merovingians, first dynasty that ruled over France after the downfall of the Roman empire, until A.D. 750; being derived from Merwig, the founder of the family.

Merrimac, a river in New Hampshire, U.S.A., which rises in the White mountains and flows by a course of about 150 m. into the Atlantic near Newburyport. It supplies water-power for industrial purposes. Lowell, Lawrence, Manchester and Concord are among the towns on its banks.

Merriman, Henry Seton, pseudonym of Hugh Stowell Scott, novelist, son of a Newcastle-on-Tyne shipowner. Spent some time in an underwriter's office. Among his more important works are *The Sowers*, *In Kedar's Tent*, *Barlasch of the Guard*. (1862-1903).

Mersey, English river, rising in NW. Derbyshire, flows westward 70 m. between Lancashire and Cheshire to the Irish Sea; is of great commercial importance, having Liverpool on its estuary. Its chief tributary is the Irwell, on which stands Manchester. Its estuary from Birkenhead to Liverpool is crossed by a railway tunnel, opened in 1886, and by a vehicular tunnel, 2 m. in length, opened 1934.

Merthyr Tydfil, industrial town in Glamorganshire, S. Wales, on the Taff, 15 m. NW. of Cardiff; is the centre of great coalfields and of enormous iron and steel works; its industrial life has suffered greatly since the economic crisis of 1931. Pop. 65,600.

Merv (or *Meru*), an oasis in the Turkoman S.S.R., occupied by Russia in 1883, 60 m. long by 40 m. broad, producing cereals, cotton, silk, etc.; breeds horses, camels, sheep. The town of the same name, on the Trans-Caspian railway, has a pop. of c. 10,000.

Meshed, a walled city, capital of the province of Khorassan, in N. Iran. It stands in a fertile plain; the mausoleum of the Imam Riza is visited by pilgrims. The city, a commercial centre, has manufactures of velvets, silks and carpets. Pop. 140,000.

Mesmer, Friedrich Anton, a German physician, born near Constance; trained for the Church, but took to medicine; was the founder of animal magnetism, called *mesmerism* after him, his experiments in connection with which created a great sensation, particularly in Paris. His system was reported on unfavourably by a committee of enquiry, and he retired into obscurity. (1733-1815).

Mesmerism, or animal magnetism, name first given (from Anton Mesmer, *q.v.*) to the practice, now called hypnotism (*q.v.*) of inducing artificial or hypnotic sleep for therapeutic purposes.

Mesopotamia, former name of the territory "between the rivers" Euphrates and Tigris, now included in Iraq (*q.v.*). It was in pre-classical times the centre of a series of great civilizations, centering on Sumer, Nineveh, Babylon, and other great cities.

Messenger, André Charles Prosper, French composer of operas born at Montluçon; a pupil of Saint-Saëns; director of Opera at Paris from 1907-1914. His works include *La Basoche*, *Véronique*, *Fortunio* and *L'Amour Masqué*. (1853-1929).

Messalina, Roman empress, the wife of Claudius I.; a byword for cruelty and licentiousness; she was killed by the Emperor's order after the exposure of her infidelity in A.D. 48.

Messenia, a province of Greece, mainly the fertile peninsula between the Gulfs of Arcadia and Corin. The Messenians after two long wars were conquered in 608 B.C. by the Spartans and fled to Sicily, giving their name to Messina (*q.v.*). Pop. of present province, 248,000.

Messiah (i.e., the Anointed One), the leader to whom the Jews looked forward as restorer of their national glory. In the view of Christians the prophecies relating to him were fulfilled in the person of Jesus Christ, to whom the title is therefore applied. Claimants to the Messiahship have arisen from time to time among the Jews, the most famous being Sabbatai Zevi in the 17th Century.

Messina, ancient city on a bay at the strait of the same name, which separates the island from Italy; has a 12th Century cathedral, two old castles, and a university, founded 1548. It manufactures light textiles, coral ornaments, and fruit essences, and has

an excellent harbour. In 1908 it was the scene of a great earthquake, in which over 70,000 people perished. Pop. 183,000.

Messina, Strait of, 24 m. long and separates Sicily from the Italian mainland; here were the Scylla and Charybdis of the ancients.

Messines Ridge, a spur of rising ground 6 m. S. of Ypres, Belgium, captured by the Germans in the World War after severe fighting in Nov., 1914, and the scene of further fighting in June, 1917, and April, 1918.

Message, a dwelling-house with build- ings and land attached for the use of the household.

Metabolism, name given to the chemical changes continually in progress in the cells of living matter, and essential to life. Constructive metabolism, or the changes involved in building up protoplasm from food, is known as *anabolism*, and the destructive process as *katabolism*.

Meta Fuel, a white solid made by to ice-cold acetaldehyde, (*q.v.*). It burns with a non-luminous flame, and is therefore used as a solid substitute for methylated spirit in heating lamps.

Metallurgy, the extraction of metals from their ores and the subsequent purification of the crude products. A few metals, such as gold, platinum and mercury, occur in a more or less pure form, but most are found as oxides (*e.g.*, iron, aluminium) or as sulphides (*e.g.*, lead, copper, zinc, nickel). The ores are subjected to a preliminary roasting, which drives off moisture and volatile impurities, and also, in the case of a sulphide, converts the ore into an oxide. The oxide is then mixed with carbon and heated in a furnace; in this way gaseous oxides of carbon are formed and escape, while the fused metal sinks to the bottom.

The crude metal is purified in various ways, *e.g.*, by electrolysis. Electrical methods are also being increasingly used for the actual extraction of metals; thus aluminium is obtained electrolytically from aluminium oxide, sodium from sodium hydroxide, and calcium from calcium chloride. With certain metals, special methods are employed; thus in the purification of nickel the crude metal is heated in a stream of carbon monoxide gas, with which it forms the volatile product nickel carbonyl. This passes on, leaving impurities behind, and is then heated to a higher temperature, when it splits up again into nickel and carbon monoxide (Mond Process for nickel).

In Spain, copper is extracted from copper sulphate solution by the addition of scrap iron, which passes into solution as iron sulphate while the copper is deposited in the form of a powder.

Metals. Metallic elements are distinguished from non-metals (i) by possessing high specific gravity, melting-point, and boiling-point, a peculiar metallic lustre, and the capability of taking a brilliant polish, (ii) by being malleable and ductile and good conductors of heat and electricity, and (iii) by the fact that their chlorides are true salts, usually stable in the presence of water, and that their normal oxides are basic, reacting with acids to form salts and water. There are, however, many exceptional metals, *e.g.*, sodium, which is lighter than water and has low melting and boiling points, and bismuth, which is brittle and forms a chloride that is decomposed in water. The principal metals are sodium, potassium, calcium, iron, copper, silver, gold, magnesium, zinc, lead, tin, aluminium, nickel and chromium. A mixture of metals is called an alloy, *e.g.*, brass (a mixture of copper and zinc).

Metamorphic Rocks, those igneous or sedimentary rocks which have been altered by extreme heat, moisture or pressure, e.g., sandstones are changed into quartzite, limestones into marble, clays into slates, and granites into gneisses.

Metaphysics, the science of being as being; the science of the ultimate grounds of all other forms of knowledge. It is a branch of philosophy which deals with the fundamental principles that underlie reality. It deals with the relations between cause and effect, investigates the true nature of time (q.v.) and space (q.v.) and discusses the question whether reality is given in experience. The problems dealt with by metaphysics existed long before the term was invented. Literally the term (which is, properly, "metaphysic" means "after physics" and was applied to those writings of Aristotle which appeared after his *First Philosophy*.

Metazoa, that division of the animal kingdom which includes all multicellular organisms, as distinct from Protozoa, or unicellular organisms; but the term is more generally restricted to invertebrate multicellular animals.

Metempsychosis, or "transmigration of souls," the belief that the human soul after death passes into the body of another human being or an animal. In a broader sense it implies a conviction that the human phase is only one of a series of incarnations both in the past and the future. The belief is found in Indian religions, and was held by the ancient Egyptians as well as among some other peoples.

Meteorite, the name given to meteors which reach the surface of the earth before complete vaporization occurs. During their fall meteorites appear as fireballs, and set up sound-waves similar to thunderclaps. Their constituents are nickel, chromium, magnesium and a large proportion of iron.

Meteorology, that branch of natural science which deals with the factors influencing weather and climate. It was first established on scientific lines through the invention of the thermometer by Galilei and of the barometer by Torricelli, Boyle, Hooke, Pascal and others. The Meteorological Office of London was established in 1854, under the control of the Board of Trade; it is now a department of the Air Ministry. From the collation of weather reports, barometric heights, direction of winds, thermometer readings, and similar data, received from numerous and widely distributed observers, the prediction of weather over a few hours now reaches a high degree of certainty and precision, while longer forecasts, though less reliable, can often be made with some confidence.

The principal factor in making the forecast is a study of the distribution of the various pressures of the atmosphere at the time concerned. Spots at which the pressure is identical are plotted on the map and joined by isobars (q.v.). It is often noticed that many of the isobars form closed rings, approximately circular or elliptical in shape, such an arrangement, surrounding a region of lower pressure, being known as a depression or cyclone.

In the Northern hemisphere, a depression is marked by winds blowing in a counter-clockwise direction round its centre, and is usually accompanied by rain and a higher temperature than is general for the time of year; it moves more or less as a whole, most frequently from W. to E. In an anticyclone the pressure is high, the isobars are widely separated, and, in the Northern hemisphere,

the winds (much lighter than in a depression, or even scarcely perceptible) blow in a clockwise direction. A main depression is often accompanied by secondaries, which give rise to stormy weather with high winds, thunderstorms etc.

Meteors, small pieces of solid matter which appear in the earth's atmosphere as "shooting stars"; their size varies from a few ounces to several tons; as a rule they commence to glow when about 80 m. from the earth, owing to the friction of the air; they are usually destroyed during flight, but occasionally one reaches the ground; they appear to enter the atmosphere at a speed of about 30 m. per hour.

Methane, a simple hydrocarbon produced by decaying vegetable matter, and called "marsh gas" from its natural occurrence in swampy areas. It also occurs in mines as "firedamp"; with air it forms an explosive mixture which is responsible for many mining disasters.

Methodists, a body of Christians ecclesiastically governed by a Conference with subordinate district synods, and professing evangelical principles, which they teach agreeably to the theology of Arminius; the name is also given to the followers of Whitefield, who are Calvinists in certain respects. The movement was founded in 1729 at Oxford. Their doctrines are substantially those of the Church of England. In the early years of the Methodist movement it broke up into various bodies, such as the Wesleyan Methodists, Primitive Methodists, Methodist New Connexion, and others; several of these united in 1907 to form the United Methodists, and in 1932 this body united with the Wesleyan Methodists and Primitive Methodists to form the Methodist Church. Methodists are numerous in N. America, where the leading body is the Methodist Episcopal Church. In the world to-day there are approximately 12 million Methodists.

Methuen, Paul Sandford, third Baron, British soldier, fought with distinction in Ashanti, Egypt, Bechuanaland and in the Boer War; Governor of Natal, 1909-1915; and of Malta, 1915-1919. (1845-1932).

Methuselah, son of Enosh, grandfather to the book of Genesis he reached the unusual age of 969.

Methyl Alcohol, an alcohol obtained by distilling monohydric alcohols with dilute potash, and prepared mainly from the products of the distillation of hard woods.

Methylated Spirits, ethyl (ordinary) alcohol containing about 10 per cent. of methyl alcohol (wood spirit), and small quantities of paraffin oil and pyridine to render it unfit for drinking; it is not subject to the tax on pure spirit and is used for many industrial purposes.

Metre, the name given to the unit of length in the metric or decimal system, equal to 39.37 English inches, the tenths, the hundredths, and the thousandths of which are called from the Latin respectively decimetres, centimetres, and millimetres, while ten times, a hundred times, and a thousand times are called from the Greek respectively decametres, hectometres, and kilometres. A metre was taken as one forty-millionth part of the earth's circumference.

Metric System, the system of measures in use in almost all Western countries except Great Britain and the U.S.A. It is based on the metre, a unit of length of about 39½ in.; the litre, a unit of capacity of about 1½ pts.; and the gram, of which 1,000 make 1 kilogram, roughly 2½ pounds. These units are divided or multiplied on a decimal system.

Metronome, an instrument used for determining the movement of musical compositions. The rate of vibration is regulated by the variation of elevation of a weight attached to a pendulum to correspond with a scale graduated on the pendulum shaft. The instrument was invented by Maelzel about 1815.

Metropolitan Police and Courts.

The Metropolitan Police area extends over a radius of 15 m. from Charing Cross, exclusive of the City of London, an area of 699 sq. m. The Metropolitan Police Offices at New Scotland Yard; the College and Laboratory are at Hendon. Apart from its duties in apprehending criminals and in the investigation of crime generally, the Metropolitan Police is the authority for issuing traffic licences, and regulating street traffic.

The Police Courts were first established by an Act of 1792 which authorised the establishment of seven police courts, each with three magistrates and six constables. Further acts have increased the number of courts, staff, and duties and now almost any act or conduct that interferes with public order comes within their jurisdiction.

Metropolitan Water Board,

a body constituted under the Metropolis Water Act, 1902, to supply water to the administrative county of London and surrounding areas, thus assuming the functions hitherto performed by separate metropolitan water companies. The Board's charges are normally levied on the rateable value of property, at such rate, not exceeding 8½ per cent., as the Board may determine. Supply comes mainly from the Rr. Thames and Lea, and the New River system. The average daily supply is about 290 million gallons.

Metternich, **Clement**, **Prince von**, born in Coblenz; served as ambassador successively at the courts of Dresden, Berlin, and Paris, and became first Minister of State in 1809, exercising for 40 years from that date the supreme control of affairs in Austria. One of his first acts as such was to effect a marriage between Napoleon and the Archduchess Marie Louise, himself escorting her to Paris. He presided at the Congress of Vienna in 1815, and from that date dominated in foreign affairs in the interest of the rights of kings and the repression of popular insurrection. He had to flee from Vienna in 1848, but returned in 1851, after which, though not called back to office, he continued to influence affairs by his advice. (1773-1859).

Metz, city in the dept. of Moselle, France, the second town of Alsace; 105 m. SW. of Coblenz. In 1870 it was the scene of Bazaine's surrender to the Germans with his army of 180,000 men. At the end of the war it was annexed by Germany, but returned to France after the World War in 1919. It has a Gothic cathedral, and is industrially important. Pop. 83,000.

Meurthe-et-Moselle, dept. of NE. France, about the river Moselle; there are forest areas, and fruits, grapes, and hops are grown. Capital, Nancy. Area, 2,035 sq. m. Pop. 576,000.

Meuse (Maas), river, 500 m. long, rises in Haute-Marne, France, and flows N. through Belgium, by Namur and Liège, to enter Holland at Maastricht; is for a time the boundary, finally trends westward, and joins the Rhine at the delta. Also the name of a

METRONOME

French department, in the NE., including theilly Argonne country; has iron mines; capital, Bar-le-Duc. Area, 2,400 sq. m. Pop. 217,000.

Mexborough, a market town and W. Riding of Yorkshire, 6 m. N. of Rotherham. Industries include iron works and potteries. Pop. 15,800.

Mexico, a federal republic of 28 States, lying S. of the United States, between the Gulf of Mexico and the Pacific, and including the peninsulas of Lower California in the W. and Yucatan in the E. Its area is 764,000 sq. m. Pop. 16,550,000; it consists of an immense plateau 3,000 to 8,000 ft. high, from which rises the Sierra Nevada, 10,000 ft., running N. and S., and other parallel ranges. The largest lake is Chapala, in the centre; the rivers are mostly rapid and unnavigable; the chief seaports are Vera Cruz and Tampico on the E., and Acapulco on the W. but though the coast-line is indented it affords no good harbours.

Along the eastern seaboard runs a strip of low-lying unhealthy country, 60 m. broad; on the Pacific side the coast land is sometimes broader. These coast-lines are well watered, with tropical vegetation, tropical and sub-tropical fruits; the higher ground has a varied climate. In the N. are great cattle ranches; all over the country the mineral wealth is enormous, gold, silver, copper, iron, sulphur, zinc, quicksilver, and platinum are wrought; coal also exists. The bulk of Mexican exports consists of precious metals, oil, and ores. There are cotton, paper, glass, and pottery manufactures. One-fifth of the population is white, the rest Indian and half-caste; the religion is Roman Catholic, the language Spanish.

Conquered by Cortez in 1519, the country was ruled by Spain for 300 years; a rebellion established its independence in 1822, but the first 50 years saw perpetual civil strife, and wars with the United States in 1848 and France in 1862. In 1867 the constitution was modelled on that of the United States, and Porfirio Diaz, the President, proved a masterly ruler. In 1911 Diaz fell, revolutions and counter-revolutions gripping the country until partial order was restored in 1920 by the usurpation of power by Gen. Obregon. Ownership of the vast petroleum fields of the country is a constant source of friction, as is the question of the power of the Catholic Church; in 1938 the oilfields in foreign ownership were assumed by the State, which has threatened to pay no compensation. Mexico, the capital of the republic, 7,000 ft. above the level of the sea, in the centre of the country, is a handsome though unhealthy city, with many fine buildings, including a magnificent cathedral; cotton goods, tobacco, and pottery are manufactured; the trade is chiefly transit. Pop. 1,030,000.

Mexico, Gulf of, a large basin of the United States and Mexican territory; shut in by the peninsulas of Florida and Yucatan, 500 m. apart, and the western extremity of Cuba, which lies between them; it receives the Mississippi, Rio Grande, and many other rivers; the coasts are low, with many lagoons; ports like New Orleans, Havana, and Vera Cruz make it a highway for ships; north-easterly hurricanes blow in winter.

Meyerbeer, **Giacomo**, German musical of Jewish birth; composer of operatic music, and for 30 years supreme in French opera; produced *Robert le Diable* in 1831, the *Innocents* in 1836, *Le Prophète* in 1849, *L'Étoile du Nord* in 1854, the *Dinorah* in 1859. *L'Africaine*, produced after his death, was a great success. (1791-1864).

Meynell, Alice Christiana, English poetess. Influenced in her early days by Ruskin and Henley, she produced her first volume of verse in 1875, her poems being distinguished by their simplicity and charm; she is also remembered for several volumes of essays. (1849-1922).

Mézières, capital of the dept. of the NE. of Reims. A bridge across the Meuse connects it with Charleville; it manufactures hardware. Mézières was taken by the Germans in 1914, and occupied by them throughout the World War. Pop. 10,500.

Mezzotint, a mode of engraving on steel or copper in imitation of Indian ink drawings, the lights and shades of the picture being produced by scraping on a black ground.

Miami, a city in Florida, U.S.A., on the pleasure resort. It is an important taking-off ground for air services to the W. Indies and S. America. Pop. 111,000.

Mica, a transparent mineral found in many igneous rocks; it splits easily into thin plates. White mica or muscovite is used for windows, where a non-inflammable substance is desirable, lamp covers, and as an insulator; it is mined in India; several varieties exist, some of them coloured, including biotite (brown) and lepidolite (red).

Micah, the sixth of the minor prophets of the Old Testament, a contemporary of Isaiah, Hosea, and Amos; his prophecies are in the same strain as those of Isaiah. They predict the destruction both of Samaria and Jerusalem, the captivity and the return, with the re-establishment of the theocracy and the advent of the Messiah.

Michael, an archangel, the leader of the heavenly host, at never-ending war with the devil and his angels; is represented in art as clad in armour, with a sword in one hand and a pair of scales in the other to weigh the souls of men at the judgment. Festival, Sept. 29.

Michael, the name of a succession of eight emperors who, at different periods, occupied the throne of the East from 811 to 1282, the last being Michael VIII., the founder of the Palaeologian dynasty.

Michael, King of Rumania, 1927-1930. Owing to the renunciation of rights by his father, Carol (q.v.), he succeeded his grandfather, King Ferdinand, at the age of five in 1927. His father returned to Rumania in June, 1930; Michael abdicated in his favour and became Crown Prince. (1922-).

Michaelmas, the festival in honour of St. Michael and the angels, held on September 29; it is one of the quarter days.

Michelangelo Buonarroti, Italian painter, sculptor, architect, and poet, born in Caprese, in Tuscany, one of the greatest artists that ever lived; studied art as apprentice for three years under Domenico Ghirlandajo, and at 17 his talents attracted the notice of Lorenzo de' Medici, who received him into his palace at Florence, and employed as well as encouraged him. On the death of his patron he left for Bologna, and afterwards, in 1496, went to Rome, where he executed his "Bacchus" and "Cupid," followed by his "Pieta" or Virgin weeping over the dead Christ, and the colossal "David." From 1503 to 1513 he was engaged on the ceiling of the Sistine Chapel. In 1530 he was working at Florence as an engineer in the defence of the city and as a sculptor; in 1537 he was in Rome, working on the great "Last Judgment," completed four years later. In 1542 he was appointed architect of St. Peter's, and he planned and built the dome. His sonnets

indicate that his literary power was worthy to be compared with his excellence in the other arts. (1475-1564).

Michelet, Jules, French historian, born in Paris; was the author among other works of a *History of France* in 18 vols., and a *History of the Revolution* in 7 vols. He was, from 1838, for 13 years professor of History in the College of France, but lost the appointment because he refused to take the oath of allegiance to Louis Napoleon. He wrote on birds and insects, on the sea, on women, on love, on witchcraft, and the Bible and humanity. (1798-1874).

Michelson-Morley Experiment, an attempt to measure the velocity with which the earth is moving through the ether of space, carried out in 1887 by A. A. Michelson (1852-1931) and E. W. Morley (1838-1923). It gave negative results, and was supposed to disprove the existence of the ether: it was one of the foundations on which Einstein based his theory of relativity.

Michigan, a state of the U.S.A., broken in two by Lake Michigan. The western portion has Wisconsin on its S. border, the eastern portion has Indiana and Ohio on the S.; the rest of the state is surrounded by Lakes Superior, Huron, and Erie. The western section is mountainous, with great forests of pine, little agriculture, rich mines of copper and iron, and some gold. The eastern section is much larger, very flat and low, has coal, gypsum, and marble quarries, but is chiefly a wheat-growing area; in the Saginaw Valley are great salt wells. The climate is modified by the lakes. The main industries are motor-car manufacture, mining, and furniture making. At first a French colony, the country was handed over to England in 1760, and to the United States in 1776; it was organized as a territory in 1805, and admitted a state in 1837. The chief commercial city is Detroit, on Detroit R., in the E., has manufactures of machinery and railway plant, leather, and a large shipping trade; other large cities are Grand Rapids and Flint. Lansing is the state capital, and an important railway centre. Area, 58,000 sq. m. Pop. 4,842,000.

Michigan, Lake, in the N. of the United States, between Michigan and Wisconsin, is the third largest of the Great Lakes between Canada and the U.S.A., covering about 22,500 sq. m. It is 335 m. long and 50 to 80 m. broad, bears much commerce, has low sandy shores and no islands. The chief ports are Chicago, Milwaukee, and Racine.

Microbe, a minute organism found in the blood of animals, especially when suffering from disease. See *Bacteria*.

Microchemical Analysis,

in chemistry, the detection and estimation of the ingredients of substances by methods involving the use of minimum quantities. Qualitative microchemical analysis, that is, the discovery of the identity of substances in this way, is largely colorimetric and has been developed by Feigl and others. Minute quantities of the elements are also detected by spectroscopy, e.g., by observing the spectrum of the electric arc struck between carbon electrodes previously soaked in a solution of the substance to be analysed.

Micrometer, an instrument for measuring very small distances. There are many kinds. In astronomy it is used for measuring small angles, and generally consists of two constantly parallel wires, which can be set at a tangent to the image of the object whose angular diameter is required. A graduated scale measures the amount of displacement. A micrometer gauge is a form of measuring gauge having its adjustment effected by an extremely fine

pitch screw. There are also special forms of micrometers for microscopes.

Micron, a unit of length, the thousandth part of a millimetre; it is represented by the Greek letter μ (*mu*).

Microphone, an instrument invented in 1878 by Professor Hughes, consisting of charcoal tempered in mercury, which intensifies and renders audible the faintest possible sound. In microphones of this type the carbon granules are packed behind a thin diaphragm which vibrates in contact with sound waves, and thereby alters the pressure on the carbon granules; this alters their resistance, causing current variations identical with the variations of pressure made by the sound waves in the air. The Marconi-Reisz microphone is an improved type of carbon-granule microphone. Another type is the electrodynamic microphone, also called a ribbon microphone or magnetophone; it consists of a small coil of aluminium wire attached to a freely moving diaphragm, suspended in a powerful magnetic field.

Microscope, an optical instrument of great size of a minute object

by means of a combination of lenses, invented towards the end of the 16th Century, although wrought glass lenses had been manufactured in the 14th Century. A simple microscope is a single lens or magnifying glass. The compound microscope consists of two or more such lenses contained in a hollow tube, usually fitted with a "coarse" and a "fine" adjustment to gain the right focus. The lower lens (nearer the object to be observed), called the objective, is capable not only of magnifying but also of resolving; that is, it has the power of separating out the details of the object at the distance necessary for them to be visible, for, by the nature of light and the human eye, mere magnification of detail does not of itself produce greater visibility.

In classical legend, a king of Phrygia who obtained from Dionysus the power of turning everything he touched into gold, a gift which he successfully prayed him to revoke when he found it affected his very food. Preferring the pipes of Pan to the lyre of Apollo, the latter awarded him a pair of ass's ears, which he was unable to hide from his barber, who whispered the secret to some reeds, and these as the wind passed through them spread the fact broadcast.

Middelburg, the capital of the province of Zeeland, Netherlands, on the island of Walcheren. It has a 12th century abbey. Pop. 18,500.

Middle Ages, is a term used in connection with European history to denote the period beginning with the fall of the Roman Empire in 476, and closing with the invention of printing, the discovery of America, and the revival of learning in the 15th Century.

Middle English, the form of the English language in use for two centuries and a half from 1200 to 1480.

Middleham, a small town in the N. Riding of Yorkshire, England, on the R. Ure. It has the ruins of the castle of Warwick, the king-maker.

Middle Oil, name given to one of the distillation of coal tar; the products obtained from it are naphthalene and carbolic acid.

MICROSCOPE

Middlesbrough, iron manufacturing and shipping town at the mouth of the Tees, in the N. Riding of Yorkshire, England, 45 m. N. of York; has also shipbuilding yards and chemical works and exports coal. It owes its growth to the discovery of one of the largest ironfields in the country in the Cleveland hills, near at hand, in 1850. Pop. 140,000.

Middlesex, a small English county on adjacent to and W. of London; its surface is flat, and there are no streams of importance. By far the greatest part of the county is now built over, and it is practically a part of London; manufactures of all kinds are carried on. All the former towns, including Harrow, Hendon, Ealing, Willesden, Tottenham, Hornsey, and many others, are now suburbs of the Metropolis. Area of administrative county, 232 sq. m. Pop. 1,638,700.

Middleton, a municipal borough and market town, Lancashire, England, on the R. Irk, 5½ m. N. from Manchester. Spinning and manufacture of cotton fabrics, bleaching and dyeing are carried on. Pop. 29,100.

Middleton, Thomas, English dramatist, born in London, where he was afterwards City Chronicler; received assistance in his best work from Drayton, Webster, Dekker, Rowley, and Jonson. His comedies are smart and buoyant, sometimes indelicate, his masques more than usually elaborate and careful. His best works are *The Spanish Gypsy*, and the tragedies of *The Changeling* and *Women beware Women*. (1570-1627).

Midgard, a name given in the Norse mythology to the earth as intermediate between the Asgard (*g.v.*) of the gods and Utgard of the Jötns (*g.v.*).

Midianites, in the Bible, descended from Abraham by Keturah, who dwelt to the E. of Akaba; though related, were troublesome to the Hebrews, but were subdued by Gideon.

Midothian, a county of Scotland, bounded by the Firth of Forth and the shires of Linlithgow, Lanark, Peebles, Selkirk, and Haddington. The Moorfoot hills are in the SE. of the county. The Pentland hills run from the SW. to the NE. The principal rivers are the Water of Leith, the Esk and the Almond. The county is chiefly agricultural, but coal is mined in the NE. Edinburgh is the capital. Other chief towns are Leith, which is now a part of Edinburgh, Dalkeith, Musselburgh and Portobello. Area, 366 sq. m. Pop. 542,600.

Midnight Sun. Within the Arctic and Antarctic circles, during summer, the sun is constantly visible, according to the distance from the poles, for a period varying from 48 hours to six months. Hence northern Norway is sometimes called the "Land of the Midnight Sun."

Midrash, the earliest Hebrew exposition of the Old Testament; strictly it includes the Halakha, or development of the legal system on Pentateuchal lines, and the Haggadah, a commentary on the whole Scripture, with ethical, social, and religious applications; but is frequently used of the latter alone.

Midshipman, a naval rank, intermediate between cadetship and that of commissioned officer; it is the midshipman's duty to supervise and convey to the men the orders of his superior officers. They are trained at the Royal Naval Colleges, Dartmouth and Greenwich.

Midwifery, or *Obstetrics*, the branch of medicine concerned with the welfare of women during childbirth, including those ailments to which a mother is

subject during gestation and lactation. In the middle of the 18th Century parturition was left almost wholly to midwives, and medical help was only sought in cases of unusual difficulty.

The birth of a child is a natural process needing no artificial assistance, but conditions often result in a mother having a distorted or contracted pelvis or in weakness of the muscles concerned with the expulsion of the child. In such a case the use of an instrument, the forceps, may be necessary.

In exceptional cases it may be necessary to open the abdominal cavity, cut into the womb, and remove the child through the front of the body, this operation being known as Caesarian Section—Julius Caesar, it is said, having been born in this manner.

Within recent years there has been considerable legislation dealing with midwifery. Midwives are now registered by the state, and an official midwifery service, operated by local authorities, is at the service of all expectant mothers.

Mignonette, a widely-cultivated annual garden plant, *Reseda odorata*, having sweet-scented greenish-cream flowers. It is native to N. Africa, and is the floral emblem of Saxony.

Migraine, or **Megrim**, a severe form of headache to which highly strung or neurotic persons are specially subject. It may follow worry, depression, bad health, etc., and is prone to attack one side only of the head. The MIGNONETTE symptoms are undue sensibility, nausea and visual disturbances.

Migration, in biology, the practice of certain animals, particularly birds and fishes, of changing their habitat at certain seasons of the year. Many fishes, such as salmon and eels, migrate regularly for breeding purposes; birds often migrate, singly or in flocks, over immense distances, breeding in colder climates and spending the cooler seasons in warmer regions. The movements of birds have been to some extent traced by the use of identification rings.

Miguel, Dom, king of Portugal from 1828 to 1833, born in Lisbon; usurped the throne in defiance of the right of his brother, Pedro IV., emperor of Brazil, who had offered him the regency on condition that he married his daughter, Maria, which he refused to do. A civil war ensued, in which Pedro was successful, and bestowed the throne on his daughter, Miguel going into exile. (1802-1866).

Mikado, a name given by foreigners, though not by the Japanese, to the Emperor of Japan.

Milan, Lombardy, 25 m. S. of Lake Como; acquired by Italy from Austria in 1859; manufacturing silks and velvets, gold, silver, motor cars, and porcelain ware, and trading in raw silk, grain, and tobacco, with great printing works; is the chief financial centre of N. Italy. Its architectural treasures include the magnificent Gothic cathedral of white marble; there is a university, and other important educational institutions. The opera house, La Scala, is famous. Pop. 1,116,000.

Mildew, various parasitic fungi that grow and rapidly spread on vegetable matter. They affect mostly rose trees, wheat, barley, and other cereals. Spraying with a solution of sulphur sometimes prevents its growth.

Miletus, the foremost Ionian city of ancient Asia Minor, at the mouth of the Meander, was the mother of

many colonies, and an important trading centre; its most famous citizen was the philosopher Thales.

Milford Haven, fine naval and mercantile natural harbour in Pembrokeshire, Wales. It is about 16 m. in length and 2 m. in width, and is one of the finest natural harbours in the world. The town of the same name, situated on it, has a pop. of 10,700.

Milford Haven, first Marquess of, (Louis Mountbatten, formerly Prince Louis of Battenberg), British Admiral, son of Prince Alexander of Hesse, he married Victoria, granddaughter of Queen Victoria. From 1908 to 1912 he commanded the Atlantic Fleet, and was First Sea Lord from 1912 to 1914, when prejudice excited by his German origin caused his resignation. He adopted the English title in 1917. (1854-1921). The second Marquess was his son, George (1892-1938). He was succeeded by the third, David, formerly Earl of Medina.

Military Cross, was instituted by warrant of Dec. 28, 1914, and awarded in recognition of distinguished and meritorious services in time of war to captains, commissioned officers of lower rank, warrant officers, class I or II, in any of the British, Indian and Colonial military forces and to foreign officers of equivalent rank. It consists of a Cross of silver having on each arm the Imperial Crown and in the centre the Royal and Imperial Cypher.

Military Law, the law administered by courts martial, whose jurisdiction is limited to the armed forces; it is therefore distinct from so-called "martial law" or military government. The English code as set forth in the official *Manual of Military Law* is traceable to the codes drawn up about 1640 during the Civil War. It is renewed annually by the provisions of the Army (Annual) Act, which permits the Crown to maintain a standing army for the forthcoming year.

Military Medal, a decoration awarded to non-commissioned officers and men in the British forces for bravery in the field.

Military Orders, associations of knights in the period of the Crusades, bound by the religious vows of poverty and chastity; the principal were the Templars, the Hospitallers, and the Teutonic Knights, the last being eventually secularised, and taking a great part in the foundation of the State of Prussia.

Militia, a non-professional military force raised to assist the regular forces in case of necessity, generally for home defence only. Such bodies everywhere preceded the rise of professional armies, and powers still exist in Great Britain for the compulsory enrolment of able-bodied men in the militia by ballot, though they are not in fact used. The old "Special Reserve" was given the name Militia in 1921; but the phrase of a Militia is in reality occupied to-day by the Territorial Army.

Milk, the glandular product excreted by all female mammals for feeding their young. In Europe and North America cow's milk is very extensively used as an article of food, and vast numbers of cattle are kept solely to produce it. Cow's milk contains water, fat, casein, albumen, ash, and lactose; milk offered for sale in Great Britain must contain fixed minimum proportions of butter-fat and solids. In recent years a great deal of legislation regarding milk and its production has appeared on the Statute book; legal definitions of special grades of milk have been established, and a Milk Marketing Board supervises production and distribution. The portion of the milk which rises to the surface after standing is known as cream; there are

no cream standards in Great Britain. Milk yielded immediately after calving contains 15 per cent. albumen, and is unsuitable for human consumption.

Milk-Sugar. See *Lactose*.

Milky Way, or *Galaxy*, a belt of stars encircling the whole visible heavens, in which stars appear to cluster more thickly than elsewhere. According to modern astronomical theory it is possibly a "self-contained" universe of which the Solar System forms part, and which may possibly have a rotation of its own independent of other universes seen dimly as nebulae, which may be systems similar to the Milky Way itself.

Mill, a device for grinding grain to corn, the motive power being wind, steam or water. See *Windmill*.

Mill, James, British economist, born near Montrose; was a disciple of Locke and Jeremy Bentham; wrote a *History of British India*, *Elements of Political Economy*, and an *Analysis of the Human Mind*; held an important post in the East India Company's service. (1773-1835).

Mill, John Stuart, British logician, economist, and Utilitarian philosopher, born in London. In the preceding began to learn Greek and read it and Latin at 14; entered the service of the E. India Company in 1823, but devoted himself to philosophy discussion; published his *System of Logic* in 1843, and in 1848 his *Political Economy*; wrote *Liberty* in 1859, *Utilitarianism* in 1863, left an *Autobiography*; was the father of the movement for women's suffrage; died at Avignon. (1806-1873).

Millais, Sir John Everett, English painter, born at Southampton; early associated with Rossetti and Holman Hunt, he remained for over 20 years under their influence, producing "The Carpenter's Shop," 1851, "Autumn Leaves," 1856, and "The Minute," 1866. His later work, outside the pre-Raphaelite tradition, included portraits of Gladstone and Beaconsfield, with numerous illustrations and etchings. In 1896 he was made President of the Royal Academy. (1829-1896).

Millbank Prison, Westminster, constructed as a "model prison" on lines suggested by Howard and Bentham, existed from 1821 to 1886, after which the Tate Gallery was erected on its site.

Millennium, a period of a thousand years, especially a period during which, on the basis of Rev. XX. 6, certain Christian sects believe that Christ will in the future reign on earth. The belief was common in England about the time of the Civil War.

Miller, Hugh, Scottish geologist, born in Cromarty; began life as a stonemason; editor of the *Witness* newspaper from 1839 till his death; wrote the *Old Red Sandstone*, *Footprints of the Creator*, and the *Testimony of the Rocks*, and an autobiography, *My Schools and Schoolmasters*; died by his own hand at Portobello. (1802-1866).

Millerand, Etienne Alexandre, 11th President of the Third French Republic (1920-1924); born in Paris; by profession an advocate; entered the Chamber in 1885. Minister of Commerce, 1889; War Minister, 1912-1913, 1914-1915. Prime Minister, 1920, before becoming President. His interference in cabinet affairs antagonized the chamber, and he was forced to resign the presidency. (1859-).

Milles, Vilhelm Carl Emil (Andersson), Swedish sculptor, born near Upsala. Studied in Paris. Much of his work consists in portrait busts and animal groups, as well as fountains and monuments in Stockholm, Chicago, etc. (1875-).

Millet, a grain of several species, especially *Panicum miliaceum*, the common millet, growing tall with slightly branched spikes. The spikelets are surrounded by fine hairs or bristles which fall as the seeds ripen. Millet is grown for its seed, which is principally used in the West for poultry food, but in India and the East is an important food grain.

MILLET
(*Panicum*
miliaceum)

Millet, Jean François, French painter, born near Gréville; after studying at Paris he lived at the village of Barbizon, near the Forest of Fontainebleau, where he produced pictures of French country life, completing his famous "Sower" and treating *Millicium* such subjects as the "Gle" the "Sheep-Shearers," and "The Angelus," his most famous work. (1814-1875).

Millibar, unit of atmospheric pressure purposes; 1000 millibars are equal to one bar, which is equivalent to a pressure of a million dynes per square centimetre, or that of a column of mercury 29.93 inches or 750 mm. long.

Millikan, Robert Andrews, American physicist; born at Morrison, Ill. He was the first to isolate the electron, for which he was awarded the Nobel Prize in 1923. (1868-).

Milne, Alan Alexander, British author and journalist. He was assistant-editor of *Punch* from 1906 to 1911; among his plays *Mr. Pin Passes By* and *The Ivory Door*, and of his children's books *When We Were Very Young* and *When We Were Very Old* are the most famous. (1882-).

Milne, George Francis, first Baron, British field-marshal; served in the Sudan, the Boer War, and the World War; in 1916 he took command of the British troops in Salonica, and in 1917 was commander in Macedonia; in 1918 he was knighted, in 1926 was made a field-marshal and chief of the Imperial general staff, and was ennobled in 1933. (1866-).

Milner, Alfred, first Viscount, British administrator, Private Secretary to Goschen (1887-1889); Under-Secretary for Finance in Egypt (1889-1892); Chairman of the Inland Revenue Board, from 1892 to 1897, when he became High Commissioner in S. Africa, and in 1901 Governor of the Transvaal and Orange River Colony; was raised to the peerage in 1901; declined the Colonial Secretaryship in 1903; resigned in 1905, but in 1916 became a member of the War Cabinet, and in 1918 Secretary for War; transferring to the Colonial Office in 1920 he undertook a mission to Egypt. (1854-1925).

Milo, a celebrated Greek athlete, born in Crotona, said to have carried a live bullock 120 paces along the Olympic course, killed it with his fist and eaten it at one repast; in old age he attempted to split a tree, but it closed upon his arm, and wolves devoured him.

Milo, or *Melos*, island in the Cyclades or Aegean group, belonging to Greece. There are mineral springs, and its wines are famous. It has sulphur, lead, silver and other mines. The statue of Venus de Milo, now in the Louvre, was found near the capital. Pop. c. 17,000.

Milreis, unit of currency in Brazil; its nominal value is 5.9 pence, but its present exchange value (1938) is about 2fd.

Miltiades, an Athenian general, famous for his decisive defeat of the Persians at Marathon, 490 B.C.; later he failed in a naval attack on Paros, was cast into prison, and died of his wounds.

Milton, John, English poet, born in bridge, and settled to write poetry at Horton, 1633; in 1638 he visited Italy after writing *Hymn on the Nativity*, *L'Allegro*, *Il Penseroso*, *Comus*, a masque, and *Lycidas*, an elegy on his friend King, besides much Latin verse. On the outbreak of the Civil War he returned to London, married in 1643 Mary Powell, and became active as a writer of pamphlets on public questions, including his tracts on Divorce, a threatened prosecution for which elicited in turn the *Areopagitica*, a *Speech for the Liberty of Unlicensed Printing*. Under the Commonwealth he was "Secretary of Foreign Tongues," and successfully defended the execution of Charles I. in his *Latin Defence of the English People* and other works. He married in 1656 his second wife, Catherine Woodcock, who died two years later. His greatest work, *Paradise Lost*, was composed rapidly, after the Restoration, dictated to his daughters, and completed in 1663, but not published till 1667. 1671 saw *Paradise Regained* and *Samson Agonistes*. He had been blind since 1652; he married Elizabeth Minshull in 1663, who comforted him in his closing years, and in the Plague Year removed from London to Chalfont St. Giles. The richness, melody, and simplicity of his poetry, the sublimity of his great theme, and the adequacy of its treatment, place him among the greatest poets of the world. (1608-1074).

JOHN MILTON

Milwaukee, chief city of Wisconsin, U.S.A., on W. shore of Lake Michigan, 80 m. N. by W. of Chicago. Exports grain, iron ore, etc.; manufactures flour, machinery, and pig-iron. Pop. 578,000.

Mimeograph, an apparatus for the duplication of written or typewritten matter. A wax sheet into which the matter to be duplicated has been cut by hand or typewriter so as to form a stencil is placed over a sheet of paper, the facsimile or duplicate being obtained by passing an inked roller over the stencil and paper.

Mimes, dramatic performances among comic representation of scenes in ordinary life, often in extempore dialogue.

Mimicry, a character animals and plants by virtue of which they take on a close resemblance to other natural objects in such a way as to appear harmless against possible enemies. Examples are the stick insects, which appear to be part of the plants to which they attach themselves, and various marine plants which, except on the closest inspection, are indistinguishable from the sea-bed.

Mimosa, a genus of leguminous herbs comprising about 400 species native to the warmer parts of America, a few only being found in Africa and Asia. The flowers are small globes growing directly from the stalks, and vary in colour from red to pale yellow. The leaves are feathery and in some species sensitive.

Mimulus, or **Monkey Flower**, a genus annuals or perennials of the order Scrophulariaceae, containing 80 species of world-wide distribution, including the common musk, *Mimulus moschatius*.

STICK INSECT

Minaret, in architecture, a tall, slim finial, and generally having several balconies at various stages; a minaret from which the muezzin calls the faithful to prayer is a feature of every Mohammedan mosque.

Minas Gerães, state of eastern Minas G., especially gold, lead, iron and manganese. Coffee, cotton, rice and sugar are grown. Cap., Belo Horizonte. Area, 221,900 sq. m. Pop. 5,888,200.

Minden, a town of Westphalia, Prussia, on the Weser, 40 m. from Hanover. It has a 13th Century cathedral in early Gothic style, and has manufactures of cigars, glass, chemicals and chicory. The allied British and Hanoverian Army defeated the French here in 1759. Pop. 27,000.

Minehead, seaport and market town on the Bristol Channel, 25 m. from Taunton. It has a pier 700 ft. long. Pop. 6,300.

Mineralogy, the classification and minerals, their origin and their distribution. One of the principal branches of mineralogy is crystallography, which deals with the form and structure of crystals; but the mineralogist examines also the chemical composition of his materials, as well as their specific gravity, fusibility, specific heat, etc. The classification of minerals is based on their chemical composition.

Mineral Waters, waters either naturally or artificially impregnated with salts or gases. In the former, impregnation occurs by the flow of the water over mineral rocks. The waters contain carbonate or sulphate of calcium, ferrous carbonate, sodium chloride or other dissolved mineral substances. The mineral springs may be hot or cold. The curative properties of the different waters are useful for rheumatism, skin diseases, gastric and other affections. Mineral water baths exist in many countries, as in England at Bath, Harrogate and Droitwich. Artificial mineral waters are manufactured in imitation of the natural. The name is often applied to "soft drinks" of artificial manufacture with no special mineral constituents.

Miners' Federation of Great Britain, the federation of Trade Unions in the British coal-mining industry, founded in 1888, one of the strongest and most powerful of British labour organizations, with a membership in 1938 of about 560,000.

Minerva, the Roman virgin goddess of wisdom identified with the Greek Athena (g.v.); she was the special patroness of arts and trades.

Mines, explosive charges used for the destruction of enemy fortifications or shipping. In the World War modern chemical high explosives were first extensively employed in their preparation, and they were used on an enormous scale, particularly on the Western Front. The biggest single mining operation in the War was the explosion of one million pounds weight of explosives under the Messines Ridge over a 10-mile front, which was carried out by the British. In naval warfare, mines which consist of metal containers with sensitive projecting detonators are laid in the sea (usually anchored just below the surface) to destroy approaching enemy ships, or (at a depth) to block the passage of submarines. It is a task of the Navy to keep the sea free from enemy mines. Sweeping the sea for mines is performed by a wire stretched between two ships, the mine being exploded on reaching the surface.

Ming, a Chinese dynasty which reigned from 1368, after the expulsion of the invading Mongols, to 1644. Its founder was Hung Wu (Chu Yuan-chang), who moved the capital to Peking, and from whose time date several of the principal buildings of the city. The period was remarkable less for creative work in literature and the arts than for its loving interest in and care for the work of the past. During this period the first contacts of the modern West with China were made by the Portuguese mariners and the Jesuit missionaries who followed them. The Mings were overthrown by the Manchu dynasty.

Miniature, a small portrait, painted on vellum, paper, or ivory. The colour is applied in dots with the point of the brush. The earliest miniatures were the portraits of state or ecclesiastical dignitaries painted in the capitals of medieval manuscripts. Of secular miniature painting the first great exponent was Hans Holbein the younger (1495-1543).

Minimum Wage, a rate of pay fixed by negotiation between employers and workers, or by state action, below which wages may not fall. Attempts to secure such a wage in various industries began in the 19th Century; in New Zealand the first minimum wage legislation was enacted in 1894. In Great Britain an Act of 1909 enabled Trade Boards to be set up with power to fix minimum wage rates, and by 1921 over 50 such boards existed, covering 3½ million workers. In the United States minimum wage legislation was a part of the National Recovery programme enacted under President Roosevelt in 1933. There are also Minimum Wage ordinances in many British Colonies.

Mining, the extraction of minerals from the crust of the earth. The two principal methods are by open workings, known as "quarries," and underground workings called mines. The principal substances obtained as a result are coal, the minerals from which metals are obtained, e.g., iron, lead, gold, etc.; building materials, salt, gems, etc. The method adopted depends upon the manner in which the material occurs in the earth's crust.

Before a mine can produce material much preliminary work is necessary. The probable extent of the deposit and its thickness must be ascertained, following careful prospecting work. The actual excavation work may be either by hand or by machinery, the motive power being steam, water, compressed air or electricity. Blasting by explosives is commonly used for hard deposits, especially coal and building-stone. In modern mining much of the heavy work is performed by machinery, such as rock drills for boring, cutting machines for coal cutting, etc.

Underground workings are reached by shafts which are vertical or steeply inclined passages or tunnels. After the breaking down of the material, the product is carried in suitable mine cars to the hoisting-shaft and then drawn up to the pit bank. Drainage and ventilation are of vital importance in underground mining. Modern mining is regulated by various statutes.

Owing to the dangers to life and health all operations are under strict inspection by the government inspectors of Mines. The chief danger arises from escaping gases, the most important of which are methane (g.v.) and carbonic acid gas.

Minium, or **Red Lead**, a scarlet oxide of lead made by the carefully-regulated roasting of massicot (lead monoxide) in air. It is used in plumbing, in the manufacture of flint glass, and as a pigment, whence the term *miniature*, i.e., originally a painting executed in minium.

Mink, a name given to at least three species of animals of the weasel (*Putorius*) genus of Mustelidae and to the fur obtained from it. The vison (*Putorius vison*) is found in the neighbourhood of N. American rivers; its fur is dark brown, tail black, with patches of white on the throat, breast, and belly. In length it measures 15 to 18 in. without the tail.

Minneapolis, largest city of Minnesota, U.S.A., on both sides of the Mississippi, centre of the wheat and flour trade, with other manufactures, including motor cars, metal works, and food products. It has a university. Pop. 464,400.

Minnesingers (i.e., love-singers), a name given to the lyric poets of Germany during the latter part of the 12th and the first half of the 13th Centuries. The most famous was Walther von der Vogelweide.

Minnesota, one of the north central United States of America; admitted to the Union in 1858. It is largely prairie, with hundreds of lakes, and is chiefly a wheat-producing area; there are pine forests in the N., extensive iron mines, slate and granite quarries. The climate is dry, equable, and bracing. The state university is at Minneapolis; the capital is St. Paul; the largest city is Minneapolis; Duluth is a Lake port with extensive trade. The state is inhabited largely by descendants of Scandinavian and German immigrants. Area, 84,700 sq. m. Pop. 2,564,000.

Minnow (*Phoxinus phoxinus*), a small fish of the Carp (Cyprinidae) family, common in English and European rivers. It is very much like a small dace, is 3 to 4 in. in length, and in colour is brown and green throughout.

during the breeding season the male assumes gorgeous colours. It makes good eating and is often used as a bait.

Minorca, the second of the Balearic Isles, hilly, with stalactite caves and rocky coast; is less fertile than Majorca, from which it is 25 m. distant N.E. It produces oil, wine, and fruits, and makes boots and shoes. The capital Mahon, in the S.E., is strongly fortified, and has a good harbour. Pop. c. 40,000.

Minorities, people differentiated by race and culture from the bulk of the inhabitants of the territory within which they live. In the countries of Eastern and Central Europe especially, the problem of minority status became urgent as a result of the territorial changes consequent upon the treaties made subsequent to the World War. States members of the League of Nations have agreed to allow their minority peoples certain cultural and political rights; such rights were secured in the conventions that gave birth to new or enlarged states such as the Baltic republics and Czechoslovakia, but have not always been honoured. Among the principal "minority problems" at present (1938) are those of the Germans in Czechoslovakia (see *Sudeten Deutsch*), Croats in Yugoslavia, Hungarians in Rumania, Flemings in Belgium, and Jews in most Central and Eastern European countries.

Minos, an ancient king of Crete, fabled to have been appointed, with Aeacus and Ithadamanthus, one of the judges of the dead on their descent into the nether world.

Minotaur, in the Greek mythology, a with a bull's head, confined in the Labyrinth of Crete, fed by the annual tribute of seven youths and seven maidens of Athenian birth, till he was slain by Theseus with the help of Ariadne.

Mint, an establishment at which coins are struck on behalf of the State. The United Kingdom has but a single Mint, the Royal Mint in London, established at Tower Hill since 1810, having previously been in the Tower buildings. The head of the Mint is the Chancellor of the Exchequer; branch Mints exist at Pretoria, Melbourne and Perth. By special arrangement the Royal Mint manufactures coins for a number of the Dominions and Colonies and for a few foreign States, in addition to British coinage.

Mint (*Mentha*), a genus of hardy herbaceous aromatic perennial plants of the order Labiales, of which there are 28 species, 6 being found in Britain. The familiar cultivated species, known as Mint or Spearmint is the *Mentha viridis*; height 2-3 feet, flowers mauvish, borne in August; the leaves are used for medicinal and culinary purposes. Other familiar species are water-mint, peppermint (*M. piperita*) and penny-royal (*M. Pulegium*).

Minuet, a slow, graceful dance, set to music in 3-4 time, popular in the 17th Century; or a musical composition of like rhythm and tempo, frequently used in suites by Bach and Handel, and by Haydn and Mozart as a third symphonic movement.

Miocene, name given by geologists to the strata lying above the Oligocene and below the Pliocene. The British Isles were land during the period in which these deposits were laid down, and consequently no strata of this age are found. In Miocene times mammals developed towards their modern forms, and close relatives of existing species are found as fossils. There are large areas of Miocene deposits in North America, as well as in parts of Europe; the period was one of great earth movements.

Miquelon, small island off Newfoundland, with St. Pierre, a French possession. There are valuable cod fisheries. Area, 85 sq. m. Pop. 4,000.

Mirabeau, *Comte de*, French revolutionary leader; visited England and Germany before the Revolution, and in 1789 was chosen a commons deputy of Aix to the States-General where he became the ruling spirit, using his great influence in favour of moderation, and seeking to reconcile the Court to the necessity of giving way to the reasonable popular demands; he might possibly have arranged an accommodation but for his early death. (1749-1791).

Miracle Plays, dramas founded on legends of the saints, and in a wider sense all those religious representations for the instruction of the people fostered by the Church of the Middle Ages, performed first in churches, afterwards in public places. They were common in England from the 12th Century, but the rise of the commercial drama led to their abandonment; they disappeared after the 17th Century, save for the famous Passion Play still acted periodically at Oberammergau, Germany. In recent years similar plays have been produced in England and elsewhere, often under the auspices of the Church authorities.

Mirage, an optical illusion common in sandy districts, caused by an image of some object or place below the observer's horizon being reflected back to him from an upper layer of the atmosphere.

Misdemeanour, any indictable crime which is neither a treason nor a felony. The distinction is no longer of great importance in English law, but generally speaking misdemeanours are the less serious offences, though they include libel, sedition, perjury and some other serious crimes. A delinquent

may not be arrested for a misdemeanour save by judicial warrant or by virtue of an express statute.

Misericord, a bracket on the under medieval churches, used as a support by the clergy when standing; they were often elaborately carved with grotesque figures. They are sometimes, but wrongly, called Misericeres, a name taken from the first word of the Latin text of Psalm 51, during the chanting of which they were frequently used as explained.

Misprision, of a crime, is concealment of it by a third party who is cognisant of it but not accessory to it; the name is most frequently found in the phrase Misprision of Treason.

Missal, the book containing the text of the prayers and chants used in the Roman Catholic service of the Mass (q.v.); hand-written Missals of the Middle Ages with their illuminated capitals and borders were among the most beautiful artistic productions of that epoch.

Missions. Christian mission work has been carried on chiefly at five periods: (1) in the earliest days of the Church, under the apostles and earliest Christian teachers who followed them; (2) in the "Dark Ages," when the Teutonic peoples were converted by Roman and Celtic missionaries; (3) in the period when Europe first came into contact with the East at the time of the Tartar onslaughts, under the early Franciscans and Dominicans; (4) by the Jesuits at the time of the Counter-Reformation; and (5) since the beginning of the 19th Century, when the Protestant churches first took up large-scale missionary work. In recent times secular education and medical work have been hardly less important as missionary activities than definite religious teaching. Roman Catholic missions are controlled by the Congregation of Propaganda in Rome; great Protestant missionary organisations include the Church Missionary Society, the Society for the Propagation of the Gospel, the Wesleyan Missionary Society, the China Inland Mission, and the United Free Church Missionary Society.

Mississippi, state of the U.S.A., on the E. bank of the lower Mississippi, abutting on the Gulf of Mexico; has a hilly surface, traversed by numerous rivers, the Yazoo, a tributary of the Mississippi, forming a great fertile delta. The chief industry is agriculture, though many sheep and cattle are raised; cotton, corn, hay and fruits are the chief crops; virgin forests of hardwood cover much of the delta. Valuable deposits of pipe and ochre clays and of lignite are found; cotton is manufactured, and there is trade in lumber. More than half the population is coloured, and the races are kept distinct in the state schools. Jackson, the capital, Meridian and Vicksburg are the largest cities. Mississippi was colonised by the French in 1690, ceded to Britain 1763, admitted to the Union 1817, joined the South in 1861, but was readmitted to the Union in 1869. Area, 46,390 sq. m. Pop. 2,010,000.

Mississippi River, rises in Lake Itasca, Minnesota, and flowing S. for 2,500 m., enters the Gulf of Mexico by a large delta; its earlier course is through picturesque country, often in gorges, with rapids such as the St. Anthony Falls, the Des Moines and Rock Island Rapids. After receiving the Missouri, over 2,900 m. long, from the Rocky Mountains, at St. Louis, it flows through great alluvial plains, which are protected from its overflows by hundreds of miles of earth embankments, and is joined by the Ohio from the E., the Red and Arkansas rivers from the W., and many other navigable streams. The Mississippi is navigable by large

steamers for 2,000 m.; Minneapolis, St. Louis, Memphis, and New Orleans are among the chief ports on its banks. The river is liable to overflow its banks, and there have frequently been disastrous floods, as in 1927 and 1935.

Mississippi Scheme, a financial scheme started in France in 1717 by John Law and the Government, ostensibly to provide money for developing the Mississippi basin, but really to ease the pressure on the exchequer; the rage of speculation that followed led to a financial crisis and the collapse of the company in 1720, with great consequent distress.

Missolonghi, a Greek seaport and fishing town, on the Gulf of Patras, chiefly noted for its two sieges in the War of Independence 1821-1826, and as the place of Byron's death 1824. Pop. c. 9,500.

Missouri, a central state of the U.S.A., N. of that river the country is level, S. of it there rise the Ozark tablelands; the soil is very fertile, and the state principally agricultural. Immense crops of maize, oats, potatoes, cotton, hay and wheat are raised; coal, iron, lead, zinc, and other minerals abound, and there is a large cement manufacture. Boots and shoes and metal and food products are also largely exported. Admitted to the Union in 1821, Missouri was divided in the Civil War, but since then has been very prosperous. The capital, St. Louis, is one of the greatest commercial and manufacturing towns in the Union; Kansas City has great pork-packing establishments and railroad ironworks. Area, 69,500 sq. m. Pop. 3,630,000.

Mistle-Thrush (*Turdus viscivorus*), a familiar British bird of

the thrush (*Turdidae*) family, so called on account of its fondness for mistletoe berries; also sometimes called Storm Cock since it sings loudest in storms. It is similar in appearance to the song-thrush, but rather larger, and with a much inferior song.

MISTLE-THRUSH

Mistletoe (*Viscum album*), an evergreen plant, parasitic chiefly on apple, more rarely on oak, pear, and hawthorn, the only green parasite found in England. In winter it bears white berries in the forks of the stems. Mistletoe played an important part in Druidical ceremonies, and in classical times was commonly thought to have both magical and medicinal properties.

MISTLETOE

Mitcham, borough of Surrey, England, 9 m. from London; mainly a residential London suburb, but some market-gardening is carried on, and lavender and tobacco were formerly cultivated. There is a well-known annual pleasure fair, much resorted to by Londoners. Pop. 67,000.

Mite, name given to various small arachnids, which with ticks form the order Acari, a subdivision of the Arachnida (spiders). Some are parasitic on animals, and frequently themselves hosts of parasitic protozoa; others are wandering predatory land or water forms. Among familiar species are the harmless house-mite, the itch-mite, harvest bugs (the young of velvet mites), cheese mites, gall mites, etc.

Mithras, a Persian divinity, originally a deity of the Zoroastrian pantheon, but became about the time of the Christian era the centre of a new creed which long competed for precedence with Christianity, which in a few respects may have borrowed from it. Mithraism was especially popular in the Roman armies, and traces of it have been found in Britain; the chief rite of the creed was a form of baptism in the blood of a newly-slain bull.

Mithridates the Great, surnamed Eupator, king of Pontus from 123 to 63 B.C.; fought a series of wars with Rome, but at last committed suicide after a defeat by Pompey on the Euphrates.

Mitrailleuse, a gun consisting of several, as many as 25, barrels from which a number of shots may be fired simultaneously or in rapid succession, used by the French in the Franco-Prussian War.

Mitre, a bishop's liturgical headress, a tall cap rising in front and behind to a peak, and elaborately embroidered, frequently with jewels. Two flaps fall from the back behind the shoulders. It is in use in both the Roman Catholic and Anglican churches.

Mnemonics, a system of memorizing dates, formulas, etc., based on the association of ideas, e.g., the substitution of letters for figures, the letters suggesting or spelling familiar words. The system originated in classical times, but modern educationalists prefer intelligent understanding as a basis for memorization.

Mnemosyné, in the Greek mythology, the goddess of memory, and by Zeus, mother of the Muses.

Moa, an extinct family of large birds (the *Dinornithidae*), resembling the ostriches; formerly found in New Zealand. They were remarkable for the great size and development of their legs. The largest species was the *Dinornis maximus* exceeding the ostrich in size. They were hunted by the natives as food and exterminated.

Moab, a pastoral region extending along the E. of lower parts of the Jordan and the Dead Sea, inhabited, according to the Book of Genesis, by the descendants of Lot.

Moabite Stone, a stone 1 ft. high and 2 ft. broad found by Dr. Klein in 1868 among the ruins of Dibau, a town in Moab, and now in the Louvre at Paris. The inscription in the Phœnician characters describes a victory of the Moabites over the Israelites.

Mobile, a seaport and second city of Alabama, U.S.A., 30 m. N. of the Gulf of Mexico; exports cotton and lumber. Pop. 68,200.

Mocassin, shoe worn by N. American Indians, generally made of deer-skin, either of one piece, or with sole and upper; it is often decorated with beads.

Mocassin Snake, a N. American watery districts; one of the largest poisonous snakes in the U.S.A.; about 4 ft. long, and greenish-black.

Mocha, or Mokha, a fortified seaport on the Red Sea, in Yemen, Arabia. 55 m. NW. of the Strait of Bab-el-Mandeb. It has a small bay and formerly had a large export trade in coffee but its importance has declined. Pop. 5,000.

Mocking-Bird, the name of a family (the Mimidae), all except the rose-breasted species of Colombia and Venezuela being of sober colours. Some of them are notable for their powers of mimicry, especially the Common Mocking-bird (*Mimus polyglottis*) and the Cat-Bird (*Galeoscoptes carolinensis*).

Modder, a river of South Africa, rising in the Orange Free State, near the E. boundary flowing into the Vaal. Its length is about 180 m. The British under Lord Methuen were defeated here in the Boer War, 1899-1900.

Modena, Italian town, 62 m. N. of Florence; has a cathedral, with noted campanile, a university, library, and art collections, and manufactures silk and leather; incorporated in the kingdom of Italy 1860. Pop. 96,300.

Moderator, the presiding minister in the courts of the Presbyterian Church—the Presbytery, Synod, and annual General Assembly. The Moderators are elected from the Elders, and hold office for one year. In the Assemblies they have only a casting, not a deliberative, vote.

Modernism, a comprehensive term religious movements which arose within the Roman Catholic Church in the 19th and early 20th Centuries, largely as the counterpart of the movement towards social freedom, and which were prompted by the wish to bring traditional Christian beliefs and practices more into accord with modern thought and knowledge. Among leaders of the movement were Baron Frederick Von Hügel, Alfred Loisy, and the English Jesuit Father Tyrrell. Modernism was finally condemned by the Pope in 1907 as a "synthesis of all heresies."

Mogador, a seaport of Morocco, standing on a promontory on the Atlantic, 120 m. SW. of Morocco City. Goat-skins, hides, olive-oil, and wax are included in its exports. Pop. 15,200, of whom 800 are Europeans.

Mogul, name applied to the Empire and dynasty set up in India by Baber, a descendant of Tamerlane, about 1526; its capital was Delhi. The last Mogul Emperor was pensioned off by the British after the Indian Mutiny, long before which his line had lost almost all its authority. "Mogul" is a form of the word "Mongol."

Mohair, wool obtained from the fleece of the Angora Goat, which has now been largely crossed with the common goat. There is a flourishing industry in the U.S.A., which imports it from Asia.

Mohammed, great prophet of the Islam, born in Mecca, the son of Abdallah, of the tribe of the Koreish; left an orphan, brought up by his uncle Abu Talib; became steward to a rich widow Kadijah (q.v.) whom he married at 26; spent much time in solitary meditation and prayer, and at last claimed to have received a series of special divine revelations on the basis of which he formed a religious system. His first convert was his wife Kadijah, but progress was slow, and he made only 12 converts in 3 years. His preaching gave offence to the chief people, and after 13 years a conspiracy was formed to take his life. He fled to Medina, in his fifty-third year, A.D. 622; his enemies had taken up the sword against him, and he now replied by declaring war against all idolaters and unbelievers. At the age of 64 he died of fever, and was buried at Medina. His beloved second wife, Ayscha, outlived him. By the time of his death all Arabia had accepted the new faith. His supposed revelations form the Koran (q.v.). (571-632).

Mohammedanism, or Islam, the religion based on the teachings of Mohammed (q.v.): its sacred book, the Koran (q.v.), which is regarded as literally inspired, is the official summary of the faith; its creed is "There is no God but God, and Mohammed is His prophet." It insists on prayer, fasting (in the month of Ramadan) and almsgiving as the three chief duties of the devout follower,

emphasizes ritual cleanliness, forbids alcohol, inculcates circumcision, and recognizes the divine origin of the teachings of the Old Testament and of Jesus, though it considers them as superseded by Mohammed's revelation. Its profession extends over North and much of Central and East Africa, Western and Central Asia, and much of the Malay countries and India. It has to-day some 220 million followers.

Mohawk, a tribe of American Indians, one of the most warlike members of the Iroquois League. They aided the British in the War of Independence and finally settled in Canada. The tribe gave its name, sometimes spelled Mohock, to a band of ruffians who infested the streets of London in 1711-1712.

Mohicans, an American Indian tribe, formerly located in Connecticut; took sides with the English settlers against the French and with the former against England.

Moh's Scale, a graduated scale of hardness of minerals, based on a classification of ten minerals arranged in such an order that each of them scratches all those below it, but cannot scratch any of those above it. The order is (1) diamond, (2) corundum and sapphire, (3) topaz, (4) quartz, (5) orthoclase, (6) apatite, (7) fluorite, (8) calcite, (9) gypsum, (10) talc.

Molasses, also called treacle, a by-product in the production of sugar, in appearance a thick brownish liquid; different qualities are used as human food, cattle food, and for alcohol manufacture.

Moldau, or Vltava, river in Czechoslovakia, rises on the N. of the Böhmerwald Mts. and joins the Elbe at Melnik after flowing 278 m. Prague and Budweis are on its banks.

Moldavia, a province of Rumania, between the Carpathians and the R. Pruth; its chief river is the Sereth, and its chief town Jassy (Iasi). It was before 1859 a separate principality. Area, 14,690 sq. m.; pop. 2,679,000. The name is also applied to a republic of the U.S.S.R. on the R. Dniester; capital Tiraspol. Area, 8,300 sq. m. Pop. 615,000.

Mole, a river rising in the Tilgate forest Surrey to the Thames at E. Molesey. Dorking, Leatherhead, and Cobham are on its banks.

Mole (*Talpa*), a numerous genus of small dark-grey mammals of the Insectivora order, native of Europe, N. America, and N. Asia. They burrow underground, throwing up "hills," under which are nests.

They feed on worms and insects, and are remarkable for the smallness of their eyes, whence they are popularly supposed to be blind, and their spade-like forefeet adapted for digging. Their fur, which is valued, will lie equally well in either direction. One species, the Common Mole (*Talpa europaea*), is found in Britain.

Mole Cricket. See Cricket.

Molecular Weight, in chemistry, is the number of times that the weight of a molecule of an element or compound is as heavy as one-sixteenth of the weight of the molecule of oxygen (or, roughly, the number of times its molecule is as heavy as the atom of hydrogen). The gram-molecular weight (G.M.W.) of a substance is its molecular weight expressed in grams; thus the molecular weight of oxygen is 32 and its G.M.W. is 32 grams. The G.M.W. of all gases at 0°C. and at a pressure of 760 mm. of mercury occupies 22.4 litres.

COMMON MOLE

and this volume is known as the gram-molecular volume (G.M.V.).

Molecule, the smallest particle of an element or compound that normally leads a separate existence; in elements it may consist of only one atom, as in the case of helium, neon or mercury vapour, or of more than one, as in hydrogen (H_2), ozone (O_3), sulphur vapour (S_8). In the case of compounds, there seems no limit to molecular complexity; thus alcohol is C_2H_6O , naphthalene $C_{10}H_8$, cane-sugar $C_{12}H_{22}O_{11}$, and cocaine $C_{17}H_{21}NO_4$, while the molecules of starch, proteins, etc., are so complicated that their constitution is still unsolved.

Molière, the adopted name of Jean comie dramatist, born in Paris; turned from the bar to the theatre, and soon found his vocation as a writer of plays which heap ridicule on the weaknesses and pretensions of various social classes. His characters are rather abstract types of men than concrete individualities; his principal pieces are, *Les Précieuses Ridicules*, *L'Ecole des Femmes*, *Tartuffe*, *Le Misanthrope*, *Georges Dandin*, *L'Avare*, *Le Bourgeois Gentilhomme*, *Les Fourberies de Scapin*, *Un Médecin Malgré Lui*, *Les Femmes Savantes*, and *Le Malade Imaginaire*. He died after a performance of the last-named play, and was refused religious burial. (1622-1673).

Mollusca, a main division of the animal kingdom, including many common shell-fish, such as oysters and cockles, and other bivalves, snails and slugs, and the soft-bodied cuttle-fishes and octopuses. Their bodies are unsegmented, and in the aquatic orders the blood is purified by gills. Five classes are recognized: *amphineura*, *cephalopoda*, *gastropoda*, *lamellibranchia* and *scaphopoda*. A muscular thickening, or foot, developed on the under side of the body, is the organ of propulsion or locomotion as may be seen in the crawling snail. Most molluscs possess a distinct head, bearing tentacles and eyes. The body is generally protected by a hard calcareous shell, which is sometimes internal. The central nervous system consists of a nerve ring surrounding the front end of the digestive tube, and thickened into swellings known as ganglia.

DOG WHEEL

Moloch, or **Molech**, name of a Semitic god, frequently mentioned in the Bible as a tribal deity of the Ammonites; his worship was accompanied by cruelties and human sacrifices, especially of children. By derivation the name Moloch means "king." The image of Moloch was of brass.

Moltke, **Helmuth Johannes Ludwig von**, German general. A nephew of the following, he served in the Franco-Prussian War, and was chief of the general staff when the World War broke out; on account of the failure to capture Paris he was superseded in Oct., 1914. (1848-1916).

Moltke, **Helmuth Karl, Count von**, field-marshal, born at Parchim; trained for a military career in Denmark; assisted from 1835 in reorganizing the Turkish army; chief of the Prussian General Staff from 1858, was pre-eminent as a military strategist, planned and conducted the Prussian campaign against Austria in 1866, and the Prussian campaign against France in 1870-1871. (1800-1891).

Molton, South, borough and market town of Devonshire, England, 12 m. S.E. from Barnstaple, on the R. Mole, from which it takes its name. There are shirt and collar factories and corn mills. Pop. 2,800.

or **Spice Islands**, an archipelago of mountainous islands, in Dutch possession, mostly volcanic, between Celebes and New Guinea, in two main groups. In the N. the largest island is Jilolo, but the most important, Tidore and Ternate, export spices, tortoise-shell, and bees-wax. In the S. Buru and Ceram are largest, most important being Amboyna, from which come cloves. The people are civilized Malays. The islands are equatorial, tempered by sea-breezes, and healthy; discovered by the Portuguese in 1521, they have been in Dutch possession since 1607, except when held by Britain, 1810-1814. Area, c. 44,000 sq. m. Pop. 450,000.

Molybdenum, a metallic chemical element related to tungsten and uranium. Symbol Mo, atomic number 42, atomic weight 96.0. It is used as an alloy with steel for making high-speed drills, etc., which must retain their temper, and not soften, when heated.

Mombasa, town and seaport of Kenya Protectorate, British East Africa, on a rocky islet, close inshore, 50 m. N. of Pemba; the harbour of Kilindini is the finest in East Africa. Pop. c. 50,000.

Momentum, the property which a body possesses by virtue of its velocity, i.e., the power which it has of overcoming obstacles. It is measured by the product of its mass (m) and its velocity (v), i.e., is expressed mathematically as mv . If a force (F) acts on a body for a certain length of time (t), the impulse of the force = Ft , and this also represents the change of momentum.

Mommsen, **Theodor**, German historian born at Garding in Schleswig-Holstein, professor at Leipzig, Zürich, Breslau and Berlin; his chief work is the *History of Rome*. (1817-1903).

Monaco, a small principality some 8 sq. m. in area, 9 m. E. of Nice, on the Mediterranean shore, surrounded by French territory and under French protection; has a mild, salubrious climate, and is a favourite winter resort. Area, 370 acres. Pop. 22,000. The capital, Monaco (pop. 2,000) is built on a picturesque promontory, and 1 m. N.E. stands Monte Carlo (q.v.).

Monad, in the Leibnitzian philosophy a name for the simple constituents of which all substance is built up; material objects are assemblages of monads, spiritual entities are simple monads, and the supreme monad is God.

Monaghan, an inland county in the province of Ulster, Eire (Ireland); is undulating, with many small lakes and streams; grows flax and manufactures linen, and has limestone and slate quarries. The chief towns are Clones and Monaghan, the county-town (pop. 4,500), which has an active produce market. Area, 499 sq. m. Pop. 61,300.

Monarchy, the rule over a state or as a pure autocrat or as an executive subject to any degree of constitutional or legal control. See also King.

Monash, **Sir John**, Australian general, of Jewish race; born in Melbourne; by profession a civil engineer; in World War. commanded a brigade in the Gallipoli; Lieutenant-General, 1918; later was in supreme command of the Australian troops in France. (1865-1931).

Monasticism, a mode of life in which live apart from the world in communities dedicated to prayer, contemplation and the development of the spiritual faculties; is found in many religions, but is most highly developed in Buddhism and Christianity. The Christian monastery developed from the communities of hermits which sprang up in Egypt in the 3rd and 4th Centuries, and in

the West, St. Benedict (c. 480-544) drew up a religious rule which was eventually followed by almost all Roman Catholic religious communities until the rise of the friars in the 13th Century.

The Benedictine monasteries were centres of culture and civilization in Europe in the "Dark Ages," and were largely responsible for handing on the legacy of the classical world to modern times. Among the principal offshoots of the Benedictines, or *Black Monks* (so called from the colour of their habit) were the Cistercians (*White Monks*) and Cluniacs. The mendicant orders of friars, Franciscans, Dominicans, Carmelites, etc., which sprang up in the 13th Century, and the later religious communities of modern times, including the Jesuits, are not strictly monastic, as their members move from place to place as ordered by their superiors; but the general basis of their life is similar.

The English monasteries were suppressed under Henry VIII., but in the 19th Century the monastic life was revived in the Anglican Church, and there are now various Anglican and Roman Catholic monasteries for both sexes in the British Isles. Buddhist monasteries exist in large numbers in all Eastern countries, and have many points of resemblance to the Christian establishments of the West.

Monastir, or **Bitolj**, town in Yugoslavia, at the foot of Mt. Peristeri in Macedonia. The Turkish army surrendered here to the Serbs in 1912. The Serbs surrendered it to the Germans in 1915, retaking it in 1916. Its manufactures include carpets and skins. Pop. 33,000.

Moncton, a city and port of New Brunswick, Canada, 90 m. NE. of St. John. It has an excellent harbour, a timber trade, and manufactures woollen and cotton goods; oil and natural gas are found near by. Pop. 20,700.

Mond, Ludwig, technical chemist and inventor, born in Cassel, in Germany; was a pupil of Kolbe and Bunnen; settled in England from 1862, and made important additions to chemical-industrial processes and products; with Sir John Brunner he started the alkali firm of Brunner, Mond and Co., afterwards merged in Imperial Chemicals, Ltd. (1839-1909).

Mond Gas, a mixture of nitrogen, and carbon monoxide, obtained by the action of air and steam on coal dust; it is used for gas engines (q.v.).

Monel Metal, one of the principal alloys of nickel, contains 65 per cent. of nickel, 32 per cent. of copper, with small amounts of iron, manganese, carbon, sulphur, and silicon. It is essentially a solid solution of copper in nickel; it has great tensile strength, is not seriously weakened, even at 400°C., can be cold-worked without becoming brittle, is not appreciably corroded by the air, and withstands the action of sea-water, alkalis and ammonia. It is therefore widely employed in a great variety of industries.

Monet, Claude, French artist. After studying under Gleyre, he joined the Impressionist group; visited England in 1870, met Constable and Turner, and painted several pictures of London scenery. Among his better-known works are "Le Lac aux Nymphéas," and the "Saulx Pleureur." His work is represented in the Tate Gallery. (1840-1926).

Money, any form of token, usually in metal or paper, used by general agreement as a means of exchange. The earliest form of money seems to have been the cowrie shell, still so used among some primitive peoples; but beads, stones, wheat, livestock, and anything with known and realizable value may be, and has been, so used. Coined money,

generally of copper, silver and gold, came into use among the peoples of the Near East before the classical epoch; and paper notes have been used in the Far East, especially China, for at least 1,500 years. But no theory of money was worked out until modern times.

Nowadays a monetary system is largely dependent on the manipulation of credit. Since, with the World War, gold coinage has practically disappeared from circulation, money is very rarely of the kind which economists call *full-bodied money* (i.e., coins the nominal value of which is practically equal to the actual value of the metal of which they are composed). The major part of the money in common use (i.e., legal tender) is token money, whether metal or paper. In addition to common money, consisting of legal tender of this kind, and also subsidiary money (i.e., shillings and pence), another class of money is bank money, or cheques, the quantity of which is regulated by the bankers.

The modern monetary system entails the proper management of the different kinds of money in accordance with established customs and laws. In Great Britain, for all practical purposes, the Government may be considered to have a monopoly in the printing and issue of paper money, which is governed strictly by the amount of gold and first-class securities held by the Bank of England, subject to a limited free issue called the fiduciary issue. The value of money fluctuates, but the structure of modern life, depending as it does largely on credit, is upset unless a certain degree of stability is maintained.

Moneylender, defined by law as a person whose business is that of moneylending or who advertises or announces himself or holds himself out in any way as carrying on that business. Moneylenders must register their names and addresses, and act only from the registered address. By the Moneylenders Act of 1927, moneylenders must have a licence, may not canvass, or send information by post except on request, may not charge compound interest, or interest exceeding 48 per cent. per annum, nor may they make charges on loans.

Money Market, the sphere of operations of lenders and borrowers of short-term loans, centralized round the Bank of England. The chief lenders are the Joint Stock Banks, and certain great discount and financial houses; the chief borrowers, the British Government, overseas Governments, and brokers engaged in buying and selling bills of exchange.

Money Wort, a name given to two order Ichnulaceae, creeping Junny or Loosestrife (*Lysimachia nummularia*); has creeping stem, heart-shaped leaves, short one-flowered stalks, flowers bright yellow; (2) Cornish Moneywort, Pennywort or Pennywort (*Sibthorpia europaea*), with small kidney-shaped leaves and pink flowers.

Mongolia, a large area of Central Asia of indefinite boundaries and uncertain political allegiance, S. of Siberia and NW. of China. It is mainly under Russian influence. Outer Mongolia (pop. about 600,000) being ruled by a Soviet government. Inner Mongolia is theoretically under Chinese control, but largely in fact under Japanese influence. The people of Mongolia are mainly Lamaist Buddhists. The chief town is Urga, with pop. about 100,000.

Mongols, a nomad people of the Central Asiatic steppes who first rose into prominence under their ruler Genghis Khan in the 12th Century; he commenced a career of conquest which made him master of all Central Asia; his sons divided his empire, and pursued his conquests. A Mongol emperor seized the throne of China in 1234, and

from this branch sprang the great Kublai Khan, whose house ruled an immense territory, 1294-1368. Another section pushed westwards as far as Moravia and Hungary, taking Budapest in 1241. A third but later movement was that of Baber, who conquered India, and founded the Great Mogul line, 1519. The surviving Mongoos, in Sinkiang and the lands bordering on Tibet, are Buddhists of the Lamaist school, and still largely tent-dwelling nomads.

Mongoose, a genus (*Herpestes*) of carnivorous animals native to India and Africa (especially Egypt). They are grey in colour, about 18 in. long and have a long tail, narrow head, and body like a weasel's. The most important species is the Egyptian Mongoose (*Herpestes ichneumon*) which preys on rats and snakes, eats eggs of crocodiles and birds, and is frequently domesticated. See also *Ichneumon*.

EGYPTIAN MONGOOSE

Monica, St., the mother of St. Augustine, as a result of whose prayers he became a Christian; patron saint of mothers. Festival, May 3.

Monism, the name given to the principles of any system of philosophy which resolves the phenomenal manifold of the universe into a real unity, in opposition to dualism (*q.v.*).

Monitor, a genus of amphibious (though usually in actual fact terrestrial), carnivorous lizards found in Africa, Australia and Asia, of which the several species include the Komodo, of the Dutch East Indies, growing up to 7 and 8 ft. long; the Banded or Water Monitor (Bengal and Malay); and the Nile Monitor, supposed to give warning of the approach of crocodiles.

KOMODO MONITOR

Monitor Ship, a shallow, heavy-duty, armed ironclad used for coastal bombardment and similar operations. Their guns are carried in revolving turrets on an open deck. The name is derived from a ship built for Federal use in the American Civil War. They played a considerable part in the World War, and the British Navy at present (1938) has three such ships in commission.

Monk, George, first Duke of Albemarle, British general and admiral, born in Devonshire; spent his youth in the Dutch wars, and returned to England to side with Charles I. against the Parliament, was captured in 1644, and spent two years in the Tower. Changing sides he fought at Dunbar in 1650, and was entrusted with the command of operations in Scotland afterwards. In 1653 he twice beat Van Tromp at sea. From 1654 till 1660 he was Governor of Scotland. After Cromwell's death he negotiated with Charles II., and at last brought him to England and set him on the throne; was Governor of London in the plague year, and was again admiral in the Dutch wars of 1666. (1608-1670).

Monkey, general name for the mammalian, man, the anthropoid apes, and lemurs. They are divided into two main families, distinguished by the formation of the nose, and named Cercopithecidae and Cebidae. In the Cercopithecidae, inhabitants of the warmer parts of Asia and Africa, the nostrils look downward and are set close together;

the head is oblong; and the anterior limbs which are longer than the posterior, have distinct thumbs; the tail is never prehensile, and in some species does not exist. The Cebidae, inhabitants of the New World, are characterized by long prehensile tails; the head is round and nostrils wide, separated by a broad cartilaginous septum, with the apertures directed outwards; the anterior limbs have no distinct thumbs.

Monkey Puzzle, or **Chile Pine** (*Araucaria imbricata*), an evergreen pine tree with sharp pointed leaves, native to Chile, widely grown in England as an ornamental garden tree, looking best in isolation.

Monkshood. See *Aconite*.

Monmouth, James, Duke of, illegitimate son of Charles II. of Great Britain, born in Rotterdam; was admitted to Court after the Restoration, and received his title in 1663. His manners and his Protestantism brought him popular favour, and plots were formed to secure the succession for him. Forced to fly to Holland in 1683, he waited till his father's death, then planned a rebellion and landed in Dorsetshire, 1685, was soon overthrown at Sedgemoor, taken prisoner, and executed. (1649-1685).

Monmouthshire, county of the West of England, but for administrative purposes considered as part of Wales, lying N. of the Severn estuary, between Glamorgan and Gloucestershire; is low and flat in the S., but otherwise hilly, and is traversed by the Usk R.; more than half the surface is under permanent pasture; the Wye and Usk valleys are renowned for beautiful scenery; there are extensive coal and iron mines in the W.; the largest town is Newport, the county town, Monmouth (pop. 4,900). Area of county, 463 sq. m. Pop. 435,000.

Monophysites, a body of Christian heretics of the 5th Century, who maintained that the divine and human natures in Christ were united in one, so that He was neither wholly divine nor wholly human, but in part both; the Abyssinian, Coptic, Jacobite and Armenian churches of the present day are Monophysite in belief.

Monoplane,

an aeroplane with only one main supporting wing or plane surface, as opposed to a biplane or triplane, with two or three respectively. See *Aviation*.

MONOPLANE

Monopoly,

control of the supply of a commodity resulting from an agreement whereby the interests of buyers or sellers are unified; in either case it involves price control, subject to the discretion of either the buyers or sellers acting in concert. Pure monopoly is the direct antithesis of pure competition, but the consumers' power of substitution generally prevents a pure sellers' monopoly. The granting of monopolies was a feature of economic life in the later Middle Ages, but in more recent industrial developments, such as railways and oil, monopolistic tendencies have assumed larger proportions, legislation being necessary to protect the public interest.

Monothelism, belief in the existence of only one God, even though, as maintained by orthodox Christians, the Divine Essence is manifested in more than one person; Judaism, Islam and Christianity are the chief monotheistic religions.

Monotremata, or egg-laying mammals, the lowest order of mammals, consisting of two families only, the *Echidnidae* (the spiny ant-eaters) and the *Ornithorhynchidae* (Platypus), which hatch their young from eggs and in which the females suckle their young through bare patches on the skin, being devoid of mammae. They are confined to Australia and the neighbouring islands.

Monotype, a protected trade name for type-setting, by means of composing and type-casting machines worked by compressed air. Manipulation of the keyboard on the composing machine causes perforations to be punched in a roll of paper, each pair representing a letter. The paper is then unrolled on the caster. Compressed air passing through the perforations so adjusts the mechanism that each letter is impressed from the matrix on a new lead body, formed in a mould. There is also a device for justifying the line, i.e., equalising the spaces so that each line is the same length. About 150 spaces and letters may be cast per minute. See also *Typography*.

Monreale, a city of Sicily, 5 m. from Palermo. The local products include wines, oil, oranges, and lemons. Nearby occurred the massacre of the French on Easter Sunday, 1282, known as the Sicilian Vespers. Pop. 16,500.

Monroe, James, fifth President of the U.S.A., born in Virginia, of Scottish descent; left college to join Washington's army; entered Congress in 1783. He assisted in framing the Constitution, and sat in the Senate 1790-1794. His diplomatic career in France was marked by the purchase of Louisiana from that country in 1803. He was governor of Virginia three over, and Secretary of State till 1817; then followed two terms of the Presidency, which saw Florida acquired from Spain, 1819, the delimitation of the slave limit by the Missouri compromise, the recognition of the South American Republics, and the statement of the "Monroe doctrine" (q.v.). (1758-1831.)

Monroe Doctrine, the principle first enunciated by President James Monroe (q.v.), that no extension of the influence or political systems of Europe in the affairs of the American continent can be allowed by the United States.

Monrovia, capital of the Republic of Liberia, on the African coast, at the mouth of the St. Paul R. Pop. 10,000.

Mons, a town in the province of Hainault, Belgium, on the R. Trouille, an important colliery centre. The first and last battles of the World War were fought here. On Aug. 23, 1914, the British Expeditionary Force met superior German forces and were compelled to retreat; the town was recaptured by the Canadians on Nov. 11, 1918, a few hours before the "Cease Fire." Pop. 36,600.

Monsoon, originally denoted a periodical wind in the Indian Ocean, which blows from SW. from April to Oct., and from NE. from Oct. to April; now denotes any wind regularly recurring with the seasons.

Monstrance, an article of altar furniture used in Roman Catholic (and some Anglican) churches, in which the reserved Host is exposed for veneration or carried in procession. It is made of gilded metal.

Montagu, Edwin Samuel, British statesman; entered Parliament as a Liberal in 1906, held minor government offices, and from 1917 to 1922 was Secretary for India, in which capacity he visited India and drew up a scheme for self-government embodied in the Montagu-Chelmsford report. (1879-1924).

Montagu, Lady Mary Wortley, English friend of Pope; best remembered for her *Letters*, written while travelling in the East, whence she introduced into England inoculation for smallpox (q.v.). (1689-1762).

Montaigne

Michel Eyquem de, French author and moralist, born in the Chateau of Montaigne, Périgord; a lawyer by profession, lived mainly at Bordeaux. His fame rests on his *Essays*, in which he records his observations of mankind: a translation of these by Florio is the one book we know for certain to have been in the library of Shakespeare. (1533-1592.)

MICHEL
DE MONTAIGNE

Montalembert, Charles, Comte de, a French politician, born in London, son of a French emigrant; in French politics from 1835 to 1857, advocating educational reforms; author of several works on English, French and contemporary history, and of the *Monks of the West*, his chief work. His other works include a *Life of St. Elizabeth of Hungary*. (1810-1870).

Montana, NW. State of the U.S.A., on Idaho and the Dakotas; has a mild climate, and a soil which, with irrigation, produces fine crops of grain and vegetables. Cattle-raising is profitable, and much wool is produced, but the chief industry is mining. In the Rocky Mts., which occupy a fifth of the State, especially for copper, zinc, coal and precious metals. The Missouri and the Columbia Rs. rise in Montana, and the Yellowstone traverses the whole State. The State was admitted to the Union in 1889, with Helena as capital. Area, 147,000 sq. m. Pop. 538,000.

Montanism, a Christian heresy which arose in the 2nd Century; derived its name from a Phrygian, Montanus, who insisted on the permanency of the spiritual gifts vouchsafed to the primitive Church, and a return to the severe discipline prevailing in it.

Montauban, town in dept. Tarn-et-Garonne, France; formerly a Huguenot stronghold; has a cathedral, and manufactures wool and silk. Pop. 28,900.

Mont Blanc, in the Graian Alps, on the Italian frontier, the highest mountain in Europe (15,782 ft.), the upper half under perpetual snow; has 56 magnificent glaciers, including the Mer-de-Glace. It was first climbed by Balmat and Paccard in 1786, and since then has been many times ascended.

Montcalm de Saint Veran

Louis Joseph, Marquis de, French general, born near Nîmes; after service on the continent, was sent in 1766 to command the forces in Quebec against the English. The capture of Fort Oswego and William Henry and the defence of Ticonderoga were followed by the loss of Louisbourg and Fort Duquesne and the retreat on Quebec, where, surprised by Wolfe in 1759, he was totally defeated, and Canada lost to France; both generals fell, mortally wounded. (1712-1759).

Mont Cenis, an Alpine peak (12,000 Italian frontier and the adjacent pass, over which a road was constructed (1802-1810), and near which a railway tunnel was pierced (1857-1870) at a cost of £3,000,000.

Montebello, a village of Italy in the province of Pavia, where in 1800 the Austrians were defeated by the French under Bonaparte. Pop. c. 4,000.

Monte Carlo, town in Monaco, 1 m. N.E. of the capital; visited by 400,000 persons annually, largely for the sake of its Casino and gaming rooms. The Casino is held by a company, and stands on ground leased from the prince. Pop. 9,500.

Montenegro, a former Balkan State, less than half the size of Wales, lying in a wild, mountainous region between Herzegovina and Albania, and touching the Adriatic Sea with its SW. corner; joined Serbia in the World War of 1914, decided to enter the Kingdom of Yugoslavia, its king, Nicholas, being deposed. It had defended its independence against Turkey almost continuously since 1389.

Monterey, (1) a seaside resort in California, U.S.A., on Monterey Bay, 95 m. S.E. of San Francisco. It was the capital of California when the State was a Mexican province. Pop. 9,140. (2) A city of Mexico and capital of the state of Nuevo Leon. It has smelting and brewing industries, and is a winter resort. Pop. 137,400.

Montespan, *Françoise, Marquise de*, mistress of Louis XIV., a woman noted for her wit and beauty; bore the king seven children; was supplanted by Madame de Maintenon (*q.v.*); passed her last days in religious retirement. (1641-1707).

Montesquieu, *Charles, Baron de*, French philosopher, born in the Château La Brède, near Bordeaux; author of two still famous works, *Lettres Persanes* (1721) and *L'Esprit des Loix* (1748). (1689-1755).

Montessori, *Maria*, Italian educationist, born at Chiaravalle, near Ancona; the first woman to graduate (1894) as M.D. at University of Rome; Directress, 1898-1900, of the Scuola Ortofrenica, for feeble-minded children; here she first worked out her famous *Montessori* method of training young children, which has been successfully applied in schools in England. (1870-).

Monteverdi, *Claudio Giovanni Antonio*, Italian composer, born at Cremona; went to Venice in 1613, and was associated with the opera-house there from its opening, 1637. He was one of the founders of modern musical method. Operas: *Orfeo*, 1607; *Arianna*, 1608; *Il Ritorno d'Ulisse*, 1641; *Pompea*, 1642. (1567-1643).

Montevideo, capital and largest city of Uruguay on the N. shore of the Río de la Plata, 130 m. E. of Buenos Aires; has an important harbour, and trades in wheat, wool and livestock. The main industry is beef-salting. There is a cathedral, a university, and a considerable British community. Pop. 683,000.

Montez, *Lola*, an adventuress of Spanish descent, born in Limerick, her real name being Maria Gilbert; contracted a number of marriages, which were broken off one after another; took to the stage; attracted the attention of King Louis of Bavaria, who made her a countess; left Europe on political trouble arising, and settled in United States, where she took to lecturing, and ended by trying to reclaim fallen women, and died at Long Island. (1818-1861).

Montezuma II., the last of the Mexican emperors; ascended the throne in 1502; was imprisoned by Cortez on the latter's entry into Mexico city, but died the following year. (1466-1520).

Montfort, *Simon de*, son of a French count; came to England in 1230, where he inherited from his grandmother the earldom of Leicester; attached to

Henry III. and, married to the king's sister, he passed over in 1253 to the side of the barons, becoming a steadfast champion of popular liberties. After the King's breaches of the Provisions of Oxford, he took up arms against the King's forces in 1263; defeated the king at Lewes, and taking him and his son prisoner, governed England for a year (1264-1265); he summoned a parliament, but the barons began to distrust him; Prince Edward, having escaped from captivity, joined them, and overthrew Simon at Evesham, where he was slain. (c. 1206-1265).

Montgolfier Brothers, French inventors of the balloon (see *Aeronautics*), who made their first ascent in Paris in 1783, *Joseph* (1740-1810), and *Etienne* (1745-1799).

Montgomery, capital of the State of Alabama, U.S.A.; an important centre of the cotton trade, with a manufacture of fertilisers. Pop. 66,000.

Montgomeryshire, a N. Wales county, surrounded by Merioneth, Cardigan, Radnor, Salop, and Denbigh; is chiefly a stretch of mountain pasture land, which attains to 2,500 ft. at Plynlimon, and in which the Severn rises; but in the E. are well wooded and fertile valleys. There are lead and zinc mines and slate and limestone quarries. There is some flannel manufacture at Newtown. Area, 797 sq. m. Pop. 48,462. The county town is *Montgomery*. Pop. 900. The largest, Welshpool. Pop. 5,600.

Month, a division of the year either according to the phases of the moon (the lunar month, of which there are 13 per year) or into twelve roughly equal parts. In the modern calendar each month has 31 days, excepting April, June, Sept. and Nov., each with 30, and Feb., with 28 (or in leap years 29). The lunar month is not constant in length; its average is 29.53 days.

Montmartre, a northern district of Paris, situated on a hill on the summit of which stands the church of the Sacré Cœur. The district is largely resorted to by foreign visitors to the city by reason of its many places of entertainment.

Montpellier, town in dept. Hérault, France, on the *Lez*, 30 m. SW. of Nîmes; has a cathedral and university; the latter famous in the 16th Century; it manufactures wine, confectionery, and chemicals. Pop. 90,800.

Montreal, largest city of Canada, in Quebec province, on an island in the St. Lawrence, at the confluence of the Ottawa R., 110 m. above Quebec; an important railway centre, and the world's largest inland port; ships grain, and has many manufactures, including foodstuffs, boots, shoes, clothing, machinery, paper and hardware; the population is mainly French-speaking; there is a cathedral, two universities (McGill, Protestant and *Montreal*, Catholic), and many other public institutions. Founded in 1642 by the French on the site of the Indian town of Hochelaga, first visited by Cartier, Montreal passed to Britain in 1760; in 1776 it was occupied for a short time by the revolting American colonies, and was for a while, until 1847, the capital of Canada. Pop. 819,000. (*Greater Montreal*, 1,000,000).

Montreux, district on Lake Geneva, Switzerland, at the foot of the Alps, 11 m. from Vevey. There are mineral springs, and it is a winter sports centre. The Dardanelles remilitarization conference was held here in 1936. Pop. 20,000.

Montrose, burgh and seaport of Angus, Scotland, 35 m. S. of Aberdeen; has important fisheries, carries on timber trade with Baltic and Canadian ports, and spins flax, makes ropes and canvas. Pop. 10,200.

Montrose, James Graham, first **Montrose, Marquis of**, born in Old Montrose, and educated at St. Andrews; in 1637 he joined the Covenanters, and took up arms in their cause. Suspected of treachery, he was imprisoned for a year, 1641-1642, in Edinburgh Castle, whereupon he joined the side of the king. In 1644-1645 he defeated the Covenanters near Aberdeen, at Inverlochy and Kilsyth; but routed by Leslie at Philiphaugh he lost the royal confidence, and next year withdrew to Norway. An unsuccessful invasion in the Stuart cause in 1650 ended in his defeat at Invercarron, capture, and execution. (1612-1650).

Mont St. Michel, islet off the France, remarkable for the church of its ancient monastery, perched on top of the high rock, and one of the most remarkable extant specimens of medieval architecture.

Montserrat, island of the Leeward Indies, discovered by Columbus in 1493. The English colonised it in 1632 and the French took it in 1664, to return it to England in 1668. In 1782 it capitulated to the French, and became British again in 1784. Sugar and limes are produced. Area, 32 sq. m. Pop. 12,000.

Moody, Dwight Lyman, American evangelist, born at Northfield, Mass.; settled in Chicago, where he began his career as an evangelist, associated with Ira D. Sankey; visited Great Britain in 1873 and 1883 with considerable results. He assisted Sankey in the compilation of *Sacred Songs and Solos*. (1837-1890.)

Moody, Helen Wills, American lawn tennis player, born at Berkeley, California, winner of the Women's U.S.A. Singles Championship annually from 1923 to 1931 (except in 1926 and 1930), and co-winner of the Doubles Championship in 1924, 1925, 1928, and of the Mixed Doubles Championship in 1924 and 1928; winner of the Singles Championship at Wimbledon on seven occasions, the last in 1938. (1906-).

Moon, a satellite which revolves round a planet, especially the sole satellite possessed by the earth. Mercury and Venus have no moon, Mars has 2, Jupiter 11, Saturn 10, Uranus 4 and Neptune 1. The terrestrial moon is distant about 240,000 m. from the earth. It is a dead world, with a diameter of 2,160 m., and a surface pitted with craters, often of immense size; thus the crater Tycho is over 50 m. in diameter and 3 m. in depth. Whether these craters were formed by volcanic action in former ages is not definitely known; they may have been produced by the impact of meteors.

Since the moon revolves on its axis in the same time as that which it takes to revolve around the earth, it always presents the same face to us; but there is no reason to suppose that the hidden face is very different from that which we can see. The moon is devoid of air and water, and since the lunar day is roughly 4 weeks, there must be a very great difference between the temperature of the surface during the fortnight of illumination and that during the fortnight of darkness.

Another consequence of the lack of any atmosphere is that the sky, even during the day, must appear completely black except for the brilliant disc of the sun and the bright points of light of the stars, the latter being as easily visible by day as by night, owing to the fact that the solar light is not dispersed over the whole sky as it is upon the earth. When the moon enters the shadow of the earth, a lunar eclipse is caused, while when the moon passes between the sun and the earth a solar eclipse takes place. The moon is the chief agent in the formation of our tides, the waters being drawn towards it by gravitation.

Moon, **Mountains of the**, a range of mountains supposed by Ptolemy and early geographers to stretch across Africa from Abyssinia to Guinea, now variously identified as Mount Kenya, Kilima-Njaro, Ruwenzori, &c.

Moonstone, a variety of felspar, of an opaline appearance, its transparency being clouded by pearly reflections. It is often set as a gem.

Moore, George, Anglo-Irish author; after studying art in Paris, he produced his first volume of verse at the age of 22; followed by novels, plays, and books of memoirs, among them *Esther Waters*, *Hail and Farewell*, and *The Brook Kerith*. He was a prominent figure in the revival of Irish literature at the beginning of this century. (1853-1933).

Moore, Sir John, British general, born in West Indies, Ireland, and elsewhere, but is best remembered for his famous expedition to Spain in 1808, against the French, in which he was slain at Coruña. (1761-1809).

Moore, Thomas, Irish poet, born in Dublin, studied at Trinity College; went to London with a translation of *Anacron*, which gained him favour and a valuable appointment in the Bermudas in 1803; began his *Irish Melodies* in 1807; in 1817 appeared *Lalla Rookh*, a collection of Oriental tales, and in 1818 a satiric piece, *The Fudge Family*, and he published a *Life of Byron* in 1830. (1779-1852).

Moorhen, an aquatic bird (*Gallinula chloropus*) found on rivers and ponds in the banks of which it nests. It is a diver, and can swim under water; not web-footed; colour, black or near-black with white head.

MOORHEN

Moors, a general term for

North African peoples, whether of Arab or Berber stock; Mohammedans since the Arab conquest of 647. Moorish peoples seized and settled in Spain early in the 8th Century, and introducing a civilisation further advanced than that in Europe generally with respect to science, art, and industry alike, maintained a strong rule till the 11th Century; after which the Christians gradually recovered the Peninsula in a series of wars, ending with the fall of Granada, the last Moorish stronghold, in 1492, the last Moorish inhabitants being banished from the country in 1609. In earlier English literature the word Moor was sometimes loosely used for any African or dark-skinned person of whatever race, especially if a Mohammedan by religion.

Moose, a large deer (*Alces machilis*) found in N. America, resembling the European elk. The neck is short, thick and unadorned, muzzle comparatively long, ears broad. The males are distinguished by spreading palmated antlers, terminating in short branches.

Moose Jaw, a city of Saskatchewan, Canada, on the Moose-jaw river. There are flour mills, steel works, and an airport. Pop. 18,800.

Moradabad, or **Muradabad**, a town in British India, the United Provinces, about 380 m. from Allahabad. Products include metal goods, rice and cotton. Pop. 110,600.

Moraine, the debris deposited by a glacier, consisting of the fragments of rock which it has eroded; lateral moraines are those found at the edges of the glacier, terminal those deposited at the end, and medial those formed from the lateral moraines when two glaciers unite.

Morality (Play), a didactic drama, later in time than the miracle plays and mysteries, in which the places of saints and Biblical personages were taken by characters representing different virtues and vices, and the story was of an allegorical nature. Becoming popular about the end of the 14th Century, they were the immediate precursors of the English secular drama.

Moratorium, an agreement between creditors and debtors to postpone the payment of a debt; the term is usually applied to agreements regarding the debts of states or large corporations, as in the case of the moratorium granted to Germany in 1931 by her creditors for reparations payments.

Moravia, a territory now part of the Moravian and the Carpathian Mts., with Silesia on the N., Hungary on the E., Lower Austria on the S., and Bohemia on the W.; is mountainous, with lofty plains in the S., and is watered by the March, a tributary of the Danube; the valleys and plains are fertile; oats, rye, beetroot, flax and hemp are grown; cattle and poultry rearing and bee-keeping occupy the peasantry; sugar, textiles, and tobacco are the chief manufactures; there are coal and iron mines, graphite and meerschaum are found; the capital is Brünn (Brno), with woollen and leather industries. Associated with Bohemia in 1029, Moravia passed with that country to Austria in 1526, and became part of Czechoslovakia on its formation after the World War in 1918; the inhabitants are two-thirds Slavs and one-third German, and are mostly Roman Catholic. Area, 86,000 sq. m. Pop. c. 3,000,000.

Moravians, Brethren, or United Christian sect which traces itself back to a Bohemian community of the 15th Century, contemporary with Huss (q.v.). They have been foremost in mission work in many countries, and are represented in England to-day by about 3,500 members. Their position is strongly evangelical.

Moray (formerly Elgin), a northern Scottish county, fronting the Moray Firth and lying between Banff and Nairn, mountainous in the S. but flat to the N., watered by the Spey, Lossie, and Findhorn. Agriculture, stone-quarrying, distilling, and fishing are the staple industries; has some imposing ruins and interesting antiquities. Area, 477 sq. m. Pop. 40,800.

Moray, James Stuart, Earl of, illegitimate son of James V. of Scotland, and half-brother of Mary, Queen of Scots; was from 1556 the leader of the Scottish reformation party and became Mary's chief adviser in 1561. On her marriage with Darnley he made an unsuccessful attempt at rebellion, and had to escape to England, 1559, and later to France in 1567. He was almost immediately recalled by the nobles and appointed regent during Mary's imprisonment; next year he defeated at Langside the forces which had rallied round her, but was shot when riding through Linlithgow. (1531-1570).

Morbihan, a department of France, in Brittany, bordering on the Bay of Biscay; its area is 2,736 sq. m. The district is hilly in the N.; much of the remainder is heath, on which horses, cattle and sheep are reared. The crops include grain, hemp, flax and apples. The capital is Vannes; the largest town Lorient. Pop. 542,250.

Mordant, one of various substances, e.g., alum, copperas, mixed into colour dyes, which in calico printing and similar processes serve to fix the colour to the fibrous material.

Mordecai, a Persian Jew of the 5th Century B.C., whose behaviour provoked Haman, the favourite of King

Ahasuerus, to plot the destruction of the Jews; but Mordecai gained Ahasuerus' favour by revealing a plot against him, and secured Haman's execution on the gallows the latter had prepared for Mordecai. The story is told in the Biblical book of Esther, and is commemorated by the annual Jewish feast of Purim.

More, **Hannah**, English authoress, born near Bristol; wrote dramas, a novel entitled *Cecilia in Search of a Wife*, and a tract, *The Shepherd of Salisbury Plain*. (1745-1833).

More, **Sir Thomas**, Chancellor of England, friend of Erasmus, and the author of *Utopia*, an imaginary commonwealth; succeeded

Wolsey as Chancellor, but resigned because he could not sanction the king's action in the matter of the divorce, and was committed to the Tower for refusing to take the oath of supremacy. Thence after 12 months he was brought to trial and sentenced to be beheaded; one of the wisest and best of men, he was canonised by the Catholic Church in 1935. (1478-1535).

SIR THOMAS MORE

Morea, is the modern name of the ancient Peloponnesus, the peninsula, larger than Wales, which constitutes the southern half of Greece, and is joined to the mainland by the Isthmus of Corinth, less than 4 m. broad. Area, 8,514 sq. m. Pop. 1,045,000.

Moreau, **Jean Victor**, French general, born in Morlaix; served with distinction under the Republic and the Empire; was suspected of plotting against the latter with George Cadoudal, and banished; went to America, but, returning to Europe, joined the ranks of the Russians against his country, and was mortally wounded by a cannon ball at Dresden. (1761-1813).

Morecambe, port and holiday resort of Lancashire, England, on Morecambe Bay. There are ship-breaking yards and fisheries. Pop. (with Heysham) 24,600.

Moresnet, a small territory on the German border, assigned to Belgium after the World War in compensation for the destruction of her forests during hostilities.

Morgan, **Charles Langbridge**, English novelist and critic; served in the Navy from 1907; was interned in Holland from 1914 to 1918; in 1926 became dramatic critic to *The Times*. His remarkable novels *The Fountain* and *Portrait in a Mirror*, won him fame. (1894-).

Morgan, **Sir Henry**, British buccaneer and colonial governor; born in Glamorgan; a leader among the buccaneers of the West Indies, he ravaged Cuba, and the Central American mainland, sacking Panama, 1671; was knighted by Charles II. and made Lieutenant-governor of Jamaica. (1635-1688).

Morgan, **John Pierpont**, American financier. Wealthy by birth, he took early to finance and came to London as agent for an American company; he founded the firm named after him, carried through large industrial deals, including the establishment of the U.S. Steel Corporation and the Atlantic Shipping Trust, and was a patron of art and learning. (1837-1913).

Morganatic Marriage, a marriage between a male member of a reigning house and a woman of inferior social rank, which, though

legitimate, confers no right of succession on the children of the marriage, and no special social status on the wife. Such marriages were contracted on occasion by the princes of the former German Empire.

Morland, George, British painter, born in country life and animal subjects, of which his "Inside of a Stable" is in the National Gallery, while others, such as "The Gypsies," are popular as engravings. (1763-1804).

Morley, borough in the W. Riding of Yorkshire, England, 3 m. N. from Batley. The manufacture of woollen goods is carried on. Pop. 39,600.

Morley, Edward Williams, American chemist; professor at the Western University, U.S.A.; carried out accurate determinations of the atomic weights of hydrogen and oxygen, and was associated with the Michelson-Morley experiment (q.v.). (1838-1923).

Morley, Henry, English man of letters; born in London; assisted Dickens on *Household Words* and *All the Year Round*; edited the *Examiner*; wrote several biographies, *English Writers* (1864), *A First Sketch of English Literature* (1873), edited Morley's Universal Library. (1822-1894).

Morley, John Derry, 1st Viscount, British author and politician. Born in Blackburn, Lancs., his early career was spent in journalism and authorship, writing lives of Burke, Voltaire, Rousseau, Diderot, and Cobden, and the editing of the *English Men of Letters* series. As an editor he exerted considerable influence on politics; in 1883 he entered Parliament, became Secretary for Ireland, and was a member of all the Liberal Cabinets till 1914, when, disagreeing with the majority of the Cabinet regarding participation in the World War, he retired. He was raised to the peerage in 1908. (1838-1923).

Mormonism, a religious system initiated about 1830 by Joseph Smith, an American "prophet," who claimed to have received revelations from heaven as a result of which he discovered the *Book of Mormon*, a set of engraved metal plates buried by an angel in a hill. This record he claimed to have translated with divine aid, and on the basis of its content gained numerous adherents and founded "the Church of Jesus Christ of Latter Day Saints." Eventually the body settled in what later became the State of Utah, forsook the polygamy which was a part of their original creed, and became a flourishing community, active in missionary work and now numbering some 700,000 members, with another 120,000 adherents of a "Reorganised" Church which seceded from the parent body in 1860. They have several places of worship in Great Britain. They maintain an elaborate hierarchy, forbid the use of alcohol, tobacco and tea, are financed by a system of tithes, and claim to represent the restored tradition of early Christianity.

Morocco, an empire under French protection in the NW. corner of Africa, its coastline stretching from Algeria to Cape Nun, and its inland confines bordering on the French hinterlands. Two-thirds of the country is desert; much of the remainder is poor pasture land; the Atlas Mountains stretch from SW. to NE., but there are some expanses of level, fertile country. On the seaboard the climate is delightful, with abundance of the rain in the season; among mountains extremes prevail; S. of the Atlas it is hot and almost rainless. The mineral wealth is great, and phosphates, iron and lead are worked; the exports are cereals, phosphates, fish and wool; the chief industries are the making of leather, "Fex" caps, carpets, and the breeding of horses; the religion is Mohammedanism; telegraph,

telephone, and postal service are in European hands.

The country was taken from the Romans by the Arabs in the 7th Century, and has ever since been in their hands, but Berbers, Spaniards, Moors, Jews, and negroes also go to make up the population. Throughout this century there has been constant friction between France and Spain and the tribes struggling for independence under various leaders, of whom Abdel-Krim (q.v.) proved the most successful. The French zone (area 200,000 sq. m.; pop. 6,250,000) covers all the country except the area north of the R. Moulouya, which is the Spanish zone (area, 13,130 sq. m.; pop. 800,000), and the international zone around Tangier (area, 225 sq. m.; pop. 60,000). The chief towns are Fez, in the N., a depot for caravans from the interior; Morocco, in the S., near the Tensift R., 240 m. SW. of Fez; and Casablanca, capital of the French zone.

Morocco, a fine-grained leather of the skin of a goat or sheep, first prepared in Morocco; it is used for book-binding and the manufacture of slippers and fancy goods.

Morpeth, municipal borough and market town of Northumberland, England. There are remains of a medieval castle. Industries include brewing and malting and tanning and, in the neighbourhood, coal mining. Pop. 8,800.

Morpheus, in Greek mythology, the god of dreams, the son of Night and Sleep.

Morphia, or **Morphine**, an alkaloid prepared from opium, of which it is the active principle. Morphine hydrochloride is used in medicine as an anodyne, being of value in relieving pain and inducing sleep. It may be drunk in solution, or injected hypodermically, or as a suppository to relieve pulvic pain. Addiction to morphia as a drug results in general deterioration of the system.

Morphology, the branch of biology which deals with the structure of plants and animals.

Morris, William, poet, art-worker, and socialist, born in Walthamstow, near London, son and heir of a wealthy merchant; studied at Oxford, where he became the lifelong friend of Burne-Jones. He devoted his working hours to decorative art, in particular designing wall-papers; produced in 1858 *The Defence of Guinevere* and *Other Poems*, in 1867 *The Life and Death of Jason*, and from 1868 to 1870 his masterpiece, *The Earthly Paradise*. He rendered several Norse sagas into English; and was responsible for a great advance in the standard of English printing by his "Kelmscott Press," founded 1888. He was also in later life a pronounced socialist. (1834-1896).

Morris-Dance, a rustic merry-making, common in England after 1350 and recently revived as a "folk dance"; the chief characters, Maid Marian, Robin Hood, the hobby-horse, and the fool, execute fantastic movements and jingle bells fastened to their feet and dress. In origin it was a Moorish dance.

Morrison, Herbert Stanley, British politician and Labour leader, began life as an errand-boy; was, by turns, shop-assistant, telephone operator, and deputy manager of a newspaper's circulation department. Mayor of Hackney, 1920-1921. Entered London County Council as a member for E. Woolwich, 1922; so remained until, having become leader of the Council's Labour Party, he was made alderman, 1931. Leader of the Council since 1934. M.P. for S. Hackney, 1923-1924; 1929-1931; and from 1935. Minister of Transport, 1929-1931. Chairman, National Labour Party, 1928-1929. (1888-)

Morse, Samuel Finley Breesa, American inventor, born in Charlestown, Massachusetts; he gained some distinction as a sculptor, and in 1835 was appointed professor of Design in New York; electrical studies were his hobby. Between 1832 and 1837 he worked out the idea of an electric telegraph—simultaneously conceived by Wheatstone in England—and in 1843 Congress granted funds for an experimental line between Washington and Baltimore. The "Morse code" used for telegraphic work and signalling is named after him. (1791–1872.)

Morse Code, devised by Samuel Morse (q.v.) for the telegraphic system invented by him. The code is a combination of dots and dashes, a dash being three times as long as a dot. In telegraphy the dots or dashes are represented by electrical impulses of different duration.

Mortar, lime or cement mixed with sand and water, used in masonry to provide, primarily, a soft bed on which a stone mass can rest with evenly distributed weight; afterwards it hardens and acts as a binding agent. It also binds together walls consisting of small materials so that they form a solid mass. Cement mortar, containing both lime and cement, possesses greater resistance to frost and damp.

Mortar, **Trench**, a piece of ordnance capable of discharging shells at a high angle of elevation so that they fall almost vertically. They are often shorter than ordinary cannons, early mortars having a mouthpiece as wide as the length of the barrel.

TRENCH
MORTAR

Mortgage, a conveyance of property, usually land but sometimes chattels, as a security for debt, on condition that if the debt be discharged at the time and in the manner specified, the pledge shall be returned. Mortgages are classed as "legal," by which the property concerned is conveyed to the mortgagee, though the borrower or mortgagor usually remains in actual possession; or "equitable," by which a charge is created on the property concerned but the legal estate remains with the borrower. The same property may be subject to several mortgages, all those subsequent to the first being necessarily equitable mortgages, assuming the legal estate to have been conveyed by the first mortgage. The interest of the mortgagor is called the "equity of redemption." Formerly, when the mortgagee, after giving notice to the mortgagor to redeem the mortgage and repay the loan, foreclosed on the mortgagor's default, and sold the mortgaged property, the whole of the proceeds went to the mortgagee; but it has now long been the law that the mortgagor must be paid the residue of the proceeds after satisfaction of the loan plus interest. Recent legislation has also imposed various restrictions on the rights of mortgagees to enter into possession, or increase the rate of interest on mortgages. Building societies and insurance companies are now large holders of mortgages given by house purchasers, the mortgage being a mode of purchase by instalments of the price.

Mortmain ("dead hand"), a term used of property that has been bequeathed or granted to a corporate body, and was thus by feudal custom not subject to charges on transfer or inheritance. Various enactments in the Middle Ages restricted the right of granting or holding land "in mortmain," but under modern conditions these have largely been modified or have become obsolete.

Morton, James Douglas, Earl of, regent of Scotland; joined the Reforming party, was made Chancellor, took part in the murder of Rizzio, and was privy to the plot against Darnley; joined the confederacy of the nobles against Mary, fought against her at Langside, and became regent in 1572; became unpopular, was charged with being accessory to Darnley's murder, and beheaded in 1581.

Morton, John, English ecclesiastic, born in Dorset; Master of the Rolls from 1473; Bishop of Ely, 1479. Imprisoned by Richard III, he was taken into favour by Henry VII., and made Archbishop of Canterbury in 1486 and Lord Chancellor in 1487. His ingenuity in extracting "benevolences" from both the ostentatiously wealthy and the parsimonious originated the proverbial phrase of "Morton's Fork." (c. 1420–1500).

Mosaic, the decoration of a surface by inlaying coloured marble, glass, etc., in small cubes ("tessellæ"), so as to form a geometrical pattern or a pictorial design. The art was developed by the Greeks and Romans, by the latter especially in Christian times, notably in the Eastern Empire; some of the first extant work is to be seen in the churches of Ravenna, and at Santa Sophia, Istanbul, where the mosaics, whitewashed over after the Turkish conquest, are now (1938) being uncovered. Mosaics have been largely used in the decoration of the Roman Catholic Cathedral at Westminster.

Moscow, on the R. Moskva, in the centre of European Russia, 370 m. SE. of Leningrad. Until 1713 it was the capital of Russia, and it was made so again in 1918. It is a great industrial and commercial centre; its manufactures include textiles, leather, chemicals, and machinery. Besides the great cathedral there are many churches, palaces and museums, a university, library, picture-gallery, and observatory, and the enclosure called the Kremlin (q.v.), in which are the headquarters of the Russian Government. Since the 1918 revolution the city has grown very rapidly, and been considerably modernised, an underground railway having been built; among its most famous "sights" is the tomb of Lenin in Red Square. Thrice in the 18th Century the city was devastated by fire, and again in 1812, to compel Napoleon to retire. Pop. 3,700,000.

Moseley, Henry, British physicist; whose work at Oxford in 1913–1914 led to the recognition of the importance of atomic numbers; studied X-rays in their relations to the atom; killed in action at Suvla Bay, Gallipoli, 1915. (1887–1915).

Moselle, river, rising W. of the Vosges Mts., flows NW. through Lorraine, then NE. to join the Rhine at Coblenz, 315 m. long, two-thirds of it navigable; it passes in its tortuous course Metz, Thionville, and Trèves.

Moses, great Hebrew lawgiver, whose story is told in the Biblical books of Exodus, Numbers and Deuteronomy; was abandoned as a child and brought up by an Egyptian princess; led the Israelites out of Egypt and governed them for nearly 40 years during their wanderings in the Sinai peninsula; drew up the code of laws associated with his name; died at Mt. Pisgah.

Mosley, Sir Oswald Ernald, sixth Bart., English politician; served in France during the World War; elected to Parliament for Harrow as a Conservative, 1918; became an Independent member in 1922; joined the Labour Party, and was elected M.P. for Smethwick in 1926; was Chancellor of the Duchy of Lancaster in the Labour Government of 1929, but left it and the Labour Party after disagreements on policy, and founded the "New Party" in 1931, subsequently heading the British Union of Fascists. (1896–).

Mosque, a building erected by Mohammedans for purposes of devotion. Its essentials are a Kiblah, or niche showing the direction of Mecca; a fountain for ablutions; a pulpit; and a minaret for calling worshippers to prayer. No representations of living beings are permitted, but mosques are frequently beautifully decorated with geometrical designs and inscriptions in Arabic. Among the most famous mosques are the Mosque of Omar at Jerusalem and Santa Sophia at Istanbul. There are mosques in England at Woking and Southfields (London).

MOSQUE OF OMAR
(JERUSALEM)

Mosquito, the general name of the winged insects, of the Culicidae, or gnat family, of which many species exist, including a number in Britain. The larval stage is spent in water. Only the female adult is noxious, it being provided with a biting and sucking mouthpiece with which certain species (especially of the genus *anopheles*, q.v.) play a large part in the propagation of diseases such as malaria and yellow fever, the germs of which it injects into the blood stream. See also **Gnat**.

Mosquito Coast, a region in Nicaragua and Honduras extending along the Atlantic coast and inland for about 40 m., at one time claimed by Great Britain and the United States. The chief town is Bluefields.

Moss, a class of plants which, with the liverworts, compose the group Bryophyta, representing an early stage in plant development; they are higher than fungi owing to the presence of chlorophyll, but lower than ferns owing to the lack of fibrovascular tissue. Mosses are flowerless, reproducing themselves by spores. They are divided into three groups: the largest, Bryates, numbering over 500 species; an Alpine group, Andraceae; and a third group represented by a single genus, Sphagnum or bog-moss.

Mosai Bay, a natural harbour and Capetown, about 200 m. from the latter. The town is a port of call for steamers. Pop. 7,000.

Mosul, a city in Iraq, and capital of the liwa of the name, on the Tigris near the remains of Nineveh. It was held by Turkey until after the World War, and is chiefly important on account of its oil wells, connected by pipe-line with Haifa. Pop. (city) 97,000; (liwa) 393,000.

Moth, a sub-order of insects forming, with butterflies and skippers, the order Lepidoptera. There is no scientifically satisfactory distinction between butterflies and moths, although a general rule (to which, however, there are exceptions) is that the antennae of butterflies, but not moths, are enlarged at the tip. The antennae of moths are either fringed or thread-like. Most species fly only by night and are attracted by lights. When at rest, the wings of moths are not held upright, as are butterflies, but are wrapped round the body, or spread horizontally, or folded roof-like on the abdomen.

Mother-of-Pearl, or **Nacre**, a substance formed in layers against the inner side of the shell of the pearl oyster, being produced from the outer tissue of the mollusc during the formation of the pearl within this tissue or "mantle." It is used in the manufacture of buttons, knife handles, spectacles, etc., and for inlay work.

Motherwell (and **Wishaw**), a town of Lanarkshire, Scotland.

11 m. S.E. from Glasgow. It is an iron and steel manufacturing centre, and there are large bridge-building establishments. Pop. 64,700.

Motion, Laws of, the fundamental laws of dynamics, especially the three laid down by Newton, which are: (1) Every body continues in a state of rest, or of uniform motion in a straight line, except so far as it may be compelled by force to change that state; (2) change of motion is proportional to the force applied, and takes place in the direction of the straight line in which the force acts; (3) to every action there is always an equal and opposite reaction.

Motley, John Lothrop, American historian and diplomatist, born at Dorchester, Mass.; wrote the *History of the Dutch Republic*, which was published in 1856, the *History of the United Netherlands*, publishing the first part in 1860 and the second in 1868, and the *Life and Death of John Barneveldt* in 1874; was appointed the United States Minister at Vienna in 1861; and at St. James's in 1869. (1814-1877).

Motor Boats, boats driven by internal combustion engine.

In most small motor boats the engine used for propulsion is of the type used in motor cars (q.v.), but paraffin motors are occasionally used instead, and larger craft may be driven by Diesel engines. The propeller may be driven directly by the engine, but since the efficiency of a propeller decreases at speeds greater than about 1,000 revolutions per minute, a system of gears is frequently employed. The engine speed can then be greater, and, for a given power, a lighter motor can be built.

Cabin cruisers, 20 to 40 ft. in length, are usually driven at speeds up to about 10 knots, but if the fuel consumption is not an important consideration, much greater speeds (up to 80 knots or more) may be attained in specially designed racing boats. Outboard motor boats have their motors attached to the stern in such a manner that they are readily detachable. In racing boats the hydroplane principle is used, and the boats, when travelling at high speeds, raise themselves partly out of the water.

Motor Cars. Steam carriages ran on the streets of Paris before the end of the 18th Century, while they first appeared in London in 1803; these vehicles were not a practical proposition, and further experiment was discouraged by the law limiting the speed to 4 m.p.h. The modern motor-car dates from the invention of the petrol internal combustion engine by Daimler in 1884; further improvements in power and design were continuous from then onwards; in 1928 experiments were first made with motor vehicles having heavy oil engine, similar in type to the Diesel engine.

By far the greater number of power-driven vehicles in use on the road to-day are driven by internal combustion engines using petrol as a fuel. The energy used in driving a petrol engine is obtained by the combustion of a mixture of petrol vapour and air in the cylinders of the engine. After combustion has taken place the gases produced in the cylinder are at a high temperature and consequently at a high pressure, and this high pressure is applied to a piston, forcing it outwards. The motion of the piston is transmitted by means of a piston rod to a crankshaft, and thence by a system of gears to the driving axle of the vehicle.

The combustible mixture of air and petrol vapour is obtained by means of a carburettor. In this device the air which is flowing to the cylinders passes a narrow jet, evaporates, and is carried along by the stream of air. Each cylinder has two valves—an inlet valve through which the mixture of petrol vapour and air is introduced and an exhaust valve through which the

products of combustion are allowed to escape after they have done work in moving the piston.

Most petrol engines employ the four-stroke cycle. During the first stroke the piston travels downwards, leaving the space above the cylinder at a pressure lower than that of the atmosphere, and a mixture of air and petrol vapour is forced into the cylinder through the inlet valve. During the second stroke both valves are closed, and the piston moves upwards towards the top of the cylinder, compressing the mixture. When the piston has nearly reached the top of its stroke the mixture is ignited by means of an electric spark, which is passed between two electrodes in a sparking plug let into the head of the cylinder.

Both valves remain closed during the third stroke, and as the mixture burns, it exerts a high pressure on the piston, forcing it downwards. At the end of this stroke the exhaust valve opens, and as the piston returns to the top of the cylinder during the fourth stroke it sweeps out the products of combustion. The whole cycle is then repeated. The heat transferred from the hot gases to the cylinder and piston must be removed to prevent them becoming overheated. This is accomplished by surrounding the cylinder walls by a water jacket through which water, cooled in a radiator, is caused to flow.

Since power is transferred to the crankshaft during only a part of each cycle, a single cylinder engine runs less smoothly than one where a number of cylinders are used, each giving a power stroke in turn. Four, six, eight or twelve cylinders are commonly used. The high voltage current required to produce sparks at the spark plugs is given by an ignition coil, operated by current drawn from the car battery. The battery is charged while the engine is running by means of a small electric generator driven by the engine.

Motor Cycle, a bicycle propelled by engine. The engine resembles that of a motor car, but is lighter and simpler. It is generally of 2½ to 3 h.p., and frequently carries a side-car attachment. The four-stroke engine is gaining in popularity at the expense of the two-stroke.

Mottistone, John Edward Bernard Seely, first Baron; served in the South African and World Wars; entered Parliament as a Liberal in 1900; Secretary for War, 1912 to 1914; in 1919 Under-Secretary for Air; received a peerage, 1933. (1868-).

Mould, the popular name for various fungi consisting of *hyphae* or threads. Moulds are known scientifically as *Hypomyces*, and there are some 5,000 species; many of these are simply the conidial (spore) stage of more fully-formed fungi. They increase rapidly in the presence of damp, frequently attacking plants and food substances.

Moulding, in architecture a decorative band formed by cutting, casting or modelling the building material into a pictorial design, or conventional pattern.

Moulmein, seaport of Burma and capital of the province of Tenasserim on the Salween, 30 m. from its mouth. It has steamer communication with Calcutta, distant about 930 m. Rice, fruit and teak are exported. Pop. 61,000.

Mountain Ash, town of Glamorgan-shire, Wales, 18 m. from Cardiff in the Aberdare valley. It is a coal-mining district. Pop. 35,300.

MOULDING

Mountain Ash, popular name for the Rowan tree (*Pyrus Aucuparia*), a hardy tree, found in high altitudes; native of Britain. The leaves resemble those of the ash but are longer, the leaflets being smaller and more numerous. The flowers are creamy-white; the berries red.

Mountains. The highest mountain is Mt. Everest, 29,141 ft., in the Himalayas; in South America the highest is Illampu, 25,248 ft.; in N. America the highest is McKinley, 20,300 ft.; Mt. Elburz in the Caucasus, on the borders of Europe and Asia, is 18,526 ft.; Mont Blanc in the Alps is 15,781 ft. The highest mountain in Scotland is Ben Nevis, 4,406 ft.; Snowdon in Wales is 3,560 ft.; Sca Fell in England is 3,210 ft.; Carruntuohill in Eire is 3,414 ft.

Mounts Bay, a bay on the S. coast of Cornwall, England, on which stands Penzance; it contains St. Michael's Mount, an island of granite rock 270 ft. in height, surmounted by a castle.

Mount Vernon, the residence and burial place of George Washington, in U.S.A., on the Potomac R., 15 m. from Washington; the Washington mansion is an American national monument.

Mouse, a small rodent quadruped of the family Muridae, including a number of species, distributed over the whole world. Mice are characterized by long and practically hairless tails, and short legs; they have 3 pairs of rooted teeth in each cheek-jaw. British species are the house mouse (*Mus musculus*), the field mouse (*Apodemus sylvaticus*), the harvest mouse (*Micromys minutus*), and the dormouse (*Muscardinus arctamaris*).

Mouth, the aperture in the head of an animal through which food is taken into the body. In the higher animals it is used for mastication, the emission of sound or voice, deglutition and taste. In many lower animal types there is no real mouth. Protozoa take food into the interior of the body by ingestion, any portion of the body surface being used for the purpose. In radially symmetrical animals, such as the starfish and polyps, the mouth is central.

Moynehan, Derkeley George, first Baron, British surgeon; Hunterian Professor at the Royal College of Surgeons, 1924, and President from 1927; an expert in the treatment of abdominal complaints, on which he wrote several treatises; served with the R.A.M.C. in the War. (1865-1936).

Mozambique, or Portuguese East Africa, lies between Cape Delgado and Delagoa Bay on the mainland, opposite Madagascar; the Zambezi divides it into two. The coast is low and wet, inland are richly wooded plateaux; the soil is fertile, and minerals abound. The country is administered partly by the Government and partly by a trading company. Sugar, maize, cotton, copra and gold are produced and exported. The chief towns are Lourenço Marques, Mozambique and Beira. Area, 297,700 sq. m. Pop. 4,000,000.

Mozart, Wolfgang Amadeus Chrysostom, German-Austrian musical composer, born in Salzburg; was distinguished for his musical genius as a boy, and produced over 600 musical compositions, among them three great operas, *The Marriage of Figaro*, *Don Giovanni* and *The Magic Flute*, as well as many symphonies (including the famous *Jupiter*) and shorter works. His *Requiem Mass* was his last work, and he died at Prague on the evening of its rehearsal. (1756-1791).

Mucilage, a solution in water of a liquid vegetable gum, such as that obtained from the acacia, *Astragalus gummifer*, elm cherry, or from plants such as marsh-mallow, or made by boiling linseed,

seaweed and various seeds and roots. Mucilaginous gums are used in medicine and pharmacy, especially as soothing substances. Gum tragacanth, for instance, prepared from the *Astragalus gummifer*, is used for this purpose, and also in the preparation of pills. Linseed mucilage is used for making varnishes.

Mucous Membrane, *mucous* - secreting membrane which lines those cavities and canals of the human body which connect with the exterior.

Mudfish, a name given to various freshwater fish, especially the bowfin or lung-fish of N. American lakes, and the lepidostiren of S. America and Africa; also a species of S. American killifish (*Fundulus heteroclitus*), which buries itself in mud during drought.

Mudros, a town on the S. coast of the island of Lemnos in the Greek Archipelago. It was a British base of operations against the Turks in the Gallipoli campaign in the World War, and the Armistice between Turkey and the Allies was signed here by the Turks in 1918.

Muezzin, an official, often blind, mosque, who summons the faithful to prayer by a chant from a minaret.

Mui Tsai ("multai"—little sister), a system prevalent in China whereby children, especially young girls, are sold or pawned by poor parents. It has been defended as a form of adoption of children into more wealthy families, but often amounts in practice to slavery and sometimes leads to prostitution. In recent years the British government has taken steps towards eradicating the custom in Hong-Kong, by instituting a system of registered Mui Tsai, and later the Shanghai Municipal Council instigated measures to suppress the system in the International Settlement.

Mukden, town in S. Manchuria, of the capital; now cap. of the province of Fengtien, and an industrial centre of increasing importance; textiles and metal goods are produced. The Japanese invasion of 1894-1898 was directed towards it. Pop. 535,000.

Mulatto (Spanish and Portuguese, "mixed breed"), the offspring of a white man and a negress, or of a white woman and a negro, in whom negro characteristics generally appear predominant. A quadroon is the offspring of a mulatto and a white person, an octoroon of a quadroon and a white person.

Mulberry, the common name of the genus *Morus* (order Moraceae) of deciduous trees, native to Central Asia; introduced to Europe in early times; first brought to Britain probably by the Romans. The White Mulberry (*Morus alba*) is cultivated for its fruit and as a garden tree, hardy in S. England. The Black Mulberry (*Morus nigra*) is also in cultivation, the leaves being used as food for the silk-worm. The Red Mulberry (*Morus rubra*) is of little value for either purpose.

BLACK MULBERRY

Mule, the offspring of a male ass and a mare (the hybrid bred from a stallion and a female ass is technically called a *hinny*, but the term *mule* is used popularly without this distinction). The mule combines the strength of the horse with the hardhood and surefootedness of the ass, and is bred as a pack animal and for use in mountainous parts. The mule is usually incapable of breeding. Mules have been extensively used in the past in the British army.

Mule, or *Mule-Jenny*, a spinning-machine invented by Samuel Crompton in 1779; so named from being a combination of the features of Arkwright's spinning frame and Hargreaves' spinning jenny. The machine is capable of first spinning a length of yarn, the material being fed into it from revolving bobbins, and then winding the yarn upon a spindle. The original mule possessed 20 spindles, but modern machines have over 1,000 spindles.

Mulheim am Rhein, a town in the Rhine province of Prussia, now a part of Cologne. Manufactures include textiles, machinery and beer. Pop. 65,000. **Mulheim an der Ruhr**, a town in the Rhine province of Prussia, in the district of Düsseldorf. It has ironworks and manufactures of leather, paper, etc., and in the district coal is mined. Pop. 133,000.

Mulhouse, a port on the Rhône-Rhine canal in a fertile district on an island formed by the R. Ill, in the Haut-Rhin dept., France. It is a manufacturing centre and its products include cotton and woollen goods, printing, machinery and chemicals. Pop. 99,500.

Mull, large island in the NW. of Argyllshire, Scotland, third of the Hebrides; is mountainous and picturesque, with greatly indented coast-line; the highest peak is Ben More, 3,169 ft., the largest inlet Loch-na-Keal; the soil is best adapted for grazing. Tobermory, in the N., is the only town. Area 350 sq. m.

Mullah, *The Mad*, name by which two Mohammedan fanatics were known, who incited risings against the British, one in Surat, India, 1897-98, the other in Somaliland, 1899-1910. A mullah is a Mohammedan judge versed in sacred law.

Müller, *Hermann*, German politician. Before the World War editor of a Socialist paper, he was sent in vain in 1914 by German Socialists to confer with French workers on means of preventing the World War. In 1916 he became a member of the Reichstag, was appointed Foreign Secretary in 1919, attended the Peace Conference and signed the Treaty of Versailles, and for a short time in 1920 was Chancellor. (1876-

Mullet, name of two fishes, the red mullet (order Percormorphi) found in tropical seas, and the grey mullet (order Mugilidae), a coast fish. Both are edible.

Mullingar, a town in the province of Westmeath, Eire (Ireland), 48 m. from Dublin. It has a recently constructed cathedral.

Mullion, in architecture, a thin vertical structure, which serves to divide an opening, particularly a window, either for decoration, or to give additional support; it may thus divide an arch, carrying two supporting arches.

Mulock, *Craig*, English novelist, born at Stoke-on-Trent, authoress of *John Halifax Gentleman*, and other novels. (1820-1877).

Mulready, *William*, genre painter, born in Ennis, Ireland, illustrated the *Picar of Wakefield* and other works; designed the first penny postage envelope in 1840. (1786-1863).

Multan, city in the Punjab, British India, near the Chenab R., 200 m. SW. of Lahore; has manufactures of silks, carpets, pottery, and enamel ware, and considerable trade. Pop. 119,400.

Multiple Stars, groups of at least 3 stars, inter-related stars; a group of 2 stars is described as a binary or double star. Multiple stars probably arose

MULLION

from the fission of stars originally single. Among the chief multiple stars is Castor (in the constellation Gemini), which consists of a group of 6 stars in 3 pairs. The members of multiple star groups may sometimes be distinguished through the telescope, but more frequently spectroscopic evidence is the sole reason for assuming their existence.

Mumbles, or **Oystermouth**, a seaside resort in Glamorgan-shire, Wales, on Swansea Bay, 5 m. SW. of Swansea, with noted oyster fisheries.

Mummy. See **Embalming**.

Mumps, an infectious disease, caused by a filter-passing virus, infecting the parotid gland, which remains swollen for about a week. Early symptoms may be headache, chilliness, nose-bleeding. It commonly attacks children, and patients should remain in bed for at least 10 days and be isolated for 3 weeks. The incubation period is 12 to 26 days, quarantine 26 days.

Münchhausen, **Karl Friedrich**, Baron of a genus (*Cervulus*) of small deer of Eastern Asia, with short, single antlers growing from the ends of its lengthy frontal bone; reddish-brown in colour with white marks on the throat.

Munich (**München**), capital of Bavaria, Germany, on the Isar, 440 m. by rail SW. of Berlin; is a city of magnificent buildings and rare art treasures, and is still the art centre of Germany; it has several palaces, a fine cathedral and other historic buildings; there are galleries of sculpture and ancient and modern painting, a university, colleges and libraries; the industries include stained glass, lithography, bell-founding and scientific instrument-making, and there are enormous breweries. Munich was the city in which the Nazi movement took its rise. Pop. 735,000.

Municipality, a self-governing town which governs it; in England a borough or urban district council, consisting of a body of elected councillors presided over by a chairman (in a borough, called Mayor) with, in the case of a borough, a number of "aldermen" co-opted by the councillors. The powers of municipalities are laid down by various statutes, but generally they may do only those things which they are expressly permitted to do by law. They have the power of making by-laws for good government, enforceable under penalty, and may sue or be sued in the courts. Many of them undertake trading in the form of the supply of certain public services, gas, water, electricity, local transport, housing, etc., while some manage markets or savings banks. They are under the general supervision of the Ministry of Health. In many American and some Irish towns the executive powers of municipalities are now entrusted to "city managers," the elected councils confining themselves to a general direction of policy and the settlement of a local rate.

Munnings, **Alfred**, British artist. Studying at Norwich and Paris, he first exhibited at the Royal Academy at the age of 20, making turf and horse pictures his speciality; his "Epsom Downs" is his best-known work. During the World War he painted a series of war pictures for the Canadian government. Made an A.R.A. in 1919; R.A. in 1926. (1878-).

Munster, a province of Eire (Ireland), comprising the counties of Clare, Cork, Kerry, Limerick, Tipperary and Waterford. In ancient Ireland it was a separate kingdom, often divided into the two regions of Desmond (in the N.) and Thomond (in the S.). It has an area of 9,317 sq. m. and a population of 941,400. The largest town is Limerick.

Münster, city of Prussia, Germany, in Westphalia, a medieval-looking town, 100 m. by rail N. of Cologne; has textile, paper and printing industries; there is an old cathedral of the 12th Century, a town hall, castle, and 16th Century wine-cellar; there is a university, founded in 1780; here arose the Anabaptist movement of 1535. Pop. 122,000.

Muntjac, the name of a genus (*Cervulus*) of small deer of Eastern Asia, with short, single antlers growing from the ends of its lengthy frontal bone; reddish-brown in colour with white marks on the throat.

MUNTJAC

Muntz Metal, or **Yellow Metal**, a non-ferrous alloy, consisting of copper (60 per cent.) and zinc (40 per cent.). It is used in boat-building.

Murat, **Joachim**, King of Naples, born near Cahors, France, the son of an innkeeper; entered the army, became Napoleon's aide-de-camp and eventually his brother-in-law; for his services under the Empire was rewarded with the crown of Naples in 1808; he had to fight in the end on his own behalf in defence of his crown, and was defeated, taken prisoner, and shot. (1767-1815).

Murchison, **Sir Roderick Impey**, geologist, born in Ross-shire; after army service in the Peninsular War, explored many parts of Europe, predicted the discovery of gold in Australia, was President of the British Association in 1846, was knighted the same year. He founded the Chair of Geology in Edinburgh University in 1870. His fame rests on his discovery and establishment of the Silurian system; his book on *The Silurian System* is the chief of several works. (1792-1871).

Murcia, province and town in Spain, the city being about 290 m. SSE. of Madrid. It has a university and is a winter sports centre. There are preserving factories for the products of the district. Spices, olives and fruit are grown and silk worms bred. Pop. (town) 166,000; (prov.) 648,200. Area of province 4,453 sq. m.

Murder, the unlawful killing of another person with malice aforethought: it is under English law necessarily punishable with death. Accessories before the fact to a murder are liable to the same punishment as the principal; and attempted murder may be punishable with penal servitude for life. In the United States degrees of murder are recognised, according to the circumstances of the offence, murder in the first degree alone being punished with death.

Mürger, **Henri**, French novelist and poet, born in Paris; is chiefly distinguished as the author of *Scènes de la Vie de Bohème*. Many of his songs and lyrics were translated into English by Andrew Lang. (1822-1861).

Murillo, **Barcelomé Esteban**, Spanish painter, born in Seville. His subjects were drawn partly from low life and partly from religious themes, such as "Moses Smiting the Rock," the "Miracle of the Loaves and Fishes," etc.; the "Immaculate Conception" in the Louvre is his masterpiece. He is represented by several works in the National Gallery, London. Died from a fall from a scaffold while painting an altar-piece at Cadix. (1618-1682).

Murmansk, area on the N. coast of the Lapland. The chief town, an ice-free port,

has the same name. In 1918-1919 an Allied force operated from here as a base against the Bolshevik Government.

Murray, Sir David, Scottish painter, born 1905. President, Royal Institute of Painters in Water-colours, 1917. Knighted, 1918. Two of his realistic landscapes are in the Tate Gallery. (1849-1933).

Murray, George Gilbert Aimé, English Sydney, N.S.W.; Professor of Greek at Glasgow from 1889 to 1890, and at Oxford from 1908 to 1936; Professor of Poetry at Harvard, 1926; best known for his translations of Greek plays, and for several works on Greek literature, life and religion; he is also a famous internationalist, being chairman of the League of Nations Union from 1923. (1866-).

GILBERT MURRAY

Murray, Sir James Augustus Henry, British lexicographer, born at Denholm, Scotland; from 1879 editor of the *New English Dictionary*, later known as the *Oxford English Dictionary*. (1837-1915).

Murray River, the chief river of Australia, 1,300 m. long, rises at the foot of Mt. Kosciuszko, in New South Wales, flows NW. between New South Wales and Victoria; receives the Lachlan and Darling on the right, and entering S. Australia turns southward and reaches the sea at Encounter Bay.

Murrumbidgee, a river of New South Wales, Australia, rising in the NE. of the Australian Alps and flowing in a westerly direction joins the Lachlan before flowing into the Murray R. It is about 1,350 m. in length and is navigable for about 500 m. in the rainy season.

Muscat, capital of Oman, in Eastern Arabia, on the Gulf of Oman; is an ill-built, unhealthy city, with a trade of diminishing importance. It was in Portuguese possession from 1508 to 1658. Pop. 4,500.

Muscatel, name given to the grapes from which certain fine sweet French and Italian wines are made; also to the wine itself. Muscatel grapes are also dried for use as a dessert fruit.

Muscle, tissue in higher animals which enables movement to be made, either voluntarily or involuntarily, this distinction being marked by a rough classification into "striped" and "unstriped" muscle. Voluntary or "striped" muscle exists mainly for movement of the skeleton at the command of the will. It consists of bundles of fibres, each bundle contained in a fibrous sheath called *epimysium*. Each muscular fibre is itself enclosed in a sheath of elastic tissue by which it is contracted or extended. Involuntary or "unstriped" muscle consists of similar bundles of muscular fibres, but they are not divided and sheathed in epimysium. The heart muscle, although involuntary, is partially striped muscle.

Muscovy, a name properly applying to Moscow, the ancient Principality of Moscow, but used in the 18th and 17th Centuries to mean the whole of Russia.

Muses, in Greek mythology, goddesses of the arts, daughters of Zeus and Mnemosyné. They were nine in number: Clio presided over history, Euterpe over music, Thalia over comedy, Melpomene over tragedy, Terpsichore over choral dance and song, Erato over erotic poetry and elegy, Polyhymnia over lyric poetry, Urania over astronomy, and Calliope over eloquence and epic poetry.

Museum, a building in which objects of logical interest are stored, classified and exposed for study. Some of the world's most important museums are general in the character of their contents; such as the British Museum, London, or the Louvre in Paris. Others confine themselves to a special subject or the antiquities of a special area or period. Among the best-known and largest museums are the British Museum in London, the Louvre in Paris, the Metropolitan Museum of New York, the Vatican Museum at Rome, and many in other great European and American capitals. Other museums in Great Britain include the Victoria and Albert, Science, and Natural History Museums at Kensington; the London Museum, the Imperial War Museum, the Wallace Collection (Hertford House), the National Maritime Museum, all in London; the Fitzwilliam Museum at Cambridge; the Scottish National Museum at Edinburgh. Most provincial towns of any size have museums of local antiquities and objects of interest, some of them of first importance.

Mushroom (*Agaricus campestris*), an edible fungus, of which there are several varieties; cap 3-6 in. across, globose in shape, opening out nearly flat, dry, and in colour whitish or yellowy grey; flesh becomes red-brown when broken; gills crowded, turning from pink to blackish-brown. Mushrooms may be grown under frames or in caves, sheds, etc., in an even temperature, 48°-75° F.; spawn obtained in bricks is broken up and distributed in beds of fresh stable manure with admixture of straw. See also *Agaricus*.

Music, the sound obtained by combining sequences or groups of notes of different pitch so that they become acceptable or intelligible to the listener. The origins of music are variously ascribed to the purely æsthetic impulses of primitive man, to his need for a means of expressing emotion, and to a natural propensity for imitation. The scientific study of music began in the 6th Century B.C. with the discovery by Pythagoras that there are definite numerical relationships in the number of vibrations per second set up in the air by the production of notes of different pitch, the tone relationship of octave, fourth and fifth being respectively 2:1, 3:2, and 4:3.

Within the octave, which is universally recognized as the basis of musical composition, there is an infinite number of intervals. Many of these are utilized in Eastern music, which is purely melodic, i.e., constructed of sequences of single notes, combined into various modes each used for the expression of a different mood or emotion. The development of Western music has been towards harmonic composition, i.e., progressions of groups of notes produced simultaneously in chords, and this development necessitated the elimination of many dissonant intervals, the regularization of the scale and the reduction of the modes to two, major and minor.

This process was not completed until the beginning of the 17th Century, and only after this was musical notation simplified and standardized into its present form. Before the 17th Century, composition was confined mainly to sacred works, and in the secular sphere to madrigals and canzonets. The Italian Palestrina ranks first among composers of polyphonic music, the precursor of harmonized composition as we know it to-day. In the 17th Century, the first exponent of the new technique was Monteverdi, famous for his dramatic works. Purcell in England and Lully in France are other outstanding figures of this century.

The golden age of music was the 18th Century, in which Germany produced six of the world's most famous musicians: J. S.

Bach (1685-1750) pre-eminent for his masterly development of the fugal form, and numbering among his compositions the famous 48 Preludes and Fugues, numerous orchestral works and above all his sacred music, culminating in the B Minor Mass; **Handel** (1685-1759), the composer of numerous operas and oratorios, including the *Messiah*; **Gluck** (1714-1787), a writer of opera; **Haydn** (1732-1809), who developed the sonata form, the basis of much musical composition; **Mozart** (1756-1791), who introduced the opera-buffe, including among his many compositions the delightful *Nozze di Figaro*; and finally, standing alone among musicians, **Beethoven** (1770-1827), the master of achievement in every form, sonata, symphony, concerto, "chamber music" and choral.

In Beethoven music passed beyond the bounds of classicism and became a vehicle for the expression of an infinite range of thought and emotion. The century of Romanticism, the 19th, brought Schubert, the master of song composition, Wagner, who was both musician and dramatist, Berlioz and the beginnings of programme music, and the national music of Chopin, Liszt and others. Romanticism passed to modernism with the subtle tones of Debussy, and the emphatic opposition to convention of the Russian school, initiated by Mussorgsky. Among 20th Century composers of note are Deltus, Ravel, Hindemith, Béla Bartók, Arnold Bax, Rutland Boughton, and Arthur Bliss.

Musk, name given to various plants which emit a musk-like odour, especially to the common musk (*Mimulus moschatus*) of the order Scrophulariaceae, a creeping perennial formerly much cultivated in greenhouses but in less favour now since it unaccountably lost its smell.

Musk-Deer (*Moschus moschiferus*), a hornless deer, inhabiting Tibet and Nepal; height less than 2 ft., colour grey or red-brown. The musk of commerce is obtained from a gland situated behind the navel of the male deer.

Musket, a firearm discharged by a percussion lock, lighter in weight than a rifle (q.v.); the original matchlocks and flintlocks were also called muskets. The term *musketry* survives in the army as the name for the department of drill dealing with the theory and use of small arms, e.g., the revolver, carbine, rifle and machine-gun.

Musk-Ox (*Ovibos moschatus*), sheep-like ox, with brown, long-haired, shaggy coat, inhabiting the northern parts of Canada. The horns of the male form a practically continuous line over the forehead. It sometimes emits a musk-like odour.

Muslin, a woven cotton material, light in weight, soft, and of open weave. It may be bleached or dyed, and will take colour-printing. It is said to have been first made at Mosul in Mesopotamia and it is much used as a dress material, especially in the East.

Musquash, or **Musk-rat**, a N. American aquatic rodent (*Fiber zibethicus*), brown or black in colour with greyish underfur, and partly webbed feet, with a scent-gland giving off a musky odour. Its skin is used for clothing.

Mussel, the common name of a family of bivalve molluscs of the order Filibranchia. The common British mussel (*Mytilus edulis*) has a small foot with whose aid, when young, it has a limited power of locomotion, later fixing itself permanently to a rock. It is used both as a food by man and as a bait for deep-sea fishing.

Musselburgh, town on the coast of Midlothian, Scotland, 6 m. E. of Edinburgh, with golf links, and paper, nets, and tanning industries, and famous for Loretto school. Pop. 17,000.

Musset, **Alfred de**, French poet and litterateur, born in Paris. After publishing several plays and poems, he followed George Sand to Italy, returning on the collapse of his *kaisan* with her in 1835. His best-remembered works are *Confessions d'un Enfant du Siècle*, published in 1836, the play *Un Caprice*, of 1847, and *Les Nuits*, a series of lyrical poems. (1810-1857).

Mussolini, **Benito**, Italian statesman and Fascist dictator, the son of a working man in Romagna province; born at Predappio, near Forlì. In early life he studied at home and in Switzerland, became a Socialist, and when quite a young man he was made editor of the principal Socialist organ, *Avanti*. In 1915 he went to the front as a corporal, and returned wounded to continue work on his paper. After the World War he resigned his editorship and his membership of the Socialist party, and founded his own daily paper, *Popolo d'Italia*.

Having abandoned the Socialist party, he formed the first Fascist group as an anti-Bolshevist activity. This new party rapidly grew, and at its Congress in 1922, demanded that Mussolini be installed as head of the Government. The march on Rome followed, and, the king siding with the marchers, Mussolini was installed as premier and dictator. Suppressing the liberty of the Press and Parliament, he nevertheless succeeded in restoring his country's finances and industrial power.

Disputes with Greece and France, the seizure of Corfu (q.v.), and the signing of the Lateran Treaty were outstanding events of the following years, during which repeated attempts were made on Mussolini's life. In 1935 he embarked Italy on a war of conquest in Abyssinia (see *Abyssinia*) which led among other things to strained relations with Great Britain consequent upon the expansion of Italian power in the Mediterranean. His policy has brought him into sympathy with Hitler, and he made no protest when, in 1938, Germany occupied Austria. (1883-).

Mussorgsky, **Modest Petrovich**, Russian composer; born at Karey, and died at St. Petersburg. His masterpiece is the opera *Boris Godunov*, first performed in 1874. He was closely associated with the group of Russian "nationalist" composers, including Borodin and Rimsky-Korsakov. (1839-1881).

Mustard Gas, or **Dichlorethyl-sulphide**, a poisonous gas used in the World War. It is absorbed by the skin, causing painful inflammation, which is often fatal.

Mutation, in biology, a slight variation in individuals of a species, which may ultimately give rise to a fresh species. The causes of mutations are obscure.

Mutiny Act, a statute first passed by Parliament in 1689 in order "to punish mutiny and desertion," and for "the better payment of the army and their quarters," permitting the maintenance of a standing army. It established military law on a statutory basis, and was re-enacted annually until 1879, in which year it was superseded by the annual Army Act.

Mweru, a lake of Central Africa on the border of the Belgian Congo and Northern Rhodesia. It is 75 in. long by 25 m. broad, and some 3,000 ft. above sea level. It was discovered in 1867 by David Livingstone.

Mycenae, city of ancient Greece, in the N.E. of the Peloponnese; in pre-classical times one of the centres of the

MUSK-OX

so-called Mycenaean culture, which, apparently in close contact with Crete, preceded that of classical Greece. Extensive excavations begun by Schliemann in 1876 have brought to light many archaeological treasures.

Myelitis, a disease affecting the spinal cord by inflammation. In acute myelitis the nervous tissue disintegrates, but recovery is possible. In chronic myelitis the nervous tissue is slowly replaced by a hard fibrous connective tissue. A variant of the disease, *polio-myelitis*, destroys the nerve-cells in the grey matter of the spinal cord, and causes infantile paralysis.

Myers, **Frederic William Henry**, English research, author and student of psychical research, born at Keswick. He is remembered for his poem *St. Paul* (1867) and for *Human Personality and its survival after Bodily Death*, published posthumously, 1903. He was one of the founders of the Society for Psychical Research. (1843-1901).

Myna, or **Grackle**, a genus of birds of the same, startling tribe, having dark-brown plumage with white markings on tail and wings. Some of them can be taught to talk.

Myopia, or **Shortsightedness**, the inability to see distant objects distinctly owing to the eye, or surface of the cornea, being too long, so that parallel rays of light are brought to a focus in front of the retina. This structural defect is rectified by the use of concave lenses.

Myriapoda, a class of air-breathing *Arthropods*, divided into *Chilopoda* (Centipedes) and *Chilognatha* (Millipedes); the body is segmented, various species having from 6 to 200 segments, each furnished with two legs.

Myrmidons, "ant-men," so-called because in Greek legend Zeus was said to have peopled Thessaly, from which originally they came, by transforming ants into men.

Myrrh, a gum-resin, containing an essential oil, obtained from the bark of certain trees in Arabia and Abyssinia, especially the *Balsamodendron myrrha*. It is used in medicine as a tonic, and in the manufacture of incense. In Biblical history it was an ingredient in the holy anointing oil, was used in fumigation, for perfumes, and in preparing the dead for burial.

N

Naas, county town of Kildare, Eire (Ireland), 20 m. from Dublin. Pop. 3,400.

Nablus, town of Palestine, the Shechem of the Bible, 33 m. N. of Jerusalem. Soap making from olive oil is the chief industry. It was the scene of Jewish-Arab riots during 1937 and 1938. Pop. 17,000.

Nabob. See **Nawab**.

Nacre. See **Mother-of-Pearl**.

Nævus, or **Mole**, a birth-mark formed by a cluster of dilated blood-vessels. When large, it is known popularly as a "port-wine stain." The piece of skin affected by a nævus may be excised, or the stain removed by electrolysis.

Nagasaki, town and port of Japan, on the NW. of Kyushu Island; has a beautiful and extensive harbour; industries shipbuilding, engineering, pottery manufacture. Pop. 212,000.

Myrtle (*Myrtus communis*), an evergreen leafy shrub, growing to a height of 10-12 ft. and bearing sweet-scented white flowers in July and August, yielding an aromatic oil; abundant in S. and E. Europe, introduced probably from Persia; was known in England in the 16th Century. Among the ancient Greeks the myrtle was sacred to the Goddess of Love.

COMMON MYRTLE

Mysore, a native State of India, embedded in the Madras Presidency, occupies a lofty, broken, but fertile tableland. The upper waters of the Kistna and Kaveri are used for irrigation purposes. Betel-nut, coffee, cotton, rice and silk are exported; cloth, wheat and precious metals are imported. The climate is healthy and pleasant. Under British government from 1831, it was restored to its prince in 1881, under British protection. Area, 29,300 sq. m. Pop. 6,557,000. The capital is Mysore, a prosperous well-built town, with a university. Pop. 84,000.

Mysteries, sacred rites and ceremonies among the Greeks and Romans in connection with the worship of particular divinities, to which only the initiated were admitted; the name is also applied to the miracle plays (q.v.) of the Middle Ages.

Mysticism, the claim that one has, direct relations with God or the world-soul by meditation and contemplation. It is a feature of all highly-developed religions, though not necessarily bound up with religion; famous religious mystics include St. Teresa, Jacob Boehme and Richard Rolle.

Myth, from ancient times, usually as a story about a god or hero, or an ancient belief regarding the processes of nature. Mythology, the scientific study of myths, only became possible with the discovery of ancient Assyrian and Egyptian literature, and the opening-up of Sanskrit literature. Modern study of anthropology and folklore shows that the same myths were widely distributed.

Nagoya, city on the island of Honshu, Japan, the most important commercial centre of S. Japan; noted for its manufacture of porcelain and lacquer. It has textile and many other industries. Pop. 1,020,000.

Nagpur, or **Nagpore**, capital of the Central Provinces of British India, and of a district and division of the same name; a great cotton-spinning and weaving centre, with a university; trades in grain and salt. Pop. 215,000.

Nahum, seventh of the minor prophets of the Old Testament; appears to have been a contemporary of Isaiah, and to have prophesied after the destruction of Samaria and the defeat of Sennacherib before Jerusalem, in the reign of Hezekiah. His short book predicts the fall of Nineveh.

Naiads, in Greek mythology nymphs of streams, endowed with prophetic power; are represented as lovely maidens in a nude or semi-nude state.

Nairn, county town of Nairnshire, Scotland, prettily situated at the entrance of the Nairn into the Moray Firth, 16 m. N.E. of Inverness; a summer holiday resort. Pop. 4,200.

Nairne, **Carolina Oliphant, Baroness**, Scottish poetess, born in Gask, Perthshire; wrote many songs, among them the famous *Land o' the Leal, Bonnie Charlie's noo awa, Callie Herrin'*, and *The Auld House*. Her songs first appeared in *The Scottish Minstrel*. (1766-1845).

Nairnshire, small northern county of Scotland, fronts the Moray Firth, between Elgin on the N. and Inverness on the W. and S.; the surface, rugged and mountainous in the S. and E., slopes towards the Firth, and is traversed by the rivers Nairn and Findhorn; mainly pastoral, with some agriculture and granite quarrying. Area, 163 sq. m. Pop. 8,300.

Nairobi, the capital of Kenya Colony, British East Africa; an important station on the Uganda railway. Pop. 47,000 (white, 6,000).

Namaqualand, territory included in South Africa, and in SW. Africa, which takes its name from a Hottentot tribe, the Namaquas, who inhabit it.

Name Day, term used on the Stock Exchange for the second of the periodical settling days, on which a ticket bearing the name of stocks sold is passed from the buyer to the seller, enabling the latter to make arrangements for the transfer.

Names. Surnames arose in Europe and England about the 11th and 12th centuries, and were frequently taken from professional or place names or from some physical peculiarity, e.g., Baker, Hastings, Whitehead. Before they came into vogue, such forms as "John of Tooting," "William the Baker" were in use for purposes of distinction. In many, if not most, countries patronymics were the first "family" names, and such names as O'Donnell, McDonald, Johnson, Pritchard (Welsh), ap Richard, "son of Richard") are examples of such names. Roman citizens usually bore three names, the prænomen (personal name), nomen (clan name) and cognomen (family name), as Gaius Julius Caesar. In Chinese names the family name is placed first; thus Tang Leang-Li should be referred to as Mr. Tang.

Namur, capital of a province of the same name in Belgium; is situated at the junction of the Meuse and the Sambre, 35 m. S.E. of Brussels. The town is strongly fortified; it fell to the Germans in August, 1914, after a six-day siege, part of the town being burnt. The citadel, the cathedral, and the Jesuit church of St. Loup still stand. Cutlery, firearms, etc., are manufactured. Pop. 32,000. The province skirts the N.E. border of France between Hainault and Luxembourg. Area, 1,412 sq. m. Pop. 357,000.

Nanaimo, a town and seaport of Vancouver I., British Columbia, Canada. It is the terminus of the island railway and the centre of a coalmining district. Pop. 10,000.

Nana Sahib, native leader in the Indian Mutiny, and instigator of the Cawnpore massacre; after the suppression of the Mutiny he made his escape to Nepal, and was not again heard of. (c. 1820-c. 1860).

Nancy, capital of the dept. of Meurthe-et-Moselle, N.E. France, on the R. Meurthe, 220 m. E. of Paris; has a cathedral and 16th Century palace, and a university. Industries include brewing and textile and machinery manufacture. It was the scene of a French victory over the Germans in August, 1914. Pop. 121,000.

Nankeen, calico stuff dyed buff by a tanning solution; originally made at Nanking in China, from which place it takes its name.

Nanking, since 1928, and before the 16th Century, the capital of China, is situated on the Yangtse R., 130 m. from its mouth; between 1853 and 1864 its finest buildings were destroyed by the Taiping rebels. It is China's cultural centre and manufactures silk goods, textiles and machinery; there is a university. The city was heavily bombed from the air, with large loss of life, by the Japanese in the autumn of 1937, the Chinese government in consequence moving the capital inland as a temporary measure, to Hankow. At the end of the year Nanking was occupied and looted by the Japanese, who, in the following March, established there a so-called "New reformed Government of China," sponsored by themselves. The seat of government was later moved to Chungking.

Nansen, **Fridtjof**, Norwegian explorer. His first voyage was to Greenland in 1882.

He tried in 1895 in the *Fram* to reach the North Pole, but succeeded only in reaching what was then the record of 86° N. He assisted in promoting the separation of Norway from Sweden, and from 1906 to 1908 was Norwegian Minister in London, afterwards returning to exploration. After 1920 he was active in war relief work for refugees and others, receiving a Nobel Peace Prize in 1922. (1861-1930).

FRIDTJOF
NANSEN

Nan-Shan, a range of mountains in Central Asia. N. of the Kun Lun range, between the Koko Nor and the Chinese province of Ninghsia; they attain a height of 16,000 ft.

Nantes, capital of the dept. of Loire-Inférieure, NW. France, on the Loire, 35 m. from the sea. Its fine streets, handsome buildings, and historical associations make it one of the most interesting cities in France; the cathedral and the ducal castle date from the 15th Century. Shipbuilding, sugar-refining, and hardware are the staple industries. Pop. 187,000.

Nantes, **Edict** of edict issued by Henri IV. of France, in 1598, allowing to Protestants religious liberty and political enfranchisement, and confirmed by Louis XIII. in 1614, but revoked by Louis XIV., Oct. 23, 1685.

Nantwich, market town in Cheshire, England, on the R. Weaver, 24 m. from Chester; formerly a great salt-producing centre; has brine baths beneficial in cases of rheumatism and gout. The principal industries are the manufacture of clothing and boots, and tanning. Pop. 86,000.

Nap, or **Napoleon**, a card game for from 2 to 6 players, each holding five cards from a full pack. Each player bids, a bid of 5 tricks being *Nap*; *Nap* is over-bid by *Wellington*, *Wellington* by *Blucher*; the bidding player undertakes to pay double or treble stakes if losing his game. The highest bidder leads, the suit led being trumps.

Naphtha, a mixture of liquid hydrocarbons, carbons of an inflammable nature, found in petroleum.

Naphthalene, a cyclic hydrocarbon occurring in the middle oil fraction of the distillate from coal-tar. It is a white crystalline solid, and is familiar in the form of *moth-balls*, the odour of which is popularly supposed to be repugnant to clothes-moths. It is inflammable and burns with a luminous smoky flame; it is insoluble in water, but readily dissolves in benzene or alcohol. In industrial chemistry it is im-

portant as a raw material in the synthetic preparation of indigo and other dyes.

Napier, town in the Hawkes Bay province of North I., New Zealand, 210 m. NW. of Wellington; it exports wool and preserved meat. Pop. 18,900.

Napier, Sir Charles James, British general, the conqueror of Sind, born at Westminster, was present at Coruña, served in the Peninsular War, was in 1841 made commander-in-chief of the Bombay army, defeated the Sikhs at Meeanee in 1848 in a brilliant engagement; went again to India in 1849 on the outbreak of a second Sikh War, but finding it suppressed, returned in 1851. (1782-1853).

Napier, John, Scottish mathematician, born at Merchiston Castle, near Edinburgh; in 1614 published his invention of logarithms; he also invented the computing device known as *Napier's Bones*. (1550-1617).

Napier, Sir William, brother of the conqueror of Sind; entered the army at the age of 15, served all through the Peninsular War, and wrote, besides the *Conquest of Scinde*, a *History of the Peninsular War*. (1785-1860).

Napier of Magdala, Robert Cornelis

Napier, first Baron, British military engineer officer, born in Ceylon; distinguished himself at the sieges of Multan, Delhi, and Lucknow; commanded an expedition in Abyssinia, stormed and took Magdala in 1868, for which he received a peerage; was commander-in-chief in India, 1870-1876; and governor of Gibraltar 1876-1882. (1810-1890).

NAPIER OF
MAGDALA

Naples, city in Italy, on the bay of Naples, Naples, at the foot of Mt. Vesuvius, one of the most beautifully situated towns of Europe. To the E. lies the old town with its historic Via di Roma and narrow crowded thoroughfares; the newer portion on the W. is more spaciouly laid out. The museum, rich in Pompeii relics, the university, (founded in 1224), the cathedral, and the four medieval gateways are the chief architectural features. Large quantities of wine, olive-oil, chemicals, perfumery, etc., are exported, while wine, macaroni, chemicals, musical instruments and textiles are manufactured. Naples became incorporated in the kingdom of Italy in 1861, having previously been included in the Kingdom of the Two Sicilies. Pop. 866,000.

Napoleon, a French gold coin worth 20 francs, no longer in use; it was named after the Emperor Napoleon I.

Napoleon I., Emperor of the French, born in Ajaccio, Corsica, second son of Charles Bonaparte and Letitia Ramolino; trained at the military schools of Brienne and Paris; distinguished first as a captain of artillery at the siege of Toulon in 1793; elected general of brigade in the Italian campaign of 1794; he fell under suspicion, but was soon after invested with the supreme command of the army there and the conduct of the war. On his return to Paris he was placed in charge of the expedition destined to strike at English power through Egypt, sailed thither in 1797, and conducted it with successes and reverses till, in 1799, the threatened fall of the Directory called him back.

He thereupon accomplished his *coup d'état* of the 18th Brumaire (Nov. 9, 1799), when a consulship of 3 was established, himself First Consul, and eventually in 1802 Consul for life. His administration in this capacity was marked by his regard for the re-establishment

of law and order, but his personal ambition was unsated, for by a Concordat with the Pope, he so attached the Catholic Church to the State as to secure its support for his ambitious projects, and was able, on May 18, 1804, to get himself invested with the imperial dignity.

From this date began that long array of wars against the rest of Europe, distinguished by the victories of Austerlitz, Jena, Eylau, Friedland, Eckmühl, and Wagram, which contributed to inspire all the nations around with a sense of the terror of his name; but with the unfortunate expedition to Russia, in 1812, Napoleon's glory began to wane and the tide to turn. After the battles of Lützen and Bautzen, he might perhaps have signed an honourable peace, but he declined the terms offered, and was defeated at Leipzig (Oct., 1813) by the Allies, who invaded France and entered Paris, upon which he was compelled to abdicate at Fontainebleau and retire to Elba, April 20, 1814.

On his return from his retreat and re-entry into Paris on March 20 following, the Powers, with England and Prussia at their head, leagued against him and crushed him at Waterloo. By this defeat he had forfeited the throne, and was compelled to abdicate, but, unable to escape from France, he delivered himself up to Captain Maitland of the *Bellerophon*, and was shipped off to St. Helena, where he died, May 5, 1821. His body was disinterred and buried with great pomp under the dome of the *Hôtel des Invalides*, Dec. 15, 1840. (1769-1821).

Napoleon III, nephew of Napoleon I., born at Paris, brought up at Augsburg and in Switzerland; became head of the family in 1832. He began a Bonapartist propaganda, and set himself to recover the throne of France. An abortive attempt in 1836 ended in a short exile in America and London, and a second at Boulogne in 1840 landed him in the fortress of Ham under sentence of perpetual imprisonment. Escaping in 1846 he spent two years in England, returning to France after the Revolution of 1848. Elected to the Constituent Assembly and the same year to the Presidency, he assumed the headship of the Republic and posed as the protector of popular liberties and national prosperity. Struggles with the Assembly followed; he won the favour of the army, filled the most important posts with his friends, dissolved the Constitution in 1851 (Dec. 2), was immediately re-elected President for ten years, and a year later assumed the title of Emperor. He married the Spanish Countess Eugénie in 1853, and exerted himself to strengthen his hold on the populace. In the Crimean War (1854-1856) and the Lombardy campaign (1859) he was supported by Britain; in 1860 he annexed Savoy and Nice; ten years later he plunged into the disastrous Franco-Prussian War of 1870; disaster followed disaster. The Emperor surrendered to the Germans at Sedan, Sept. 2, 1870; a prisoner till the close of the war, he came to England in 1871 and resided with the Empress at Chislehurst till his death. (1808-1873).

Narbada, or **Nerbudda**, a river of India; has its source in the Deccan, and flows westward through the great valley between the Vindhya and Satpura Mts., reaching the Gulf of Cambay after a course of 800 m., the last 50 of which are navigable.

Narcissus, in Greek mythology, a youth who disdained the addresses of Echo. She pined away and died, and he, as a penalty, was doomed to fall in love with his own image, which he kept beholding in the mirror of a fountain, till he too pined away and died, his corpse being changed into the flower that bears his name.

Narcissus, a numerous genus of bulbous plants, mostly natives of Europe and belonging to the natural order Amaryllidaceae. The species which are numerous, and from their hardness, delicate shape, gay colour and smell have long been popular objects of cultivation, include the daffodil (*Narcissus pseudo-Narcissus*), the jonquil (*N. Jonquilla*), and the narcissus (*N. poeticus*).

NARCISSUS
(poeticus)

Narcotics, general name for drugs which if taken in more than minute quantities produce sleep or stupor. They are used in medicine both for soporific purposes and to alleviate pain. The narcotic qualities of opium have been known since ancient times; and others are hashish (Indian hemp), chloral, and toluadonna.

Nares, Sir George Strong, British explorer; he was engaged in the search for Franklin, 1822-1851; commanded the Challenger scientific research expedition, 1873-1876. (1831-1915).

Narses, a statesman and general of the Byzantine empire; fought in Italy with Belisarius, and later defeated the Goths at Taurine, recovering the city of Rome for the empire. (c. 475-573).

Narthex, a space near the porch in the basilica type, ruled off from the rest, for catechumens and penitents.

Narwhal, a cetaceous mammal found in northern seas, averaging from 12 to 20 ft. in length. The body is whitish or grey in colour and spotted with dark patches; there is no dorsal fin. The incisors are sometimes developed into projecting tusks. Its food consists chiefly of molluscs and it yields blubber and ivory. It is closely related to the white whale.

Naseby, a village in Northamptonshire, England, where the Royalists, under Charles I. and Prince Rupert were defeated by the Parliamentary forces under Fairfax and Cromwell in June, 1645.

Nash, John, English architect, born in London; besides planning the old Regent Street and Portland Place in central London, was the architect of Buckingham Palace and Brighton Pavilion. (1752-1835).

Nash, Paul, British water-colour artist; he first exhibited in 1911, and in the World War served in France as one of the official war artists, producing a number of striking water-colours illustrating the effect of modern warfare on nature. (1889-).

Nash, Richard. See **Beau Nash**.

Nash, Thomas, English satirist, born in Lowestoft, a Cambridge University wit; wrote plays, but is remembered for his picaresque *Jack Wilson* and *Pierce Penniless*. (1567-1601).

Nashville, capital of Tennessee, U.S.A., on the Cumberland R., 185 m. SW. of Louisville. It is an important railway and educational centre, the seat of four universities (two for coloured students), and is engaged in the manufacture of cotton, tobacco, flour, paper, oil, etc. Pop. 154,000.

Nasmyth, James, Scottish engineer, born in Edinburgh; invented the steam-hammer and a steam pile-driver. (1808-1890).

Nassau, chief town and seat of Government of the Bahamas, British West Indies, on New Providence I.; it exports pearls, tomatoes and other fruits, and sponges. Pop. c. 11,000.

Nassau, till 1866 a duchy of Germany, now included in the Prussian province of Hesse-Nassau (q.v.).

Nasturtium, a genus of plants of the Cruciferae family, comprising 50 species of world-wide distribution, 4 of which are found in Britain, including the watercress (*Nasturtium officinale*). The *Nasturtium* grown in gardens and yielding a pungent fruit finding use in pickles is a species of Geraniaceae (sometimes placed in an order Tropaeolaceae), belonging to the *Tropaeolum* genus. Various species are known. All bear showy orange flowers. This plant is also known as Indian Cress.

Natal, province of the Union of South Africa, fronts the Indian Ocean on the E., having a foreshore of 360 m.; the Drakensberg Mts. form its western boundary; has an excellent and fertile climate. Along the coast the sugar-cane is largely cultivated, with tea, tobacco, etc., while all kinds of fruits flourish; the rising ground inland produces good cereals, and large numbers of sheep and cattle find excellent pasturage on the plains and mountain slopes on the W. Excellent coal is mined in large quantities, and iron and copper are found: wool, sugar, hides, feathers, and ivory are the principal exports, and are shipped mainly at Durban. Pietermaritzburg (q.v.) is the capital. Natal was discovered in 1497 by Vasco da Gama, and after being annexed to Cape Colony in 1844, was declared, 11 years later, a separate colony until the formation of the Union in 1910. Zululand was incorporated in 1897. Area, 35,250 sq. m. Pop. 1,917,000.

National Convention, the revolutionary assembly of France, consisting of 749 members chosen by universal suffrage, which on Sept. 22, 1792, supplanted the Legislative Assembly, proclaimed the Republic and condemned Louis XVI. to the guillotine. In spite of its perplexities and internal discords, it was successful in suppressing the Royalists in La Vendée and the south, and repelling the rest of Europe leagued against it, not only in arms, but in the field of diplomacy. It laid the foundation of several modern French institutions, and dissolved itself in favour of a Directory of Five on Oct. 20, 1795.

National Debt. The national debt of a country is the gross capital sum which its Central Government owes to those, whether its own subjects or foreigners, from whom it has borrowed money (usually for purposes of war). The development of national debts dates roughly from the middle of the 17th Century, though in earlier times rulers on occasion borrowed money during emergencies when the revenue fell short of requirements.

The origin of the British National Debt was bound up with the foundation in 1694 of the Bank of England (q.v.) which was, indeed, founded upon a perpetual loan of £1,200,000 to the State. The debt grew rapidly during the wars of the 18th and 19th Centuries, increasing from £21½ millions in 1697 to £52 millions in 1713, to £138½ millions at the end of the Seven Years War in 1763, and over £742½ millions in 1814 when Napoleon was banished to Elba.

Before the World War the bulk of the debt (£586 millions) was funded debt. This term originally signified debt the interest of which was charged upon definite taxes, revenues, or funds, but with the improvement of credit it became customary to charge interest upon the general revenue of the country and funded debt came to mean the permanent debt in respect of which interest only had to be paid. The counterpart of funded debt is unfunded or floating debt, particularly treasury bills and advances on Ways and Means certificates. During the World War British Government borrowing took the form of redeemable debt (unfunded debt). Of the

total debt of £8,097 millions in 1919, about half was due for repayment within from five to sixty years.

In peace time the British Government normally aims at reducing the debt by redemption from a Sinking Fund made up by devoting sums annually to the service of the debt. The most important post-war measure affecting the debt was the Government conversion operation (see Debt Conversion) in 1932 when £2,000 million War Loans at 5 per cent. was transformed into a 3½ per cent. loan. Apart from war purposes an increasing amount has been borrowed for the purposes of economic development.

National Debt contracted abroad and expressed in foreign currencies is called external debt, while that incurred within the country itself is called internal debt. During the war Great Britain contracted a large external debt, mainly to the U.S.A. Government, and the European Allies contracted external debts to the British Government and to that of the U.S.A. The net National Debt of the United Kingdom in 1938 was £8,026,127,000, and interest charges amounted to some £211 millions.

National Defence Contribution

(N.D.C.), a tax imposed for the first time under the Budget of 1937, chargeable upon the profits of businesses carried on by firms or individuals in the United Kingdom. No tax is payable on profits of less than £2,000; the tax is at the rate of 5 per cent. for companies, or 4 per cent. for individuals or partnerships, on profits above that amount, certain deductions being allowed when the profits are less than £12,000. The tax does not apply to statutory undertakings or to businesses of a "professional" nature.

National Gallery, the National Gallery, situated in Trafalgar Square, London, originated in a collection formed by John Julius Angerstein (1735-1823), which was purchased in 1824 for £60,000 as the nucleus of a national gallery. It now comprises over 1,200 pictures, by both foreign and British masters. In 1855, £70,000 was voted by Parliament for the purchase of the "Assidea Madonna" of Raphael, together with £11,000 for "Vandyck's" "Charles I. on Horseback." Bequests include that of Vernon in 1847, a collection of 157 works, and that of the famous artist J. M. Turner in 1851. The National Gallery of British Art, now renamed the Tate Gallery, on the Thames Embankment at Millbank, presented to the nation by Sir Henry Tate in 1897, and much extended by the generosity of Lord Duveen, contains British masterpieces and works by modern foreign artists.

National Government,

the British Government set up in 1931 on the fall of the second Labour Government consequent upon the economic crisis of that year. It was headed by J. Ramsay MacDonald, the ex-Labour Premier, as Prime Minister, seconded by the Conservative Leader, Stanley (afterwards Earl) Baldwin, and had the co-operation of a part of the Liberal Party under Sir John Simon. At the General Election held immediately afterwards, it secured a majority of 425 over all other parties; in 1935 a second General Election maintained it in office with the reduced majority of 247 seats over the combined Opposition total. In June of that year Baldwin succeeded MacDonald as Premier, to be in his turn succeeded in 1937 by Neville Chamberlain. Its entry into office in 1931 was marked by a programme of drastic economies, which involved heavy cuts in social service expenditure and in the salaries of Government

employees. As the depression lightened somewhat these cuts were to some extent restored, the main interest of the Government being turned in the direction of a vast rearmament programme, financed by loans and increased taxation.

National Guard, The, a French citizen militia, first organized in Paris in 1789, with Lafayette as commandant, but suppressed in 1827; it was twice revived, but finally suppressed in 1872 after taking the part of the Paris Commune in 1871.

National Insurance. See Health Insurance, Old Age Pensions, Unemployment Insurance, Insurance.

Nationalization, the acquisition of industrial and distributing organizations by the State; a policy advocated in this country by the Labour Party, especially as regards mines and railways, and according to their more recent policy, of banks. Schemes of pure nationalization have, in recent years, been less popular than the creation of statutory bodies—such as the London Passenger Transport Board—which provide for a continuance of private ownership under a system of public management and profit limitation.

National Mark, a grading mark and other products, placed on foodstuffs and other products, authenticating their British origin. It was initiated by the Agricultural Products Act of 1928, and its use is controlled by a National Mark Committee. It consists of a map of England and Wales (or Scotland) with the slogan "Buying Begins at Home."

National Physical Laboratory,

a State institution under the Department of Industrial and Scientific Research established at Teddington, Middlesex, in 1901; its work consists of the standardization of instruments and general research on materials in connection with pure physics, engineering, aerodynamics, electricity, radio, metrology and metallurgy. The President of the Royal Society is Chairman of the General Board.

National Portrait Gallery,

home of the principal English collection of portraits of persons of historical importance in our island story; established originally at S. Kensington, and removed in 1896 to its present home adjoining the National Gallery. Scotland has its own National Portrait Gallery at Edinburgh.

National Registration, a system adopted in 1915 under which all inhabitants of the British Isles between the ages of 15 and 65 had to register in order that they might, if necessary, be called upon for war service. In 1938, its revival was suggested in some quarters as part of a campaign of preparedness against possible future wars.

National Trust, a society formed in 1895 and incorporated in 1907, for the purpose of preserving and administering places of historic interest or natural beauty. Among the areas acquired for preservation are many breeding grounds for birds which might otherwise become extinct, among them the famous Blakeney Point, where a well-known ternery protects terns, and the Farne Is. The Trust has done valuable work in saving beauty spots in the Lake District and elsewhere for the nation and in preventing the loss of amenities through commercial exploitation. Its properties, which are available for public enjoyment, are continually being added to by gift, bequest or purchase, and are now spread over all the British Isles.

Natron, a naturally-occurring mineral form of sodium carbonate (soda). It is found in Egypt, Kenya, Mexico, and elsewhere. Natron effervesces, with evolution of carbon dioxide, when a dilute acid, such as vinegar, is added to it.

Natural Gas, a product which almost always occurs in association with oil-borings; it consists largely of methane (g.v.), or marsh gas. It also contains some of the olefine series of hydrocarbons (g.v.), such as ethylene. It is collected and used, especially in U.S.A., for the lighting of towns and as a source of heat.

Natural History, that department which includes the sciences of zoology, botany, chemistry, natural philosophy or physics, geology, palaeontology and mineralogy. In a popular sense it is usually restricted to botany and zoology, or the study of vegetable and animal life.

Naturalization. See *Alien*.

Natural Selection, name given by Darwin to the process by which those plants and animals most fitted to contend with their environment survive at the expense of others less fitted.

Nautch Girl, Nautch or religious ballet dances of India, also employed as a temple attendant. The dances consist for the most part of posturing the body with swaying arm movements, and little motion of the feet.

Nautilus, a genus of cephalopod molluscs with spiral shells, the chambers being the successive residences of the animal, which forms new ones as it grows, the last only being inhabited by the living animal. The nautilus inhabits tropical seas; there are only three or four species. They have 2 pairs of gills and many small retractile tentacles without suckers.

NAUTILUS

Navajos (Navahos), a once warlike tribe of N. American Indians of the western U.S.A., now numbering about 30,000, settled in reservations in New Mexico and Arizona.

Naval Cadet. After passing a qualifying examination a candidate wishing to enter the executive branch of the Navy is termed a cadet. He then spends a period of elementary instruction in the Royal Naval College at Dartmouth, after which he is sent to sea for a term of years, when he passes through special finishing courses of instruction at the various naval educational establishments, such as the gunnery, torpedo, and pilotage schools and the Royal Naval College, Greenwich, at each of which he undergoes an examination. He then becomes a midshipman.

Naval Reserve. The British Naval Reserve consists of the Royal Naval Reserve, formed from officers and men of the mercantile marine holding guarantees of seafaring competence according to their rank or rating, who attend periodical courses of instruction in naval matters, and the Royal Naval Volunteer Reserve, composed of Volunteers not professionally connected with the sea, who also attend for periods of annual training. Both classes are liable for service in the event of hostilities. Time-expired men of the Navy are also organised in a Royal Fleet Reserve.

Navan, market town of Co. Meath, Eire (Ireland), 30 m. NW. of Dublin, at the junction of the Blackwater and Boyne. It is a hunting and fishing centre, and makes woollens. Pop. 3,600.

Navarino, a bay on the SW. coast of the ancient Pylos, Morca, Greece, close to the scene of the naval victory of the Athenians over the Spartans, 425 B.C., and of the annihilation of the Turkish and Egyptian navies by the combined fleets of England, France, and Russia, under Codrington, Oct. 20, 1827, the battle which heralded Greek independence.

Navarra, province of N. Central Spain, portion of the old kingdom of Navarre, which lasted up to 1512, the remainder of which now forms the French dept. Basses-Pyrénées; the Spanish province is very varied in surface and climate; in the N. the people are chiefly Basques; maize, red wine, silver and copper are the chief products. Area, 4,055 sq. m. Pop. 352,500.

Nave, in architecture, the principal body of a church, so called because of its resemblance in shape to an inverted ship. It is frequently flanked on each side by aisles, and crossed at about the middle by transepts.

Navigation, the science of directing the course of a seagoing vessel from place to place and of ascertaining its position at any given time. Until the introduction of the mariner's compass as a result of contacts with the Near East just before the Renaissance, sailors had no means of guiding their vessels save observation of the heavens, and were usually therefore compelled to keep within sight of land. The compass enabled Columbus to cross to America, although at that time ignorance of the Magnetic Pole made full reliance on this instrument hazardous.

To-day the navigator has numerous alternative methods of checking his position. The Patent Log gives him his speed and the distance covered through the water. The sounding machine tells him the depth and nature of the sea-bottom. Astronomical observation by means of the sextant will confirm to a high degree of accuracy, when conditions permit, the conclusions arrived at by other means. The gyroscopic compass always points to the true North, as opposed to the Magnetic North. Audible warnings from fog-horns, bell-buoys, etc., are being superseded as warnings to ships approaching the land by more modern devices. Directional wireless will give highly accurate information on a ship's position, and the Leader System by means of an electric cable on the sea-bed enables a ship with the necessary apparatus to follow the fairway into the harbour.

Navy. The British, was traditionally the creation of Alfred the Great in 897, and since his day some kind of national war fleet has existed almost continuously. Steam was first used in 1840, the first ironclad was built in 1860, and the first submarine in 1901. During the World War the principal naval battles were those of Heligoland Bight, Coronel, and the Falkland Isles (1914), the Dogger Bank (1915), and Jutland (1916). The present-day British Navy consists of (a) capital ships, carrying armaments varying from 8 guns of 13-in. calibre to 8 of 15-in., and ranging in size from 20,000 to 40,000 tons, and in speed from 21 to 31 knots. (b) Cruisers. These carry armaments varying from five 6-in. guns to seven 7-in. and range in size from 3,750 tons to 7,500 tons and in speed from 23 to 31 knots. (c) Surface torpedo craft. These include flotilla leaders and ordinary destroyers. All are fitted with depth charges for destroying submarines. (d) Submarines. These are fitted with four to eight torpedo tubes, and some carry a 12-in. gun. There are other classes of ships for auxiliary duties, such as merchant cruisers, sloops, mine-sweepers, patrol craft, and aircraft ships. The whole control and administration of the British Navy is theoretically in the hands of

the Lord High Admiral, but the actual duties are carried out by Lords Commissioners of the Admiralty, headed by a cabinet minister, the First Lord. The Washington Treaty of 1922 between the chief Naval Powers, supplemented by a later agreement in 1930 and 1935-1936, limits by agreement the number and armament of the ships of the signatory powers.

Navy League, a body founded in the public in the Navy, distribute information concerning it, and advocate its maintenance on the strongest possible lines as a guarantee of Britain's status.

Nawab, a viceroys of a province in the Mogul empire, applied also to a Mohammedan chief in India; in the form Nabob, was frequently applied in the 19th Century to an Englishman who had returned home after acquiring wealth in India.

Naxos, Greek island of the Cyclades, in the Aegean Sea, famed for its marble; it exports wine, fruits and emery powder. Pop. c. 17,000.

Nazareth, town in Galilee, Palestine, 65 m. N. of Jerusalem; the childhood home of Jesus Christ. Pop. c. 10,000.

Nazarites, or *Nazirites*, persons among the ancient Jews who took a vow to abstain from strong drink and from cutting their hair, either for a limited period or for life; the vow was made as an act of special religious devotion.

Naze, town in NE. Essex, England, 5 m. S. of Harwich.

Nazis (from German *nazional*), the popular name for the National Socialist Party of Germany, organised from 1922 by Adolf Hitler (*q.v.*) as a political fighting machine. After 10 years' rapid growth it secured in 1933, complete ascendancy in the German State, and its leader became Chancellor of the Reich and, later, President of the Republic, under the self-bestowed title of Führer (leader). The Nazi party, in the eyes of its members, symbolises the revival of the *Nationalgeist* or national spirit of Germany. It has adopted the Swastika (*q.v.*) as its distinctive emblem. See also *Aryan*; *Germany*; *Hitler*, *Adolf*; *Jews*.

Neagh, Lough, large lake in Northern Ireland, touching all its counties except Fermanagh; is the largest lake in the British Isles; area, 153 sq. m.; is 18 m. long, and has an average breadth of 10 m. and a greatest depth of 102 ft.

Neanderthal Man, typical representative of a supposed race of early near-human beings, named from some remains found near Neanderthal, Prussia, in 1856. Neanderthal man, a cave-dweller of a very low type of development, probably died out about the end of the last ice age. His culture was of the variety known as Mousterian; he was probably unacquainted with the use of fire.

NEANDERTHAL MAN

Neath, a borough and river port of Glamorganshire, Wales, 6 m. N.E. of Swansea; is an old town, and has interesting ruins of an abbey and of a castle (burned 1231); has copper, tin, iron, and chemical works. Pop. 33,000.

Nebraska, one of the west central States of the U.S.A. There are large sandy stretches in the N., and touch prairie land in S. and E.; maize and other grains, hay, sugar, apples, potatoes, etc., are grown, and there are large potash deposits. Omaha and Lincoln (capital) are the chief centres of the manufacturing industries.

The climate is dry and bracing; wolves, foxes, skunks, etc., abound, chiefly in the Bad Lands of the N. Nebraska was incorporated in the Union in 1867. Area, 77,500 sq.m. Pop. 1,378,000.

Nebula, a celestial phenomenon seen from the earth as a patch of light that cannot be resolved by the telescope into single stars. They can be divided into *dark nebulae*, or great clouds which obscure part of the Milky Way, appearing as voids in the heavens; *diffuse luminous nebulae*, like the great nebula in Orion, which are clouds of fine dust or rare gas, owing most of their luminosity to neighbouring stars; *planetary nebulae*, like the ring nebula in Lyra, which have in most cases a central bright star, and are probably now in a late stage of development; *spiral nebulae*, like that in Andromeda, considered to be "island universes" outside our system.

Nebular Hypothesis, a theory of the origin of the solar system published by Laplace in 1796. He imagined that the system started as a hot gaseous nebula which cooled and contracted, leaving rings of material which condensed to form the various planets. The theory has now been discarded as untenable.

Necker, Jacques, French financier, born in Geneva; became in 1777 Director-General of Finance in France, and attempted, by borrowing and retrenchment, to restore public credit, but after 5 years was dismissed; was twice recalled after 1788, but finally resigned in 1790, after the outbreak of the Revolution, retiring to Switzerland. (1732-1804).

Necromancy, the attempt to obtain knowledge of future events by conjuring up the spirits of the dead, a practice followed at various times by nearly all civilised and uncivilised peoples, including the ancient Jews and Greeks. Classical instances are the raising of Saul's spirit by the Witch of Endor, referred to in the Bible, and the raising of the shade of Tiresias by Odysseus, referred to in Homer's *Odyssey*.

Necropolis, literally "city of the dead," a name originally applied to a suburb of Alexandria devoted to the reception of the dead, and hence extended to any cemetery. The London Necropolis, with a crematorium, is situated at Brookwood, Surrey, and was established in 1889.

Nectar, in Greek mythology, the drink of the gods, which, with ambrosia (their food) nourished the ichor (their blood) and kept them ever in immortal youth.

Needles, The, a group of curious chalk rocks off the W. end of the Isle of Wight, separated from the mainland by sea's action. A lighthouse stands on one of the rocks.

Nefertiti, wife of Sakere, King of Egypt in the 18th dynasty, 14

Centuries B.C. A remarkable sculptured and coloured stone head of the queen, one of the finest extant specimens of Egyptian art, was discovered at Tell el-Amarna, and is now preserved at Berlin; reproductions have made her perhaps the most real to this generation of all the great beauties of the past.

NEFERTITI

Negative, in photography, a picture of an object in which the lights and shadows are reversed so that the shady part appears white and the light in it appears dark.

Negligence. The general rule of English law respecting negligence is that everyone is bound to exercise due care towards his neighbours in his acts and conduct, and omits or falls short of it at the peril of having to pay damages in an action of negligence. In some cases this ground of liability may co-exist with a contractual liability towards the same person arising out of the same facts, though the tendency is to hold that facts which constitute a contract cannot have any other legal effect.

Liability in specific cases of negligence is largely determined by precedents covering a particular category of cases. In order that a man's negligence may entitle another to a remedy against him, the negligence must be a proximate cause of the damage; hence, if the plaintiff could, by the exercise of due care at the decisive moment, have avoided harm, his contributory negligence, as it is called, may disentitle him to damages. In criminal law whatever constitutes murder when done by fixed design, constitutes manslaughter when it arises from culpable negligence.

Negotiable Instrument, a form of credit, such as a bank note, cheque, debenture bond payable to bearer, exchequer bill, dividend warrant, promissory note, etc., which may be passed from the owner to another person for a consideration, or for cash. A negotiable instrument may be sued on by the holder, and the property passes by mere delivery. The holder in due course of a negotiable instrument is not affected by defects in, or lack of title of, his transferor or previous holders. The crossing of a cheque or postal order renders it not negotiable within certain conditions. A postal order may be marked "not negotiable" to protect the true owner.

Negrin, Juan, Spanish statesman, Premier and Minister of Finance in the Spanish Republican Government from 1937; has represented Spain on the League of Nations and made repeated appeals for the enforcement of neutrality in the Civil War on the part of the European Powers.

Negritos, name originally given to a people of the Philippine Is., and applied later by extension to negro races of small stature found in Africa, Melanesia and parts of the East Indies.

Negro, Rio, river of northern South America, rising as the Guainia in the republic of Colombia, and flowing E. and S. though a course of 1,350 m. to meet the Amazon near Manaos.

Negroes, one of the main ethnological groups of the human race, distinguished in general by dark skin, fuzzy hair, broad nose, and protruding lips; they originated probably in a primitive Central Asiatic stock which spread SW. to Africa and E. to the Indies and Melanesia in successive waves of migration. In early times the mixture of negro and Semitic stocks produced, in the Nile valley, the first great civilisation, that of the Egyptians. In Africa, there were in early times various centres of culture—along the Gulf of Guinea, culminating in the S.E. at Zimbabwe, and among the tribes of the interior, whence came the Bantus who conquered most of South Africa.

Out of the conflicts between Moslem and Negro in the 15th Century arose the practice of enslaving the conquered African. From the immigrant slaves has descended a large negro population in the U.S.A., especially in the S.E. states, now amounting to over 12 millions, the problem of whose status has not yet been completely solved. In Africa itself the partition of the country between European powers and the economic exploitation of the negro have tended to destroy native

culture. Of late years, however, education has improved, combined with a better understanding of the negro himself. A keen interest in negro art (particularly Nigerian) has also arisen, and efforts have been made to prevent its extinction. The estimated number of negroes in Africa is 210,000,000.

Nehemiah, Jewish leader sent by Persia, to rule Jerusalem and restore its worship after the Babylonian captivity; his story is told in the Biblical book bearing his name.

Nehru, Motilal, Indian politician, by establishment of "dyarchy" in 1919 he forsook European ways, joined Gandhi in the non-co-operation movement, and gave up his splendid house to the use of the Indian National Congress. In 1928 he produced the Nehru Report, recommending Dominion status for India, and took part in "civil disobedience." Sentenced, 1930, to "six months' imprisonment; but soon released on account of illness. Died at Lucknow. (1881-1931).

Neilson, Julia, English actress, born in London; made her first stage appearance at the Lyceum in 1888; first American appearance, 1895, at New York. With her husband, Fred Terry, she managed London theatres, 1900-1930. (1869-).

Neilson-Terry, Phyllis, English actress, born in London, daughter of Julia Neilson and Fred Terry. First appearance at Blackpool in 1909; played in London, 1910. Her first American appearance was made in New York, 1914. (1892-).

Nejd, formerly an independent emirate of Saudi Arabia, now part of the Kingdom of Saudi Arabia. An inland district, it is mainly a lofty plateau, desert save for the fertile valleys and oases. Its people, mainly Bedouins, rear horses and camels, which are exported. Other products are dates, hides and clarified butter. Riyadh, one of the two capitals of the kingdom, and Ruyuf are the largest towns. Pop. 3,000,000.

Nelson (1) borough in Lancashire, England, 3 m. N.E. of Burnley; manufactures cotton goods. Pop. 36,500. (2) provincial district in N. of South Island, New Zealand. Area, 10,870 sq. m. Pop. 59,600. Its capital of the same name, which manufactures textiles and preserves, has a pop. of 13,700. (3) town in British Columbia, Canada, on Kootenay Lake, with a lumber trade. Pop. 6,000.

Nelson, river of Manitoba, Canada, running from Lake Winnipeg N.E. to Hudson Bay, which it enters by Port Nelson. Navigation is obstructed by rapids. Length, c. 460 m.

Nelson, Horatio, first Viscount, English admiral, born at Burnham Thorpe, Norfolk. Entering the navy in 1770,

in 1780 he headed the expedition against San Juan, and in 1781 acted under Lord Hood in American waters. He met and married in 1787 a Mrs. Nesbit. After living for five years in retirement, in 1793 he was again summoned to active service, and in command of the *Agamemnon* assisted in the Mediterranean operations of Lord Hood, having his right eye injured during the storming of Calvi, in Corsica (1794).

The engagement with the Spaniards off Cape St. Vincent (1797) brought him promotion to the rank of rear-admiral; in the same year he lost his right arm at Santa Cruz, and in the following year annihilated the French

LORD NELSON

fleet in the Bay of Aboukir, for which he was raised to the peerage as Baron Nelson, and created Duke of Bronte by the king of Naples.

At this time he began his lifelong liaison with Lady Hamilton (q.v.). As vice-admiral, nominally under Sir Hugh Parker, he in 1801 sailed for the Baltic and inflicted a signal defeat on the Danish fleet off Copenhagen; for this he was made viscount and commander-in-chief. On Oct. 21, 1805, he crowned his career by a memorable victory off Trafalgar over the French and Spanish fleets under Villeneuve, being mortally wounded at the height of the battle. (1758-1805).

Nelson's Column, a monument in memory of Lord Nelson in Trafalgar Square, London, begun in 1840 and finished in 1867; designed by William Railton, it is a copy of a Corinthian column of the Temple of Mars Ultor at Rome, and is 170½ ft. in height.

Nemesis, the ancient Greek personification of the idea of the remorseless retribution attached to every evil act; it was conceived as the divine vengeance for hubris, or man's insolent self-confidence in the face of the gods.

Nen, or **Nene**, river of England, running mainly N.E. through Northamptonshire, Cambridgeshire and Lincolnshire to the Wash. It passes Northampton, Peterborough, and Wisbech. Length, 90 m.

Nenagh, market town of co. Tipperary, Eire (Ireland), 24 m. N.E. of Limerick. It is an agricultural centre and has slate quarries. There are remains of a Norman castle. Pop. 4,500.

Neodymium, a metallic chemical element belonging to the group of rare-earth metals. Symbol Nd; atomic number 60; atomic weight 144.3.

Neolithic, or **New Stone Age**, the stage in man's development in which he used worked and polished implements of stone, before discovering the use of metals. It is so called in opposition to the paleolithic (old stone) age, when the stone was merely chipped off without further working.

Neon, a non-metallic chemical element, belonging to the group of the rare gases. Symbol Ne; atomic number 10; atomic weight 20.18. It occurs in minute traces in the air, where it was discovered by Sir William Ramsay and Professor M. W. Travers in 1898. At low pressures, it emits a fine reddish-orange glow when subjected to electric discharge, a fact turned to commercial account in the popular neon-tube advertisements.

Neo-Platonism, a system of philosophy that originated in Alexandria at the beginning of the 3rd Century, from the combination of Eastern, especially Persian and Semitic, religious ideas with the philosophy of Plato. Its principal exponents were Plotinus, Porphyry and Iamblichus; it saw man as the incarnation of an emanation from the divine reason or Logos, linked with the absolute through a graded hierarchy of spiritual beings. Their thought largely affected the development of Christian theology.

Nepal, small Himalayan kingdom to the N. of India, occupying a narrow, mountainous territory along and including the southern slopes of the Himalayas, which separate it from Tibet; consists mainly of valleys and intervening mountain ridges. The Gurkhas (q.v.) are its ruling race. Hinduism and Lamaist Buddhism the dominant religions. Capital, Kathmandu. Area, 54,000 sq. m. Pop. 5,600,000.

Nephrite, jade, a hard, green stone, a native silicate of calcium and magnesium. It occurs in Iran (former Persia), China, Siberia and New Zealand.

Nephritis, inflammation of the kidneys, of which desquamative nephritis or Bright's Disease is an acute or chronic form; both are characterised by the presence of albumen in the urine. It may result from exposure to cold, intemperance, or as a complication of erysipelas or diphtheria. The kidneys become congested with blood, and dropsy is a frequent concomitant. Waste products normally voided by the kidneys may poison the system with fatal results.

Neptune, a Roman god, specially of the sea and marine affairs, identified with the Poseidon of the Greeks; is represented with a trident in his hand.

Neptune, with the exception of Pluto, discovered in 1930, the outermost planet of the solar system. It revolves round the sun at a distance of 2,800 million miles in a period of 165 years; its period of rotation on its axis is uncertain, but is believed to be either 7½ or 15½ hours. Its diameter is 4 times and its mass 17 times that of the earth. It was discovered by Adams and Leverrier in 1846, after calculations based on the irregularities of the orbit of Uranus. It has 1 satellite.

Nereids, in Greek mythology, nymphs of the Mediterranean Sea, daughters of Nereus, 50 in number, and attendant on Poseidon.

Neri, St. Philip, Italian priest, born in Florence, founder of the Congregation of the Oratory; did much to revive religion in Rome, of which he is a patron saint. His heart is said to have burst in his breast from the excess of his love of God. Festival, May 26. (1515-1595).

Nero, Roman emperor from A.D. 54 to 68, born in Antium. After the murder

of Claudius, instigated by his wife Agrippina, Nero's mother by Cn. Domitius Ahenobarbus, Nero seized the throne, excluding Britannicus, the rightful heir. After reigning without serious blame for 5 years, he became a tyrant, killed Britannicus and his own mother and wife, and persecuted the Christians, on a trumped-up charge of having caused the great burning of Rome, suspicion of which rested, probably unfairly, on Nero himself. After he had executed Seneca (q.v.) and others for conspiracy, and killed his second wife Poppaea, rebellion broke out. He fled from Rome and committed suicide.

Nerva, Roman emperor from 96 to 98, elected by the Senate; ruled with moderation and justice; resigned in favour of Trajan. (32-98).

Nervous System, the complex of cells, fibres, end-organs, and connecting tissue, commonly known as "the nerves," which convey sensations from the various parts of the body to the brain and responsive impulses from the brain to the rest of the body. Efferent nerves conduct impulses from, and afferent nerves to, one of the various nerve centres, of which the chief is the brain, supplemented by the spinal cord. The cell, together with its processes, is known as a neuron or nerve-unit. The nerves are grouped into 2 great systems, the cerebro-spinal system, centring on the brain and spinal cord, and the sympathetic system, centring on ganglia adjoining the spinal cord, and controlling the life processes, such as digestion, respiration, and blood circulation, which are not under voluntary control.

Ness, Loch, the second largest loch in Scotland, in Inverness-shire, is 22½ m. long and has an average breadth of

NERO

1 m. and an extreme depth of 280 ft.; in recent years has been famous for the alleged appearances of a supposed "Loch Ness Monster," which the less credulous have suggested may be a school of otters.

Nessus, in classical legend, a Centaur who, for attempting to carry off Dejanira, Hercules' wife, was shot by Hercules with an arrow dipped in the blood of the Hydra (*q.v.*), and who in dying handed to Dejanira his shirt or mantle, dipped in his poisoned blood, as a charm to regain her husband's affections should he prove unfaithful.

Nestor, in Greek legend, king of Pylos, the oldest, most experienced, and wisest of the Greek heroes at the siege of Troy.

Nestorianism, a Christian heresy, named after Nestorius, a Syrian, Patriarch of Constantinople from 428 to 431, when he was deposed by the Council of Ephesus. It maintained that Christ's human and divine natures were distinct, and therefore denied to the Virgin Mary the title "Mother of God." After the Nestorians had been expelled from the Church they continued to exist as a sect in Palestine and Syria, and sent out missionaries to Central Asia and even China, where a flourishing Nestorian Church existed until about the 16th Century. Nestorian communities, now called Chaldeans, still exist in the neighbourhood of Kurdistan.

Net Ball, a ball game, popular in girls' schools, whose object is to propel the ball, which resembles a football, with the hand into a netted ring attached to a goal-post. The team is of seven players, of whom only one, the "shooter," may score a goal. The ball must not be carried, but "passed" from one member of the team to another. The court is 50 ft. by 100 ft.

Netherlands, The, historically and popularly known as Holland, a small maritime country of W. Europe, bordered on its N. and W. by the North Sea, and having Germany on its E. and Belgium to the S. It comprises, besides the mainland, 2 island groups, 1 in the N. and 1 in the S. Much of its flat surface lies below the level of the sea, and where there are no natural sandhills, is protected from inundation by enormous dykes, 365 ft. thick; much of the soil has been reclaimed by draining lakes and by pushing back the sea walls, the size of the country having thus been much increased since 1833. The most recent extension has consisted of the draining of parts of the Zuider Zee (*q.v.*) completed since the War. Canals traverse the country in all directions.

The climate is for the most part similar to that of England, but greater extremes of heat and cold are experienced. Farming is the staple industry; butter and cheese are the most valuable products, and are largely exported; the fisheries, coast and deep sea, are also of much importance. Manufactures are retarded by the want of coal, but wind supplies motive power for textile factories (cotton, woolen, and silk), gin distilleries, pottery works, margarine and cocoa factories, etc. Holland still maintains a busy carrying trade with all parts of the world, especially with its many rich colonies in the East and West Indies.

The government is a limited monarchy; the legislative power is seated in the States-General, an assembly of 2 chambers, the one elected (for 4 years) by direct suffrage, the other (for 6 years) by provincial councils. Primary education is free and compulsory. No religion is established, but rather more than half the people are Protestants, the remainder Roman Catholics. The birth of Holland as an independent European power took place in the 16th Century, when, after an heroic and protracted struggle, it freed

itself from the yoke of Spain, then the most powerful nation in the world. Area, 16,770 sq. m., of which about 2,570 sq. m. are coastal waters. Pop. 8,390,000.

Netley, village in Hampshire, England, on the shore of Southampton Water, 3 m. S.E. of Southampton; at its military hospital Army nurses are trained; there are ruins of a Cistercian abbey. Pop. c. 1,500.

Nettle, a genus of plants (*Urtica*), consisting chiefly of neglected weeds, having opposite or alternate leaves covered with fine stinging hairs which contain an acrid and caustic fluid. The species are mainly herbaceous. *Urtica dioica* is the Common Nettle. The Dead Nettles (*q.v.*) are species of Labiata.

Nettlerash, or *Urticaria*, an irritating eruption in the skin causing a sensation like the stinging of nettles. It may be acute or chronic, frequently caused by errors of diet.

Nettle Tree (*Celtis australis*), a deciduous tree of the Elm (*Ulmaceae*) order, with simple and generally serrated leaves, resembling those of the nettle, but without the sting. It grows in Europe and has a sweet, fleshy, edible drupaceous fruit.

Neuchâtel, a western canton of Lake Neuchâtel and France; the surface is diversified by the Jura Mts.; the greater part of the inhabitants are French Protestants. Coal and iron are found, stock-raising and agriculture are engaged in, but the great speciality of the canton is watchmaking. Neuchâtel was incorporated in the Swiss Confederation in 1815. Area, 310 sq. m. Pop. 124,300. Neuchâtel, capital of the canton, on the NW. shore of the lake, 86 m. N.E. of Geneva, is chiefly engaged in the manufacture of watches, jewellery, etc.; it has a university. Pop. 22,700. Lake of Neuchâtel is a beautiful sheet of water, 25 m. in length, and from 3 to 6 m. in breadth.

Neuilly-sur-Seine, a suburb of Paris, N. of the Bois de Boulogne, where in 1919 the treaty of peace between Bulgaria and the Allied Powers was signed.

Neukölln, town of Prussia, Germany, formerly called Rixdorf, a S.E. suburb of Berlin, in the district of Potsdam. Its many industries include the making of textiles. It is now a part of the city of Berlin. Pop. 237,000.

Neuralgia, a spasmodic or continuous pain occurring along the course of one or more distinct nerves, and by this localisation distinguished from other pains. A common form, neuralgia of the chief nerve of the thigh (sciatic nerve), called sciatica, affects the buttocks and back of the thigh down to the knee, as well as the front, back, and outside of the leg and foot. Neuralgia invariably indicates a weak state of the general system. The primary cause may be inflammation of the nerve, a swelling upon it, or irritation produced by an ulcer.

Neurasthenia, a condition of nerve weakness, due as a rule to overwork or anxiety, intemperance or errors of diet. The symptoms include melancholia, depression, headaches, insomnia and muscular weakness; but the condition is often largely subjective, and accompanied by little physical disability.

Neuritis, inflammation of the nerve-sheath, the interstitial tissue, or the fibres,

Prolonged pressure may induce acute neuritis of a single nerve, while inflammation extending from an injured part is also a contributory factor. An unhealthy condition of the blood is another cause. Multiple neuritis is generally due to the toxins of various diseases, e.g., diphtheria, influenza, etc.

Neurosis, a term in pathology to denote not attributable to organic disease: they give rise to morbid fancies and a neurotic and hysterical temperament. Their treatment is undertaken by psycho-therapy (q.v.), including hypnotism and autosuggestion. These measures, however, do not remove the cause, and are in most cases merely agents of relief. According to Freud (q.v.) most neuroses are due to some cause associated with sex repression.

Neutrality, the condition of a state in a war between other states. A neutral state may conduct normal relations with belligerent states, provided that no direct aid is given in the prosecution of the war. The present rules governing neutrality are contained in the Hague Conventions of 1899 and 1907. While a neutral state is bound to maintain impartiality, the belligerent states are compelled to respect the inviolability and sovereignty of a neutral state. The capture of a belligerent ship by another belligerent ship or an attempt to exercise a right of search by belligerent warships within the territorial waters of a neutral state is a violation of neutrality. Belligerent vessels are, however, permitted to enter neutral ports for purposes unconnected with war, but a belligerent is not permitted to arm vessels or to recruit within neutral jurisdiction. The export of arms from a neutral state, as part of private commerce, is legitimate, the goods, however, being subject to seizure as contraband. The rules of neutrality are at present in a somewhat chaotic state, having been in some respects re-interpreted between 1936 and 1938 in relation to the Civil War in Spain.

Neutrodyne, a special type of circuit receiving set, designed to prevent oscillation.

Neutron, one of the elementary constituents of matter, a particle with the mass of a proton (q.v.) but no electric charge. It is perhaps a combination of a proton with a negative electron. Neutrons may be obtained by the bombardment of (e.g.) beryllium by alpha particles, that is, rapidly-moving helium atoms which have lost two negative electrons and are therefore charged with 2 units of positive electricity.

Neuve Chapelle, village in the dept. of Nord, France. The advancing German army occupied it in Oct., 1914, and it was the scene of an important battle in March, 1915, when British troops captured the village with heavy casualties.

Neva, a river of Russia issuing from the SW. corner of Lake Ladoga, flows westward past Leningrad, and discharges into the Bay of Cronstadt, in the Gulf of Finland, after a course of 40 m.

Nevada, western state of the U.S.A., the most thinly populated of all the states; between the Rocky Mountains on the E. and the Cascades and the Sierra Nevada on the W. Elevated, cold, dry, and barren, it offers little inducement to settlers. The great silver discoveries of 1859 brought it first into notice, and mining for silver, copper and gold still remains the chief industry. Virginia City and Carson (capital) are the chief towns. It was admitted to the Union in 1864. Area, 110,800 sq. m. Pop. 91,050.

Nevinson, Christopher Richard Wynne, London and Paris and first exhibited in 1910.

He was an official artist during the World War, in which he served in the army for two years. His work shows Cubist and Futuristic influences. (1889-).

Nevis, an island in the Leeward group (q.v.) with capital Charlestown (Pop. 1,158); colonised in 1628; exports cotton, coconuts, and fruits. Area, 50 sq. m.

Nevis, Ben. See Ben Nevis.

Newark, town and borough of Nottinghamshire, England, with machinery manufactures and trade in coal and corn. King John died in its castle, now a ruin. Pop. 19,500.

Newark, largest city of New Jersey, U.S.A., 7 m. W. of Jersey City. It has extensive tanneries, and manufactures machinery, chemicals, and leather. Pop. 442,000.

Newbattle, village of Midlothian, Scotland, on the South Esk, near Dalkeith, the site of Newbattle Abbey, formerly seat of the Marquess of Lothian.

New Bedford, city of Massachusetts, U.S.A., once the seat of important whale fisheries; now a manufacturing centre for cotton goods, machinery, oil, and boots and shoes. Pop. 113,000.

Newbolt, Sir Henry John, British author and poet; in 1893 he published his first novel, but it is chiefly his poems that made his reputation, notably *Drake's Drum* which appeared in his *The Island Race*. He was knighted in 1915. (1862-1938.)

New Britain, largest island of the British Archipelago, in the West Pacific, formerly a German protectorate under the name New Pomerania, now under Australian mandate; copra is produced. Chief town, Rabaul. Area, 14,600 sq. m. Pop. c. 100,000.

New Brunswick, a SE. province of Canada, facing the Gulf of St. Lawrence on the NE. and the Bay of Fundy on the SE., joined on the E. to Nova Scotia by the isthmus of Chignecto. It has many lakes, magnificent forests of pine and other woods, and the fertile valleys of the Rs. St. John, Restigouche and Miramichi. Timber is the chief export; fisheries are of great importance. The minerals, though plentiful, are little worked, though coal is mined in good quantities. Many of the inhabitants are of French origin, for New Brunswick formed part of the old French colony of Acadia. Capital, Fredericton (pop. 8,800); largest towns, St. John (47,500) and Moncton (20,600). Area 27,985 sq. m. Pop. 408,200.

Newbury, borough and market town of Berkshire, England, 17 m. SW. of Reading. It is an agricultural centre, has racing stables and holds race-meetings. Here two battles took place during the Civil War, one a Royalist defeat, the other indecisive. Pop. 14,500.

New Caledonia, an island of the South Pacific belonging to France, the most southerly of the Melanesian group, lying about 800 m. E. of Australia; is mountainous, produces the usual tropical fruits, and exports some nickel, cobalt, coffee, etc.; is used by the French as a convict station; discovered by Captain Cook in 1774 and annexed by France in 1853; Nouméa, on the SW., is the capital. Area, 8,550 sq. m. Pop. 55,200.

Newcastle, Henry Pelham-Clinton, fifth Duke of Newcastle, British politician, held office under Peel, and in 1848 became Chief Secretary for Ireland. He later served at the Colonial Office, and was in charge of the War Office at the outbreak of the Crimean War, resigning in 1855, but returning to the Colonial Office from 1859 to 1864. (1811-1864.)

Newcastle, Thomas Pelham Holles, British statesman; created Duke of Newcastle, first Duke of Newcastle, became a Secretary of State nine years later, and in 1754 succeeded his brother, Henry Pelham, as Prime Minister, retaining office until 1756, and resuming it the following year to resign in 1762. (1693-1768).

Newcastle-under-Lyme,

borough and market town of Staffordshire, England, 40 m. S. of Manchester; is a well-built town, actively engaged in brewing, malting and pottery. Pop. 61,000.

FIRST DUKE OF
NEWCASTLE

Newcastle-upon-Tyne, a city and county town of Northumberland, England; has a cathedral, and a college of Durham University; situated on the N. bank and 10 m. from the mouth of the Tyne, 275 m. N. of London; four bridges (including Robert Stephenson's famous High Level Bridge) connect Newcastle with Gateshead. It is the chief centre of the English coal trade, and its industries include shipbuilding, engineering and metal manufactures of all kinds. Pop. 299,400.

Newchang, town and port of Manchuria, in the Liaotung peninsula. Bean-oil and bean-cake are made and exported and there are extensive fisheries. Pop. 137,000.

Newcomen, Thomas, English inventor, born in Dartmouth. A blacksmith by trade, he invented a steam-engine in which the piston was raised by steam and driven down by the atmosphere after the injection into the cylinder of a squirt of cold water. It was superseded by the steam-engine with separate condenser later invented by Watt. (1663-1729).

New Deal, the inclusive term for the programme on which Roosevelt fought and won the presidential elections in the U.S.A. in 1932 for the Democratic party, and the social and economic legislation introduced by him to mitigate the effects of the continued economic depression and to promote recovery. See **National Recovery Act**, under **N.R.A.**

New England, a name given in 1614 by Captain John Smith to the eastern portion of the United States, comprising the present states of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut. The inhabitants, known distinctively as Yankees, are largely of Puritan and Scottish descent.

New Forest, a district in the SW. of Hampshire, made a royal forest by King William Rufus. One-fourth of the area consists of enclosed plantations, chiefly of oak and beech, roamed by "New Forest ponies." Lyndhurst is the principal town.

Newfoundland, the oldest island of Britain, situated at the mouth of the Gulf of St. Lawrence, N. America; is triangular in shape, the northern apex running close in to the coast of Labrador, part of which is politically united to Newfoundland. Inland the country is bleak, sparsely populated, and ill-cultivated; lakes and rivers abound. The deeply indented coast provides excellent harbours for the large fishing fleets that frequent it. Minerals are found, including coal, iron, lead and copper; agriculture and timber felling are important activities, but the

fisheries—cod, salmon, herring and—form the staple industry. St. John's is the capital.

Discovered in 1497 by John Cabot, seized by the English in 1583, and finally ceded to Britain by the French (who retained certain fishing rights) in 1713. After a serious economic crisis the island's Dominion government was in 1833 superseded by consent of the people, and temporarily replaced by a governing Commission of six members, three from the island and three from the United Kingdom, who advise the Governor. Area, 42,730 sq. m. Pop. 289,600.

Newfoundland Dog, a large, handsome,

long-coated breed, originally introduced into Great Britain from Newfoundland. Its thick, curly hair is either black or black and white in colour, dogs of the latter colouring being called "Landseers" after that

NEWFOUNDLAND DOG

artist's well-known picture. The dog is a good retriever, swims well and is noted for its courage and fidelity.

Newgate, a former London prison, at the W. entrance to the City, in existence as early as 1218. Destroyed in the Great Fire, it was rebuilt in 1770 but ceased to be used in 1877, and in 1904 was demolished, the Central Criminal Court being built on its site.

New Guinea, large island N. of Australia, from which it is divided by Torres Strait (90 m. wide); is an irregular, mountainous, well-irrigated territory, the western half in Dutch possession, the East administered by Australia, partly (the S.E.) as a territory of the Commonwealth (Papua), partly (the N.E.) under a mandate, this latter portion having until 1914, when it was captured by the Australians, been a German colony. Gold and tropical produce are exported. A good deal of the interior is still almost unexplored. Dutch New Guinea has an area of 160,500 sq. m. and a pop. of 200,000; N.E. New Guinea (the mandated territory), area 93,000 sq. m., pop. c. 600,000; Papua, area 90,500 sq. m., pop. c. 300,000.

New Hampshire, north-eastern state of the U.S.A., in New England, on the Atlantic, from the beauty of its lake and mountain scenery called the "Switzerland of America"; has considerable agriculture, and manufactures boots and shoes and cotton goods. Manchester, on the Merrimack, is the largest city; the capital is Concord. Area, 9,340 sq. m. Pop. 465,800.

Newhaven, a seaport of Sussex, England, on the Ouse, 4 m. S.E. of Lewes; the terminus of a cross-channel service to Dieppe. Pop. 7,400.

New Haven, chief city and seaport of Connecticut, U.S.A., 73 m. N.E. of New York; the seat of Yale University, founded 1701; is an important manufacturing centre, producing rifles, ironware of all kinds, carriages, clocks, etc. Pop. 162,700.

New Hebrides,

a group of some 30 volcanic islands (80 inhabited) in the Western Pacific, lying W. of the Fiji islands and N.E. of New Caledonia; administered jointly by Great Britain and France, and inhabited by cannibals of the Melanesian race. Some copra and coconuts are exported. Area, 5,700 sq. m. Pop. c. 42,000 (including c. 1,000 whites).

New Ireland, island of the Pacific, in the Bismarck Archipelago, formerly called New Mecklenburg. A mountainous, fertile island, it grows mainly coconuts. Formerly a German protectorate, it is now administered, under mandate, by Australia. Area 3,000 sq. m. Pop. c. 42,000.

New Jersey, one of the 13 original States of the U.S.A., on the Atlantic between New York State on the N. and Delaware Bay on the S.; has valuable forests and fisheries, and grows cereals, potatoes and fruit, but is mainly manufacturing, producing textiles, machinery, chemicals, leather goods, etc. Capital, Trenton; largest cities, Newark and Jersey City. Area, 8,220 sq. m. Pop. 4,041,000.

Newlyn, seaport and fishing village of Cornwall, England, 1½ m. SW. of Penzance. It is popular among artists and attracts summer visitors. Pop. 4,000.

Newman, John Henry, English ecclesiastic and author, born in London, obtained a Fellowship at Oriel College, Oxford, in 1823. Becoming vicar of St. Mary's, the university church of Oxford, in 1826, he started the Tractarian Movement in 1833, and wrote 24 of the celebrated *Tracts for the Times* in advocacy of High Church teaching, including the famous *Tract XC.* In 1845 he left the Church of England and became a Roman Catholic. Shortly after this he visited Rome, was ordained a priest, and on his return became head of the Birmingham Oratory in 1849, where he spent over 40 years; was made a cardinal in 1879. His *Apologia pro Vita Sua*, his hymn *Lead, Kindly Light*, and his poem, *The Dream of Gerontius* are still famous. (1801-1890).

Newmarket, market town of Cambridgeshire, partly in Suffolk, chiefly known as a racing centre. The Jockey Club headquarters are here. Pop. (rural district), 18,900.

New Mexico, southern inland state of the U.S.A., on the Mexican border, admitted to the Union in 1910; was until 1848 part of Mexico; mainly a farming state, with rich mineral resources including gold, silver, copper, coal and lead. Capital, Santa Fé; largest city, Albuquerque. Area, 122,630 sq. m. Pop. 423,300.

Newnham College, a college for women at Cambridge, founded in 1875, and associated with the University since 1881; since 1922 women have been admitted to degrees of the University of Cambridge.

New Orleans, the capital and largest city of Louisiana, U.S.A., on the Mississippi, 107 m. from its mouth; founded in 1718, it was the capital of the old French territory in the S.; great cotton port and sugar market; is the chief trade emporium of the surrounding states, and the main outlet for the produce of the Mississippi Valley; has many interesting old Spanish and French buildings. Pop. 458,800.

Newport, (1) town of the Isle of Wight, England, near its centre; in its vicinity is Carisbrooke Castle, where Charles I. was imprisoned. Pop. 18,800. (2) largest and county town of Monmouthshire, England, at the mouth of the Usk, engaged in manufactures of various kinds, and in exporting iron and coal. Pop. 97,200. (3) city of Rhode Island, U.S.A., a holiday resort and naval station. Pop. 27,900.

Newport News, city and seaport at the mouth of James R., with a fine harbour, ship-building industry, and manufactures of iron goods, lumber products, etc. It has a population of 34,400.

Newport Pagnell, and market town of Buckinghamshire, England, 4½ m. S. of Olney, with a fine old church. Its former strong castle was destroyed in the Civil War. Pop. 4,000.

New Plymouth, seaport on the W. coast of North Island, New Zealand, capital of Taranaki province, and centre of a dairy-farming and cattle-raising district. Pop. 18,800.

New Providence, island of the British West Indies, in the Bahamas, measuring 19 m. by 10 m. It is the most densely populated island of the group, and produces pineapples and other fruit. Nassau is on its N. coast. Pop. 13,000.

Newquay, urban district and seaside resort of N. Cornwall, England, 11 m. N. of Truro. It has a shipping trade and fishing is carried on. Pop. 17,650.

New River, an artificial stream, 21 m. in length, which carries water from springs in Chertwell and Amwell in Hertfordshire, to London for domestic water supplies. The work was carried out by Sir Hugh Myddleton in 1609. It is now controlled by the Metropolitan Water Board.

Newry, town and seaport of co. Down, Northern Ireland, one of the chief ports of Ulster. Brewing, distilling, flax-spinning, etc., are carried on. Pop. 18,500.

New South Wales, "mother colony" and constituent state of the Commonwealth of Australia, until 1840 a convict settlement; fronts the Pacific for 700 m. on the E. between Queensland (N.) and Victoria (S). Mountain ranges (including the Australian Alps) running parallel with the coast divide the narrow littoral from the great plains of the W. and the interior, and are the source of many large rivers (e.g., the Darling) flowing E. and W. The climate is warm and everywhere healthy; rain falls plentifully on the coast-lands and mountains, but is scarce in the W. The mineral wealth is very great—gold, first discovered in 1851, and silver are found in large quantities, as also copper, tin, iron, etc., but coal is the most abundant mineral product. Cereals, fruits, sugar, tobacco, and vines are cultivated, but wool is the chief product of the State. Sydney is the capital and chief port. Area, 309,450 sq. m. Pop. 2,682,000.

Newspapers, in anything like the modern sense, were unknown before the 17th Century, when small daily "news-letters" were printed and circulated in coffee-rooms, clubs, etc., and sent by mail-coach from London to the provinces. Their development was much retarded by the Stamp Act of 1712, requiring them to carry a government stamp, at first of 4d. a sheet. The first of the modern English national newspapers to be born was the now defunct *Morning Post*, founded in 1772. *The Times*, at first known as the *Daily Universal Register*, followed in 1785. In 1814 the latter was first printed by steam presses, and from that time forward development in various directions was rapid.

The popular 4d. paper came on the scene in 1896, with the founding of the *Daily Mail*, followed by the *Daily Express* in 1900. The illustrated daily paper first appeared in the early years of the 20th Century. In the years immediately preceding, and during, the World War a number of old-established morning and evening dailies disappeared or were incorporated with more successful competitors.

The founding of the *Daily Herald* marked the rise of Labour as a political power; at first a struggling organ under direct trade

union control, it rose in the 'twenties and 'thirties of the 20th Century to a first-rank position among British national dailies. At present (1938) 8 great daily morning newspapers with national circulations are issued in London, as well as 3 evening and a number of Sunday papers: there are also a few other dailies catering for special interests, such as finance, the licensed trades, and sport.

Newstead Abbey, an abbey near Nottingham, founded by Henry II. by way of atonement for the murder of Thomas à Becket. It was given at the dissolution of the monasteries to an ancestor of Lord Byron, who lived in it and sold it, since when it has been restored.

Newt, or Eft, a genus (*Molge* or *Triton*) of tailed amphibia forming, with the salamanders, the family Salamandridae.

They have 4 legs, eyelids and teeth. Their life history is similar to that of the frog. The young are tadpoles with gills. The adults are strict air-breathers and are terrestrial, going

COMMON SMOOTH NEWT (MALE)

to ponds where they lay their eggs, only at breeding times. They have a soft, warty skin, and the tail is laterally compressed. The food consists chiefly of larvæ, aquatic insects, etc. They are all native to Europe and Northern Asia; 3 species, including the Crested Newt, the Smooth Newt, and the Palmate Newt are found in Britain.

New Testament, the second part of the Bible (q.v.) of the Christians, composing 27 books, namely, the 4 Gospels, relating the life-story of Jesus Christ; the Acts of the Apostles; a number of Epistles by St. Paul and other apostolic writers; and the Revelation of St. John, or Apocalypse. The books were written at various dates in the 1st and 2nd Christian Centuries; modern scholarship has cast serious doubt on the traditional attributions of authorship in several cases, as the Gospel of St. John and the Epistle to the Hebrews. The language of the originals was in all cases Greek. Further details are given in the articles on the separate books.

Newton, Sir Isaac, English natural philosopher, born at Woolsthorpe, Lincolnshire, 1642; educated at Trinity College, Cambridge.

He entered Trinity in 1661, where he applied himself specially to the study of mathematics, invented the method of fluxions (q.v.) and began to theorise on gravitation, graduating in 1667, and becoming professor of Mathematics in 1669. Failing at first in his attempts to establish the theory of gravitation as explaining the motions of the earth and moon, he set himself to construct telescopes, and evolved the Newtonian theory of light. Later he renewed his study of gravitation, and communicated his theory in a series of papers to the Royal Society, in 1687, giving the complete demonstration in his *Principia* to the world. In 1695 he was made Warden of the Mint, and afterwards Master, a post he held till his death. His numerous works dealt not only with physics, but also with prophecy. (1642-1727).

SIR ISAAC NEWTON

Newton Abbot, urban district and Devon, England, at the head of the Teign estuary, 20 m. SW. of Exeter, with locomotive works and local clay diggings. William of Orange was here proclaimed King. Pop. 15,000.

Newton-in-Makerfield,

or **Newton-le-Willows**, urban district of Lancashire, England, 5 m. E. of St. Helens. It has railway workshops, iron foundries and sugar refineries, glass and paper are made and coal mined. Pop. 20,000.

Newtonwards, Down, Northern Ireland, 9 m. E. of Belfast. Its chief industry is the making of gingham, embroidered muslins, handkerchiefs, etc. Pop. 12,000.

New Westminster, city of Columbia, Canada, 12 m. E. of Vancouver, on the Fraser R. It has salmon canneries and lumber industries. Pop. 17,500.

New York, an original state of the U.S.A., first in population and importance and twenty-ninth in area; between the Atlantic and the Great Lakes; was Dutch territory from 1609 to 1664; mountainous in E., flatter in centre and W.; watered principally by the Hudson; has great agricultural and mineral wealth, besides being one of the world's greatest industrial centres. The Hudson, Oswego, Genesee, and Niagara (with its famous waterfall) are the principal rivers, while the St. Lawrence forms part of the northern boundary. One-half of the area is under cultivation; the vine flourishes, hops and tobacco are grown, and market-gardening prospers near the large cities; but manufacturing is the chief industry, and the transit of goods is greatly facilitated by the many waterways and network of railways. Was finally occupied by the English in 1664, after the expulsion of the Dutch. Capital, Albany; largest cities, New York and Buffalo. Area, 49,200 sq. m. Pop. 12,588,000.

New York City, largest city of the U.S.A. and competitor with London for the title of largest in the world, comprises the five boroughs of Brooklyn, Manhattan, Bronx, Richmond, and Queens. The centre of the city is Manhattan Island, at the confluence of the Hudson and East R., at the head of Long Island Sound, joined with Brooklyn by bridge. The harbour is one of the finest and busiest in the world. The city is regularly laid out, its confined situation giving rise to its most striking feature, its many skyscrapers, including the Empire State and Chrysler buildings, the tallest in the world. Among its world-famous streets are Fifth Avenue, Broadway, and the financial centre, Wall Street. Industries of every kind are carried on; there are Roman Catholic and Anglican cathedrals, and many scientific and educational institutions. Pop. 7,434,300; (Metropolitan area, 10,901,400).

New Zealand, a British Dominion in the S. Pacific, lying 1,200 m. ESE. of Australia; comprises North I. (44,280 sq. m.), South I. or Middle I. (58,080 sq. m.), Stewart I. (670 sq. m.), and a number of islets. The two main islands, separated by Cook Strait, are in no part broader than 150 m., and are traversed from end to end by a great and partly volcanic mountain chain, the range in South I. being known as the Southern Alps (highest peak Mt. Cook, 12,350 ft.), and that in North I. as the Ruahine Range and the Taranaki Mts.

Everywhere rivers abound, Waikato (North I.) and Clutha (South I.) being the largest; there are numerous lakes (Lake Taupo, six times the size of Loch Lomond), fertile valleys and well-grassed plains; while the climate, temperate and healthy, is warmer and more equable than in Great Britain. Almost all the animals have been imported, as well as the grains and fruits. Great forests of indigenous kauri pines exist; sheep-farming, agriculture, and mining (gold and coal) are the leading industries, wool, meat and butter being among the chief exports.

Auckland, the largest, and **Wellington**, the capital, in North I., and **Dunedin** and **Christchurch** in South I., are the chief towns. Discovered in 1642 by Tasman, the islands were first surveyed by Cook in 1769; their formal cession to the British crown took place in 1840. Pop. 1,573,800, including 82,300 Maoris (q.v.), the original inhabitants of the island.

Ney, Michel, marshal of France, born in 1768, Saarlouis, son of a cooper; entered the army in 1797; distinguished himself by his bravery in the wars of the Revolution and the Empire, and earned for himself the title of the "bravest of the brave." On the emperor's abdication in 1814 he attached himself to Louis XVIII., but on Napoleon's return from Elba he joined his old master, and stood by him during the hundred days. In the second Restoration he was arrested and shot. (1769-1815).

Niagara, a section of the St. Lawrence R. between Lakes Erie and Ontario, the Falls, preceded and succeeded by rapids, being among the largest in the world. The Canadian, or Horse Shoe Fall, is 2,600 ft. wide, with a descent of 158 ft., and the American Fall one-half the width of the Canadian, with a descent of over 162 ft.

Niagara Falls, (1) city of Ontario, Canada, on the Niagara R., 2 m. below the Falls, which supply power for its factories. Pop. 15,000. Across the river in New York State is (2) the U.S. city and port of Niagara Falls, where the largest electric power plant in the world supplies power to foundries, machine shops, paper and flour mills, electro-chemical works, etc. It is the seat of Niagara university and a tourist centre. Pop. 75,000.

Nibelung, king of the Nibelungen, a mythical Burgundian tribe, the fabulous possessor of a hoard of wealth so inexhaustible that "twelve waggons in twelve days, at the rate of three journeys a day, could not carry it off." This treasure he bequeathed to his two sons on his deathbed, by the vanquishing of whom the hoard fell into the hands of the redoubtable hero Siegfried.

Nibelungenlied (i.e., Lay of the Nibelungen), an old German epic, of date, it is presumed, earlier than the 12th Century. It consists of two parts, the first ending with the murder of Siegfried by Hagen, his wresting of the hoard (see above) from his widow, Chriemhild, and burying it at the bottom of the Rhine; and the second relating the vengeance of Chriemhild and the annihilation of the whole Burgundian race, Chriemhild included, to whom the treasure had originally belonged. To the latter part the name of the *Nibelungen Not* (or Distress) has been given. The story is told in both the Elder and the Younger Edda, and was retold by William Morris in his poem "Sigurd the Volsung."

Nicea, an ancient town of Asia Minor, in Bithynia, at which was held in A.D. 325 the first (Nicene) Council of the Christian church, which condemned Arianism and drew up the Nicene Creed. The modern name is Iznik.

Nicaragua, the largest republic of Central America, stretches across the isthmus between Honduras (N.) and Costa Rica (S.). The Cordilleras traverse the heart of the country, and the two great southern lakes Nicaragua and Managua, which are studded with volcanic islands, lie on the W. of the country. Gold and copper are mined and bananas, coffee, cotton, sugar and tropical timbers are exported. Managua is the capital. Nicaragua asserted its independence from Spain in 1821, and has since been rent by countless revolutions. Area, 60,000 sq. m. Pop. 1,133,600.

Nice, capital of dept. of Alpes-Maritimes, France, charmingly situated on the Mediterranean coast near the Italian border. Terraced hills shelter it on the N., and its genial and equable climate makes it a favourite winter resort. Castle Hill, with ruins and pleasure gardens, the cathedral art-gallery, etc., are features of interest. Olive-oil is the chief export, and artistic pottery, perfumery, etc., are manufactured. Pop. 242,000.

Nicene Creed, a statement of the Christian belief drawn up at Nicea (q.v.) against Arianism; it is recited in the services of the Eastern Orthodox, Roman Catholic and Anglican churches.

Nicholas, the name of five Popes: Pope from 858 to 867. N. II., Pope from 1058 to 1061. N. III., Pope from 1277 to 1280. N. IV., Pope from 1288 to 1292. N. V., Pope from 1447 to 1458, after the capture of Constantinople by the Turks, took the exiled Greek scholars under his protection, fostered the learning of the East, and laid the foundation of the Vatican Library by the collection of over 5,000 Greek and Latin MSS.

Nicholas, last ruler of Montenegro (q.v.); born at Njegos, nephew of Prince Danilo II., whom he succeeded on his assassination in 1860. He went to war with Turkey in 1876-1878, throwing off Turkish rule and gaining territory. In 1910 he took the title of King. After the World War, when Montenegro decided to enter the Yugoslav Kingdom, he fled to Italy, dying at Antibes. (1841-1921).

Nicholas I., Russian Czar, born in St. Paul I., ascended the throne in 1825 in succession to Alexander I., his eldest brother; suppressed with rigour a formidable conspiracy on his accession; captured Erivan from Persia, and struggled against both the Poles and the Turks till his overbearing policy provoked France, England and Sardinia to embark on the Crimean War, which was still going on when he died. (1796-1855).

Nicholas II., Czar of Russia, eldest son of Alexander III., whom he succeeded in 1894. His reign saw the abortive rebellion of 1905, the Russo-Japanese war, the growth of industrial and political unrest, the World War, and the revolution. A weak monarch in the hands of his advisers, notably Rasputin, (q.v.) he was forced to abdicate in March, 1917, was later arrested and sent to Tobolsk, and thence to Ekaterinburg, where in July, 1918, he was murdered, with his wife and other members of his family. (1868-1918).

Nicholas, St., bishop of Myra, in Lycia, Asia Minor, under the emperor Diocletian; patron saint of children and sailors; is generally represented in bishop's robes, and has either three purses or three children as his attributes, in reference to a legend that he gave dowries to three girls otherwise condemned to a life of shame; is the original of the *Santa Claus* beloved of children.

Nicholson, John, British military officer in India, born in Dublin; served in the Sikh Wars, and at the outbreak of the Mutiny in 1857 in the Punjab helped to crush it at the outset. As brigadier-general, he led the attack at the siege of Delhi, Sept. 14, but fell mortally wounded as the storming party were entering the Kabul Gate. (1821-1857).

Nickel, a metallic chemical element resembling iron and cobalt in being magnetic as well as in other properties. Symbol Ni, atomic number 28, atomic weight 58.68. Nickel ores are chiefly found at Sudbury, Ontario (Canada). Here the ore is smelted, giving Monel metal (q.v.), which is subsequently reduced to metallic nickel.

A purer metal is yielded by the Mond process, crude nickel being heated in a current of carbon monoxide gas, when the gaseous compound nickel carbonyl is formed; this is next heated to about 180°, and is decomposed into nickel and carbon monoxide, the latter being recirculated through the plant. Nickel is a silvery-white, hard and malleable metal, used for nickel-plating, but since it gradually tarnishes, it is generally covered with a layer of chromium ("chromium-plating"). Nickel salts are mostly of a fine green colour and are of little commercial importance. Nickel alloys, on the other hand, are extensively employed.

Nicobar Islands, a group of picturesque islands in the Indian Ocean, S. of the Andaman Is. 12 of the 19 are inhabited, chiefly by Indians and Malays. After being in the hands of Denmark for upwards of 100 years, they were annexed by Britain in 1869. Coconuts are exported. Area, 635 sq. m. Pop. 9,500.

Nicomedia, an ancient city of Asia Minor, on the Sea of Marmora. The capital of Bithynia, it was the seat of government of the Roman empire under Diocletian. The modern town is called Ismid.

Nicosia, or *Levkasia*, capital of Cyprus, 25 m. NW. of Larnaca, its seaport. Its former cathedral is now a mosque. Pop. 23,700.

Nicotine, an alkaloid present in the tobacco plant; colourless and poisonous when pure, it oxidises and turns brown on exposure to air.

Niemen, or *Memel*, river of E. Europe, flowing through Poland and Lithuania to enter the Baltic through the Kurlisches Haf. Grodno and Kovno are on its banks. Length, 550 m.

Niepcé, *Joseph Nicéphore*, French chemist, a collaborator with Daguerre in photographic experiment. (1765-1833).

Nietzsche, *Friedrich*, German philosopher, born at Röcken, Saxony; became a professor at Basel in 1869; resigned for health reasons in 1879, and became insane about 1890. His philosophy taught the cult of the "Superman" and denounced Christianity and its virtues as a defence-mechanism of the weak against the strong. His best-known works are *Thus Spake Zarathustra*, *Beyond Good and Evil*, and *The Will to Power*. (1844-1900).

Nievre, dept. of France, in the Loire Valley, largely devoted to pasture and forest land; wheat, oats and potatoes are grown, and coal mined. The capital is Nevers. Area, 2,660 sq. m. Pop. 250,000.

Niger, great river of W. Africa, rising in French Guinea, flowing N.E. as far as Timbuctoo (2 m. from the river), where it bends gradually southward, receives the Benue, about 100 m. from the coast begins to form a delta, and finally flows into the Gulf of Guinea by 22 mouths after a course of some 2,900 m., over 1,000 m. being navigable.

Nigeria, British colony and protectorate of Benin, constituted 1914 by amalgamation of several separate colonial areas; produces palm oil and kernels, coconuts, gold, tin, and ground nuts. In the N. many of the negro population are Mohammedans; in the S. mostly pagans. Capital, Lagos. Area, 373,400 sq. m. Pop. 20,200,000.

Night Heron (*Nycticorax*), a genus of wading birds of the family Ardeidae, found in Europe and America. There are some 9 species, the chestnut-backed being a handsome bird. One species, the common grey (*Nycticorax nycticorax*), is an occasional visitor to British shores.

Nightingale, a perching bird of the thrush family (*Motacilla*

luscini), the male being renowned for its beautiful song at night during the breeding season; found in many parts of southern England. It is migratory, frequents hedges and thickets, and builds its nest on, or near, the ground. It is solitary in habits and has inconspicuous colouring.

NIGHTINGALE

Nightingale, Florence, English hospital reformer and nurse, born in Florence; studied nursing at Kaiserswerth and Paris, and in 1854 volunteered to organise a staff of nurses to tend the wounded soldiers in the Crimea; arriving at Scutari on the eve of Inkerman during the terrible winter of 1854-1855, she ministered with unwearied devotion to the suffering soldiers. On her return in 1856 she established, with public support, a training college for nurses at St. Thomas's and at King's College Hospital. (1820-1910).

Nightjar, or Goat-sucker (*Caprimulgus europaeus*), a nocturnal migrant bird found in S. England, the male being remarkable for its jarring noise. Its beak is very wide and fringed with bristle-like feathers. Its food consists of beetles, moths and other insects. The ancient popular belief that it sucks the udders of goats for their milk is unfounded.

NIGHTJAR

Nightmare, a feeling of oppression or suffocation which arises during sleep, accompanied by intense anxiety, fear or horror. The sufferer awakens in a state of terror, his body often covered with sweat. Common causes are indigestion or too heavy bed-covering. Psycho-analysts consider it the result of some suppressed emotional experience stored in the unconscious.

Nightshade, name of several plants of the Solanaceae order. The roots and leaves are narcotic, and the berries poisonous. They grow in hedges, fields and waste places. Among the species are the Deadly Nightshade or Belladonna (*Atropa belladonna*), Black Nightshade (*Solanum nigrum*), and Woody Nightshade or bitter-sweet (*Solanum dulcamara*).

Nihilism, name given to a movement in Russia at the end of the 19th and beginning of the 20th Centuries, which sought the overthrow of the then existing social organisation and its replacement by a completely new economic, political and social system. Some of its members sought to attain their aims by the assassination of members of the governing class, and their most famous victim was the Czar Alexander II. (1881).

Nijni-Novgorod. (Nizhni-Novgorod) See Gorky.

Nile, the longest river of Africa, and one of the most noted in the world's history. Rising in the lake of Victoria (Nyansa), 3,900 ft. above sea-level, it passes, through the Victoria Nyansa, Ripon Falls and the Albert Nyansa, to Khartoum, being here known as the White Nile. It is there met by the Blue Nile, flowing from Lake Tana in Abyssinia; and 300 m. below Khartoum by the Atbara or Black Nile. It passes through Egypt, and enters the

Mediterranean by a delta separating into two main streams at Cairo. Its total length is about 4,000 m. It forms six cataracts between Khartoum and Assuan, at the last of which is the great Assuan dam. Many anthropologists maintain that observation of the Nile's periodic floods and their results on vegetation was responsible for the invention of agriculture. The fair distribution of its waters and their power is regulated by agreements between the Egyptian, British and Italian governments.

Nile, Battle of the, fought in 1798 between the English and French fleets in Aboukir Bay. The French fleet was surrounded by Nelson and destroyed. Napoleon, in Egypt, being thus cut off for some time from his home base in France.

Nilgai, or Nyghau,

a large antelope, found in Persia and India, remarkable for its speed. The body is heavy and ox-like and the horns of the male short.

NILGAI

Nilgiri Hills

(the Blue Mts.), a bracing mountain district in South India, forming a triangular-shaped mass of elevated country, the peaks of which attain an altitude of nearly 9,000 ft.

Nimbus. See *Halo*.

Nîmes, capital of the dept. Gard, France, 31 m. E. of Montpellier; has unique Roman remains, including an imposing amphitheatre, now used as a bull-arena, the noble Corinthian "Maison Carrée," baths, etc. Textiles (silk, cotton, etc.), wines, and brandy are the chief articles of manufacture. Pop. 93,800.

Nineveh, a great city, capital of ancient Assyria, which stood on the left bank of the Tigris, opposite the modern town of Mosul. Excavations in the late 19th and 20th Centuries have brought to light many relics of ancient palaces and temples, and other antiquities.

Ningpo, city and port of China, in Chekiang province, renowned for its woodcarving and its many Buddhist monasteries; has hardware, carpet and lace manufactures, and considerable fisheries. Pop. 219,000.

Ninian, St., apostle of Christianity to Scotland, the southern Picts of Scotland, born on the shores of the Solway; after consecration at Rome by the Pope, visited St. Martin at Tours; founded a church at Whithorn, Wigtownshire, where he died 432.

Niobe, in Greek mythology, the daughter of Tantalus. Her twelve children were slain by Apollo and Artemis, and she retired to Mount Sipylus, in Lydia, where her body became cold and rigid as stone, but not her tears, which every summer burst forth anew.

Niobium, or Columbium, a rare metallic in the black North American mineral columbite. It is almost invariably associated with tantalum. Symbol Nb or Cb; atomic number 41; atomic weight 93.3.

Nipissing, lake of Ontario, Canada, which it empties by the French R., into the Ottawa. Area 330 sq. m.

Nippon, the native name for Japan.

Nirvana, a state in which all craving for existence, sensation, selfhood, or possessions is extinct; the goal set before man as his highest possible achievement by Buddhism (q.v.).

Nish, city of Yugoslavia on the R. Nisava, 125 m. from Belgrade, with railway workshops and an iron foundry. Constantine the Great was born there. It was captured by the Bulgarians in 1915. Pop. 35,500.

Nitre, Saltpetre, or Potassium Nitrate, a white crystalline solid found naturally in Persia and India, and manufactured from Chilean soda nitrate (Chile saltpetre); used in the manufacture of gunpowder, in industrial chemistry for acid manufacture, and in medicine.

Nitric Acid, a colourless, strongly liquid, which, on exposure to light, becomes yellow. It is commonly prepared by heating Chile saltpetre with sulphuric acid, and is employed in steel and copper etching.

Nitric Oxide, a colourless, poisonous gas, generally prepared by the action of moderately concentrated nitric acid upon copper turnings. Its most remarkable property is that on coming into contact with free oxygen (as in the air) it is converted into the reddish-brown gas nitrogen peroxide.

Nitrification, a bio-chemical process carried on in soil and in sea-water by certain minute bacteria, consisting in the oxidation of ammonia—produced by putrefaction and decay—to nitrates. Nitrates form the normal source of nitrogenous food for green plants and indirectly for the animal kingdom, and therefore nitrification is of great importance in nature economy.

Nitro-benzol, a pale yellow, highly refracting liquid obtained by adding 12 parts of nitric acid and 16 parts of sulphuric acid to 10 parts benzene. It is poisonous, has a strong odour of bitter almonds, and is used in perfumery. It yields aniline, the parent substance of many dyes and drugs.

Nitrogen, a non-metallic gaseous chemical element (symbol N; atomic number 7; atomic weight 14.01), discovered in 1772 by D. Rutherford. Lavoisier showed that it formed about four-fifths of the air by volume, and called it azote. Nitrogen forms about 78 per cent. by volume of dry air, in which it serves to dilute the oxygen to an extent compatible with the requirements of living organisms.

Pure nitrogen is best prepared by chemical means, e.g., by heating a solution of ammonium nitrite, or by the action of chloring upon ammonia. Commercially it is obtained by the fractional distillation of liquid air or, more often, by blowing air through heated coke and removing the oxides of carbon from the mixture of these gases with nitrogen so produced. It is largely used in the manufacture of ammonia, nitric acid, etc.

Nitrogen is a colourless, odourless, tasteless gas which will not burn or support combustion. Chemically, it is comparatively inert under ordinary laboratory conditions, but its compounds are very numerous and important, including most explosives and dyes, many drugs and fertilizers, some of the very virulent poisons, and essential articles of food, e.g., proteins.

Nitrogen, Fixation of, the conversion of atmospheric nitrogen into nitrogenous compounds. This is now performed by the Haber process for converting the nitrogen of the air into ammonia. The synthetic ammonia is converted into ammonium sulphate, etc., for agricultural purposes, while nitric acid is also made from it. Nitric acid is required as a source of sodium nitrate ("nitrate of soda"), the well-known artificial manure, and also for the manufacture of such explosives as nitro-glycerine, dynamite, lyddite, T.N.T., cordite and ammonal.

Nitro-glycerine, the common name for glyceryl-trinitrate, a very powerful explosive, prepared by adding glycerine to a mixture of concentrated sulphuric acid and nitric acid. It is a constituent of dynamite and cordite. It is an oil with a specific gravity of 1.6. It was discovered by Sobrero in 1847 and was first used as an explosive agent by Nobel.

Nitrous Oxide, a colourless gas, prepared by heating ammonium nitrate, and used as a general anæsthetic in dentistry and minor surgical operations. In some people its inhalation induces hysterical laughter, hence its popular name "laughing-gas." Its anæsthetic

idea, was the main subject of philosophical contention in the Middle Ages.

Nonconformists, a name originally applied to the two thousand clergy of the Established Church of England, who in 1662 resigned their livings rather than submit to the terms of the Act of Uniformity passed on Aug. 24 that year, but now applied to the whole Dissenting body of England. The principal Nonconformist bodies of to-day are the Methodists, Congregationalists, Baptists and Presbyterians, though there are also many smaller sects. The term is not generally used to cover Roman Catholics.

Nones, in the Roman calendar, the ninth day before the Ides (q.v.), being the 7th of March, May, July, and October, and the 5th of the other months.

Non-Intervention Committee

a Committee of various European States set up at the beginning of 1937 to supervise measures agreed on to stop the flow of volunteers to both sides in the Spanish Civil War. It devised a plan for watching Spain's coasts and frontiers, which by the autumn had proved unworkable. Germany and Italy withdrew from the Committee in June 1937 after the bombing of the German ship *Deutschland*, but later returned. The Committee has remained in being, but its time has been mainly occupied with disputes between the constituent powers as to the extent of intervention on the part of the others. It eventually produced a plan for the proportionate withdrawal of non-Spanish combatants from both sides, and agreed that a commission should be sent to Spain to count such combatants. The settlement of this Spanish question is a pre-requisite to the coming into force of an Anglo-Italian Pact signed by Lord Perth and Count Ciano in April 1938. In that case Great Britain will initiate proceedings with the League of Nations to clarify the position of member states regarding the Abyssinian question.

Nonjurors, a name given to those of England, headed by six bishops, who, having sworn fealty to James II., refused to take the oath of allegiance to William III. The bishops were deprived of their sees, but successors to them were consecrated after their deaths, and for many years the nonjurors remained in existence as a Nonconformist sect.

Non-Sequitur, in logic, or the art of reasoning, a fallacy or error, in which an inference is based upon a cause from which it "does not follow," the literal meaning of the term. The error may be due to the alleged cause being either insufficient or irrelevant.

No-Popery Riots, name given to riots in London in June, 1780, due to the zeal of Lord George Gordon (q.v.), in which much property was destroyed, and about 300 persons killed.

Nord, dept. of northern France, on the North Sea coast and Belgian frontier; has important coal mines and varied manufactures; it is, save for Seine, the most thickly populated of French departments. Lille is the capital; other towns are Dunkerque, Cambrai and Douai. Area, 2,236 sq. m. Pop. 2,022,700.

Nordenskiöld, Nils Adolf Erik, Baron, Swedish naturalist and explorer, born in Helsingfors; after several successive voyages and explorations in the Arctic Sea, in which he paid frequent visits to Spitzbergen, where he measured an arc of the meridian, in 1878-1879 discovered the North-East Passage by traversing, along the N. shores of Europe and Asia, the whole Arctic Sea from the Atlantic to the Pacific (1882-1901).

Nizam, the name given to a viceroy or administrator of justice in the Mogul Empire of India; it is still used by the ruler of Hyderabad (q.v.), India, also known as the Nizam's Dominions.

Noah, the Biblical patriarch who, according to the Book of Genesis, constructed an ark for the preservation of the human race and the dry-land animals during the universal deluge.

Nobel, Alfred, Swedish chemist, famous for his work on explosives; invented dynamite and was the first to adapt nitro-glycerine as an explosive; died a millionaire; in his will left a sum of 1½ million pounds to found five prizes to be awarded annually for the most deserving work in physics, chemistry, medicine, literature, and peace. The prizes are open to men and women of all nationalities, and the awards are made by learned bodies in Sweden and the Norwegian Storting. (1833-1896).

Nobile, Umberto, Italian aviator; with Amundsen, in 1925, undertook an unsuccessful North Polar airship voyage, being saved by a Russian ice-breaker; in 1928 in a second voyage he attempted in the airship *Italia* to reach the Pole, succeeded in flying over it, but was forced down on the ice and rescued after a month's privation; afterwards Deputy Chief of Airship Construction in the U.S.S.R. (1885-).

Noble, former English gold coin, first minted by Edward III.; its value was originally 6s. 8d., but afterwards fluctuated.

Nodes, name given to the two points in the orbit of a planet or moon where it crosses or intersects the ecliptic, called ascending when it goes N., and descending when it goes S.

Nome, town of the S. shore of Seward Peninsula. A gold-mining centre, it sprang into being in 1899-1900, in the latter year having a population of 12,500. Pop. 1,200.

Nominalism, in philosophy, the theory that general notions, such as "man," have no reality, but are merely convenient words denoting a purely imaginary average deduced from particular instances. The controversy between the nominalists and the realists, who held the opposite view that general notions had a real existence, resembling that of the Platonic

NOBLE

Nordkyn (i.e., North Chin), the most northerly point in Norway, and of the continent of Europe generally.

Nore, river of Eire (Ireland), rising in Co. Tipperary, and flowing SE. through Leix and Kilkenny to empty itself, after a course of 70 m., into the Barrow 2 m. NW. of New Ross. Also the name of a sandbank at the mouth of the Thames estuary, sometimes applied to the outer part of the estuary itself.

Nore, Mutiny at the, a mutiny in the British fleet stationed at the Nore (q.v.), which broke out on May 20, 1797, and was not suppressed till June 15, for which the ringleaders were tried and hanged. The mutiny arose from alleged grievances—bad food, insufficient pay and official tyranny—on the part of the seamen, but is believed to have been fostered by revolutionary agents.

Norfolk, an eastern maritime county of England, N. of Suffolk, with a long eastern and northern foreshore (90 m.) to the North Sea; the Wash lies on the NW. border. Light fertile soils and an undulating, well-watered surface favour agriculture, of which fruit-growing and market-gardening are special features. Rabbits and game abound in the great woods and sand-dunes, and there is a specially rich bird life. The chief rivers are the Ouse, Bure and Yare, and these and other streams form in their courses a remarkable series of inland lakes known as the Broads (q.v.). The county is famous for its fine churches, and has interesting feudal and monastic ruins at Castle Acre, Castle Rising, Bayham's Abbey, etc. The county town is Norwich. Area, 2,053 sq. m. Pop. 502,000.

Norfolk, Virginia, U.S.A., on an arm of Chesapeake Bay. Shipbuilding and fishing are carried on and cotton, silk, fertilizers, chemicals and machinery are among the manufactures. Pop. 129,700.

Norfolk, Dukes of. See Howard, Family of.

Norfolk Island, a small precipitous island in the Western Pacific, midway between New Caledonia and New Zealand, 400 m. NW. of the latter. Its inhabitants, many of whom came from Pitcairn I., and now number about 1,100, govern themselves under the superintendence of New South Wales. Area, 13 sq. m.

Norman, Montagu Collet, Governor of the Bank of England since 1920; fought in South African War, winning the D.S.O.; Director of Bank of England since 1907. P.C., 1923. (1871—).

Norman Architecture, a style of archi-

ture introduced into England, particularly in the construction of churches, abbeys, etc., by the Normans even before the Conquest. It was in vogue in the country till the end of Henry II.'s reign; it is characterised by the prevalence of the rounded arch. The massive Norman pillars were sometimes scored with zigzag indentations. Good examples in England are Durham Cathedral and the Abbey church of Waltham, Essex.

Normanby, town of Yorkshire, Eng. SE. of Middlesbrough. It has iron-mines and brick and tile works. Pop. 10,000.

Normandy, an ancient province of France, fronting the English Channel, N.E. of Brittany; received its name from the Northmen who, under Rollo, established themselves there in the 10th Century; was for a long time an appanage of the English crown after the Norman Conquest;

NORMAN ARCHWAY

after being taken and retaken, was finally lost to England in 1450. It became practically a part of France when it was taken by Philip Augustus in 1204, and is now represented by the five depts. Seine-Inférieure, Eure, Orne, Calvados, and Manche.

Normanton, urban district and market town of Yorkshire, England, in W. Riding, 5 m. N.E. of Wakefield. Coal is mined and stone quarried. Pop. 15,700.

Norns (Nornir), in Norse mythology the three Fates—the Past, the Present, and the Future; maidens or dames who water the roots of Yggdrasil, the ash-tree of existence, and determine the destinies of both gods and men.

Norrköping, a town in Sweden, on the R. Motala, called the "Scandinavian Manchester," 113 m. SW. of Stockholm, with cotton and woollen factories and a shipbuilding industry. Pop. 67,700.

Norroy King of Arms, a name to the third king-of-arms, whose province is on the N. side of the Trent, the one on the S. side being called Clarenceux.

Norsemen, the Scandinavian sea-farers who between the 8th and 13th Centuries set out from Norway and Denmark to expand by raids and settlement in various directions. They came to England, as the "Danes," conquering the country under Cnut in the early 11th Century. They also established themselves for a time in Ireland and the Hebrides, discovered and settled in Iceland and Greenland, reached America under Leif Ericsson, and founded prosperous states in France (Normandy), Sicily, Southern Italy and Russia.

North, Frederick, Lord, English statesman; entered Parliament in 1754, became Tory leader in the House of Commons in 1767, and Prime Minister in 1770. His subservience to George III. was largely responsible for the loss of the American colonies. A coalition was effected in 1783 between him and Fox, but it soon terminated. He succeeded to the earldom of Guilford and died blind. (1732-1792).

Northallerton, county town of the Yorkshire, England, 30 m. NW. of York; in the vicinity was fought the famous Battle of the Standard, in which David I. of Scotland was routed by the English, Aug. 22, 1138. Pop. 4,800.

North America. See America, North.

Northampton, county town of Northamptonshire, England, on the Nen, 66 m. NW. of London; has two fine old Norman churches, is the centre of the boot and shoe manufacture, and is actively engaged in brewing, lace-making, etc.; in the outskirts is a popular racecourse. Pop. 96,300.

Northamptonshire, or Northants, a midland county of England, bordering upon nine others; has an undulating fertile surface, with extensive woods and plantations; is chiefly engaged in agriculture and stock-raising. The Nen and the Welland are the principal rivers. Among its antiquities are Fotheringhay Castle, where Mary Stuart was beheaded, Burleigh House, and many fine churches. The battles of Edgecote (1469) and Naseby (1645) were fought within its borders. Area, 914 sq. m. Pop. 309,500.

North Cape, with Nordkyn (q.v.), the most northerly point in Europe, in the island of Magerö, in 71° N. latitude.

North Carolina. See Carolina, North.

Northcliffe, Alfred Harmsworth, first paper proprietor. Founding the *Daily Mail* in 1896, he later acquired the *Times* for some years, and also owned the *Evening News* and the *Weekly Dispatch*, besides a number of periodicals. He was made a baronet in 1904, a baron in 1905, and a viscount in 1917, in which year he went on a mission to America. In 1918 he took office in the Ministry as Director of Propaganda. (1865-1922).

North Dakota. See *Dakota*, North.

North-East and **North-West Passages**, the names given to the sea-routes through the Arctic Ocean, the former by the N. of Europe and Asia and the latter by the N. of North America, search for which was a main object of geographical exploration during the 17th and 18th Centuries. The former was first made by Norden-skjöld in 1879, the latter by Amundsen in 1905.

Northern Ireland, an area consisting of the cities of Belfast and Londonderry and the counties of Antrim, Armagh, Down, Fermanagh, Londonderry, and Tyrone. Granted Home Rule in 1920, it is governed by a Governor-General, Senate and House of Commons, and sends 13 representatives to the Imperial House of Commons. Belfast is the capital, and the chief industries are agriculture, shipbuilding, flax-spinning, linen-making and distilling. The majority of the people are Protestants, but about one-third are Roman Catholics. The question of its unification with Eire (Ireland) (*q.v.*) has been the subject of some discussion, particularly in Eire, but is in abeyance. Area, 5,236 sq. m. Pop. 1,279,750.

Northern Territory, district in Australia, bounded W., S. and E. respectively by Western Australia, South Australia and Queensland. It has a coastline of over 1,000 m. on the N. Formerly part of South Australia, it has since 1911 been directly administered by the Commonwealth. There are desert highlands in the interior, pastoral areas farther N., and a low forested coastal region where sugarcane, cotton, oranges, etc., are grown. Pearl shell and trepang are exported. The climate is mainly tropical. Darwin is the capital. Area, 523,630 sq. m. Pop. (excluding aborigines, of whom there are some 18,000), 4,600.

Northfleet, urban district of Kent, England, 14 m. W. of Gravesend. Shipbuilding is carried on, and chemicals, paper, cement and bricks produced. Pop. 17,800.

North Foreland, chalk headland of the easterly point of England, with a lighthouse 188 ft. high. Three battles were fought near here in the Dutch Wars of the 17th Century.

North Island, the smaller of the two main islands of New Zealand, separated from S. Island by Cook Strait. It is actively volcanic, and contains country ideal for sheep and cattle raising and fruit growing. Wellington, Auckland and Wanganui are the chief towns. Area, 44,280 sq. m. Pop. 1,018,000.

Northmen. See *Norsemen*.

North Sea, or *German Ocean*, between the Continent, spreads out into the Arctic Ocean, is shallow, is crossed by many sandbanks, and is subject to frequent violent storms. The Dogger Bank, between England and Denmark, 8 to 16 fathoms deep, is rich in fish, especially cod. In the World War it was the main scene of British and German naval operations, including the Battle of Jutland (*q.v.*), the Battle of the Dogger Bank and other fighting.

Northumberland, the most northern county of England, separated from Scotland by the Cheviots and the Tweed. Its eastern shore, off which lie the Farnes Is., Lindisfarne, and Coquet Isle, N. of Durham, fronts the North Sea; in the N. the Cheviot slopes form excellent pasturage but the Pennine Range towards the W. presents dreary and less valuable moorland; on the W. are arable lowlands. Tweed, Tyne, Till, Alne, Wansbeck, are the chief rivers. Its great coalfield in the SE. includes upwards of 100 collieries. Newcastle (county town), Tynemouth, Blyth and Wallsend are the principal towns. Within its borders were fought the battles of Otterburn, Homildon Hill, and Flodden. Area, 2,018 sq. m. Pop. 756,720.

Northumbria, ancient kingdom of the Anglo-Saxon period; comprised the eastern half of the island from the Humber to the Firth of Forth, and was divided into the northern Bernicia and the southern Deira; was founded in 547 by Ida the Angle; for a time, about 640, it was the most powerful state of the island; it ceased to exist in 827.

North-West Frontier Province, northernmost division of British India, between the Punjab and Afghanistan. About a third is British territory (capital, Peshawar), the remainder being tribal agencies. The land is mountainous and intersected with deep valleys, and inhabited mainly by turbulent tribesmen resentful of British control. The peace is hard to keep and military expeditions are of frequent necessity, as that against the Wazirs in 1937. Roads are being constructed through the mountains, and a railway now traverses the Khyber Pass. Area, 39,300 sq. m. Pop. 4,684,000.

North-West Territories, area of Canada stretching from Yukon Territory E. to Hudson Bay, and from Alberta, Saskatchewan and Manitoba to the Arctic, with all the islands to the north. Much of it is unexplored, but bordering the Arctic are grass-covered plains, and further S. forest lands, chiefly spruce and larch. The resources are as yet little developed, though some minerals are worked, and some grain grown. Fur-bearing animals are plentiful. The Mackenzie R. extending some 1,460 m. waters the W. part, and the many lakes include the Great Bear and Great Slave. They are divided into the three districts of Keewatin, Mackenzie and Franklin. Area, 1,309,700 sq. m. Pop. chiefly Indians and Eskimos, about 9,800.

Northwich, a town in Cheshire, England, with brine springs, salt mines, and manufactures of bricks, metals, and beer. Pop. 20,800.

Norway, a kingdom of North Europe, of the Scandinavian peninsula, separated from Sweden on the E. by the Kjölen Mts. The Arctic and Atlantic Oceans beat upon its long western seaboard, which is serrated by many narrow and sinuous fjords; Sogne Fjord, the longest, runs into the heart of the country 100 m. Off the northern coast lie the Lofotens, while the Skerries skirt the E.

The country forms a strip of irregular and mountainous coastland 1,160 m. long, which narrows down at its least breadth to 25 m. 70 per cent. of the surface is uncultivable, and 24 per cent. is forest; the lakes number 30,000, of which Lake Wenner (2,136 sq. m.) is the largest. Immense glaciers are found in the great mountain barrier, and innumerable rivers run short and rapid courses to the Atlantic and to the Skagerrak in the E.; the Glommen, flowing into Christiania Fjord,

is the largest (300 m.). The climate of the W. coast districts is tempered by the Gulf Stream drift; inland there is less rain, but much intenser cold.

The wealth of the country lies in its forests and fisheries, mines and shipping; only 2 per cent. of the land-surface is under cultivation, and 3.8 per cent. is utilized for grazing; the copper, iron, and silver mines are declining. Oslo (formerly Christiania), the capital, is the centre of the industrial area. The Norwegians are intensely democratic; the country is ruled by a king and a parliament called the Storting, elected as a single body, but divided into two sections after election. Education is free and compulsory, and the bulk of the people are Lutherans. Norway, originally inhabited by Lapps and Gothic tribes, was first unified by Harold Haarfager (A.D. 863-930), and subsequently welded into a Christian kingdom by his descendant St. Olaf (1015). From 1538 it was held as a conquered province by Denmark up to 1814; in that year it was joined to Sweden, but the union came to an end in 1905. Area, 124,500 sq. m. Pop. 2,814,000.

Norwich, cathedral city and county town of Norfolk, England,

on the Wensum, 114 m. N.E. of London; its beautiful woodland surroundings have won it the name of "the city in an orchard." Chief of its many fine buildings is the cathedral, a handsome Norman structure, founded in 1096; of the old Norman castle only the keep now stands, crowning a central hill. Textile fabrics are still an important manufacture, supplemented by mustard, starch, footwear, and ironware factories. Pop. 124,000.

Nose, an organ of the body in mammals, the function of which is to pass air into the lungs, freed from impurities and warmed to the right temperature. The olfactory nerves are situated in the nose, thus associating this organ with the sense of smell. The nose is composed of bone and cartilage; the interior cavity is divided by the septum, a thin structure also of bone and cartilage. Behind the nose are the nasal sinuses, cavities in the upper part of each jaw, the frontal bone, and at the base of the skull. The sinuses are filled with air from the nose, and are liable to infection, supuration of the sinuses being a serious nasal disease. Other affections of the nose are nasal catarrh, inflammation, and the growth of polypi due to chronic deep-seated inflammation. Nose-bleeding, when not a symptom of other diseases, is generally due to a dilated blood-vessel in the front of the septum.

Notary, Public, a person appointed to certify, to a formality required by law as observed in his presence. In England such functions are generally performed by a Solicitor or Commissioner for Oaths.

Notation, the art of representing the sounds by signs. The Greeks used the letters of the alphabet for this purpose. Notation by signs was adopted in the 10th and 11th Centuries. A system of indicating duration was introduced at the end of the 11th Century by Franco of Cologne. The four-line staff notation of Guy of Arezzo, still used for plain-song, was general until the wide adoption of printing. The modern method, gradual evolution, uses a number of large, "flat" notes, "black" or open, rising or falling with the pitch of the note, with various ornaments indicating the length of the note, the precise position of the note being fixed

NORWICH
CATHEDRAL

upon a stave of 5 horizontal lines, and four intervening spaces.

Notification of Diseases.

It is compulsory, under the Infectious Diseases Notification Acts of 1889 and 1899, to notify the local Medical Officer of Health of cases of certain infectious diseases, such as diphtheria, scarlet fever, typhoid fever, etc., so that appropriate steps may be taken to prevent, by isolation, etc., the further spread of the disease. The responsibility of notification devolves upon the head of the family, but it is usually done by the doctor attending the case. Failure to notify involves a penalty of 40s. Certain other diseases, such as chicken-pox, cerebro-spinal fever, etc., may be made compulsorily notifiable in special areas by order of the local authorities.

Notre Dame, the cathedral church of the "Ile de la Cité"; its erection was begun in 1163 on the site of an earlier cathedral, which itself had superseded a pagan temple on the spot, and completed, at least in its main features, in 1230.

Nottingham, county town of Nottinghamshire, England, on the Trent, 126 m. N.W. of London; spacious and well-built, with a castle (now an art gallery), old grammar school, racecourse, several fine churches, a Roman Catholic cathedral, etc.; is the centre of lace-making and hosiery in England, and manufactures cottons, silks, bicycles, tobacco, typewriters, etc.; a fine granite and iron bridge spans the river. Pop. 282,000.

Nottinghamshire, a north-eastern county of England, lies between Lincoln (E.) and Derby (W.), and touches York on the N.; embraces the broad, level and fruitful valley of the Trent, Sherwood Forest and Wolds in the S.; excepting the Vale of Belvoir in the E. part of the Wolds, and the Valley of the Trent, the land is not specially productive. There are important collieries around Mansfield, and iron workings. The principal towns, Nottingham, Mansfield, Worksop, etc., are busily engaged in the manufacture of all kinds of lace, hosiery and various woollen goods; ironfounding is also carried on. Area, 844 sq. m. Pop. 712,700.

Nova Scotia, a province of Canada, lies E. of New Brunswick, facing the Atlantic, which with its extensions, Bay of Fundy and Gulf of St. Lawrence, all but surrounds it; consists of a peninsula (joined to New Brunswick by Chignecto Isthmus) and of the island of Cape Breton, separated by the Gut of Canso; short rivers and lakes abound. Dairy and poultry-farming are carried on, and fruit grown; gold, coal, iron, etc., are wrought extensively; manufactures are increasing; the fisheries (mackerel, cod, herring, salmon, etc.), and timber forests are the chief sources of wealth. Halifax is the capital. The climate is variable, and subject to coastal fogs. It was discovered in 1497 by Cabot, formed a portion of French Acadia, and finally became British in 1713. Area, 21,450 sq. m. Pop. 513,000.

Novatian, a Christian schismatical leader, a Roman priest who in the 3rd Century insisted that those who had lapsed under persecution could not be readmitted to the Church. He was joined by a considerable party, named after him Novatians, which died out in about the 6th Century.

Novaya Zemlya, a group of two large islands in the Arctic Ocean, between the Kara Sea and Barents Sea, 600 m. by 60 m., divided by a narrow strait, the Matochkin Shar; belongs to Russia, but is not permanently inhabited; is visited by seamen and hunters. Area, 80,000 sq. m.

Novel, a story in prose dealing with the adventures or feelings of imaginary persons so as to portray, by the description of action and thought, the varieties of human life and character. The earliest classical and medieval prose stories were mainly romantic, with little attempt at character portrayal. With Boccaccio's *Novella Storta* (whence the word *novel*), and such 16th Century tales as Lyly's *Euphues* and Sydney's *Arcadia*, the novel in our sense may be said to have begun. In the 18th Century, Defoe, Richardson and Fielding made it an important part of English literature; it was further enriched by Smollett's liveliness in *Peregrine Pickle* and *Humphrey Clinker* and by Sterne's characterization in *Tristram Shandy*.

Side by side with the realism of these authors was the popular vogue for the romantic "horror" novel, exemplified by Horace Walpole's *Castle of Otranto* and Mrs. Radcliffe's works. The romantic novel was given a new turn by the genius of Sir Walter Scott, who set the fashion for historical novels, dominating the beginning of the 19th Century.

Jane Austen's novel of manners proved a counter-influence, coming into its own later in the century with the novels of George Eliot and Bulwer Lytton, who, however, also wrote historical novels in the manner of Scott.

The Victorian age in literature is chiefly noted for the work of the great novelists, pre-eminent among whom are Trollope, Dickens, Thackeray, Hardy and Meredith, with Mrs. Gaskell, Charles Reade, Kingsley, and the Brontës closely following. The movement towards greater realism which originated with Flaubert, dominated the French and Russian novel—notably in the work of the Goncourt brothers, Tolstoy, Turgenev and Dostoevski—in the latter part of the century, and was brought to England by George Moore and others.

Emphasis on social conditions was shown in the novels written by H. G. Wells, George Gissing and Arnold Bennett, who with Galsworthy were the most prominent writers of the early 20th Century. Realism in the novel became linked up with psychology, and penetrating characterisation became the feature of the post-war novel. D. H. Lawrence, Aldous Huxley, James Joyce and Virginia Woolf are the best known English writers of the psychological novel, while with Somerset Maugham, Sir Hugh Walpole and, before them, Kipling the interest is perhaps equally balanced between character and action.

November, the eleventh month of the year, takes its name from the Roman calendar, having in the Roman calendar been the ninth.

Novocaine, or *Karcaine*, a drug which has replaced cocaine in surgery as a local anæsthetic, as it is less poisonous and its reactions are less likely to result in drug-taking habits. It is often combined with adrenalin.

Noyes, Alfred, British poet. Born in Oxford, Staffordshire and educated at Oxford, he published his first verse in 1902, which he followed with many other volumes; among them *The Loom of Years*, *The Winding Stair* and *The Torchbearers*. (1880-).

Noyon, city of France in the dept. of Oise, 67 m. N.E. of Paris, the birthplace of John Calvin. Its fine 13th Century cathedral was badly damaged during the World War, when the city suffered severely from bombardments. Pop. 9,500.

N.R.A., abbreviation for *National Recovery Administration*, the general term for the organisations and measures set up in pursuance of the National Industrial Recovery Act, passed by the U.S.A. Congress in 1933, and conferring wide powers on the President to deal with the economic crisis which had resulted from the slump of 1931. The Act enabled the President to take steps

to arrange industrial codes for separate industries guaranteeing the respective rights of employers and employees, to undertake public works on a vast scale, and to exercise a close supervision over production in every field. The operation of the N.R.A. gave rise to a great deal of controversy, a number of measures initiated by the President thereunder being debarred as unconstitutional by the Supreme Court; but alternative methods of overcoming these obstacles to its operation were generally found, and the various organisations and bureaux established under it did much to rehabilitate industry and finance in the years following 1933.

Nubia, a large and ill-defined region of Egypt (N.) and Abyssinia (S.), and stretches from the Red Sea (E.) to the desert (W.). It is now included in the Anglo-Egyptian Sudan.

Nucleus, in botany, a term applied to that portion of the ovule (or immature seed) included within the integument. It also applies to a denser portion of the protoplasm in the cells of all plants except some Thallophytes. It is clearly marked from the surrounding protoplasm and there is an inner portion called the nucleolus, or small nucleus.

Nucleus, in physics, the "core" of the atom, bearing a positive electrical charge which is exactly neutralised by the combined negative charges of the accompanying electrons. Almost the whole mass of the atom is concentrated in the nucleus, which is itself composed of protons and electrons. The splitting of atomic nuclei by bombardment with radio-active particles is one of the most important achievements of modern physics.

Nuffield (William Richard Morris), first Viscount, British industrialist; started business as a bicycle repairer; later began making motor-cycles (1900), and in 1911 built his first motor-car; in 1912 opened his first motor-car factory; made mine-sinkers during the World War; re-started car-making after the war at Cowley, Oxon., on mass-production principles; received a baronetcy in 1929; a peerage in 1934, and a viscountcy in 1938. A liberal donor to charities, including the sum of £2,000,000 in 1938 for the promotion of medical research at Oxford University. In July, 1938, he was entrusted with a Government order for a thousand aeroplanes as part of the national re-armament programme. (1877-).

Nullity of Marriage. A decree that a marriage has been null and void from the beginning may be sued for by a man or woman on the following grounds: (1) A prior marriage; (2) impotency of either of the two parties; (3) relationships within the prohibited degrees; (4) marriage without licence or publication of banns; (5) insanity of either of the parties; (6) force, fraud or mistake; (7) wilful refusal to consummate; (8) venereal disease or pregnancy by some third person existing at the time of marriage on the part of the person against whom the decree of nullity is sought.

Numa Pompilius, the second and the successor of Romulus, its founder; in Roman legend was regarded as the organiser of the state and its first lawgiver. In making his laws he was assisted by a nymph Egeria (q.v.), who lived close by in a grotto, and to whom he had recourse for consultation. His reign lasted from 715 to 673 B.C.

Numbers, book of the fourth book of the Pentateuch, so called from the two numberings of the people, one at the beginning and the other at the close of the period it embraces. It covers a period of 38 years, and relates the journeyings of the

Israelites in the desert of Sinai before their entry into Canaan.

Numerals, the signs used to denote arithmetical quantities. The ancient Greeks used the letters of the alphabet, in their order, for this purpose; the Romans used a cumbersome system in which the main signs were I (1), V (5), X (10), L (50), C (100), D (500) and M (1000), other numbers being formed by combinations of these, thus CCCLXXXVIII=1878. The "Arabic" numerals now universally in use were derived from India through Arabia in the middle ages; their inclusion of a sign (0) for zero, unknown to the classical world, did much to make the development of modern mathematics possible.

Numidia, ancient country in North Africa, nearly co-extensive with Algeria, the inhabitants of which were of the Berber race; sided at first with the Carthaginians in the Punic Wars (q.v.), and finally with Rome, till the country itself was reduced by Caesar to a Roman province.

Numismatics, the scientific study of coins and medals. Metal coinage in anything like modern form seems to have been introduced by the Lydians; it spread thence to Greece, and many ancient Greek coins remain unsurpassed even to-day for beauty of workmanship. The study of early coins has thrown much light on archaeology and dynastic history, their inscriptions often giving reliable and useful guidance as to dates and historical events.

Nummulites, a class of fossilized shells with a certain resemblance to coins. They occur in beds of nummulitic limestone, in deposits sometimes thousands of feet thick. They are characteristic of the Old World, and form much of the stone of the pyramids.

Nun, a female member of a religious order, dedicated to an active or contemplative life in the service of God. Christian nuns existed in Egypt as early as the 4th Century, and particularly since the 16th Century have performed heroic services to the cause of education and charity all over the world. There are several hundred orders of nuns in the Roman Catholic Church, and in the last hundred years several similar orders have arisen in the Anglican communion. Nuns played a large part in early Buddhism, but are seldom found in modern Buddhist communities.

Nunc Dimittis, the Canticle of Simeon found in Luke II. 29-32. It forms part of the evening service in the Book of Common Prayer, and is used in the Roman Catholic service of Compline.

Nuncio, an ambassador of the highest rank representing the Pope at the court of a sovereign. An internuncio represents the Pope at minor courts.

Nuneaton, market town of Warwickshire, shire, England, 22 m. E. of Birmingham; cotton, woollen, and worsted spinning is the chief industry. Pop. 48,000.

Nuphar, a genus of water plants of the order Nymphaeaceae, suitable for growth in ponds and tanks with a little soil. There are 7 species, all native to N. temperate and cold regions. *Nuphar luteum* is the British Yellow Water-lily or Brandy-bottle, bearing yellow flowers in June.

Nuremberg (Nürnberg), city of Bavaria, Germany, on the Pegnitz, 95 m. N. of Munich; has much quaint medieval architecture in fine preservation, valuable art collections, a large library, and a museum; produces watches, toys, wood, metal, beer, and chemicals, and exports large quantities of hops. Pop. 410,500.

Nursery School, an institution provision for the education and healthy development of children between the ages of two and five, thus bridging the gap (in England) between the Infant Welfare Centre and the Elementary School. The establishment of such schools in 1929 was largely due to the successful experiment of Miss Margaret McMillan at Deptford. Great stress is laid on the value of open-air, sunlight, play, rest and cleanliness.

Nursing. In former times nursing was undertaken under the direction of religious orders and the clergy, but later, especially in Protestant countries, it was regarded as a menial office, and not until the advent of general hospitals did it become a profession. In England, Mrs. Elizabeth Fry started a society for nursing the poor in 1840, while Florence Nightingale founded in 1860 the Nightingale Fund Training School for Nurses, and the profession was at last recognized as suitable for women of intelligence and education. Other important steps in the development of nursing were the opening in 1895 of the Nurses' Training School for London Hospital and that for Guy's Hospital in 1902. Since 1919 there has been statutory provision for a State Register of Nurses, qualification for inclusion being by examination under State control.

Nut, the seed or fruit of a tree enclosed in a woody shell or pericarp. Nuts of various kinds are important articles of human food, particularly in tropical lands, and from many of them valuable oils are expressed which are used in the manufacture of margarine and synthetic food products. The chestnut and walnut are both grown extensively in Europe; tropical countries export brazil nuts, coconuts, peanuts, and other food nuts in large quantities.

Nutation, name given to a slight oscillatory motion of the celestial pole of period 19 years; it is due to the effect of the moon upon the precessional motion of the earth's axis.

Nutcracker (*Nucifraga caryocatactes*), a perching bird, European and American, rarely seen in Britain, belonging to the crow family. It is about the size of a jackdaw and feeds upon nuts. Its colour is mainly brown, with black bill and feet.

Nuthatch, a family (the Sittidae) of wooded districts in Europe, N. America and Asia. They are allied to the titmice and are characterised by having long, wedge-shaped bills. The *Sitta casia* is common in England. It is about 5 in. long, has a grey back and pinkish underpart. It feeds on insects and the kernels of hazelnuts.

Nutmeg, the kernel of the fruit of *Myristica fragrans*, a tree growing principally in the East Indian island of Bando. It reaches a height of 30 ft. The nut is used as a spice, as is the mace, or covering in which the nut is contained.

Nux Vomica, a plant known botanically as *Strychnos Nuxvomica*, an erect tree, from the seeds of which the important alkaloids strychnine and brucine are obtained. Curarine, the alkaloid in the arrow-poison curare, is extracted from a related plant, the *Strychnos toxifera*.

Nyanza, Albert. See Albert Nyanza.

Nyanza, Victoria. See Victoria Nyanza.

NUTHATCH

Nyasa, Lake, lake in E. Africa, feeds the Zambezi; is 360 m. long by 10 to 50 m. wide, at an elevation of 1,555 ft., and was discovered by Livingstone in 1859; the waters are sweet, and abound with fish. On the E. of the lake lie the southern part of Tanganyika and the northern part of Mozambique; on the W., Nyasaland Protectorate.

Nyasaland, British protectorate in Central Africa, lying S. and W. of Lake Nyasa, the chief town of which is Blantyre; it was formerly known as the British Central Africa Protectorate. There are plantations of sugar, coffee, tobacco, tea and cotton. The capital is Zomba. Area, 37,400 sq. m. Pop. 1,020,000 (1,800 whites).

Nymphaea, a genus of aquatic plants of the family Nymphaeaceae, of which *Nymphaea alba*,

NYMPHAEA LOTUS

Oak, the general name of trees and shrubs belonging to the genus *Quercus* of the natural order Fagaceae (oaks and beeches). The male has pendulous catkins, and the fruit is an acorn. There are some 300 species, generally natives of the more temperate parts of the N. hemisphere though some are found on the Pacific Coasts and in Indomalaya. They are generally deciduous though some are evergreen. Noteworthy species are the British oak (*Quercus Robur* with two varieties, *sessiflora* and *pedunculata*), for centuries the chief timber used in this country in ship-building; the Holly oak (*Quercus Ilex*), the timber and bark of which are used in tanning; the Cork oak (*Quercus Suber*), the bark of which is ordinary cork; the White or Quebec oak (*Quercus alba*) and the Turkey oak (*Quercus Cerris*) both of which yield a useful timber.

Oak Apple Day, May 29, the day when oak leaves were worn in commemoration of the restoration of Charles II. to the throne in 1660, in reference to his concealment in the Boscobel oak after the battle of Worcester. Sept. 1651.

Oakengates, urban district and market town of Shropshire, England, 13 m. E. of Shrewsbury. It has coal and ironstone mines. Pop. 11,900.

Oak Gall, or oak-apple, an excrescence insect, e.g., the gall wasp on oak trees. It is about the size of a marble and contains the grub.

Oakham, county town of Rutland, England, 17 m. E. of Leicester, in the centre of a fine wheat country. It has an old church, a grammar-school and a 12th Century castle, of which the banqueting-hall forms the modern county-hall. Malting and the manufacture of boots and hosiery are carried on. Pop. 3,000.

Oakland, city of California, U.S.A., the capital of Alameda county. It is on the E. coast of the Bay of San Francisco, 4½ m. across from San Francisco city; a beautiful city with tree-lined streets. It is in a vine and orchard country, has a fruit-canning industry, and manufactures textile and iron goods. Pop. 284,000.

the white water-lily, is a well-known British species, found in lakes and rivers, and frequently grown on ornamental waters.

Nymphs, in the Greek mythology, maidens, divinities of inferior rank, inhabiting mountains, groves, seas, fountains, rivers, valleys, grottoes, etc., under the names of Oceanides, Nereids (q.v.), (q.v.), Oreads, Dryads (q.v.), etc.; distinguished by their grace and

Nysa, or Nyssa, the name sacred to Bacchus (Dionysus), in Ethiopia to the South of Egypt, in Arabia, the other in India. The name of Dionysus, who was reared there by nymphs, is a compound of the Greek meaning "God" and Nysa.

Nystagmus, a disease of the eye consisting of an oscillation of the eyeball accompanied by a feeling of giddiness as well as a twitching movement. It can be temporarily induced by turning the body round and round rapidly. Air-pilots are specially tested for nystagmus before being granted permission to fly.

Oaks, The, one of the five great classic races in England, run at Epsom; it was established by the 12th Earl of Derby in 1779 and is for fillies of 3 years old. The course is 1½ m. 5 yds.

Oakum, name given to fibres of old rope, used in caulking the seams between planks in ships; the teasing of oakum was formerly an occupation for prisoners in jail.

Oamuru, seaport of New Zealand, in S. Island, 78 m. N. of Dunedin, the centre of an agricultural district. Pop. 5,500.

Oases, fertile places in a desert. Those of the Sahara in N. Africa are generally river valleys the waters of which are usually underground. Sometimes they are depressions surrounded by hills into which small streams empty themselves. The most famous oasis of ancient times was in W. Egypt and was called the Oasis of Siwah. Oases have been created artificially by the sinking of artesian wells (q.v.).

Oast-House, a building containing

The hops are placed on horsehair-covered floors, which are heated from below, and the oast-house is so built as to provide for a continual draught of warm air to pass through and escape from an outlet at the top. Circular oast-houses with conical roofs are a feature of the landscape in the hop-growing districts of Kent, England.

OAST-HOUSE

Oates, Lawrence Edward Grace, British explorer. An army captain wounded in the Boer War, he joined Capt. Scott's Antarctic expedition in 1910, and was a member of the final party that reached the S. Pole. On March 17 Oates, who had been taken ill and feared that he might prove a burden to his comrades, deliberately walked from the tent to die. Scott commented in his diary, "It was the act of a very gallant gentleman." (1880-1912).

Oates, Titus, fabricator of a fictitious Popish plot for the overthrow of the Protestant faith in England, which brought to the block several innocent men; rewarded at first with a pension and safe at Westminster Hall, he was afterwards convicted of perjury, flogged, and imprisoned for life, but at the Revolution (1688) (1649-1705).

a solemn assertion or promise with the invocation of God as a witness, hence the termination of the judicial oath, "So help me God." In English law an oath of allegiance must be taken by the chief officers of State, judges, justices, members of Parliament, etc., though since 1888 the latter are allowed to affirm. Jurors are required to take an oath to perform their functions honestly. Before 1909 an oath in court was accompanied by kissing a copy of the New Testament, but now the party taking the oath holds the book in his uplifted hand.

Oats (*Avena*), a genus of grasses cultivated extensively in temperate climates for the sake of their grain and though grown largely as food for horses, also forms the staple part of the food of large numbers of people in N. Europe. There are about sixty species, the chief of which is *Avena sativa* (the common cultivated oat). The meal product is about half the weight of the oats and is a valuable article of food. The wild oat (*A. fatua*) is supposed to be the original species.

Obadiah, a Hebrew prophet who lived about 588 B.C., shortly after the destruction of Jerusalem, at which the Edomites had assisted, and whose prophecy was written to assure the Jews that the judgment of God had gone forth against Edom. The book of Obadiah, with 21 verses, is the shortest of the Old Testament.

Oban, burgh and seaport of Argyllshire, Scotland, on a landlocked bay opening off the Firth of Lorne. The capital of the Western Highlands, it is a fashionable tourist resort. Near by are two ruined castles, an ancient cave-dwelling, and beautiful scenery. Highland games are held there annually. Pop. 5,800.

Obelisk, a tall four-sided pillar, tapering to a pyramidal pointed top, erected in connection with temples in Egypt, and often inscribed with hieroglyphics. The so-called "Cleopatra's Needle," on the Thames Embankment, is a typical Egyptian obelisk; it was removed to London in 1877 from Alexandria.

Oberammergau, a small village in Bavaria, 45 m. SW. of Munich. It is famous for the Passion Play performed by the peasants every ten years, which attracts a great many visitors. The play was instituted in 1634 in token of gratitude for the abatement of a plague.

Obesity, abnormal accumulation of fat in the body under the skin or around certain organs. The condition is often hereditary and sometimes results from over-indulgence in eating and drinking alcoholic liquors, or from lack of exercise. A diet of starch reducing foods and alkaline waters with regular exercise will reduce obesity, and extract of thyroid gland is successful in certain cases.

Obi, river of W. Siberia, which rises in the Altai Mts., flows across the Kirghiz steppe in a N. and NW. direction, and discharges into the Gulf of Obi, on the shore of the Arctic Ocean, after a course of about 1,400 m. It is an important waterway.

Oblates, an organisation of men and women, not under monastic vows, who have devoted themselves to some religion; especially a community of secular priests founded by St. Charles Borromeo in 1578, who are ready to render any services prescribed by the bishop.

Obligation, Holidays of, in the Roman Catholic Church, days set apart for abstinence from servile labour, accompanied by an obligation to attend Mass. The various holidays of obligation include those of the Circumcision, Epiphany, Ascension, Corpus Christi, SS. Peter and Paul, Assumption, All Saints and Christmas Day in England. In Scotland, the feasts of St. Joseph and the Immaculate Conception are also holidays of obligation; and in Ireland, St. Patrick and the Immaculate Conception.

Oboe, a wood wind instrument with a conical bore and a double-reed mouthpiece, forming the treble member of the class to which it belongs, the bassoon being the bass. It terminates in a small open bell, in this differing from the oboe-d'amore, whose pear-shaped bell lent it a more veiled and sympathetic tone. The word oboe comes from the old French "haut bois," or "upper wood wind."

Obolus, a small coin worth about a penny, which the Greeks were accustomed to place in the mouth of a corpse at burial, as the fee of Charon, the ferryman of the Styx.

O'Brien, William, Irish politician; entered Parliament 1885; repeatedly imprisoned for activities in connection with the land campaign; in the early 20th Century, founded an Independent Nationalist Party which worked for conciliation, but it disappeared on the rise of Sinn Féin in 1918. (1852-1928).

Observatory, a building equipped with the necessary instruments for the study of astronomy, astrophysics, meteorology, seismology, magnetic determination, or volcanic conditions. The following are among the most notable of the world's astronomical observatories: Yerkes Observatory, of the University of Chicago, Williams Bay, Wis.; the Lick Observatory, of the University of California, at Mount Hamilton; Meudon Observatory, France; Berlin Royal Observatory; Pulkova Observatory, Russia; Royal Observatory, Greenwich.

These observatories contain the world's largest refracting telescopes, ranging from the 40-in. telescope (length 82 ft.) at Yerkes Observatory to the 28-in. at Greenwich. Reflecting telescopes may be constructed on a larger scale, and are often more suitable for some kinds of celestial photography. A 74-in. reflecting telescope is in use at the David Dunlop Observatory of the University of Toronto at Richmond Hill, Toronto, while a 200-in. reflecting telescope was in 1938 in course of construction for an observatory to be erected on Mount Palomar, San Diego County, California.

Meteorological observatories are also established in various parts of the world; in Great Britain they are centred on the Observatory at Kew, with subsidiary stations at Greenwich, Falmouth, Oxford, Stonyhurst, Glasgow and Armagh.

Obsidian, a hard, lustrous rock of a glassy structure, which breaks with a conchoidal fracture. It is actually a natural glass, formed by volcanic action.

Obstetrics, the branch of the practice of medicine concerned with the welfare of women during childbirth and the ailments to which a mother is subject during pregnancy. It is closely related to gynaecology (q.v.).

O'Casey, Sean, Irish dramatist. Born in Dublin, he received no edu-

lite, especially of the civil war period, are *Junio* and the *Paycock*, *The Plough*, and the

Stars, The Silver Tassie, Within the Gates, and Windfalls. (1899.)

Occam, philosopher, born at Ockham, Surrey; a monk of the order of St. Francis, he studied under Duns Scotus and became his rival, and reviver of Nominalism in opposition to him, by his insistence on which he undermined Scholastic dogmatism, but cleared the way for modern speculation. (c. 1300-1349.)

Occlusion, in chemistry, the absorption of a gas by a metal, as of hydrogen by palladium. In the process of decomposing water, a strip of palladium, if used as the negative electrode, will absorb from 800 to 900 times its volume of hydrogen.

Occlusion, a term used in astronomy for the hiding of a star or planet from sight owing to the interposition of another nearer celestial body, and specifically applied to the concealment of a star or planet by the moon.

Ocean, a body of water surrounding the globe, dry land of the globe, or a large division of this body. There are three great oceans, the Atlantic, Pacific and Indian, all of which are connected with the so-called Southern or Antarctic Ocean, while the N. part of the Atlantic joins the Arctic Ocean. The deepest part of the Pacific Ocean, between Celebes and Japan, is 34,416 ft. The floor of the ocean consists mainly of three areas; the continental shelf, between the shores and the 100-fathom line, the steep continental slope, between 100 and 1,700 fathoms, and the abyssal area, averaging 1,700 fathoms in depth.

Oceania, a geographical area of the S. and central Pacific Ocean, comprising Australia, Tasmania, the group of islands stretching from Fiji to New Guinea, both inclusive, and the groups known as Polynesia and Micronesia, which include Hawaii, Samoa, the Marquesas, the Society Islands, the Ladrões, the Carolines, the Gilberts, etc.

Oceanus, in Greek mythology, the great world-stream which surrounds the whole earth, and is the parent source of all seas and streams; presided over by the god Oceanus, the husband of Tethys, and the father of all river-gods and water-nymphs.

Ocelot (*Felis pardalis*), a carnivorous animal of the cat family, found in tropical America. It is about 3 ft. long, with a tawny yellow coat marked with black spots or streaks. It feeds on rodents and birds, and climbs trees with ease.

OCELOT

Ochls (i.e., the heights), a range of hills in Scotland, extending for about 25 m. from Bridge of Allan, Stirlingshire, N.E. to the Firth of Tay; they reach their highest point in Ben Cleugh (2,363 ft.), near Stirling.

Ochre, the name given to naturally occurring hydrated oxide of iron. It is found in the form of an earth mixed with silica and alumina and varies in colour from light yellow to reddish brown. It is employed as a pigment in the manufacture of paint.

O'Connell, Daniel, Irish patriot, known as the "Liberator," born near Cahirciveen, co. Kerry; was called to the Irish bar in 1793, and organised the Catholic Association of 1823. On being returned for Clare (1828), the House refused to admit him, but so strong was the agitation in Ireland, that in 1829 the Catholic disabilities were removed. Next year he represented Waterford, and subsequently Kerry, Dublin, Kilkenny and Cork. He then formed

a society for the repeal of the Union and in 1843, as Lord Mayor of Dublin, carried a resolution in its favour in the City Council. In 1844 he was indicted for raising sedition and sentenced to a year's imprisonment and a fine of £2,000, but liberated. By this time the Young Ireland party had broken away from him, the potato famine occurred and his health was broken. (1775-1847).

O'Connor, Thomas Power, Irish journalist and politician. He started his career as a journalist in 1837 and entered Parliament in 1880 as an Irish Nationalist. He became Father of the House of Commons, but never gave up his journalistic work, founding and editing the *Star*, *T.P.'s Weekly*, and other papers. He wrote numerous political and biographical books. (1848-1929).

Octave, in music, an interval of eight diatonic notes, as from C to C or B to B, etc., comprising a complete scale. When two notes an octave apart are sounded together, their sound is the most agreeable to the ear after that of a consonance. The vibration of an octave note is twice as fast as that of its fundamental.

Octavia, the sister of Augustus, a woman and her virtue; was married first to Marcellus, and on his death to Mark Antony, who forsook her for Cleopatra, but to whom she remained true, even, on his miserable end, nursing his children by Cleopatra together with her own.

Octavo (8vo.), the size of a sheet of paper that has been folded three times so as to make eight leaves; hence, a book having eight leaves to the sheet. There are different sizes of octavo, arising from the different sizes of paper employed, such as, foolscap 8vo., demy 8vo., imperial 8vo.

October, the tenth month of the year in the modern chronology, but the eighth (Lat. "octo," eight) month among the Romans, whose year began in March.

Octopus, a sub-order (Octopoda) of cephalopod molluscs, with eight arms, each furnished with two rows of suckers. The Common Octopus (*Polyopus vulgaris*), found in the Channel Islands and in the Mediterranean occasionally reaches a length of 6 ft.

Octroi, an old French term signifying from Government to a person or company. It also signifies a tax levied at gates of towns, etc., on produce brought in for use.

Oddfellows, the name of several of which the Independent Order of Oddfellows, Manchester Unity, founded in 1813, is the largest and most important. It has been a pioneer in many important movements among friendly societies. The chief Oddfellows' society in America is the Grand Lodge of Maryland and the U.S.A., and there are similar organizations in many other parts of the world.

Ode, originally, among the Greeks, a poem intended to be sung, but in modern times any elaborate lyric poem upon a lofty, heroic, or passionate theme. Pindar and Bacchylides were the greatest masters of the Greek ode; the most celebrated writer of Latin odes was Horace. Many modern poets have excelled with the ode. Gray's odes approach those of Pindar. Keats's *Ode on a Grecian Urn*, *Ode to a Nightingale* and *Ode to Autumn* are of exquisite beauty. Milton, Wordsworth, Shelley, Tennyson, and Swinburne also wrote odes on a variety of subjects.

Odense, the capital of the island of Funen. It is connected with Odense Fjord, 4 m. away, by canal. In the fine old dral Caszue is buried. Pop. 78,000.

Oder, river of Germany, which rises in Moravia, and crossing the frontier, flows NW. through Silesia, and N. through Brandenburg and Pomerania into the **Stettiner Haff**, on the Baltic. On its banks stand Ratibor, Breslau, Frankfurt, and Stettin. Its chief tributary is the navigable Warthe, and it has canal communication with the Spree, Elbe and Vistula. It is about 360 m. in length.

Odessa, city of the Ukrainian republic, U.S.S.R., on the Black Sea, 25 m. NE. of the mouth of the Dniester, the chief southern port of Russia, with 5 harbours. It exports large shipments of wheat, sugar and wool, and manufactures flour, tobacco, glass, brooks, machinery, and leather. It is well fortified, and has a university, a zoological garden, an opera-house, and museums, libraries and scientific establishments. Pop. 497,000.

Odin, or **Woden**, the chief god of the ancient Scandinavians, combining the powers of the Greek Zeus and Ares. His council chamber was Asgard and he held court with his warriors in Valhalla. Frigg was his wife, and Balder and Thor his sons. Legends concerning him are told in the old Icelandic sagas (particularly in the two *Eddas*). He is represented at times as the embodiment of wisdom and accomplished in poetry and magic; at times as a giver of victory and god of the dead. A revival of his cult has been attempted in Germany in connection with Nazi Aryan ideals. His German name was Wodan, Anglo-Saxon Woden.

Odo, bishop of Bayeux, half-brother of Earl of Kent, and appointed governor of the kingdom during William's absence in Normandy; at first had great influence in State affairs, but his ambition led to his fall from power and imprisonment; prominent at the court of Normandy, he joined the first crusade, but died at Palermo. (d. 1097).

Odontoglossum, a genus of orchids, of which there are about 100 species, natives of the Andes and other mountainous parts of tropical S. America. The flowers are very beautiful and the stems, abbreviated, are terminated by a one or two-leaved pseudobulb. In their native surroundings they are epiphytes, i.e., not usually attached to the soil but attached to another plant for support without being parasitic. They are grown in England as greenhouse orchids. Many hybrids have been cultivated, including *Alector-Perfection*, *Imperator-Olympic*, *Royal Asot* and *Xanthinum*.

Odyssey, an epic poem by Homer relating the ten years' wanderings of Ulysses (Odysseus) after the fall of Troy, and his return at the end of them to his native kingdom of Ithaca.

Ecumenical Council, an ecclesiastical council representative, or accepted as representative, of the Church, universal or Catholic. See *Councils*.

Edipus, a legendary king of Thebes, and fated to kill his father and marry his mother; unwittingly slew his father in a quarrel; for answering the riddle of the Sphinx (q.v.) was made king in his stead, and wedded his widow, by whom he became the father of four children; on discovery of the incest Jocasta hanged herself, and Edipus went mad and put out his eyes, a favourite tragic theme.

Enone, a nymph of Mount Ida, near to Paris, Troy, beloved by and married to Paris, but whom he forsook for Helen; is the subject of one of Tennyson's poems.

Enothera. See *Evening Primrose*.

Oersted, Hans Christian, Danish physicist; appointed professor of physics at Copenhagen in 1808; he was the discoverer of electro-magnetism, the metal aluminium and other important scientific facts; he did much to popularise science by his book *The Soul in Nature*. (1777-1851).

Esel, or **Saaremaa**, a marshy well-wooded island of the Baltic, belonging to Estonia; situated at the mouth of the Gulf of Riga, it is about 45 m. long and 25 m. in average breadth, with an area of 1,000 sq. m.; Kuressaare, formerly known as Arensburg, on the SE. shore, is the only town. Pop. 45,000.

Esophagus, the gullet, or that part of the alimentary canal leading from the pharynx, the short cavity at the back of the mouth, to the stomach. In man it is composed of two layers of muscular fibres.

Offaly (formerly King's County), inland county of Eire (Ireland) in Leinster. Its surface is mainly flat—notably in the Bog of Allen in the N., but in the SE. are the Slieve Bloom Mountains, rising to 1,733 ft. It is watered by the Shannon, the Brosna, and other rivers. Tullamore is the chief town. Area, 722 sq. m. Pop. 51,300.

Offa's Dyke, an entrenchment and rampart between England and Wales, 100 m. long, extending from Flintshire as far as the mouth of the Wye; it is said to have been constructed by Offa, king of Mercia, about the year 780, to confine the marauding Welsh within their own territory.

Offenbach, Jacques, French composer, born in Cologne of Jewish parents; studied music in Paris, and in 1853 produced *Pepito*, the first of many comic operas, of which the most popular were *La Grande Duchesse de Gerolstein*, *La Belle Héloé* and especially *Les Contes d'Hoffmann*. (1819-1880).

Offensive Trades are those which constitute a nuisance under the Public Health Act, of 1875. They include blood-boiling, bone-boiling, soap-boiling, fell-mongering, tallow-melting and tripe-boiling. The penalty for infringing the regulations which control these trades is a fine of £50. An action can be brought in the High Court to abate any nuisance caused by such trades, such as offensive smells. A declaration signed by a Medical Officer of Health or by ten inhabitants of the district is sufficient to demand an abatement.

Offertory, in the Roman Catholic liturgy chanted at the commencement of the eucharistic service. In the English Church the word connotes the part of the service read during the collection of the alms at communion.

Office, Holy, a congregation of Catholic Church whose concern it is to supervise the purity of the faith and provide against heresy. The Inquisition (q.v.) was formerly so known.

Officers Training Corps, units organised for the training of Army officers by various universities and public schools. The offer to organise such a corps must be accepted by the Army Council. There are two classes: the senior, conducted by the universities, and the junior, conducted by the public schools. The purpose of the O.T.C., as it is popularly called, is to supply

ODONTOGLOSSUM
ASPERSUM

officers in a national emergency. They are on a voluntary basis.

Official Receiver, in England, a public official who performs certain duties in the winding-up of companies and the bankruptcy of individuals. He reports to the courts any misdemeanour under the Bankruptcy Act and supervises the trustees.

Official Secrets Acts, acts passed in 1890, 1911 and 1920 to provide punishments for the disclosure of state secrets by civil servants and others. In recent years protests have been increasingly made by journalists and others against their alleged use by the Government in such a way as to raise obstacles to the collection of news.

Ogee, an architectural moulding consisting of a double curve, the upper half convex and the lower concave.

OGEE

Ogham, or **Ogam**, an alphabet of 20 Goidels of Ireland, Scotland, Wales and SW. England; the signs, consisting of groups of upright and oblique strokes, are usually found carved on monumental stones, of which about 300 are known.

Oglethorpe, James Edward, English general, born in London; served under Prince Eugene against the Turks, and in 1732 established the colony of Georgia, in N. America, as a refuge for paupers and debtors, and defended it against the Spaniards. His conduct as a general during the Jacobite rising of 1745 was the subject of a court martial, but he was acquitted. (1696-1785).

Ogmore (and **Garw**), urban district of Glamorganshire, Wales, situated 4 m. SW. of Bridgend. It is the centre of a coal-mining area. It has remains of a Norman castle. Pop. 27,000.

Ogowe, river of W. Africa which rises in the Akukuja plateau, and flowing N. and W., enters the Atlantic by a delta S. of Cape Lopez, its course lying wholly within French Congo territory. Sandbanks prevent navigation except by small boats. It has a course of 750 m.

Ogpu, abbreviation of Obiedinyonnoye Gosudarstvennoye Politicheskoye Upravleniye, or the State security department of the U.S.S.R., successor of the Cheka, whose duty it is to control and expose counter-revolutionary activities, political plots, espionage, sabotage, and so on. It operates under the control of the Central Executive Committee of the Soviet Union exercised through its Attorney-General, and its head is one of the Council of People's Commissaries. Its secret police operate throughout Russia, and, it has been said, even abroad, and have been responsible for the arrests made in the many successive anti-Trotskyist "purges" that have recently taken place in the country.

O'Higgins, Bernardo, Chilean soldier and statesman, born at Chillán, of Irish descent; he joined the rebellion of Rozas in 1810, and was defeated at Rancagua in 1814; afterwards joined San Martín, and won several battles. In 1822 he became dictator of Chile, in the first national government, but was forced to retire next year. (1776-1842).

O'Higgins, Kevin Christopher, Irish politician; he joined the Sinn Féin movement in 1916 and was imprisoned; elected for Queen's County (1918), he served in the Cosgrave ministry and became minister of justice and vice-president of the

executive council in 1923 and also, in 1927, minister for external affairs. He was assassinated near Dublin. (1892-1927).

Ohio, a state of the U.S.A., which stretches northward from the Ohio R. to Lake Erie, between Pennsylvania and Indiana. Area, 41,040 sq. m. It consists of level and undulating plains, producing wheat and maize. Sheep-grazing and cattle-rearing are very extensive, and large quantities of wool are produced. There are valuable deposits of limestone and freestone, and important coalmines, oil-wells and reservoirs of natural gas. The manufactures include iron and steel goods, machinery, motor-cars, wagons and textile fabrics. In the N. excellent fruit is grown. The capital is Columbus, and other cities are Cleveland (the largest), Cincinnati, Toledo, Akron and Dayton. The state was settled in 1788 and admitted to the Union in 1803. Area, 41,000 sq. m. Pop. 6,850,000.

Ohio River, river of the U.S.A.; formed by the confluence of the Allegheny and the Monongahela Rr. It pursues a westward course of 987 m., and after receiving sundry tributaries, joins the Mississippi, being the largest and, next to the Missouri, the longest of its affluents. It is navigable for the whole of its course. On its banks stand Pittsburgh, Cincinnati, Louisville, and other cities.

Ohm, the standard unit of electrical resistance, defined as the resistance of a column of mercury of specified size; an electro-motive force of one volt will send a current of one ampere length through a resistance of one ohm.

Ohm, Georg Simon, German physicist, born at Erlangen; became professor of mathematics of Cologne (1817) and at Nuremberg (1833), and in 1852 professor of physics at Munich; discovered the law of conduction known as Ohm's Law, which states, briefly, that the strength of an electric current is equal to the electro-motive force divided by the resistance of the conductor. (1787-1854).

Ohmmeter, in electricity, a direct-reading instrument used to measure, commonly, resistances of great magnitude, such as those of insulation. The instrument has two coils, with their axes at right angles. One coil is connected to a known, and the other to an unknown resistance. With a fixed voltage supply, the deflection of the needle depends upon the value of the unknown resistance.

Oilcake, a cake or mass of compressed linseed—or rape, poppy, mustard, cotton and other seeds—from which oil has been extracted. Linseed cake is much used as a cattle food, while rape-cake is employed for fattening sheep.

Oil City, city of Pennsylvania, U.S.A., on the Allegheny R., 75 m. N. of Pittsburgh; it is the centre of a great oil trade, and oil-refining industry; there are also engineering and boiler works and a municipal airport. Pop. 22,000.

Oil Engines, a term applied to (1) internal combustion engines burning heavy oil instead of petrol, e.g., Diesel engines; and (2) ordinary steam engines (turbines, etc.) burning an oil fuel instead of coal, as installed in many large modern vessels. See *Internal Combustion Engine*; *Turbine*.

Oils and Fats. Fixed (non-volatile) oils and fats are esters, or mixtures of esters, of glycerol with fatty acids or with acids related to the fatty acids but containing less hydrogen, i.e., unsaturated. A typical fat, occurring in mutton-fat, is tri-stearate or tri-stearin, while a oil is glyceryl oleate, or tri-olein, being in olive-oil. Oils and fats are probably formed in the living organism by the

reduction of carbohydrates, such as starch and sugar; they act as reserve food supplies and contain large amounts of potential energy, which becomes available when they are oxidized in the normal life-processes. When pure, they are colourless, odourless and tasteless, insoluble in water and neutral to litmus. Among the chief fats are tallow, lard, suet and butter, while of the oils perhaps the best known are linseed, cottonseed, olive and coconut. See also *Fats*.

Oise, dept. of N. France, bordered by the Seine-Inférieure on the W., chiefly by Seine-Inférieure on the W., by Somme, on the N., and Seine-et-Marne and Seine-et-Oise, on the S. Its area is 2,272 sq. m.; it is largely hilly, has extensive forests, and is watered by the lower course of the Oise and its tributaries. Clay, sand, building-stone and peat are worked; the crops include grain, potatoes and sugar-beet, and cattle-rearing and bee-keeping are carried on; there are numerous mineral springs. Industries include the manufacture of sugar-beet products, textiles, carpets, hosiery, lace, furniture and brushes. Beauvais is the chief town. Pop. 402,600.

Oise, river of Europe, which rises N. of France, the Ardennes, in Belgium, enters France and flowing SW. falls into the Seine at Compiègne-St. Honorine, 40 m. below Paris. Its principal affluent, the Aisne, joins it near Compiègne; extensively canalized, it has a length of 186 m.

Ojibwas, or Chippewa, a group of Algonkin Indians originally inhabiting the shores of Lake Huron and Lake Superior, and now divided equally between Canadian and American territory. They were friendly to the early French settlers, and later to the British. At the present time the tribe numbers about 30,000.

Oka, river of the U.S.S.R., which rises S. of Ochkia, in the Central Black Soil Area, and flowing N. and W. alternately, joins the Volga at Gorky (Nizhni-Novgorod), after a course of 950 m., navigable nearly all the way.

Okapi, an African animal of the giraffe family. It has comparatively

short neck and legs, has a light fawn-coloured head, purplish body, with horizontal black and white, zebra-like markings on the flanks and legs. It is exceedingly rare, being found only in the most inaccessible parts of the Great Congo Forest where it was discovered in 1901 by Sir H. Johnston. The male has vestigial horns.

OKAPI

Okhotsk, sea of, an immense sheet of water in E. Siberia, lying between the peninsula of Kamchatka and the mainland, with the Kurile Islands across its mouth; it is scarcely navigable, being infested by ice and ice-bound throughout the winter.

Oklahoma, a state of the U.S.A., which stretches southward from Kansas to the Red R., with Texas on the W. and S., and Missouri and Arkansas on the E.; it has an area of 69,414 sq. m., and presents a prairie surface crossed by the Arkansas, Cimarron, and Canadian Rs., and rising to the Wichita Mts. in the S. There are many brackish streams, and the rainfall is light, hence the soil can be cultivated only in parts. Oil, coal, natural gas, lead and zinc are the chief mineral products. Ceded to the United States under restrictions by the tribes of the Indian Territory in 1886, the area was finally purchased and opened for settlement in 1890. The chief town is Oklahoma City, and other important towns are Tulsa and

Muskogee. The State was admitted to the Union in 1907. Pop. 2,396,000.

Oklahoma City, city of the U.S.A. and capital of the state of Oklahoma, on the North Fork of the Canadian R. It is a new city, settled in 1889, with many handsome buildings and streets bordered with trees. There is a university, founded in 1911. The city has an important trade in cotton, cattle, horses and other stock; there are also stockyards and canning factories. Pop. 185,400.

Olaf, St., a Norwegian king; wrested the throne from Eric in 1015 and by striving to propagate Christianity by fire and sword, excited disaffection among his people, who rebelled and obliged him to flee to his brother-in-law, Jaroslav of Russia, by whose help he tried to recover the throne, but was defeated and slain; he was canonised in 1164, and is patron saint of Norway (945-1030).

Öland, an island of Sweden, off the coast, 85 m. long and about 10 1/2 broad, with an area of 519 sq. m.; it has good pasture and yields alum, chalk and sandstone; the fisheries are valuable. Borgholm is the only large settlement. Lake Hornsjö is 3 m. in length. There are many stone monuments and other antiquities. Pop. 30,000.

Olav, Crown Prince of Norway, son of Haakon VII, born July 2, 1903; married, 1929, Princess Märtha of Sweden, and has 3 children, two daughters and a son, Prince Harald, born 1937.

Old Age Pensions, were first granted in 1909. Under the Old Age Pensions Act, 1908, the maximum pension was 5s. weekly, and no pension could be paid to an applicant whose income was over £31 10s. per annum. From time to time the rates have increased and now vary (a) in the case of a pensioner who is one of a married couple living together in the same house, between 10s. a week, where the combined yearly means of husband and wife do not exceed £52 10s., and 1s. a week where the yearly means do not exceed £99 15s.; (b) in other cases, between 10s. a week, where the yearly means do not exceed £26 5s., and 1s. a week where the yearly means do not exceed £49 17s. 6d. To arrive at the "yearly means," a deduction not exceeding £78 in case (a) or £39 in case (b) may be made from means other than earnings. The pension is payable to persons of the age of 70 or over, who have been British subjects for the preceding 10 years and have resided in the United Kingdom for 12 years since attaining the age of 50, if natural-born British subjects, or for 20 years if not natural born. By the Widows' and Orphans' and Old Age Contributory Pensions Acts of 1925-1931, persons who have paid a specified number of contributions under the Insurance Acts are entitled to a pension of 10s. weekly on attaining the age of 65, with no conditions as to income. A widow's contributory pension is supplemented by allowances of 5s. weekly for the first child and 3s. for each additional child of school age or younger. Non-contributory Old Age pensions are paid to blind persons from the age of 50.

Old Bailey, popular name for the London, which stands on the site of the old prison of Newgate; the existing building dates from 1906. The word "bailey" is derived from the Fr. *baillie*, meaning a work fenced with palisades or masonry, constituting a town's defence, and later used as a synonym for any prison.

Oldbury, urban district of Worcester-shire, England, in the Black Country, 5 m. N. of Birmingham; it has

chemical, iron and steel works, and factories of many kinds. Pop. 36,000.

Oldcastle, Sir John, Lord Cobham, distinguished himself in arms under Henry IV. in 1411, but having embraced Lollardism was tried for heresy and committed to the Tower in 1413, but escaped to Wales; recaptured and convicted of abetting insurrection on religious grounds, he was burned to death in St. Giles's Fields. (d. 1417).

Old Catholics, a section of the Church in Germany and Switzerland that first announced itself in Munich in 1870, upon the declaration of the dogma of the infallibility of the Pope. The prime movers were Dr. Dollinger and Professor Friedrich, backed by 44 professors of the university; the movement has not extended itself to any considerable extent.

Oldenburg, a German state embracing three provinces: (1) Oldenburg proper, the largest, adjoins Hanover, with its N. limit on the North Sea; it is a tract of moorland and fen, watered by the Weeser, Hunte, and tributaries of the Ems; the capital is Oldenburg, on the Hunte, 30 m. NW. of Bremen. Pop. of province, 467,000. (2) Lübeck lying in Holstein, N. of but not including the city of Lübeck; Area, 209 sq. m. Pop. 48,000. (3) Birkenfeld, lying among the Hunsrück Mts. in the S. of Rhenish Prussia; Area, 312 sq. m. Pop. 58,000. Independent since 1180, then belonging to Denmark (1677-1773), Oldenburg acquired Lübeck in 1803, and Birkenfeld in 1815, when it was raised to the rank of grand-duchy; it became a republic in 1918. Under the Nazi regime, popular government was set aside and the state put under the chancellor's statthalter.

Oldham, a county borough of Lancashire, England, on the Medlock, 7 m. NE. of Manchester; an important cotton-spinning centre, it has numerous cotton-mills and also manufactures silks, velvets, hats and machinery. Pop. 140,300.

Old Red Sandstone, a name given consisting of sandstones, shales and limestones, laid down in N. and W. Europe and N. America in Devonian times, to distinguish them from the New Red Sandstone of Triassic age. The fossils, which are very rich in remains of fishes, crustaceans and aquatic plants, indicate that these deposits were laid down in inland seas.

Old Testament. See Bible.

Old Trafford, a W. suburb of Manchester, England, where the cricket ground of the Lancashire club is situated. The Manchester Ship Canal traverses the former beautiful Trafford Park.

Oleander, *Nerium Oleander*, a beautiful evergreen shrub of the Apocynaceae order, with rose (or white) flowers in clusters; native to the Mediterranean shores. The bark of the root is medicinal and poisonous.

Oleaster, the popular name of a genus (*Elaeagnus*) of small hardy trees of the order Elaeagnaceae, distributed over Asia, Europe and N. America. There are 20 species, some of which are cultivated in English gardens for the sake of their foliage and their fragrant flowers, especially *Elaeagnus argentea* (deciduous) bearing silvery-white willow-like leaves and yellow flowers; *E. macrophylla* an evergreen bearing silvery leaves and flowers; *E. pungens* an evergreen bearing white gardenia-scented flowers and *E. umbellata*, one of the most handsome species of all.

Olefines, in chemistry, a series of a luminous and smoky flame and easily com-

bine with other substances. The simplest member of the series is the gas ethylene, while the remainder are inflammable gases or solids insoluble in water.

Oleograph, a print in oil-colours produced by a process which is designed to imitate an original oil-painting.

Oleron, an island of France, in the Bay of Charente; 11½ m. long and from 3 m. to 7 m. broad. It is separated from the mainland by a narrow channel. Pop. (island) 16,500.

Olga, Russian saint, wife of Igor, prince of Kiev; a Christian convert herself in 955, she converted her subjects too. (d. 969). Festival, July 11.

Oligarchy, a term applied to a government in which supreme power is concentrated in the hands of a few persons. During the Middle Ages oligarchies existed in Genoa, Florence and elsewhere, and this form of government is especially characteristic of the modern "totalitarian" state.

Oligocene, name given to the division of tertiary rocks lying above the eocene and below the miocene. The only rocks of this age in England are in the Hampshire basin, especially in the Isle of Wight, and are represented by sandstones, limestones, marls and clays.

Olive (*Olea europaea*), a fruit tree of the natural order Oleaceae; a low-branched evergreen, from 20 to 30 ft. high, bearing small white flowers and oval leathery leaves. It is a native of S. Europe and Asia Minor and flourishes in warm and comparatively dry areas, being cultivated in Italy, France, Spain, etc., for the sake of the oil which is obtained by bruising and pressing the fruit. The fruit is also pickled for the table and the tree yields good timber.

OLIVE

Olives, Mount of, or Olivet, mountain ridge of Palestine, E. of Jerusalem and 2,682 ft. above sea-level; so called as at one time being covered with olive-trees. It is celebrated as the scene of some of the most sacred events in the life of Christ. The Garden of Gethsemane was on its W. slope.

Olivier of Ramsden, Sydney Olivier, Baron. English politician and writer. Entered the Colonial Office, 1883; governor of Jamaica, 1907-1913; permanent secretary, Board of Agriculture, 1913-1917; became secretary for India, Privy Councillor and baron in 1924. A prominent member of the Labour Party, he was secretary of the Fabian Society, 1886-1890, and has written much on West Indian and economic questions. (1859-).

Olmütz. See Olomouc.

Olney, a town of Buckinghamshire, England, on the Ouse, 59 m. NW. of London; it has a beautiful Gothic church, and an agricultural trade. Here William Cowper and John Newton wrote the "Olney Hymns." Pop. 2,600.

Olomouc (formerly Olmütz), town of Czechoslovakia, in Moravia, situated on the Morava, 41 m. NE. of Brno. It has a 14th Century cathedral, a 15th Century town-hall, and other ancient buildings. Brewing is carried on, and there is an important agricultural trade. It suffered severely in the Thirty Years' War, and the Seven Years' War. Pop. 66,400.

Olympia, a plain in Elis, in the Peloponnese, traversed by the R. Alpheus (the modern Rhipia), the scene of the Olympic Games which were celebrated by the ancient Greeks at intervals of 4 years.

Olympiad, a name given to the period of four years between each celebration of the ancient Greek Olympic Games; the first recorded Olympiad was in 776 B.C., the last in 394 A.D.

Olympias, the wife of Philip II. of Alexander the Great. Divorced by Philip, she fled to Epirus and instigated the assassination of Philip. She returned to Macedonia on the accession of Alexander and after his death became virtual ruler but, besieged by Cassander, was put to death. (d. 316 B.C.).

Olympic Games, athletic meeting held every four years and deriving its name from the ancient Greek contests held at Olympia. The modern series started in 1896 in Athens, a feature being the Marathon race commemorative of the bringing to Athens of the news of the Greek victory at Marathon, a distance of more than 26 miles. The first really international meeting was the fourth Olympic contest of 1908, held in London. Further meetings were held at Stockholm (1912), Antwerp (1920), Paris (1924), Amsterdam (1928), Los Angeles (1932) and Berlin (1936).

Olympus, a mountain range in Greece, between Thessaly and Macedonia, the highest peak of which is 9,750 ft. in elevation; its summit was the fabled abode of the Greek gods; to the SE. lies the beautiful vale of Tempe.

Om, a mystic word among the Hindus and Buddhists, used on solemn occasions, such as during the recital of the Vedic hymns, as a sort of spiritual charm.

Omagh, town of Northern Ireland, on the Strule, 34 m. S. of Londonderry; the county town of Tyrone. It has been rebuilt since 1743, when it was destroyed by fire. There is a linen industry. Pop. 5,100.

Omaha, largest city of Nebraska, U.S.A., on the W. bank of the Missouri, 20 m. above the confluence of the Platte. It is connected by a bridge with Council Bluffs on the opposite shore. Its silver-smelting works are among the largest in the world. It has a vast pork-packing industry, and manufactures lined oil, boilers and safes. Pop. 214,000.

Oman, independent sultanate of Arabia, lying along the shores of the Persian Gulf and the Arabian Sea, at the SE. end of the peninsula; the interior is largely mountainous; there are stretches of very fertile country where there happens to be water for irrigation, but the coast is very hot and unhealthy. Area, 82,000 sq. m. The capital is Muscat. The Sultan of Oman is a pensioner of the Anglo-Indian Government. Pop. about 500,000.

Oman, *Sir Charles*, English historian, born at Mousterpore, Bengal. His writings include histories of Greece, the Byzantine Empire, the Peninsular War, of England before the Conquest and of the 16th Century. He became Chichele professor of Modern History at Oxford in 1905, and was Conservative M.P. for Oxford University, 1919-35. Knighted in 1930. (1860-).

Omar, second Caliph (634-644); at his first a persecutor of the Faithful, he underwent in 615 a sudden conversion; was viceroy of Abu-Bakr when he succeeded; subdued Syria, Persia and Egypt in the name of Allah and established the temporal power of Islam; he was assassinated. (c. 581-644).

Omar, *Mosque of, or Dome of the Rock*, a Mosque in Jerusalem on the supposed site of Mohammed's ascent to heaven, or, from the Jewish point of view, of the uncompleted sacrifice of Isaac; it was built by Omar, the second successor of the prophet. See also *Mosque*.

Omar Khayyam, astronomer-poet of Persia, born at Nalshapur, in Khorassan; became astronomer to Sultan Malik Shah in 1074 and helped to reform the calendar. In the East he is famous for his mathematical works, in the West for his *Rubaiyat*, or Epicurean quatrains, which Edward Fitzgerald translated into English verse. (d. 1123).

Omdurman, town of the Anglo-Egyptian Sudan, opposite Khartoum, on the W. bank of the Nile; its great bazaar is the centre of a vast trade in native products, and there is an important cattle and camel market. It was the capital of the Mahdi and of the Khalifa. In the battle of Omdurman, fought at Kerreri, 7 m. to the N., the Anglo-Egyptian army, under Kitchener, routed the forces of the Khalifa, Sept. 2, 1898. Pop. 111,000.

Omnibus, a public vehicle plying for hire on a fixed route at fixed fares; horse-drawn omnibuses were introduced into London by George Shillibeer in 1829, the idea being taken from Paris. Steam omnibuses were tried in 1833, and petrol-driven ones were introduced in 1904. Double-deck buses date from 1857, but for long they were unroofed. Many of the chief improvements were due to the London General Omnibus Co., which controlled most of London's buses until 1933, when it was merged in the London Passenger Transport Board.

Omsk, town of the U.S.S.R., in the Siberian Area, standing on the right bank of the Irtysh, at its confluence with the Om, 1,800 m. E. of Moscow; it is on the Trans-Siberian railway, and has scientific and other establishments. Pop. 227,000.

Onager,

or *Ghor-khar* (*Hippus onager*), a species of wild ass inhabiting the deserts of W. and West Central Asia and NW. India, standing 11 to 11½ hands high.

ONAGER

Onagraceae, a family of dicotyledonous plants whose British representatives include the enchanter's nightshade, evening primrose (*g.v.*) and willowherb. There are some 40 genera and 500 species included in the order, the genera including *Cenothera*, *Clarkia* and *Fuchsia*.

Onega, lake of the U.S.S.R. between the White Sea and Lake Ladoga, after which it is the largest lake in Europe, being 140 m. long and 58 m. broad; has an irregular shore, deeply indented in the W., and many inflowing rivers, but is drained only by the Svir; icebound for four months, it has busy traffic the rest of the year; navigation is promoted by canals.

O'Neill, *Eugene Gladstone*, American dramatist, born in New York. He first took to commerce, then spent two years at sea, and produced his first play in 1914. Several of his plays including *Anna Christie* and *The Emperor Jones* have had London productions. He deals largely with the depressed classes, and especially with the colour problem, though his *Mourning Becomes Electra* (produced in London in 1938) was a powerful and sombre modern psychological study of the Electra (Oedipus) complex. (1888-).

Onion (*Allium Cepa*), a liliaceous plant allied to garlic, the leek, etc., the bulbous root of which is much used as an article of food. It is a biennial herbaceous plant, with long, tubular leaves and a swelling pithy stalk. There are at least twenty varieties, including the Strasbourg, Spanish and

Portuguese. It originated from Central Asia (Persia, etc.).

Onomatopoeia, the formation of words which imitate sounds made by, or connected with, the things they represent, such as "bow-wow," "hiss."

Ontario, province of Canada, lying N. of the Great Lakes, between Quebec and Manitoba, with an area of 412,600 sq. m. The surface is mostly undulating; there are many small lakes, and the chief rivers flow eastward to join the Ottawa. Agriculture is the chief industry, enormous crops of wheat, maize, and other cereals being produced. There are extensive timber forests; stock-rearing and dairy-farming are important; there are rich mineral deposits, especially of iron, copper, lead, silver, petroleum and salt; manufactures of agricultural implements, hardware, textiles and leather are carried on. Toronto is the largest town, while Ottawa is the capital of the Dominion and Hamilton an important railway centre. The province was constituted in 1791 as Upper Canada, united to Quebec or Lower Canada in 1840, and received its present name in 1867. Pop. 3,426,500.

Ontario, lake of N. America; the smallest and most easterly of the five great lakes of the St. Lawrence Basin, it lies between the province of Ontario, Canada and New York State; receives the Niagara River in the SW., and is drained by the St. Lawrence in the NE. On its shores stand Hamilton, Toronto and Kingston, on the N., and Oswego on the S. Canals connect it with Lake Erie and the Hudson R.

Onyx, a variety of agate or chalcedony, in and black, sharply defined in good specimens. The stones come from India and S. America, and are highly valued for cameo-cutting.

Ooze, a thickened muddy deposit on the bottom of the ocean bed, consisting almost entirely of carbonate of lime. It is formed chiefly by the accumulation of the dead shells of foraminifera, mingled with remains of other marine creatures.

Opah, or Moon-fish, an ocean fish (*Lampris luna*) of the North Atlantic and Pacific Oceans and the Mediterranean, remarkable for its bright colouring; its body is bluish-green spotted with silver, and its fins scarlet.

OPAH

Opal, a gem-stone consisting of an amorphous hydrated silica, of which the finest kind, precious opal, is translucent, with blue or yellow tint, and when polished with a convex surface, shows a scintillating play of colours known as opalescence. It is found largely in Australia, Mexico, Hungary, Japan and Guatemala.

Opera, a drama set to music and acted of a full orchestra. 17th Century opera was at first little more than drama with a musical background; later the emphasis shifted to the music, at the expense of the drama. Activity was greatest in Italy, where Monteverdi produced his *Orfeo* in 1607, though Purcell, Lully and Keiser in England, France and Germany respectively, were contributing to the development of opera. In the 18th Century, in Italy, Scarlatti improved the libretto and standardized the form of the aria.

Opera declined in form in the middle of the 18th Century, but was revived by Gluck and Mozart. In 1816 Rossini produced the *Barber of Seville*, and was followed by Bellini, Donizetti and Verdi (composer of *Aida*, *Il Trovatore* and *Rigoletto*). In Germany, Beethoven's *Fidelio* is important as his single opera.

After him, the Romantic movement produced Weber (*Die Freischütz*) and Wagner, one of the greatest of operatic composers (*The Ring*, *Tannhäuser*, *Lohengrin*, *Parsifal*, etc.). Of his successors, the chief was Richard Strauss (*Rosenkavalier*). In France, Gounod (*Faust*) and Bizet (*Carmen*), in Italy, Mascagni (*Cavalleria Rusticana*), Leoncavallo (*Pagliacci*), and Puccini (*Madame Butterfly*, *La Bohème*); in Russia, Tchaikovsky, Rimsky-Korsakov and Mussorgsky, are the chief figures in 19th Century opera.

Ophthalmia, or **Conjunctivitis**, inflammation of the conjunctiva of the eye. It is marked by redness and swelling of the white part and a mucopurulent discharge. The commonest forms are catarrhal, while membranous ophthalmia accompanies diphtheria in children, a greyish membrane forming on the eyelid.

Ophthalmoscope, an instrument for observing the internal structure of the eye. It consists of a mirror and a double-convex lens by which a beam of light from a lamp is thrown upon the retina. Atropine, or a similar agent, is often used to dilate the pupil before examination.

Opium, a combination of alkaloids obtained from the juice of the half-ripened capsules of the opium poppy (*Papaver somniferum*). It contains morphine and narcotine as well as other alkaloids, and small quantities of mineral salts and organic acids. Laudanum, a solution of opium in alcohol, is the form in which opium is usually given medicinally, e.g., to relieve pain or induce sleep. The juice, or latex exudes from the capsules and hardens when notches are cut in them.

Opium War, the name given to the hostilities between Great Britain and China in 1840, following the destruction of British ships taking opium to China. The war resulted in the ceding of Hong Kong and the Treaty Ports to Great Britain.

Oporto, city and seaport of Portugal, 209 m. N. of Lisbon, the headquarters of the wine trade. It has numerous warehouses and cellars; textiles, gloves, hats, pottery, tobacco and other goods are manufactured; noteworthy buildings include the 12th Century cathedral, the museum, opera-house and buildings. Pop. 232,300.

Opossum (*Didelphidae*), a family of marsupial animals, native to

America (from the U.S.A. to Patagonia), the species being fairly numerous and all very much alike in general characteristics and comprising the only marsupials found outside Australia. They are of slender build, have a long snout, prehensile tail and an opposed

OPOSSUM

clawless great toe on the hind foot enabling them to grasp objects. The Common Opossum (*Didelphys marsupialis*), about the size of a cat, abounds from the U.S.A. to Brazil. For a while after birth the young are carried in their mother's pouch, but later upon her back, clinging to her tail by means of their own prehensile tails. It feigns death when caught. Some of the species are as small as a mouse.

Optician, one who examines the eyes, corrects errors of vision, and ensures the maximum amount of comfortable vision by preventative or corrective measures. An optician is not qualified to treat diseases of the eye, but should be able to recognize their presence.

Optics. See Light.

Optophone, an instrument by which enabled to read ordinary print, depending upon the sensitiveness of selenium to light. The optophone is capable of emitting varying sounds according to the shape of the letters over which it is passed. The blind reader learns to recognize the sound associated with each letter.

Oracle, in ancient times a place where reply to a query or problem, through the medium of an appointed priest or priestess. Among the Greeks the most famous oracles were those of Olympus (Zeus) and Delphi, the latter being at the temple of Apollo.

Oran, city and seaport of Algeria, at the head of the gulf of Oran, 260 m. W. of Algiers, with a Roman Catholic cathedral, a mosque, school, college, and two castles. It has an excellent modern harbour and does a large trade in esparto grass, iron ore and cereals. It is also a French naval station. Pop. 163,800.

Orange, the golden, globular fruit of the evergreen shrub *Citrus aurantium* of the order Rutaceae; a tree with fragrant white flowers, introduced into Europe from China and now cultivated for commercial purposes in many parts of the world including the U.S.A., South Africa and Australia. The different varieties of the species include the Sweet orange (*Citrus aurantium*), the Bergamot orange (var. *Bergamia*), yielding a perfume; the Seville or Bitter orange (var. *Bigaradia*) used in making marmalade. Other popular varieties include the Mandarin orange (*C. nobilis*), Tangerine, Maltese or Blood orange, Jaffa and the Seedless Navel orange of S. America.

Orange, chief river of South Africa, which rises in the eastern highlands of Basutoland, and flows 1,300 m. westward to the Atlantic, receiving the Vaal and the Caledon as tributaries, and having Cape Province on the S. bank and the Orange Free State, Griqualand West, Bechuanaland, and Namaqualand on the N. A bar at the mouth and the aridity of its lower course make it unfit for navigation.

Orange, a town of France, near Avignon, formerly the capital of a small principality and giving title to the Princes of Orange. In 1500 it passed to the house of Nassau. The most famous of the Princes of Orange were William the Silent and William III. of England.

Orange Free State, a province of the Union of South Africa; bounded N. by the Transvaal, S. and W. by Cape Province and E. by Natal and Basutoland. It has an area of 49,660 sq. m.; undulating plains slope northward and southward, from which rise isolated hills called kopjes. The chief industries are the rearing of sheep, cattle, horses and ostriches; coal-mining is carried on in the N. and diamond-mining in the SW.; the exports include wool, hides and diamonds. Founded by Dutch Boers from Natal, it was annexed by Britain in 1849, but granted independence in 1854. Again annexed by Great Britain in 1900 after the Boer War, it became autonomous in 1907 and in 1910 joined the Union. The capital is Bloemfontein. Pop. 629,000 (207,300 whites).

Orangemen, popular name for the Orange Society, an association of Protestants in Ireland instituted to uphold the Protestant succession to the Crown and the Protestant religion as established upon the accession in 1688 of William III., formerly Prince of Orange. The Orangemen have been prominent at political crises when Protestantism and the Union seemed in danger. They annually celebrate the battle of the Boyne on July 12.

Orang-utang (*Simia satyrus*), an anthropoid ape native to the E. Indies, Borneo and Sumatra; less

man-like than the gorilla or chimpanzee, it is remarkable for the length of its arms, its stout legs and long, reddish hair. It attains a maximum height of 5½ ft., and the males are notable for the enormous throat-sac and warty growths on the side of the face which give them a grotesque appearance. It feeds upon the fruit of the Durian and other trees. The name, which is from the Malay, means literally "man of the woods."

ORANG-UTANG

Oratorio, a musical composition on a sacred theme, dramatic in form and associated with orchestral accompaniments, but without scenic accessories; it derives its name from the oratory of St. Philip Neri at Rome, in which a composition of the kind was first performed. The highest point in the development of Italian oratorio was the work of Scarlatti in the 17th Century. In the 18th Century in Germany, Bach wrote oratorios of a reflective rather than dramatic character, the best-known being the *St. Matthew Passion* and *Christmas oratorios*; but it was Handel, especially in *The Messiah* who developed it to its fullest capacity. Among the finest of later oratorios are Haydn's *The Creation* and *The Seasons* and Mendelssohn's *Elijah*, while Sir Edward Elgar's *Dream of Gerontius* is among the few good modern oratorios.

Orbit, (1) in astronomy, the path described by a heavenly body in the course of its revolution, especially that of a planet or comet round the sun, or of a satellite round a planet; (2) in anatomy, the pyramidal hollow in the skull in which the eye rests.

Orchardson, Sir William Gullier, British genre-painter, born at Edinburgh; studied there and in 1862 removed to London; he became an R.A. in 1877. Among the best and most popular of his (mainly dramatic) pictures are "The Challenge," "Her Mother's Voice," "On Board the Bellerophon," (Napoleon Bonaparte), "Mariage de Convenience" and "Voltaire." (1832-1910).

Orchestra, a body of performers on musical instruments, grouped usually into strings, wood-wind, brass and percussion. The inclusion of stringed instruments dates from the 17th Century, and in the early 18th Century numerous wood-wind instruments were added. Flutes were used in the orchestra in the time of Bach, and later the clarinet was introduced. Mozart revived the trombone, and Beethoven wrote solo parts for the instruments. The later Romantic composers, in particular Berlioz, Wagner and Strauss, were responsible for the modern large orchestras.

Orchids (*Orchidaceae*), a large order of monocotyledonous plants, numbering 450 genera and some thousands of species, world wide in distribution, though most abundant and the species mostly concentrated in tropical regions. They are all perennials but differ greatly in specific characteristics. The tropical species, whilst not parasitic, mostly grow on and rely for support on other plants. Some species are comparatively insignificant plants but many are of rare and exotic beauty. Few have any practical use, with the exception

REAL ORCHID

of the *Vanillas* (especially the *Vanilla planifolia*), from the pods of which the flavouring known as vanilla is obtained. There are numerous British species of orchids, including the Early Purple (*Orchis mascula*), the Spotted Orchid (*Orchis maculata*), the Bee Orchid (*Ophrys apifera*), the Bird's nest orchid (*Neottia Nidus-avis*), etc., etc. Many tropical species are grown as greenhouse and stove plants.

Orczy, Baroness, otherwise *Emmuská Barstow*, British novelist, born at Tarnaörs, Hungary; she studied painting in London and exhibited at the Royal Academy. In 1905 she published *The Scarlet Pimpernel*, which was followed by more than 40 similarly romantic novels, chiefly of the French Revolution period, including many "Pimpernel" sequels, which have been very popular.

Ordeal, a test by fire, water, poison, whereby it was believed it was possible to establish the innocence or guilt of accused persons; still common to many savage or half-civilized peoples. Ordeals formed part of the judicial system of England until the time of Henry III. Ordeal by wager of battle was not formally abolished until 1818.

Order in Council, an order of the British Sovereign, with the advice of the Privy Council and within limits defined by Parliament. In cases of emergency, these limits have been disregarded. Parliament subsequently having been asked to ratify the action by granting an indemnity to those concerned.

Ordinance, legislation by means of an Order of the King in Council. There is today, however, no clear distinction between a Statute of Parliament and an Ordinance. Ordinance as a form of legislation was superseded by Proclamation, the King having power by the Statute of Proclamations (1538) of legislating in this way without reference to Parliament. Legislation by the Governor of a Colony in Council is also termed an ordinance.

Ordination, the ceremony of admission to the ministry of the Christian Church; the term applies properly to admission to each of the several orders of the Church, although the ordination of a bishop is now known as consecration.

Ordnance, collective term for heavy mounted guns, i.e., cannon and howitzers. Their use dates from the 14th Century, but only during the last 50 years has any real advance been made towards the main objectives, which are speed of loading and firing, high velocity of projectiles and accuracy of aim. Horse artillery is usually lighter than field artillery, while mountain artillery is lighter still and capable of being easily dismantled for transport. The heaviest type of ordnance is that used for garrison work and naval purposes.

Apart from improvements in the propellant explosives, the main advance in the construction of heavy ordnance has been the substitution of steel for the weaker iron and brass, of which the first cannon were made. Among many other mechanical improvements, gun-carriages are now so constructed that the cannon reverts of itself to its original position after the recoil of firing, while greater velocity has been given to the projectiles by the rifling of the barrel and by increasing its length.

Ordnance Survey, the Government department, supervised by the Ministry of Agriculture, which prepares maps, on various scales, of the United Kingdom for civil and military purposes and for sale to the public. Its surveying work is carried out by a department of the Royal Engineers.

Ordovician, the geological strata of rocks overlying the Cambrian layers and covering large areas of Wales, home of the ancient Ordovices. They consist mainly of slates and shales, with some limestones and grits. The period of their formation was one of great volcanic activity, and many of the Welsh mountains (e.g., Snowdon) are the worn-down stumps of the Ordovician volcanoes.

Ore, a native mineral containing a sufficient proportion of a metal to make its extraction an economic proposition. In the case of common metals, the yield of metal from an ore should amount to from 30 per cent. to 60 per cent. Ore is found either in sand or gravel (alluvial ore), or in seams of sedimentary rock, or else deposited in igneous rock. After mining, the ore undergoes various processes of crushing, sorting, and chemical or other treatment in order to separate the worthless elements and extract the pure metal.

Oregon, state of the U.S.A., on the Pacific seaboard, with Washington, Idaho, Nevada and California on its inland borders. The Coast Range extends along the shore, and between these mountains and the Cascade Range is a semi-arid plateau extending to the Blue Mts. in the N.E., and, under irrigation, affording excellent grazing and dairy-farming ground. The Willamette Valley, in the W., is arable, producing cereals, potatoes, tobacco, hops and fruit. The State is rich in timber, coal, iron, gold, silver, mercury and platinum; and the rivers (of which the Columbia, on the N. border, is the chief) abound in salmon. The capital is Salem, the largest city Portland, both on the Willamette R. The State has many libraries, schools and colleges. Area, 96,700 sq. m.; pop. 954,000.

Orenburg, town of the U.S.S.R., in the Middle Volga Area. It stands on the Ural River and is a railway junction and a trading centre. It has saw-milling, brewing and metal industries. Pop. 144,600.

Orestes, the son of Agamemnon and Clytemnestra, and brother of Electra and Iphigenia who killed his mother to avenge the murder, by her connivance, of his father. He went mad afterwards, but was acquitted by the Areopagus and became king of Argos and Laconia. His friendship for Pylades, who married his sister Electra, has passed into a proverb.

Organ, a musical instrument, consisting of a series of pipes of different pitch, one to each note, sounded by wind pressure and controlled by a keyboard. There are usually several of such series each complete in itself and known as stops; they are classed as diapason, viol, reed, etc., according to their tone quality and can be employed separately or in combination. A complete organ usually comprises two or more of what are virtually smaller organs; they are known as Great Organ (the basic instrument), Swell organ, Solo organ, Choir organ, etc., and can be played upon independently (each having its own manual or keyboard), or "coupled" in unison. Modern organs are blown by electric blowers in place of the older bellows worked by man power, while "action," i.e., the link between keyboard and pipe, has largely replaced the former "tracker," or mechanical and pneumatic actions.

Organic Chemistry, that branch of chemistry which is devoted to the study of the innumerable carbon compounds.

Organism, a structure instinct with life, and possessed of organs that discharge functions subordinate and ministrative to the life of the whole.

Orgy, a secret religious festival among the ancient Greeks, generally connected with the worship of nature divinities, in particular of Demeter, Orpheus and Dionysus (Bacchus), and celebrated with mystic rites and wild revelry.

Oriel, a type of bay window, usually one or two, in an upper storey and overhanging, supported by brackets or corbels, or by an engaged column (i.e., one partly sunk into the wall), the upper part of which is usually attached to a corbelled structure beneath the oriel.

Orient, (Latin *oriens*, "rising," as applied to the rising sun), the eastern horizon where the sun rises; hence, the countries of the East.

Orientation, (1) the determination of the points of a compass in relation to the E. point; (2) in architecture, the position of a building with regard to the E.; especially, of a church, the chancel of which usually points to the E.

Oriflamme (i.e., flame of gold), the banner of the ancient kings of France, borne before them as they marched to war; a red flag mounted on a gilded staff, it was originally the banner of the abbey of St. Denis, and was first assumed as the royal standard by Louis VI.

Origen, one of the Fathers of the Church, born in Alexandria. A pupil of Clement, he made a deep study of Greek philosophy and in 232 established a school at Caesarea; in 250 he suffered in the Decian persecution. He wrote numerous theological works, beside the *Hexapla*, a valuable source of textual criticism, in which the Hebrew Scriptures and five Greek versions are arranged side by side. (185-254).

Orinoco, river in the NE. of South America, which rises in the Sierra Parima, and flowing W., bifurcates, the Casiquiare channel turning S. and joining the Rio Negro, while the Orinoco proper continues W., N., and E. through Venezuela, entering the Atlantic after a course of 1,500 m. by an enormous delta. It has a vast number of tributaries and numerous rapids. It is navigable for 700 m. from the mouth.

Oriole (Oriolidae), a well-defined family of brightly-coloured birds confined to Europe, Asia, Africa and Australia and not represented in America.

The Golden Oriole (*Oriolus palmarum*) is a native of Europe, and a regular summer visitor to the S. of England. Its plumage is golden-yellow, mingled with black. The American, or "Baltimore," Oriole (*Icterus Baltimore*), called an "oriole" on account of its brilliant orange plumage, belongs in reality to the *Hampe*-nest (Icteridae) family.

GOLDEN ORIOLE

Orion, in Greek mythology, a handsome blind by Dionysus, but recovered his eyesight on exposing his eyeballs to the rays of Aurora, and became afterwards the companion of Artemis; he fell a victim to the jealousy of Apollo, and was transformed into a constellation in the sky.

Orissa, a province of India, created in April 1936, as a result of the amendment of India Act, out of the former Orissa by the addition of parts of the Central Provinces and Madras. It comprises 6 districts, with a total area of 33,000 sq. m., and includes the deltas of the Mahanadi, Brahmani and Baitarani. Rice is the chief crop, while jute and turmeric are also grown; cotton- and silk-weaving are carried on. The chief town is Cuttack. The province is admin-

istered by a governor, with a council and a legislature of 80 members. Pop. 8,044,000.

city of Mexico, 70 m. SW. of Vera Cruz; a centre of the sugar industry. It has railway workshops and also manufactures tobacco and textiles. 18 m. N. is the dormant volcano of Orizaba. Pop. 50,000.

Orkney Islands, a group of 67 is. of the Scottish mainland, from which they are separated by the Pentland Firth, 6½ m. broad. They cover 375 sq. m., and comprise a Scottish county. Pomona is the largest island, and contains Kirkwall, the capital, as well as Stromness. Oats, barley, turnips and potatoes are grown, and cattle, horses, sheep and pigs are reared; fishing, distilling and the quarrying of sandstone are carried on. Pop. 22,000.

Orlando, Vittorio Emanuele, Italian politician. A law professor at Palermo, he entered Parliament in 1897, becoming minister of education, 1903; of justice, 1907, of the interior, 1916, and prime minister in 1917, when he helped to rally the nation after the defeat of Caporetto. One of the "Big Four" in the Peace Conference, 1919, he fell from power over the Fiume question, and as an anti-Fascist retired from politics on the triumph of Mussolini in 1925. (1860-).

Orléans, city of France, on the Loire, the capital of the dept. of Loiret. It is a trading rather than an industrial town, but manufactures machinery, tools, hosiery, tobacco and vinegar. It has numerous quaint wooden houses of ancient date, and an old cathedral and museum. Its historic associations include the raising of the siege in 1429 by Joan of Arc, and captures on two occasions by the Germans in 1870. Pop. 75,200.

Orléans, Dukes of, the name of four distinct branches of the royal family of France, the first commencing with Philippe, fifth son of Philippe VI. of Valois, in 1344; the second (1392) with Louis, brother of Charles VI.; the third (1626) with Jean Baptiste Gaston, brother of Louis XIII., who became lieutenant-general of the kingdom on the death of his brother; the fourth (1661) with Philippe I., brother of Louis XIV. Philippe II., son of the preceding, was regent of France during the minority of Louis XV.; he jeopardized the finances, and injured public morals by the depravity of his life (1674-1723); Louis-Philippe, his grandson, was lieutenant-general and governor of Dauphiné (1725-1785); Louis-Philippe Joseph, son of the preceding, surnamed Philippe-Egalité, played a conspicuous part in the Revolution, voting for the death of the king, his cousin, and perished on the scaffold (1747-1793); and Louis-Philippe (g.v.), his son; Prince Louis-Philippe Robert, eldest son of Comte de Paris; claimant to the French throne. (1869-1936).

Orme's Head, Great, a headland on the coast of Caernarvonshire, North Wales; NW. of Llandudno.

Ormolu, a name given to an alloy of copper and zinc, lacquered or burnished to resemble gold and formerly much used for mountings of furniture.

Ormonde, James Butler, Duke of, distinguished Irish soldier and statesman; distinguished himself in Ireland under Strafford and during the Civil War was chief supporter of the cause of Charles I. in Ireland; appointed Lord-Lieutenant of Ireland in 1687, and in 1670 escaped assassination by the notorious Colonel Blood. (1610-1688).

Ormsby-Gore, William George Arthur, British politician, eldest son of the third Baron Harlech; entered Parliament 1916 and was Under-Secretary of State for the Colonies 1922-1924

and Nov. 1924-1929, Postmaster-General 1931, First Commissioner of Works 1931-1936, Secretary of State for the Colonies 1936; P.C. 1927. (1885-).

Ormskirk, urban district and market town of Lancashire, England, 11 m. N.E. of Liverpool. Rope-making, iron-founding and brewing are among the industries. Pop. 17,000.

Ormuz (or Hormuz), an island at the mouth of the Persian Gulf, once famous as a mart for diamonds and other precious stones; red ochre and rock salt are produced. Pop. about 1,000.

Ormuzd, a deity of the Zoroastrian religion, the embodiment of the principle of good, as Ahriman is of the principle of evil.

Orne, inland department of N. France, S. of Calvados; grows apples and pears, produces horses and cattle, and has various manufactures; capital Alençon. Area, 2,370 sq. m. Pop. 270,000.

Ornithology, the scientific study of classification, structure and habitat. It is now generally agreed that birds are of reptilian origin, having affinity with the dinosaurs. They are variously classified. Huxley grouped them into (1) *Saururæ*, extinct "lizard-tailed," toothed birds, (2) *Ratitæ*, the non-flying birds including Ostriches, Rheas, Moas, Emus, Cassowaries, Kiwis and Tinamous, (3) *Carninatæ*, including all the other (i.e., flying) birds; these have keeled breast-bones, though in some cases so reduced that the power of flight is almost or quite lost.

Ornithorhynchus. See Duck-billed Platypus.

Orontes, ancient and most familiar Syria, the modern El-'Asi, which rises in the western slopes of Anti-Lebanon, and flows N. through Syria, turning at last SW. to the Mediterranean. Near the town of Homs it expands into the lake of the same name. Its length is 170 m.

Orpen, Sir William, British artist, born in Dublin, educated there and at the Slade School. He established an early reputation by winning a gold medal and exhibiting at the New English Art Club. Later he became famous for his portraits, in which he showed remarkable ability to handle colour. He became an A.R.A. in 1910, and an R.A. in 1919; he was knighted in 1918; as an official artist, he painted some remarkable realistic pictures of the World War. (1878-1931).

Orpheus, in Greek mythology, son of famed for his skill on the lyre, by which he could subjugate even rocks and trees. After the death of his wife Eurydice, he induced Pluto, by his musical art, to allow her to return from the nether world, on the sole condition that he would not look upon her until they reached the light of day. The condition was broken and Orpheus, having lost Eurydice, wandered inconsolable until his death at the hands of the jealous Thracian women.

Orpiment, the native tri-sulphide of arsenic which occurs in lemon-yellow crystals in Czechoslovakia, Rumania, the U.S.A. and elsewhere; it was formerly used as a dye.

Orpington, town of Kent, England, 5 m. S.E. of Chislehurst, the centre of a fruit and hop-growing district. Here originated the breed of fowls called by this name. Pop. 9,900.

Orrery, an apparatus which, by means of balls, and geared wheels, exhibits the relative motions of the sun, planets, and other bodies; so named after the fourth Earl of Orrery, for whom John Rowley made the first example in 1716.

Orris Root,

the rhizome of a species of iris (*Iris Florentina*), which, when dried, exhales a scent like that of violets, and consequently is used, as a powder in the manufacture of toilet preparations.

Orsova, name of

two towns in Rumania, on opposite banks of the Danube, at the Iron Gates. Old Orsova on the W. bank of the R. Cerna, is a trading and shipping centre. Pop. 6,000. New Orsova, on the opposite bank, was repeatedly taken and retaken in the wars of the 18th century. Pop. 3,000.

Orthoclase, a variety of felspar, a porphyry, eyenite and other rocks.

Orthopædic Surgery, a branch of surgery which aims at maintaining the ordinary functions of the limbs and at correcting any deformity or deviation from the normal. While especially concerned with promoting healthy growth during childhood and with setting right any deformity resulting from birth, the orthopædic surgeon also treats deformity which may develop in later life. Manipulative treatment, electrical stimulation, gymnastics, and mechanical aids (splints, artificial appliances, etc.) are among the means employed.

Orthoptera, one of the main orders of terrestrial insects, comprising cockroaches, grasshoppers, locusts, and, in the view of some entomologists, earwigs. Their wings are not usually well developed for flying; many of them, like the cricket, produce sounds.

Ortolan, a song-bird (*Emberiza hortulana*) belonging to the hunting family; the wings are black, throat yellow, head grey. Native to S. Europe and W. Asia. Ortolans migrate to Africa in winter. They are much prized as food.

Orvieto, city of Italy, on a hill near the Tiber, 60 m. NNW. of Rome; it has a beautiful Gothic cathedral and Etruscan tombs. Amongst other things traded in a white wine. Pop. 7,500.

Oryx, a genus of antelopes found in Mediterranean countries and Africa. They have markedly long horns. Included in the genus are the Beisa oryx (*Oryx beisa*) of Abyssinia and the Gemsbok (*Oryx gazella*) of S. Africa.

Osage, river of the U.S.A. It rises in the Marais des Cygnes, and flows through Missouri to join the Missouri R., near Jefferson City. Length, 494 m.

Osaka, city of Japan, on Honshu I., at the head of Osaka Bay, 30 m. from its seaport, Hogo; after Tokyo, the largest city in the country. It has a castle, old temples and walls, as well as modern ship-building yards, and factories, producing textiles, leather and metal goods, glass, etc. It is a large exporting centre and stands in a tea-growing district. Pop. 3,213,000.

Osborne House, residence in the island, a favourite resort of Queen Victoria; now a home for convalescent officers of H.M. Forces.

Oscar I., king of Sweden and Norway, afterwards Charles XIV, ascended the throne in 1844. (1799-1859). Oscar II., king of Sweden and Norway, son of preceding, succeeded his brother Charles XV, in 1872, distinguished himself in literature by translating Goethe's *Tasso* into Swedish and by a volume of poems. (1829-1907).

ORRIS ROOT

Oscillation, in wireless transmission, a form of interference which usually results from some maladjustment in a receiver, causing it to re-transmit, therefore interfering with its own reception and with that of other apparatus in the vicinity. A person whose receiver is radiating oscillation is offending against the terms of the receiving licence, as issued by the General Post Office.

Osier, (*Salix*), the pliable stems of which are used in making baskets, etc. The common Osier (*S. viminalis*) and Brown Osier (*S. triandra*) are grown extensively in the Fen district.

Osiris, one of the principal gods of ancient Egypt, the husband of Isis, his sister, and the father of Horus; a solar deity, his death at the hands of Set, god of darkness, and his resurrection with the aid of Isis and Nephthys, symbolized the rising and setting of the sun and the alternation of seasons.

Oslo, the capital of Norway, situated at the head of Oslo Fjord, on the SE. coast. It is the seat of government and contains the parliament house, university, royal palace, and numerous other fine buildings, including churches and museums. There is a modern harbour, with dry and floating docks; fabrics, paper, iron and steel goods, soap, tobacco, glass and chemicals are made. From 1624 to 1925 it was known as Christiania. Pop. 253,000.

Osmanlis, name given to the Ottoman empire, Othman or Osman.

Osmium, a metallic chemical element obtained from osmiridium; it is bluish-white in colour, immensely hard and resists acid. Symbol, Os. Atomic number, 76. Atomic weight, 191.6. Density, 22.48.

Osmosis. If a solution of sugar in water is separated from pure water by a thin membrane, e.g., of parchment or collodion, water will pass through the membrane into the solution, the phenomena being known as osmosis; and, in general, substances will diffuse through a permeable membrane from a solution in which they are more concentrated to one in which the concentration is less. Osmosis is of great biological importance, being responsible, in part, for the turgidity of herbaceous plants, the rise of sap, and the absorption of soil-water by roots, as well as playing an essential rôle in the absorption of materials by the organs and membranes of animals' bodies.

Osnaabrück, town of Germany, in the Hanover, 70 m. W. of the city of Hanover, on the Hase; it has much quaint and beautiful architecture, including that of the 13th Century Marienkirche; textiles, paper and machinery are made. Pop. 94,300.

Osprey, or Fish-hawk (*Pandion haliaetus*), a bird of prey of the Pandionidae family having affinities with both the Hawks and the Owls. It was formerly native to Great Britain, but now occurs only rarely as a migrant. About 2 ft. in length, with a wing-span of nearly 6 ft., it has a white head and lower parts, with dark brown back and wings. Ospreys feed on fish, caught by swooping from a height, having a reversible outer toe and spicules on the soles of the feet which enable them to catch and hold their prey.

Ossa, a mountain in SE. Thessaly, near Mt. Pelion, which, latter in Greek mythology, the Giants piled upon Ossa in order to reach Olympus.

OSPREY

Ossett, municipal borough of Yorkshire, shire, England, in the W. Riding, 2½ m. W. of Wakenfield. Nearby are coal-mines, and woollen cloths and shoddy are made. Pop. 15,000.

Ossian, the heroic poet of the Gaels, the son of Fingal who is said to have lived in the 3rd Century. James Macpherson (1736-1796) published in 1762-1763 what he claimed to be the poems of Ossian, celebrating the exploits of Fingal and his family, which he had collected and translated from the Gaelic. The production aroused the hostility of Dr. Johnson, and the "Ossianic poems" have generally been considered spurious.

Ossification, process whereby fibrous tissue or cartilage is converted into natural bone. It goes on throughout childhood and adolescence and is not fully completed until about the age of 20. Deposits of lime and phosphorus salts are necessary to ossification.

Ostend, town and popular watering-place of Belgium, on the SW. coast 65 m. due W. of Antwerp; attractions include a parade 3 m. in length, a casino, theatres and a racetrack. It has frequent steamer communication with Dover, and manufactures linen and sail-cloth. Fishing is the chief industry. During the World War it was a German submarine base, but in May, 1918, the harbour was blocked by the celebrated sinking of the *Vendictive*. Pop. 44,200.

Osteology, a division of the science of anatomy which treats of the distribution, function, and growth of bones.

Osteopathy, a system of healing founded in the U.S.A. by Andrew Taylor Still in 1874. The first principle of osteopathy is the self-sufficiency of the human body and its capacity to effect its own cure, with the aid of osteopathic manipulation. Osteopathy is, therefore, opposed to remedial drugs, and its founder also discountenanced serum treatment and vaccination. Though not legally recognized in England, osteopathy is regulated by the British Osteopathic Association.

Ostia, the seaport of ancient Rome, at the mouth of the Tiber, now occupied by a village with a cathedral and a bishop's palace. There is an electric railway to Rome, 14 m. to the NE. Excavations have disclosed the old city, which, after Pompeii, is the best preserved Roman city in existence.

Ostracism, the sentence of banishment, meant for a term of ten years from Athens of any individual whose political influence seemed to threaten the liberty of the citizens. The sentence was decided by plebiscite, each citizen writing the name of the person he wished to banish on a potsherd or oyster-shell (Gr. ostrakon). For ostracism to be operative, 10,000 votes had to be recorded against the individual.

Ostrich, the largest living birds, of species, placed in a family by themselves (the Struthionidae). They are natives of Africa and Arabia, living in the desert and scrub areas. They stand up to 8 ft. high, the males being taller than the females. They all have black plumage with white tail and wings. Entirely terrestrial and unable to fly, they are noted for the speed they can attain with their long, powerful legs, which are equipped with 2 toes. They have a long, almost bare neck, a small head with large eyes, and a wide, flat beak. The four species are the Common or Northern (*Struthio camelus*), the Masai (*S. massotus*),

OSTRICH (MALE)

the *S. molybdophanes* and the *S. australis*. In South Africa, the southern U.S.A. and elsewhere ostriches are reared on farms for their valuable black or white curling feathers.

Ostrogoths. See *Goths*.

Ostwald, Wilhelm, German chemist, born at Riga, where he became professor in 1882; in 1887 he was given the chair of physical chemistry at Leipzig; he resigned in 1906 and three years later was awarded the Nobel prize for chemistry; he was notable for researches in electro-chemistry and the viscosity of solutions and for his discovery of a method of oxidizing ammonia, important for the manufacture of nitric acid and explosives. (1853-1932).

Oswald, St., King of Northumbria, where by the aid of Aidan he established the Christian religion, after his own conversion while in exile in Iona; he died in battle fighting against Penda, king of Mercia. (c. 605-642).

Oswaldtwistle, urban district of England, 3 m. SE. of Blackburn. It has coal-mines and cotton-mills, and chemicals, paper and pottery are made. Sir Robert Peel was born nearby. Pop. 14,000.

Oswego, city of New York State, U.S.A., on the E. of Lake Ontario, at the mouth of the Oswego R.; it has a modern harbour and extensive accommodation for grain, and has a large trade in grain and lumber; the falls in the river furnish hydro-electric and water-power for industrial purposes. Pop. 22,700.

Oswell, William Cotton, English explorer, born at Leytonstone, Essex, served with the East India Co. at Madras and later explored Africa with Livingston. (1818-1893).

Oswestry, market-town of Shropshire, England, 20 m. NW. of Shrewsbury; has an old church, castle and school, and also railway workshops, tanneries and some woollen mills. Pop. 9,800.

Otago, provincial district of South Island, New Zealand, occupying the SE. end of the island, and covering an area of 25,220 sq. m. It is mountainous and inaccessible in the W., but in the E. consists of good arable plains; the climate is temperate. Timber abounds, and there are gold, coal, iron and copper mines, and manufactures of woollen goods, iron and soap. The capital is Dunedin, other towns being Invercargill, Port Chalmers, and Lawrence. Pop. 223,900.

Otaru, seaport of Japan, on the W. coast of Hokkaido, 20 m. NW. of Sapporo. It has a busy trade and is an important fishing centre, especially for herrings. In 50 years its population has grown from 4,000 to 154,000.

Othman, the third caliph and a son-in-law of the Prophet; he was elected in 644, but his weakness and caprice led to a revolt, and he was assassinated by Mohammed, son of Abu-Bekr. (c. 574-656).

Otho, Roman emperor; a companion of Nero in his orgies, he was exiled on refusing to divorce his wife Poppaea, Nero's mistress; on Nero's death he was acclaimed emperor by the Praetorian Guards and murdered Galba and Piso who had seized power, but defeated by the revolted German legionaries, stabbed himself to death after a reign of three months. (A.D. 68-69).

Otitis, acute inflammation of the middle ear, which may be the result of an attack of acute catarrh, or of some infection such as scarlet fever; it is accompanied by sneezing and discharge from the ear. Warm drops of dilute carbolic acid in glycerine may relieve the pain; dry warmth also helps, but poultices and hot fomentations are ill-advised.

Otley, urban district and market town of Yorkshire, England, in the W. Riding, on the Wharfe, 22 m. NW. of Leeds. Besides an agricultural trade, there are manufactures of printing machinery, leather goods and worsted. Pop. 11,000.

Otranto, a decayed seaport and fishing town of SE. Italy, 52 m. S. of Brindisi; founded by Greek colonists. It contains an 11th Century cathedral, a church with Byzantine frescoes and a castle. Pop. 2,800.

Ottawa, capital of the Dominion of Canada, situated on the right bank of the Ottawa R. at its confluence with the Rideau, between the Chaudière and Rideau Falls. It has striking Parliament buildings, rebuilt after their destruction by fire in 1916 and containing a celebrated carillon of 53 bells and a fine library; other buildings include the mint, the public archives, the national museum and art gallery, and dominion observatory; there are two cathedrals; Rideau Hall is the residence of the Governor-General; there is a university. The chief industries are connected with lumber and paper. Ottawa became the capital of Canada in 1858. In 1932 the imperial economic conference met there, resulting in the conclusion of the "Ottawa Agreements" for inter-imperial trade. Pop. 125,000.

Ottawa Indians, a tribe of Algonquian American Indians now mostly resident in Canada, though some are to be found in the State of Michigan, U.S.A., whither they moved from an original home farther east.

Ottawa River, the largest tributary of the St. Lawrence, 685 m. in length. Rising in the W. of Quebec, it flows W., then S., then SE., to join the St. Lawrence at Montreal. Its course is broken by numerous rapids and lakes.

Otter, a group (Lutrinae) of aquatic mammals belonging to the same family (Mustelidae) as the weasel, but having webbed feet, and a thick, powerful tail. Otters feed principally on fish. They are widely distributed, one species, the Sea Otter (*Lutra lutris*) of the N. Pacific, somewhat resembling the seal in formation of the hind legs, prefers salt water. The Common Otter (*Lutra vulgaris*), found in Europe (including Britain) and Asia, is about 3 ft. in length, while the N. American otter (*Lutra canadensis*) is larger still.

COMMON OTTER

Otterburn, village of Northumberland, England, 16 m. S. of the Scottish border, famous as the scene of a conflict on August 19, 1388, between the Douglases and the Percies, in which the Earl of Douglas lost his life and Henry Percy ("Hotspur") was taken prisoner.

Otterhound, a hound especially bred for hunting otters. It has a strong, lengthy neck, and powerful, wide paws which enable it to swim strongly. The coat is thick and water-repelling and grey, buff, black or reddish in colour.

Otto, or Attar, of Russia, an essential oil, obtained by distilling rose leaves of certain species, principally *Rosa damascena*, with water or steam. It comes chiefly from Bulgaria and the Near East, and is used, greatly diluted, in perfumery.

Ottomans, the name given to the Turks, from Othman or Osman (1288-1320), who founded the empire. Thomas, English dramatist, born 1574, died 1634.

Otway, near Midsbury, Somerset, intended for the Church, but not built.

failed as an actor, and became a playwright, his chief productions being the tragedies *The Orphan*, 1880, and *Venice Preserved*, 1882. He died from hastily swallowing a piece of bread when starving. (1662-1885).

Ouachita, or Washita, river of U.S.A., rising in W. Arkansas and flowing through Louisiana into the Red R. near the confluence of that river with the Mississippi. Length 550 m.

Oubliette, an underground cell of a medieval castle, entered only by a trapdoor in the roof; also a secret passage opening upon the moat, for the sinister disposal of prisoners.

Oudenarde, a town of Belgium, 18 m. S. of Ghent, the scene of Marlborough's victory over the French on July 11, 1708. Pop. 6,400.

Oudh, region of India, part of the United Provinces of Agra and Oudh, it has an area of 24,000 sq. m. Annexed in 1856 and united with Agra in 1877, it extends from the frontier of Nepal to the Ganges, and is watered by the Gogra and the Gumti. The chief crops are rice, sugar, opium, cotton and tobacco. See *United Provinces*.

Oudinot, Charles Nicolas, Duke of Bar-le-Duc; served with distinction under the Revolution and the Empire; led the retreat from Moscow, and was wounded; joined the Royalists after the fall of Napoleon, and was made a peer. (1767-1847).

Ouida, the pseudonym of Marie Louise de la Ramée, English novelist, born at Bury St. Edmunds; published her first novel *Held in Bondage* in 1863, and followed it with many romantic novels of society and army life, of which the best are *Under Two Flags* and *Moths*. (1839-1908).

Oulton, village of Suffolk, England, 2 m. W. of Lowestoft, on the R. Waveney; Oulton Broad, near by, is a popular yachting and fishing centre. Pop. 4,500.

Ounce, OR

Leopard (*Felis uncia*), a carnivorous animal, found in Persia and the Himalayas. The fur is thicker than that of the leopard, which it otherwise resembles, though the spots are less marked, and the tail is longer.

OUNCE

Ouse, the name of several English rivers, of which the chief are (1) the Yorkshire Ouse, formed by the union, near Borough-bridge, of the Ure and the Swale; flowing past York, Selby and Goole, it unites with the Trent to form the Humber, after a course of 60 m.; it receives the Nidd, Wharfe, Aire, Don and Derwent. (2) The Great Ouse, rising in the S. of Northamptonshire and pursuing a winding course N.E. through the shires of Buckingham, Bedford, Huntingdon, Cambridge and Norfolk to the Wash; its length is 158 m.; and (3) the Sussex Ouse, rising between Horsham and Cuckfield and flowing through the Weald, past Lewes, to Newhaven; its course is 30 m.

Outlawry, a penalty involving loss of property and rights, originally imposed by the king as punishment for high treason, but, after Magna Carta, only by a man's peers or by the law of the land. At the present day it no longer applies to civil cases, but in criminal law it is still, theoretically, a last resort against a fugitive offender.

Outram, Sir James, British soldier, "Bayard of India"; born in Derbyshire, he began his military career in Bombay, served in the Afghan War (1838) and the war with

Persia (1857) and played an important part in the suppression of the Indian Mutiny, waiving his rank of lieutenant-general to serve under Havelock in the relief of Lucknow. (1803-1863).

Ouzel, the popular name of the Water-ouzel, or Dippers (*g.v.*) of the family of birds Cinclidae, the Common Dipper being a familiar British species; also of the Ring-ouzel, another British bird of the Thrush (*Turdidae*) family.

Ovary, the female sex gland. The two ovaries are situated in the pelvic cavity, one on either side, and are connected by the Fallopian tubes and by ligaments to the womb. Each ovary contains a layer of germinal cells known as "Graafian follicles." Each follicle contains an ovum, and as each ovum comes to maturity (at the menstrual period) it is discharged along the Fallopian tube into the womb, ready for impregnation.

Overhead Charges, business expenses which are necessary to the running of the organization, but are not immediately involved in the purchase of stock. They include such items as rent, management salaries, book-keeping, accounting and interest on loans. As a rule, they are provided for by the addition of a sufficient amount to those charges necessary to maintain the required profit.

Oversea Settlement Board,

a department of the Dominions Office, constituted in February, 1936, the function of which is to consider schemes for emigration to the various dominions within the Empire, and to advise the Secretary of State for Dominion Affairs on matters relating to emigration.

Overture, a musical composition, occasionally a separate concert piece, but usually forming an orchestral introduction to an opera; it is sometimes unrelated in content to the music of the opera itself, sometimes summarizes its main themes. The first real overtures began with the French composer Lully (1639-1687), but not until the advent of Gluck (1714-1787) did the overture bear any dramatic relation to the form of the opera it preceded. By Beethoven the overture was given its full dramatic import (especially his *Leonora No. 3*), and the development was further carried on by Weber (*der Freischütz*, *Euryanthe*), Wagner (*Tannhäuser*, *der Ring des Nibelungen*, *die Meistersinger*, etc.) and others.

Overysel, province of the Netherlands, situated between Germany and the Zuider Zee, with an area of 1,300 sq. m. It is mainly fenland and sandy heath, but cattle are reared near the Zuider Zee, and butter and cheese are produced. Zwolle is the capital. Pop. 559,000.

Ovid, (Publius Ovidius Naso), Roman poet of the Augustan age, born in the Abruzzi; studied rhetoric, but abandoned it for literature and a life of pleasure, writing, among other works the *Tristia*, *Fasts*, and the *Metamorphoses*, his best-known work, which recounts Greek and Roman legends, the heroes and heroines of which underwent miraculous changes of form. A favourite of Augustus, he fell under his displeasure, and was banished on the pretext of his licentious poem *Ars Amatoria* in A.D. 8 to the swamps of Scythia, near the Black Sea. (43 B.C.—A.D. 17).

Oviedo, city of Spain, capital of the province of Oviedo, situated 80 m. NW. of Leon. It has a celebrated 14th Century cathedral, with a library, also an early 9th Century church and a university; textiles, iron and leather are manufactured. Here the insurgents were besieged for 3 months in 1836, during the Spanish Civil War. Pop. 77,000.

Owen, Sir Richard, English zoologist, born at Lancaster; appointed professor of comparative anatomy in London in 1834, and superintendent of the British Museum, 1856, he became a Fellow of the Royal Society, and in 1857 was president of the British Association; a brilliant anatomist, he reconstructed many extinct animals, such as dinosaurs, from fossil fragments. (1804-1892).

Owen, Robert, British Socialist reformer, born at Newtown, Montgomeryshire; became manager of a cotton-mill at New Lanark, which he managed on Socialist and profit-sharing principles. His social creed was embodied in his *New View of Society, The New Moral World*, and numerous pamphlets. In 1825 he established the colony of New Harmony, Indiana, U.S.A., practising community of property, which ended in failure. He was a pioneer of infant schools and co-operative societies. (1771-1858).

Owen Sound, city and lake-port of Georgian Bay, Lake Huron. It has a good harbour, and has lumber and flour mills, tanneries, engine-works and brickfields. Pop. 12,900.

Owl, the nocturnal birds of prey, belonging to the order Strigiformes, consisting of two families: horned or Wood Owls (Bubonidae) and Barn Owls (Strigidae). The owl is characterised by a large head, with a short, hooked beak; the eyes are large, both looking forwards and encircled by discs of feathers; it can twist its neck almost right round; the wings are wide and rounded. Distributed throughout the world, the Tawny Brown or Wood Owl (*Syrnium aluco*) is the commonest British species. The Short-eared Owl (*Asio flammeus*), which nests on the ground and the Long-eared Owl (*Asio otus*) are also British resident species. The Snowy Owl (*Nyctea scandiaca*) is a winter visitor to this country and a number of other species have occurred or do occur as stragglers.

Ox, a name generally given to domesticated cattle of the male sex, but also applied to buffaloes, bison, and some extinct related animals. They have been domesticated as draught animals from the earliest historic times. In India the humped species (*Bos indicus*) is regarded with religious veneration.

Oxalic Acid, a crystalline poisonous organic acid, found naturally as an acid salt in wood-sorrel, rhubarb root and many other organic tissues; produced commercially by the action of caustic potash and acids upon sawdust; it is used in the dye industry and for cleaning.

Oxford, county town of Oxfordshire, England, seat of Oxford University and of a bishopric, on the left bank of the Thames, 62 m. WNW. of London. It is a city of great beauty, with many colleges, chapels and churches; here the Parliament met and adopted the Provisions of Oxford in 1256; Latimer and Ridley (in 1555) and Cranmer (in 1556) were burned in Broad Street; Charles I. made it his headquarters after the first year of the Civil War; it was the refuge of Parliament during the plague of 1665. Printing is an important industry, while at Cowley nearby are the huge Morris motor works. Pop. 80,500.

Oxford and Asquith, Henry, Earl of, British statesman. Born at Morley, Yorkshire, he was called to the Bar in 1876; married Helen Meiland in 1877, and, after her death, Margaret Tennant, famous as a society leader and wit, in 1894. Liberal M.P. for U.E.

East Fife (1886-1918), he was prominent as counsel in the Parnell Commission of 1889, and became Home Secretary in 1892. He became Chancellor of the Exchequer in 1905, and Prime Minister in 1908, his period of office witnessing the conflict with the House of Lords over the Parliament Act, the Ulster troubles, the suffragette campaign, and finally the outbreak of the World War. In May, 1915, he formed the Coalition government and, resigning in 1916, became leader of the Independent Liberals. M.P. for Paisley, 1920-24, he became a peer in 1925 and resigned the leadership of the Liberal Party in 1928. (1852-1928).

Oxford Group, a religious movement founded in 1921 by Dr. Frank N. D. Buchman, an American Lutheran minister, and taking its name from the fact that much of its initial success was associated with Oxford University students. The purpose of the "groups" is to gain the spiritual benefit of sharing religious experiences and of mutual confession. Those whose lives have been "changed" by a spiritual reawakening testify to the power of Christianity. "Groups" have been formed in over 50 countries.

Oxford Movement, a religious movement, known also as the Tractarian Movement, originated by John Henry Newman, John Keble, R. H. Froude, and others. Newman wrote the first of the *Tracts for the Times* in 1833; a year later Fussy joined the movement. The *Tracts*, which aroused much controversy, were a protest against Low Church and Broad Church Anglicanism. The Movement did much to restore the prestige of the Anglican Church, and prepared the way for the sympathy later shown towards Catholicism.

Oxfordshire, a S. midland county of England, bounded S. by the Thames, N. by the shires of Warwick and Northampton, E. by Buckinghamshire, and W. by Berkshire and Gloucestershire; its area is 748 sq. m. On the whole flat or undulating, it rises in the S.E. to the Chiltern Hills; watered by tributaries of the Thames, such as the Windrush, Cherwell and Thame, it is chiefly agricultural, and has much pastureland. The manufactures include motor cars, blankets, gloves, lace, paper, and agricultural tools. Oxford is the county town; two members are returned to Parliament. Pop. 209,600.

Oxford University. Oxford was a seat of learning as early as the 11th Century. Schools of divinity, law, and topography were founded in the 12th Century and by the 13th Century Oxford ranked second only to Paris; it responded quickly to the Renaissance, and by the time of the Reformation 13 colleges were founded; they now number 25. The University is rich in museums and libraries, especially the world-famous Bodleian Library and the Taylor Library, the latter devoted to modern literature. The University contains the following colleges: University College (founded 1249), Balliol (1263), Merton (1264), Exeter (1314), Oriel (1326), Queen's (1340), New College (1379), Lincoln (1427), All Souls' (1437), Magdalen (1458), Brasenose (1526), Corpus Christi (1516), Christ Church (1546), Trinity (1584), St. John's (1555), Jesus (1571), Wadham (1612), Pembroke (1694), Worcester (1714), Keble (1870), and Hertford (1874). St. Edmund's Hall, the sole academical hall remaining, dates from 1296. In addition, there are 4 women's colleges: Somerville (1879), Lady Margaret Hall (1879), St. Hugh's Hall (1888) and St. Hilda's (1893). Women were first admitted to full membership and to take degrees in 1920. The University returns two members to Parliament.

Oxidation, term applied to a chemical change whereby oxygen is added to an element or compound. Thus, iron is oxidized by the oxygen in the air to form rust, or iron oxide. Substances which have the property of surrendering oxygen to other substances are called oxidizing agents.

Oxides, binary compounds of oxygen, divided into 2 classes according to their chemical properties: *acid* or *anhydride* oxides are the oxygen compounds of non-metals, which react with water to produce acids; *basic* oxides are the oxygen compounds of metals, which react with acid or with oxides more negative than themselves to form salts (bases).

Oxlip, or **Greater Cowslip** (*Primula elatior*), a flowering plant of the Primulaceae order found in Great Britain, similar to the cowslip and primrose, but to be distinguished from the ordinary hybrid.

Oxus, or **Amu-Daria**, a great river of the Pamirs, and flows W. between Turkestan and Afghanistan, then NW., reaching the Sea of Aral after a course of 1,500 m.; it is believed at one time to have flowed into the Caspian, and there is record of two changes of course; it is important for irrigation.

Oxygen, a gas, one of the most widely distributed of the elements. It exists in the atmosphere in the free state, mixed with nitrogen; it forms part of the constitution of rocks and minerals and of the blood and tissues of animals, being essential to life, while the decay of organic matter is carried on by its agency. It is colourless and odourless, and is slightly heavier than air. It was first isolated in 1774 by Joseph Priestley. Mixed with Acetylene, it forms the intensely hot oxy-acetylene flame, used for welding and cutting iron and steel. Symbol, O; atomic number, 8; atomic wt., 16.

Oyer and Terminer ("he ear and determine"), a Commission to hear and determine special causes, constituting the authority of a judge of assize.

Oyster, a bivalve mollusc of the class Eulamellibranchia. The true oyster (*Ostrea*) adheres to the sea-bottom by the left valve, first settling as young "spat" oysters (less than an inch in length) after passing through a larval stage. Edible oysters

are cultivated in several parts of the world, notably at Whitstable (England) and Cancale (France). The *Pinnidae* are a species of oyster found chiefly in the Mediterranean where they sometimes attain a length of over 2 ft. Fresh-water oysters (*Unio*), found in rivers in America, are cultivated for the shells used in button-making.

Oyster Bay, town and summer resort of New York, U.S.A., on Long Island, the home of Theodore Roosevelt. It has fine bathing beaches and other attractions for visitors; oyster-dredging is carried on. Pop. 8,500.

Oyster-catcher, or **Sea Pie**, a group of wading-birds of

the plover (*Charadriidae*) family found on the seacoast in most parts of the world N. of the equator. The Common Oyster-catcher (*Haematopus ostralegus*) is familiar on British shores. The plumage is black and white, or entirely black; the bill is long and hard and

COMMON OYSTER-CATCHER

chisel-shaped at the tip, for opening the shell-fish on which it feeds. It nests on sea shores and river mouths in hollows in the ground.

Ozokerite, a natural mineral wax, greenish or yellowish in colour, found in the bituminous beds of the coal measures of Galicia and Rumania and in Utah, U.S.A. It forms a hard paraffin when purified, and is used for making candles, as an adulterant of beeswax, and, combined with rubber, as an insulating material.

Ozone, an allotrope of oxygen, of the formula O_3 . Pure ozone is a heavy pale blue, poisonous gas with a smell of chlorine or seaweed; on cooling, it condenses to a dark blue liquid which is explosive, particularly if impure; the gas itself decomposes into oxygen when allowed to stand. It is a bactericide and is used for sterilizing the water-supply of many large towns and also in the manufacture of chemicals and for refining oils, etc.

P

Paca, genus (*Coelogenys*) of South American burrowing rodents of the family Dasypodidae, mainly brown and white in colouring. They are edible.

Pachmann, **Vladimir de**, Russian pianist, preter of Chopin; born in Odessa, he studied under his father and at Vienna; he made his concert debut at Leipzig in 1878, and first appeared in London in 1882. (1848-1933).

Pachydermata, a popular term for non-ruminant mammals of the order Ungulata, including the elephant, rhinoceros, etc., though it does not indicate any necessary relationship.

Pacific Ocean, the largest sheet of water on the globe, occupies a third of its whole surface. It is a wide oval in shape, lying between Australia and Asia on the W., and North and South America on the E. Except from Asia it

receives no large rivers. On its American shores the Gulf of California is the only considerable indentation; the Okhotsk, Japanese, Yellow, and Chinese Seas, on the Asiatic coast, are rather wide bays shut in by islands than inland seas. Its innumerable islands are the chief feature of the Pacific Ocean. The continental islands include the Aleutian, Kurile, Japan, and Philippine Is., and the archipelago between the Malay Peninsula and Australia. The Oceanic Is. include countless groups, volcanic and coral, chiefly in the southern hemisphere, between the Sandwich Is. and New Zealand. Commerce on the Pacific Ocean increased vastly with the extension of the United States westward, the colonization of Australia, and the opening of Chinese and Japanese ports. San Francisco, Los Angeles, Vancouver and Valparaiso on the E., Hong-Kong, Sydney and Yokohama on the W., are the chief centres of trade.

Padang, a town and free port on the W. coast of Sumatra, the largest town on the island, and the Dutch official capital. Pop. c. 42,000.

Paddington, metropolitan borough of London, W. of St. Marylebone; largely residential. Pop 139,000.

Paddle-wheel, the wheel by which steamers are propelled through the water.

The paddle-wheels were fitted to the first steamers, but they are now replaced by screws in the majority of steam vessels. The wheel is driven by the engine, and is fitted with floats, originally fixed blades radiating round the hub of the wheel, but with an increase in the width of the wheel the floats act on a lever attached to the centre of the wheel and have a "feathering" action. They are not suitable for cargo boats, as the set of the wheel in the water cannot be altered to suit a variation in the draught of the vessel.

EARLY PADDLE-STEAMER
(The Sirius)

Paderewski, Ignace Jan, Polish pianist, and statesman, born in Podolia; made his debut in 1887, with instant success; he has composed numerous pieces both for the voice and the piano. During the World War he assisted in recruiting a Polish army in the U.S.A. On the rebirth of Poland as a nation in 1919 he became Premier and Foreign Minister, and was present at the Peace Conference, resigning the same year. (1860-).

Padiham, urban district and market town of Lancashire, England, 3 m. NW. of Burnley. Coal-mining and the manufacture of cotton are the chief industries. Pop. 11,600.

Padstow, market town on the N. coast of Cornwall, England, with fishing and agricultural interests and a small harbour. Pop. 2,500.

Padua, city of northern Italy, 23 m. by rail W. of Venice, chiefly interesting for its artistic treasures, including the municipal buildings, cathedral, and nearly fifty churches, innumerable pictures and frescoes, and Donatello's famous equestrian statue of Gattamelata; there is also a university, library, museum, and the oldest botanical garden in Europe. Pop. 139,000.

Pæony, or **Peony**, (*Pæonia*), a genus comprising 15 species of large and gaudy flowering plants of the order Ranunculaceæ; widely cultivated as garden flowers. There are varieties with red and white flowers, which are large and globular; double forms have been produced by cultivation.

Pæstum, an ancient Greek city of Lucania, in South Italy, with important remains of temples and other specimens of Greek architecture.

Paganini, Niccolò, Italian violinist, born in Genoa; was a composer of concerto and other violin pieces. (1784-1840).

Page, Walter Hines, American man of letters and diplomat, born in North Carolina; from 1880 to 1913 he edited various periodicals and newspapers; in the latter year he was appointed Ambassador in London, adopting a pro-British attitude in the earlier years of the World War. (1856-1918).

Paget, Sir Alfred Wyndham, British admiral; entered the Navy in 1865, and took part in the Egyptian war in 1882 and in later African operations. In the World War he was mainly concerned with administrative work. (1852-1918).

Pagoda, a Chinese or Japanese temple, in the form of a tower with several storeys, always uneven in number, associated chiefly with Buddhism; there is a pagoda in the Botanic Gardens at Kew, near London.

Pahang, one of the Federal States and considerably the largest, occupying the central part of the Malay Peninsula with a coastline on the S. China Sea. It is mountainous, and through it runs the R. Pahang (297 m. long). Gold and tin are mined, rubber and copra produced. Kuala Lipis is the capital. The Sultan (*Kew Gardens*) resides at Pekan, the old capital which is near the mouth of the Pahang R. Area 13,800 sq. m. Pop. 200,000.

Paignton, urban district and seaside resort of Devon, England, 2 m. SW. of Torquay. Its clide is deservedly famous. Pop. 18,400.

Pain, Barry Eric Odell, English humorist. His first book was *In a Canadian Canoe*, 1891; *Eliza*, 1900, was first of a saga concerning suburban life. (1865-1928).

Painlevé, Paul, French politician, who after serving under Ribot and Briand became Prime Minister for a time in 1917 and again in 1925. (1863-1933).

Painting, the application of pigment to a flat surface. In early times the chief methods were: (1) encaustic, painting on a wax surface finished by the application of heat; (2) tempera (q.v.), painting in colour tempered with egg-size on a gesso-covered surface; (3) fresco, painting in dry colours on wet lime plaster. In the early 15th Century the Van Eycks perfected the method of painting in oil, and in the 18th Century water-colour was first generally used. The pigments used by the ancients were various: white, obtained from chalk or white lead; blues from minerals, e.g., lapis lazuli; reds from oxides of iron; greens from substances such as malachite. Later painters extended these by obtaining some colours from vegetable gums and dyes, e.g., gamboge, various lakes, and indigo, some from minerals, e.g., anatase (red pigment) from hematite. To-day many yellows are obtained from sulphides of cadmium, greens from combinations of oxygen and chromium, emerald green from copper, acetic acid, and arsenic, prussian blue from ferro-cyanide of iron.

The *Italian School* of Painting is, with the exception of classical painting, the earliest and is divided into various groups: (1) the Florentine, of which the chief are Cimabue and Giotto (13th Century), Fra Angelico and Botticelli (14th Century), Michelangelo and Leonardo da Vinci (15th Century); (2) the Sienese, Duccio and the Lorenzetti (14th Century); (3) the Umbrian, Raphael (15th Century); (4) the Venetian, Bellini and Giorgione (15th Century), Titian (16th Century), Canaletto and the landscape painters (17th Century).

The *Flemish School* is represented by the Van Eycks (14th-15th Century), Mabuse (15th Century), Rubens and Van Dyck (16th Century), and the *German* by Dürer (15th Century), and Hans Holbein the younger (16th Century), who spent much of his life in England. Of the *Dutch School* the chief are the 17th Century masters, Frans Hals, Rembrandt, de Hooch, Vermeer, and the landscape painters, Cuyp and Ebbema.

In *Spain* Morales and El Greco (16th Century) and Velasquez (17th Century) are the foremost; in *France*, Poussin (17th Century), Watteau (18th Century), and Ingres (19th Century); in *England*, Hans Holbein, Hogarth,

a social realist, and the 18th Century portrait painters, Lely, Reynolds, Gainsborough, Romney and Raeburn, and of the same period the landscape painters, Crome, Cotman, Cox, Girtin, Constable, and Turner (late 18th-early 19th Century).

In the 19th Century the pre-Raphaelite school had as its chief exponents Rossetti, Burne-Jones and Watts. In the 19th Century also the French *Impressionist* painters (Renoir, Cézanne, Seurat, Monet, Manet, etc.) are noteworthy for their success and their influence. Later movements of shorter duration include Futurism, Cubism, Vorticism. The most flourishing contemporary painting is the Abstract and Surrealist.

Paisley, town in Renfrewshire, Scotland, 7 m. W. of Glasgow, on the White Cart. It is the chief centre of manufacture of cotton thread in the world, and its other industries include dyeing, bleaching, woollen goods, pottery and engineering. Pop. 86,500.

Paladin, the name given to the peers of Charlemagne, such as Roland, and also to knights-errant generally.

Palæography, the study and deciphering of ancient manuscripts. Early records were generally made on stone or metal, baked bricks (as in Assyria), or bark and leaves (as in India); the last have mainly disappeared owing to climatic conditions, but the papyrus MSS. of ancient Egypt have in many cases survived till the present day. The extensive use of contractions in ancient manuscripts is one of the chief difficulties of palæography.

Palæolithic Age, the age of human development marked by the use of unworked and unpolished stone implements. It is divided into several periods, named from districts in which cultural remains have been found, principally the Chellean, Acheulean, Mousterian, Aurignacian, Solutrean and Magdalenian. Palæolithic man had considerable artistic ability, as is evidenced by the drawings of animals, etc., found in caves in Spain and elsewhere.

Palæologus, the name of a Byzantine family, several members of which attained the imperial dignity, the last of the dynasty dying in 1453. They came into prominence in the 11th Century, and are still represented as a family in France by, among others, the poet and diplomat Maurice Paléologue (1859—), French Ambassador in Russia during the earlier part of the World War.

Palæontology, the study of the fossilised remains of animals and plants of former geological ages; it is divided into palæobotany (dealing with plants) and palæozoology (with animals). The fossils as a rule take the form of petrified skeletons, where the original material (chitin, silica, or carbonate of lime) has been partly or wholly replaced by other minerals; in some cases the skeleton has been dissolved away by percolating water, leaving a mould. Fossils are important aids to geologists in determining the relative ages of rocks in different places, as well as giving information about the conditions under which they were laid down. They give us much information about the evolution of the various forms of animal life.

Palæozoic, or Age of Ancient Life, Ordovician, Silurian, Devonian, Carboniferous, and Permian geological systems. In the Lower Palæozoic the only fauna were invertebrates and fishes, whilst at the end of the age reptiles appear. The characteristic fossils of palæozoic times are the trilobites.

Palanquin, in India and China a conveyance for one person borne on men's shoulders.

Palate, the roof of the mouth, consisting of the hard palate towards the front, composed of the superior maxillary and palatal bones, and of the soft palate, farther back, composed of a muscular layer. The malformation known as cleft-palate is usually associated with hare-lip; it is operable if treated in early life.

Palatinate, or *Palz*, the name of two States, originally one, of the old German empire, one called the Lower Palatinate or Rhenish Bavaria, West of the Rhine, partitioned in 1815 among the States of Baden, Bavaria, Prussia and Hesse-Darmstadt, and the other called the Upper Palatinate, now nearly all included in Bavaria; the former has for principal towns Spire and Landau, and the latter Ratisbon.

Palatine, name given in the Middle Ages to a Count or feudal lord who exercised judicial functions over the area of his county. In England, Cheshire, Durham and Lancashire were distinguished as Counties Palatine, and their special courts continued to function into the 19th Century. The German district of the Palatinate received its name from having been formerly subject to the special jurisdiction of the Elector Palatine.

Palatine, one of the seven hills of ancient Rome; according to tradition, the first to be occupied; it was chosen by the first emperors for their imperial residence.

Pale, The, that part of Ireland in which, after the invasion of 1172, the supremacy of English rule and law was acknowledged, the limits of which differed at different times, but which generally included all the eastern counties extending 40 or 50 m. inland.

Palembang, Sumatra, Dutch E. Indies, capital of the SE. residency of Palembang (area, 33,340 sq. m.). It stands near the Palembang or Musi R. in a marshy area, and many of the houses are built on rafts. Wood and ivory carving, and the making of gold ornaments and silk are the chief industries. Pop. of city, 62,000.

Palermo, capital of Sicily, and formerly of the Kingdom of the Two Sicilies, picturesquely situated in the midst of a beautiful and fertile valley; is a handsome town, with a magnificent cathedral and many churches, a university, art school, museum, and libraries; machinery, chemicals, lemons, and tobacco are exported. Pop. 412,000.

Palestine, a small territory on the SE. corner of the Mediterranean, 140 m. from N. to S. and an average of 70 m. from E. to W., bounded on the N. by Lebanon, on the E. by the Jordan Valley, on the S. by the Sinaitic Desert, and on the W. by the sea. It suffered much during the wars between the Eastern monarchies and Egypt, and between the Crescent and the Cross, was captured from the Turks in the World War, and mandated to Great Britain, the Balfour Declaration of 1917 having promised to set up there a National home for the Jews. Since then many Jews from all parts of the world have settled, both as agriculturists and in newly-developed towns such as Tel-aviv; but the Arab population has been increasingly averse to Jewish settlement, riots and bloodshed having been common in recent years. In 1937 a Royal Commission reported in favour of the division of the country into three areas, one under Jewish and one under Arab government, with a third, including Jerusalem, still remaining under British mandate. In 1938 the British Government, with the approval of the House of Commons and the Council of the League of Nations, sent out a technical Commission to work out a scheme of partition in detail. So far no final decision has yet been made by the British Government, but its

present policy is in favour of partition. The capital is Jerusalem; other cities Tel-aviv, Haifa, Jaffa and Gaza. Area, 10,430 sq. m. Pop. (1937) 1,383,320 (877,000 Moslems, 386,000 Jews and 116,000 Christians).

Palestrina, Giovanni Pierluigi da, celestine, born in Palestrina; resided chiefly at Rome, where he wrought a revolution in Church music; produced a number of masses which at once raised him to the foremost rank among composers. (1524-1594).

Palgrave, Francis Turner, English poet, born in London, professor of Poetry at Oxford, and remembered for his *Golden Treasury of Songs and Lyrics*. (1824-1897).

Pali, an Indian language, allied to Sanskrit, in which the sacred books of the southern or Hinayana Buddhists are written.

Palimpsest, the name given to a manuscript written on the top of another that has been erased, yet often not so thoroughly that the earlier one cannot be in a measure restored. Many important relics of classical literature have been recovered by the expert treatment of Palimpsests.

Palk's Strait, the channel which separates Ceylon from the mainland of India, 100 m. long and 40 m. wide, generally shallow.

Palladio, Andrea, Italian architect, born at Vicenza; was precursor of the Italian style of architecture called "Palladian." His works consist principally of palaces and churches, and the finest specimens are to be met with in Venice and in his native place. (1518-1580).

Palladium, a statue of Pallas in Troy, which depended the safety of the city. It was fabled to have fallen from Heaven upon the plain of Troy, and after its abstraction to have been transferred to Athens and Argos. It is now applied to any safeguard of the liberty of a State.

Palladium, a metallic chemical element occurring naturally with platinum (q.v.), and discovered by Wollaston in 1803. Symbol Pd, atomic number 46, atomic weight 106.7. Its most remarkable property is its power of occluding or absorbing large quantities of hydrogen.

Pallas, in Greek mythology, one of the names of Athena (q.v.), considered as the goddess of war.

Pallium, a circular band, 2 in. wide, made of lamb's wool, worn about the neck and shoulders by Roman Catholic archbishops. It is sent them by the Pope on appointment, investiture with it being the sign of their assumption of metropolitan jurisdiction.

Palm, general name for plants of the natural order Palmæ, of widely varying appearance, the most familiar examples being the arborescent type, with tall slender unbranched trunks, e.g., the date-palm, *Palmyra* palm, coconut-palm; there are also various climbing and trailing types, e.g., cane-palms. Almost all are of tropical growth. The leaves are palmate or pinnate, varying widely in form within these two types. The flowers are usually yellow and strongly scented, growing in spikes. The stems are usually coated with some hard siliceous deposit, though internally they are soft and pithy. The palm is of great economic value. Wax and timber are obtained from the *Ceroxylon* palms, cane from members of the genus *Calamus*, betel-nuts from the betel-nut palm (*Areca catechu*); sago from the genus *Sagus*; dates from the genus *Phoenix*; from the sugar-palms and *Palmyra* palms various substances are obtained which are fermented into liquors.

Palma, (1) capital of the Balearic Islands, on the Bay of Palma, SW. coast, of Majorca; has a Gothic cathedral and a Moorish palace; manufactures silks, woollens and jewellery. Pop. 93,000. (2) One of the Canary Is., 15 m. NW. of Tenerife; grows sugar, and exports honey, wax and silk manufactures. Pop. c. 53,000.

Palm Beach, a favourite winter resort in Florida, U.S.A., 65 m. NE. of Miami; with the adjoining town of West Palm Beach it has a pop. of 28,000.

Palmer, medieval name for a pilgrim returning from the Holy Land, who usually bore a palm branch in his hand, offering it on the altar on his return home.

Palmerston, Henry John Temple, Viscount, English statesman, born at Broadlands, Hants; being an Irish peer, entered the Commons in 1807; from 1809 to 1828 he was Junior Lord of the Admiralty and Secretary for War. Separating

LORD PALMERSTON

himself from the Tory party, he was Foreign Secretary from 1830 to 1841, and again from 1846 to 1851, when he resigned owing to differences with the Premier, Lord John Russell. In 1852 he joined Lord Aberdeen's coalition ministry, and on its fall became Prime Minister himself in 1855. He prosecuted the Crimean War and the Chinese War of 1857, and suppressed the Indian Mutiny, 1857-1858. Defeated in 1858, he returned to office next year with a cabinet of Whigs and Peelites; his second administration furthered the cause of free trade, but made the mistake of allowing the *Alabama* to leave Birkenhead. He was Prime Minister when he died. (1784-1865).

Palmerston, North, city of North Island, New Zealand, in Wellington province, 90 m. N. of Wellington. It is an agricultural centre. Pop. 26,000.

Palmistry, the art of reading character from the lines and marks, and so called "Mounts," on the palm of the hand. The lines on the right hand are supposed to tell the future, on the left the past.

Palm Oil, prepared from the Guinea oil-palm, cultivated chiefly in West Africa. After boiling and crushing, the fruit is trodden under water, the oil being collected as it rises to the surface. It can be hardened into a solid fat by the hydrogenation process.

Palm Sunday, the Sunday before Easter, so called from its being commemorative of Christ's triumphal entry into Jerusalem. It is commemorated in Roman Catholic and many Anglican churches by a procession in which blessed palm-branches are carried.

Palmyra, or Tadmor, a ruined city of Damascus, once situated in an oasis near the Arabian desert; a place of importance, said to have been founded by Solomon. An important commercial centre after 100 B.C., it was taken by the Romans in A.D. 72, and destroyed by Aurelian, after which it gradually decayed into ruins, which were discovered in 1878. It contains the remains of a temple and lengthy colonnades.

Pamirs, the, or "Roof of the World," an Asiatic plateau traversed by mountain ridges and valleys, of the average height of 12,000 ft. NW. of the plateau of Tibet, connecting the mountain system of the Himalayas, Tian-Shan, and the Hindu Kush, and inhabited chiefly by nomad Kirghis bands.

Pampas, vast grassy, treeless, nearly level plains in South America, mainly in the Argentine; stretching from the lower Parana to the S. of Buenos Aires. They afford rich pasture for large herds of wild horses and cattle.

Pampas Grass, a genus (*Cortaderia*) of grasses, native to America, grown in Britain as garden plants; they bear flowers in white or rose-coloured plume-like panicles.

Pamplona, or *Pampeluna*, fortified city of Navarre province, 16 m. from the French frontier. It is a railway centre, with an old cathedral, and was formerly the chief town of the kingdom of Navarre. Pop. c. 35,000.

Pan, in the Greek mythology, a goat-man, a personification of wild nature, and the protector of flocks and herds; is represented as playing on a flute of reeds of different lengths, called Pan's pipes, and dancing on his cloven hoofs over glades and mountains, escorted by a bevy of nymphs.

Panama, southernmost republic of Central America, in the Isthmus of Panama, traversed by the Panama Canal; declared its independence of Colombia in 1903; produces bananas, coconuts and coconuts. Capital, Panama. Area, 32,400 sq. m. Pop. 467,500. The city of Panama, founded in the early 16th Century, has a population of 83,000.

Panama, isthmus of, the narrow strip, varying in width from 40 to 110 m., which joins Central to South America; the Gulf of Darien and the Mosquito Gulf on the N. It is crossed by the Panama Canal, and (save for the American Canal Zone) is comprised in the republic of the same name.

Panama Canal, connecting the Atlantic and Pacific oceans through the isthmus of Panama, was planned in 1879 by Ferdinand de Lesseps, and begun by a French company in 1881, but abandoned after 8 years; in 1902 the U.S.A. resumed the work, which was completed in 1914. The Canal Zone, the use of which is granted by Panama to the U.S.A., is a strip of land 10 m. wide; the canal is 50 m. long, the channel being from 300 to 1,000 ft. wide at the bottom. The excavation amounted to 220,000,000 cu. yds.; the cost was \$460,000,000; the first steamer passed through from the Atlantic to the Pacific and back again on August 1, 1914.

Pan-American Congress, an international conference of the various American states held periodically to consider matters of common interest. The first, at which only five states were represented, was held in 1896. A Pan-American Union also exists to develop commercial relations, international communications, and similar matters.

Panchromatic, a term, in photography, applied to plates or films which have been so prepared that though reproduction is in monochrome all colours are given proper values. They are usually "slower" than ordinary plates and films and should be developed in total darkness.

Pancras, St., a boy martyr of 16, who suffered under the Diocletian persecution about 304; gives his name to a metropolitan borough of London, NW. of the City, mainly residential, with manufactures of pianos, furniture, etc., and railway works. Pop. 184,000.

Pancreas, a gland situated in the abdominal region, secreting both the pancreatic juice, an alkaline necessary to the digestion of food in the duodenum, and insulin, essential for the proper metabolism of sugar.

Panda, Giant, (*Ailuropus melanoleucus*), or Bear-Cat, a mammal found only on the S. and E. borders of Tibet; fully-grown weighs about 21 stone and is the size of a large hog; in appearance it is between the bear and the racoon, with white face and body, black legs, black rings round the eyes, and black ears and collar. It is amazingly slothful, has never been seen to run or jump, and feeds exclusively on bamboo. A related animal, also called the Panda (*Ailuropus fulgens*) is found in the regions about Assam.

GIANT PANDA

Pandects, the digest of civil law executed at the instance of the Emperor Justinian between the years 530 and 533.

Pandora, in Greek mythology, a woman of surpassing beauty to whom Zeus gave a box full of all forms of evil from which all the contents escaped to ravage the earth, Hope alone remaining behind.

Pangalos, Theodore, Greek general and statesman, born at Salamis; after the World War he served in the Asiatic campaign as Chief of Staff. In 1924 he entered the Greek Cabinet, which he overthrew the following year, assuming the Premiership and in 1926 the presidency of the republic as dictator; but after a few months' rule he was overthrown and imprisoned. (1878-).

Pangolin, or Scaly Ant-Eater, a mammal of the order Edentata,

native to Asia and Africa; with long snout and tail and scaly coat; emits a nauseous odour when attacked. The African species, which include the Giant Pangolin, are burrowing animals; the Asiatic include both burrowing and climbing animals. They are toothless, catch their food, which is ants, with their tongues, and use their tails for climbing and as part of their defensive armour when they coil themselves up into a ball.

PANGOLIN

Panicum, a genus of grasses including the Eastern food-grain millet.

Panipat, a town in the Punjab, India, 53 m. N. of Delhi; was the scene of two decisive battles, one in 1526 resulting in the establishment of the Mogul dynasty at Delhi, and another in 1761, to the extinction of the Mahratta supremacy in North-West India. Pop. 28,000.

Pan-Islamism, the conception of the union among the various Mohammedan peoples in defence against and opposition to the Christian powers. Since the World War it has been replaced by Pan-Arabism, which aspires to the union of the Arab peoples in a common nationality or federation.

Pankhurst, Mrs. Emmeline, British feminist leader; helped to found the Women's Franchise League in 1889, and afterwards founded the Women's Social and Political Union in 1903, and was a leader of militant methods to secure votes for women, being several times imprisoned. In 1908 ill-health secured her release; in 1912 and 1913 hunger-strikes achieved the same end. In her work she was assisted by her daughters Christabel and Sylvia. (1854-1928).

MRS. PANKHURST

Pannonia, a province of the Roman Empire, conquered between 35 B.C. and A.D. 8; occupied a square with the Danube on the N. and E. and the Save almost on the S. border. It passed to the Eastern Empire in the 5th Century, fell under Charlemagne's sway, and was conquered by the Hungarians shortly before A.D. 1000.

Panorama, a picture of large size, of exhibited at a time; it is usually arranged to revolve on a cylinder, the portion exposed at any moment being enhanced by special illumination effects. Since the rise of the cinematograph it has gone out of ordinary use. The name is often applied to any large picture in which the features of an extensive landscape are depicted.

Pansy. See *Heartsease*.

Pantelleria, a Mediterranean island, belonging to Italy, almost midway between Sicily and Tunis; there are mineral springs and an Italian convict station; fruits are grown. The island is believed to have been heavily fortified in recent years. Pop. c. 10,000.

Pantheism, the doctrine which identifies God with nature, or asserts his immanence at the expense of his transcendence; distinguished from deism, which denies the former but affirms the latter, from theism, which affirms both, and from atheism, which denies both.

Pantheon, a circular temple in Rome, first erected in 27 B.C. by Agrippa, son-in-law of Augustus, with niches all round for statues of the gods, to whom in general it was dedicated. It is now a church, Santa Maria Rotonda, and affords sepulture to illustrious men. Also a building in Paris, since the Revolution used as a receptacle for the ashes of the illustrious dead, Mirabeau being its first occupant.

Panther, a name given to the leopard (q.v.) of the Old World and to the puma (q.v.) of America.

Pantograph, a contrivance for copying an enlarged or a reduced scale.

Papacy, the ecclesiastical system of the Roman Catholic Church, considered as a form of spiritual or temporal government. The temporal sovereignty of the Pope was a gradual growth, based on the fact that after the disappearance in the 5th Century of the Western Roman Empire the Popes, as the principal persons left in Rome, naturally acquired a preponderating voice in the city's affairs. The work of such great Popes as Leo I in the 5th Century and Gregory I in the 6th laid the basis for claims which by the 11th and 12th Centuries had grown to cover an assumed right to dispose of secular thrones and to depose or appoint temporal rulers at will.

The Middle Ages are largely taken up by the struggles between the Papacy on the one hand and the great secular states, the Holy Roman Empire, France, and England especially, seeking respectively to defend or overthrow the Papal claims. At the end of the 14th Century the Great Schism, followed by the Reformation, greatly weakened the Papal position in international affairs, though until 1870 the Popes maintained their temporal rule over a part of Central Italy.

The rise of authoritarian states in the 20th century has in a measure renewed the conflict between the Roman Church and the temporal state. For, although in 1929 Mussolini restored Papal temporal rule over the Vatican City (q.v.) and arranged a Concordat defining the limits of church and state rights respectively, and in 1933 a Concordat between the Pope and Hitler regulated their respective claims in Germany, these Concordats,

especially in the latter country, have been interpreted by the state in senses which the Church was unable to approve, and bitter quarrels have arisen over such matters as the separate existence of Catholic Youth organizations and educational policy.

Papal States, a territory in the N. of Italy extending irregularly from Naples to the Po, until 1870 subject to the temporal sovereignty of the Pope, but annexed to the united kingdom of Italy in that year. In 1929 the Lateran Treaty revived the Pope's temporal sovereign power over a small area called the Vatican City (q.v.).

Papaveraceae, an order of plants of the poppy, is a typical genus, another well-known genus being *Eschscholzia*; most species contain a juice of narcotic properties, that of the poppy being the opium (q.v.) of medicine.

Papeete, town of Tahiti and principal of the Society Is. It is the commercial and administrative centre of French Oceania and is situated on a bay on the NW. coast of the island. Pop. 7,080, of whom about 5,000 are French.

Papen, Franz von, German soldier and statesman; born at Well, Westphalia. Became Chief of the General Staff to the Turkish army in Palestine in the World War; entered the Prussian Landtag in 1921. For a short time in 1932 Chancellor of the Reich; at the same time acted as commissary for Prussia, Vice-Chancellor under Hitler 1933; Minister to Austria, 1934. (1879-).

Paper, a material for writing, made by various plants. It was known in China early in the Christian era, being probably introduced thence to the West by Arab traders. The materials first used for its manufacture were bark, linen and rags; later, esparto grass from N. Africa and Spain was used, especially for high grade paper. For newspapers and periodicals newsprint is largely made from wood-pulp, which is prepared from thinly sliced wood treated, after considerable pressure, with a solution of caustic soda.

Paper Money has been in use in the East from early times, but has only been used on a large scale in the West since the World War, on the outbreak of which gold almost disappeared from circulation in practically all countries. The issue of £1 and 10s. notes by the British Treasury began in 1914; in 1928 their place was taken by Bank of England notes of the same denominations. In the United States dollar notes or "Greenbacks" have been in regular circulation since the Civil War.

Papier-mâché, a light, durable substance made from paper pulp or sheets of paper pasted together and variously treated with chemicals, heat, and pressure, largely used for ornamental trays, boxes, light furniture, etc., in which it is varnished and decorated to resemble inlaid work and for architectural decoration, in which it is made to imitate plaster moulding.

Papini, Giovanni, Italian author, born in Florence; wrote essays, criticism, and poetry, until suddenly, in *Storia di Cristo*, 1921, he developed a pious mysticism, which he adhered to in subsequent works, which include his *Sant'Agostino* (1929). In *God*, 1931, something of his earlier self reappears. (1881-).

Papua. See *New Guinea*.

Papworth Village Settlement, a settlement in Cambridgeshire, England, near Huntingdon, where tuberculous patients reside and carry on village industries. It is a voluntary organisation, started in 1917, and houses nearly a thousand residents.

Papyrus, or *Paper-reed* (*Cyperus Papyrus*), a river-side plant of the natural order Cyperaceae, found in Egypt, the Sudan, etc., standing up to 12 ft. high. It is a kind of sedge with a soft triangular stem, the pith of which is easily split into ribbons. In ancient times, by Egyptians, Greeks and Arabs, the pith was used as a writing material; at first long strips were rolled up, but later rectangular pages were cut and bound together book fashion; much ancient literature is still preserved on papyrus; the use of papyrus was superseded by that of parchment and rag-made paper.

Para, state of Brazil, adjoining the Guianas, producing rubber, fruits and sarsaparilla. Area, 444,000 sq. m. Pop. 1,500,000. Also its capital, also known as Belem do Para, on the estuary of the Pará R. Pop. 293,000.

Parabola, a conic section formed by the intersection of a cone by a plane parallel to one of its generating lines; the path of a projectile thrown in the air at an angle with the vertical is a parabola.

Paracelsus, Swiss physician, alchemist, and mystic, whose real name was Theophrastus Bombastus von Hohenheim, born at Einsiedeln; one of the founders of modern medicine and chemistry; credited with the discovery of hydrogen. (1493-1541).

Parachute, an umbrella-like device of silk intended to break the fall of a person or object from a height; it consists of a sheet of silk with cords attached which opens automatically on the pulling of a rip-cord. Parachutes for use in case of need are generally carried by aircraft, and "parachute-jumping" from aeroplanes at great heights is being developed as a sport or exercise in agility.

Paraclete (Greek for *Comforter*), name given to the Holy Ghost which Christ promised His disciples would take His place as their teacher and guide after He left them. Also the name of the monastery founded by Abélard near Nogent-sur-Seine, of which Héloïse (q.v.) was abbess.

Paradox, a statement which, while true, is in form or content contrary to the generally accepted opinion on the matter with which it deals, or which unless accepted in a special sense or carefully examined may be apparently untrue; a familiar example is the father's assurance to the son he has chastised that "it hurts me more than it hurts you."

Paraffins, a homologous series of inflammable hydrocarbons, characterized by their comparative lack of chemical reactivity. Some of them are used as liquid fuels for internal combustion engines, etc., under the names of aviation spirit, petrol, gasoline, benzine, etc. Higher boiling-point paraffins are used as paraffin oil for oil lamps, as lubricating oil, and as heavy oil for Diesel engines. "Vaseline" is the trade name of a semi-solid mixture of paraffins used for lubrication and as a salve, while solid paraffins are found in paraffin wax (q.v.). Methane and ethane occur in the natural gas given off from the earth in oil-fields and are used as a gaseous fuel.

Paraffin Wax, a white waxy solid mixture of the higher members of the paraffins (q.v.). It occurs naturally as ozokerite or earth-wax, but is mostly obtained as one of the later fractions in the distillation of petroleum. Paraffin is used in making candles, waxed paper and linoleum, and as an insulator in the electrical industry.

Paraguay, South American republic, whose territory lies between the Pilcomayo and Paraguay and the Parana Rs., with Argentina on the W. and E.

Bolivia on the N. and Brazil on the N. and E. It consists of rich undulating plains, and in the S. of some of the most fertile land on the continent. The country is rich in natural products, but without minerals; dye-woods, rubber, Paraguay tea, gums, fruits, wax, cochineal, and many medicinal herbs are gathered for export; maize, rice, cotton and tobacco are cultivated. The industries include some tanning, brickworks and lace-making.

Founded by Spain in 1535, Paraguay was the scene of an interesting experiment in the 17th Century, when the country was governed wholly by Jesuits, who, excluding all European settlers, built up a native Christian communistic state. They were expelled in 1768; in 1810 the country joined the revolt against Spain, and was the first to establish its independence. For 26 years it was under the government of Dr. Francia; from 1865 to 1870 it maintained a heroic but disastrous war against the Argentine, Brazil, and Uruguay, as a consequence of which the population fell from a million and a half to a quarter of a million. In 1934 it engaged in a war with Bolivia over the disputed Gran Chaco territory, and occupied much former Bolivian territory. The capital is Asunción. Area, c. 62,000 sq. m. Pop. 930,000.

Paraguay River, a South American long, the chief tributary of the Parana, which it enters above Corrientes; rises near Matto Grosso, Brazil. It forms part of the boundaries between Brazil and Bolivia and between Paraguay and the Argentine.

Paraldehyde, a substance obtained by the polymerization of acetaldehyde (q.v.). It is a colourless liquid boiling at 124°C., and will not mix with water. It is a soporific, familiar in sensational fiction as "K.O." (i.e., knock-out) drops; a more legitimate use is in inducing a calm sleep preparatory to the administration of an anesthetic for a surgical operation.

Parallax, of a star, is the angle subtended by the earth's orbit; generally, it denotes the apparent change in the position of an object due to a change in the position of the observer.

Parallel, the name given to lines in the same plane so related to each other that if produced they never meet, or, in other words, that the distance between them at any point is always the same. In geography the term is applied to those circles which are drawn upon a globe and are parallel to the Equator (see Latitude).

Parallelogram, a quadrilateral with opposite sides parallel. For Parallelogram of Forces, see Statics.

Paralysis, loss of the power of movement, or disease of the brain, spinal cord, or nerves, or an affection of the muscular substance itself. Paralysis limited to one side of the body is usually due to a disease of the brain and is called hemiplegia. When one side of the face and the opposite side of the body are attacked it is due to disease or injury to the medulla oblongata, and is called crossed paralysis. Local paralysis is due to an injured nerve-trunk.

Paramaribo, the capital of Dutch Guiana, on the Surinam, 10 m. from the sea, and the centre of the trade of the colony; it is a station on the United States-Argentine air route. Pop. c. 50,000.

Parana, (1) the capital of the province of Entre Ríos, Argentina. It is the ancient capital of Argentina, and stands on the Parana R., 7 m. from Santa Fé. It has a large trade in lumber, coal, skins, wool and salt meat. Pop. 72,800. (2) A state of Brazil, extending from the Atlantic to the

Rio Parana, Paraguay and Argentina. The area is 93,270 sq. m. and the population 1,014,200. Capital, Curitiba.

Parana River, a great river of South America, formed by the confluence of the Rio Grande and the Paranahyba; forms part of the boundary between Paraguay and the Argentine; its junction with the Uruguay forms the estuary of the Plate. The river is broad and rapid, 2,000 m. long. The chief towns on its banks are Corrientes, Santa Fé, and Rosario.

Paranoia, a mental disorder which takes the form of an obsession based upon delusions, especially a delusion that the patient is the subject of persecution. Advanced cases lead to insanity. Other paranoid delusions arise from excessive ambition, imagined injustice, often following unsuccessful litigation, or amatory fixations.

Parasites, in biology, are animals or plants living on and deriving their nourishment from other living organisms, either animal or plant. The term is generally used only in those cases where definite harm is done to the host; in the absence of injury the association is described as commensalism or symbiosis. Examples of parasitic animals are the liver-fluke of sheep and the microscopic parasite causing malaria in man; among parasitic plants may be mentioned mistletoe (a partial parasite), dodder, toothwort, and various fungi. Many disease-producing bacteria are parasites.

Paratyphoid, name for several allied infectious fevers which closely resemble typhoid (*q.v.*) but are due to different bacilli. The symptoms cannot be distinguished from those of typhoid, which last, however, is more often fatal.

Paravane, a naval device used during the World War, which secured the immunity of ships steaming at sea from anchored mines.

It consisted of a torpedo-shaped body fitted with hydrovanes. As the mooring chain of the mine came in contact with the attached tow-rope, it was deflected from the ship, a heavy cutter bracket at the head of the paravane snapped the chain and the mine then rose, to be destroyed by gun-fire.

PARAVANE

Parcae, Fates (*q.v.*), derived from *para*, a part, as apportioning to every individual his destiny.

Parcel Post. The delivery of parcels up to 7 lb. in weight was first undertaken by the Post Office in 1883; in 1927 a system of cash on delivery (C.O.D.) was instituted. Parcels should be marked *Parcel Post* and postage prepaid by the sender. Parcels are neither accepted nor delivered on Sundays. Those for Eire (Ireland), the Channel Is. and the Isle of Man are liable to customs duties. The inland rates are: not exceeding 3 lb., 6d., with an additional 1d. per lb. up to 5 lb.; for 1/11 lb. (the limit) may be sent. The size of the parcel must not exceed 3 ft. 6 in. in length, and in length and girth combined 6 ft.

Parchment consists of skins specially prepared for writing; it takes its name from Pergamum, where it was first so used. The skins used are of sheep, for fine parchment or vellum, of calves, goats and lambs; parchment for drum-heads is made from calves' and asses' skins.

Pardon. In England, in nearly all cases of crime except in cases of impeachment, a full or conditional pardon from the Crown may be granted either before or

after trial. Pardon was formerly granted by the Crown under the Great Seal, but by an Act of George IV., it was made sufficient for the sovereign to issue a warrant under his sign-manual and countersigned by a Secretary of State. The sovereign acts upon the recommendation of the Home Secretary. In America the Constitution provides that the President shall have power to grant reprieves and pardons for offences against the state except in cases of impeachment.

Paregoric, compound tincture of camphor, including opium, oil of anise, and benzoic acid, used as an allervative for coughs and rheumatism.

Parent. Although the common law of England does not compel parents to maintain their children, yet if they fail to do so, in the case of a child unable to earn its own living, the poor law authority can obtain an order from a justice of the peace to compel the parents or other relatives to contribute to the cost of so doing. When the children are legitimate the law provides that the father shall be their guardian until their majority, but, under the Guardianship of Infants Act, 1925, the Divorce Acts and Infants' Custody Act, the custody of a child may be granted exclusively to the mother. In the case of an illegitimate child the mother may summon the putative father to appear before a magistrate, who, if the affiliation is proved, may order him to pay the lying-in expenses and a weekly sum not exceeding 20s. until the child's sixteenth year. At death parents may, by a will duly executed, disinherit their children; but in the event of intestacy, if there is no surviving parent, the children share the whole estate, real and personal, in equal shares.

Pariah, name given in southern India to the lower classes not a member of any recognized caste; usually a member of one of the indigenous non-Hindu races.

Parimutuel, a method of betting on horse racing. It differs from the totalisator (*q.v.*) in that the stake money is collected in a series of "pools" instead of one. It was invented in France in 1872, and is popular in that country and America, the government deducting a commission from the takings.

Paris, capital of France, in the dept. of Seine, in the centre of the northern half of the country, on both banks of the Seine, and on two islands in midstream, 110 m. from the sea. The artistic, literary and intellectual capital of the world, it has been almost wholly rebuilt during the 19th and 20th Centuries, and retains very few buildings earlier than the 17th Century. Among the more important public buildings are Notre Dame, the great Gothic cathedral, built in the 12th Century; the Louvre, perhaps the most famous art gallery and museum in the world; the Palais de Justice and Conciergerie, on the Ile de la Cité, with the beautiful Sainte-Chapelle, built by Louis IX. to house Christ's Crown of Thorns; the Pantheon, where France's great men are commemorated; the Invalides, with the tomb of Napoleon; the Arc de Triomphe, with the tomb of the Unknown Soldier marked by a perpetual flame; the Tour Eiffel; the Luxembourg, meeting place of the Senate; the Opera and Théâtre Français; and the Palais Royal with its covered arcade of shops. The fortifications once a feature of the city, are now destroyed. Concentric rings of wide boulevards surround it; among its fine squares the Place de la République, Place de la Concorde and Place de la Bastille may be mentioned. The Champs Elysees and Bois de Boulogne are its most famous open spaces. The University (the Sorbonne) is the resort of students of every race and colour. The

scene of many tragic events in the Revolution, its siege and capture by the Germans in 1870-1871 and the subsequent Commune are the outstanding events of its more recent history. It was the scene of the Peace Conference in 1919 after the World War. Pop. 2,829,750; Greater Paris (dept. of Seine), 4,963,000.

Paris, in the Troy legends, son of Priam and Hecuba; his carrying off of Helen to Greece was the cause of the Trojan War (q.v.), in which he slew Achilles, and was mortally wounded by the poisoned arrows of Hercules.

Paris, a genus of perennial herbs of the order Liliaceae, including the Herb Paris, true love or one-berry (*Paris quadrifolia*). This is occasionally found in Great Britain, in shady woods. The stem, which grows sometimes to a height of 10 or 12 ft., bears a yellow flower of unpleasant odour; the berry is a blackish purple.

Paris, Matthew, English chronicler, a Benedictine monk of St. Albans; author of two Latin histories, one, the *Chronica Majora*, of the world from the creation to his time; the other, the *Historia Minor*, from the Norman Conquest to the year of his death. (c. 1195-1259).

Park, Mungo, African traveller, born at Foulshields, Scotland; after studying medicine, went in 1795 for the first time to Africa. Starting from the Gambia, he penetrated eastward to the Niger, then westward to Kamalia, where illness seized him; he returned to England and published *Travels in the Interior of Africa*, 1799. In 1805 he set out for Africa again at Government expense; he reached the Niger, and attempted to descend the river in a canoe, but he and his companions were drowned. (1771-1806).

Parker, Sir Gilbert, British novelist and politician. Born in Canada, he emigrated to Australia and then to London, where he made a name with novels dealing largely with life in Canada. *The Seats of the Mighty* and *The Weavers* being two of the best known. For 18 years he sat as M.P. for Brentford, and he was knighted in 1902. (1852-1924).

Parkehurst, a village in the parish of Carisbrooke, Isle of Wight, at which is a large convict prison accommodating 800 prisoners.

Parlement, the name given to the local courts of justice in France prior to the Revolution, especially that of Paris, in which the edicts of the king required to be registered before they became laws.

Parliament, the legislative body of the three estates of the realm—Clergy, Lords and Commons. The first are represented in the Upper House by the archbishops and 24 bishops, of whom London, Winchester and Durham are always three, the remainder sitting according to seniority of consecration; the rest of the Upper House comprises the lay peers (see Lords, House of). The House of Lords may initiate any bill not a money bill; it does not deal with financial measures at all except to give its formal assent; it also revises bills passed by the Commons, and may (subject to the Parliament Act, q.v.), reject them. Of late years this veto has come to be exercised only in cases where it seems likely that the Commons do not retain the confidence of the people, having thus the effect of referring the question for the decision of the constituents.

The House of Commons (q.v.) comprises

615 representatives of the people; its members represent counties, boroughs and universities, and are elected by practically the entire adult population, male and female, over 21. The Commons initiates most legislation, deals with bills already initiated and passed by the Lords, inquires into all matters of public concern, discusses and determines imperial questions, and exercises the sole right to vote supplies of money. To become law bills must pass the successive stages of first and second reading, committee and third reading in both houses, and receive the assent of the Sovereign, which latter has not been refused for two centuries. Relations between the Parliaments of the United Kingdom and the Dominions are governed by the Statute of Westminster (1931) (q.v.).

Parliament Act, a law passed in August, 1911, aimed chiefly at decreasing the power of the House of Lords. Under it the Lords cannot reject or amend a money Bill, and cannot touch a measure passed three times by the House of Commons. The life of the House of Commons under the Act was reduced from seven to five years. The Act only passed the House of Lords after Asquith had threatened to create enough new peers to secure a majority for it, and its passing ended a constitutional crisis that had begun with the rejection by the House of Lords of the 1909 Budget.

Parma, a cathedral and university town of N. Italy, on a tributary of the Po, 70 m. N.E. of Genoa; is rich in art treasures, and it manufactures pianofortes, silks and woollens, and cheese, and has a cattle and grain market; formerly the capital of the duchy of that name, which was united to Italy in 1860; it was the residence of Correggio. Pop. 71,000.

Parmoor, Charles Alfred Cripps, first Labour statesman; entered Parliament as a Conservative in 1895, left his party on the Free Trade issue, and attached himself to the Labour Party. Lord President of the Council, 1924, and 1929-31. (1852-).

Parnahyba, a port of Brazil situated on the river of the same name, 10 m. from its mouth. Its exports include cotton, leather, goat skins and rubber. Pop. 20,000.

Parnassus, a mountain in Phocis, Greece, 10 m. N. of the Gulf of Corinth, 8,000 ft. high, in Greek legend the seat of Apollo and the Muses, and the centre of the earth, with the oracle of Delphi and the Castalian spring on its slopes.

Parnell, Charles Stewart, Irish statesman, born at Avondale, Co. Wicklow; he entered Parliament in 1875 as a Home Ruler, and led his party in obstructionist methods; he also founded the Land League. He was charged with responsibility for political crimes in Ireland, but the enquiries of a Royal Commission proved that an incriminating letter attributed to him was a forgery. Cited as co-respondent in the O'Shea divorce case when at the height of his power, he retired from the leadership of the party, and died only a few months later. (1846-1891).

Parnell, Thomas, English minor poet, born in Dublin; became archdeacon of Clogher; is best known as the author of *The Hermit*, though his ode *The Night-Piece on Death* and the *Hymn to Contentment* are of more poetic worth. His works were published posthumously by Pope. (1679-1718).

Parody, a form of literary production in well-known work, in prose or poetry, is ridiculed by more or less close imitation of its style and matter. A famous example in English literature is John Philips' *Splendid Shilling*, a burlesque of Milton's *Paradise Lost*.

HERB PARIS

Paros, Greek Island, one of the Cyclades, exports wine, figs and wool; in a quarry near the summit of Mt. St. Elias the famous Parian marble is still cut; the capital is Paroskia. Pop. c. 9,000.

Parotid Glands, in anatomy, the glands, one on either side of the face, immediately in front of the ear and communicating with the mouth by a duct.

Parr, Catherine, sixth wife of Henry VIII. and the daughter of a Westmorland knight; was of the Protestant faith and obnoxious to the Catholic faction, who trumped up a charge against her of heresy and treason, from which, however, she cleared herself to the satisfaction of the king, over whom she retained her ascendancy till his death. Subsequently married Lord Seymour. (1512-1548).

Parr, Thomas, called **Old Parr**, English farmer, notable for his long life, being said to have lived 152 years and 9 months, from 1483 to 1635.

Parrakeet, name commonly given to parrot. The budgerigar, popular as a cage-bird in England, is the best-known.

Parramatta, next to Sydney, from the oldest town in New South Wales; manufactures colonial tweeds and Parramatta cloths, and is in the centre of orange groves and fruit gardens. Pop. c. 18,000.

Parrot, any bird of the family Psittacidae. The bill is hooked and rounded

and is much used in climbing. The tongue is soft and fleshy and the wings are of moderate size but the tail is often elongated. The plumage is generally brilliant. They are natives of tropical and sub-tropical regions; the species are numerous and include parakeets (q.v.), macaws, lorikeets, lories, and cockatoos. They subsist upon fruit and seeds and breed in hollow trees. Many species can imitate the human voice. Some live to a great age, instances being known of these birds reaching 70 or even 90 years. They are subject to a disease known as psittacosis, which can be communicated to man.

PARROT

Parrot Fish, a group of sea fishes of the family Scaridae, comprising several genera; brilliant in colour, their teeth are united in beak-like plates. Mainly tropical, one species is found in the Mediterranean, and was esteemed an edible delicacy by the ancients.

Parry, Sir Hubert Hastings, British composer. He was a professor at Oxford and Director of the Royal College of Music, and composed a number of works, chiefly cantatas and oratorios, and several symphonies; he also wrote several books on music. (1848-1918).

Parry, Sir William Edward, British Arctic explorer, born at Bath; visited the Arctic Seas in four voyages between 1818 and 1826, and a fifth in 1827 in quest of the North Pole via Spitzbergen, in which he was baffled by an adverse current; died governor of Greenwich Hospital, and left several accounts of his voyages. (1790-1855).

Parsec, a unit of astronomical distance; the distance of a star of parallax one second, i.e., $3\frac{1}{2}$ light-years or 19 million million miles.

Parsees, a name given to the disciples of Zoroaster or their descendants in Persia and India. In India they number some 110,000, are to be found chiefly in the

Bombay Presidency, form a wealthy community, and are engaged mostly in commerce. They pay homage to the sun and to fire as the symbol of the deity. They expose their dead apart in the open air in "towers of silence," where they are left till the flesh is eaten away.

Parsley (*Petroselinum sativum*), a plant of the order Umbelliferae, a well-known garden herb used for its aromatic flavour in soups and other dishes. It is a native of Sardinia and was introduced into England in the 18th Century.

Parship, an umbelliferous plant (*Pastinaca sativa*) grown in Europe for the sake of its white, carrot-like root, used as a table vegetable.

Parsons, Sir Charles, British engineer, inventor of the steam turbine engine and of other mechanical devices; president of the British Association at Bournemouth in 1919; awarded the Order of Merit, 1927. (1854-1931).

Parsonstown, or Birr, a town of Co. Offaly, Eire (Ireland), 61 m. SW. of Dublin. Birr Castle has an observatory. Pop. c. 5,000.

Parthenogenesis, name given to reproduction, that is, to reproduction of plants or animals by means of unimpregnated germs or ova. It is found only in the lower forms of life.

Parthenon, Doric order at Athens, dedicated to Athena, constructed under Phidias of the marble of Mt. Pentelious, and regarded as the finest specimen of Greek architecture that exists; it is 228 ft. in length and 65 ft. in height. It was severely damaged by an explosion in 1687, but has since been largely restored. Many sculptures from the pediment are in the British Museum, London. See **Art, History of**.

Parthia, an ancient country corresponding to Northern Iran; was inhabited by a Scythian people of Aryan speech and manners, who, after being tributary successively to Assyria, Media, Persia, Alexander the Great, and Syria, set up an independent kingdom in 250 B.C., which was Rome's greatest and most continuous rival for domination of the Middle East. Ctesiphon was their capital, and the Euphrates lay between them and Rome. They were overthrown by Artabanus, who founded a new Persian empire about A.D. 224.

Partnership, the relation existing between two or more persons carrying on a business jointly with a view to profit. Unless there is special agreement to the contrary, the partners share profits and losses equally among themselves; each partner is liable for the debts of the business, and the acts of any partner normally bind the others. The law also makes provision for the establishment of limited partnerships, in which certain partners without voice in the management of a business are liable for its debts only to the amount of capital they have contributed.

Partridge, a gallinaceous bird of the pheasant family, with several species, one, the Grey Partridge (*Perdix cinerea*), being commonly preserved as a game bird in Great Britain. It feeds on grain and seeds, insects and their larvae. Other species include the Red-legged, the French, or Guernsey, partridge, the Greek partridge, the Arabian and the Indian. The greater part of the plumage is grey varied with brown and black. The wings and tail are short. They are found chiefly in cultivated ground.

COMMON PARTRIDGE

Partridge, Sir Bernard, English black-and-white artist; practised stained-glass designing and decorative painting, 1880-1884. Joined *Punch*, 1892, and was for long its principal cartoonist, he was knighted, 1925. (1861-).

Party Government, the system of government under which the executive is nominated by, or under the control of, that one of two or more political parties which holds the largest number of seats in the legislature. It has been the principle of government in Great Britain since the Hanoverian succession. In totalitarian states it has been superseded by a system under which only a single political party is permitted to exist.

Party Wall, a wall dividing two partly on each of them. In the absence of special agreement it is deemed to belong jointly to the owners of the two properties, who are equally responsible for its upkeep and repair.

Pasadena, a city and health resort of California, U.S.A., E. of Los Angeles, of which it is largely a residential district. In the district fruit growing is carried on. It is the seat of the Huntington Library and near it is the Mt. Wilson observatory. Pop. 76,100.

Pascal, Blaise, French mathematician and philosopher, born at Clermont, in Auvergne; at 16 wrote a treatise on conic sections; at 18 invented a calculating machine; he afterwards made experiments in pneumatics and hydrostatics, by which his name became associated with those of Torricelli and Boyle; in 1654 he retired to the convent of Port Royal (q.v.), where he spent the rest of his days as an ascetic, and wrote his celebrated *Provincial Letters* in defence of the Jansenists against the Jesuits, and his no less famous *Pensées*, which were published after his death. (1623-1662).

Pas-de-Calais, dept. of NE. France, Channel; has coal and iron mines, many and varied manufactures, agriculture and fishing industries. Capital Arras; other chief towns, Calais and Boulogne. Area, 2,600 sq. m. Pop. 517,500.

Pasha, a title given in Turkey before the revolution of the Republic to governors of provinces and prominent officers in the army and navy.

Pasque Flower, (*Anemone Pulsatilla*) a purple-flowered perennial herb of the order Ranunculaceae, found in England on chalky soils; it is so called because it flowers about Easter-tide.

Passau, German city in Bavaria, at the confluence of the Inn and the Danube, 105 m. E. of Munich; has manufactures of leather, tobacco, porcelain, paper, and beer. Pop. 26,000.

Passchendaele, village in Flanders, captured by the Allies in the prolonged and bloody third battle of Ypres (November, 1917). It fell into German hands again in the spring of 1918, and was recaptured by the Allies in September of that year.

Passeriformes, an order of birds, containing five or six thousand species, including all perching birds, such as finches, sparrows, warblers and crows; all true song birds are included in the order; they are four-toed, one of the toes being directed backwards.

Passfield, Sidney Webb, first Baron, British politician. Born in London, he married Beatrice Potter in 1892, and after a civil service career became known together with his wife as a writer on economics and particularly as an authority on trade

unionism. He was one of the founders of the Fabian Society. In 1922 he became a Labour M.P., in 1924 President of the Board of Trade, and in 1929 a peer and Colonial Secretary until 1931. Among his works, written jointly with his wife, are *A History of Trade Unionism*, *Industrial Democracy*, and *Soviet Communism*. (1859-).

Passing-Bell, a bell tolled at the moment of the death of a person to invite his neighbours to pray for his soul.

Passion Flower

(*Passiflora*), a genus of climbing plants with large purple flowers and edible fruits, native to America, but cultivated as a garden flower in England.

PASSION FLOWER

Passionists, a Roman Catholic religious order of priests founded in 1694 by St. Paul of the Cross, a Sardinian; they are engaged in revival and mission work in various parts of the world.

Passion Play. See *Miracle Play*.

Passion Week, properly the week preceding Holy Week, commencing on Passion Sunday, the fifth Sunday of Lent; but the name is often given to Holy Week itself, i.e., to the week immediately preceding Easter.

Passive Resistance, a term first applied to the action of Nonconformists in England and Wales who, being opposed to the Education Acts of 1902 and 1903, refused to pay the education rate, preferring restraint upon their goods to voluntary payment on the grounds that rate-aid should not be given to schools giving denominational instruction.

Passover, a Jewish festival in commemoration of the Exodus from Egypt, celebrated about the time of the Christian Easter, and lasting for eight days. A feature of its ceremonies is the exclusive use of unleavened bread throughout the week. Its celebration was commanded in the Biblical book of Exodus.

Passport, a certificate of identity issued by a State to its nationals securing their protection by their government while travelling abroad. In Great Britain a fee of 15s. is charged for a passport, which is issued by the Foreign Office through the Passport Office, and is available for five years, which may be extended to ten on payment of an additional fee. For visiting many countries a visa is also necessary, obtainable—at a fee—from the consulate of the country to be visited.

Pasteur, Louis, French chemist, born at Dôle, in dept. Jura, celebrated for his studies and discoveries in the chemistry of fermentation, on which Lister's work was based, and also for his researches in hydrophobia, and his suggestion of inoculation as a cure for that and other diseases. The Pasteur Institute in Paris was established in 1886 to carry on his researches. (1822-1895).

Pasteurization. See *Sterilization*.

Pasto, a city of Colombia, at the foot of a volcano of the same name. It is a centre of the agricultural, textile, rope and tanning industries. It has a university and is an airport. Pop. 60,000.

Paston Letters, a series of letters and papers, belonging to a Norfolk family, published over a century ago. They date from the reign of Henry V. to the close of the reign of Henry VII. and are of great importance as illustrating the political and social history of the period.

Pastoral Staff, staff with a crooked in front of, a bishop as the symbol of his authority as shepherd of souls.

Patagonia, territory in the South America, lying between the Rio Colorado and the Straits of Magellan, divided between Chile and the Argentine Republic. Chilian Patagonia is a narrow strip W. of the Andes, with a broken coast-line, many rocky islands and peninsulas; Eastern or Argentine Patagonia is an extensive stretch of undulating plateaux intersected by ravines, largely covered with coarse grass or sparse shrub. Lagoons are abundant, and there are many rivers running eastward from the Andes. Herds of horses and cattle are bred on the pampas.

Patchouli, a perfume with a strong odour, derived from the dried branches of an Indian plant (*Pogostemon patchouli*) introduced into the West in 1844.

Patent, or letters patent, a document issued by the Crown entitling the holder to a monopoly in respect of an invention. A patent lasts for 16 years, subject to the patentee making the prescribed payments, in default of which the patent lapses. The patentee may, if he has not within that time been properly remunerated for his invention, apply to Court for an extension. The applicant for a patent must accurately set out the nature of his invention in a document known as "the specification"; and this must be filed at the Patent Office, Chancery Lane, London. Skill is required in preparing a specification, and it is generally advisable to employ the services of a patent agent. Any substantial error in the specification may render the patent void. If, during the life of the patent, it can be proved that the description is wrong, or so incomplete as to stultify the result aimed at, the patent will be void.

The applicant may either lodge a provisional or a complete specification; if provisional, the patent will be protected for 8 months; but before the expiration of that period, he must lodge a complete specification. For the purposes of the latter, drawings are required, whereas in the case of a provisional specification, usually none are necessary. The fees are, on application, £1; on filing complete specification, £4; on sealing £1. Application for certificate of payment of renewal: before the expiration of the 4th year and in respect of the 5th year, £5, and £1 additional each year to £16 in respect of the 16th year. The total fees for 14 years are, therefore, about £100. Copies of patent specifications can be obtained for the sum of 8d. a copy.

Patent Medicines, medicines whose composition is, or is supposed to be, a trade secret, and is not disclosed on the coverings under which they are sold; also proprietary medicines recommended for the relief of a specific malady, whether the manufacture is a secret or is revealed. Such preparations are in Great Britain subject to a stamp duty, of a minimum of threepence, rising with the amount of the selling price, and may only be made or sold by manufacturers or vendors holding a licence.

Patent Office, a department of the government, which deals mainly with the granting of patents (see *Patents*), the registration of designs and trade marks, and with questions relating to literary and artistic copyright. It is under the direction of a Comptroller-General.

PASTORAL
STAFF

Pater, Walter Horatio, English author of word, phrase, and style; born in London; chiefly remembered for his *Renaissance*, *Marius the Epicurean*, *Imaginary Portraits*, and *Appreciations*. (1839-1894).

Paternoster, the Lord's Prayer, so words, "Our Father," in Latin "Pater noster."

Paterson, city of New Jersey, U.S.A., centre of the American silk manufacture; also produces cotton, paper and machinery. Pop. 138,500.

Paterson, William, Scottish financier, born in Dumfriesshire; projected and helped to found the Bank of England, and was responsible for the ill-fated Darien scheme, in which he lost all his possessions, though he was later partly indemnified by a Government grant. (1658-1719).

Pathans, a Mohammedan race living frontier of India, including the Mohmands, Afridis, Wazirs, Mahsuds, Khattaks and Yussulzais. Many members of all these tribes are enlisted in the Indian Army.

Pathology, the branch of biology or diseases in the structure or functioning of the body or mind. Among its many divisions are psychopathology, which concerns the malfunctioning of the mind and nervous centres; cellular pathology, with which the name of Virchow is connected, which considers cell disintegration and degeneration; pathogenesis, which traces the origins and course of pathological phenomena; etiology, the study of the causes of diseases and their symptoms; plant pathology and sexual pathology, the study of mental and physical sexual aberrations.

Patiala, an important commercial town and state of the Punjab, India. The town has carpet manufacturing and other industries. Area of state, 5,950 sq. m. Pop. (town) 55,000; (state) 1,625,000.

Patio, in architecture, an enclosed space, such as a courtyard, in front of, or connected with, a house or other building.

Patmore, Coventry, English poet, essayist, born at Wood Essex, best known as the author of *The Angel in the House*, and *The Unknown Eros*; was many years on the staff of the British Museum library. (1823-1896).

Patmos, a barren rocky island in the Aegean Sea, S. of Samos, since 1924 an Italian possession; St. John is said to have written the New Testament Book of Revelation here.

Patna, city of British India, capital of the province of Bihar, at the junction of the Son, the Gandak, and the Ganges, trades in rice, oil seeds, cotton, salt and opium; has a university, and under its ancient name, Pataliputra, was capital of the great Indian empire of Asoka two centuries B.C. Pop. 160,000.

Paton, Sir Joseph Noel, Scottish painter, born at Dunfermline; his "Quarrel" and "Oberon and Titania" are in the National Gallery, Edinburgh; he designed a rose window at Dunfermline Abbey. (1821-1909).

Patras, town in Greece, on the NW. corner of the Morean Peninsula, on the shores of the Gulf of Patras; has a fine harbour; is the chief western port of Greece, shipping currants, olive-oil, wine, and lemons. Pop. 61,000.

Patriarch, the name given originally to the bishops of Rome, Antioch and Alexandria, and later to those also of Constantinople and Jerusalem, who held a higher rank than other bishops, and exercised a certain authority over the bishops, in their

districts. The title is still used in the Eastern churches, but in that of the West is now purely honorary.

Patricians. See *Pisbeians*.

Patrick, St. the apostle and patron saint of Ireland, probably born near Dumbarton, Scotland; was carried to Ireland, into slavery, as a child, escaped to Gaul, was ordained, and returned to Ireland to preach Christianity, seeing a great part of the country converted before his death and burial at Downpatrick. (c. 373-463).

Patron, in English church law, a person has the right of appointment to a church living or benefice. The name is also applied to a Saint who is supposed to watch over the interest of a particular country, profession, or class of persons. Thus, St. George is Patron Saint of England, St. David of Wales, St. Andrew of Scotland, St. Patrick of Ireland, St. Luke of painters, St. Francis de Sales of journalists, Our Lady of Loretto of aviators and St. Christopher of travellers.

Patti, Adelina, operatic singer, born in Madrid, of Italian extraction; made her first appearance at New York in 1859, and in London at Covent Garden, as Amina in *La Sonnambula*, in 1861, and appeared in all European capitals, and several times in America; was married three times, her last husband being Baron Cederström. (1843-1919).

Pau, chief town of the French dept. of Basses-Pyrénées, on the Gave de Pau, 60 m. E. of Bayonne; is situated amid magnificent mountain scenery, and is a favourite winter resort; linen and chocolate are manufactured. Pop. 34,000.

Paul, the name of five Popes: **Paul I.**, Pope from 757 to 797; **Paul II.**, Pope from 1464 to 1471; **Paul III.**, Pope from 1534 to 1549, was zealous against the Protestant cause, excommunicated Henry VIII. in 1536, sanctioned the Jesuit order in 1540, convened and convoked the Council of Trent in 1545; **Paul IV.**, Pope from 1555 to 1559, established the Inquisition at Rome, and issued the first *Index Expurgatorius*; **Paul V.**, Pope from 1605 to 1621, his pontificate marked by protracted strife with the Venetian republic.

Paul I., Czar of Russia, son of the Empress Catharine II., and her successor in 1796; was a despotic and arbitrary ruler; fought with the allies against France, but entered into an alliance with Napoleon in 1799; was murdered by certain of his nobles as he was being forced to abdicate. (1754-1801).

Paul, St., originally called Saul, Apostle of the Gentiles, born at Tarsus, in Cilicia, by birth a Jew and a Roman citizen; trained by Gamaliel at Jerusalem in the Jewish faith, and for a time the bitter persecutor of the Christians, till his conversion on the road to Damascus; thereafter he made three missionary journeys to Asia Minor and Greece. Returning to Jerusalem, he was arrested, appealed as a Roman citizen to Caesar, and was sent to Rome, where he awaited trial two years, during which time he wrote some of his Epistles. There is some evidence that he was released after a first trial, visited Spain, was re-arrested and condemned to death in A.D. 67 at a second trial, tradition declaring that he was executed at Three Fountains outside the city. By his preaching, Epistles, and missionary work, he probably did more than any other single man to develop Christianity from a Jewish sect into a world religion.

Paul-Boncour, Joseph, French politician; born at St. Alizans. Entered the Chamber of Deputies in 1899; was Minister for Labour in 1911; in 1931 left the Socialist party and became

Minister for War; was Premier for a month at the end of 1932, and Foreign Minister 1933-1934, when he became Minister of Finance. (1873-).

Paulinus, the first archbishop of York, sent with Augustine from Rome by Gregory to Britain in 601; laboured partly in Kent and partly in Northumbria, and persuaded Edwin of Northumbria to embrace Christianity in 629; d. 644.

Paul of Samosata, so called as sata, on the Euphrates; a Christian heresiarch who denied the Trinity; was bishop of Antioch, but deposed in 272.

Pausanias, a Greek traveller and topographer, lived during the reigns of Antoninus Pius and Marcus Aurelius; wrote an *Itinerary of Greece*, in 10 books, full of descriptions of great value both to the historian and the antiquary.

Pavia, city in Lombardy, Italy, burial-place of St. Augustine, and site of a famous Carthusian monastery. It was the capital of the ancient Lombard Kingdom; its University was founded by Charlemagne; it has metal and chemical manufactures. Stormed by Napoleon in 1796, Pavia was in Austrian possession from 1814 till its inclusion in the kingdom of Italy, 1859. Pop. 51,700.

Pavlova, Anna, Russian dancer, born in St. Petersburg. Toured Europe and America, including a London visit, in 1910; her interpretation of Saint-Saëns' "Swan" ballet was an enormous success. She danced with her own company in London 1923-1925, subsequently settled there, and died at The Hague. (1885-1931).

Pawnbroker, one who lends money in with him in pledge. Pawnbrokers in England must take out an annual Inland Revenue licence; they must issue a ticket for every article pawned. If pledges left with them are not redeemed, or the interest paid, within a year and seven days, they may be sold by auction, or, if under 10s. in value, forfeited. Pawnbrokers' charges and interest rates are fixed by law; they may not accept pledges from children under 14 or intoxicated persons.

Pawnees, a once numerous and powerful N. American Indian tribe which inhabited Nebraska, Kansas and Texas; the few who remain live on reservations in Oklahoma.

Pawpaw (*Asimina triloba*), a tree of the natural order Anonaceae, indigenous to Latin America but now widely cultivated in the tropics, yielding a fruit the size of a melon, edible when boiled, whose juice renders tough meat tender.

Pawtucket, the city of Rhode Island, U.S.A., with textile and machinery manufactures; where the American cotton industry began in 1790. Pop. 77,000.

Paxton, Sir Joseph, architect of the Crystal Palace, London, born in Bedfordshire, originally a gardener in the service of the Duke of Devonshire at Chatsworth, where he displayed the architectural ability in building large glass conservatories which developed itself in the construction of the Great Exhibition of 1851, for which he received a knighthood. (1801-1865).

Paymaster-General, the officer it is to make payments on behalf of the various British Government Departments. He is a member of the Government, but not of the Cabinet, and is unpaid.

Paysandu, the capital of the dept. of R. Uruguay, in a great cattle-raising district; agriculture and cotton growing are also carried on. The town is chiefly noted for its great canned meat industry. Pop. (town) 31,000; (dept.) 78,000.

Pea, a leguminous plant of the genus *Pisum*. It is a climbing annual, a native of S. Europe, and a nutritious culinary vegetable containing saccharine and farinaceous matter. The two commonest species are the garden pea (*Pisum sativum*) and the field pea (*Pisum arvense*).

Peabody, George, American philanthropist, born in Danvers, now Peabody, in Massachusetts, U.S.A.; made a large fortune as a dry-goods merchant in Baltimore and as a stockbroker in London; gave away in his lifetime for benevolent purposes a million and a half pounds, including large sums for building working-class dwellings in London; died in London. (1795-1869).

Peace River, a river of W. Canada, Columbia, which rises in British Columbia, flows through the Rocky Mts., approaches Lake Athabasca, where it changes its course northwards and finally enters the Great Slave Lake. Its estimated length is 1,100 m.

Peach, the fruit of a tree (*Prunus persica*) of the order Rosaceae, closely related to the almond, and Chinese or Persian in origin; but grown in England since the 16th Century. It is largely grown in the United States, whence the fruit is exported in cans.

Peacock, Thomas Love, English novelist, born in Weymouth; an intimate friend of Shelley. His best-remembered novels are *Headlong Hall*, *Maid Marian*, *Nightmare Abbey*, and *Gryll Grange*. (1785-1866).

Peacock Butterfly, a species (*Papilio agestor*) of British butterflies whose brownish-red wings are marked with large spots resembling eyes.

Peafowl, genus of gallinaceous birds (*Pavo cristatus*), native to India, is the best known; the male bird has a purple-crested head and breast, the back colouring being reddish-brown and green. The tail coverts of the male bird (peacock) are remarkable for their great length and the beauty of their metallic colouring; they are displayed to attract the female, which is comparatively sombre in appearance.

COMMON PEACOCK

Peak District, an upland area of Derbyshire, England; a continuation of the Pennine Chain. The district is barren and has a heavy rainfall. Among the greatest elevations are Blakelaw Stones, Kinder Scout (q.v.), Black Tor, Lord's Seat, and Hay Tor.

Peanut, or **Earthnut**, the seed of a minous plant (*Arachis hypogaea*) which is cultivated extensively in South America and W. Africa; the nuts are eaten raw or roasted, and an oil expressed from them is used in cookery and manufacturing butter substitutes.

Pear, a tree of the genus *Pyrus*, growing wild in Europe and Asia. The fruit has a saccharine aromatic juice and a soft liquid pulp. There are more than 200 varieties and France, N. Italy and the U.S.A. carry on the culture. Perry, a kind of cider, is made from pears. The wood is fine grained, yellow in colour and takes a brilliant polish.

Pearl, an iridescent secretion produced within the shells of certain molluscs, mostly bivalves. It is highly valued and classed as a gem. The chief pearl-forming molluscs are the pearl oyster, pearl

mussel, fresh-water mussel, and the giant-conch shell which produces the pink pearl. The chief fisheries are those of Ceylon, the Persian Gulf, Japan, N.E. Borneo, and the coasts of California and the Gulf of Mexico. Pearls have been famed as ornaments from early times. One was sold by Tavernier to the Shah of Persia for £180,000. The shells which contain pearls are split into layers for the sake of the mother-of-pearl. Artificial pearls are produced by placing irritants in the shells of living molluscs.

Pearl Harbour, inlet in the island of Oahu, Hawaii, 7 m. W. of Honolulu, used by the U.S.A. government as an air base and naval station.

Pearson, Sir Cyril Arthur, English newspaper proprietor; born at Wookey, Somerset; son of a clergyman; founder of *Pearson's Weekly*, 1890, and the *Daily Express*, 1900, and active in the early days of the Tariff Reform movement. After becoming blind in 1912, he devoted himself to philanthropic work for the blind, and was responsible for the foundation of "St. Dunstan's," the London institution for the blind in Regent's Park. He was accidentally drowned in his bath. (1866-1921).

Peary, Robert Edwin, American explorer. He made his first Arctic voyage in 1891, and followed it with others in 1893, 1895 and 1898. In 1902 he reached nearer the Pole than any one had before, and after another expedition in 1906 succeeded in 1909 in reaching the North Pole, the first man to achieve the feat. He wrote several books on exploration. (1856-1920).

Peasants' Revolt, a rising in the II. of England, in 1380-1381, in which the peasants of Kent and other counties, led by Wat Tyler (q.v.), marched on London with a view to the redress of their grievances regarding taxation and other matters. After a conference with the King the mob seized the Tower of London, murdered the Archbishop of Canterbury (Simon Sudbury) and others; at a second conference with the King, Tyler was slain by the Lord Mayor of London, Sir William Walworth, and the revolt collapsed soon after.

Peasants' War, an unsuccessful revolt of the peasantry in the S. and W. of Germany against the oppression and cruelty of the nobles and clergy which broke out at different times from 1500 to 1525. It was suppressed after considerable bloodshed.

Peat, a turfy substance consisting of decomposed vegetable matter, the remains of various mosses and marsh plants, used in Ireland and Scotland, where it is abundant, as fuel.

Pecan Tree, a N. American tree (*Carya juglandacea*, a species of hickory, closely related to the walnut; its edible nuts, long popular in the United States, are a growing article of consumption in Great Britain.

Peccary, a pig-like American genus of the family Suidæ, with short body and tail, and erect upper tusks. The flesh is edible. Varieties include the collared peccary and the white-lipped peccary.

Pe-Chi-Li, Gulf of, land-locked bay in the N.W. of the Yellow Sea, which receives the waters of the Hwang-ho; on opposite tongues of land at the mouth of it stand Port Arthur and Wei-hai-Wei.

Peculiar, an ecclesiastical term parishes, churches or deaneries which by special provision were formerly exempt from the jurisdiction of the diocesan authorities. A "Court of Peculiars" still exists attached to the see of Canterbury in which cases under ecclesiastical law arising in such jurisdictions

are dealt with. The two chief Peculiarities still existing are the Deaneries of Westminster and Windsor.

Peculiar People, a religious sect on faith-healing, founded at Plumstead, London, in 1838 by John Banyard and J. W. Bridges.

Pediculosis, an affection of the skin set up by irritation caused by certain parasite insects, including the *pediculus capitis* (head louse); *pediculus vestimentorum* (body louse), and *pediculus pubis* (crab louse, which infects the short hairs of the body).

Pedigree, a tabular record of the family, members of any particular family, whether of human beings, horses, dogs, bulls, or other selectively bred animals, indicating their relations to each other, and the times and places of their birth, marriage, death, and (in the case of man) burial. Public records of noble families are supervised by the College of Arms; stud-books of horses, dogs, etc., are compiled under the eagle of such bodies as the Jockey Club and the Kennel Club.

Pediment, in architecture, the triangular space above the pediment, resembling a

PEDIMENT

gable above the entablature at the end of buildings or over porticoes. The pediment is surrounded by a cornice and is often ornamented with sculpture. The term is also used of the triangular finishings over doors and windows.

Pedometer, an instrument, resembling a watch in form, carried

in the pocket of a pedestrian to enable him to know what distance he has walked. The mechanism consists of a lever which receives an impulse with every step. The dial is graduated to indicate either distances, or the number of paces taken.

PEDOMETER

Pedro I., emperor of Brazil, second son of John VI. of Portugal; reigned from 1822 to 1831, when he abdicated in favour of his son. (1798-1834).

Pedro II., emperor of Brazil, son of Pedro I., preceding, ascended the throne in 1831; reigned till 1889, when a revolution obliged him to resign and retire to Europe. (1825-1891).

Peebles, a lowland Scottish county, lothian, Selkirk and Dumfries; comprises hilly pastoral land watered by the upper Tweed; Windlestraw, Hartfell, and Broadlaw are the highest of its grassy hills; the only towns are Innerleithen and Peebles (pop. 6,000), county town, engaged in tweed manufacture. Area, 347 sq. m. Pop. 15,000.

Peel, a fishing town and holiday resort on the N.W. coast of the Isle of Man, 12 m. N.W. of Douglas; it is noted for its castle. Pop. 2,500.

Peel, Sir Robert, English statesman, born near Bury, Lancashire, the son of a wealthy cotton-spinner; entered Parliament as a Tory in 1809; was appointed Under-Secretary for the Colonies in 1811, and from 1812 till 1818 was Secretary for Ireland. In 1832 he became Home Secretary, and established the Metropolitan Police Force, the members of which body were then called Peesles or Bobbies. He withdrew from the Government in 1857 over Catholic emanci-

pation, but later changed his opinions, and introduced the measure which removed the disabilities. He became leader of the Conservative opposition in the Parliament of 1833; was Premier for a few months in 1834, and again in 1841. He carried the measure for repealing the Corn Laws in 1846; retired from office immediately after, and died as the result of a fall from horseback. (1768-1850).

Peele, George, English dramatist, born in Paris, Edward I., and David and Bathsheba, full of passages of beauty. (c. 1558-1597).

Peel Towers, the name given to the towers on the Scottish border.

Peer, a member of the British hereditary nobility. All peers of England, Great Britain, or the United Kingdom are Peers of Parliament and have been such from the creation of their titles. Scottish Irish peers, however, elect some from their number to represent them in the House of Lords. No Imperial Peer and no Scotch peer can be a member of the House of Commons. Descent or succession commonly follows general rules, but there are variations, for though mostly limited to male heirs, in the older baronies conferred by writs of summons instead of patent, and in higher Scottish peerages, it is open also to females. The forfeiture of a peerage can only take place through attainder.

Pegasus, in Greek legend, the winged horse, begotten of Poseidon, and sprung from the body of Medusa when Perseus struck off her head. With a stroke of his hoof he broke open the spring of Hippocrene on Mt. Helicon, and mounted on him Bellerophon slew the Chimera; thereafter he ascended to heaven, and became a constellation in the sky.

Pei-ho, a river of North China, 350 m. long; formed by the junction of four other rivers, on the chief of which stands Pekin; has a short navigable course south-eastward to the Gulf of Pe-Chi-Li, where it is defended by the forts of Taku.

Peiping. See Pekin.

Peipus, Lake, a large lake between Russia and Estonia, 90 m. long and 32 m. at its greatest breadth. It receives the Embach, Kosa, and other rivers and discharges by the Narova R. into the Gulf of Finland. Its fish are marketed in Leningrad.

Pekin, until 1928 the capital of China, on the Pei-ho, a sandy plain in the basin of the Pei-ho, a walled city made up of the northern or Manchu city and the southern or Chinese. The former contains the Forbidden City, in which were the Imperial palaces. Outside this are the government offices and foreign legations, a great Buddhist monastery, a Roman Catholic cathedral, and Christian mission stations. The Chinese city has many temples, mission stations, schools, and hospitals, but its houses are poor and streets unpaved. Under the name of Cambaluc, it was Kubla Khan's capital, and was the metropolis of the empire from 1261 to 1912. In 1900-1901 it was occupied by European forces sent to relieve the besieged British legation. When the centre of administration was moved to Nanking by the Chinese Government it was renamed Peiping. At present (1938) it is in the hands of the Japanese. A provisional Government set up by them for the administration of the territories in their hands and composed of nominees of Chinese extraction has its centre here and the name has reverted to Pekin. Pop. 1,456,000.

Pekinese Dog, a breed of pet dog, original breed which was found only in the Imperial Palace of Pekin. Its principal points comprise a flat skull, flat, broad muzzle,

eyes and nostrils large, forelegs heavy and bowed below the "elbow," body small and lion-shaped, tapering to the waist, ears and legs feathered. The colours are a golden chestnut, as in the Goodwood strain, and varying shades of brown.

Pelagius, or, in Celtic, **Morgan**, a celebrated Christian heresiarch of the 5th Century, born in Britain or Brittany; denied original sin and the Augustinian doctrine of divine grace, a heresy for which he suffered banishment from Rome in 418. A modification of this theory went under the name of Semi-Pelagianism, which ascribes only the first step in conversion to free-will, and the subsequent sanctification of the soul to God's grace.

Pelargonium, a genus of perennial Geraniaceae, commonly called geraniums.

Pelagasi, a people who are supposed, in prehistoric times to have occupied Greece, the Archipelago, the shores of Asia Minor, and a great part of Italy, and who were supplanted by the Hellenes. They were probably the race responsible for the buildings and other relics of what is called the Mycenaean civilisation.

Pelee, **Mount**, a volcano in the Martinique, NW. of the island of Martinique, an eruption of which, in May, 1902, completely destroyed the town of Saint Pierre and its 30,000 inhabitants. A further eruption took place in the following August, when the death roll was about 2,500 and Morne Rouge and other settlements were almost entirely destroyed.

Pelew, or **Palau Is.**, a Pacific group of islands, in the Western Carolines, formerly German, and after the World War mandated to Japan. Area, 175 sq. m. Pop. c. 12,800.

Pelham, **Henry**, English statesman, younger son of first Baron Pelham; entered the Commons in 1717 as a Whig; Secretary-at-War, 1724; Paymaster of the Forces, 1730. From 1743 till his death, with two days' interval in 1746, was Chancellor of the Exchequer and nominal head of the ministry. (1695-1754).

Pelias, in Greek legend, king of Iolchus, son of Poseidon, was out to pieces by his own daughters, and thrown by them into a boiling cauldron in the faith of the promise of Medea that he might thereby be restored to them young again. It was he who, to get rid of Jason, sent the latter in quest of the Golden Fleece in the hope that he might perish in the attempt.

Pelican, a genus (*Pelecanus*) of long and large-billed birds of the family

Pelecanidae; nine species are found in temperate and tropical parts of the world. They are fish-eaters, and are able to store fish in a pouch of naked skin which hangs from the lower mandible. A legend that the pelican fed its young with blood from its own breast made it in the Middle Ages a symbol of Christ.

Pelion, highest mountain of a range in the E. of Thessaly, upon which, according to Greek fable, the Titans hoisted up Mount Ossa in order to scale heaven and dethrone Zeus.

Peloponnesian War, a war of twenty years' duration (431-404 B.C.) between Athens and Sparta, which ended in the victory of the latter. This war is the subject of the history of

DALMATIAN PELICAN

Peloponnesus, the Southern peninsula of Greece, the ancient name of the Morea, the chief cities of which were Corinth, Argos, and Sparta.

Pelops, in the Greek mythology, the grandson of Zeus and son of Tantalus, who was slain by his father and served up by him at a banquet he gave the gods to test their omniscience. After his shoulder had been eaten, the gods ordered the body to be thrown into a boiling cauldron, from which Pelops was drawn out alive, with the shoulder replaced by one of ivory.

Pelvis, the bony girdle in vertebrate animals, including man, which forms the arch giving support to the lower or hinder limbs. It consists of four bones, the sacrum, coccyx, and the two haunch-bones, and in the cavity are several of the abdominal viscera and organs relating to reproduction and the urinary functions.

Pemba, an island off the E. coast of Africa, 42 m. long and 12 m. broad, lying some 25 m. N.E. of Zanzibar, to which Protectorate it belongs. Pop. 97,700.

Pembrokeshire, a county of Wales; is washed by St. George's Channel except on the E. where it borders on Cardigan and Carmarthen. It is a county of low hills, with much indented coast-line. Two-thirds of the soil is under pasture; coal, iron, lead, and slate are found. St. David's is a cathedral city; the county town is **Pembroke** on Milford Haven, and near it is the fortified dockyard and arsenal of **Pembroke Dock**. Area, 614 sq. m. Pop. 87,200.

Pemmican, a food for long voyages, expedition, particularly in Arctic expedition, consisting of lean meat or beef without fat, dried, pounded, and pressed into cakes, as originally prepared by the Indians of N. America.

Penal Servitude, a form of imperial labour which took the place of transportation after the abolition of the latter in 1857. The shortest term for which it may be awarded is three years, the longest "life," which in effect means generally twenty years. Courts of summary jurisdiction cannot pass sentences of penal servitude. Conditional release on "ticket of leave" is generally granted after a considerable portion, usually about three-quarters, of the sentence has been served.

Penance, in the Roman Catholic Church the three elements of contrition for sin, its confession, and its absolution by a duly authorised priest.

Penang, or **Prince of Wales Island**, a small fertile island near the northern opening of the Straits of Malacca, one of the British Straits Settlements; administratively it includes a small strip of the mainland known as Province Wellesley. Rugs, spices, and tobacco are exported. The capital is Georgetown, on the island. Area (including Province Wellesley), 400 sq. m. Pop. 374,000, over half Chinese.

Penarth, a seaport of Glamorganshire, Wales, 4 m. from Cardiff. There are docks, and it has some reputation as a pleasure resort. Pop. 17,700.

Penates, the name given by the Romans to their household deities, individually and unitedly, in honour of whom a fire, in charge of the vestal virgins, was kept permanently burning.

Penda, Anglo-Saxon king of Mercia of the 7th Century, who headed a reactionary movement of heathenism against the domination of Christianity in England, but in spite of his victory over the Christian king at Maserfield in 633, was himself killed in battle thirteen years later. (c. 677-686).

Pendulum, a rigid body so placed that swing. It has a free horizontal depends solely on its length, not on the weight of the bob or the size of the swing.

Penge, urban district and parish in the county of Kent, England, a residential suburb of London. The Crystal Palace was situated in the district. Area, 770 acres. Pop. 25,800.

Penguin, a family of birds comprising rocks chiefly in Antarctic waters, though their range does extend as far N. as the Galapagos Is. in the Tropics. Their wings, useless for flying, are specialized for swimming. They are grey in colour, with white underparts; the toes are webbed, and the birds assume an erect attitude on land. They congregate in colonies. The most familiar species are the Jackass-penguins, the Rockhoppers, the King and the Emperor Penguins.

KING PENGUIN

Peninsula, almost an island, a portion of land almost surrounded by water and connected with the mainland by a narrow neck, called the isthmus, e.g., the Iberian Peninsula (Spain and Portugal), the Peloponnesus or Morea (Greece), Nova Scotia, etc.

Peninsular War, a war carried on in Spain and Portugal from 1807 to 1814, between the French on the one hand and the Spanish, Portuguese, and British, chiefly under Wellington, on the other. It was ended by the victory of the latter over the former at Toulouse, just after Napoleon's abdication.

Penitential Psalms, a name given very early times to Psalms vi., xxi., xxxviii., li., ciii., cxlvi., cxlii., which are especially expressive of sorrow for sin.

Penmaenmawr, urban district and the N. coast of Caernarvonshire, Wales, 4 m. SW. of Conway. The height of the same name is to the W. of the town. Pop. 4,000.

Penn, William, English Quaker leader and founder of Pennsylvania, the son of an admiral, born in London. He spent several periods of imprisonment writing books in defence of religious liberty, then travelled in Holland and Germany propagating his views. His father's death brought him a fortune and a claim upon the Crown which he commuted for a grant of land in North America, where he founded (1682) the colony of Pennsylvania as a refuge for persecuted religiousists. After two years he returned to England, where his friendship with James II. brought many advantages to the Quakers. A second visit to his colony (1689-1701) gave it much useful legislation. The closing years of his life were clouded by mental decay. (1644-1718).

Pennant, a long, narrow flag, used for including signalling at sea, as an indication of the presence on a ship of an admiral or other high officer, and so on. The fly, or horizontal spread, may be from twice to four or five times as great as the hoist, or upright measurement.

Pennine Chain, a mountainous area in England extending from the Tyne Valley in W. Northumberland to Mid-Derbyshire and N. Staffordshire. It consists chiefly of uplands. The main peaks are Cross Fell, Wharfedale, Ingleboro, Pen-y-gent, and the Peak. Many rivers drain from its slopes to the E. and W. coasts.

Pennsylvania, except for New York, the most populous of the United States, lies N. of Mason and Dixon's Line, in New England, S. of New York; the country is traversed by the Blue Mts. and the Allegheny ranges, with many fertile valleys between the chains, extensive forests, and much picturesque scenery. The Allegheny R. is in the W. and the two branches of the Susquehanna in the centre water the state. It produces iron, petroleum, anthracite and bituminous coal; manufactures metal and food products, textiles, and chemicals.

Founded by the Swedes, it passed to English settlers in 1684; the first charter was granted to William Penn in 1681. There are several universities, including those of Pennsylvania (at Philadelphia) and Pittsburgh. The mining population includes many Irish, Hungarian, and Italian immigrants; of the agriculturists many are of Dutch descent. Harrisburg is the capital; the metropolis is Philadelphia, the second largest city in the country; while Pittsburgh, Scranton, Erie and Reading are among the many large towns. Area, 45,300 sq. m. Pop. 9,631,000.

Penny, originally a silver coin, weighed in the 7th Century, 1/16th of a Saxon pound, but decreased in weight till in Elizabeth's time it was 1/12th of an ounce troy. It was at first indented with a cross so as to be broken for halfpennies and farthings, but silver coins of these denominations were coined by Edward I. Edward VI. stopped the farthings, and the halfpence were stopped in the Commonwealth. Copper pennies were first minted in 1672. The present size of the coin dates from 1860.

Pennyroyal (*Mentha pulegium*), a species of mint formerly in considerable repute as a medicine, but now much neglected. It grows on damp moors and the flowers are purple.

Pennywort, a name given plants with round or pellate leaves found in marshy places, especially to *Cotyledon umbilicus*, a succulent British plant bearing ornate yellowish-green flowers, and *Hydrocotyle vulgaris* or Marsh Pennywort.

PENNY-ROYAL

Penrhyn, a district of Caernarvonshire, Wales, famous for its slate quarries.

Penrith, market town of Cumberland, England, and tourist centre for the English lakes. Brewing, ironfounding, and timber-sawing are its industries. Pop. 9,100.

Penryn, market town of Cornwall, England, at the head of Falmouth harbour. It has a considerable fishing industry, and ships the Penryn granite quarried near. Pop. 3,900.

Pensions, usually in consideration of past services. In Great Britain, besides Old Age Pensions (a.v.), pensions are paid by the state to judges, civil servants, ex-Ministers, employees of local authorities, teachers, and others on retirement, and to members of the Crown forces; and certain special allowances, known as Civil List Pensions, are made to persons distinguished in art, science and literature, or their dependents in need of them. In 1910 the Ministry of Pensions was formed to take over the entire control of Navy, Army and Air Force wound and disability pensions, service pensions continuing in the hands of the Admiralty and War Office. State Pension schemes for the general public include non-contributory Old Age Pensions

and National Health Insurance Act Pensions, *c.g.*, Widows and Orphans' Pensions. Pensions for the blind are payable at the age of 50, at the rate of 10s. weekly.

Pentacle, a 5-pointed star; supposed in the Middle Ages to have magical properties, it was employed by astrologers and alchemists; surmounted by a hammer and sickle, it is the badge of the modern Communist Party.

Pentateuch, the name given to the Bible; modern criticism has shown that they are closely connected, and in their present form are made up of several documents of various dates and by various writers; the different strains can be separated by critical examination of their language and of such points as the varying names used for God.

Pentecost (*i.e.*, 50th), a great feast of the Jews, so called as held on the 50th day after the 2nd of the Passover. It is called also the Feast of Weeks. The name is also applied to the Christian feast (Whitsunday) commemorating the descent of the Holy Ghost on the Apostles of Jesus.

Pentland Firth, is the strait between the Scottish mainland, connecting the North Sea with the Atlantic, 12 m. long by 6 m. broad, swept by a rapid current very dangerous to navigation.

Pentland Hills, range of hills in Midlothian, Peebles-shire and Lanarkshire, Scotland, 16 m. long. Scald Law (1,898 ft.) and Carnethy (1,890 ft.) are the highest points.

Pentstemon, or **Beard Tongue**, a genus of American Scrophulariaceous plants. Many species, with blue, purple, lilac, rose-coloured or yellow flowers, are cultivated in Britain as border or rockery plants.

Penumbra, the name given to the partial shadow of an eclipse, also to the margin of the light and shade of a picture.

Penza, town of European Russia, in the Middle Volga Area, at the confluence of the Sura and Penza. Paper, leather, matches and soap are made. Pop. 119,000.

Penzance, town of Cornwall, England, on the rocky west shore of Mount's Bay, with a fine harbour and docks, and mackerel and pilchard fishing industries. Its mild climate makes it a favourite health resort. Pop. 19,800.

People's Palace, Mile End Road, London, an institution for the recreation and instruction of the East-end population, opened by Queen Victoria in May, 1887, owing its origin to the impulse given by Sir W. Besant's *All Sorts and Conditions of Men*. In it are a library, art, galleries, concert and reading rooms, baths, gymnasium, etc. It was largely rebuilt, after a fire, in 1936.

Peoria, city of Illinois, U.S.A., on Illinois R. Glucose, agricultural implements, motor cars, starch, etc., are its manufactures. Pop. 105,000.

Pépin (called the Short), the son of Charles Martel, king of the Franks from 751, first of the Carolingians; a strong supporter of the Church, his gift of the Exarchate of Ravenna to Pope Stephen III. laid the foundation of the temporal rule of the Papacy. He conquered the Loire Valley for France, and was the father of Charlemagne. (714-768).

Pepper, the most important of the spices, is derived from a creeping vine (*Piper nigrum*) which is a native of the moist low-country forests of Ceylon and S. India and has also been introduced into Malaya, Siam, the Dutch East Indies and Borneo. Both "black" and "white" pepper are obtained from the same plant.

Peppercorn Rent, a nominal rent, in theory involving the annual payment from lessee to lessor of one peppercorn; it was used in connection with long leases as a device for giving a leasehold the practical effect of a freehold.

Peppermint (*Mentha piperita*), a mint leaves, probably a garden form of *Mentha aquatica*. An essential oil is distilled from the fresh flowers and used as a carminative. This oil is produced in British East Africa and the Seychelles.

Pepsin, an essential constituent of the gastric juice; for medicinal purposes it is extracted from the stomach of the calf, sheep, and pig, and used to supply any defect of it in the stomach of a patient. Its function is to render proteins soluble, and so digestible.

Pepys, Samuel, English civil servant and diarist; held a clerkship in the Admiralty, and finally its secretaryship; kept a diary of events from 1660 to 1669, which was published in part in 1825, and is of interest for the insight it gives into the manners of the time. Pepys left his library to Magdalene College, Cambridge, where it formed the foundation of the Pepysian Library. The famous diary was written in cypher which was first decoded in 1825. He was also the author of *Memories relating to the State of the Navy* (1690). (1633-1703).

SAMUEL PEPPYS

Perak, one of the Federated Malay States, on the NW. coast of the Malay Peninsula. It is traversed by the R. Perak, flowing between 2 mountain ranges. Taiping is the capital. Tin, sugar and coffee are produced. Area, 8,000 sq. m. Pop. 880,000.

Perceval, Spencer, English statesman, born in London; trained for the bar; entered Parliament as a supporter of Pitt, and held a succession of posts under different administrations, attaining the Premiership, which he held from 1809 to 1812, on May 11 of which year he was shot dead by a madman in the lobby of the House. (1762-1812).

Perch, *perca fluviatilis*, greenish-brown in tint, becoming golden on the sides and white on the belly, with broad vertical dark bands passing down the sides. The average weight is about 5 lb. They are English representatives of the Perch (Percidae) family of fishes found in Europe, Asia and N. America, the majority in N. America where they are much fish known as "Darters." The Sea Perches of which there are many species, belong to the family Serranidae. They are carnivorous and found in tropical and sub-tropical seas.

PERCH

Percussion Cap, a small cylinder filled with fulminate of mercury and sometimes other explosive agents inserted in cartridges for detonating the bullet.

Percy, Thomas, English poet and anti-Thomist, born at Bridgnorth; devoted himself to the collection of old ballads, and published, in 1765, *Reliques of Ancient English Poetry*; became bishop of Dromore in 1782; was blind for some years before he died. (1726-1811).

Percy Family, the descendants of William de Percy, a follower of William the Conqueror; William de Percy (c. 1182-1245) was one of the barons who opposed King John; his grandson, Henry (c. 1272-1315) settled in Northumberland and fought in the Battle of Neville's Cross, where he captured King David of Scotland; his grandson, Henry (d. 1408) was created 1st Earl of Northumberland, and with his son, Henry Hotspur, defeated the Scots at the Battle of Halidon Hill, but the latter was killed in rebellion against Henry IV. at the battle of Shrewsbury (1403); the 2nd and 3rd Earls were slain in battle at St. Albans and Towton respectively; after a forfeiture and restoration of the title the 7th Earl, Thomas, was executed in 1572 for supporting Mary, Queen of Scots; the 11th Earl died in 1870, leaving no male children; his granddaughter married Sir Hugh Smithson, who received the Earldom and adopted the name Percy, being created 1st Duke of Northumberland in 1766.

Peregrine Fal-

con, typical representative (*Falco peregrinus*) of the bird family Falconidae, a powerful bird of prey used formerly for the sport of falconry (q.v.); it is blue-black above, and white, striped with black, below.

PEREGRINE
FALCON

Père-Lachaise

Cemetery, a municipal cemetery in Paris, in which lie buried many famous Frenchmen and some foreigners, including Oscar Wilde. It was named after the Jesuit priest, François de Lachaise (1624-1709), founder of the College of Clermont.

Perennial, a plant that flowers year after year, retaining life in its roots through the non-flowering season. A few plants that are annuals in England become perennials in hot climates.

Perfumes, aromatic liquids, still in the sources, generally plants, though there are a few animal perfumes, such as musk and ambergris; the centre of the European industry is Grasse (French Riviera). Most of the principal perfumes can now be imitated by synthetic chemical processes.

Pergamos, or Pergamum, an ancient eventually the centre of a province of the name, which was bequeathed to Rome by its king, Attalus III. in 133 B.C. The city possessed a famous library, and parchment is said to have been invented there.

Pergola, the name of a series of climbing plants such as roses, creepers, jasmine, etc.

Porianth, the portion of a flower, usually divided into calyx and corolla, which protects the pistil and stamens from harm; the name perianth is generally used when the calyx and corolla are indistinguishable.

Pericardium, an almost conical membrane, serous sac, enclosing the heart. It consists of two layers—one dense and tough in structure, the other an inner serous one reflected on the surface of the viscera. Pericarditis, or inflammation of the pericardium, is a frequent complication in rheumatic fever, chorea, and some other diseases, and frequently supervenes upon sepsis in any part of the body.

Pericles, great Greek statesman, born in Athens; entered public life 467 B.C. as a democrat, and sought the unification of Greece in one confederacy, but was defeated by the jealousy of Sparta. In Athens he established himself as absolute ruler with the consent of the citizens, reforming the laws, adorning the city, and encouraging literature and the arts. Two years before he died came the outbreak of the Peloponnesian War (q.v.). Begathered around him nearly all the great artists and writers of his time to adorn his beloved city; he died B.C. 429 of a lingering fever.

PERICLES

Peridot, a pale, greenish-yellow, kind of chrysolite, used in jewellery; also a yellow variety of tourmaline found in Ceylon.

Perigee, the point in the orbit of the moon or a planet at which it most closely approaches the earth.

Périgueux, chief town of the dept. of Dordogne, France, on the Isle, 95 m. by rail N.E. of Bordeaux; has a remarkable cathedral resembling St. Mark's, Venice; iron and woollens are the industries; truffles and truffle pies are exported. Pop. 33,000.

Perihelion, the point in the orbit of a planet or comet at which it is nearest the sun.

Perim, a small barren, crescent-shaped island in the Strait of Bab-el-Mandeb, at the mouth of the Red Sea, part of the British colony of Aden, and used as a coaling-station.

Periodic Table, an arrangement of the chemical elements in order of atomic weight. Mendeleeff (q.v.) found that in such an arrangement similar elements fell in columns or periods under one another. The table showed clearly where an element was missing and enabled him to predict the properties of the unknown elements. Later work showed that some of the anomalies of the table disappeared if atomic numbers were substituted for atomic weights, as suggested by H. Moseley (q.v.).

Periosteum, a fibrous membrane with which most of the surface of the bones is covered. It is subject to periostitis or inflammation, acute or chronic, the latter often arthritic or tuberculous in origin.

Peripatetic Philosophy, the name given to the philosophy of Aristotle, from his habit of walking about with his disciples in the shady walks of the Lyceum.

Periscope, an apparatus for making observations from a position where the observer is concealed. It is based on the use of two reflecting mirrors in a tube with parallel surfaces at an angle to the tube's axis. Such instruments were much developed during the World War, for use in trenches and submarines.

Peritoneum, a membrane lining the abdominal cavity, and forming a covering for the organs contained in it. It forms a closed sac in the male, but in the female communicates with the Fallopian tubes. Peritonitis, or inflammation of the peritoneum, may be acute or chronic, and either localised or generally diffused. The "acute" form is due to a micro-organism entering the cavity through wounds from the

outside or from the abdominal organs; or any condition leading to perforation of the stomach, bladder or bowels may produce it; it may supervene after childbirth, and in such an event is often fatal.

Periwinkle, an edible gasteropod small snail, of the genus *Littorina*. They are to be found on most coasts of the world, and, in England, are generally known as "winkles."

Periwinkle, the popular name of a genus (*Vinca*) of flowering plants of the natural order Apocynaceae, indigenous to Southern Europe. They are trailing plants, with deep-coloured evergreen leaves and blue flowers, varying to white in the larger varieties. Familiar garden species are *Vinca major* (found wild in Britain though it is in reality a naturalized escape) and *Vinca minor*.

PERIWINKLE (*Vinca minor*)

Perjury, the misdemeanor of false swearing in a judicial proceeding before some competent tribunal. To constitute perjury, the swearing must be on some point which is material to the issue or cause before the court. It is punishable in England with penal servitude up to seven years or imprisonment for two years with or without hard labour. Subornation of perjury, or procuring another to commit perjury, is punished as perjury. Giving false evidence before an arbitrator, or swearing a false affidavit before a commissioner for oaths are statutory perjuries. The term false swearing (e.g., making a false affirmation to procure a marriage licence) applies to false oaths not taken in the course of judicial proceedings.

Perkin, Sir William Henry, British chemist who first produced the aniline dyes and laid the foundations of the modern coal-tar dye industry. (1838-1907).

Pern, district of the U.S.S.R., producing many minerals—gold, gems, copper, iron, salt, coal, marble, etc. Area 127,500 sq. m. Pop. 4,000,000. Its capital, Pern, stands on the R. Kama. It is a university town, and its industries include tanning, distilling, copper founding, and the making of soap, candles, matches, rope and pottery. Pop. 170,500.

Permalloy, an alloy of about 80 per cent. iron, with remarkable magnetic properties, used for telephone apparatus.

Pernmanganates, compounds of permanganic acid, a manganic acid with a base. Permanganic acid or hydrogenpermanganate is obtained from magnesium by decomposing its barium salt in sulphuric acid. Permanganate of potash is much used as a mild antiseptic and disinfectant.

Permian, the geological strata forming the top of the palaeozoic deposits, appearing in England in the narrow band of magnesian limestone which stretches from Sunderland to near Nottingham, and in the red sandstones of Cumberland, S. Devon, and elsewhere. Permian times were conspicuous for great volcanic activity and mountain-building movements, as well as the development of reptilian forms of life.

Permitted Hours, those during which, in England and Wales, intoxicants may be sold. By the Licensing Act, 1921, these are: outside the Metropolis, 8 hours each weekday (which licensing justices may extend to 8½), beginning not later than 11 a.m. and ending not later than 10 p.m., with a break of at least two hours after noon; in the Metropolis, 9 hours on each weekday, between 11.30 a.m. and either 10, 10.30 or 11 p.m., as the local justices decide. On Sundays, Christmas Day

and Good Friday, the limit is everywhere 5 hours—2 hours between noon and 3 p.m., and 3 hours between 6 and 10 p.m. In Wales and Monmouthshire Sunday opening is forbidden.

Permutations, in mathematics, the number of ways of arranging the members of a group when a certain number only are to be selected and the order of selection counts; and the mathematical processes and formula by which the answer is reached. The formula used is nP_r , which indicates the number of arrangements of n things taken r at a time. This is elaborated into the form $n \times (n-1) \times (n-2) \times \dots \times (n-r+1)$ where n represents the number of things and r the number which are to be selected. Thus if there are n things, 2 only are to be selected, and the order of selection counts, the answer is $n \times (n-1)$ which equals $n \times (n-2+1)$, which equal $n \times (n-1)$. See also **Combinatorial Analysis**.

Permutit Process, a process for softening of hard water by means of zeolite minerals.

Pernambuco, N. Brazil, on a peninsula and near-by island; manufactures cotton, rum and tobacco, and has shipbuilding yards. It is the capital of a state of the name, producing coffee, sugar and cotton. Area (state) 49,550 sq. m. Pop. (state) 2,950,000; (town) 472,750.

Peronne, town of France in dept. Somme, on the R. Somme, 35 m. E. of Amiens. It fell to the Germans in 1914 and 1918, the town being practically destroyed. It was finally captured by the Australians. Pop. 4,500.

Perpendicular, the last period of architecture in England. It originated at the close of the 14th and continued till the end of the 16th Century. Characterized by profusion and minuteness of ornamental detail, its name is derived from the perpendicular lines of the mullions of the windows and the divisions of ornamental panel work.

PERPENDICULAR STYLE WINDOW

Perpetual Motion,

the continuous and uninterrupted motion of a body apart from any new supply of external energy. Although many claims have been made that perpetual motion machines have been invented, none are verifiable. The solution of the problem of perpetual motion requiring as it would an exception to the law of conservation of energy or perfect frictionlessness, is indeed impossible.

Perpignan, a town in the French Pyrenees-Orleans; has a cathedral of the 14th Century and a bourse in Moorish-Gothic, and manufactures wine and brandy. Pop. 72,000.

Perrault, Charles, French man of letters, born in Paris; distinguished as the author of inimitable fairy tales, which have immortalized his name, such as *Puss in Boots*, *Cinderella*, *Bluebeard*, etc., as also *Parallèle des Anciens et des Modernes*, in which his aim was to show that the ancients were inferior in everything to the moderns. (1628-1703).

Persephone, in the Greek mythology, the daughter of Zeus and Demeter, the Proserpine of the Romans.

Persepolis, the capital of the ancient Persian empire, destroyed in 331 B.C. by Alexander the Great. Its ruins, which stand 26 m. from the NW. shores of Lake Urmia, still remain as relics of its former glory.

Perseus, in Greek mythology, the son of Zeus and Danaë, who with the aid of Hermes and Athena cut off the head of the Gorgon, Medusa (q.v.). It was foretold by an oracle that he should cause the death of his grandfather, Acrisius.

Pershing, John Joseph, American general who, after serving in the Spanish war in 1898, was in charge of the Philippine expedition the following year. He was a military attaché in Japan, was in Mexico in 1916, and in 1917 commanded the American troops in France till the end of the World War. (1860-).

Pershore, market town of Worcester-shire, England, on the Avon, 9 m. S.E. of Worcester, with considerable fruit trade and an ancient abbey church. Pop. 3,500.

Persia. See Iran.

Persian Gulf, a great inland sea lying between Arabia and Iran, and entered from the Indian Ocean through the Gulf of Oman; is 650 m. long and from 50 to 250 m. broad. The Arabian coast is low and sandy, the Iranian high. The chief islands are in the W., where also is the Great Pearl Bank. The only river of importance received is the Shatt-el-Arab which brings down the waters of the Euphrates and the Tigris. There are important pearl fisheries.

Persian Wars, three wars between Greece, first in 490 B.C. under Darius, defeated by the Athenians under Miltiades at Marathon; the second, 480 B.C., under Xerxes, opposed by Leonidas and his 300 Spartans at Thermopylae, and defeated by the Athenians under Themistocles at Salamis; and the third, in 479 B.C., under Xerxes, defeated by the Greeks under the Spartan Pausanias at Platæa.

Persimmon, or *Dato-plum*, an

East Indian fruit tree, now grown in Europe and America, of the genus *Diospyros*, bearing edible plum-like fruits and a useful timber. The tree grows to 60 ft. in height, has tapering shining leaves and yellow flowers; the fruit is the size of a small orange.

Personalty, or **Personal Property**, in

English law, covers all that is not "real" property; roughly speaking every kind of property except lands held in fee simple, fee tail, or as life estates. Since the Law of Property Act, 1925, the legal distinction between personalty and real property has been to all intents and purposes abolished, the rules of succession being the same for both.

Personation, the offence of falsely being another person entitled to vote at an election, or the act of voting, or attempting to vote, in the name of another, otherwise than by permitted proxy. The punishment is imprisonment with or without hard labour for up to 2 years.

Perspective, the art of representing surface so that when they are viewed the beholder is affected in the same way as he would be by viewing the objects themselves from a given point. Linear perspective deals with the apparent diminution in size of objects as they recede from the beholder, as is seen in looking along a stretch of railway line. Aerial perspective is the art of giving due diminution to the strength of light, shade, and colours of objects, according to their distance and other circumstances.

Perspiration, or **Sweat**, a fluid excreted by the microscopic sweat-glands, situated in the skin and scattered over the body, especially in the palms of the hand and the soles of the feet. It consists of 99 per cent. water, the remainder being composed of salts (sodium chloride and sodium phosphate) with a small quantity of urea. It is controlled partly by minute muscles and partly by the nervous system. Its function is to regulate the heat of the body, especially when its temperature rises as a result of external heat, of muscular exercise, or of some disease. "Insensible perspiration," however, amounts to about 1 pint a day. Disorders of the sweat glands produce either diminished or excessive perspiration. Excessive perspiration of the feet is known as bromidosis. The disagreeable odour sometimes associated with perspiration is a result of bacterial decomposition.

Perth, the county town of Perthshire, Scotland, of which before the 15th Century it was the capital; on the Tay, 22 m. W. of Dundee; is a beautifully situated town, with fine buildings, the only old one being the restored St. John's Church. Its industries are dyeing and ink-making. At Scone, 2 m. distant, the kings of Scotland were crowned; and the murder of James I., the Gowrie conspiracy, and the battle of Tippermuir are among its historical associations. Pop. 31,800.

Perth, the capital of West Australia, on the Swan R.; has many fine buildings, including Anglican and Roman Catholic cathedrals, a university, and an important observatory. Pop. (including its port, Fremantle) 212,000.

Perth, James Eric Drummond, sixteenth Earl of, British diplomat; entered the Foreign Office, 1900; was first Secretary-General of the League of Nations whose original staff he organised; resigned 1932, and became British Ambassador to Italy, 1933. Succeeded his half-brother as Earl, 1936. (1876-).

Perthshire, county of central Scotland, land, S.E. of the Grampians; noted for its beautiful scenery, especially in the mountainous N. and W., with their many rivers and lakes; the Trossachs and Loch Katrine are world-famed. In the E. is extensive woodland and the Carse of Gowrie, one of the most fertile of Scottish plains. Ben Lawers is the highest mountain, Loch Tay the largest lake. There are Roman and Celtic antiquities; the county is largely resorted to for shooting. County town, Perth. Area, 2,493 sq. m. Pop. 120,800.

Perturbations, in astronomy, irregular deviations in the movement of a heavenly body, due chiefly to the neighbourhood of another planet.

Peru, republic in the W. of South America, lies between Brazil and Bolivia and the Pacific, with Ecuador on the N. and Chile on the S. It consists of a seaboard plain, intersected by rich river courses, in which sugar, cotton and coffee are grown, with the mountainous Andes country and part of the Upper Amazon basin behind. Lake Titicaca is the largest in S. America. The chief articles of export are cotton, copper, petroleum, sugar, and wool. Lima, the capital, is 8 m. inland from its port Callao; has an old cathedral, and is the chief centre of commerce. The government is republican; over three-quarters of the population are Indians or half-breeds.

From the 12th to the 16th Centuries the Incas enjoyed a high state of civilisation and an extensive empire, attaining great skill in the industries and arts. The Spanish conqueror Pizarro, landing in 1532, overthrew the empire; after three centuries of oppression Peru threw off the Spanish yoke in 1821. The

history of the republic has been one of continual restlessness, and a war with Chile, 1879-1884, ended in complete disaster. Area, 482,000 sq. m. Pop. (est.) 6,150,000.

Perugia, Italian city on the right bank of the Tiber, 127 m. N. of Rome, with a cathedral of the 15th Century, university, observatory and library, is rich in art treasures and antiquarian remains. It was the centre of the Umbrian school of painting. Woollens and silks are produced. Pop. 82,500.

Perugino, his proper name Pietro Vannucci, Italian painter, born near Perugia; studied with Leonardo da Vinci at Florence; was one of the teachers of Raphael, painted religious subjects, did frescoes for churches that have nearly all perished, a "Christ giving the Keys to Peter" being the best extant. There are five paintings by him in the National Gallery, London. (1446-1524).

Peruvian Bark,

or **Jesuit's Bark**, an old name for one of the many different kinds of cinchona (q.v.), and so named from its being imported from Peru.

PERUVIAN BARK

Pescadores,

or **Bokoto**, group of small Japanese islands, between Formosa and China. Millet, rice, etc., are grown, and there are important fisheries. Area about 60 sq. m. Pop. c. 70,000.

Peseta, a Spanish silver coin, of the approximate value at par of 9½d., containing 100 centesimos. The exchange value (1933) is about 3d.

Peshawar, capital of the NW. frontier Province, British India, 10 m. from the entrance of the Khyber Pass, on the Kabul R.; a military station of first importance. Pop. 122,000.

Peso, name of the monetary unit of, among them Argentina (par value, 1s. 8½d.; 1933 exchange value, 1s. 0½d.); Chile (par value 6d.; 1933 exchange value, 2d.); Colombia (par value 4s.); Cuba (par value 4s. 1d.); Mexico (par value 2s. 0½d.); Paraguay (par value 4s.); Uruguay (par value 4s. 3d.); 1933 exchange value, 1s. 8½d.) and the Philippine islands (par value, 2s. 0½d.; 1933 exchange value 2s.). It is usually divided into 100 centavos.

Pessimism, in philosophy the teaching that the universe is fundamentally evil, and that human life is rather a misfortune than a good. Traces of it are found in the Old Testament, especially in the Book of Ecclesiastes; and it is one of the mainsprings of much Indian religious thought, reaching its highest expression in Hinayana Buddhism. In modern times it was taught by several German philosophers, notably Schopenhauer and Hartmann.

Pétain, **Henri Philippe**, French general. Joining the army in 1878, he was in charge of the 4th Brigade at the start of the World War; in September, 1915, he commanded the 33rd Corps, and was prominent in the Champagne offensive; he led the defence of Verdun in February, 1916, and in 1917 succeeded Nivelle in command of the armies of the north. In 1918, when Foch took command of all the Allied troops, Pétain was made general of France and commander-in-chief of the French armies, and headed the troops in Morocco in 1925-1926. (1858-).

Petard, a cone-shaped explosive machine for bursting open gates, barriers, etc., made of iron and filled with powder and ball; in use in the 16th Century. It was fired by a fuse.

Petchora, the largest river in northern Russia, rises in the Ural Mts., and flows N., W. and N. to enter the Arctic Ocean by a large, island-studded estuary, after a course of 1,000 m.

Peter III., Czar of Russia for a few months in 1762; a grandson of Peter the Great. He was murdered as the result of a plot headed by his wife Catherine, who succeeded him. (1729-1762).

Peter I., first King of Yugoslavia, born at Belgrade; fought for France in the War of 1870; led the North Bosnian rising, 1874-1876; and was placed on the Serbian throne after the assassination of King Alexander Obrenovich in 1903; became ruler of Yugoslavia on its formation in 1918. (1844-1921).

Peter, St., originally called Simon, was a fisherman on the Sea of Galilee; one of the first called by Christ to become a disciple. He was the principal figure in the history of the early Christian church, but was soon eclipsed by Paul. Tradition has little to tell of him except that he finished his career by martyrdom, being crucified upside down in the city of Rome. He is represented in Christian art holding the keys, and a sword in symbol of his martyrdom. The two epistles under his name in the New Testament are of disputed authorship; it is now generally agreed that the second, at any rate, is not his. Feast, June 29.

Peterborough, city in Northamptonshire, England, on the Nen, on the edge of the Fen country, 76 m. N. of London; has an old town hall, manufactures of farm implements, and a trade in malt and coal; its cathedral is one of the finest in Britain, of varied architecture, and was restored in 1890. Pop. 46,000. The area surrounding the city, known as the Soke of Peterborough, was separated from Northamptonshire in 1838 to form an administrative county by itself. Area, 83 sq. m. Pop. 51,850.

Peterborough, manufacturing town of Ontario, Canada, 70 m. N.E. of Toronto. Lumbering, flour milling, the making of canoes, agricultural implements, furniture, machinery, etc., are among its industries. Pop. 22,300.

Peterhead, a seaport on the E. coast of Scotland, 30 m. N.E. of Aberdeen; built irregularly of reddish granite; is the seat of a convict prison; the chief industry is herring-fishing. Pop. 12,600.

Peterhof, a town on the Gulf of Finland, 18 m. W. of Leningrad, with a palace of the Czar built in 1711 by Peter the Great. Pop. c. 9,000.

Peterloo, Massacre of, name given to a gathering in 1819 of workers in St. Peter's Field, Manchester, to demand Parliamentary reform. It was dispersed by the military at the sacrifice of 13 lives and the wounding of 600 people, a proceeding which excited widespread indignation.

Peter's, St., church on the Vatican hill at Rome, and the scene of most public Papal functions; built over the alleged tomb of St. Peter, and on the site of the basilica erected by Constantine and Helena in 306. The present building was begun in 1450, and finally consecrated by Urban XIII. in 1626. It is the largest and grandest church in Christendom, covers an area of over 26,000 sq. yds., the interior of it in length being 206 yds., the transept 150 yds., the nave 150, and the dome 466. It contains 30 altars, and is adorned with numerous statues and monuments.

Peter's Pence, an annual tribute of household in England to support the chair of St. Peter at Rome, which continued more or

less to be levied from the end of the 8th Century till the days of Elizabeth, when it ceased. The name is still applied to the voluntary contributions collected from Roman Catholics in England and elsewhere for the support of the Holy See.

Peter the Great, Emperor of Russia, son of the Czar Alexis, born in Moscow; succeeded to the throne as part ruler in 1682, and as sole ruler in 1689; organised a Europeanised army, and later a navy, with the help of Western artificers. From 1697 to 1698 he visited the countries on the Baltic and England, working as a shipwright in the Dutch yards, and finally taking back with him an army of mechanics. On his return he vigorously reformed the Russian press, schools, and church, introduced European manners and literature, and encouraged foreign trade. In 1700 he began a long contest with Sweden, marked first by many defeats, notably that of Narva, then the seizure of Ingria, and the founding of the new capital, St. Petersburg, 1703, the victory of Pultowa, 1712, seizure of the Baltic provinces and part of Finland, 1713, and finally by the peace of 1721, which ceded the conquered territories to Russia. In 1722 war with Persia secured him three Caspian provinces. His son Alexis was put to death for opposing his reforms. (1672-1725).

PETER THE GREAT

Peter the Hermit, a monk, born in Amiens, whose preaching kindled the enthusiasm in Europe which led to the first Crusade, in which he himself took part. The first detachments were defeated before reaching Palestine, the fifth army suffered disastrously before Antioch. He afterwards founded a monastery near Liège, where he died. (1050-1115).

Petiole, the leaf-stalk of a plant, the portion joining the stem to the blade. Generally half cylindrical, often channelled above; in some monocotyledons it is cylindrical, and in others it is a sheath.

Petition, a request for the redress of a grievance. The right to petition Parliament has been unquestioned since the expulsion of the Stuarts; the petition may be addressed to either Lords or Commons, and must conform with the regulations of the House addressed. Separate sheets of signatures may be attached, but at least one signature must be present on the sheet containing the actual petition. An election petition against a member's return in the case of an improperly conducted election is addressed to two judges of the King's Bench division.

Petition of Right, a petition presented to and accepted by Charles I., by the Commons in 1628, seeking redress for certain grievances, including taxation or levying of money without consent of Parliament, imprisonment without cause shown, billeting of troops and recourse to martial law in time of peace. The name is also applied to a claim for damages or debt made by a subject against the government, since the Crown in Great Britain cannot be sued until its own consent has been obtained by a fiat of the Attorney-General.

Petitot, Jean, Swiss miniature-painter in enamel, born at Geneva. He worked for some time in England under Charles I., and later went to France with Charles II., working there for Louis XIV., and returning home after the revocation of the Edict of Nantes. He was probably the greatest of all painters in enamel, using many new colours in his art. (1607-1691).

Petrarch, Francesco, Italian lyric poet, born in Arezzo, in Tuscany;

spent his youth in Avignon; intended for the profession of law. His sonnets in praise of Laura, a lady he met in 1327, have done most to immortalise him. After travel in France and Germany he retired in 1337 to the valley of Vaucluse, where he composed most of his poems, and in 1341 was crowned laureate in the Capitol of Rome. After moving from place to place he settled in Arqua in 1370, where he died. His Latin works include an epic on the Second Punic war, Eclogues, Epistles in verse, and Letters of value, giving the details of his life. (1304-1374).

PETRARCH

Petrel, a family, including over 100 species, of sea-birds, known as the Procellariidae. The subfamily Pelecanoidinae includes the Diving Petrels, birds which dive into and rise from the sea in search of their prey without closing their wings. The True Petrels are included in the sub-family Procellariinae. Shearwaters found in British waters are species of True Petrels. So are the Fulmar Petrel (*Fulmarus glacialis*) and the "Mother Carey's Chickens," two of which, the Storm-Petrel (*Procellaria pelagica*) and Leach's Fork-Tailed Petrel (*Oceanodroma leucorhoa*) also breed on British shores.

Petrie, Sir William Matthew Flinders, British archaeologist after explorations at Stonehenge, surveyed the pyramids and temples of Gizeh in 1881-1882; excavated for the Egyptian Exploration Fund Nankratis, Am, and Defenneh; achieved many other important excavatory works in Palestine and elsewhere. (1853-).

Petrifaction, the process by which animals or plants are so acted upon by chemical influences from minerals as to turn them into a solid stone-like substance which maintains their shape and form. See Fossil. A national park in Arizona, U.S.A., includes a "Petrified Forest" of coniferous trees.

Petrograd, the name given in Russia to St. Petersburg at the start of the World War. It is now called Leningrad (q.v.).

Petrol, also called motor spirit or benzine, a fraction collected in the refining of petroleum, and, as it forms an explosive mixture with air, used as the source of power for motor-car and other internal combustion engines; also for carburetting coal-gas, and for dry cleaning. Duties on the sale of the enormous quantities of petrol used for motor-cars are one of the chief sources of revenue of many governments, including those of Great Britain and the States of the U.S.A.

Petroleum, a thick, greenish-black, unpleasant-smelling liquid occurring in large subterranean deposits in the United States, Iran, Iraq, Rumania, Russia, the East Indies and a few other localities. It is a complex mixture of hydrocarbons, together with small quantities of nitrogen and sulphur compounds; the actual composition varies from district to district. Various opinions have been held as to the origin of petroleum, the commonest view maintaining it to represent the decayed remains of microscopic marine organisms. It is extracted by drilling holes or wells through the overlying rock until layers of oil are reached. Sometimes the petroleum is under great pressure and spurts up from the well as a "gusher," but after a time the flow ceases and the gusher becomes an ordinary well from which the petroleum has to be

raised by pumps. The crude petroleum is refined by a process of distillation, advantage being taken of the fact that the various constituents of the oil have different boiling-points. The principal fractions into which the natural petroleum is thus separated are light naphtha, petrol, heavy naphtha, paraffin oil or lamp oil, lubricating oil, "vaseline," and paraffin wax. The residue is a black, pitch-like substance known as "petroleum pitch," used in road-making.

Petrology, a branch of geology dealing with the mineral and chemical composition of rocks, including the changes they have undergone through physical and other agencies. Microscopic examination and chemical analysis are the usual methods pursued.

Petty Officers, a grade of non-commissioned officers in the Navy, corresponding in function and responsibility to non-commissioned officers in the army.

Petty Sessions, a magisterial court trial, without a jury, of trivial offences, or for inquiry into more serious ones before committing to a higher court. A petty sessions court consists of at least two justices of the peace (q.v.) or a police or stipendiary magistrate, or the Lord Mayor or an Alderman of the City of London.

Petunia, a garden plant of the family Solanaceae, with funnel-shaped flowers and viscous leaves; colours white, blue, purple or violet; from 2-4 ft. in height.

Pevensey, a village in Sussex, England, 4 m. from Eastbourne, close by the landing-place of William the Conqueror in 1066; it has the ruins of an old Norman Castle. Pop. c. 800.

Pewter, originally a tin-lead alloy containing a proportion of about one-fifth lead; but the term is now often applied to tin alloys containing small quantities of copper and antimony. It is used mainly for making drinking vessels, plates, and other table-ware.

Pforzheim, a town in Baden, Germany, in the N. of the Black Forest; manufactures gold and silver ornaments, and has chemical and other industries. Pop. 80,000.

Phædra, in Greek legend, the wife of her stepson of making improper advances to her. He was slain while hunting, and after his death his innocence became known to his father and Phædra made away with herself. The theme has been dramatized by Euripides and Racine.

Phæthon, (i.e., the shining one), in Greek mythology, the son of the Sun, or Helios; persuaded his father to allow him for one day to drive the chariot of the sun across the heavens, but was too weak to check the horses, so that they rushed off their wonted track and nearly set the world on fire, whereupon Zeus transfixed him with a thunderbolt. The aridity of the Sahara was said to be due to his careless driving.

Phæton, an open four-wheeled carriage whose hood is adjustable; the name has been extended to early motor-cars whose bodies were built on a like principle. They have now disappeared.

Phagocytes, cells in the blood, especially the white corpuscles or leucocytes, which absorb and digest disease bacteria and other undesirable foreign elements in the blood stream.

PETUNIA

Phalanger, a small Australian marsupial of which several species exist, including the flying phalanger, a bat-like species, the koala (q.v.) and a small species about 8 in. in length, the dormouse phalanger. They are frequently called opossums.

Phalanx, among the Greeks a body of spears and short swords, standing in line close behind one another, generally 8 men deep; it was brought to perfection in the Macedonian armies of Philip and Alexander the Great, but gave way before the Roman formation based upon the legion.

Phalaris, a tyrant of Agrigentum, in Sicily, in the 6th Century B.C., alleged to have roasted the victims of his tyranny in a brazen bull.

Phalarope, genus of birds of the plover species (*Phalaropus lobatus* and *hyperboreus*) visit Britain. The former, the Grey Phalarope, breeds in the Arctic; it has a straight, thin, pointed bill. The latter, which sometimes breeds off the Scottish Islands, is known as the Red-necked Phalarope. Its plumage is dark grey with white marks about the neck.

Phallus, the male generative organ, or a symbol thereof, especially as an object of worship representing the generative powers of nature. Phallic worship was and is believed by many peoples to be desirable or even necessary for inducing fertility in flocks and herds, and in the soil. It is still widely practised in India, especially by Siva-worshippers or Saivas.

Phanerogamia, a great division of including all flowering plants, as opposed to Cryptogamia, or non-flowering plants. They are themselves divided into the two classes of angiosperms, whose seeds are contained in an ovary, and gymnosperms, or naked-seeded plants.

Pharaoh, a title given to the kings of ancient Egypt, derived from the name of the sun-god Phra, whose earthly representatives they were considered to be.

Pharisees, a Jewish sect, which arose about 150 B.C., who in opposition to the Sadducees (q.v.) insisted on the authority of tradition as well as of the written Mosaic law. They maintained the reality of a spiritual world, and kept aloof from nationalist politics. They came into strong conflict with Jesus, who is shown in the New Testament as repeatedly denouncing them for hypocrisy.

Pharmaceutical Society of Great Britain, an organisation founded in 1841 to safeguard the interests of chemists and druggists and advance the studies connected with their profession. It conducts examinations for students of pharmacy, success in which is a condition of the registration on which the right to use the title Pharmacist depends. It also maintains research laboratories.

Pharmacopoeia, an official list of drugs with tests for determining their purity and instructions as to the doses to be administered. Since 1858 the General Medical Council has published from time to time a book called the *British Pharmacopoeia*, containing a list of medicines, etc., which is deemed by Statute to be the Pharmacopoeia of Great Britain and Ireland.

Pharmacy, the art or practice of preparing, compounding, and preserving medicines, and of them according to the prescriptions of medical practitioners. Chemists and others who practise the art in England must be registered under the Pharmacy Acts. Only those

approved by the Pharmaceutical Society of Great Britain may use the title Pharmacist.

Pharos, an island of ancient Egypt, off Alexandria, on which the first lighthouse was erected by Ptolemy Philadelphus in 48 B.C.

Pharsalia, a district in the N. of Greece, the southern portion of the modern province of Larissa; was the scene of Caesar's victory over Pompey, 48 B.C.

Pharynx, a muscular membranous pouch at the back of the nasal cavities, mouth and larynx, extending from the base of the skull to the cricoid cartilage; it is continued below the oesophagus, and connects above with the nasal passages, mouth, larynx and Eustachian tubes. Inflammation of the mucous membrane of the pharynx (pharyngitis) may be merely due to an ordinary cold; but it may be the sequel to diphtheria or scarlet fever. Hoarseness or chronic pharyngitis may be due to strain on the vocal chords, to excessive smoking, or to alcohol.

Phases of the Moon, are the changes in the appearance of the moon's disc consequent upon variations in the area of the illuminated portion seen from the earth; from new moon (when none is visible), through first quarter (when the right-hand crescent is visible), full moon (when the whole is visible), and last quarter (when the left-hand crescent is visible), to new moon the time is 29 days 12 hours 44 minutes 2½ seconds.

Pheasant, bird of the family Phasianidae, of which the *Phasianus colchicus*, native to SE. Europe, and bred in Great Britain as a game bird, is the type. The male bird is brilliantly coloured in blue, brown and green, with red wattles; the female is a dull, mottled brown.

An allied species is the Argus Pheasant (*q.v.*) of Malaysia. The pheasant-shooting season in Britain extends from Oct. 1 to Jan. 31.

PHEASANT (MALE)

Phenacetin, a white crystalline solid (temperature-reducing) drug, having the advantage of being non-toxic.

Phenol, or Carboic Acid, a crystalline substance which turns pink on exposure to air, obtained as one of the products in the distillation of coal tar; in solution and mixed with powders it is used as a disinfectant; from phenol, picric acid, many dyes and dyes are manufactured.

Phenomenon, in philosophy, sense-to real existence, or the noumenon. All that is attainable in human experience is necessarily phenomenal, since man has no means of attaining real existence through his senses or thoughts, though he may or may not have by other spiritual faculties.

Phi Beta Kappa, a society founded in 1776 as a student association at William & Mary College, Virginia, U.S.A., in imitation of which various other student societies, fraternities, and "sororities" have grown up at nearly all American universities, mostly under titles which, like that of the parent society, consist of three letters of the Greek alphabet.

Phidias, the greatest sculptor of ancient Greece, born in Athens; flourished in the time of Pericles, and was appointed by him to direct the works of art projected to the beautifying of the city. The chief work that he superintended was the erection of the Parthenon, much of which he himself adorned; of the statues he executed, the most

famous were one of Athena of Ivory and gold for the Parthenon, and a colossal one of Zeus, his masterpiece, also of Ivory and gold, for Olympia; he died while in prison on a charge of impiety, 432 B.C.

Philadelphia, largest city in Pennsylvania, and third largest of the U.S.A., on the Delaware R., 100 m. from the sea and 90 m. by rail SW. of New York; its splendid public buildings include the town hall, of white marble; a white masonic temple and Government offices of granite, and the Mint; there is a university. The manufactures include leather goods, carpets, cigars and cigarettes, sugar refining, and chemicals. Founded by William Penn in 1682, it was the central point of the War of Independence; the first Congress met here, and the Declaration of Independence was signed (1776) in a building still standing; here too the Federal Union was signed (1778) and the constitution drawn up (1787), and from 1790 to 1800 it was the capital of the United States. Pop. 1,951,000.

Philadelphia, ancient city of Asia Minor, in Lydia, named after Attalus Philadelphus of Pergamum. Its site is now occupied by Ala Shehr.

Philæ, an island of syenite stone in the Nile, near Assuan, in Nubia, 1,200 ft. long and 50 ft. broad; is almost covered with ancient buildings of great beauty, among which is a temple of Isis, with a great gateway dating from 361 B.C.; these are now submerged owing to irrigation works which maintain the river at a high level.

Philately, the study of postage stamps. As a hobby it sprang into favour soon after the issue of the first postage label on May 1, 1840. On that day the famous "Penny Black" of Great Britain came into existence. Philatelists are of two kinds, those who collect any and every sort of stamp and those who concentrate upon a definite area or type. Apart from the actual varieties sought for, there are added considerations of minute colour shades, eccentricities of printing, differences of perforation, varying kinds of paper, etc. One of the most famous collections of postage stamps was that in the possession of the late King George V.

Philby, Harry St. John Bridger, English explorer; born in Ceylon. In charge of the British mission to Central Arabia, 1917-1918, he crossed Arabia from Uqair to Jidda, being the first European to visit South Nejd. In 1930-1932 he returned to Arabia, crossing the Rub' al Khali desert. His published works include *The Heart of Arabia*, 1922. (1886-)

Philemon, Epistle to, shortest book of the New Testament, a letter by Paul to a member of the Church at Colossae on behalf of a slave, Onesimus, who had deserted his service.

Philip II., known as Philip Augustus, King of France, succeeded Louis VII. in 1180. His grand aim was to secure to himself some of the English possessions in France; his alliance with Richard of England in the third crusade ended in a quarrel; an exhausting war lasted till 1199. On Richard's death Philip supported Arthur against John of England in his claim to Anjou, Maine, and Touraine. After Arthur's murder, the capture of Château Gaillard in 1204 gave him possession of these three provinces, with Normandy and part of Poitou. The victory of Bouvines, 1214, secured his throne, and the rest of his reign was spent in internal reforms and the beautifying of Paris. (1165-1223).

Philip IV., called the Fair, King of France, succeeded his father Philip III., in 1285; by his marriage with Joanna of Navarre added Navarre, Champagne, and Brle to his realm. His fame

rests on his contest with Pope Boniface VIII. over his attempted taxation of the clergy, in which his envoy, de Nogaret, imprisoned the Pope. In 1305 after Boniface's death he made Clement V. Pope, kept him at Avignon, and so commenced the 70 years' captivity; he forced Clement to decree the suppression of the Templars, and became his willing instrument in executing the decree. He died at Fontainebleau. (1268-1314).

Philip VI., King of France, succeeded Charles IV. in 1328; Edward III. of England contested his claim; thus began the Hundred Years' War between France and England, 1337. The French fleet was defeated off Sluys in 1340, and the army at Crécy in 1346; a truce was made when the war was followed by the Black Death. The worthless king afterwards purchased Majorca. (1293-1350).

Philip, King of Macedon, the father of Alexander the Great, usurped the kingdom in 360 B.C.; entered on a series of aggressive wars, making expeditions into Thrace and Thessaly, and at length was appointed by a league of Greek cities commander-in-chief in a projected war against the Locrians, but the Athenians and Thebans opposed his coming. The defeat of their armies at Chaeronea, 338 B.C., placed all Greece at his feet. While preparing an expedition against Persia, he was assassinated at Aegae. (382-336 B.C.).

Philip II., King of Spain, only son of the Mary Tudor in 1554, and spent over a year in England. In 1555 he succeeded his father in the sovereignty of Spain, Sicily, Milan, the Netherlands and Franche-Comté; a league between Henry II. of France and the Pope was overthrown, and on the death of Mary he married the French princess Isabella, and retired to live in Spain, 1559. He encouraged the Inquisition in Spain, and introduced it to the Netherlands; the latter revolted, and the Seven United Provinces achieved their independence, after a long struggle, in 1579. His effort to overthrow Protestant England ended in the disaster of the Armada, 1588. His last years were embittered by the failure of his intrigues against Navarre, raids of English seamen on his American provinces, and by loathsome disease. (1527-1598).

Philip V., grandson of Louis XIV., first Bourbon king of Spain; inherited his throne by the testament of his uncle Charles II. in 1700. The rival claim of the Archduke Charles of Austria was supported by England, Austria, Holland, Prussia, Denmark, and Hanover; but the long War of the Spanish Succession terminated in the peace of Utrecht, and left Philip his kingdom. After an unsuccessful movement to recover Sicily and Sardinia for Spain, he joined England and France against the Emperor, and gained Sicily for his son Charles III. He died an imbecile at Madrid. (1683-1746).

Philip, St., the apostle, a native of Bethsaida of Galilee, one of the first followers of Jesus, probably from his name, a Greek. According to Polyrates he laboured and died at Hierapolis in Phrygia.

Philippeville, a seaport of Algeria, in Constantine province. It has a good harbour and exports the products of the district—dates, sparto grass, grain, cotton, iron, etc. Pop. 66,000.

Philippi, a Macedonian city, founded by Philip of Macedon in 42 B.C. by the scene of a victory gained in 42 B.C. by Octavian and Antony over Brutus and Cassius, and the seat of a church, the first founded by St. Paul in Europe, to the members of which St. Paul addressed the *Epistle to the Philippians* (a.v.).

Philippians, *Epistle to the*, an *Epistle* written by St. Paul at Rome during his imprisonment there to the church at Philippi, in Macedonia. Its genuinely Pauline authorship is accepted.

Philippic, the name originally applied to Demosthenes' three great orations against Philip of Macedon, then to Cicero's speeches against Mark Antony; now denotes any violent invective written or spoken.

Philippine Is., a large and numerous group in the north of the Malay archipelago, between the China Sea and the Pacific, Luzon and Mindanao being the two largest islands; are mountainous and volcanic, subject to eruptions and continuous earthquakes. Rice, manila, hemp, sugar, tobacco and fruit are cultivated; the forests yield timber, gums, and resins, and the mines coal and iron, gold and chromium; the chief exports are sugar, hemp, copra, and coconut oil. The aboriginal Negritos are now few; half-castes are numerous; the population is chiefly Malayan, mainly Roman Catholic, but there is a large independent Filipino church. The official language is Tagalog, but English and Spanish are largely used. Discovered by Magellan in 1521, they were annexed by Spain in 1569, and in 1899 ceded to the U.S.A. In 1934 they were granted a form of Home Rule, with the proviso that in 1945 they should become fully independent. The capital is Manila, on the W. coast of Luzon; Cebu, Iloilo, Zamboanga and Laeag are among the largest towns. Area, 114,400 sq. m. Pop. 13,266,000.

Philippopolis. See *Plovdiv*.

Philip the Bold, Duke of Burgundy, fourth son of John the Good, king of France; taken captive at Poitiers 1356. On his return to France he received the duchies of Touraine and Burgundy. On his brother's accession to the French throne as Charles V. he exchanged the former duchy for the hand of Margaret of Flanders, on the death of whose father he assumed the government of his territories. His wise administration encouraged arts, industries, and commerce. (1342-1404).

Philip the Good, Duke of Burgundy, grandson of the above, raised the duchy to its zenith of prosperity, influence and fame. He was alternately in alliance with England, and at peace with his superior, France, ultimately assisting in driving England out of most of her Continental possessions. He captured Joan of Arc in 1430, selling her to the English six months later. (1396-1467).

Philistines, a people, generally believed to have been originally emigrants from Crete, who settled in the coastal plain of Palestine between Joppa and the southern desert, some 40 m. long by 15 m. broad, and whose chief cities were Ashdod, Askalon, Ekron, Gaza, and Gath. They were a trading and agricultural people, continually at war with the Israelites, who eventually subdued them, so that by the Christian era they were practically forgotten.

Phillips, Stephen, English poet, born at Somerton, Oxon.; spent some years on the stage, then devoted himself to literature, producing the poetical dramas *Paolo and Francesca*, *Herod*, and *Ulysses* among others; also published *Margressa* and other volumes of verse. (1868-1915).

Phillipotts, Eden, English novelist; born in India; has written numerous novels, plays, and poems, largely on Devonshire themes, including *The Human Boy*, 1899; *My Devon Year*, 1903; *The Secret Woman*, 1905; *The Broom Squire*, 1932. He collaborated several times with Arnold Bennett. (1862-).

Philology, the science of language; philologists have classified the languages of the world into three main divisions: (1) isolating languages, of which Chinese is typical; (2) Agglutinative languages, where suffixes are added to roots to indicate various relations; (3) inflectional languages, represented by the two groups of the Semitic and Indo-European languages. Comparative philology treats of the kinship of languages, and examines the evidence as to their common origin. For the Indo-European group, for example, which comprises the Sanskrit, Iranian, Armenian, Greek, Albanian, Italic, Celtic, Teutonic and Slavonic groups, a common source has been found in a supposed primitive Indo-Germanic tongue.

Philomela, in Greek legend, daughter and sister of Procne. Tereus cut out her tongue to prevent her exposing him. With her sister Procne she made away with Itys, Tereus' son, and served him up to his father at a banquet. They escaped his vengeance, Philomela by being changed into a nightingale and Procne into a swallow.

Philosopher's Stone, a substance sought for by the ancient and medieval alchemists, supposed to have the power of turning base or cheaper metals into gold. The search for the Philosopher's Stone occupied fruitlessly the attention of alchemists for nearly a thousand years, but in its course led to many important chemical discoveries.

Philosophy, literally "love of wisdom," originally any branch of investigation of natural phenomena, but now usually restricted to an enquiry into the nature of being and of knowledge, and of man's relation with the universe. Its main periods are (1) the Greek, whose greatest figures were, among others, Plato and Aristotle; (2) the Hellenic, when Platonism was combined in a mystical synthesis with elements of Eastern thought; (3) the Medieval or Scholastic, which attempted to reconcile reason with the requirements of Christian theology, and was much influenced by Jewish and Arab speculation; (4) the Modern, beginning with Descartes, Leibniz and Spinoza, flowering in Kant and Hegel, and now endeavouring, in the persons of such thinkers as Bergson and Whitehead, to correlate the enormous body of new material disclosed by modern scientific discovery, and determine its meaning in relation to the intuitive needs and aspirations of man. Apart from the main stream of European philosophy, India and China have philosophical traditions of their own, hardly, if at all, of less value or importance. The present trend of philosophy is a return to idealism, in one of many competing forms.

Philostratus, a Greek writer, born at Lemnos. He taught rhetoric at Athens and Rome, and was a favourite of the Emperor Septimius Severus. His most famous work was a life of the possibly legendary travelling philosopher and miracle-worker Apollonius of Tyana. (c. 175-250).

Philtre, the name given to certain concoctions of herbs, often deleterious and poisonous, supposed to secure for the person administering it the love of the person to whom it was administered. Such love potions were popular in the declining days of Rome, throughout medieval Europe, and have been used even in modern times by the superstitious.

Phiz, the pseudonym of Hablot K. Browne (1815-1882), the illustrator of the first edition of the *Pickwick Papers* of Dickens.

Phlebitis, inflammation of the inner membrane of a vein, due to an extension of inflammation from proximate

tissues. It results in the formation of a thrombus or clot, which if it becomes detached, may lead to serious danger.

Phlogiston Theory, a theory of combustion and related phenomena, which held that all combustible bodies owe their combustibility to the presence in them of a substance which, while not actually fire, is the "principle" of fire; this substance is phlogiston, and when a body is burned the phlogiston is taken up by, and absorbed into, the air, the ash residue of the body being left. Its overthrow was the work of the celebrated French chemist, Lavoisier, who obtained experimental evidence that when a substance burns, it combines with a gas in the air. Priestley, in 1774, found a method of obtaining this active constituent of the air in the pure state, and Lavoisier was then able to show that the increase in weight during combustion was due to the combination of the burning substance with the active part of the air. This part he afterwards called oxygen (q.v.), its properties being subsequently determined.

Phlox, a genus of ornamental plants of the natural order Polemoniaceae, mostly perennial, with salver-shaped white, red, blue, or variegated corollas. There are 60 species, native to N. America, and Siberia, and in cultivation many varieties have been produced. They are extensively cultivated in Britain as border and bedding plants, the best known of the half-hardy annuals being *Phlox Drummondii*, of Texas, discovered by Drummond in 1836.

PHLOX

Phnôm-Penh, town and capital of Cambodia, French Indo-China, at the junction of the Mekong and Tonle-sap rivers; there is a large trade in rice, fish, pepper, etc. Pop. 102,700.

Phocis, a province of ancient Greece, W. of Corinth; was traversed by the mountain range of Parnassus, and contained the oracle of Apollo at Delphi; allied to Athens in the Peloponnesian War, the Phocians were crushed in the "Sacred War" after ten years' fighting, by Philip of Macedon, 346 B.C.

Phœbus (i.e., the radiant one), an alternative native name for the Greek god Apollo (q.v.).

Phœnicia, a country on the E. shore of the Levant, stretching inland to Mount Lebanon, embracing 200 m. of coast, with the towns of Tyre, Sidon, Gebel and Arad. The Phœnicians, a Semitic people of remarkable industry and enterprise, emerge from history with Sidon as ruling city about 1500 B.C. and reach their zenith under Tyre 1200-750 B.C., thereafter declining, and ultimately merging in the Roman Empire. Their manufactures, purple dye, glass ware and metal implements were in demand everywhere; their ships carried the merchandise of every country, and their colonists settled all over the Mediterranean, Aegean and Euxine, and even in Africa and in Britain. Her greatest colony was Carthage, the founding of which (825 B.C.) sapped the strength of the mother-country, and which afterwards usurped her place, and contended with Rome for the mastery of the world. The alphabet from which our own has developed has been claimed as a Phœnician invention.

Phœnix, a fabulous bird supposed at the end of certain cycles of time to immolate itself in flames, and rise renewed in youth from the ashes.

Phœnix, capital of Arizona, U.S.A., on the Rio Verde. It is an agricultural centre, with a trade in fruit and livestock. Pop. 48,000.

Phoenix Park, a large public park in Dublin, Ireland, N. of the Liffey, one of the finest "lungs" of any European capital; it contains the Dublin Zoo and the official residence of the President (formerly the Viceregal Lodge). It was the scene of the murder of Lord Frederick Cavendish in 1882.

Phonetics, that part of the study of speech sounds and their varieties, and with the signs or letters used to represent them in writing. It includes the study of accent, stress or emphasis, tone of voice, and the quantity or duration of a sound. Speech sounds are divided into (1) vowels, produced by the vibration of the vocal chords modified in the pharynx by the tongue and the soft palate without audible friction; and (2) consonants, produced either by audible friction, or by the stopping of the breath in some parts of the mouth or throat.

Phonograph, a device for the mechanical reproduction of

sound-waves, invented by Edison in 1877. It is not different in essential principles from the gramophone (*q.v.*), but the name phonograph is generally applied to the earlier types of the instrument, especially those with cylindrical reproducing records and external horns.

PHONOGRAPH

or **Carbonyl Chloride**, is a **Phosgene**, colourless gas made by the direct combination of carbon monoxide with chlorine. The action proceeds at a negligible rate in the dark, but takes place quickly in bright illumination, hence the name of the gas (Greek, "produced by light"). Phosgene is extremely poisonous, and has been used in chemical warfare.

Phosphates, the salts of phosphoric acid (*q.v.*). They play a leading part in the chemistry of animal and vegetable life, the most important being the phosphates of sodium, calcium and magnesium. In agriculture the adequate supply of phosphates to plants in the form of manures is a matter of necessity to depleted soils. These phosphatic manures consist, for the most part, of bones, ground bones, mineral phosphates (apatite, phosphorite, coprolites), basic slag, super-phosphates and reduced phosphates, (both prepared by treating broken-up bones with sulphuric acid), bone-ash and phosphatic guano.

Phosphorescence, the phenomenon substances after exposure to light continue to emit light when placed in the dark, it is of practical value in the making of luminous paint (*q.v.*).

Phosphoric Acid, an acid obtained by decomposing bone ash with sulphuric acid. It is a thick liquid used, diluted, in medicine as a stomachic stimulant.

Phosphorus, a non-metallic chemical element belonging to the same group as nitrogen, arsenic, antimony and bismuth. Symbol P; atomic number 15; atomic weight 31.04; it owes its name (Greek, "light-bearer") to its property of shining in the dark with a bluish-green light. Phosphorus is an essential element of living matter, and is an important mineral constituent of bones and egg-shells. Large quantities of calcium phosphate are found as "rock-phosphate" or "phosphorite" in various parts of the world, *e.g.*, Morocco, Algeria and Tunisia. Phosphorus is com-

crystals. The yellow form is excessively poisonous, and takes fire spontaneously in the air at temperatures not far above the average; hence it is kept in air-tight containers or, in small quantities, under water. Red phosphorus is not poisonous when swallowed, though it is toxic like yellow phosphorus if injected into the blood. Phosphine or phosphoretted hydrogen is a colourless, offensive-smelling gas, sometimes produced during the decay of fish and very readily inflammable. Phosphorus sulphide is used in the manufacture of matches.

Photo-chemistry, the study of reactions that are affected by light. It was noticed by Dalton that a mixture of chlorine and hydrogen, stable in the dark, explodes if brought into bright sunlight. Many other examples of chemical reactions accelerated by light have since been discovered (see for example, **Photography**), the efficiency of the light depending upon its wave-length and, therefore, upon the energy associated with it: the shorter the wave-length the greater the energy, so that blue, violet and especially ultra-violet are more efficient than red or yellow.

Photo-electricity. When light is allowed to fall on a metal, electrons are given off from the latter. The extent of the emission varies, but is especially great with potassium. Hence in a photo-electric cell the essential feature is an evacuated glass globe, the inner surface of which (except for a small area to admit light) is coated with a thin film of potassium; the globe contains also a metallic ring which can be maintained at a potential of over 100 volts higher than the potassium. The ring and the potassium are connected to terminals, and when light is allowed to fall on the potassium through the aperture, the electrons emitted pass across the intervening space to the ring. Hence a small electric current is set up, which can be amplified to any desired extent, *e.g.*, to work a switch operating a burglar alarm, or to operate countless other devices. The selenium cell works on the principle that the so-called "metallic" form of selenium (*q.v.*) is a conductor of electricity only when illuminated. Photo-electric cells are finding a varied and steadily increasing application, and are the basis of the "talking-pictures" of the cinema.

Photo-engraving, a process engraving on a metal plate may be made from a photograph. The plate, generally copper, is given a prepared surface, bitumen or asphaltum dust being used for this purpose. A bichromated gelatine negative is then developed on to the plate, which is afterwards etched in a bath of perchloride of iron. The plate thus has on its face an etched design, cut to varying depths according to the light and shade of the gelatine print originally transferred to it. The etching may be finished off by hand if required; it is then given a steel facing.

Photography. Many silver compounds are converted into metallic silver by the action of light, and it is upon this fact that photography is based. The first photographs seem to have been obtained in 1802 by Thomas Wedgwood (1771-1805). Further progress was made by the brothers Niepce and by Daguerre (1789-1851), but present-day processes have developed from the work of the Englishman, Fox Talbot. The use of glass plates for supporting the sensitive film was suggested in 1845 by Niepce de St. Victor, and in 1871 R. L. Maddox put the suggestion into operation. In 1889 G. Eastman produced the first roll-films, and two years later improved technique by inventing daylight-loading.

The film on a photographic plate or "film" consists of gelatine in which are suspended minute granules of silver halide, i.e., silver bromide and iodine. On exposure to light, a small quantity of silver halide in the immediate neighbourhood of the nucleus is reduced to metallic silver, the bromide or iodine being taken up by the gelatine. The image so formed is, however, invisible to the naked eye if the exposure is short.

The next stage is development, which consists of immersing the exposed plate in a solution of a suitable reducing agent (e.g., alkaline pyrogallol or hydroquinone); the function of the developer is to continue the reduction of the silver halide, and since this process takes place more rapidly where the initial formation of silver was greater, the image gradually appears but with the light-values reversed, i.e., more silver is deposited in those parts of the image where illumination was great than in those less brightly illuminated. The image is consequently negative.

Development is interrupted when the image has reached the desired depth, and the plate is immersed in a "fixing" solution; this is a slightly acid solution of "hypo" (sodium thiosulphate) which dissolves out the unchanged silver halide and so renders the image stable to light. After drying, positive images may be obtained by exposing silver-halide-coated paper to light through the negative, developing if necessary, and fixing as before. See also **Camera**.

Photometer, an apparatus for comparing the intensities of differing light sources. A number of differing devices are in use, one of the best known being Bunsen's, in which a sheet of paper with a spot of grease on it is placed between two lights in varying positions until its appearance is the same from either side, the distance of the paper from the light sources being then measured and the intensity calculated from known constant formulae.

Photophone, a device for transmitting sounds on a beam of light, invented in 1878 by Bell and Tainter; it involves the use of a mirror so arranged that it vibrates under sound impulses, and reflects rays to a receiver connected with a stentum cell and telephone.

Photosphere, name given to the luminous atmosphere enveloping the sun.

Photo-synthesis, the building up of from carbon dioxide in plants in the presence of sunlight; the chlorophyll in the green leaves is the active agent in the process.

Phragmites. See **Reed**.

Phrenology. See **Physiognomy**.

Phrygia, a country originally extending over the western shores of Asia Minor, but afterwards confined to its western uplands; famous for its wool, wine, and marble in classical times. The Phrygians were an Armenian people, with an orgiastic religion, and were successively conquered by Assyrians, Lydians, and Persians, falling under Rome in 43 B.C.

Phthisis, or **Consumption**, tubercular disease of the lungs, now generally known as tuberculosis (q.v.).

Phylacteries, strips of vellum inscribed with certain Biblical texts, enclosed in small cases of calf-skin, and attached to the forehead or left arm; they have been used in Jewish worship since the giving of the Mosaic law.

Phylloxera, an insect of the family **Aphidæ**, originating in America, one species of which, *Phylloxera vastatrix*, does great damage to the vine in Europe. The eggs, when hatched in great

numbers, produce galls on the leaves and in the roots. *Phylloxera quercus* is a species which deposits its eggs in the oak tree.

Physical Training, as a method of "keeping fit," while popular on the continent of Europe, has in the British Isles been generally overshadowed by athletics and outdoor games. It is pursued to a certain extent at most schools for both boys and girls, and daily broadcasts from foreign stations possibly induce a few Englishmen and women to perform "physical jerks"; but so far the B.B.C. has given no "physical training" broadcasts, and even the "National Fitness Campaign" of 1937 and after has concerned itself little with the purely "drill" and gymnastic aspects of "fitness," which is familiar to the army as "P.T."

Physician, one who holds a licence from the Royal College of Physicians, to practise medicine. Strictly speaking, a physician differs from a surgeon in that the former prescribes remedies for diseases, while the latter performs operations; but many are qualified in both branches. The General Medical Council regulates the conditions under which persons may enter the medical profession, and keeps a register of those qualified in medicine, surgery and midwifery.

Physicians, **Royal College of**, a body incorporated in 1518 through the exertions of Thomas Linacre, its first president, to license and supervise physicians practising in the neighbourhood of London. It holds examinations, grants diplomas of membership and licentiatehip, and elects fellows; Edinburgh has a separate Royal College of Physicians, associated for examination purposes with two other Scottish medical associations.

Physics, a general term signifying the aggregate of the sciences dealing with such natural phenomena as motion, force, heat, light, sound, electricity, magnetism, elasticity, capillarity, diffusion, solution and change of state. Its scope extends over all properties of matter which are not specifically biological or chemical. Among the physical sciences dynamics (q.v.) has premier place, as its fundamental concepts—matter and motion—are pre-eminently simple and concise.

In the development of physics there has been a continual effort to explain all physical phenomena in terms of the dynamics of matter and ether. Great advances were made in this direction during the 19th Century and great physicists of that period were Laplace, Poisson, Fourier, Fresnel, Young, Faraday, Helmholtz, Hertz, Joule, Maxwell and Gauss. A greater change still took place near the end of the last century with the discovery of X-rays, radioactivity and the ionisation of gases, and modern scientists are conducting active research into the whole domain of high vacuum technique and the properties of the atom.

Physiognomy, the art of judging the character from the face. The creator of this art was Johann Lavater (1741–1801). Lombroso attempted to evolve a criminal type by drawing conclusions as to character from prognathous jaws and other physiognomical peculiarities. Phrenology, an allied study, is an attempt to estimate the intellectual faculties and moral character of the individual by the magnitude and form of several parts of the skull.

Physiography, that branch of geography which studies the earth's natural features and physical configuration. It is closely connected with geology, meteorology and biology, and makes use for its own purposes of the results obtained by those sciences.

Physiology, the study of the functioning of plants and animals, and its significance. After Harvey's discovery, in the 17th Century, of the circulation of the blood, researches were made into the composition of the blood, lymphatic system, respiration, digestion, etc., and studies in metabolism (q.v.) were begun. In the 19th Century the cell-structure of the body, and the importance of oxygen and other gases in the life-process were established. The processes attendant on the breaking up of food-stuffs (metabolism) and digestion received further study, and the working of the glandular system, particularly the thyroid, came to be more generally understood. Pasteur's researches on micro-organisms exploded the theory of spontaneous generation, and the work of Von Baer gave a profound impetus to embryology. In the 20th Century research has concentrated with success on the anatomy and function of the endocrine system.

Piacenza, Italian city on the Po, 43 m. S.E. of Milan; has a cathedral, and a church for which Raphael painted his *Sistine Madonna*; it manufactures silks, cottons and hats. Pop. 64,000.

Pia mater, three which invest the brain and the spinal cord; it is of a delicate vascular tissue.

Piano, properly **Pianoforte**, a musical instrument of the keyboard type, developed from the harpsichord, with its strings struck by hammers instead of being plucked by plectra; the notes can be sustained and the volume of sound varied, effects outside the scope of the harpsichord. Its invention is ascribed to Cristofori, a Florentine, in 1690, two of whose pianofortes are still in existence. The upright piano, strung vertically instead of horizontally, was an invention of the early 19th Century. The modern piano has a compass extending over seven octaves. The automatic player-piano, operating by the propulsion of a perforated paper roll through the instrument, has been developed since 1842.

Piastre, a currency unit of several Eastern countries, including Egypt (par value roughly 2½d.; 100 piastres make one Egyptian pound), French Indo-China (par value 2s.), Syria (par value about 3s. 2½d.), Turkey (par value, about 2d.); 100 piastres make one Turkish pound, or lira; exchange value in 1938, 620 piastres to the pound sterling).

Piauí, a northern state of Brazil, on the Atlantic coast, principally devoted to cattle-rearing. Capital, Teresina. Area, 116,500 sq. m. Pop. 608,000.

Piave, a river in N.E. Italy, rising in Austria and flowing SW. and E. to the Adriatic Sea, N. of Venice. In the World War the Italian line was formed behind the Piave, following the Austrian offensive of 1917; an attack in 1918 failed, and in Oct. 1918 the Austrians were driven back beyond the Piave in complete rout.

Piazza, a square open space surrounded by buildings or colonnades; often improperly applied to a pathway under cover, or an arched walk, and sometimes even to a verandah.

Picardy, a province in the N. of France, the capital of which was Amiens; it is now included in the depts. of Somme, Pas de Calais and Aisne. It was the scene of much fighting in the World War.

Picaresque Novel, a novel dealing with the lives and adventures of rogues and "shady" characters, a particularly popular literary form in the 17th and 18th Centuries. Great examples include Defoe's *Moll Flanders*, Le Sage's *Gil Blas*, and Fielding's *Jonathan Wild*. The Spanish word "pícaro" means a rogue.

Picasso, Pablo, Spanish artist, and with Braque, the founder of Cubism. Born in Malaga, he studied painting in Paris from 1900, being an orthodox painter in his early days. Later he produced work in which straight lines replaced curves and art was geometricised, but in his later work has turned away from the Cubist technique. Real name Pablo Ruiz. (1881-).

Piccard, Auguste, Swiss physicist, born at Lutry (Vaud); became Professor at Brussels University, 1922. To examine electric and atmospheric conditions in the stratosphere, he made the first ascent into it in 1931 by balloon—rising to a height of 51,793 ft. In 1932, with Max Cosyns, he rose from Dübendorf, near Zurich, about 54,120 ft. (1884-).

Piccolo, a small flute, having the same compass as the ordinary orchestral flute, its sounds one octave higher than the written notes.

Picketing, the practice of placing men outside a factory where a strike is on in order to prevent workers going on duty. Declared illegal in 1875, the 1906 Trades Disputes Act sanctioned it for purposes of "peaceful persuasion." The Trades Disputes Act of 1927 makes picketing unlawful if carried on in connection with an unlawful strike.

Pickford, Mary, American cinema actress, born at Toronto; from 1920 to 1935 the wife of Douglas Fairbanks, also a film actor; since 1937 of Charles Rogers, also a film actor. Her first screen appearance was at the age of sixteen. (1893-).

Pickle, any foodstuff preserved in vinegar or brine, particularly onions, cabbage, walnuts, cucumbers, and other vegetables. Fish are also largely treated in this way, especially the herring and mackerel.

Picotee, a name given to a variety of carnation in which the edges of the petals differ in colour from the ground tint.

Picric Acid, an acid with a very bitter military high explosive under the name of lyddite or mellinite, made by dissolving phenol ("carbolic acid") in concentrated sulphuric acid and then adding concentrated nitric acid. It is a yellow crystalline solid soluble in water and explodes violently when quickly heated, or struck.

Picts, a race who formerly inhabited eastern Scotland, and possibly the rest of the British Isles; they disappeared as a separate people after the conquest of all Scotland by Kenneth I. (q.v.), the Scottish leader. Their name is supposed to have arisen from their custom of tattooing the skin. The earthworks found in much of Scotland are still commonly called "Picts' houses."

Picture-writing, the method of records in vogue before the invention of syllable or alphabetic writing; both the modern European alphabets and the ideographic signs of the Chinese appear to have developed from it. The earlier Egyptian hieroglyphics are a form of picture writing.

Pidgin (or Pigeon) English, a jargon used in dealings between foreigners ignorant of Chinese and the lower social ranks of Chinese who do not speak Western languages. It is composed of English, Chinese and Portuguese words, arranged in accordance with Chinese syntax.

Piedmont, a district in north-western Italy, formerly a principality ruled by the house of Savoy; sur-

GONDOLA OF
PICCARD
BALLOON

rounded by the Alps, the Apennines, and the R. Ticino, occupies the W. end of the great fertile valley of the Po, a hilly region rich in vines and mulberries, and a mountainous tract, with forests and grazing land intersected by lovely valleys, which send streams down into the Po; textile manufactures are extensive, and wheat, rice, fruits and the vine are grown. Turin, the largest town, was the capital of Italy, 1859-1865. Area of modern department, 11,330 sq. m. Pop. 3,566,000.

Pier, in architecture, a support or pillar on an arch, bridge or beam; also a rectangular narrow projection on a wall to give additional support to a beam or other load. A pier template is a stone cover on a brick pier to distribute the load over the whole section.

Pierce, Franklin, the fourteenth President of the United States, born in New Hampshire, was in early life a lawyer; served in the Mexican War, and was elected President in 1852; his period of office was one of trouble; he supported the States' rights doctrine, and served with the South in the Civil War. (1804-1869).

Pieria, a district in Macedonia, E. of Olympus, inhabited by Thracians, and famous as the birthplace and main seat of the worship of the Muses, thence called Pierides; giving rise to the phrase Pierian Spring as the source of poetic inspiration.

Pieta, the name given to a picture or statue representing the dead Christ in the embrace of His sorrowing mother, accompanied by sorrowing women and angels; that sculptured by Michelangelo, in St. Peter's at Rome, is a famous example.

Pietermaritzburg, capital of South Africa, 73 m. by rail N. of Durban; well situated on the Umsundusi R. Pop. 49,600 (22,500 Europeans).

Piezometer, a device for measuring liquid. It consists of a glass vessel filled with water over a layer of mercury. The liquid to be tested is placed in a long-necked glass bulb, and immersed in the water so that the mouth of the neck is in the mercury; pressure is then applied to the water by a piston, and the pressure on the liquid in the bulb is indicated by the rise of the mercury.

Pig, properly a young swine, but in popular use any swine. The domesticated British breed is a hybrid of the tawny wild boar, which survived in this country until the late 17th Century, and the Chinese pig. The chief British breeds are the White Yorkshire, the large variety of which has a broad snout not turned up, while the Middle variety has a shorter head and a turned-up snout; the Berkshire, which is black with white feet; the Lincoln or curly-coated pig; the Tamworth, with a fine snout and reddish hair; and the Ulster.

Pigeon, a bird of the family Columbidae; the name is practically equivalent to "dove." The largest British species (*Columba palumbus*) is called both Wood-Pigeon and Ring-Dove. Pigeons have somewhat rounded bills and usually long wedge-shaped tails. The bird has been largely domesticated, especially as the homer and carrier pigeon, used for conveying messages in war and sport; this, like all the domesticated varieties, is specialised from the blue rock-pigeon.

Pigott, Richard, Irish journalist, born in Co. Meath, editor and proprietor of *The Irishman* and other papers, notorious as the person who supplied forged documents to the *Times* purporting to involve Parnell in responsibility for the Phoenix Park murders. At the investigation which followed he was convicted of perjury, fled to Madrid and shot himself. (1828-1886).

Pig-sticking, a form of sport developed in India, where it has attained great popularity amongst the finest horsemen, and practised in Central Europe. The prey is the wild boar, a fierce and cunning animal, which is hunted on horseback.

Pika, a genus (*Ochotona*) of rodents of the sub-order Duplicitentata. They are about the size of a guinea-pig, with short ears, no tail, and have the shin-bones united. They are related to the hares and are found in Asia and E. Europe.

Pike, a family (Esocidae) of large voracious fresh-water fish, found in most temperate waters; when young it is called a "jack," has a long flat snout, large mouth, bands of small pointed teeth and a series of strong fixed upright teeth each side of the lower jaw. The colour is grey above and silvery white below. The British species, *Esox lucius*, grows up to 3 ft. 6 in. in length and can weigh over 20 lb.

Pike, a sharp-pointed military weapon from 15 to 20 ft. long, consisting of a long shaft or handle with an iron head; a common infantry weapon before the invention of firearms, and even later, as in the English civil wars, to perform the office later undertaken by the bayonet.

Pilaster, in architecture, a rectangular, particularly one engaged in a wall, or, in other words, a portion of a square column projecting from a wall. If free from the wall, such a column is usually called a pier or pillar.

Pilatus, Mount, an isolated mountain, almost 7,000 ft. in height, at the W. end of Lake Lucerne, opposite the Rigi. A lake below the summit is said to be the last receptacle of the body of Pontius Pilate, hence the adoption of the name.

Pilau, or Pilaf, an Eastern dish of meat and seasoned with spices.

Pilchard (*Clupea*, or *Sardinus pilchardus*), a fish of the family Clupeidae, similar to but plumper than the herring, and common from the Mediterranean to Cornwall; average length 9½ in. The young fish, caught off France and Portugal and tinned in oil, are called sardines. The pilchard fishing for the Italian markets has been in the past one of the chief Cornish industries, but the irregular appearance of the fish has resulted in great reduction in the fleets.

Pilcomayo, a tributary of the Rio Paraguay, in South America, which it joins after a S.E. course of 1,700 m. from its source in the Bolivian Andes. Part of it forms the boundary between Argentina and Paraguay.

Pile Dwelling, an erection on piles in prehistoric man as a habitation. Traces of them are found in the Alpine regions of Europe, and they are still built by primitive peoples in the E. Indies and elsewhere.

Piles, in building construction, are pieces of timber, steel or reinforced concrete material, sunk into ground, especially under water, in order to increase its resistance to vertical loads, or to a lateral force. Timber piles are most widely employed, and are sawn into round, square or hexagonal cross-sections, tapering from the head to the butt. They are driven in by means of a drop- or a steam-hammer.

Piles, or *Hæmorrhoids*, small tumours of the veins in the neighbourhood of the anus; they may be external or internal. Many persons in middle age are troubled to some extent by

this condition, particularly those of sedentary habits who indulge in over-eating and suffer from constipation; and also women who have borne many children. Habitual constipation is, perhaps, the chief cause of piles, but, in some cases, they are a symptom of disease further up in the portal system.

Pileus, the botanical name for the fleshy cap of a mushroom.

Pilgrim, one who travels to a distance from his own land to visit some holy place or shrine. A pilgrimage to Mecca is incumbent on every Moslem during his life. Famous places of pilgrimage by Catholics in Europe at the present day are Lourdes, Loretto, Lisieux, and of course Rome. Recently the ancient English custom of making pilgrimages to the shrine of the Virgin Mary at Walsingham, Norfolk, has been revived.

Pilgrimage of Grace, a peasant rising in the northern counties of England in 1536 against the royal policy of suppressing the religious houses, led mainly by Robert Aske. The rebels succeeded in capturing York, but were afterwards ruthlessly suppressed.

Pilgrim Fathers, the name given to the Puritans, some 100 in all, who sailed from Plymouth in the *Mayflower* in 1620 and settled in Massachusetts to escape religious persecution.

Pilgrim's Progress, *The*, John Bunyan's descriptive allegory of the progress of a Christian through life, written in Bedford gaol and published in 1678.

Pilgrim's Way, an ancient track in southern England, so called because it was used by pilgrims to the shrine of St. Thomas at Canterbury. It runs largely along the bank of the North Downs, from Winchester passing through Farnham, Boxhill, Mersham and West Malling to Canterbury. It appears to have followed the line of an older, perhaps pre-Roman roadway.

Pilgrim Trust, founded in 1930, by an American, in recognition of Great Britain's fulfilment of its obligations since the World War. This gift appropriates the interest on £2,000,000 to British charities selected periodically by trustees whose president is Earl Baldwin. Already the trust has distributed over £500,000.

Pillar, a column (*q.v.*) either used as a support or ornament in a building or, standing alone, as a monument; it may support a statue, as in the case of the Nelson Column in Trafalgar Square, London.

Pillar-Saints, or *Stylites*, a class of Christian recluses who retired to the tops of pillars for purposes of prayer and mortification; the best known was St. Simeon Stylites, subject of a poem by Tennyson. They were confined to the East.

Pillars of Hercules. See *Hercules*.

Pillory, a former instrument of punishment, consisting of a platform, an upright pole, and at a convenient height cross-boards with holes, in which the culprit's neck and wrists were placed and fastened; so fixed, he was exposed in some public place to the insults and noxious missiles of the mob. Formerly in England the penalty of forgery, perjury, &c., it became after the Commonwealth a favourite punishment for seditious libellers. It was last inflicted in London in 1830, and was abolished by law in 1837.

Pilot, one who holds a licence or certificate from a proper authority, authorising him to navigate vessels through certain channels, rivers or roadsteads, or into or out of certain ports. He is taken aboard at a

fixed place and dropped again when the ship is out at sea. Where pilotage is compulsory, the master must employ a qualified pilot unless he himself, or a mate, holds a pilot's certificate. The Corporation of Trinity House controls pilotage matters for the Port of London and the English Channel, and there are local authorities for other districts. One who after prescribed training and tests is granted a certificate to navigate aircraft is also called a pilot.

Pilot Fish, a tropical fish, *Naucrates ductor*, of the family Carangidae, resembling a mackerel; it is greyish-blue and about 1 ft. in length. It is an oceanic fish, associates with sharks and often follows ships.

Pilsen (Czech, *Pilzén*), a town of Czechoslovakia, in Bohemia 52 m. SW. of Prague, famous for its beer and having manufactures also of sugar, machinery, leather, etc. Pop. 114,700.

Pilsudski, *Joseph*, Polish Marshal and politician. Born in Vilna, he was engaged before the War in various illegal nationalist activities, joined the Austrian army against Russia in 1914, in 1918 returned to Warsaw and became commander of the Polish forces and head of the State; in 1920 led the war against Russia; retired in 1923; in 1926 refused election as President, but became Minister for War and virtual dictator; was Prime Minister in 1926 and 1930. (1868-1935).

Pitldown Man, or *Eoanthropus Dawkinsi*, a supposed prehistoric species of man, belief in whose existence is based on the remains of a skull found in 1912 at Pitldown in Sussex by Charles Dawson; he probably lived in the second or third interglacial period, some 300,000 years ago.

Pimento, or *Allspice*, a spice prepared from the dried fruits of the Jamaican tree, *Pimenta officinalis* of the natural order Cuphorbiaceae.

Pimpernel, a genus of trailing plants (*Anagallis*) of the order Primulaceae, bearing small and numerous flowers. The Common Pimpernel or "poor man's weatherglass" (*Anagallis arvensis*) is a common English cornfield flower; Scarlet Hog-Pimpernel (*A. tenella*) is common in the fens and marsh districts of Lincoln and Norfolk. The Yellow Pimpernel (*Lysimachia nemorum*) bearing bright yellow flowers is an allied plant. The flower of the Common Pimpernel closes in cold and dull weather.

Pin, a small piece of metal, pointed at one end, and used as a fastening. Early pins, which doubtless developed from thorns, were made of bone, bronze and other metals, often beautifully worked and ornamented. Pin manufacture is one of the miscellaneous metal industries of the Birmingham district, the pins being nipped from lengths of wire, pointed, headed, cleaned, tinned and polished.

Pinar del Rio, Western province of Cuba, with an area of 5,200 sq. m. and a pop. of 347,700; also its capital, pop. 63,200.

Pinchbeck, a copper and zinc alloy used for cheap-jack jewellery; hence a synonym for anything sham or spurious.

Pindar, the greatest lyric poet of Greece, born near Thebes in Boeotia. He excelled in every department of lyric poetry and wrote odes in honour of the victors at the Greek Games. When Alexander destroyed Thebes he spared the house of Pindar. The famous tag "Water is best" is a quotation from one of his Odes. (522-443 B.C.).

Pindus, a range of mountains in Greece, formerly the boundary between Epirus and Thessaly, running NW. to SE. parallel with the Western coast.

Pine, a genus (*Pinus*) of coniferous trees, species of which are wide-spread. The Scots pine or fir (*P. sylvestris*) is native in Britain and probably once formed extensive forests over the whole country. In maturity, the lower branches are lost, and the summit flattens out till there is a slender naked trunk with a high picturesque semi-rounded crown; bark smooth and reddish-brown; leaves like twisted needles. Other foreign species grown in Britain include the Corsican (*P. Laricio*), with long paired needles; Weymouth or White (*P. Strobus*), named after a Lord Weymouth of the 18th Century; Cluster (*P. Pinaster*), well known in Bournemouth, and Stone (*P. Pinea*), with umbrella head. Other notable species are the Douglas fir (*q.v.*) (*P. ponderosa*), the Pitch-pine (*P. palustris*) and the Yellow Pine (*P. echinata*).

Pineal Gland, a small cone-shaped matter in the brain, the size of a pea, and situated in the front of the cerebellum, formerly surmised to be a rudimentary survival of a third eye, but now recognised as an important organ of unknown function.

Pineapple, the fruit of a tropical *sativa*, American plant (*Ananas sativa*), introduced into England in 1690, and is now easily grown in hothouses. The flowers rise in a large conical spike, surmounted by a crown of spiny leaves, which becomes enlarged and juicy, thus constituting the fruit.

Pinero, Sir Arthur Wing, English dramatist, born in London; trained for the law, he became an actor and later a playwright, among his best-known plays being *The Second Mrs. Tanqueray*, *The Gay Lord Quex* and *Trelawney of the Wells*. (1855-1934).

Ping-Pong, or Table Tennis, a game played on a table of about 9 or 10 ft. by 5 ft. with a net about 6 or 7 in. high, with light wooden bats and small celluloid balls. The serving player has 5 services in succession, and the ball must pitch on the table on the server's side and thence bounce on to his opponent's court. Volleying is not allowed. Game score is 21 points, or more if both reach 20.

Pinguicula. See *Butterwort*.

Pink, a genus of beautiful carnation-like flowers comprising all varieties of *Dianthus*. The carnation (*q.v.*) is a larger and fuller-leaved *Dianthus* than the so-called pink of the florists. Many pinks are hardy perennials; single and double Japanese pinks are hardy annuals; the hardy annuals supply many shades of pink, rose, crimson and white. The Bearded Pink (*Dianthus barbatus*) is better known as the Sweet William.

Pinkie, a Scottish battlefield, near Musselburgh, Midlothian, where the Protector Somerset, in his expedition to secure the hand of Mary Stuart for Edward VI., defeated and slaughtered a Scottish army, 1547.

Pinnace, historically, a small vessel in having two schooner-rigged masts and capable of being rowed; now generally means a man-of-war's double-banked eight-oared boat. Every large warship also carries a small steam pinnace nowadays.

Pint, an English measure of capacity for liquids and solids, one-eighth of a gallon. In the United States the liquid pint is one sixth less than the British pint.

Piozzi, Hester, a female friend of the name of Mrs. Thrale, after her first husband, a brewer in Southwark, whose home for her sake was the rendezvous of all the literary celebrities of the period; married afterwards

to Johnson's disgust, Piozzi, an Italian music-master; left *Anecdotes of Johnson and Letters*, was authoress of *The Three Warnings*. (1741-1821).

Pipe. The tobacco pipe was invented in America and specimens have been found in ancient Indian mounds. In form and material pipes vary greatly—from the calabash of the Indians to the ordinary short straight British pipe of to-day, and the long-stemmed Turkish chibouque. The chief materials employed are wood, porcelain, meerschaum and pipe-clay. Briar pipes are made from the bruyere root of the Mediterranean countries.

Pipe, an old English measure of capacity for liquids, generally of 105 gallons; the pipe of port contains 113 gallons, that of brandy 114. In the U.S.A. the pipe is 126 gallons.

Pipeclay, a plastic pure variety of clay, technically called China clay or kaolin, and used for pipes, pottery, casting moulds, and as a cleaning material for unglazed leather.

Pipe Fish, general name for any fish, but properly applied only to members of the family Syngnathidae, in which the jaws are united into a cylindrical tube, the body is enclosed in a series of bony rings, and the fins, formed of rays, are remarkable for their vibrating and undulatory movement. Several species are found round British shores, including the Deep-nosed or Lesser, the Great, and the Snake Pipe-fish. In some species the male has an abdominal marsupial pouch into which the eggs of the female pass, and where the young are hatched and where they shelter.

Pipe-Line, in hydraulic engineering, the final stage in conveying water to machines; it is constructed of steel plate, cast-iron, wood-stave, or reinforced concrete. Such pipe-lines are variously known as power conduit, penstock, or supply pipe. Also, a steel pipe, in jointed sections, for conveying petroleum over any required distance, as the pipe-line of the Turkish Petroleum Company, which conveys the oil from the Mosul Oil Wells to Haifa and Aleppo.

Piperaceae, a family of tropical pungent-flavoured leaves, of which *Piper* (pepper) is the typical genus.

Pipette, a glass tube with open ends sucking the liquid into the tube to the height of the graduation mark it is desired to reach, and stopping the end with the finger.

Piping Crow, the popular name of a Australian bird of the Shrike or Butcher-bird family. They are a crow-like bird with excellent powers of mimicry and a flute-like warble.

Pipit, a genus of small slender-billed sombre-coloured birds, akin to the wagtail, and not unlike larks in appearance, habit and song.

The commonest British species are the meadow pipit (*Anthus pratensis*), also called "tit-lark," found on moorlands; the rock pipit (*Anthus petrosus*), a larger and darker bird; while the tree pipit (*Anthus trivialis*), a summer visitor, is so named because it sings from the trees. A number of other species occur in Britain as stragglers.

ROCK PIPIT

Piquet, a card game for two players with a pack of 32 cards, the deuces, threes, fours, fives and sixes of the full pack being thrown out.

Piracy, robbery on the high seas. In English law it is a felony punishable with penal servitude for life, or if actual violence endangering life is used, with death. Cases of piracy are of rare occurrence in civilized countries to-day, but the crime is, or was, until very recently, common in China, notably in Bias Bay.

Piraeus, Greek town and port of Athens, 5 m. S.W. of the city, planned by Themistocles, built in the time of Pericles, and afterwards connected with the city for safety by strong walls; it was destroyed by the Spartans at the end of the Peloponnesian War. Recovering in recent years, it is now an important manufacturing centre and the chief seaport of Greece. Pop. c. 140,000.

Pirandello, Luigi, Italian dramatist and novelist, born at Girgenti, Italy: of his early novels, *The Late Matthias Pascal* was the most successful; his best-known plays are *Sei Personaggi in Cerca di Autore* ("Six Characters in Search of an Author") and *Enrico IV.* (Henry IV.). (1867-1936).

Pirke Aboth (i.e., Sayings of the Fathers), one of the treatises of the Jewish *Talmud*, a collection of representative sayings of ancient Rabbis in the manner of the apocryphal book of Ecclesiastes.

Pisa, city of Italy, on the Arno, 49 m. W. of Florence; its port is now at Leghorn. There are a magnificent cathedral, rich in art treasures, a peculiar campanile of white marble which deviates 16 ft. from the perpendicular, known as the Leaning Tower of Pisa, several old and beautiful churches, a university, school of art and library. Silks and ribbons are woven, and coral ornaments cut. In the 11th century Pisa was a prosperous mercantile republic, but became merged in Tuscany about 1550. Pop. 72,500.

LEANING TOWER
OF PISA

Pisano, Andrea, Italian goldsmith and sculptor. Designed two doors of the Baptistery in Florence cathedral, 1330: completed its campanile. Built facade of Orvieto cathedral, 1347. (c. 1270-1349).

Pisano, Giovanni, one of the greatest of Pisan sculptors; son of Nicola Pisano. He built the Campo Santo at Pisa and the tomb of San Donato at Arezzo. (1250-1330).

Pisano, Nicola, Italian sculptor and architect of Pisa; his most famous works are the pulpit in the Baptistery at Pisa, and that for the Duomo at Siena, the last being the fountain in the piazza of Perugia. (1206-1278).

Pisces, or The Fishes, the twelfth sign of the zodiac, which the sun enters on Feb. 20.

Piscina, the swimming reservoir in the Court of a Roman bath; also, in medieval churches, a stone basin in a niche near the altar, in which the priest washed his hands before celebrating the Eucharist and afterwards cleansed the chalice.

Pisgah, a mountain range E. of the Lower Jordan, one of the summits of which is Mount Nebo, from which Moses beheld the Promised Land, and where he died and was buried.

Psidia, a division of ancient Asia Minor, N. of Pamphylia, and traversed by the Taurus chain.

Pisistratus, tyrant of Athens, a friend of Solon, and relative of Solon; in 560 B.C. took possession of the citadel and seized the sovereign power. Twice compelled to retire, he at last made good his ascendancy, reigning peacefully for 14 years, and leaving his power in the hands of his sons Hippias and Hipparchus. To him we owe the first written collection or complete edition of the poems of Homer. (600-527 B.C.).

Piso, cognomen of a distinguished Roman family, of whom famous members were Gaius Calpurnius Piso, proconsul in Narbonese Gaul, defended on an accusation of plunder by Cicero; Lucius Calpurnius Piso, whom Cicero attacked in his speech *In Pisonem*, and whose daughter married Julius Caesar; and Gnaeus Calpurnius Piso, who committed suicide in A.D. 19 when charged with murdering Germanicus.

Pissarro, Camille, French artist. Born in the West Indies, he went to Paris when 25 and studied under Corot. Much of his early work was destroyed in the 1870 siege of Paris, after which he moved to London. (1830-1903).

Pistachio Nut, a product of a *Pistacia vera*, now also grown in Europe and Africa; the crushed nut yields a valuable culinary oil.

Pistoia, a town of N. Italy, at the foot of Florence; it is said that pistols derived their name from the city, which manufactured them; now produces iron and steel wares and macaroni. Pop. 72,000.

Pistol, a small firearm adapted for use with one hand. The first pistols came about 1540 from Pistoia, Italy: they were first used by the English cavalry about the middle of the 16th Century, but earlier by the German mercenaries known as pistoliers. The earliest pistol was fitted with a wheel-lock; this was superseded in turn by the flint-lock and the percussion cap. In the 19th Century the invention of the revolver largely replaced the pistol, except for duelling, but in the present century the revolver has in turn largely given way to the automatic self-loading pistol of the Colt or Mauser type.

DOUBLE-BARRELLED
FLINT-LOCK PISTOL
(1823)

Pistole, an obsolete gold coin of Europe, value, but averaging about 17s.

Piston, an apparatus acted upon by the pressure of a fluid in a hollow tube, or imparting pressure to such a fluid; in a steam engine it has the former function, in a pump or compressor the latter. It may be of any shape corresponding accurately to the bore of the tube, but is in fact almost always a cylindrical disc fitted to a rod.

Pitcairn Island, a small volcanic island 1 m. broad, in the Pacific, 5,000 m. E. of Brisbane, where, in 1790, 9 men of H.M.S. *Bounty* who had mutinied landed with some Tahitian women; from these sprang a small community who later sent a colony to Norfolk Island. The island is a British Colony under the jurisdiction of the High Commissioner for the Western Pacific. Pop. c. 200.

Pitch, or Coal Tar, a dark resinous substance obtained by the partial distillation of tars, petroleum pitch or other fusible organic substances; used for caulking ships, briquette-making, bituminous paints, etc.

Pitch (musical), the relative height or depth of a sound. Standard pitch is the number of vibrations per second for a given note. The note A is taken for orchestras; the note C for piano-tuning. The classic pitch from Purcell to Beethoven, Mendelssohn and Rossini was between C = 498 and C = 515. The leading orchestras now adopt the standard A = 435. The British military bands until recent years played up to high pitch, C = 538, as required by the Kneller Hall rules, but in 1928 the War Office adopted the new philharmonic pitch of 435. This low standard is now generally used at concerts.

Pitchblende, or **Uraninite**, an oxide of uranium, thorium, radium, lead, etc., valuable for its radio-active elements. The name refers to the pitch-like appearance of the hard compact specimens of the oxide. It is found in association with nickel, copper ores, etc., in Cornwall, Colorado and parts of Germany.

Pithecanthropus, a genus of sub-men whose

existence was deduced from the discovery in Java of certain skull and thigh bones in 1891. He probably represented a stage of development intermediate between the great apes, especially the orang-utan, and man.

Pitlochry, a Scottish village and summer resort in Perthshire, on the R. Tummel, 3 m. S. of the Pass of Killiecrankie, site of a Jacobite victory in 1689. Pop. c. 2,500.

Pitman, Sir Isaac, inventor of the shorthand system, which bears his name, born at Trowbridge, Wiltshire; his first publication was *Stenographic Sound-Hand* in 1837, and in 1842 he started the *Phonetic Journal*. (1813-1897).

Pitt, William, English statesman, second born son of the Earl of Chatham (q.v.), born near Bromley, Kent. He entered Parliament in 1781, and at the age of 23 became Chancellor under Lord Shelburne. On Shelburne's resignation he refused the Premiership, but soon formed a government with a majority of 100 against him at the age of 24; he gradually won over the House and the country, and the dissolution of 1784 gave a majority of 120 in his favour. During his long administration, broken only for one month in 20 years, he greatly raised the importance of the Commons, stamped out direct corruption in the House, and abolished many sinecures. He revised taxation, improved the collection of revenue and the issue of loans, and set the finances in a flourishing condition; he reorganized the government of India, and aimed strenuously to keep England at peace. (1759-1806).

Pitt, William, (the Elder). See Chatham, Earl of.

Pittsburgh, second city of Pennsylvania, U.S.A., 350 m. by rail W. of Philadelphia, where the junction of the Allegheny and the Monongahela R.s. forms the Ohio; seat of 2 universities. Much power is obtained from the natural gas, which issues at high pressure from shallow borings in isolated districts 20 m. from the city. Standing in the centre of an extraordinary coal-field—the edges of the horizontal seams protrude on

WILLIAM PITT

the hillsides—it is the largest coal-market in the States. It is the main centre of the United States Steel Corporation, and manufactures also metal goods, earthenware, furniture and motor cars. Originally called Fort Duquesne, it took its later name from the Elder Pitt. Pop. 670,000.

Pituitary Body, a ductless gland in the brain, secreting a hormone, pituitrin, of importance in regulating growth and other functions. Its failure to function properly may produce excessive obesity, arrested sexual development, or acromegaly, the abnormal growth of the extremities and front of the head.

Pityriasis, one of a group of various skin affections, mainly forms of eczema, in which small particles of the skin flake off in scaly forms.

Pius, the name of eleven Popes, of whom P. II., pope from 1458 to 1464, of the family of the Piccolomini, known to history as Æneas Sylvius, an eminent scholar and diplomat, distinguished for organizing a crusade against the Turks. P. IV., from 1559 to 1565; during his popehood the deliberations of the Council of Trent were brought to a close, and the "Credo of Pope Pius IV." is still the official summary of Roman Catholic doctrine. P. V., St. Pope 1566 to 1572, excommunicated Queen Elizabeth, revised the Church Service books and was responsible for the combination which broke Turkish power in Europe in the naval victory at Lepanto in 1571. P. VI., Pope from 1775 to 1799, did much to improve the amenities of Rome; called on by Napoleon to renounce his temporal sovereignty, he refused, was made prisoner, and died in France. P. VII., Pope from 1800 to 1823, concluded a concordat with France, crowned Napoleon emperor at Paris, who thereafter annexed the papal territories to the French Empire, which were in part restored to Rome only after Napoleon's fall. P. IX., or Pío Nono, from 1846 to 1878, was a "reforming" Pope, and by his concessions awoke in 1848 a spirit of revolution, under the force of which he was compelled to flee from Rome, to return again under French protection; in 1854 he promulgated the doctrine of the Immaculate Conception, and in 1870 the Infallibility of the Pope; upon the outbreak of the Franco-Prussian War in 1871 his temporal dominions were annexed by Italy, and he retired into the Vatican, where he lived in seclusion till his death. P. X., from 1903 to 1914; condemned the Modernist movement, and died of grief at the outbreak of the World War. P. XI., born near Milan, became Pope in 1922, and in 1929 signed the Lateran (q.v.) Treaty, under which the temporal power of the Papacy was restored, his sovereignty over the Vatican City being recognised. (1864—).

Pixies, mischievous sprites in English, said to be the spirits of infants who died unbaptized.

Pizarro, Francisco, Spanish adventurer, the conqueror of Peru, born at Truxillo; having distinguished himself in Panama, set out by way of the Pacific on a voyage of discovery with another soldier named Almagro; after landing on an island off Peru, returned to Spain for authority to conquer the country; sailed with three ships in 1531, and on his arrival at Peru found a civil war raging, of which he availed himself to butcher the emperor and terrorise his subjects; quarrelled with Almagro and put him to death, but was assassinated at Lima by the latter's party. (1478-1541).

Placenta, the organ by which, in the connected with the mother, and vascular connection between the two maintained. It ultimately comes away as the afterbirth.

Placer, in mining, a detrital surface deposit containing minerals which can be worked at a profit. The method of working is generally by some form of washing, and is known technically as "placer mining."

Plague, Great, an epidemic disease which spread to England from Europe during 1665 and led to the death of over 100,000 persons in London out of a population of 460,000, though it was even more destructive in Europe. The disease is supposed to have been a variety of bubonic plague such as caused the Black Death of the 14th Century, in which a quarter of Europe's population perished. The narrow and ill-drained streets of London encouraged its spread. Defoe gives a vivid account of the visitation in his *Journal of the Plague Year*.

Plaice, an edible flat fish (*Pleuronectes platessa*) of the Heterosomata order, distinguished by its red spots. It feeds on bivalve molluscs, crushing the shell with its blunt pharyngeal teeth. The average weight is 2 or 3 lb. They are found mainly on W. European mudbanks.

Plain, a flat area at an elevation not a great distance above sea-level; a higher area of flat land is generally called a plateau. Steppes, Pampas and Prairies are all varieties of plain. Plains are generally grass-covered, thus affording good grazing land; but some great plains, such as the Sahara, are infertile owing to lack of rain or other causes. Plateaux or tablelands, as in the case of Tibet, may be at a considerable height above sea-level, and are sometimes shut in by mountain barriers.

Plain-song, the unmeasured music of the chants of the Roman Catholic church, developed probably from a combination of classical Greek and Hebrew synagogue music. See *Gregorian Chant*.

Planchette, a small and generally heart-shaped table, with a pencil attached, which is used at spiritualist séances to enable spirits to write messages. The hand of the medium is placed upon the planchette which is alleged to move without his conscious co-operation.

Planck, Max, German physicist, professor at Berlin; carried out many researches in connection with specific heat and radiation; his greatest work was the enunciation of the Quantum Theory. He was awarded a Nobel Prize in 1919. (1858-).

Plane, tree of the order Platanaceae, and sole genus of that order. *Platanus Orientalis*, or the oriental plane, grows to 100 ft. high and 30 ft. in girth, having large, glossy leaves which, when young, are covered with brownish hairs and bullet-shaped buds; the bark peels in scales, leaving pale patches. The London plane (*P. acerifolia*) may be either a distinct species or a hybrid between the oriental and the Western or American plane.

PLANE TREE
(*P. Orientalis*)

Plane, in geometry, a surface, face such that, if any two points on it be joined by a straight line, that line will lie wholly in the surface. A plane is regarded as extending indefinitely in any direction. The term is also used in astronomy to denote an ideal surface supposed to cut or pass through a solid body, or in various directions; as the plane of the ecliptic, the plane of a planet's orbit.

Planetoids. See *Asteroids*.

Planets, the celestial bodies which round the sun, their order from the sun outward and mean distances in millions of miles

therefrom being Mercury, 36; Venus, 67½; the Earth, 93; Mars, 141½; Jupiter, 483½; Saturn, 886; Uranus, 1,783; Neptune, 2,793; Pluto, 3,670. There are also over a thousand tiny planets or asteroids (*q.v.*), mostly between Mars and Jupiter.

Planimeter, an instrument for recording the area of any plane figure. It consists essentially of two bars, freely jointed to each other; in the elbow is placed a graduated wheel which revolves round an axis parallel to one arm.

Plankton, general name for the plant and animal organisms which drift freely in seawater, including radiolarians, foraminifera, diatoms, etc.; the ooze found at the bottom of the oceans consists largely of the remains of these animals and plants, *e.g.*, globigerina ooze.

Planquette, (Jean) Robert (Julien), French composer, born in Paris. He gained immense fame, 1877, with the three-act comic-opera *Les Cloches de Corneville*. Composed altogether 16 operettas and operas, including *Rip Van Winkle*, 1882, and *Mam'zelle Quat'sous*, 1897. (1850-1903).

Plant, any member of the vegetable kingdom; it is defined by Linnaeus as "an organized body possessed of life but not of feeling." Some plants, however, have a certain sensitiveness when touched. The lowest animals and plants are so closely akin—*e.g.*, sponges and infusoria—that it was once a moot point to which kingdom they belonged; but sponges are now regarded as compound animals and infusoria are in the category of algae (*q.v.*). Plants, generally, are composed mainly of carbon, hydrogen and oxygen; animals have nitrogen in addition; plants absorb carbon dioxide and give out oxygen; animals reverse the process. A plant consists of a root and organs of vegetation and reproduction. Plants are classified into annuals, biennials and perennials; a cross-division is that into herbs, shrubs and trees. A plant may be evergreen or have deciduous leaves. One cardinal division of the vegetable kingdom is the Cryptogamia or flowerless plants, which have no flowers and reproduce themselves by spores; among these are the algae, fungi, ferns and mosses. The Phanerogamia or flowering plants reproduce by seeds containing an embryo, and such plants are again classified into Gymnosperms (*q.v.*) and Angiosperms which latter group are divided into Dicotyledons and Monocotyledons, according to the number of seed leaves present.

Plantagenets, a dynasty of kings of England, who reigned from the extinction of the Norman line to the accession of the Tudor, that is, from the beginning of Henry II.'s reign in 1154 to the end of Richard III.'s on Bosworth Field in 1485. The name was adopted by Geoffrey of Anjou, the husband of Matilda, the daughter of Henry I., whose badge was a sprig of broom (*planta genista*) which he wore in his bonnet.

Plantain, a small fruit-tree (*Musa parasitica*) akin to the Banana, but differing in the absence of purple spots on the stem. It is widely grown in India. The name is also given to a genus of herbs of the order Plantaginaceae, mostly weeds. Five species are found in Britain, including *Plantago major* (greater plantain), *P. media* (hoary plantain), *P. lanceolata* (rib-wort plantain), and *P. maritima* (the sea-side plantain).

Plantin, Christophe, a printer of Antwerp, born near Tours, in France; celebrated for the beauty and accuracy of the work that issued from his press, the most notable being the "Antwerp Polyglot Bible." His house at Antwerp is now a museum. (1514-1589).

Plasma. See *Blood*.

Plassey, a great battlefield in Bengal, scarcely 100 m. N. of Calcutta, now swept away by changes in the course of the river: was the scene of Clive's victory in 1757 over Suraj-ud-Dowlah, the ruler of Bengal, which laid that province at the feet of Britain, and led to the foundation of the British Empire in India.

Plaster of Paris, a paste, formed from gypsum or calcium sulphate dihydrate, used for making casts in moulds, and in surgery to make casing for holding broken limbs in position while healing.

Plastics. The manufacture of artificial plastic materials has rapidly assumed the status of a major industry. There are three types of such materials, viz., (i) those derived from cellulose and cellulose esters; (ii) condensation products; and (iii) casein products. Among the members of the first type the most familiar is celluloid; this is a solid solution of cellulose nitrate and camphor, and was originally put on the market in America in 1869. Cellophane is a transparent cellulose hydrate, prepared by converting carefully balanced bleached cellulose into its soluble sodium xanthogenate deriva-

formaldehyde; a typical example is bakelite. Other such plastics are formed from urea and formaldehyde. Of the third type, galalith is the best known; it is manufactured from the casein of milk, is practically non-inflammable, can be dyed to any colour, takes a high polish, and is cheaper than celluloid.

Plata, Rio de la. See **La Plata**.

Plataea, a city of ancient Greece, in western Boeotia, neighbour and ally of Athens, suffered greatly in the Persian and Peloponnesian Wars. It was destroyed by the Persians 480 B.C., by the Peloponnesian forces 429 B.C., and again by the Thebans 387 B.C. In 479 B.C. it was the scene of a great battle in which Greece defeated Persia. There were 300,000 men in the Persian army of whom only 3,000 survived, the Persian power being broken for ever.

Plateau. See **Plain**.

Platinum, a metallic chemical element, related to osmium and iridium. Symbol Pt; atomic number 78; atomic weight 194.8. It occurs free in many parts of the world, e.g., the Ural mountains, U.S.A., Brazil, South Africa and New South Wales. It is a white metal of higher density than gold; it is very resistant to chemical action, though it will dissolve in *aqua regia* (a mixture of concentrated nitric and hydrochloric acids). It is widely used in chemistry as a catalyst, and in jewellery as a setting for diamonds and for wedding rings.

Plato, Greek philosopher, born at Athens, in the second year of the Peloponnesian War; at 20 became a disciple of Socrates, and passed eight years in his society; at 30, after the death of Socrates, quitted Athens, and took up his abode at Megara; then travelled to Cyrene, Egypt, Italy, and Sicily; his idealist philosophy is expounded in a series of dialogues, of which the principal are the *Republic*, *Phaedrus*, *Phaedo*, *Symposium*, and *Timaeus*; the influence of his thought has remained almost unabated till the present day, and even the 20th-Century political philosophies of Fascism and Communism are in debt to him. (427-347 B.C.).

Platonic Love, love between persons of different sexes, without an element of physical passion; the name arises from Plato's doctrine that a man finds supreme happiness in communion with his soul's counterpart or complement.

Platoon, historically, a small body of soldiers acting simultaneously in any duty separately from the main body; in modern military language, a sub-division of a battalion.

Platte, river of the U.S.A. formed by the junction of two streams, the North and South Platte, which rise in Colorado and after making a junction meet the Missouri near Omaha. The total length of the streams is about 1,400 m.

Platypus. See **Duck-billed Platypus**.

Plauen, a town in Saxony, on the Elster, 78 m. S. of Leipzig, with embroidery, lace, and other textile manufactures. Pop. 114,000.

Plautus, Titus Maccius, Latin comic poet, born in Umreria; began to write plays for the stage at 30, shortly before the outbreak of the second Punic War, and continued to do so for 40 years. He wrote about 180 comedies, but only 20 have survived, the plots mostly borrowed from Greek models. Among them are the *Captivi*, *Menachmi*, and *Aulularia*; they have supplied material for dramatic treatment in modern times. (254-184 B.C.).

Player-piano. See **Piano**.

Playfair, Sir Nigel, English actor-manager, born in London. His first professional appearance on the stage was in *A Pair of Knickerbockers* at the Garrick, London, 1902. He assumed management of Lyric Theatre, Hammersmith, 1918; revived old plays and operas there, including a phenomenally long run of Gay's *Beggar's Opera*. Knighted, 1928. (1874-1934).

Plea, in its legal sense, generally the answer of a defendant to the allegations of the plaintiff in civil, or the prosecutor in criminal, proceedings. A criminal plea may be of Guilty, Not Guilty, *Autrefois Convict* or *Acquit*, that is, already convicted or acquitted on the charge now before the court, or that the alleged offence has already been pardoned by the Crown.

Plebeians, or **Plebs**, one of the two sections into which the population of ancient Rome was divided, the other being the Patricians. They probably were the descendants of subdued Latin tribes settled on Roman territory. The history of the Roman republic is largely concerned with their long struggle for equality of political rights with the Patricians, which they gradually secured.

Plebiscite, a vote on some disputed members of a given community. Examples are the plebiscites taken after the World War in Silesia, and later in the Saar, to decide the future government of those areas. A plebiscite of the whole German people ratified the annexation of Austria in 1938.

Pleiade, La, the name given to a movement in the middle of the 18th Century that aimed at the reform of the French language and literature on classical models. It was led by a group of seven men—Ronsard, Du Bellay, Belleau, Baif, Daurat, Jodelle, and Pontus de Tyard.

Pleiades (i.e., the sailing stars), in Greek mythology, seven sisters, daughters of Atlas, transformed into stars, six of them visible and one invisible.

Pleistocene, name for the most recent of the glacial ages, laid down immediately before the recent alluvial strata formed in historic times. The deposits are chiefly clay or sand containing stones of various ages, and were laid down where the glaciers had dropped the material they had worn away. Their fossil remains are largely of existing species, including in Britain reindeer, lions and hippopotamuses.

Plesiosaurus, an extinct aquatic reptile with a small head, resembling a lizard's, and a long neck: abundant in mesozoic times.

Pleura, the serous membrane that lines the interior of the thorax or chest and invests the lungs. It is subject to the serious disease of pleurisy, or pleural inflammation, which is often associated with pneumonia. In "dry pleurisy" the chief symptoms are a sharp pain in the side, felt in respiration, and a short dry cough. "Effusive pleurisy" begins with shivering and fever, the pain abating as the serous fluid effuses into the pleural cavity between the lung and the chest lining. If the fluid is not eventually absorbed, empyema results.

PLESIOSAURUS

Plevna, or **Pléven**, a town in Bulgaria, in a dept. of the same name, where in 1877 Osman Pasha's Turkish army surrendered to the Russians; manufactures woollens and wines. Pop. (dept.) 802,000; (town) 31,500.

Plimsoll, **Samuel**, English social reformer, born in Bristol. Entering Parliament in 1868, he secured the passing of the Merchant Shipping Act in 1876 levelled against the overloading of ships and other abuses in the mercantile navy. His name has been given to the circle with a horizontal line through the centre (the "Plimsoll Line"), now placed by the Board of Trade on the side of every vessel to indicate to what depth she may be loaded in salt water. (1824-1898).

Plinlimmon (i.e. five rivers), a Welsh mountain 2,469 ft. high, with three summits, on the confines of Montgomery and Cardigan, near the source of the Severn.

Plinth, in architecture, the lower division of the base of a column; also, the plain projecting face at the bottom of a wall, immediately above the ground.

Pliny, **The Elder** (*Gaius Plinius Secundus*), Roman author, born in Como, was for a space procurator in Spain, and spent much of his time afterwards studying at Rome. Being near the Bay of Naples during an eruption of Vesuvius, he lauded to witness the phenomenon, but was suffocated by the fumes. His *Natural History* is a repository of ancient botanical and zoological knowledge. (23-79).

Pliny, **The Younger** (*Gaius Plinius Cæcilius Secundus*), nephew of the preceding, the friend of Trajan; born at Como; filled various public offices, and was governor of Bithynia in 111, whence he wrote to the Emperor Trajan for instructions as to the treatment of the Christians; his fame rests on his *Letters*. (61-c. 115).

Pliocene, name given by geologists to the latest Tertiary deposits, those above the Eocene and below the Pleistocene; in England extensive areas of these rocks are found in East Anglia and are known as *crag*, forming the coastline from Cromer to Felixstowe; the fauna of this period included many living species of mammal and it is probable that the first men appeared at the end of Pliocene times, though the Taungs skull found in Africa in 1925 may possibly date from the Miocene.

Plotinus, an Alexandrian philosopher, born at Lycopolis, in Egypt. He taught at Rome a philosophy which combined Plato's speculations with a doctrine of emanations, placing man's highest achievement in a mystical union with God, conceived as the Absolute Unity. (207-270).

Plough, an implement for furrowing land and making a bed for seed. The primitive plough, little more than a forked stick, was probably one of the earliest human inventions, and is still used in almost the same form by primitive peoples to-day. The more developed plough is drawn by animals (horses or oxen) or steam-driven, and is now being replaced by the tractor.

Plovdiv (*Philippopolis*), second city of Bulgaria, about 80 m. S.E. of Sofia, on the R. Maritza. It is an important trading centre. Pop. 100,000.

Plover, the common name of all the species of the family Charadriidae; mainly frequenting damp meadows and moors. A number of them are found in Britain, including the sandy-brown Kentish plover (*Charadrius alexandrinus*) which breeds at Romney Marsh; the handsome Ringed Plover (*Charadrius hiaticula*) also known as the dotterel, the Golden Plover (*Pluvialis apricaria*) and the Lapwing (q.v.) or Green Plover (*Vanellus vanellus*).

Plum (*Prunus domestica*), fruit-tree of the natural order Rosaceae, a domesticated variety of a tree (the *Prunus communis*) native to Russia and E. Asia; also the name of the fruit. By cultivation of the wild plum many fine varieties have been obtained, the most important commercially being the Victoria (above all), the Czar, the Pershore, Denniston's Superb Gage, Greengage, and Coe's Golden Drop Gage. The wood of the plum tree is hard, close, beautifully veined, and takes a fine polish.

Plumbago, or **Leadwort**, a herbaceous plant with greyish-blue flowers, grown in Great Britain as a greenhouse plant.

Plumbism. See **Lead Poisoning**.

Plumer, **Herbert Charles Onslow Plumer**, 1st Viscount, English field-marshal; born at Torquay. Served in the Sudan, and the Matabele campaign of 1896; in the South African War, 1899-1902, commanded the Rhodesian Field Force; commanded second British army in France, 1915-1917, contributing greatly to success at Messines and in the Flanders offensive. Was posted to Italy after the battle of Caporetto; commanded the British army of occupation in Germany, 1918-1919. Governor of Malta, 1919-1924; High Commissioner for Palestine, 1925-1928. Viscount, 1929. (1857-1932).

Plunkett, **Sir Horace Curzon**, pioneer of co-operative agriculture in Ireland; entered Parliament in 1892; founded, in 1894, the Irish Agricultural Organisation Society; in 1899, became president of the Council of Agriculture. Chairman of the Irish Convention, 1917; Irish Free State Senator, 1922-1923. (1854-1932).

Pluralism, in philosophy, the belief that the universe cannot be reduced to a single principle, as in monism, but is based on at least two disparate principles, whether mind and matter, or others. In ecclesiastical law the word is used of the simultaneous holding of more than one benefice.

Plush, a textile fabric resembling velvet, but with a longer pile. It is used mainly for upholstery, but the name was formerly used with a derogatorily humorous connotation of the velvet breeches of footmen, coachmen, etc.

Plutarch, Greek author, born at Chaeronea, in Boeotia; studied at Athens; paid frequent visits to Rome, and formed friendships with some of its distinguished citizens; spent his later years at his native place, and held a priesthood. His fame rests on his *Parallel Lives* of 46 distinguished Greeks and Romans, one of the most valuable works we possess on the illustrious men of

antiquity. He also wrote on a variety of other subjects. (c. 50-120).

Pluto, in Greek mythology, god of the nether world, son of Kronos and Rhea, brother of Zeus and Poseidon, and husband of Persephone; on the dethronement of Kronos, Pluto took charge of the infernal kingdom, as did Zeus of the sky and Poseidon of the ocean.

Pluto, outermost planet of the Solar system, whose existence had been predicted by Percival Lowell, and which was discovered at the Lowell Observatory in 1930; is possibly about the size of Mars, and is about 3,675,000,000 m. distant from the sun, around which it travels in about 250 years.

Plutonic Rocks, name given to those igneous rocks which consolidated at a great depth and have been exposed as the result of the denudation of the overlying deposits or of earth movements, e.g., granites, gabbros and diorites.

Plutus, in Greek mythology, the god of riches, son of Jason and Demeter. Zeus is said to have put out his eyes that he might bestow his gifts without respect to merit, that is, on the evil and the good impartially.

Plymouth, largest town of Devonshire, England, on the N. shore of Plymouth Sound, 250 m. W. of London; with Stonehouse and Devonport it forms the "Three Towns." Industries are printing, flour-milling, and chemical manufactures; there are large fisheries. It is a port of call for many ocean-going steamers. Devonport has one of England's premier dockyards, and is a naval station of first importance. Many great English sailors, including Drake and Raleigh, were connected with the town; and from it sailed the fleet that vanquished the Armada, and the *Mayflower* with the Pilgrim Fathers. Pop. 206,000.

Plymouth Brethren, a Protestant sect of Christians formed about 1830. They accept, along with pre-Millenarian views, generally the Calvinistic view of the Christian religion, and exclude all unconverted men from their communion. They have no recognized ministry. They are known also as Darbyites (q.v.) from the name of one of their founders, John Nelson Darby.

Plymouth Sound, a portion of the English Channel at the mouth of the Plym, on which Plymouth stands; one of its branches, the Hameaze, is used as a naval harbour by the British fleet. It is protected by a breakwater a mile in length.

Plywood, name given to thin boards usually three in number, and cemented or glued together under pressure, the grain of the middle layer being placed at right angles to that of the outer layers.

Pizen, See *Pizzen*.

Pneumatics, the branch of physics concerned with the mechanical properties of gases, especially air. Its principal application is in the use of compressed air for power transmission; a system frequently used in industrial establishments, but not in Great Britain, as it is in the case of the Paris pneumatic Post, adapted to any extent for public services. Pneumatic power is used for manipulating tools of various kinds, including the rock drill, pneumatic hammer, and the familiar road-breaker.

Pneumonia, inflammation of the lung forms include *acute lobar* or *croupous pneumonia*, the commonest form, affecting a limited area, usually a lobe or lobes of the lung; *catarrhal, bronchial* or *lobular pneumonia*, which originates in bronchitis, is more

diffuse in the area of distribution and longer in duration than lobar pneumonia; *interstitial pneumonia* or *cirrhosis* of the lungs, a more chronic form of inflammation which affects the fibrous tissue of the lung and is akin to phthisis. Pneumonia may also be a very serious complication of other diseases; thus it may occur in cases of typhoid fever or supervene in cases of serious heart trouble.

The symptoms of lobar pneumonia are well marked from the outset; after an incubation of two to six days, the face assumes a characteristic dusky flush, the attack begins with shivering, or in young children, convulsions, quickly followed by pain in the chest and vomiting, quickened pulse, high temperature, and rapid shallow breathing. The crisis usually occurs between the 7th and 10th day from the attack. Bronchial pneumonia occurs most frequently in children, often as the sequel to some other illness in which the bronchi are inflamed, as, e.g., measles or whooping cough. In weakly persons, it may run rapidly to a fatal termination, and it may, in certain cases, lead to interstitial pneumonia or to tuberculosis.

Po, the largest river of Italy, rises 6,000 ft. above sea-level in the Cottian Alps, and flows through the great Lombardy plain NE and E, receiving the Ticino, Adda, Mincio, and Trebbia tributaries, entering the Adriatic by a rapidly growing delta. Its total course is 360 m. The chief towns on its banks are Turin, Piacenza, and Cremona.

Pocahontas, daughter of an Indian chief in Virginia, who favoured the English settlers there, saving the life of Captain Smith the colonizer. She afterwards married John Rolfe, one of the settlers, and came to England. Several Virginian families trace their descent to her; d. at Gravesend, 1617.

Pochard, the name of two ducks occasionally seen in Britain. The Pochard (*Nyroca fering*) breeds in very restricted localities; it is, however, a not uncommon winter visitor, and is imported in some quantities for the table.

In summer both sexes have a dark brown head and neck and greyish white face, the rest of the body being brown and grey. The Red-crested Pochard (*Netta rufina*) can be distinguished in winter by the crest in the male. Both haunt inland waters and feed on crustaceans, worms and aquatic plants.

POCHARD (MALE)

Pocket Borough, a borough in the Reform Act of 1832, the influence of some local magnate determined the voting in elections.

Poe, Edgar Allan, American poet, and short story writer, born at Boston, Massachusetts, a weak, highly-strung man who suffered greatly from poverty and humiliation. He married, 1836, a fourteen-year-old cousin, Virginia Clemm, who succumbed to the hardships of their existence. On Oct. 7th, 1849, he was found dying in the streets of Baltimore. He is remembered as the author of *The Raven*, and of *Tales of Mystery and Imagination*, in which his power in handling the supernatural and creating atmospheres of terror and horror had full scope. He was also a critic of note, being an early appraiser of Tennyson and Dickens, and one of the creators of the detective story. (1809-1849).

Poetry, a form of literary expression whose boundaries cannot be exactly defined, but which is generally distinguished from prose by some kind of

rhythmic, often repetitive, construction, using such devices as rhyme, alliteration, the arrangement of verbal stresses, or a regular metrical scheme to secure this end. Poetry probably began with spontaneous song and developed into epic, that is, the narrative poem in celebration of great men and great events, of which the *Iliad*, the *Aeneid*, and the Hindu *Mahabharata* are examples, but the highest reach of the poet's art is generally considered to be lyric poetry, i.e., the short emotional poem originally intended to be sung to the lyre. Notable lyric poets have been Shelley, Catullus, Shakespeare (in his songs), etc. Poetry has also been used as a medium of instruction, cf. Lucretius' didactic poem *De Rerum Natura*. ("Concerning the Nature of Things"), and at certain periods has become so formalised (as in the Augustan poets of England) or so overset with metaphysical conceit (as by certain English poets in the 17th Cent.) that it has lost its emotional appeal and sometimes even its meaning.

Poets' Corner, a corner in the SW. minster Abbey, so called as containing the tombs of Chaucer, Spenser, and other eminent English poets.

Pogrom, an anti-Jewish riot, often resulting in vast damage to property and destruction of life, such as took place frequently in Russian cities before the World War, and has occurred since in Poland and other Eastern European countries. Pogroms on a large scale occurred in European Russia in 1881 and 1905.

Poilu (French "Hairy"), nickname for a French soldier, corresponding roughly to the English "Tommy Atkins."

Poincaré, Raymond Nicolas Landry, French statesman. He entered the Chamber of Deputies in 1887, filled several Cabinet offices, and became Prime Minister in 1912, and in 1913 President of the Republic, in which capacity he visited England and Russia. Frequently with the armies in the World War, he held office till 1920, when he re-entered the political field as an ardent Nationalist and anti-German, becoming Prime Minister in 1922, and being largely responsible for the occupation of the Ruhr. Defeated in 1924, he was again Premier from 1926 until 1929. (1860-1934).

Poinsettia (*Euphorbia pulcherrima*), a plant of the order Euphorbiaceae, native to Mexico; cultivated in greenhouses for the large red bracts that surround its small yellow flowers.

Pointer, a breed of large sporting dog, originally Spanish, but afterwards crossed with the British foxhound. It is generally black, yellow or brown marked with white, but may be a uniform black.

Point-to-point, a steeplechase for hunters, usually over a course of 3 or 4 m. Such races were formerly run over a straight course, i.e., from one point to another across country.

Poison, a substance which, if applied or introduced to the body, causes death by non-mechanical means; it may be a natural animal, vegetable or mineral product, or a synthetic chemical. Corrosive poisons, such as sulphuric acid, destroy the tissues; convulsant poisons, such as strychnine, set up spasmodic reactions; narcotic poisons operate on the brain and nervous system. Some materials, such as arsenic or lead, accumulate in the system to produce poisonous effects. The symptoms of poisoning and the treatment to counteract it vary with the nature and amount of the poison taken. The sale of poisons in Great Britain is in many cases restricted by various statutes; the more deadly poisons may be sold only to qualified medical practitioners.

Poison Gas, general name for various chemicals used in warfare either to kill or incapacitate troops. First used in the World War by Germany in April, 1915, it was later adopted by the Allies. It later played a part in the Italo-Ethiopian war of 1935, and defensive measures against its possible use against civilians in future wars became from that time a major pre-occupation of all Governments. In the United States mild forms of "tear gas" have been used for police purposes in dealing with popular demonstrations, labour disputes, etc.

Poisonous Plants. A large number of British wild and cultivated plants contain narcotic or irritant poisons, among them henbane, belladonna, foxglove, herb paris, monkshood, thornapple, cuckoo-pint, and hemlock. Many of these contain alkaloids of great medicinal value. A large number of fungi, including the common toadstool, are likewise poisonous.

Poitiers, the capital of the dept. of Vienne, France, 61 m. SW. of Tours; has a number of interesting buildings, a university and a fine cathedral, and manufactures hosiery and beer. Pop. c. 40,000. In its neighbourhood Clovis defeated Alaric II. in 507, Charles Martel the Moors in 732, and the Black Prince the troops of King John in 1356.

Poitou, former province in France, lying S. of the Loire, around Poitiers; passed to England when its countess, Eleanor, married Henry I., 1152; was taken by Philip Augustus 1205, ceded to England again 1360, and retaken by Charles V. 1369.

Poker, a card game played with a full pack of cards, generally including the joker, in which the winner is determined by the value of the combination he holds. It is played by 2 to 6 people each holding 5 cards. The combinations in rising order of value are, pair, three, straight (five in consecutive number), flush (five all of one suit).

Pola, Italian port in Istria, 73 m. S. of Trieste, in the Adriatic; its harbour sheltered most of the Austrian fleet in the World War, after which it was occupied by Italy. Pop. 46,000.

Poland, a republic situated between the Baltic, Lithuania, Russia, the Ukraine, Czechoslovakia, and Germany. It is mainly agricultural, producing cereals, potatoes, sugar beet and flax. There are large forests and rich coal and salt mines, other minerals worked being iron, zinc, petroleum and natural gas. The chief towns are Warsaw (the capital), Lodz, Lwow, Poznan, Cracow, and Wilno (Vilna). In the Middle Ages an independent state, it gradually lost its sovereign status, until in 1795 its remnants were divided between Russia (with by far the largest share), Prussia, and Austria; after the World War in 1918 it regained its independence, and is now one of the world's most important states after the "Great Powers." The majority of the people are Roman Catholics and Slavs, but there are many Jews and large German-speaking sections. Area, 150,000 sq. m. Pop. 34,250,000. See also Polish Corridor.

Polar Bear, a species of bear (*Ursus maritimus*) found

throughout the Arctic regions on the edge of the Polar ice-cap. It may attain a length of 9 ft. or more, is white in colour, a good swimmer and diver, and lives mainly on fish, seals and carcasses of large animals. Their heads are smaller in proportion than in most bears.

POLAR BEAR

Polarization, the effect produced by causing light waves, reflected from a smooth surface or passed through crystals, to travel in a single plane. The plane of polarization may be altered by passing the light through certain solutions and this fact is used in chemistry for the estimation of the strengths of solutions. Polarized light may also be used to determine whether glass is free from strain.

Polders, low marshy lands in the Netherlands, drained and reclaimed from sea or river; that of Haarlemmeer, extending over 70 sq. m., was the largest, but is surpassed by those formed by the draining of the Zuider Zee, now in progress.

Pole, the name given to the extremities of the imaginary axis of the earth, round which it revolves. The N. Pole was first reached by Peary in 1909, the South by Amundsen in 1911. In 1937 a Russian meteorological expedition spent some months at the North Pole, and made valuable observations.

Pole, in mechanics, denotes the point of a body at which electric or magnetic forces of opposite qualities are centred, as the poles of a magnet, the north pole of a needle, the poles of a battery, etc.

Pole, *Reginald*, English cleric and statesman, born at Stourton Castle, Staffordshire; was favoured by Henry VIII. until he opposed the divorce of Catherine of Aragon, when he left the country; was appointed a cardinal, and on Mary's accession came to England as Papal legate to reconcile the country to Rome, being created Archbishop of Canterbury on Cranmer's death in 1558. (1500-1558).

Polecat (*Putorius feticus* or *Putorius putorius*), an animal of the family Mustelidae, closely resembling the weasel, but larger, being often 18 in. long. From its hair artists' brushes are made. It is notorious for its unpleasant smell. It is the wild form of the domesticated ferret.

Pole-star, or *Polaris*, a star in the northern hemisphere, in Ursa Minor, the nearest conspicuous one to the N. Pole of the heavens, from which it is at present 1° distant. A straight line joining the two "pointers" in Ursa Major passes nearly through it.

Police, the body of persons appointed to watch over civil order, prevent crime, and perform various similar services. The London Metropolitan Police were founded in 1829 by Sir Robert Peel, and similar forces were soon created in the provinces. The Metropolitan Force is directly controlled by the Home Office, the police of the rest of England by county or borough councils. In London there are now nearly 20,000 members of the force, which has its headquarters at New Scotland Yard. The area supervised by the Metropolitan Police is about 100 sq. m., and includes London (except the City), Middlesex and parts of Essex, Kent, Herts, and Surrey within a radius of 16 m. from Charing Cross.

Police-court, a court presided over by a stipendiary magistrate, roughly equivalent in its powers to a petty sessional court (see *Petty Sessions*). In theory, it is a criminal court of summary jurisdiction, but in practice it deals with a number of matters on behalf of the poorer classes which would ordinarily fall within the jurisdiction of the county courts. Thus, apart from investigating charges of crime with the view of committing for trial and the trial of persons summarily, the police court deals with summonses for non-payment of rates, maintenance orders, etc.

Polish Corridor, a strip of territory, formerly German, awarded to Poland after the World War to give her access to the Sea. The port of

Gdynia has been constructed on its shores, though by the Peace Treaties Poland has also certain rights in the port of Danzig (*q.v.*). There is still a considerable German population in the Corridor, and the conflicting interests of Germany and Poland therein make it one of the danger-spots of Europe.

Politics, the science and art of Government; it was first treated as a separate branch of study in the west by the Greek philosopher Aristotle in his treatise of that name. In modern times the word has come to be used frequently with a slightly derogatory connotation, as referring to the tactics and principles of a single party in the state. In England it received little attention as a science until the time of Hobbes, whose *Leviathan* was an attempt to justify the principle of absolute monarchy. All political speculation is dependent on the working out of some theory of the nature of the state, the supreme organ of political rule, and the aim of any practical politics must be to work for such changes in the constitution and function of the state as will help to bring about that condition which the speculator considers desirable.

Polk, *James Knox*, eleventh President of the United States, of Irish descent; admitted to the bar in 1820, entered Congress in 1825, and became President in 1844, his term of office being signalled by the annexation of Texas and California. (1795-1849).

Pollack, a cod-like fish (*Gadus pollachius*) remarkable for its long pointed snout; it is found mainly in the North Sea and Mediterranean, especially along the Spanish coasts. It lives on rocky bottoms, and may attain a weight of 20 to 22 lb. Its liver is a source of cod-liver oil.

POLLACK

Pollarding, the practice of cutting off the top of a tree so as to leave it surmounted with a dense cluster of young branches.

Pollination, in flowering plants, the transference of pollen (the male cell) from the stamens to the stigma of the same (self-pollination) or of another (cross-pollination) flower of the same species, a necessary preliminary to fertilisation.

Pollux, the twin brother of Castor (*q.v.*).

Polo, a ball game similar to hockey, played on ponyback with mallets. Originally played in Persia thousands of years ago, it spread to India, China, and Japan, and was first played in England in 1869. The governing authority of the game is the Hurlingham Club, on whose London ground many important matches are played.

Polo, *Marco*, Italian traveller, born at Venice, in 1271, accompanied his father and uncle, while a mere youth, to the court of the Great Khan, the Tartar emperor of China, by whom he was employed on several embassies. On his return to Europe he wrote an account of his travels, which did much to interest the medieval West in the Eastern world, and remains a popular book to this day. (1254-1324).

Polonium, a metallic chemical element; of highly radioactive character; it rapidly disintegrates, 1 gram of Polonium being reduced to $\frac{1}{2}$ a gram in 135 days, and yielding lead and helium. Symbol Po; atomic number 84; atomic weight 210.

Poltava, a city of the Ukraine S.S.R. and capital of the region of the same name, 450 m. from Moscow. Tobacco manufacturing and milling are among its industries. It is the site of the victory of Peter I. over Charles XII. of Sweden, 1709. Pop. 98,500.

Poltergeist, a German word meaning a hobgoblin or noisy ghost. The name is applied to the "spirits" supposed to be responsible for the cases recorded from time to time of unexplained noises, removings of articles of furniture, etc., in "haunted" houses.

Polyandry, the name given to a custom met with among certain peoples, particularly in Tibet, by which a wife is shared between several husbands, usually brothers.

Polyanthus, the popular name for a number of hardy primulas, yellow spring flowers of the order Primulaceae, related to the common cowslip, from which they are possibly derived. It is grown as a garden flower.

Polygamy, usually means that form of marriage in which a man has more than one wife, though strictly it also includes polyandry (q.v.). The former variety is common in many parts of the world unaffected by Christianity. By Mohammedanism a maximum of four wives for each husband is allowed, but of recent years polygamy has been legally forbidden even in Islamic countries such as Turkey. It is illegal in Europe and America.

Polyglot, a term generally applied to a version of the Bible in which the text is printed side by side in differing languages. The most famous is the Complutensian Polyglot, of the early 16th Century, in which the Old Testament is printed in Hebrew, Greek, Latin and Syriac and the New Testament in Latin and Greek.

Polygon, a portion of a plane bounded on all sides by more than four finite straight lines. Polygons having all their sides equal are called equilateral; those having all their angles equal are called equiangular; and those which are both equilateral and equiangular are called regular polygons. Similar polygons are to one another as the squares of their homologous sides.

Polygonaceae, a natural order of the dicotyledonous plants including the rhubarb, buckwheat, and sorrel. They have no petals, and the stipules are usually united into a tube round the stem. Many have purgative properties.

Polygonatum, or Solomon's Seal, a perennial herb of the order Liliaceae, with bell-shaped flowers and red or purple berries.

Polygonum, an alternative name of the buckwheat (q.v.).

Polyhedron, a solid bounded by polygons (q.v.) called faces. When the faces are regular polygons, the polyhedron is also said to be regular; the only regular polyhedrons are the regular tetrahedron, hexahedron, octahedron, dodecahedron, and icosahedron, having four, six, eight, twelve and twenty sides respectively.

Polyhymnia, one of the nine Muses (q.v.); she is represented as in a pensive mood, with her forefinger on her mouth; she was the inventress of the lyre and the mother of Orpheus.

Polymerization, in chemistry, the change of a compound into another of the same atomic composition but of higher molecular weight, by the forced combination of several molecules of the former substance into one of the new. The agent used may be heat or a chemical reagent; in some cases the polymerization is spontaneous. The chemical properties of the substance undergo a complete change, as in the polymerization of acetylene into benzene.

Polynesia is the collective name of all the islands of the southern Pacific of coral or volcanic origin. Those of New Zealand are the largest; the other main

groups are the Gilbert, Ellice, and Tokelau Is., belonging to Great Britain; Samoa, partly British and partly American; and the Society, Marquesas, Austral and Tuamotu Is., which are French. The name is sometimes extended to include Melanesia, Micronesia, and the Hawaiian group; there are also many small and scattered islands not included in any group.

They cover a stretch of ocean 7,000 m. from N. to S., and 6,000 from E. to W. With the exception of the two chief members of the New Zealand archipelago they are mostly small, and exhibit wonderful uniformity of climate. They are extremely rich in flora; characteristic of their vegetation are palms, bread-fruit trees, and edible roots like yams and sweet potatoes, forests of tree-ferns, myrtles, and ebony. Their fauna is poor, the population consists of various mixed strains. Traces of extinct civilizations are found in Easter I. and the Carolines. Most of the islands are now more or less Christianized; the native races are dying out before the immigration of Europeans and Asiatics.

Polyphony, a kind of musical composition in which several melodic strains are simultaneously developed without being in subordination to each other. Polyphonic music reached its climax with the work of Palestrina (q.v.) in the 16th Century.

Polypus, or Polyp, in medicine, a tumour on a mucous membrane, especially in the nose, ear, rectum or uterus. Nasal polypi are the most frequent; they may cause slight difficulty in breathing or complete obstruction. Surgical treatment is desirable, as they may slough or become malignant.

Polytechnic, an institution for instruction in various branches of technology and applied art. The well known London Polytechnic in Regent Street, the type of such institutions in England, was founded by Quintin Hogg in 1880. They are now to be found in most large towns of England, and are usually maintained by the local education authorities.

Polytheism, a belief in a plurality of gods, usually the result of a personification of natural forces, as in ancient Greece, Rome and Scandinavia, or of the fusion of various races and the consequent "pooling" of their divinities.

Polyuria, excessive discharge of urine; it is a symptom rather than a disease, and is found most commonly in connection with kidney complaints, nephritis and diabetes. It may occur as an alternative to perspiration if for some reason the latter is impeded.

Polyzoa, a phylum of invertebrate aquatic animals whose members consist of a colony of individuals formed by budding from a single individual. There are a large number of groups and genera, differing widely in appearance and way of life. Each member of the colony dwells in a separate chamber, with its own nutritive and reproductive organs.

Pomegranate, a dense shrub of the family Punicaceae, from 8 to 20 ft. in height, extensively cultivated in S. Europe. The fruit is as large as an orange, having a hard rind filled with a soft pulp and numerous red seeds. It is astringent.

Pomerania (Pommern), a part of Prussia, Germany, S. of the Baltic and N. of Brandenburg; a flat, sandy district with numerous lakes; principally agricultural; Stettin is the largest town. Before the 19th Century much of the province was for a time Swedish territory.

Pomeranian Dog, a toy breed of dog with long and silky white, black or brown hair, strongly

built, with sharply pointed muzzle and a thick bushy back-curved tail. It is sometimes known by its German name of "Spitz."

Pomona, or **Mainland**, the largest island in the Orkneys. Almost cut in two by the inlets Kirkwall Bay and Scaja Flow; the only towns are Kirkwall and Stromness.

Pomona, in the Roman mythology, is the goddess of fruits, who presided over their ripening and in-gathering, and was generally represented bearing fruits in her lap or in a basket.

Pompadour, Marquise de, mistress of Louis XV., born in Paris, for 20 years exercised great influence over him and the affairs of the kingdom, filling all positions in the state with her own nominees and reversing France's traditional policies. She was a patroness of art and numbered Voltaire in her circle. (1721-1764).

Pompeii, an ancient Italian seaport on the Bay of Naples, a popular pleasure resort of the ancient Romans; devastated by an earthquake in 63, it was restored, but in A.D. 79 was buried in an eruption of Vesuvius. Since 1748 the city has been largely disinterred, many temples, houses, and other buildings having been brought to light, with a portion of the city walls.

Pompey (Gnaeus Pompeius), surnamed the Great, Roman general and statesman; entered into public life after the death of Marius; associated himself with Sulla; distinguished himself in Africa and in the Mithridatic War; was raised to the consulate with Crassus in 71 B.C.; cleared the Mediterranean Sea of pirates in 67-66; formed against the Senate, along with Caesar and Crassus, the first triumvirate, and in 54 entered into rivalry with Caesar; after a desperate struggle he was defeated at Pharsalia, and, escaping to Egypt, was assassinated there by order of Ptolemy XII. (106-48 B.C.).

Pompey's Pillar, a red granite column dedicated to Diocletian, 98½ ft. in height including the capital and pedestal, erected at Alexandria in the 4th Century, A.D., and so-called from being mistakenly supposed to indicate Pompey's burial-place.

Poncho, a cloak or shawl, of woollen shape, with a slit in the centre, through which the wearer passes his head, worn by natives of South America.

Pondicherry, a small French colony in India, 53 m. S. of Madras; was first occupied in 1674. It was captured by the Dutch in 1693, and by the English successively in 1761, 1778, and 1793, but on each occasion restored. Pop. 179,000. The capital, Pondicherry, is the chief town of the French possessions in India. Pop. 49,000.

Pondweed, a genus of waterweeds, or submerged and translucent leaves, and green flowerets. The Cape pondweed flowers freely in winter in Great Britain. It is the typical genus (Potamogeton) of its natural order. There are 11 British species.

Ponsonby William Harry Ponsonby, 1st Baron, British Labour politician; son of Sir Henry Frederick Ponsonby, private secretary to Queen Victoria. In diplomatic service, 1894-1899; in Foreign Office, 1900-1903. Entered the Commons as Liberal in 1906; as a Labour member in 1923. Held minor government offices in 1924 and 1929-1931. Ennobled, 1930. Chancellor of the Duchy of Lancaster, 1931. Leader of Opposition in House of Lords, 1931-1933, after which he became a propagandist of pacifism in connection with the Peace Pledge Union. (1871-).

Pontefract, market-town of Yorkshire, Leeds; has a castle in which Richard II. died, and which suffered four sieges in the Civil War, a well-known grammar school, and market-gardens, where liquorice for the manufacture of L'omfret cakes is grown. Pop. 19,900.

Pontevedra, a province of NW. Spain, on the Portuguese frontier and the Atlantic, mainly occupied in agriculture and fishing. Area, 1,690 sq. m. Pop. 582,500. Its capital of the same name, 15 m. NE. of Vigo, has a pop. of c. 25,000.

Pontifical, a Roman Catholic service book containing the text of and directions for those services such as confirmation, ordination, and the consecration of churches, which can be performed only by bishops.

Pontine Marshes, a district in the Campagna of Rome, formerly the most unhealthy of the malarial districts of Italy, used as grazing ground for herds of cattle, horses and buffaloes. The area is now being drained under the auspices of the Italian government, the reclaimed area constituting the new province of Littoria.

Pontius Pilate, Roman procurator of Judaea and Samaria, in the days of Christ, from A.D. 26 to 36; handed over Jesus to the Jewish priestly authorities for crucifixion. He is alleged to have died by suicide at Vienne, and to have been buried at Mons Pilatus on Lake Lucerne.

Pontoon, a floating bridge, particularly one constructed to enable troops to cross a river or other piece of water. It is usually constructed on a light flexible wooden framework of floats connected by ropes; the floats are occasionally hollow metal cylinders.

Pontus, the classical name of a country on the SE. shores of the Black Sea, stretching from the R. Halys to the borders of Armenia; is represented by the modern Turkish provinces of Trebizond and Sivas. Originally a Persian province, it became independent shortly after 400 B.C., and remained so till part was annexed to Bithynia in 65 B.C., and the rest constituted a Roman province in A.D. 63.

Pontypool, a town of Monmouthshire, England, 18 m. from Monmouth, and on the edge of the S. Wales ironstone and coal district. There are manufactures of heavy iron work and tin plates. Pop. 41,000.

Pontypridd, market town of Glamorgan, Wales, on the R. Taf, 12 m. from Cardiff. It has iron and coal mines and cable works. Pop. 40,100.

Pony, a small variety of the domesticated horse, ranging in height from 8 or 9 to 14 hands. Of the many varieties the following are typical: Connemara, at one time Irish, usually of a dun colour; Dartmoor, a small pony with good shoulders, brown, grey and black; Exmoor, a very hardy pony capable of carrying enormous loads on little food; Highland, a good saddle pony with great powers of endurance; New Forest, handsome animals with an Arab strain.

Poodle, a pet breed of dog, with long curling hair, which in domestication is often partially clipped or shaved; it is noted both for affection and intelligence, and is frequently trained to perform tricks of various kinds. The best breeds are pure white or pure black.

Poole, largest town of Dorsetshire, England, land, 5 m. W. of Bournemouth; a fishing port, with a trade in potters' clay; Poole Harbour, a stretch of water 7 m. long containing Brownsea or Branksa I. is a favourite yachting centre. Pop. 67,000.

Poona, town in British India, 119 m. SE. of Bombay, the chief military station in the Deccan, and in the hot season the centre of government in the Bombay Presidency. Silk, cotton, paper, and jewellery are manufactured. It was the capital of the Mahrattas, and was annexed by Britain in 1818. Pop. 250,000.

Poor Law, until 1930, was administered in England under a system dating back to 1601, when overseers of the poor were first established for each parish. In 1834 the system was overhauled and Boards of Guardians (q.v.) set up. In 1930 these were abolished and their duties transferred to County and County Borough Councils, who now relieve necessitous persons and perform kindred duties through Public Assistance Committees, operating under the general supervision of the Ministry of Health.

Pope, a title in the western church used only by the Bishop of Rome, as, in the belief of Roman Catholics, supreme head of the Church, successor of St. Peter, and vicar of Jesus Christ, infallible in his official teaching in matters of faith and morals. See also **Papacy**. In the eastern orthodox communion the name is applied to any parish priest.

Pope, Alexander, English poet, born in London, of Roman Catholic parents, was a sickly child, and marred by deformity, and imperfectly educated; began to write verse at 12. His *Pastorals* appeared in 1709, *Essay on Criticism* in 1711, and *Rape of the Lock* in 1712; in 1715-1720 appeared his translation of the *Iliad*, and in 1723-1725 that of the *Odyssey*. Afterwards, in 1725, appeared the *Dunciad*, a scathing satire of all the poets and critics who had annoyed him, and in 1732 the first part of the famous *Essay on Man*. (1688-1744).

ALEXANDER POPE

Poperinghe, a town of Flanders, Belgium, 7 m. SW. of Ypres. It was the railroad for the Ypres area during the World War and was taken by the Germans in their first advance, but soon recaptured by the Allies. The famous institute known as *Toc H* (q.v.) was established there in 1915. Pop. 12,000.

Popish Plot, an imaginary plot of land devised in 1678 by Titus Oates (q.v.); as a result of his impostures a number of innocent people lost their lives.

Poplar (*Populus*), a genus of catkin-bearing trees found in Northern temperate regions and included with the willows in the natural order Salicaceae. The chief of the 20 species are the White (*Populus alba*), the Black (*P. nigra*), the Balsam (*P. balsamifera*) and the Aspen (*P. tremula*).

Poplar, a metropolitan borough in the county of London, England, on the N. bank of the Thames, connected with the opposite bank by the Blackwall and Greenwich tunnels. The East India, West India and Millwall Docks occupy much of its southern portion. Pop. 140,300.

Popocatepetl (i.e., mountain of smoke), a volcano in Mexico, 45 m. SE. of Mexico City; it has an altitude of 17,880 ft.

Poppæa, Sabina, Roman empress, the murdered first wife of Nero, who married her; she had previously been married to Otho, Nero's second successor. She died shortly after marriage as a result of her husband's treatment.

Poppy, name for any plant of the genus *Papaver* which comprises some

110 species found in Europe, Asia, America, South Africa and Australia. They are herbaceous plants, all bearing large, brilliant but fugacious flowers. The White or Opium Poppy (*Papaver somniferum*) yields the well-known opium of commerce which is obtained by cutting notches in the half-ripened seed capsules. Most are natives of Europe. Four species, including *Papaver Rhæas*, the Common Poppy, are found in Britain.

Population. In all civilized countries a census of the population is now taken periodically by the State; in the United Kingdom at 10-yearly intervals. The most notable feature of the returns during the early 20th Century has been the decline in western Europe of both the birth rate and the death rate. The lower birth rate is largely attributable to the deliberate limitation of families; the lower death rate to better methods of combating disease, especially among infants.

Density of population is affected by the growth of wealth and conditions which make it easy to support life. In early times, when water was the first necessity of life, the basins of such rivers as the Nile became centres of dense population, but in modern times industrial development has seen the growth of large and densely populated towns as a result of the wealth in the soil, e.g., coal and iron, conditions favourable to the establishment of centres of commerce, e.g., London, New York.

Porcelain, name for the finer varieties of white china or earthenware. It is made from clay and hardened by heat, the body being vitrified and translucent. It was first made in China between the 6th and 8th centuries. In England it appeared best as Spode ware in 1800, but earlier types were the soft paste varieties of Bow and Chelsea. Among the finest is that of Sèvres, in France. Derby and Worcester are centres of English porcelain industry.

Porcupine, the common name of two families of rodents, the

Hystriidae or Old-World Porcupines, and the Erethizontidae, or New-World Porcupines, all having bodies covered, especially on the back,

COMMON PORCUPINE

with spike-like structures, called quills. The Common Porcupine (*Hystrix cristata*) is found more rarely now in S. Europe and N. Africa. Some of the American species are arboreal.

Pork, the flesh of swine, one of the most important and widely used species of animal food. It is coarse and ranker than beef or mutton, but when of good quality and well-cured develops a richness and delicacy of flavour superior to that of other salted meat. It was forbidden as food by the Mosaic law, and is regarded by Jews and Mohammedans as unclean, while in China it is eaten almost to the exclusion of other mammalian flesh foods. It contains less fibrine, albuminous and gelatinous matter than beef or mutton, and the abundance of fat renders it a suitable diet for cold countries.

Porphyry, an igneous rock with a crystalline pect ground through which crystals of another tint are scattered, so as to

give it a speckled aspect. The original type was the purple-red antique porphyry of Italy. **Porpoise**, a genus (*Phocaena*) of cetacean mammals belonging to the dolphin family. One species, the *Phocaena phocaena* or *Phocaena communis* is common in British waters. It is one of the smallest but attains a length of 5 to 7 ft. It feeds on herrings; schools of porpoises cause much destruction to the herring shoals.

Porsena, a king of Etruria, famous in the early history of Rome, who took up arms to restore Tarquin, the last king, in 509 B.C., but was reconciled to the Roman people from the brave feats he saw them accomplish, especially that of Cincinnatus, who defended the head of the bridge while the Romans destroyed it.

Port Adelaide, city in S. Australia, 8 m. S. of Adelaide, of which it is the port; it is now incorporated with Adelaide.

Portadown, linen-manufacturing town in Armagh, Northern Ireland, on the R. Bann, 10 m. N.E. of Armagh. Pop. 12,000.

Port Arthur, a naval station on the peninsula extending S. into the Gulf of Pe-Chi-Li; leased by China to Japan until 1914. Fought for in the Russo-Japanese War of 1904, it was captured by Japan and ceded to her at the end of the war, China renewing the lease in 1915. Pop. c. 25,000.

Port-au-Prince, capital of the republic of Haiti, on the W. coast; has a fine harbour, and exports coffee, logwood, etc. Pop. 115,000.

Portcullis, a strong grating, resembling a harrow, hanging over the gateway of a fortress, let down in case of necessity to prevent hostile ingress.

Port Elizabeth, town in Cape Province, South Africa; stands on Algoa Bay, 85 m. S.W. of Grahamstown; principal exports wools, hides, and ostrich feathers. Pop. (white) 53,500.

Port Glasgow, shire, Scotland, on the Firth of Clyde, 3 m. E. of Greenock; founded by Glasgow in 1668 as a port for that city before the deepening of the river was projected. In the beginning of the 18th Century it was the chief port on the Clyde, but has since been surpassed by Greenock and Glasgow itself. There are shipbuilding, iron and brass founding industries, and extensive timber ponds. Pop. 19,600.

Porthcawl, urban district and holiday resort of Glamorganshire, Wales, 30 m. W. of Cardiff. Coal and iron are exported. Pop. 6,400.

Port Huron, city of Michigan, U.S.A., on the R. St. Clair, 50 m. N.E. of Detroit. It has shipbuilding, engineering, and motor-car manufacturing industries. Pop. 31,400.

Portico, a row of columns, generally in building, front of the entrance of a building, though any erection consisting of a row of pillars connected with an adjoining wall by a covering roof, or a double row in which the intervening space is roofed over, may be so called.

Portishead, urban district and holiday resort of Somerset, England, on the Severn estuary, 9 m. W. of Bristol. Its dock belongs to the port of Bristol. Pop. 3,900.

Port Jackson, fine natural harbour of New South Wales, Australia, upon the shores of which Sydney is situated.

Portland, largest city and principal seaport of Maine, U.S.A., on a peninsula in Casco Bay, 108 m. N.E. of Boston by rail. It has a good harbour and fishing, shipbuilding and shoemaking industries. Longfellow was born here. Pop. 70,800. (2) Largest city in Oregon, U.S.A., on the Willamette R., nearly 800 m. N. of San Francisco; there are iron-foundries, canneries, and flour-mills; the river being navigable for ocean steamers, it is a thriving port of entry. Pop. 302,000.

Portland, Isle of, a rocky peninsula in the SW. of Dorsetshire, England, connected by Chesil Bank with the mainland; is the source of great quantities of fine building limestone; here is also convict-prison, opened 1848, accommodating 1,500 prisoners.

Portland Cement, a building material, manufactured from the river deposits of the Thames and Medway estuaries, containing a mixture of three parts of calcium carbonate to one part of clay. It is used in building and structural work of various kinds.

Portland Vase, an ancient cinerary urn of dark blue glass ornamented with Greek mythological figures carved in a layer of white enamel, found near Rome about 1640, and in the possession of the Portland family in 1787; it is now in the British Museum. In 1845 the vase was broken by a lunatic, but it was skillfully restored. In 1929 it was put up for sale by auction, but not finding a high enough bidder it was returned to the Museum. It is 10 in. high and 7 in. round.

Port Louis, capital of Mauritius, on the NW. coast; the chief port of the colony, with an excellent harbour and a naval coaling-station. Pop. 56,000.

Portmadoc, seaport and market-town of Caernarvonshire, Wales, 16 m. S.E. of Caernarvon. Slate is exported. Pop. 3,970.

Port Mahon, capital of Minorca, Balearic Is., a Spanish naval station with an excellent harbour; exports cattle, cheese and leather goods. Pop. 18,000.

Port Moresby, capital and port of Guinea, on the S. coast. It has a wireless station and regular steamer service with Sydney. Copper is found near by. Pop. 3,000.

Porto Alegre, city of Brazil, in the state of Rio Grande do Sul, about 200 m. N. of the city of that name. It is a rapidly growing town, and the principal commercial centre of the southern part of the republic. It has a large German community. Pop. 322,000.

Port of London Authority, the body charged with the care and administration of the Port of London, including the Thames below Teddington Lock and all the docks of the Port. It is composed partly of members appointed by government departments, the City Corporation, L.C.C., and Trinity House, partly of others elected by those concerned with the trade of the port. It is in charge of over 4,200 acres of docks, and 70 m. of the riverway.

Port of Spain, or Spanish Town, seaport and capital of Trinidad, British W. Indies, on the E. coast. Oil and cocoa are exported. Pop. 76,400.

Porto Rico. See Puerto Rico.

Portpatrick, port and seaside resort of Wigtownshire, Scotland, 7 m. S.W. of Stranraer. The nearest port (21 m.) to Northern Ireland, it was formerly (until 1849) a terminal of the Irish mail packets. Pop. 1,600.

PORTICO

Portree, seaport and holiday resort of the Isle of Skye, Scotland, of which it is the capital and main business centre. Pop. 2,200.

Port Royal, a convent, 8 m. SW. of Versailles, France, which in the 17th Century became the headquarters of Jansenism. Afterwards inhabited by nuns, the convent was demolished in 1710.

Portrush, port and seaside resort of Co. Antrim, Northern Ireland, on the N. coast, 7 m. NE. of Coleraine. It is connected by steamer with Liverpool and Glasgow. Pop. 2,000.

Port Said, town and coaling station of the Suez Canal. It has a large trade, especially in cotton. Pop. 127,000.

Portsmouth, city and seaport in Hampshire, England, on Portsea I., 15 m. SE. of Southampton; the most important British naval station. The harbour can receive the largest war-vessels, and in Spithead rodstead 1,000 ships can anchor at once. It was the scene of Buckingham's assassination and the loss of the *Royal George*. Three novelists were born here — Dickens, Meredith, and Besant. Southsea, now a part of the city, is a popular holiday resort. The old church of St. Thomas is being enlarged as a cathedral. Pop. 251,000.

Portsmouth, (1) largest city of New Hampshire, U.S.A., and only seaport in the State, on the Piscataqua R., 3 m. from the ocean; 67 m. NE. of Boston, a handsome old town and favourite watering-place; near it is a U.S. navy-yard. Here was signed the treaty that ended the Russo-Japanese War in 1905. Pop. 14,500.

Port Sudan, seaport of the Sudan, on the Red Sea, 40 m. N. of Suakin. Ivory and cotton are exported, and salt is largely worked in the neighbourhood. Pop. 23,000.

Port Sunlight, model village of Cheshire, England, 3 m. SE. of Birkenhead. It is entirely engaged in soap manufacture.

Port Talbot, port and town of Glamorganshire, Wales, 1½ m. SE. of Aberavon. It has a good harbour, and copper smelting is carried on. Pop. 40,500.

Portugal, of the Iberian peninsula, between Spain and the Atlantic; watered by the rivers Minho, Douro, Tagus, Guadiana and Mondego. It is generally mountainous, except on the coast; the S. contains large areas of pasture. Wheat, maize, oats, barley, rice and potatoes are grown; olives and the vine are cultivated. The chief exports are wine, sardines, cork and resin. The principal imports are iron and textiles. The capital is Lisbon, on the Tagus; other towns are Oporto, Coimbra and Evora.

The people are Roman Catholics of mixed race, showing traces of Arab, Berber and negro blood with a predominance of northern strains. The language is akin to Spanish. The 14th and 15th Centuries saw the zenith of Portugal's fortunes. She was then the foremost maritime and commercial power of Europe. Her navigators founded Brazil and colonised India; but in the 18th Century extensive emigration, the expulsion of the Jews, and other causes led to a speedy downfall. For a time she was annexed to Spain. Regaining her independence she threw herself under the protection of England, during the Napoleonic struggle. Since 1910 the country has been considerably developed, education has spread, and Portugal is rapidly taking her place as an up-to-date European state. Since the 15th Century she has been "England's ally." Area 35,500 sq.m. Pop. 6,826,000.

Portuguese Africa. See Mozambique; Angola.

Portuguese Guinea, a colony of Portugal on the W. African coast, including the neighbouring Bijagos Is.; rice, wax and oil are produced. The capital is Bolama, on the island of that name. Area 14,000 sq. m. Pop. 390,000.

Portuguese India, collective name for the Portuguese settlements on the Indian coast, including Goa, Damão, and Diu, with some adjoining inland territory and small islands off the Malabar coast. Salt and manganese are mined, and fish, spices and coconuts exported. The capital is Nova-Gôa, or Pangim. Area 1,540 sq. m. Pop. 580,000.

Portuguese Man-of-War,

a tropical jellyfish of the group Siphonophora, beautifully coloured, consisting of a freely-swimming float below which hang the motor, sexual and nutritive appendages. It is occasionally found off the western British coasts. It has a powerful sting.

Port Wine, a red wine produced in Portugal, in the mountainous district called Cima do Douro, and shipped from Oporto, whence its name. It is often adulterated with Spanish Tarragona wine. Catechu is some-man-of-war times added to impart an astringent flavour. It is now largely imitated by Australian and South African wines.

Poseidon, in Greek mythology, the god of the sea, a son of Kronos, and brother of Pluto, Hera, Hestia, and Demeter, equivalent to the Roman Neptune; had his home in the sea depths, on the surface of which he appeared with a long beard, seated in a chariot drawn by brazen-hoofed horses with golden manes, and wielding a trident.

Positive Rays, or Canal Rays, rays positively charged particles, first observed by Goldstein in 1886 while experimenting with rarefied gases. They are produced by the ionization of gases in a strong electric field, and their analysis by Sir J. J. Thomson and others has led among other things to the discovery of numerous elemental isotopes (q.v.).

Positivism, the philosophy of Auguste Comte (q.v.), an attempt at the classification of knowledge on the basis of its relation to man. It sought to substitute abstract Humanity for supernatural objects of devotion or metaphysical abstractions as the goal of human effort, and to correlate all human activities in the service of the race as a whole. It was popularised in England by Herbert Spencer and Frederick Harrison.

Positron, the positive electron, discovered by Anderson (1932) and Blackett and Occhialini (1933). Positrons are formed by the action of cosmic rays upon matter, by bombarding light elements by neutrons (q.v.), and in other ways. A positron has an existence of only a fraction of a second, since when it collides with a negative electron the two are annihilated as such, and converted into radiation.

Possession, in law, the actual holding of a thing as distinct from ownership, which presupposes legality; possession creates a presumption (q.v.) of ownership, and possession over a long period may frequently give a title against a previous owner.

Poste Restante, department of a letters he till they are called for by the addressee.

Post-Impressionism. See Futurism.
Postmaster-General, the Cabinet Minister in charge of the Post Office. The office was established in 1657, when the Government monopoly of letter-carrying was first established by statute.

Post Mortem, the examination of a body to ascertain the cause of death. Such an examination may be ordered by a coroner when he considers it necessary.

Post Office, the authority entrusted with the conveyance of mails, and one of three great revenue-collecting departments, came into existence in Great Britain in the 16th Century, the first Postmaster General, or "Master of the Posts," being appointed in 1657. Penny post in London was established in 1681, and throughout the country in 1840, through the exertions of Rowland Hill. The present London General Post Office was opened in Newgate in 1910.

The Post Office's receipts are now £72 millions per annum. In addition to operating postal, telephone and telegraph services, it receives considerable sums for duties and licences on behalf of the Inland Revenue Department, the Customs and Excise Department, and the County Councils, and for National Insurance on behalf of the National Health Insurance Commissioners and the Board of Trade. It issues wireless licences, motor drivers' licences and entertainment stamps, and sells unemployment insurance stamps. It also pays Widows' and Orphans and Old Age pensions and Naval, Military and Air Force pensions and allowances. The Post Office Savings Bank was inaugurated in 1861; and the Money Order Office in 1792; the telegraphs were transferred to the department in 1870; the Parcel Post was started in 1883; the telephone service has been exclusively owned and operated by the government since 1912. Air Mails were inaugurated in November 1919, when a regular London-Paris service was established, and have been extended since to include services as far afield as Australia and South Africa.

Potassium, a metallic chemical element belonging to the alkali-metal group; Symbol K (from the Latin *kali*); atomic number 19; atomic weight 39.1. First isolated by Sir Humphry Davy in 1807, it is a soft, silvery-white, and very reactive metal, rapidly corroding in the air and liberating hydrogen from water so energetically that the gas inflames. The metal itself has few uses, but its compounds, e.g., the nitrate (nitre, or saltpetre), chlorate, cyanide, and bromide, are of considerable importance.

Potassium Bromide, a white solid made by the action of bromine upon potassium hydroxide solution. It is used in medicine as a sedative, and as a retarder in photographic development.

Potassium Chlorate, a white fine solid discovered by the French chemist Berthollet in 1786. In the laboratory it is used as a convenient source of oxygen. It is a good germicide and is used in certain throat lozenges; it is also a powerful oxidising agent and is used in this character in the dye and other industries.

Potassium Cyanide, or Cyanide of Potash, a white crystalline solid made by fusing potassium ferro-cyanide with potash, and also synthetically. Although intensely poisonous, it has many applications.

Potassium Nitrate. See Nitre.

Potato, a universally cultivated plant (*Solanum tuberosum*), of S. American origin, the tubers of which are an important foodstuff, the tubers being swollen underground branches, the "eyes" being buds in aborted leaf-axils. By ridging and covering more of the leaf-axils of the plant, an increase in the number of horizontal underground branches is achieved and an increase in the yield. It is commonly believed that Sir Walter Raleigh introduced it into England (1586). Many varieties are grown, differing in size, form and colour and in the season of yield. The potato is cultivated also for making ethyl alcohol, starch, etc. The chief disease of potatoes is a decay caused by the fungus *Peronospora infestans*, probably due to excess of moisture.

Potemkin, Grigori Aleksandrovich, Russian statesman and general, of Polish birth. As an army officer he met the Empress Catherine II. and, becoming her favourite, was soon practically co-ruler of the Empire, being largely responsible for the partition of Poland. He achieved great military successes in the Turkish war, but died at last by poison. (1739-1791).

Potential, in electricity, a term implying the same relation to electricity that level does to gravity. The Earth's potential is taken at zero. A positively-charged body tends to move from a point of higher to a point of lower electric potential. A potential transformer is an instrument for connecting electrical measuring instruments to a high-voltage circuit.

Potentilla, a genus of perennial herbs of the order Rosaceae, mostly yellow- or white-flowered, among the British species of which are the silverweed, goosegrass or wild tansy (*P. Anserina*), whose roots are eaten in the Scottish Is., Cinquefoil (*P. reptans*), and *P. Tormentilla*, found in the Orkneys and Lapland, used for tanning and dyeing, and medicinally as a gargle.

POTENTILLA

Pot-holes, cylindrical cavities, varying in depth and diameter, produced by eddyling streams which cause a mass of detritus to revolve and so wear away the rock with which it is in contact. They are often found in caves and are sometimes known as "Giant's Kettles."

Potomac River, river in the U.S.A., rising in the Alleghany Mts., flows 400 m. eastward between Maryland and the Virginia into Chesapeake Bay; the Shenandoah is its chief tributary. The river is navigable as far up as Cumberland, and is tidal up to Washington, which is on its banks.

Potosi, town of Bolivia, capital of a dept. of the same name, situated 13,000 ft. above sea-level on the slopes of the Cerro de Potosi; is one of the loftiest inhabited towns on the globe. There is a cathedral, next to that of Lima the finest in South America. Silver mining was formerly carried on, but tin and bismuth are now the principal products of the neighbourhood. Pop. 36,000.

Potsdam, German town, formerly the residence of the Emperors, 18 m. SW. of Berlin, stands on an island at the confluence of the Nuthe and Havel, and is the capital of the Prussian province of Brandenburg; a handsome town, with broad streets, many parks and squares, numberless statues and fine public buildings; has furniture, sugar and chemical works, and a large violet-growing industry. Pop. 74,000.

Potteries, The, or "Five Towns," a district in North Staffordshire, England, 9 m. long by 3 m. broad, the centre of the English earthenware manufacture. It is mostly included in the city of Stoke-on-Trent. Its life has been depicted in the novels of Arnold Bennett.

Pottery, a general name for objects made by moulding into shape and baking clay; the clay may be either glazed or unglazed. Unglazed pottery is porous, the clay being simply baked till it is hard. Most early pottery was of this kind, although some Greek and Etruscan ware was painted with a lustre, which made it non-porous. Glazed pottery is generally manufactured from clay marl, to which fine sand is added in the proportion of about 1 to 3 in order to counteract the shrinking of the clay. The marl is first purified, washed and allowed to remain in a damp atmosphere for some months. The sand is then kneaded into the clay, which is afterwards moulded to the required shape on the potter's wheel. The earthenware is then dried and placed in the oven for a first firing, which gives it the appearance known as "bisquit." The glaze may then be painted on; after which it receives a second firing at a temperature of from 900° to 1,000° Centigrade. The base of most glazes is white lead, but leadless glazes have now been invented.

Pouched Mouse, an American rodent (genus *Dipodomys*) with long tail and hind-legs adapted for leaping, and large cheek-pouches. It is found mainly in California, and its diet is principally nuts and seeds. An Australian marsupial, the insect-eating genus *Phascogale*, of which there are several species, bears the same name; it is also called the Kangaroo-rat.

Poughkeepsie, a city and manufacturing centre of New York State, U.S.A., on the Hudson R. Here are Vassar College for women, and other educational establishments. Pop. 40,300.

Poulsen, Valdemar, Danish inventor, made many discoveries in connection with telephony, and invented a system of wireless telegraphy; invented the Poulsen arc for the production of electromagnetic oscillations of high frequency. (1869-).

Poultice, a preparation of bread-crumbs, linseed-meal, oatmeal, or other soft farinaceous materials soaked in hot water and applied externally to the body as a means of applying local heat to reduce pain or relieve inflammation. It is generally enclosed in a muslin or linen bag; the heat so applied should be as great as can be borne.

Poultry, domestic and wild fowl of the single original species, *Gallus Ferruginus* or *Banivva*, can, according to Darwin and others, be regarded as the parent of all the various domestic breeds, though this theory is now disputed by many, as breeds from China show structural variations. In any event wild fowl have been domesticated since the earliest times, although not among nomadic peoples. The ancient Egyptians were noted for their success in keeping poultry, and even to-day the Mediterranean breeds are renowned layers. Domestic breeds have been reared principally for egg-laying, and pullets of a good strain are capable of laying from 150 to 300 eggs per year. A good flock average of 180 should, however, be aimed at. Egg-production and the rearing of table poultry has now become a large industry. For rearing in a confined space the "battery" system has been devised, but semi-intensive housing is, perhaps, better. Poultry should also be provided with covered grass runs. There are roughly two systems of feeding: the wet mash system, alternating with grain feeds, and the dry-mash system, with several

variations, the latter being perhaps more labour-saving, and, on large farms, conducive to better results.

Pound, an English measure of weight, containing sixteen avoirdupois ounces or 7,000 grains; the former Troy pound, no longer recognized, contained 5,760 grains, being thus roughly four-fifths of the avoirdupois pound.

Pound, or **Pound Sterling**, the basis of the British monetary system, a gold coin eleven-twelfths fine (i.e., 22 carat), weighing 123.274 grains. It contains 240 pence, and the name is derived from the fact that formerly 240 pennies were equal to a Troy pound weight of silver. Since 1925, it has been replaced in ordinary circulation by the paper Treasury Note.

Pound, a place in which cattle or other animals are confined when found straying or trespassing. Any constable finding an unattended animal at large in the street may remove it to a pound, to be detained until it is claimed and the expenses of its detention are paid. Most rural towns and villages set apart some site for use as a pound.

Poussin, Nicholas, French painter, born near Andelys, Normandy; studied first in Paris and then at Rome; in 1640, Louis XIII appointed him painter-in-ordinary, with a studio in the Tuileries, but he returned three years after to Rome, where he died. He is known by numerous great works, among which may be mentioned the "Shepherds of Arcadia," "The Deluge," "Moses drawn out of the Water," "The Flight into Egypt," etc. Many of his works are in the Louvre. (1594-1665).

Power of Attorney, an instrument by which one person authorises another to do on his behalf some act or acts, such as to collect his debts, to execute a deed or to transfer stock.

Poynings, Sir Edward, English statesman, born in Kent; after taking part in the Kentish rising of 1483, he fled to Europe, taking part in the Flanders wars; he became Governor of Calais in 1493, and in the following year Lord Deputy of Ireland, in which capacity he called together the Parliament that passed Poyning's Law (q.v.). He defeated the Irish who rose in support of the Pretender Perkin Warbeck. (1459-1521).

Poyning's Law, an Act of the Irish Drogheda in 1494, in the reign of Henry VII, subjecting the Irish Parliament to the authority of the English Privy Council; so called from Sir Edward Poynings, the Lieutenant of Ireland at the time.

Poynter, Sir Edward John, English artist, born in Paris; from 1876, held appointments at University College and at Kensington, but resigned them in 1881, to prosecute his art; Director of the National Gallery from 1894, and President of the Royal Academy in 1896; is the author of *Lectures on Art*, and the designer of some mosaics in the Houses of Parliament. His paintings, such as "Atalanta's Race" and "Nausicaa and her Maidens" are mostly of classical subjects. (1836-1919).

Poznan (*Posen*), a province of W. Poland, on the German frontier, is traversed by the R. Warta. The prevailing industry is agriculture; the crops are grain, potatoes and hops; there are manufactures of machinery and cloth. Area, 10,260 sq. m. Pop. 2,106,500. The capital is Poznan (*Posen*), on the Warta, 185 m. E. of Berlin. It manufactures machinery and was once the capital of Poland.

Prado, Museo del, the national Spanish museum and art gallery at Madrid, remarkable for its collection of

paintings by Goya, Velazquez, and the later Italian painters.

Præfectus, a name given to various magistrates, particularly the "Præfectus urbi" or urban prefect, who under the Empire was in charge of the city police responsible for public order. The head of the Emperor's bodyguard was called the prætorian prefect, and other "præfeti" supervised the aqueducts, the provisioning of the troops and the urban population, and so on.

Præmunire, originally the name of a writ, from its opening word; later applied to those offences for which such a writ lay and the penalties provided for them. Such offences mostly concerned ecclesiastical affairs; in the reign of Edward I. a statute of Præmunire sought to repress Papal encroachments on royal authority. The penalties of præmunire include forfeiture of all property and imprisonment at the King's pleasure; they are still in theory applicable to episcopal electors who refuse to accept a candidate for a vacant see nominated by the King. No Præmunire prosecution has been undertaken since Stuart times.

Prætor, a Roman magistrate at first, virtually a third consul, with administrative functions, chiefly judiciary, originally in the city, and ultimately in the provinces as well, so that the number of them increased at one time to as many as 16.

Prætorian Guard, in the Roman Empire, a select body of soldiers chosen to guard the person and maintain the power of the emperors. They at length acquired such influence in the state as to elect and depose at will the emperors themselves, disposing at times of the imperial purple to the highest bidder, till they were in the end outnumbered and dispersed by Constantine, in 312.

Pragmatic Sanction, a term applied to the decree promulgated by Charles VI, emperor of Germany, whereby he vested the right of succession to the throne of Austria in his daughter, Maria Theresa, a succession which was guaranteed by France and most of the European Powers.

Pragmatism, a philosophical system at the end of the 19th Century, connected especially with the name of William James (q.v.). It maintained that truth was a function of expediency, and that the validity of an idea depended on its value in practice.

Prague (*Praha*), capital of Czechoslovakia, on the R. Vltava, 217 m. NW. of Vienna, a picturesque city, with a great palace, a cathedral, an old town hall, a picture-gallery, observatory, botanical garden, museums, and three universities (Czech, German and Ukrainian). The chief commercial city of Czechoslovakia, it has manufactures of machinery, chemicals, leather and textile goods. Founded in the 12th Century, it was captured by the Hussites in 1424, fell frequently during the Thirty Years' War, capitulated to Frederick the Great, 1757, and in 1848, was bombarded for two days by the Austrian Government. Pop. 549,000.

Prairie, an extensive tract of flat or rolling land covered with tall, waving grass, mostly destitute of trees, and forming the great central plain of North America, which extends as far N. as Canada.

Prairie Chicken, *Tympanuchus americanus* of the family Phasianidae, related to the grouse; it is found in the U.S.A., where it is commonly used for the table. The male has a neck-tuft of ten to eighteen feathers. Other birds of the U.S.A. and Canada, including *Pedioecetes phasianellus* and the *Tympanuchus pallidicinctus* of Texas, also bear the name.

Prairie-Dog, or **Prairie Marmot**, a genus (*Cynomys*) of

rodent mammals of the marmot family found on the prairies of Canada and western America; reddish brown in colour and about 12 in. in length, with a note resembling a bark, it is a gregarious and burrowing creature.

PRAIRIE DOG

Praseodymium, a metallic chemical element belonging to the group of rare-earth metals. Symbol Pr; atomic number 59; atomic weight 140.9.

Prato, city of Tuscany, Italy, 10 m. NW. of Florence, with a 12th Century cathedral, several interesting old churches, and wool and straw-plaiting manufactures. Pop. c. 50,000.

Prawn, a crustacean (*Palæmon serratus*), bright grey, lined and spotted with darker grey, and usually about 4 in. in length, resembling a large shrimp and found in plenty off the British coasts. It is a favourite article of food. It belongs to the family Palæmonidae, which includes both the common prawn of salt water and the river prawns found in the tropics, and in which the first two pairs of legs are chelate. Species of river prawns found in the East Indies and in the West Indies reach a considerable size. In America the name is applied to several other varieties of shell-fish, especially *Penæus esculentus*.

Praxiteles, Greek sculptor of the 4th Century B.C., born in Athens; executed statues in both bronze and marble, and was unrivalled in the exhibition of the softer beauties of the human form, his most celebrated works being his marble statue of "Aphrodite" at Cnidus, and his "Hermes."

Prayer, an attempt to communicate with, or to seek benefits from, a superhuman power. Prayer, both private and public, is an essential feature of all religions which admit the existence of a deity interested in human affairs; in most it is imposed as a duty on the worshipper. Jews, Mohammedans and Christians are all required by their respective faiths to pray regularly and daily. Among Christians meetings for public prayer took place in the earliest days of the church; the Koran requires Moslems to pray five times daily at fixed intervals. Prayer for the dead has since the Reformation been a controversial subject in the Christian churches, Protestants generally maintaining, as against Catholics and Eastern Orthodox, that it is unscriptural, though this view has relaxed somewhat, especially since the World War.

Prayer Book, the authorized book of worship for the Church of England, the first version of which appeared in 1549, several subsequent versions being issued till 1662, when it took its present form. In 1907 its revision was suggested, but the proposed alterations were rejected by Parliament in 1927 and 1928; the use of the Revised Book has, however, been sanctioned by many bishops. The Anglican Church in Scotland, Ireland, Canada, the U.S.A., and elsewhere, has produced its own revisions of the Prayer Book.

Prayer Beads. See *Rosary*.

Praying-Wheels, cylinders with printed prayers on them, revolved by hand or mechanical power, used by the Lamaists of Tibet.

Prebend, granted to a canon of a cathedral or collegiate church out of its revenues. Originally the prebend was a portion of food, clothing or money allowed to a monk of

cleric. In the Church of England a prebendary is the holder of a disendowed prebendal stall in a cathedral church.

Precedence, in Great Britain, is regulated by the Earl Marshal in England and by Lyon King of Arms in Scotland. The precedence of all great officers of state is regulated by an Act of 1540. Immediately after the members of the Royal Family come the Archbishop of Canterbury, Lord Chancellor, Archbishop of York, Prime Minister, Lord President of the Council, the Speaker, Lord Privy Seal and various members of the Royal Household; then follow Dukes, foreign Envoys, Marquesses, Earls, Viscounts, Bishops, and Barons in that order. After the peerage come the Privy Counsellors, the Chancellor of the Exchequer, the Lord Chief Justice and other High Court judges. After these come Baronets and Knights. The orders of knighthood rank in the following order: Garter, Thistle, St. Patrick, Bath, Star of India, St. Michael and St. George, G.C.I. (India), Royal Victorian Order, Order of the British Empire.

Precedent, in law, a judicial decision called on to decide similar issues in the future. A precedent is of force only so far as the cause to be decided duplicates the earlier case, though it may afford guidance to the judge in forming his view of the law on a closely allied matter ("competing analogies"); and only an actual decision, not an opinion expressed by a judge on a matter not in immediate issue, can be held as a binding precedent.

Precentor, the leader of the choir or cathedral or collegiate church. In the Church of England he ranks next to the dean. His place is on the left side of the choir (Cantoris), the dean's being on the right (Decani).

Preceptors, College of, a body founded in 1846 to forward the interests of education in Great Britain by holding examinations for both pupils and teachers, especially in pedagogy in the case of the latter.

Precession of the Equinoxes, name given to the gradual shifting of the equinoctial points along the ecliptic from E. to W., due to a change in the inclination of the earth's axis. See *Equinoxes*.

Precipitation, in chemistry, processes by which a substance is made to separate from another or others in solution, or fall to the bottom. A precipitate is a solid produced from a solution by adding a gas, a liquid, a solid, or another solution.

Predestination, the dogma in theology which teaches that salvation or damnation of individuals is fore-ordained by God, and that their acceptance of salvation is not their own voluntary act. It was first taught by St. Augustine and later by, among others, Calvin.

Predicables, in logic, the attributes on which a classification is based, or the classes of predicates which may be applied to a subject. Traditionally they are 5: genus, a wider, and species, a narrower class into which the subject falls; difference, or what distinguishes the subject from others of its genus; property, or a quality derived from, but not sufficiently expressed by, its species and difference; and accident, roughly that which makes the subject an individual of its class.

Pre-emption, a right in law to the purchase, first offer of a thing which is to be sold, as in the case of shares which are held on condition that if the holder wishes to sell them his fellow-shareholders must have the first offer.

Pre-existence, the corollary of the theory of Transmigration of Souls or Metempsychosis, that the human soul has existed before birth. It is not generally supposed to be consistent with Christian teaching, but is held by the followers of many Eastern religions, and by the ancient Pythagoreans.

Pregnancy, the state of a woman between the conception and birth of a child. It is marked by a cessation of the menstrual flow, and frequently also by the condition known as "morning sickness." The movement of the child is usually felt at about 17 weeks, and its heartbeat is traceable shortly afterwards. Ante-natal clinics, at which pregnant women may obtain advice suitable to their condition, are now established everywhere, and ante-natal care has done a lot to reduce the dangers of childbirth.

Prelate, a name applied, especially in the high dignitary in the Church, especially an abbot, bishop, the general of a religious order, or the Pope himself. By the Presbyterians of the English Reformation era it was applied to bishops as a derogatory term, "Popery and Prelacy" being condemned as equally inconsonant with Primitive Christianity.

Prelude, name used in music for the introduction to a sonata or other composition; since the time of Chopin it has often been applied to short compositions especially for the piano, complete in themselves. Wagner and some later composers have used the name for short operatic overtures.

Premium, in currency, the difference of value between gold and silver coins and paper notes of the same nominal amount; in stock or share dealing, the excess of the actual over the nominal price of a security; in insurance, a sum payable periodically by the insured in order to secure to him or his representatives the advantages of the insurance.

Prempeh, a chief of Ashanti, W. Africa, who was expelled from his territory by the British in 1894, after he had failed to grant permission for the establishment of a British residency at Coomassie (Kumasi). He was permitted to return in 1924, and settled in his former territory as a private citizen. He died in 1931.

Pre-Raphaelitism, a movement in English art, especially painting, headed by Rossetti, Holman Hunt, and Millais, which sought to abandon the tradition of painting since Raphael and to return to the study of nature itself; Morris and Burne-Jones later joined the movement.

Prerogative, any exclusive privilege of the Crown. Common law prerogatives comprise (a) those regarding the royal character: e.g., the King can do no wrong; the King cannot be sued in his own courts; (b) those regarding the royal authority, e.g., the right to receive and appoint ambassadors; (c) those regarding the royal revenue. The prerogative is no longer the personal prerogative of the King. All public Acts are done by the Crown on the advice of Ministers. The privileges arising out of the prerogative are therefore the privileges of the executive and, as Ministers are dependent on the House of Commons, that House has obtained control over what was formerly the peculiar province of the Crown.

Presburg. See *Bratislava*.

Presbyopia, diminution of sight due to age, occurring usually about 45, when near objects are less distinctly seen than distant, an affliction due to the flattening of the lens.

Presbyterianism, that form of Church government which regards all ministers in conclave as on the same level in rank and function and does not recognise the office of a bishop. In Scotland, where it is the prevailing form of Church government, the Church is administered by a gradation of courts, called "Kirk-Sessions," of office-bearers in connection with a particular congregation; "Presbyteries," in connection with a small district; "Synods," in connection with a larger; and finally a General Assembly or a Synod of the whole Church. There are large and influential Presbyterian Churches in England, Northern Ireland, and the United States.

Presbytery, in the Presbyterian Church, an assembly of the ministers and certain deputed elders of a district, which acts as a spiritual court and sends representatives to the general synod. The name is also given to the chancel or sanctuary of a Church, in which the Altar stands, and by Roman Catholics to the priest's private residence.

Prescott, William Hickling, American historian, born at Salem, Massachusetts; becoming blind as the result of an accident, he employed assistants, and in 1826 began to study Spanish history. *Ferdinand and Isabella*, appearing in 1838, established his reputation. *The Conquest of Mexico* was published in 1843, and *The Conquest of Peru* in 1847. He died at Boston before completing the *History of Philip II.* (1796-1859).

Prescription, in law, a right established by mere lapse of time; it generally applies only to easements (*q.v.*) such as a right to "ancient lights." The period normally required to establish a *prima facie* prescriptive right to an easement is twenty years.

Presentation, the nomination by the ecclesiastical benefice of a candidate to the bishop for institution.

Preserved Foods, various ways: by pickling, or soaking in vinegar or brine, as with fish, onions, etc.; canning, used for meat, fish, fruits, and many other foodstuffs, sterilization being a part of the preparatory process; and freezing, used for meat transported over long distances by sea and in other cases. Milk ("condensed milk") is preserved by evaporation and subsequent tinning. The principle of all food preservation is so to protect the food as to render the presence and activity of bacteria impossible. See also *Refrigeration*.

President of the United States, is elected for four years by delegates from each State of the Union who are appointed especially to elect him, so that the election of the delegates is in fact, though not in law, equivalent to choice of the President himself. He serves for four years, and may be re-elected, but in practice has never been re-elected for a third time after serving two terms; if he dies in office, he is succeeded automatically by the Vice-President. He is commander-in-chief of the army and navy; sees to the administration of the laws, signs bills before they pass into law, makes treaties, grants reprieves and pardons, and in conjunction with the Senate makes war and peace, and regulates foreign relations. See also *United States, Constitution of*, and *N.R.A.*

Press, Freedom of the, was soon after the introduction of printing restricted by the requirement in England of the submission of printed matter to a censor of books; this ceased after 1693, and in theory the only restrictions on the liberty of the press are the necessity of avoiding blasphemy, sedition, libel, offences against morality, or breach of

copyright. In recent years it has been held in some quarters that the operation of the Official Secrets Acts (*q.v.*), which enables journalists to be punished for the use of information obtained under certain circumstances from public servants, constitutes a limitation of the proper freedom of the press. In war time censorship regulations necessarily make considerable inroads on the principle. Although freedom of the press is established in all democratic countries, the totalitarian states of modern Europe, such as Germany and Italy, have introduced systems of strict press censorship of both periodicals and books.

Press Association, a British news agency founded in 1868, and representing various newspaper proprietors, for the collection and distribution of home, parliamentary, sporting, financial and general news to their journals.

Press Bureau, an official institution set up during the World War for the censorship of news. Its operation continued until six months after the War, and met at times with considerable criticism in view of allegations that it attempted at times to suppress expression of political opinion as well as of news whose circulation might be harmful to national morale or useful to the enemy.

Press-Gang, a party armed with into the naval service in times of emergency. Until the 19th Century impressment was the ordinary method of recruiting the British navy; it can still be in theory, though it never is in practice, resorted to for that purpose.

Pressure Gauge, an instrument for pressure of steam in a boiler or the pressure inside any closed vessel. The Bourdon Gauge

PRESSURE
GAUGE

can be used for pressures above and below atmospheric. It consists of a tube, elliptical in section, which, if the pressure of the supply is increased, tends to become more circular in section. The instrument is graduated by comparing its indications with a standard gauge. The aneroid barometer is a modification of this instrument. The McLeod Vacuum gauge is used for measuring very low pressures, *e.g.*, that of the residual gas in an electric incandescent lamp.

Prestatyn, town and urban district of Flintshire, Wales, 4 m. N.E. of Rhyl. It has remains of an ancient castle, and near by are lead mines. Pop. 5,600.

Prester John, a legendary figure of the Middle Ages, supposed to be a Christian monarch who ruled a vast realm in Central Asia or Africa, and who was a Priest as well as a King.

Preston, town in Lancashire, England, on the Ribble, 31 m. N.W. of Manchester; St. Walburga's Roman Catholic church has the highest (366 ft.) post-Reformation steeple in England. The chief industry is cotton, but there are also engineering shops, and foundries. It was the birthplace of Richard Arkwright, and the scene of the beginning of the English total abstinence movement in 1832. Pop. 115,000.

Prestonpans, holiday resort of East Lothian, Scotland, on the Firth of Forth, 9 m. E. of Edinburgh. Near are coal mines. Here, in the rebellion of 1745, Prince Charlie won a victory over the Hanoverian forces. Pop. 8,000.

Prestwich, urban district of Lancashire, England, 4 m. N.W. of Manchester, and a suburb of that city; cotton is manufactured. Pop. 24,000.

Presumption, the assumption in law that a fact is true. Certain general presumptions which hold until the contrary is proved, as that the person in possession of an article is its owner, are important maxims of all legal practice, the most familiar being that the person charged with an offence is innocent until he is proved guilty.

Pretenders, The, the names given to the son (James III) and the grandson (Prince Charlie) of James II as claiming a right to the throne of England, and called respectively the Elder and the Younger Pretender; the elder, who made one or two attempts to secure his claim, surrendered it to his son, who in 1746 was finally defeated at Culloden.

Pretoria, city in the Transvaal and the province and of the Union of South Africa, 1,000 m. from Cape Town and 45 from Johannesburg, on the Apies R. Besides the imposing government buildings erected in 1912, it has a governor-general's house, law courts, library, museum, an Anglican cathedral, Transvaal University College, and several parks and gardens. During the Boer War it was captured by Roberts in June, 1900. Pop. (white) 77,000.

Prévost, Antoine François, called Abbé Prévost, a French romancer, born in Heslin, Artois. His fame rests on a romantic love story entitled *Manon Lescaut*, a work of genius, charming at once in matter and style. (1697-1763).

Priam, king of Troy during the Trojan War; had a large family by his wife Hecuba, Hector, Paris, and Cassandra the most noted of them; was too old to take part in the war; is said to have fallen by the hand of Pyrrhus on the capture of Troy.

Priapus, in Greek and Roman mythology, the personification of the generating or fructifying power; worshipped as the protector of flocks of sheep and goats, of bees, of the vine and other garden produce.

Price, in modern economic practice, the amount of money that has to be paid to secure the ownership of an article. The fixing of prices by law has frequently been attempted by state authority, but insufficient knowledge of economic processes has made nearly all such attempts failures. The observation of prices, however, has, especially since the World War, become an important part of the business of governments, and practically all states now publish periodical "price-indexes" indicating the rise or fall in the average cost of living based on a comparison of the prices of certain selected articles of general use with that prevailing at some chosen standard time. In Great Britain such an index figure, generally called the "Cost of Living Index," is published monthly by the Board of Trade.

Prickly Heat, or *Miliaria*, an acute skin eruption, common among white residents in the tropics, with strong itching. It sometimes follows on extreme physical exertion or even bathing.

Pride's Purge, the violent exclusion, in 1648, at the hands of a body of troops commanded by Colonel Pride, of about a hundred members of the House of Commons disposed to deal leniently with Charles I, after which some eighty, known as the Rump, were left, who secured the condemnation of the King.

Priest, in most organised religious systems, terms the officer who offers prayer and sacrifice to God or the gods on behalf of the people generally. Islam, Buddhism, and modern Judaism have no priests. In those Christian bodies which possess a priesthood the priest is set apart by a special rite known as ordination.

Priestley, John Boynton, English novelist and playwright, born at Bradford; his novels, especially *The Good Companions*, 1929, *Angel Pavement*, 1930, and *They Walk in the City*, 1936, enjoyed extraordinary popularity. His plays include *Eden End*, 1934; *Cornelius*, 1936 and *Music at Night*, produced at the Malvern Festival in 1938. (1894-).

Priestley, Joseph, British scientist and cleric, born near Leeds; wrote in defence of Unitarianism; an advanced Radical in politics, his house was once burnt by an unfriendly mob. Elected F.R.S. in 1786 for his electrical researches, he turned a few years later to chemistry, and in 1774 was the first to isolate oxygen, which he called "dephlogisticated air" (see *Phlogiston*), being a firm upholder of the phlogiston theory. He was the discoverer of several other compounds of first importance, including hydrochloric acid and nitrous oxide. His later life was spent in the United States. His works included a *History of Electricity* and *Letters to a Philosophical Unbeliever*. (1733-1804).

JOSEPH PRIESTLEY

Primate, a title given in the Anglican and Roman Catholic churches to certain archbishops of special importance. In the Church of England the Archbishop of Canterbury is Primate of All England, the Archbishop of York, Primate of England; in Ireland, the Archbishop of Armagh is Primate of All Ireland, the Archbishop of Dublin, Primate of Ireland. The senior bishop of the Episcopal Church in Scotland is known as the Primate.

Primates, the highest order of mammals, including man, the apes, monkeys, and lemurs. Among their distinctive characteristics are the high convoluted brain surface; the first digit of the foot (hallux) always provided with a flat nail and not a claw; and the successive twofold dentition, the early "milk teeth" making way in adolescence for a second and permanent set.

Prime Minister, an office originating in the time of George I., who, knowing no English, entrusted the reins of government largely to Sir Robert Walpole. The office was not recognised by law, and the Prime Minister had no precedence as such, until 1905. He is usually also First Lord of the Treasury; he enjoys a salary of £10,000 per annum, and the use of official residences at 10, Downing Street, London, and at "Chequers" in Buckinghamshire. He presides over meetings of the Cabinet, is responsible for its composition and for the general policy of the Government, and goes out of office when his policy meets with a serious defeat in the Commons.

Primitive Methodists, an English body which, in 1810, seceded from the Wesleyan Methodists, under Hugh Bourne and William Clowes, over a question of church government. They were reunited with the parent body in 1832 as part of the Methodist Church.

Primo de Rivera. See *Rivera*.

Primogeniture, the rule under which, on an intestacy, the eldest son succeeds to the real estate of his father to the exclusion of the younger sons and daughters. It was abolished in English law by the Administration of Estates Act, 1925, which did away with the legal distinction between real and personal property in matters of inheritance.

Primrose, the popular name for a common British spring flower with a yellow corolla, found in woods, hedgerows and by river banks. It is a species of *Primula*, being the *Primula vulgaris* of the Primulaceae order.

Primrose League, a political Organisation founded in 1883 in memory of Lord Beaconsfield, so called because the primrose was popularly reported to be his favourite flower. It includes both sexes, is divided into district habitations; confers honours and badges and has extensive political influence under a grand-master.

Primula, the typical genus of Primulaceae, of which British species are the common primrose (*q.v.*) (*P. vulgaris*); oxlip (*P. elatior*); cowslip (*P. veris*); and the auriculas (*P. auricula*).

Primulaceae, a natural order of herbs, perianth regions, in which are included such well-known flowers as the primula (*q.v.*), cyclamen, and lysimachia. They have generally 5 divisions of the calyx, 5 stamens, simple radical leaves and capsular fruits.

Prince Albert, city of Saskatchewan, Saskatchewan R. It has sawmills and flourmills and is a centre of the fur and lumber trades. Pop. 10,000.

Prince Edward I., a small island, province of Canada, in the S. of the Gulf of St. Lawrence, occupies a great bay formed by New Brunswick, Nova Scotia, and Cape Breton. The coast-line is exceedingly broken, the surface low and undulating, and very fertile. The chief industry is agriculture; oats and potatoes are the best crops; there are oyster and other fisheries, and fur farming, especially of the silver fox, is important. Coal exists, but is not mined. Manufactures are inconsiderable. Discovered by the Cabots, it was settled by the French in 1715, and ceded to Great Britain in 1763. Constituted a province in 1768, the name was changed from St. John to Prince Edward in 1799. The capital is Charlottetown (pop. 12,400); the only other town of any size is Summerside. Area, 2,180 sq. m. Pop. 88,000.

Princeton, city of New Jersey, U.S.A., 50 m. S.W. of New York; was the meeting-place of the Continental Congress of 1783; it is the seat of one of the principal American universities, and of several other educational institutions. Pop. c. 6,000.

Prinetown, village of Devon, England, on W. Dartmoor, 7 m. E. of Tavistock. It is the site of Dartmoor convict prison, originally built for prisoners of war in the Napoleonic Wars.

Prinsep, Val (Valentine Cameron), British artist who studied under Burne-Jones and Watts, and in Paris. One of his best-known works is the painting of Lord Lytton's Durbar, at Buckingham Palace. He also wrote plays. (1838-1904).

Printing, the making of impressed copies from the inked surface either of an engraved block or metal plate, of a lithograph, or of movable type, or stereotype. Early printing from wood blocks has been practised in China since before the Christian era, and the craft reached Europe, probably through Arab traders, in the 15th Century. Printing from movable type was probably invented by Gutenberg in Mainz. The Gutenberg Bible was printed in 1450, some 10 years after the first invention. Caxton introduced printing into England from Cologne, and inaugurated a press in Westminster in 1477.

No important technical improvement followed until Earl Stanhope (1753-1816) invented the iron press. The first printing

machine, a cylinder machine, was invented in 1790 by William Nichols, and an improved model by Koenig was used for printing *The Times* in 1814. Movable type is set either by hand or by machinery. (See *Lino-type*; *Monotype*.) The type is then made up into pages and "imposed," that is, arranged in such an order that the sheet when printed can be folded with its pages in sequence. The pages of type are "locked up" in a "forme," each surrounded by wood blocks or "furniture," which leave a space for margins.

Modern printing presses are of the cylinder pattern, the forme of type being laid on a flat bed, or as in the rotary machine, a stereotype plate is made and bent to the form of the cylinder. Both the flat-bed and rotary machines receive the impression of the type upon a cylinder. The flat-bed machine may have either one or two impression cylinders, the latter being known as perfectors. In the perfecter each sheet passes round one revolving cylinder, receives an impression from the sliding bed which carries the forme of type, and is then taken by the other cylinder and receives a reverse impression from a second forme of type.

Prinzip, G., Serbian political assassin, who on June 28, 1914, by killing the Austrian Archduke Franz Ferdinand and his wife, fired the spark which led to the World War. After the commission of the crime he escaped into Serbian territory.

Prior, Matthew, English artist, born near Wimborne, Dorset; was for a time Under-Secretary of State, and English Ambassador in Paris. He is remembered most as a poet; wrote in 1687 a parody of Dryden's *Hind and Panther*, entitled *The Story of the Country Mouse and the City Mouse*, and afterwards a number of tales, lyrics, and epigrams. (1664-1721).

MATTHEW PRIOR

Priory, a religious house governed by a prior—it may be either a smaller Benedictine house which has not attained the dignity of an abbey, or a house of one of those religious orders, such as the Dominicans, Franciscans, or Carthusians, where the prior is the local superior. Its general domestic and architectural arrangements resemble those of an abbey.

Pripet, river rising in Poland and emptying into the Dnieper after a course of 486 m. through Poland and White Russia. The Pripet Marshes were the scene of many encounters between Germans and Russians, 1915-1916.

Prism, in geometry, a solid with two faces (the bases) which are equal polygons, and whose lateral faces are parallelograms. The bases may be polygons of any shape; thus in a hexagonal prism they are hexagons. Optically a prism is any transparent medium comprised between plane faces, usually inclined to each other. It is used to refract and disperse light, resolving it into the prismatic colours.

Prison, or *Gael*, a place of confinement, or detention for criminals, or others committed by legal authority, whether for safe custody pending trial or as a punishment after sentence. The reforming zeal of John Howard (*q.v.*) and Elizabeth Fry (*q.v.*) moved Parliament in the 18th Century to turn its attention to the removal of the worst abuses of prison life. One great evil was the herding of prisoners together irrespective of age or sex or degree of criminality. Solitary, or more properly separate, confinement was first adopted in Pentonville Prison, built a century ago.

Prison discipline today is governed by the

Prisoners Acts, 1865-1898. The Board of Prison Commissioners, set up in 1898, now controls all prisoners, under the Home Office. Much attention has been paid in recent years to the possibility of increasing the "reformatory" elements of prison life, and to modifying prison conditions so as to prepare the prisoner for resuming a useful life in the community after his release.

Prisoner of War, a member of a hostile force who falls during the course of armed hostilities into the hands of the opposite side. The rules regarding their treatment are laid down by a Hague Convention of 1907. They must be humanely treated, their property (other than horses or arms) may not be confiscated, and if set to work they must not be given military tasks. Arrangements for exchange of prisoners are generally made through the good offices of neutral governments.

Privateer, a private vessel authorized by Government under a letter of marque to seize and plunder the ships of an enemy, to do which without such authorization is an act of piracy.

Privet (*Ligustrum vulgare*), an evergreen hedge plant of the family Oleaceae. It grows in most soils and thrives in towns where the air is full of smoke. Other members of the same genus are also known as Privet, *L. ovalifolium* being the most useful of all for hedge-making; *L. ovalifolium aureum* the Golden Privet and *L. Delavayanum* an evergreen bearing panicles of white flowers.

Privilege, in law, a condition under which a statement may be made without liability to action. It may be absolute or qualified. Absolute privilege exists in the case of statements made in the course of judicial proceedings, in Parliament or in Parliamentary papers, or by one officer of state to another in the course of his duty; qualified privilege in the case of statements made in reports of public proceedings, in fair comment on matters of public interest, in protection of an interest or in pursuance of a duty. All communications made by one spouse to another are privileged.

Privy Council, in theory the council of the Sovereign on matters of government. It includes members of the royal family, the Cabinet, bishops, judges, and such other persons as the Sovereign may appoint, membership being nowadays largely an honorary distinction. No members attend except those actually summoned on any given occasion. Its functions may be grouped as: (1) executive, in which its duties are discharged by the Cabinet, technically a committee of the Privy Council; (2) administrative, in which capacity it supervises medical, pharmaceutical and veterinary practice, the granting of municipal charters, etc.; (3) judicial, for which see Judicial Committee of the Privy Council.

Privy Purse, the income set apart for the Sovereign's personal use. By the Civil List adopted in 1937, it amounts to £110,000 per annum. The Keeper of the Privy Purse is an officer of the Royal Household with a special department under his care.

Privy Seal, the royal seal appended to important state documents of minor importance which do not require to pass the Great Seal. See Lord Privy Seal.

Prize Court, a court established to adjudicate on prizes captured in warfare at sea. Before the Declaration of London (q.v.) such tribunals were specially created on the outbreak of a war; but by that instrument it was agreed to set up an International Court for the purpose. This decision, however, has never been implemented.

Prize Fight. Under English law a fight, whether with bare fists or gloves, for a money prize or other reward, in which the combatants intend to proceed till one or other is exhausted, has been held since about 1855 to be illegal. After that date, however, such fights continued to take place in secluded spots, often for large wagers. With the recognition in 1886 of the "Marquess of Queensberry's Rules" and the development of boxing as a scientific sport they gradually disappeared, the last World Championship fight without gloves being held in Belgium in 1886, Jem Smith winning the title. Though modern boxing contests have never been directly legalised, they are not in practice interfered with when gloves are used and recognized rules followed, even though money wagers are made on the result.

Prize Money, the amount received from the sale of a vessel captured in war, with her cargo; the Crown may by proclamation declare that any such sum or a portion thereof shall be distributed among the officers and men concerned in the capture, and if so the determination of the proportions in which it shall be distributed is made by the Prize Court (q.v.).

Probability, in mathematics, the calculation of the chances that a given event or one of a number of events will occur. The problem was first investigated in the 17th Century by Blaise Pascal (q.v.) and others, and on the basis of their work a highly elaborate branch of algebra has been built up.

Probate, the process by which a last will authenticated after the testator's death. The Will is filed in the Probate Division of the High Court of Justice, and a certified copy given to the executors. The Probate Court, founded in 1857 to replace the old Ecclesiastical courts which dealt with the matter, was merged in the Probate, Divorce and Admiralty Division of the High Court of Justice in 1873.

Probation, the system, introduced by the Offenders Act, 1887, under which persons, especially young persons, convicted for the first time of criminal offences, may be released by the Court and placed under the supervision of a Probation Officer, who supervises their behaviour and occupations with a view to their reformation.

Proboscis Monkey, a large Bornean species of leaf-eating monkey (*Nasalis larvatus*) in the male of which the nose is prolonged to hang below the upper lip. It is red in colour.

Probus, Marcus Aurelius, from 276 to 282, born in Pannonia; was elected by the army and citizens to succeed Tacitus; reformed the civil administration and was responsible for many public buildings, but was put to death in a military revolt. (232-282).

Process, the writ or orders issued in legal proceedings, as distinct from the proceedings outside the court.

Process Work, technical term for the mechanical reproduction of diagrams, drawings or other representations of objects on printing blocks or plates. All the methods in use are based upon photography, the object being to produce from a photograph an image in relief, from which impressions on paper can be printed off. The method most commonly used is the half-tone process.

PROBOSCIS
MONKEY

Proclamation, an announcement by the head of a state, either declaring policy, setting forth law or regulating some public activity. Proclamations under the Great Seal are issued to announce the accession of a new monarch, on other ceremonial occasions, and to declare war or peace. Their directions are binding on the subject only so far as they are consistent with the law.

Procne, the sister of Philomela and wife of Tereus, changed into a swallow by the gods. See **Philomela**.

Proconsul, name given in the Roman republic and Empire to an officer in charge of the administration of a province; his office lasted generally for a year, and his powers approximated to those of a consul.

Procrustes, a Greek legendary brigand, who when any one fell into his hands placed him on a bed, stretching him out if he was too short for it and amputating him if he was too long; overpowered by Theseus, he was placed on his own bed.

Procter, **Bryan Waller**, English poet, known by his pseudonym of **Barry Cornwall**, born in London; was for 30 years a Commissioner of Lunacy, and is chiefly memorable as the friend of Wordsworth, Lamb, Scott, Carlyle, Thackeray, and Tennyson; he was a facile and successful song writer. (1787-1874). His daughter, **Adelaide Anne Procter**, achieved success as a poetess, her *Legends and Lyrics* appearing in 1858. (1825-1864).

Proctor, an official of a University chosen to enforce its statutes, and to preserve discipline among undergraduates. Clergymen chosen by their fellows to represent them in Convocation are likewise so called. See also **King's Proctor**.

Proctor, (**Mrs.**) **Dod**, English artist; widow of Ernest Proctor, A.R.A. (d. 1935). Her picture "Morning" was purchased for the nation in 1927. Among her other works are "The Model" and "The Blonde Girl," and many studies of Cornish life in St. Ives and Newlyn. A.R.A. 1934.

Procurator-Fiscal, a Scottish law pointed by the sheriff, whose duties are to initiate the prosecution of crimes and inquire into deaths under suspicious circumstances.

Producer Gas, an inflammable mixture of carbon monoxide and nitrogen, obtained by passing air over red-hot coke; used as a fuel for certain industrial purposes.

Profits, in economics, the return gained by a capitalist from the employment of his capital in industry. It may be divided, according to Mill, into interest on the capital utilized; insurance, or indemnity for the risks undertaken; and the wages of superintendence.

Profit-sharing, a form of remuneration of industrial workers by way of securing to them a pecuniary interest in the business on an agreed basis of sharing profits but not losses. It differs from co-partnership in that the worker makes no contribution to capital. Often the industrial workers' share of profits is paid into a superannuation fund or actually invested in the business itself. The system has been tried with some success, especially in gas-manufacturing concerns, but involves the danger that workers may be tempted to accept lower wages to offset the bonus distribution of profits.

Progression, a mathematical series or decrease according to a fixed law. In arithmetical progression there is a constant difference between the terms, as, 2, 5, 8, 11, 14, . . . In geometrical progression the ratio

between the terms is constant, as, 2, 4, 8, 16, 32, . . . Another variety is Harmonic Progression (q.v.).

Prohibition, the system by which the intoxicants is completely forbidden in a given area. The movement began in Maine, U.S.A., where it was established in 1851. In 1898 the Anti-Saloon League was formed in the United States, and this body gradually secured amendments in state constitutions which prevented the state courts from declaring prohibition laws to be *ultra vires*. By the time of the World War the whole country was fiercely divided into "Wets" and "Drys," and in 1919 the 18th Amendment to the Constitution extended prohibition over the whole United States, the Volstead Act making it effective by banning any liquor containing over 0.5 per cent. of alcohol. The consequences were less beneficial than had been hoped, the law was widely broken by bootlegging, racketeering, and the establishment of "speakeasies," and by 1930 most big cities were warmly in favour of abolishing prohibition, though many country districts still favoured it. Nation-wide prohibition disappeared in 1933 under the 21st Amendment to the Constitution. In Alabama, Georgia, and a few other states it is still locally enforced. See also **Local Option**.

Projectile, any object thrown so as path, known as its trajectory, through the air. The motion of a projectile is, in fact, always affected by air resistance; the actual path taken by any projectile can be calculated mathematically if its initial speed and the direction in which it is cast are known. The curve described by a projectile not impeded by air resistance would be a parabola.

Projection. See **Map**.

Proletariat, originally that section of the people whose main function in the state was that of producing children; used in modern economics to mean the propertyless classes who live by the sale of their labour. The phrase "dictatorship of the proletariat" was coined by the early Socialists to express that condition of society which, in their view, would mark the transition from capitalism to communism when the will of the proletariat would be the supreme directing force of economic and political policy.

Prologue, a spoken or written introduction to a play, or a written introduction to a literary work. The function of the dramatic prologue is to give the audience such information not imparted in the course of the play itself as may be necessary to enable them to follow the plot.

Prometheus (i.e., Forethought), in Greek mythology, a Titan; is supposed to have stolen fire from heaven and bestowed it upon mankind, whereupon Zeus chained him to a rock on Mt. Caucasus, where an eagle gnawed all day at his liver which grew again by night.

Promissory Note, a written and to pay unconditionally to a named person or body, or to bearer, a fixed sum of money either on demand or at some definite future time. A bank note is thus included in the definition. It is negotiable by endorsement, and must be stamped.

Proof Spirit, is alcoholic spirit containing 49.28 per cent. by weight, or 57.10 per cent. by volume, of alcohol at 51°F.; its specific gravity is 0.9178. The terms "10° under proof," "20° over proof," etc., mean, in the first case, that the spirit contains 10 volumes of water to 90 volumes of Proof Spirit, and, in the second case, that 100 volumes of the spirit mixed

with 20 volumes of water would give 120 volumes of Proof Spirit. The taxation of spirituous liquors varies with the amount of proof spirit they contain.

Propaganda, name of a congregation of Cardinals of the Roman Church who supervise the preaching of the faith in non-Christian countries, and the organization of missionary work. In recent times it has been applied to cover all literary and oral persuasive activities intended to influence general opinion in favour of any system of thought, idea, or creed. During the World War Ministries of Propaganda were set up in several countries, including Great Britain, to explain the war aims of the respective governments and endeavour to overthrow enemy morale; Fascist states, such as Germany and Italy, generally have Ministers of Propaganda; in Germany this office is held by Dr. Joseph Goebbels (*q.v.*), who adds to his official title the more attractive words "and Enlightenment."

Propertius, Sextus, Latin elegiac poet, born at Assisi; a protégé of Mæcenas; his elegies addressed to Cynthia follow Greek models. (c. 51-14 B.C.)

Property, that which is the subject of mere possession (*q.v.*). Legally it is divided into real (*q.v.*) and personal property, or personality (*q.v.*); but this distinction has, since the Law of Property Act of 1925, little importance.

Prophet, in the sense in which the word is used in the Bible, one who declares to the world the divine will or denounces God's judgments, but in ordinary usage a foreteller of the future. The Hebrew prophets are of great importance in the development of mankind as being the first to make known a fully spiritual and ethical conception of religion. The prophetic writings of the Bible are generally divided into the writings of the 4 Major Prophets, Isaiah, Jeremiah, Ezekiel and Daniel; and the Minor Prophets, whose writings occupy the last 12 books of the Old Testament. Mention is made in the Scriptures of various prophets no trace of whose preaching has been preserved.

Proportional Representation, a system of voting in elections whereby the elector votes by numbering the candidates in his order of preference, and any votes received by a candidate in excess of those needed to elect him are transferred to others. It is intended to secure due representation of minority opinion. It is now used at elections in Eire (Ireland), Tasmania, and Scandinavia, but has been abolished after a short trial in France. It is advocated in England by the Liberal Party. Its supporters claim that assemblies so elected would roughly reflect in their membership the proportions of opinion held in the community as a whole; its opponents object that it is impracticably complicated, and leads to the rise of numerous small parties or groups, possibly preventing any party from securing a working majority.

Propyleum, the entrance to a building, particularly a classical temple. The name is mostly used only of particularly impressive examples, such as the famous propyleum of the Athenian Acropolis, constructed in the Periclean age by Mnesicles.

PROPYLEUM

Prorogation, the dismissal of Parliament at the end of a session to a day named, without dissolution, as distinct from a mere adjournment. It is effected by royal command through the Lord

Chancellor in the presence of the Sovereign or by Commission, but if Parliament be already prorogued to a fixed date, a Proclamation is necessary to effect a further prorogation.

Prose, the ordinary form of literary composition, as opposed to poetry; though no definite line can be drawn between the two, and, especially in modern times, much writing may be considered either as rhythmic prose or free verse, according to taste. Rhythm is generally possible only in narrative as opposed to philosophic or scientific prose. Prose to-day tends to discard the meretricious ornaments of sonorous Victorian periods and the ornateness of "Asiatic prose"; and to base itself on the ordinary spoken idiom of the educated—or at times even the uneducated—classes.

Proselytes, converts from heathenism to Judaism, of which there were two classes; Proselytes of the Temple, those who accepted the ceremonial law and were admitted into the inner court of the Temple; and Proselytes of the Gate, who accepted only the moral law, and were admitted only into the outer court. In the early Roman Empire many Roman citizens of high rank, especially women, became Jewish Proselytes; and in the early Middle Ages a whole people, the Khazars of the area north of the Black Sea, appear to have been converted to Judaism *en bloc*.

Proserpina, in Greek mythology, the daughter of Zeus and Demeter, who was carried off by Pluto (*q.v.*) while gathering flowers and became Queen of Hades. Pluto allowed her to revisit the upper world for two-thirds of the year, her arrival being coincident with the beginning of spring and her return to Hades coincident with the beginning of winter. See *Persephone*.

Prosody, the study of the laws of versification, depending in classical poetry on the quantity of syllables and the vowels they contain; in modern European poetry generally on the number of syllables with or without stress accent.

Prostitute, one who seeks her livelihood by giving herself up to promiscuous sexual intercourse for hire. The practice of prostitution has probably existed from the beginning of history, and in earlier times, as still in the East, often had a religious significance. In England it is not a crime, but soliciting to the annoyance of passers-by is an offence under the Vagrancy laws. In some States there exist systems of State regulation of vice, but public supervision of prostitutes in Great Britain, tried for a time in the last century with a particular view to the suppression of disease in the services, was soon abandoned.

Protection, the attempt to encourage home industries by imposing duties on foreign goods. Until 1932 Great Britain, alone of the world's great states, held with few minor exceptions to her traditional policy of the unrestricted admission of imports, or "Free Trade"; but the Imports Duties Act of that year, following the earlier imposition on a few special imports of the "McKenna" and "Safeguarding" duties, marked the adoption of a general protective policy. Before that date the distinction between revenue and protective duties had been strictly preserved. England's adoption of protection was to some extent an attempt to foster reciprocity of trade with her Dominions and Colonies, to their mutual advantage. Protection, which is generally followed by higher prices and higher wages, tends to make relations with foreign countries more difficult by restricting international trade; but it averts the evil of unemployment in the protecting country consequent on dumping.

Protection of Ancient Monuments, is taken by the State, which is empowered by law to purchase, or accept from the owners the charge of, any ancient monument, building of antiquarian interest, or other such erection. Such monuments as Stonehenge, Kitz's Coty House in Kent, and many ruined abbeys and castles, have thus become State property; others are in the care of the National Trust (*q.v.*). Allied work is undertaken by the Society for the Protection of Ancient Buildings, a voluntary association formed in 1877 by William Morris, Ruskin and others to advise on and assist in the repair and intelligent restoration of buildings of historical or archaeological interest.

Protector, a title given on several occasions in English history to the regent, or person responsible for the guardianship of the kingdom during the minority of the monarch, as with the Protector Somerset during the childhood of Edward VI.

Protectorate, the relationship of a territory not recognized as sovereign whose external relations it controls; also that protected territory itself. Instances of British Protectorates are the Malay States, Uganda, and part of Kenya. British Protectorates differ from Colonies in that they have not been formally declared to be British territory, and their peoples are not British subjects but only "British protected persons"; while they are governed, not directly, but through the native chiefs. Like Colonies, however, they are under the control of the Crown exercised through the Colonial Office. Mandated territories (*q.v.*) are assimilated to Protectorates.

Proteins, complex nitrogenous compounds, pounds, essential components of all animal and vegetable organisms, *e.g.*, gluten of flour and albumin, or white of egg. Plants are able to build up proteins from nitrogen compounds in the soil, but animals must obtain their proteins directly or indirectly from vegetable food.

Protestant Episcopal Church, the religious body in the United States which corresponds to the Anglican Church in England, whence it was brought to America in 1607. It has approximately 1,300,000 communicants, organized under a body of bishops and a triennial General Convention in which the laity are represented.

Protestantism, the name given to the movement headed by Luther in the 16th Century, which protested against the assumption of supremacy in spiritual matters by the Roman Church. The name Protestant is now used to cover broadly all Christian bodies in the west other than the Roman Catholic Church, though some sections of the Anglican church object to being classed as Protestants. The main Protestant bodies are the Methodists, Baptists, Congregationalists, Presbyterians, Lutherans, and Reformed Church or Calvinists.

Proteus, in the Greek mythology, a divinity of the sea endowed with the gift of prophecy, but from whom it was difficult to extort the secrets of fate, as he immediately changed his shape when any one attempted to force him, for it was only in his proper form he could enunciate these secrets.

Prothallus, a stage in the development of cryptogamous plants, such as ferns, when the germinated spore produces a green scale-like growth fixed by the root-hairs to the soil. From these male organs, the Antheridia, develop on the under side, producing freely moving Antherozoids which enter the Archegonia, small female bodies also formed on the prothallus, the resultant fertilized seed producing the adult plant.

Protoactinium, a metallic chemical element of highly radio-active character; little is yet known about it. Symbol Pa, atomic number 91, atomic weight about 235.

Protocol, the first draft or sketch of a document, used especially of treaties before their definitive signature. The name is specially connected with the so-called Geneva Protocol, adopted by the League of Nations in 1924 as a draft arrangement for settling international disputes, but dropped when Britain refused her ratification.

Proton, the unit of positive electricity, a hydrogen atom which has lost its single planetary electron. It is one of the ultimate constituents of matter.

Protoplasm, the matter of which the cells of animals and plants are constituted; the physical basis of all life.

Protozoa, the lowest division of the Animal Kingdom, including microscopic organisms consisting of one cell or a group of fixed cells, found in the sea and in stagnant water. One of the typical forms is the mud-dwelling Amoeba. Many of the members of the group are parasitic.

Proust, Marcel, French author, partly Jewish, born and died in Paris; his great work, a minute analysis of "salon" society entitled *À la Recherche du Temps Perdu*, appeared in 15 volumes, three being published posthumously. Aloofness from the world, and extraordinary slowness of tempo, characterize his work, which has had enormous influence beyond the boundaries of France. (1871-1922).

Provençal, a language spoken in Provence, in the South of France, which had a large literature in the Middle Ages, but almost died out as a literary language until revived by Mistral at the end of the 19th Century. It has close affinities with the Catalan of N.E. Spain, and is free from the Teutonic elements that have influenced French.

Provence, a maritime province in the South of France; originally called Provincia by the Romans, it is included in the modern depts. of Bouches-du-Rhône, Basses-Alpes, Alpes Maritimes, Var, and part of Vaucluse.

Proverbs, Book of, a Book of the Old Testament, consisting of short aphorisms on the practical concerns of life, attributed by tradition to Solomon, but undoubtedly far later than his time, though some of the sayings it contains may well have originated with him.

Providence, a seaport and capital of Rhode Island, U.S.A., on a river of the name, 44 m. S.W. of Boston. It is a centre of a large manufacturing district, and has a large trade in woollens, jewellery and hardware. It is the seat of Brown University. Pop. 253,000.

Provisional Order, an Order made by a government department authorising a local authority or public utility company to perform some act or execute some work subject to Parliamentary confirmation.

Provost, in Scottish burghs, the chief magistrate, corresponding to the English mayor. The provosts of Edinburgh, Glasgow, Aberdeen, Dundee and Perth, are styled Lord Provost. The name is also used as the title for the heads of Oriel, Queen's and Worcester Colleges at Oxford, King's College, Cambridge, and University College, London, and for the president of the Chapter of certain cathedrals, such as Southwark, which have no Dean.

Provost-Marshal, a commissioned officer in charge of a body of military police, whose duty it is

to arrest offenders against military discipline and supervise the execution of sentences against them.

Proxy, one who acts as a substitute for another, or votes on behalf of another, as at a meeting of company shareholders, or the written authorisation so to act or vote for another. Such a document, to be legal, must bear a 1d. stamp. Since 1918 soldiers, sailors, or airmen, have been enabled to vote by proxy at parliamentary elections.

Prud'hon, **Pierre**, French painter, born at Cluny, who, after studying at Dijon and Rome settled in Paris in 1789 and painted there till his death. Many of his works are in the Louvre; among the best known are his "Truth and Wisdom," painted for the palace of Versailles, and "The Carrying-off of Psyche." (1758-1823).

Pruning, in horticulture, the cutting off of are of little or no value to its general welfare, so as to enable more sap and light to reach the rest. The best seasons for the operation are autumn and winter, when the natural flow of sap will be least interfered with.

Prunus, a genus of shrubs and trees of the plum, apricot, cherry, peach, and almond. The bullace (*P. institia*), cherry-plum (*P. cerasifera*) and Sloe (*P. spinosa*) are also members of the genus.

PRUNUS DOMESTICUS

Prussia, the leading Germany, of which it occupies about two-thirds of the total territory, and contributes three-fifths of the population. It stretches from Holland and Belgium in the W. to Poland in the E., has Jutland and the sea on the N., and Lorraine, Bavaria, Hesse-Darmstadt, Saxony, Czechoslovakia and Austria on the S. It includes the Itheland, Hesse-Nassau, Westphalia, Hanover, much of Saxony, Brandenburg, Silesia, and Pomerania, with the province of E. Prussia, detached from the rest by the Polish Corridor (q.v.).

In various parts of the country agriculture and grazing are carried on. There are coal-fields in Silesia, Westphalia and the Rhineland; zinc, lead, iron, copper, antimony, etc., are wrought; the Harz Mts. are noted for their mines; salt, amber and precious stones are found on the Baltic shores. Textiles, metal wares, and beer are the main industries; Berlin and Wuppertal are the two chief manufacturing centres. The great navigable rivers are the Niemen, Vistula, Oder, Elbe, Weser, Rhine, and their tributaries. The prevailing religion is Protestant; there are several universities, and many other educational institutions.

The basis of the Prussian people was laid by German colonists placed amid the pagan Slavs whom they had conquered by the Teutonic knights of the 13th Century. In 1511 their descendants chose a Hohenzollern prince; a century later the Hohenzollerns of Brandenburg succeeded. Despite the Thirty Years' War Prussia became a European State, and was recognised as a kingdom in 1709; Frederick the Great (1740-1786) enlarged its bounds and developed its resources; the successive partitions of Poland added to its territory. Humiliated by the peace of Tilsit, 1807, and ruined by the French occupation, it recovered after Waterloo; William I. and Bismarck still further increased its territory and prestige; by the Austrian War of 1866 and the French War of 1870-1871 its position as premier State in the Confederation was assured. Since the Nazi revolution of 1933 it

has, like the other German States, been governed by a *Stalthalter* as a personal representative of Adolf Hitler. Area, 113,700 sq. m. Pop. 40,700,000.

Prussia, **Prussia**, Germany, separated from the rest of Germany since the treaty of Versailles, 1918, by the Polish Corridor (q.v.). The northern part is mainly agricultural, the southern mostly marsh and forest. The largest town is Königsberg. Area, 15,061 sq. m. Pop. 2,256,000.

Prussian Blue, a pigment obtained by ferrocyanide to a solution of ferrous sulphate; this yields a white precipitate which is oxidized by the addition of nitric acid. It may also be obtained by adding potassium ferrocyanide to a solution of a ferric salt. The pigment is a fine blue, and, being very stable, is most useful commercially.

Prussiates, salts of prussic or hydrocyanic acid. Yellow prussiate of potash, or potassium ferrocyanide, is a lemon-yellow crystalline solid made by fusing together potassium carbonate, scrap iron, and nitrogenous organic waste (horns, hoofs, hides, etc.). It gives a deep blue precipitate (Prussian Blue, q.v.) with a solution of a ferric salt.

Red prussiate of potash, or potassium ferricyanide, an orange-red crystalline solid made by passing chlorine through a solution of potassium ferrocyanide, is used in the making of blue-prints; when mixed in the dark with a solution of ferric ammonium citrate it gives a brownish solution which is brushed over paper and allowed to dry. On exposure to light, the brown substance is converted into a blue one, which, unlike the former, is insoluble in water. Hence such paper may be used in the same sort of way as photographic paper, and the image is fixed by merely washing in water; the non-illuminated parts appear white against a blue background.

Prussic Acid. See **Hydrocyanic Acid**.

Pruth, a Rumanian river rising in the E. to form the boundary between Moldavia and Bessarabia. It enters the Danube near Galatz; its length is about 520 m.

Histrio-Mastix, or the *Player's Scourge*, against the stage, and a reflection in it against the virtue of the queen, he was brought before the Star Chamber in 1634, sentenced to the pillory, and had his ears cut off; for an offence against Land was in 1637 sentenced anew, and "lost his ears a second and final time"; was as a recalcitrant imprisoned by Cromwell, after whose death he espoused the Royalist cause, and was appointed Keeper of the Records of the Tower. (1600-1669).

Przemysl, a Polish town, on the San, 60 m. from Lwow; before the World War an Austrian fortress. Its surrender in 1915 marked the crowning success of the Russian Galician campaign in the World War, but it was recaptured in the following May. It trades in wood, corn and leather. Pop. 51,000.

Psalm, **Psalm**, the *Book of*, the collection of the sacred songs in the Old Testament, all of a lyrical character, which appear to have been at first collected for liturgical purposes. Their range is co-extensive with nearly all divine truth, and there are tones in them in accord with the experience and feelings of devout men in all ages. The collection bears the name of David, but it is clear the great body of them are of later date as well as of various authorship, although it is often difficult to determine by whom some of them were written and when.

Psaltéry, an ancient stringed musical instrument resembling the dulcimer, consisting of a rhombus-shaped frame mounted on side-pieces, the strings being struck with a stick or plectrum.

Psittacosis, a disease of parrots, due to man. A few cases have occurred in Britain, but restriction on the import of parrots has stamped it out.

Psoriasis, a skin disease, which shows patches covered with silvery scales. It affects principally the scalp, ears, elbows and knees, but may spread further. The cause is unknown. It may become chronic and always has a tendency to recur.

Psyche (i.e., the soul), in Greek mythology, a girl whose beauty awoke the jealousy of Aphrodite, the goddess of beauty, who in consequence sent Cupid, her son, to inspire her with love for a hideous monster, and so compass her ruin. Cupid, fascinated with her himself, spirited her away to a palace of delight, visited her at night as her husband, and left her before daybreak in the morning, because she must on no account know who he was. One night she lit a lamp to discover, when a drop of oil from it fell on his shoulder as he lay asleep beside her, upon which he started up and vanished out of sight. She thereupon set off in search of her lost love, till she came to the palace of Aphrodite, who made her her slave, subjecting her to a series of services, all of which she accomplished, so that Aphrodite was obliged to consent that Cupid and she should be united in wedlock.

Psychiatry, the branch of medicine meant and attempted cure of mental disorders. It has made great strides in recent years, partly as a result of the new methods introduced by Freud, Jung, Adler (q.v.) and other analytical psychologists, partly as a result of experience gained with shell-shock and other cases in the World War.

Psychical Research, the study of the relations between man and the spirit world, if any. It received its first impetus in modern times from the founding in 1882 of the Society for Psychical Research, which since then has examined such phenomena as thought-transference, hypnotism, clairvoyance, "haunted houses," hallucinations, and so on. While its investigations have unmasked many impostures, they have also shown that there is a large residuum of psychical phenomena that so far no purely materialist theory has been able fully to explain.

Psycho-analysis, a method of treating nervous cases by investigating the past history of the patient and bringing to light "complexes" and "repressions" which have been affecting the mind unconsciously; the method was introduced by Sigmund Freud (q.v.). It has been found valuable for the removal of such abnormalities as irrational fears and of various sexual disturbances.

Psychology, the science of mind, investigates mental phenomena and operations and the relations of organism and environment, or of thought to things. Until recent years, when knowledge of the physical working of the brain and nervous system has made tremendous strides, it was hardly pursued seriously as a separate study, being rather a part of general philosophy, and even now there are very few psychological data on the significance of which most psychologists would agree.

An important school since the War has been the Behaviourists, of whom the best known are J. B. Watson and Professor Pavlov, who maintain that all apparent mental activity is a mere set of physical responses to

external stimuli. The psychoanalytical school of Freud, and the kindred but different schools of Jung and Adler, emphasise the great importance of the unconscious, and see the origins of much of man's mental activity in terms of the desire for satisfaction of the sexual urge, the urge to self-preservation, or the love of power.

In spite of the theoretical disagreements of psychologists, the practical side of psychology, or psychotherapy, has since the World War made great strides in overcoming the psychic maladjustments of individuals by various kinds of suggestive treatment.

Psychotherapy, the treatment of nervous and mental disorders by psychological methods. Psychoanalysis, the special technique of Freud (q.v.), is one form, hypnotism and auto-suggestion are others. (See also *Coué*.)

Ptarmigan (*Lagopus mutus*), a

bird of the grouse family found in mountainous regions in Europe, and common in Scotland, remarkable for its seasonal changes of plumage; in spring and summer it is brownish-grey or black, moulting in August to assume a new plumage of grey and white, and in the winter being pure white.

Pterodactyl, one of a large family of

some ways resembling birds, whose fossilised remains are found in Jurassic and Cretaceous strata. Their wings consisted of a membranous expansion between the outer digit of the forelimb and the sides of the body, including the hind limbs and tail.

Ptolemaic System,

the highly complex system of astronomy ascribed to Claudius Ptolemy which assumed that the earth was the centre of a sphere which carried the heavenly bodies along in its daily revolution, accounted for the revolutions of the sun and moon by supposing they moved in eccentric circles round the earth, and regarded the planets as moving in epicycles round a point which itself revolved in an eccentric circle round the earth like the sun and moon. It was superseded by the Copernican system. (See *Copernicus*.)

Ptolemies, a dynasty of Egyptian Kings, which lasted from 323 to 30 B.C.; the most important of the 18 so named were:—*Ptolemy I.*, Soter, a favourite general of Alexander the Great, and the ruler of Egypt from 323 to 283 B.C.; *Ptolemy II.*, Philadelphus, who ruled from 283 to 247 B.C., a patron of letters and an able administrator; *Ptolemy IV.*, Philopator, who ruled from 222 to 205 B.C., and defeated Antiochus in the Battle of Raphia; *Ptolemy X.*, Soter, who ruled from 117 to 106 B.C., was driven from Alexandria to Cyprus, returning in 88 B.C., and ruling till 81 B.C.; *Ptolemy XIV.*, who ruled with his sister Cleopatra from 61 to 47 B.C.; *Ptolemy XV.*, also husband of Cleopatra, who ruled from 47 to 45 B.C.; *Ptolemy XVI.*, Caesarion, the son of Julius Caesar and Cleopatra, who ruled, with his mother, from 45 to 30 B.C.

Ptolemy (Claudius Ptolemaeus), ancient astronomer and geographer, perhaps the greatest of the ancient world.

PTARMIGAN

PTERODACTYL

born in Egypt, lived in Alexandria in the 2nd Century; was the author of the system of astronomy called after him. His principal writings were the *Almagest*, on astronomy, and the *Geography*.

Ptomaines, generally poisonous substances, formed by animal matter in process of putrefaction. The phrase "ptomaine poisoning" is, however, commonly misapplied, being used for what is generally in reality an infection by specific bacteria, e.g., *bacillus botulinus*. Among the chief ptomaines are putrescine and cadaverine, both found in putrefying albumen, neurine and methylamine.

Puberty, the period at which the reproductive system reaches full development—in temperate climates usually occurring in males at the age of 13 to 16, in females at 12 to 14. The indications of puberty in girls are, chiefly, the onset of menstruation, the development of the breasts and a general "filling-out" of the body; in boys, the growth of facial hair and the deepening or "breaking" of the voice.

Publicans, or **Publicani**, a name given by the Romans to persons who farmed the public revenues; their representatives in Palestine are mentioned with obloquy in the New Testament on several occasions.

Public Health. The duty of the State to concern itself with the healthy conditions of living of its citizens was not generally recognized before the middle of the 19th Century, but since then the field of its activities has continually and rapidly widened. In England and Wales the public health services, administered by local authorities under the supervision of the Ministry of Health, include refuse collection, housing, the provision of baths and wash-houses, drainage, the control of offensive trades, food inspection, the regulation of dairies and places where food is made, stored or sold, maternity and child welfare services, tuberculosis clinics, the compulsory notification of infectious diseases, the prevention of water pollution, and many other activities. Every district, borough, or county council employs a Medical Officer of Health to superintend these services within its area.

Public Meeting, an assembly of persons to discuss a grievance or exercise their right of free speech. The right of public meeting has always been recognised in theory in Great Britain, subject to the possibility in case of riot of prosecution for unlawful assembly; the present law on the subject is based on the Public Order Act (q.v.) of 1936. Any meeting to which public access is unimpeded, even if held on private premises, is a public meeting.

Public Order Act, an Act passed in 1936 which forbids the wearing of political uniforms and the carrying of weapons at public meetings, regulates the procedure to be followed by the police in the case of interruption of such meetings, and gives the police power to regulate, or in case of necessity forbid, processions in public places.

Public Prosecutor, or **Director of Public Prosecutions**, the officer entrusted with the duty of undertaking the prosecution of criminals in serious cases on behalf of the Crown. He acts generally on the instructions of the Attorney-General.

Public Trustee, a public official appointed in 1900 to perform any functions which may be exercised by any other trustee, save the management of a business or of a trust for religious or charitable purposes. His fees are regulated by statute to cover only the expenses of his department without profit, and as he is a

public servant, the efficiency and honesty of his officers are guaranteed by the State's backing. In 1937, the Public Trustee was administering funds whose capital value approached £220 millions.

Public Utilities, general name for those services, such as the supply of gas, water, electricity, local passenger transport, etc., which it is considered undesirable to leave to unrestricted competitive private enterprise. The tendency of modern legislation is to arrange for their supply by specially constituted authorities, partly or wholly elected or appointed by local authorities and with a statutory limitation to their profits.

Publishing, the process by which an author's works are presented to the public. Until the end of the 18th Century there was generally no distinction between publisher and bookseller; but since then it has been the publisher's function to deal directly with the author, remunerate him for his work by outright purchase or by payment to him of a royalty or commission on sales, to arrange for the printing of his work, and for its distribution to retail booksellers.

Puccini, Giacomo, Italian operatic composer. His masterpieces are *La Bohème*, *La Tosca*, and *Madame Butterfly*, followed later by *The Girl of the Golden West*, and *Turandot*. (1858–1924).

Pudsey, borough of Yorks, England, in West Riding, 4 m. E. of Bradford. Woollens and worsteds are made and there are dyeworks, fulling mills, and iron and brass foundries. Pop. 24,600.

Puebla, state and town of Mexico, the latter on an elevated plateau 7,000 ft. above the sea, 68 m. due S.E. of Mexico, the fourth city of the republic, with Doric cathedral, theological, medical and other schools, a museum and two libraries; cotton and woollen goods, iron, paper, and glass are manufactured. Pop. (town), 123,000; (State), 1,150,500.

Pueblo, city and industrial centre of Colorado, U.S.A., on Arkansas R. Oil and coal are found near by, and metal-smelting is the main industry. Pop. 50,100.

Pueblos, tribes of N. American Indians living in New Mexico and Arizona, U.S.A., so called because they are gathered together in *pueblos*, or villages, in communal huts of stone or mud. The several clans are remarkable for their peculiarly decorative pottery and fabrics, which show some resemblance to early Aztec designs.

Puerperal Fever, a disease which after childbirth, due to septic infection or the retention of a small fragment of the placenta. It is often accompanied by peritonitis. The symptoms—rigors and chills—begin two or three days after childbirth, and are followed by a high temperature. Its incidence has been much reduced of recent years by improved methods of care at childbirth.

Puerto Rico, a West Indian island, 75 m. E. of Haiti, since 1898 a possession of the United States. Sugar, coffee, tobacco and tropical fruits are the principal crops; salt and manganese are mined. The principal exports are sugar and pineapples. The capital is San Juan. Mayaguez and Ponce are other towns. The island was discovered by Columbus, who called it Hispaniola, in 1493. Colonised by Spain in 1510, it attempted unsuccessfully to gain independence in 1820–1823, was seized by the United States in the war of 1898, and since 1917 has enjoyed a large measure of home rule. Area, 3,440 sq. m. Pop. 1,725,500.

Puff-Adder (*Bites arctans*), a venomous African viper which frequents sandy places; it derives its name from its habit of inflating its body when disturbed.

It is about 4½ ft. in length, and in colour a mottled brown.

Puffin, a large-billed sea-bird (*Fraterrula arctica*) of the auk family (Alcidae), common on the British coast, whence Puffin I., Anglesey, gets its name. The plumage is glossy black above, under surface pure white, feet orange-red, the bill flattened laterally and parti-coloured, being brilliant in summer, but smaller and duller in winter when part is shed. The bird is also called Bottle-nose, Pope or Sea-Parrot.

PUFFIN

Pug, a dwarf, snub-nosed breed of domestic dog, resembling a diminutive bull-dog or mastiff, fawn, or occasionally black, in colour. There are two breeds, Dutch and French, the latter being somewhat smaller.

Puget Sound, an inlet on the coast of Washington, U.S.A., with Seattle on its shores. It is the site of a United States naval station.

Pugin, Augustus Welby, English architect, born in London, of French parentage; assisted in decorating the Houses of Parliament, and designed many Roman Catholic churches, including several of the English cathedrals of that body; wrote several works on architecture. He was afflicted in the prime of life with insanity, and died at Ramsgate. (1812-1852).

Puisne Judge, term applied to all Court in Great Britain other than the Lord Chancellor, the Lord Chief Justice, and the Master of the Rolls, and applied to them in the Act of 1877 establishing the Supreme Court of Judicature.

Pulitzer, Joseph, American newspaper proprietor, born in Hungary; beginning in St. Louis in 1872, he acquired the ownership of several important American newspapers, ending his career as proprietor of the *New York World*. By his will he established the Pulitzer prizes, awarded annually for original work in music, the drama, and literature. (1847-1911).

Pulley, a grooved wheel on a shaft, driving, or driven by, a belt; also a general term for a small wheel over which a rope, chain or eash-cord runs. This simple mechanical power consists, essentially, of a small circular plate or wheel which turns round an axis passing through the centre of its faces, and having its ends supported by a framework called the block. The groove cut in the edge of the plate or wheel prevents the belt or rope from slipping off when it is put round the pulley. A pulley transmits power or changes the direction of motion or of a force, according as it is movable or fixed.

Pulpit, a raised place or desk in a church, mosque or synagogue from which the preacher delivers his sermon. It is usually of wood, often, especially in Jacobean times, richly carved, but sometimes is of stone or marble. It is frequently surmounted by a sounding-board.

Pulque, beverage in use in Mexico and Central America, made from the fermented juice of the agave (q.v.).

Pulse, a general term for leguminous plants, and the seeds they produce, including beans, peas, lentils, etc.

Pulse, the beat felt in an artery when slight pressure is applied to it, caused by the systole of the heart, or the throb of the arteries as blood is propelled through them. At birth the number of beats is about 130 to

140 a minute; at the end of the first year 120 to 108; two years 108 to 90; three years 90 to 80; seven years 85; puberty 85 to 80; adult age 75 to 70; old age 65 to 60. It is slower in man than in woman, and is affected to some extent by the position of the body.

Puma, Cougar, or Mountain Lion, a large, large, tawny, carnivorous beast, the largest feline of the New World, running to nearly 3½ ft. in length; has a small head, a long tail and no mane. It is destructive to cattle, but rarely attacks man. It is mainly found in South, but to a lesser extent also in North, America.

Pumice, a very porous, acid, volcanic, igneous rock of the rhyolite class, of extreme lightness, floating in water. It is mainly exported from the Lipari Is., and is used for polishing metals.

Pump, a contrivance for raising or pro-pelling liquids, compressing or rarefying gases, and similar operations. The simple water-pump makes use of the pressure of the atmosphere, the rising piston driving out air before it and so creating a partial vacuum in the cylinder below it. The atmospheric pressure on the water into which the cylinder dips causes the latter to fill with water, and when the piston descends some of this water passes through a valve in it to the upper side. Hence at the next stroke the piston carries up water with it, and delivery is effected through a spout in the side of the cylinder. Since the atmospheric pressure is only able to raise water some 30 ft., other forms of pump must be used if the water has to be obtained from, or delivered to, a greater vertical distance than this. See also Air-pumps.

Pumpkin, or Gourd, the fruit of a trailing plant (*Cucurbita pepo*) of the family Cucurbitaceae, grown in warm climates. Its bulk to the extent of 90 per cent. consists of water. Its seeds yield a commercial oil, and its fruit is used for pies.

PUMPKIN PLANT

Punch, the name PUNCHINELLO of the chief character in a well-known puppet show of Italian origin, appropriated as the title of the leading English comic journal, started in 1841, under the editorship of Henry Mayhew and Mark Lemon. The wittiest literary men of the time, as well as the cleverest artists, have contributed to its pages, among the former being Thackeray, Douglas Jerrold, Tom Hood, A. P. Herbert and E. V. Knox, and among the latter Doyle, Harry Furniss, Phil May, Leech, Tonnell, Da Mauries, and Sir Bernard Partridge.

Punch, a beverage popular in Victorian times, said to be of Indian origin, compounded of some alcoholic spirit with water (or milk), lemon-juice, spice and sugar.

Punchinello. See **Punch**.

Pundit, title of honour given to a Hindu scholar remarkable for his attainments in literary and religious lore and in Sanskrit studies.

Punic Wars, three wars between Rome and Carthage, the first from 264 to 241, leading to the Roman occupation of Sicily; the second from 218 to 201, during which occurred Hannibal's famous expedition across the Alps to Italy and his defeat of the Romans at Cannae, but which ended in a Roman victory, the conquest of Spain, and a practical protectorate of Rome over Carthage; and the third from 149 to 146 B.C., at the conclusion of which Carthage was besieged and totally destroyed.

Punjab ("five rivers"), a province in the extreme N.W. of British India, watered by the Indus and its four tributaries, Jhelum, Chenab, Ravi, and Sutlej. Its frontiers touch Afghanistan and Kashmir. Mountain ranges traverse the N., W. and S.; little rain falls; the plains are dry and hot in summer. There is little timber; the soil is barren, but under irrigation there are fertile stretches. Wheat, indigo, sugar, cotton, tobacco, opium, and tea are largely grown; cotton, silk, lace, iron, and leather are manufactured; indigo, grain, cotton, and manufactured products are exported in exchange for raw material, dyes, horses, and timber. The population is mixed. Sikhs, Jats, and Rajputs predominate; more than a half are Mohammedan, and more than a quarter Hindu. The Sikhs have a religion of their own. Lahore is the capital; other towns are Amritsar, Lahore and Rawalpindi. Area, 97,800 sq. m. Pop. 23,580,000.

Punkah, a large fan used in houses in the East for ventilating purposes, consisting generally of a sheet of textile material stretched over a frame and suspended from the ceiling of a room, the whole being kept in motion by a cord worked by a servant.

Pupa, or *Chrysalis*, the stage in the life of larval and adult stages, in which the insect is completely inactive, usually living in a silken outer case called the cocoon.

Pupil, in the eye, the circular opening of the iris, its direction being somewhat to the nasal side of the iris; its contractions are caused by the muscular layer of the iris, its dilations by radiating fibres of the muscular layer.

Purānas, a body of late Hindu religious works which form the basis of the popular belief of the Hindus. There are 18 principal Purānas of various dates, but mainly of the period from A.D. 800 to 1000.

Purbeck, Isle of, the peninsula in South Dorsetshire, England, lying between the R. Frome, Poole Harbour, and the English Channel; formerly a royal deer-forest; has a precipitous coast, and inland consists of chalk downs; nearly 100 quarries of "Purbeck marble" are wrought. The chief town is Swanage.

Purcell, Henry, English musician, born at Westminster; was successively organist at Westminster Abbey and to the Chapel Royal; excelled in all forms of musical composition; was the author of anthems, cantatas, glees, etc., and of an opera, *Diido and Aeneas*. He set the songs of Shakespeare's *Tempest* to music, wrote the songs for Dryden's *King Arthur*, and the music for Howard and Dryden's *Indian Queen*. (1658-1695).

Purgatory, in the creed of the Roman Catholic Church, a place in which the souls of the dead who have repented of, but not fully atoned for, their sins, are purified by suffering until they are fit for heaven. They may be assisted by the prayers of those on earth, and especially by the sacrifice of the Mass, and indulgences (q.v.) may be applied to them. The "Romish doctrine of purgatory" is condemned by the 39 Articles, but the existence of a Purgatory is now accepted by many Anglicans.

Purification, a Christian feast, celebrated on Feb. 2, commemorating the Presentation of Jesus in the Temple at Jerusalem on the 40th day after His birth, when His mother, Mary, was ceremonially purified according to the prescriptions of the Mosaic law.

Purim, ("Lots"), an annual Jewish feast, still celebrated in commemoration of the preservation of the race from the threatened massacre of Haman, recorded in the Biblical book of Esther. It is an occasion of presenting plays and exchanging gifts, not unlike the Christian Christmas.

Puritans, name given to a body of England who refused to assent to the Act of Uniformity passed in the reign of Queen Elizabeth, considering that it required them to conform to Roman Catholic doctrine and ritual; and afterwards applied to the whole body of Nonconformists in England in the 16th and 17th Centuries, who insisted on rigid adherence to the simplicity which they supposed to be required by the Holy Scriptures. The name fell out of use with the unpopularity of the party after the restoration of Charles II.

Purslane, a small annual plant (*Portulaca oleracea*) of the family Portulacaceae, native to India, and occasionally found wild as a weed in Britain; it has small yellow flowers and prostrate stems. Some other species of the genus are grown in gardens as rock-plants.

Pursuivant, one of the junior officers in the Herald's College, four in England, named respectively Rouge Croix, Blue Mantle, Rouge Dragon, and Portcullis; and three in Scotland, named respectively Bute, Carrick, and Unicorn.

Pus, the product of suppuration, a viscid yellow fluid secreted or discharged in festering or inflammation. It consists of white blood corpuscles (leucocytes) and the bacteria which have given rise to its formation, with other diseased body-cells, suspended in a liquid medium.

Pusey, Edward Bouverie, English theologian, born in Berkshire; at Oxford was brought into relationship with Newman and Keble; was in 1828 appointed Regius Professor of Hebrew at Oxford; in 1833 joined the Tractarian Movement, to which he contributed by his learning and which was at length called by his name. He was the author of several learned works, among them the *Minor Prophets*, a *Commentary* and *Daniel the Prophet*, and edited the famous Oxford Library of the Fathers. (1800-1882).

Pushkin, Alexander Sergeievich, Russian poet and dramatist, born in Moscow. His chief works are *Ruslan and Liudmila* (a heroic poem), *Eugene Onegin* (a romance), *Boris Godunov* (a drama), and the prose tale *The Captain's Daughter*; was mortally wounded in a duel. (1799-1837).

Pushtu, the language of the Afghans, derived mainly from the Persian, with Arabic and other admixtures.

Putty, a paste made of linseed-oil mixed with whiting or powdered chalk, used to fix sheets of glass into their frames and for stopping up holes in woodwork.

Putumayo, Commissary District of Colombia, S. America, separated from Peru by the Putumayo R. A British government enquiry in 1912 reported gross cruelty to natives in the rubber-growing districts of Putumayo, which was in consequence brought to an end. Pop. c. 17,000.

Puy, La, capital of dept. Haute-Loire, France, 90 m. SW. of Lyons, a bishop's seat, with a 12th Century cathedral; is the centre of a great lace manufacture. Pop. 15,000.

Puy-de-Dôme, a dept. of Central valley of the Allier, on the slopes of the Auvergne Mts. Agriculture and cattle-breeding are the chief industries; in the mountains coal and lead are found, and there are many mineral springs. The principal town is

PUPA: (A) OF BUTTERFLY, (B) OF BEETLE

Clement-Terrand, where Peter the Hermit preached the first crusade. Area, 3,100 sq. m. Pop. 486,000. The name is taken from that of a mountain in the dept., 4,800 ft. high, with a meteorological observatory.

Pwllheli, borough, seaside resort and port of Caernarvonshire, Wales, on Cardigan Bay. It has lobster and oyster fisheries, and near are lead and copper mines. Pop. 3,600.

Pyæmia, a form of blood poisoning caused by micro-organisms which form pus, leading to the setting up of abscesses. It is marked by high fever, sweating, vomiting, and often severe local pain, with possibly delirium.

Pygmalion, legendary king of Cyprus, said to have fallen in love with an ivory statue of a maiden, Galatea, he had himself made, and to have prayed Aphrodite to breathe life into it.

Pygmies, a fabulous people, their height 13½ in. mentioned by Homer as dwelling on the shores of the ocean and attacked by cranes in spring time, the theme of numerous stories. Some tribes of negroes of unusually short stature in Africa have also given the name.

Pyllades. See *Orestes*.

Pylon, the gateway of an ancient Egyptian temple, usually a monolithic lintel flanked by pyramid-like towers.

The name has been revived in recent years to describe the large metal towers erected to support power-transmission cables, and for ornamental towers at the entrances of bridges, sports arenas, etc.

EGYPTIAN PYLON

Pylorus, the opening of the stomach into the intestine, through which the softened and partly digested food passes into the small intestine.

Pym, John, English Puritan statesman, born in Somersetshire; entered Parliament in 1621, opposed the arbitrary measures of the king, took a prominent part in the impeachment of Buckingham; at the opening of the Long Parliament procured the impeachment of Strafford, and conducted the proceedings against him. He was one of the five members illegally arrested by Charles I., and was brought back again in triumph to Westminster. (1584-1643).

Pyorrhœa, any copious discharge of pus (g.v.) especially applied to *pyorrhœa alveolaris*, or Riggs's disease, a condition of suppuration in the sockets of the teeth, causing the latter to loosen; quantities of pus are produced around the teeth and swallowed with the food, thereby causing a low state of health, digestive troubles, joint diseases, and many other evil consequences. It is generally a complaint of middle age.

Pyramids, ancient structures of stone or brick, resting generally on square bases and tapering upwards with triangular sides, found in different parts of the world, but chiefly in Egypt, where the most celebrated are those of Gizeh, 10 m. W. of Cairo, three in number, viz., the Great Pyramid of Cheops, 449 ft. high, and the sides at base 746 ft. long, that of Khephren, nearly the same size, and that of Mykerinos, not half the height of the other two, but excelling them in beauty of execution. They are sepulchral monuments of early Egyptian kings. From certain marks in the King's Chamber of the Great Pyramid, and from measurements of the structure, a school of Bible students claims to be able to read the history of the world, alleging that the World War and many events still to come are foretold there.

Pyramids, a game played by two persons with sixteen billiard balls, one white and fifteen red. The latter are arranged in the form of a solid triangle, with its apex on the "Pyramid spot," and its base towards the top cushion and lying parallel thereto. When the reds have all been pocketed but one, the player making the last score continues playing with the white ball and his opponent uses the other. If a striker now misses or pockets the ball he is playing with, his opponent adds one to his score and the game is over. When the game is played by more than two, it is known as "Shell-out."

Pyramus and Thisbe, two legendary lovers who lived in adjoining houses in Babylon, and who used to converse with each other through a hole in the wall. The maiden, keeping an appointment one evening to meet her lover, and being confronted by a lioness took to flight and left her garment behind her, which the lioness had soiled with blood. Pyramus, arriving after this, saw the bloody garment and immediately killed himself, concluding that she had been murdered, while she on return, finding he had died, did the same.

Pyrenees, a broad chain of lofty mountains running from the Bay of Biscay, 276 m. eastwards, to the Mediterranean, forming the boundary between France and Spain. They are highest in the centre, Aneto (Pic de Méthon) reaching 11,168 ft. The snow-line is about 9,000 ft., and there are glaciers on the French side. Valleys run up either side, ending in precipitous "pot-holes," with great regularity. The passes are very dangerous from wind and snow storms. The streams to the N. feed the Adour and Garonne; those to the S., the Ebro and Douro. Vegetation in the W. is European, in the E. sub-tropical. Minerals are few, though iron is worked.

Pyrenées - Orientales, dept. of France, on the Spanish border and Mediterranean coast; it is mountainous, and has a number of lakes. Wine is produced on a large scale, and copper and iron are worked. Capital, Perpignan. Area, 1,600 sq. m. Pop. 235,000.

Pyrethrum, genus of herbaceous perennial plants, of the order Compositæ, with a wide range of colours, including the feverfew. The genus is closely related to the Chrysanthemum, and by some botanists is included under it. The various varieties, including *P. roseum*, can be grown out of doors all the year round, and have been termed "the poor man's chrysanthemum."

PYRETHRUM

Pyridine, a colourless, evil-smelling liquid found in small quantities in coal-tar and in the oil obtained by the distillation of bones. It boils at 115° C., and is weakly alkaline; it is of theoretical importance as the parent substance of a large number of useful compounds.

Pyrites, name for many combinations of metals with sulphur or arsenic, applied especially to disulphide of iron (iron pyrites) and copper pyrites. The latter is commonly mined for its sulphur content, but sometimes also for its copper, as at the famous Rio Tinto mines of Huelva, Spain.

Pyrogallie Acid, more properly known as Pyrogallol (since it is not an acid), is familiar as the photographic developer "pyro." It is a white crystalline solid made by heating gallic acid (which is itself obtained from gall-nuts). It is a powerful reducing agent, and its use in photography depends upon this property.

Pyrolusite, the naturally occurring mineral form of the chemical substance manganese dioxide, as a source of which it is used. It is also employed in glass manufacture, since addition of a little to the glass neutralizes the green tinge often caused in glass by the presence of iron.

Pyrometer, an instrument for the measurement of high temperatures. A common form is the platinum resistance thermometer, whose action depends upon the fact that the electrical resistance of a platinum wire increases with rise of temperature. Thermo-electric pyrometers consist essentially of strips of two dissimilar metals joined at one end and connected at the other to an electric circuit containing a sensitive galvanometer. When the junction is heated, a small current flows through the circuit, and the temperature can be calculated from the galvanometer-reading of the varying potential difference. The principle of the optical pyrometer is that the colour of the light emitted by a red-hot to white-hot body is directly related to its temperature; hence by matching this light through screens of colours corresponding to known temperatures, the temperature of the body can be estimated.

Pyrotechny, the science of manufacturing fireworks (q.v.).

Pyroxene, a group of mineral silicates found in igneous rocks, including jadeite, largely used by primitive man for ornaments and domestic utensils, augite, and pectolite.

Pyrhic Dance, the chief war dance of the Greeks, of quick, light movement, to the music of flutes; was of Cretan or Spartan origin.

Pyrhus, king of Epirus, and kinsman of Alexander the Great; in 280 B.C. invaded Italy with a huge army, directed to assist the Italian Greeks against Rome. In the decisive battles of that year and the next, he won "Pyrhic victories" over the Romans, losing so many men that he could not pursue his advantage; 278 to 276 B.C. he spent helping the Greek colonies in Sicily against Carthage; his success was not uniform, and a Carthaginian fleet inflicted a serious defeat on his fleet returning to Italy.

In 274 he was thoroughly vanquished by the Romans, and retired to Epirus; subsequent wars against Sparta and Argos were marked by disaster; in the latter he was killed. (c. 318-272 B.C.)

Pyrrrole, a colourless liquid occurring in small quantities in coal-tar and bone-oil. It boils at 131° C., and somewhat resembles chloroform in odour. It is of interest as a parent substance of hæmatin, the red colouring matter of blood, and of chlorophyll, the green pigment of plants.

Pytchley, a village in Northamptonshire, England, 3 m. SW. of Kettering; famous as a hunting centre since the 18th Century, though the kennels have been removed to Brixworth.

Pythagoras, Greek philosopher and mathematician, founder of the Pythagorean school, born in Samos; apparently flourished between 540 and 500 B.C.; after travels in many lands settled at Crotona in Magna Græcia, where he founded a fraternity, the members of which bound themselves to purity of life and the attempt to establish a model social organisation. They appear to have upheld the doctrine of transmigration of souls. He is credited with the discovery of the theorem named after him, that the square on the hypotenuse of a right-angled triangle is equal to the sum of the squares on the other two sides.

Python, a large serpent, averaging some 20 ft. in length, with several species found in Indo-China, Malaya and Africa. They feed on small mammals and birds, which they constrict to death in their coils. They are not venomous.

Pyx, a vessel of precious metal, resembling a chalice, in which the consecrated Host is kept; also a small locker-like receptacle, worn round the neck of a priest, in which the Host is conveyed from the Church to the bedside of the sick for purposes of Holy Communion.

Pyx, Trial of the, a test made from time to time at the Royal Mint, by a jury of goldsmiths, to ensure the accuracy of the fineness of the gold and silver coins, so-called from the fact that the coins to be tried are presented in a box or "Pyx."

Q

Q-boats, special ships used by the British navy during the World War to cope with submarines. Disguised as cargo vessels with crews in appropriate disguise, they carried concealed guns which came into action after a submarine rose to the surface to capture them. Rear-Admiral Gordon Campbell, V.C., was one of the chief pioneers of the system.

Quadragesima, (i.e., 40th), a name given to Lent because it lasted 40 days; the Sundays in Lent are sometimes referred to as the 1st, 2nd, etc., Sundays of Quadragesima.

Quadrangle, in geometry, a plane figure having four straight sides and therefore, as its name implies, four angles. Particular types of quadrangle are those having four equal sides and four equal (right) angles; the rectangle, all the angles of which are right-angles but the pairs of opposite sides of which are unequal; and the parallelogram (q.v.). Hence the term is applied to large rectangular courtyards surrounded by buildings.

U.E.

Quadrant, an instrument formerly used in navigation, for taking altitudes. It consisted of the graduated arc of a circle of 90 degrees. It was superseded by the sextant.

Quadratic Equation, in Algebra, an equation involving the square of the unknown quantity.

Quadrature, the construction of a square equal in area to another given geometrical figure. The squaring of the circle is an age-old problem which has probably been the subject of more research than any other in mathematics. Since the area of a circle is equal to the product of an in

QUADRANT

measurable number representing the relationship between the radius and the circumference of a circle (referred to as π and approximately though not exactly equal to 3.1719) and the square of the radius, the problem cannot be solved by purely geometrical means. In practice a square is equal to a circle if its side is 0.88623 times the diameter of the circle.

Quadriga, a 2-wheeled chariot drawn by 4 horses abreast, used in the ancient chariot races.

Quadrilateral, a name formerly in NE. Italy, held before 1866, by the Austrians, namely, Peschiera, Mantua, Verona and Legnago; on the holding of these towns the maintenance of the Imperial power in Italy was held to depend.

Quadrille, a dance consisting of 8 figures or movements, executed by 4 sets of couples, each set forming 1 side of a square, or the music for such a dance. The name is also used for an old card game red by 4 players with 40 cards, the 8's, 9's, 10's being discarded.

Quadrireme, an ancient war galley manned in 4 banks, a development from the trireme (q.v.).

Quadroon, the name given to the offspring of a mulatto and a white person who thus contains one-quarter negro blood.

Quadrumania, a name applied by Cuvier, but now obsolete, to the highest order of mammals, including apes, monkeys and lemurs; see *Primates*.

Quadruple Alliance, an alliance formed in 1719 between England, France, Austria and the Netherlands, to secure the settlement of European affairs brought about by the Treaty of Utrecht.

Quæstors, the name given in ancient Rome to the officers entrusted with the care of the public treasury, originally 2 in number, but eventually increased, till in Caesar's time they amounted to 40. Under the republic they were the public prosecutors in cases of murder; in time their judicial functions passed, until they became in effect financial officers of the emperors and consuls.

Quagga, a wild ass, resembling the zebra, but having striped markings on the head, neck and forepart of the body only. At one time abundant in South Africa, it is now believed to be extinct. It was chestnut red in colour and had small ears. It was confined to the Orange R. district. Other varieties had a more extended range and some, e.g., Burchell's Bonte-Quagga, had the stripes well marked on the hinder parts of the body.

QUAGGA

Quaglio, the name of a family of Italian famous were Domenico (1723-1760), called the Elder, who specialized in historical paintings; and his two grandsons, Domenico (1787-1837) called the Younger, and Angelo (1784-1815), who also attained fame as an architect. Two other grandsons, Lorenzo (1793-1869) and Simon (1795-1878) also practised painting and allied arts.

Quai D'Orsay, the name of a quay Seine, in Paris. Here are situated the build-

ings which house the French Department of Foreign Affairs.

Quaigh, a name formerly given to a wooden drinking-cup in Scotland.

Quail, a genus (*Coturnix*) of game birds, of the family *Perdix*, resembling a very small partridge, with light streaks on the upper parts, the Common Quail (*Coturnix coturnix*) being the most important and the most widely distributed over the Old World. Vast numbers are or have been netted along the northern African coast for consumption in Egypt. In England it is mostly a summer visitor, though small numbers stay all the year round.

COMMON QUAIL

Quain, Jones, anatomist, born at Mallow, Ireland; was professor of Anatomy and Physiology in London University; was author of *Elements of Anatomy*, of which the first edition was published in 1828 (1796-1865).

Quain, Sir Richard, English physician, born at Mallow, cousin of preceding; edited *Dictionary of Medicine*, and was President of the British Medical Council in 1891 (1816-1898).

Quain, Richard, anatomist, born at Fernoy, Ireland, brother of preceding, and professor in London University; author of a number of medical works; bequeathed a large legacy to the university for "education in modern languages" (1800-1837).

Quair, or *Quhair*, an old Scottish name for a book, derived from the French *cavier* (a little book) and allied to "quire"; hence *The King's Quair*, written by James I.

Quake Grass, or *Quaking Grass*, a genus (*Brisa*) of grasses having panicles of delicately suspended spikelets which droop on one side. There are 18 different species, 2 native to Britain. *Brisa media* or Common Quaking Grass is cultivated as a border annual.

Quakers, the Society of Friends (q.v.), so called first by Justice Bennet of Derby, because Fox bade him quake before the Lord.

Quamash (*Camassia esculenta*), a bulbous plant of the hyacinth section of the lily family (Liliaceae) with blue and white flowers. It is indigenous to N. America where its roots were roasted and eaten by N. American Indians.

Quantity Surveyor, a surveyor architect's plans draws up a list of the materials required in the construction of an edifice, and assists in the preliminary costing before work starts.

Quantock Hills, a range of hills in Somerset, England, stretching about 8 m. from the Bristol Channel near Watchet towards Taunton. The highest point is Willaseck, 1,260 ft.

Quantum Theory. Until the beginning of the 20th Century it was thought that when an atom emits energy as radiation of a particular frequency, any small quantity of energy might be emitted. In 1900, however, Max Planck (q.v.) discovered that, to account for the distribution in the colour of the radiation emitted by a hot body, it was necessary to assume that this was not so. Energy is radiated in bundles or quanta, and the amount of energy in a quantum depends upon the frequency of the radiation. The theory led to remarkable successes in other branches of physics. In 1905 Einstein used it to explain some of the

facts of photo-electricity, and in 1913 Bohr began to apply it to the theory of spectra and the constitution of atoms. At the present day a modified form of it is of fundamental importance for all theories concerning sub-atomic phenomena and the constitution of atoms, the explanation of specific heats, electrical conductivity, radiation, and photo-electricity.

Quarantine, the prescribed time, the name), of non-intercourse with the shore for a ship suspected of harbouring cases of infectious disease; now applied as a general name for any measures that port sanitary authorities may see fit to take in relation to such a ship.

Quare Impedit, a writ which may be applied for a church living against a bishop who refuses to institute a candidate presented, and calling upon him to give his reasons for the refusal.

Quaritch, **Bernard**, English bookseller, born in Saxony, who opened a business for dealing in rare books in London in 1847, gradually developing it into the largest institution of its kind in the world; his catalogues are of great bibliographical value. The business was after his death carried on by his son. (1819-1899).

Quarles, **Francis**, English poet, born in Essex, held divers offices at the Court, in the City, and the Church; was a strong Royalist and churchman, and a voluminous author, both in prose and verse, now remembered for his *Divine Emblems*, and *Enchiridion*. (1592-1644).

Quarry, in mining, an open or surface working for stone or slate, the term "mine" being usually restricted to pits or places from which coal or metals are extracted, "quarry" to those from which squared stones for building, etc., such as marble, granite or slate, are taken. In a quarry, the overlying soil is simply removed and the blocks of stone cut and lifted out by cranes. Quarrying methods depend on the position and composition of the rock.

Quart, an English measure of capacity for both liquids and solids, the fourth part of a gallon.

Quartation, a process used for the separation of gold from silver in an alloy of the two metals, by boiling them with concentrated nitric acid. It is only successful if the alloy does not contain more than 25 per cent. by weight of gold.

Quarter, an English measure of weight, representing the fourth part of a cwt., or 28 lb.; and of capacity, when it equals 8 bushels or 64 gallons. A quarter of wheat is reckoned as 480 lb. (8 bushels).

Quarter Days, in England and Ireland, Lady Day, March 25; Midsummer Day, June 24; Michaelmas Day, Sept. 29; and Christmas Day, Dec. 25; while in Scotland the legal terms are Candlemas, Feb. 2; Whitunday, May 15; Lammas, Aug. 1; and Martinmas, Nov. 11.

Quarter-deck, the part of a ship abaft the mainmast, or between the main and mizzen, where there is a poop.

Quartering, in heraldry, the arrangement of several coats-of-arms on one shield to form one bearing, as in the royal arms of the United Kingdom, where those of the constituent countries are conjoined; also the division of a coat-of-arms into four or more quarters by perpendicular or horizontal lines. A quartered shield sometimes has one or more of its divisions again quartered, and is then described as counter-quartered, the large divisions being known as the Grand Quarters.

Quarterly Review, a review started by John Murray, the London publisher, in Feb., 1809; among its earliest contributors were Southey, Scott, Hazlitt, and Gladstone.

Quartermaster, in the army an officer whose duty it is to look after the quarters, clothing, rations, stores and ammunition, etc., of a company or other division of troops, and in the navy a petty officer who is concerned with stowage, steering, soundings, etc., of the ship.

Quarter Sessions, courts held 4 times a year in counties or boroughs, to hear appeals from summary convictions (see *Justice of the Peace; Petty Sessions*), and to dispose of such crimes as statute law permits. These Courts cannot try treason, murder or any capital felony, or any felony which involves a sentence of penal servitude for life, perjury, forgery, bigamy, libel, abduction, etc. At the County Quarter Sessions the justices sit as judges presided over by a chairman who is generally a trained lawyer; whilst at the Borough Sessions, the judge is a recorder, who must be a barrister of 5 years' standing.

Quarter-staff, a strong wooden staff with iron, grasped in the middle; used formerly as a defensive and duelling weapon by English peasants.

Quartette, a musical composition for 4 voices or instruments, in the latter case usually 2 violins, violoncello and viola. The form was much favoured by Mozart and Beethoven.

Quarto, a sheet of paper so folded as to make 4 leaves, or a book printed on paper so folded; usually abbreviated to 4to. The usual varieties are Crown Quarto (10 by 7½ in.), Royal Quarto (12½ by 10 in.) and Foolscap Quarto (8½ by 6½ in.).

Quartz, a very hard siliceous crystalline mineral, abundant in igneous rocks, especially those classed as "acid," e.g., granites. It is used in the manufacture of chemical apparatus as, owing to its small expansion, it can resist great heat and can be cooled suddenly without damage, and, when crushed, as an abrasive.

Quartzite, or **Quartz Rock**, a variety of sandstone in which silica is deposited as quartz to form a solid mass. It is usually pink or grey in colour, but sometimes pure white.

Quassia, a small tree of the order Simarubaceae, named by Linnaeus after Quass, a negro of Surinam, who successfully used its bark as a remedy for endemic fevers. The entire plant is bitter and has strong antiseptic properties. The Surinam plant is *Quassia amara*; Jamaica quassia, or *Picroena excelsa*, produces the quassia chips used in medicine.

Quaternary, in geology, the post-geological formation, or the time elapsed between the end of the Pliocene period and the present day. It is divided into the Pleistocene and post-Glacial epochs, in the latter of which we are still living.

Quaternions, a mathematical technique for dealing with quantities having direction as well as magnitude; it was invented by Sir William Rowan Hamilton, an Irish mathematician of the 19th Century. It is of importance as a method in mathematical physics; it has now become part of the branch of mathematics known as vector analysis.

Quatre-Bras (i.e., four arms), a village 10 m. S.E. of Waterloo; the scene of an obstinate conflict between the English under Wellington and the French under Ney, two days before the battle of Waterloo.

Quatrefoil, in architecture, a panel four leaves, or the leaf-shaped space formed by the cusps, and supposed to represent the leaves of a cruciform plant. Gothic pillars are often quatrefoil in plan.

QUATREFOIL

Quattrocento,

(i.e., four hundred), a term employed by the Italians to signify one thousand four hundred, that is the 15th Century, and applied by them to the literature and art of the period.

Quaver, a musical note and measure of the eighth of a semibreve.

Quay, a solid, stationary artificial landing-place, lying along or projecting into a stream, harbour or basin, for unloading or loading ships. Quays are generally constructed of stone, but may be also of iron or wood.

Quebec, formerly called **Lower Canada**, province of the Dominion of Canada, occupying that part of the Valley of the St. Lawrence, and on a narrow stretch of fertile, well-cultivated land on the S. of the river, which is bounded on the S. by the states of New York and Maine, and on the E. by New Brunswick, with that part of the Labrador Peninsula not included in Newfoundland. It contains extensive tracts of cultivated land and forests interspersed with lakes and rivers, effluents of the St. Lawrence. The soil, which is fertile, yields good crops of cereals and potatoes; there is good pasturage, valuable fisheries, and much timber, largely used for wood pulp. Copper, gold, asbestos and other minerals are mined. The largest cities are Montreal, Quebec and Verdun. It was colonized by the French in 1608, was taken by the English in 1759-1760, and the great majority of the population is of French extraction. Area 584,500 sq. m. Pop. 3,150,000.

Quebec, the capital of the Canadian province of that name, and once of all Canada, situated on the steep promontory, 333 ft. in height, of the NW. bank of the St. Lawrence, at the mouth of the St. Charles R., 300 m. from the sea, and 180 m. below Montreal. There are two cathedrals and a university. It has a large trade in timber, besides grain and cattle, and manufactures of hardware, machinery and textiles. The aspect of the town is Norman-French. To the SW. are the Plains of Abraham, with a monument to Wolfe. Pop. 142,000.

Queen, the head of a monarchical state, if a female, or the wife of the head, if a male. The queen regnant has the same powers and status as a king. The life and chastity of a Queen Consort in Great Britain are protected by the Statute of Treasons; she has her own Attorney and Solicitor-General; though married she has always been in law in the position of a single woman, and thus could sue and be sued, convey and purchase property, etc., apart from her husband. As the King's subject she is amenable to criminal process. It rests with the King whether he will have her crowned or not. On the King's death a Queen Consort becomes a Queen Dowager, and the Statute of Treasons no longer applies to her.

Queen Anne's Bounty, a fund established in 1704 for the augmentation of the incomes of the poorer clergy; now makes grants to poor benefices for the repair and improvement of clergy residences and towards the annual payments for dilapidations.

Queen Anne Style, the architectural Queen Anne's

or decorative style of reign, based largely on Italian late Renaissance models, but characterized by greater simplicity and austerity. Its great architectural exponent was Wren. In interior decoration and furniture there was a similar departure from the rococo, with more reliance on artistic design. These principles are exemplified in the wood carvings, bronzes, and sculpture of Grinling Gibbons.

QUEEN ANNE PERIOD CHAIR

Queen Charlotte

Islands, a small group of islands on the W. coast of North America, 80 m. off the coast of British Columbia, a half-submerged mountain range. Their fisheries are rich and timber is exported. Pop. c. 2,000.

Queen Charlotte Sound,

the northern part of the strait which separates Vancouver I. from the mainland of British Columbia.

Queensberry, John Sholto Douglas, 8th Marquess of, a famous patron of boxing, who drew up the "Queensberry rules," under which the sport is still carried on (1844-1900).

Queen's County. See Leix.

Queensferry, borough and seaport of West Lothian, Scotland, on the Firth of Forth, at the S. end of the Forth Bridge. It has a good harbour and large oil works. Pop. 1,800. The village in Fifeshire, at the northern end of the Forth Bridge, is known as North Queensferry.

Queensland, NE. state of Australia, 1,300 m. from N. to S. and 800 m. from E. to W., two-thirds of it within the tropics. Mountains stretch away N. parallel to the coast; much of it is covered with forests, and it is fairly well watered, the rivers being numerous; the chief are the Fitzroy and the Burdekin. The principal towns are Brisbane, the capital, Rockhampton, Townsville and Toowoomba. The pastoral industry is very large and there is considerable mining for gold and coal. Maize, wheat and fruit are the principal products of the soil, and frozen meat, hides, wool and dairy produce are the principal exports. Until 1859, the territory was administered by New South Wales, but in that year it became an independent colony, with a government of its own under a Governor appointed by the Crown. The state legislature is a single-chamber body. Area 670,000 sq. m. Pop. 982,000.

Queen's Metal, an alloy of tin with usually antimony, lead, and bismuth, similar to Britannia metal (q.v.) and used like it for making drinking mugs and similar articles.

Queenstown. See Cobh.

Quercitron, a species of oak, also called **Dyer's oak** (*Quercus tinctoria*) found in N. America, from which a yellow dye-stuff is obtained.

Quercus, a genus of deciduous and evergreen trees of the natural order Fagaceae, comprising 300 species, many of great commercial value for their wood, bark, etc.; popularly known as Oaks (q.v.). The British representative is *Quercus Robur*.

Quern, a primitive handmill of stone for grinding corn, still used in remote parts of Ireland and Scotland.

Quetta, chief town in the N. of Baluchistan, commanding the Bolan Pass, and occupied by a British garrison; site of the Indian Staff College, and strongly fortified. In 1935, it suffered from a severe earthquake, in which some 30,000 persons were killed. Pop. 60,300.

Quetzal (*Pharomacrus mocino*), a bird of the trogon family, of strikingly beautiful plumage, whose feathers were chosen for the adornment of native chiefs in Guatemala and Peru; the bird is the badge of the former country.

QUETZAL

Quetzalcoatl, one of the chief gods of the Aztecs of Mexico, said to have taught the people the arts of metalwork and agriculture, and to have disappeared promising that he would return to them later. On the landing of Cortez in the country in 1519 many of the Aztecs assumed that the prophecy had been fulfilled.

Quia Emptores, a statute of Edward I., intended to prevent subinfeudation, laying down that in future cases of transfer of land held in fee, the new occupiers should hold it directly of the chief feudal lord and not of the intermediate grantor. It was passed in 1290.

Quiberon, a small fishing village on a peninsula of the same name, stretching southward from Morbihan, France, near which Hawke defeated a French fleet in 1759, and where a body of French emigrants attempted to land in 1795, in order to raise an insurrection, but were defeated by General Hoche. Pop. c. 3,500.

Quichuas, an American Indian people, who flourished, before the conquest, in Peru and its neighbourhood. Many ballads and songs in their language, *Quichua*, still exist, marking a high degree of poetic ability.

Quicklime, or unslaked lime, calcium oxide deprived by heat of its carbon dioxide and water. Lime thus slaked and mixed with sand forms mortar.

Quicksand, a sandbank so saturated with water that it gives way under pressure. It usually consists of a thin substratum of mud under a thin sandy coating, near the mouth of a river.

Quicksilver, an alternative name for mercury (*q.v.*).

Quietism, the religious theory that man should seek perfection by remaining purely passive under the working of Divine Grace, without seeking the active display of the practical virtues. It was first put forward by the Spanish priest Molinos, whose chief disciple in France was Madame Guyon. It was condemned by the Roman Church in 1687; the famous French Archbishop Fénelon is mainly remembered for his defence of the system against Bossuet. A similar line of thought is found in certain Eastern religious systems, notably among the Mohammedan Sufis.

Quiller-Couch, Sir Arthur, British man of letters, a Cornishman, born at Bodmin and resident for many years at Fowey, which town he has described in his books. As a novelist he has written several works under the pen-name "Q," such as *Dead Man's Rock*, *Splendid Spur*, and *Troy Town*. From 1912 he was professor of English Literature at Cambridge. He edited the *Oxford Books of English Verse and Prose*, and is author of many literary essays and three series of *Studies in Literature*. (1863-).

Quin, James, a celebrated actor, born in London; was famous for his representation of Falstaff, and was the first actor of the day till the appearance of Garrick in 1741. (1693-1766).

Quince, the fruit of *Cydonia vulgaris*, a small tree with white or pale-red flowers, of the apple family; indigenous in S. Europe and N. Africa. Although used for making marmalade and also with cooking-apples, the quince tree is more largely employed as a stock for pears or apples.

QUINCE

Quincunx, an arrangement of five things in a square, one at each corner, and one in the middle; an arrangement frequently adopted in the planting of trees. In medieval astrology the word was used to describe an arrangement of planets when at a distance from each other of five signs, or 150°.

Quincy, Josiah, American statesman, distinguished as an opponent of slave-holding. (1772-1864).

Quinine, the most important of the Cinchona alkaloids, first obtained, though in an impure state, by Gomez of Portugal, early in the 19th Century; very bitter, almost insoluble in water, but soluble in alcohol, ether and chloroform. It is a powerful base (*q.v.*), neutralising acids completely. Its salts are used in the treatment of malaria and other fevers, and as tonics.

Quinoa (*Chenopodium quinoa*), an annual plant of the spinach family. Indigenous to S. and Central America. Its seeds, ground into meal and boiled like rice, are used as food. *Chenopodium anthelminticum* (worm-seed or Mexican tea), an allied N. American species, yields a vegetable oil of value as a vermifuge.

Quinquagesima Sunday, the Sunday before the beginning of Lent; so called because it is roughly fifty days before Easter.

Quinquennial Valuation, a valuation of landed property and buildings made every five years throughout England and Wales by local assessment committees, on the basis of which local rates are levied.

Quinsy, an inflammation of the tonsils, sometimes extending to the uvula and soft palate; swallowing is rendered difficult, and there is often considerable pain in the throat.

Quintain, an old English sport of tilting at a mark from horseback with lances or poles, which was popular to the close of the 13th Century.

Quintette, a musical composition in five voices or five string instruments.

Quintilian, Marcus Fabius, Latin rhetorician, born in Spain. His fame rests on his *Institutes*, a great work, being a complete system of rhetoric in 12 books, commenced in the reign of Domitian after his retirement from his duties as a public instructor, and occupying its author for two years. (c. 35-100).

Quintuple Treaty, a treaty between Austria, Prussia, Russia, France and Great Britain, signed in 1839, by which those powers guaranteed a previous treaty, signed by them in the same year with the Netherlands, recognising the independence and perpetual neutrality of Belgium. This treaty was the famous "scrap of paper" whose breach by Germany was put forward by Great Britain as the cause of her entry into the World War.

QUIPU

Quipu, knotted cords of different colours used by the ancient Peruvians for conveying orders or recording events.

Quirinal, one of the seven hills on the Palatine, and one of the oldest quarters of the city. On it stands the Roman palace of the Kings of Italy, known by the same name.

Quirites, the name the citizens of Rome assumed in their civic capacity; it is connected with Quirinus, an ancient Roman god possibly associated with Mars.

Quito, capital of Ecuador, situated at an elevation of nearly 9,300 ft. above sea-level, and out up with ravines. It is in the heart of a volcanic region, and is subject to frequent earthquakes; serious disasters occurred in 1797 and 1854. Textiles, beer and religious images are manufactured. There is a cathedral and a university. The city was the ancient capital of the Incas. Pop. c. 120,000.

Quit-Rent, a rent the payment of which frees the tenant of a holding from other services such as were obligatory under feudal tenure.

Quoin, an angle or corner of a building, a corner-stone. Also a wedge used to tighten or "lock-up" formes of type in printing.

Quoits, a game which originated in the Roman sport of discus-throwing; in the modern game the quoit is an iron ring, several pounds in weight, and flat in shape, which is pitched over a green at a mark. "Deck quoits" is a popular game on liners and tourist vessels.

Quorn, one of the most famous hunts and hunting packs in England,

RABIES

named from Quorndon, a village near Loughborough, Leicestershire, though its actual centre is at Melton Mowbray.

Quorum, the minimum number of the members of a Committee, governing body, or any assembly which may be present to enable it to do business. In the House of Commons the number of the quorum is forty.

Quota, a term in political economy, denoting what percentage of the output of a particular commodity may, by international agreement, be exported; or what amount of a given commodity or goods may be exported under licence into a particular country. Thus trade in tin and rubber is regulated by agreement between the producing countries; and frozen meat imports from the Dominions and the Argentine into Britain are regulated by quotas, which are in this sense an alternative to tariffs. In Britain, under the Wheat Act, 1932, provision is made out of a Quota Fund, controlled by the Flour Millers' Corporation, for securing to growers of home-grown, millable wheat a standard price and market. The term is also used of the proportion of British-made films which must be included in every cinema programme and of the number of immigrants of any given race or nation allowed by law to enter another country.

Quo Warranto, a writ, now obsolete, by which any person usurping or misusing a Crown prerogative or office was called upon to show by what authority he did so. It has been superseded in modern times by the issue of an information issued by fiat of the Attorney-General.

R

Ra, the sun-god of Egyptian mythology, supreme among the gods. He is represented as voyaging in his boat across the celestial waters by day and along the Tuat (realm of the dead) by night, or in human form with the head of a hawk crowned with the disc of the sun.

Raasay, one of the Inner Hebrides, belonging to Inverness-shire, Scotland, lies between Skye and Ross-shire; has interesting ruins of Brochel Castle. Iron ore is found. Pop. c. 400.

Rabat, port in Morocco, in the French zone, on elevated ground overlooking the mouth of the Bu-Ragrag R., 115 m. SE. of Fes; is surrounded by walls, and has a commanding citadel; manufactures carpets, mats, and pottery. Pop. 83,000.

Rabaul, chief town and port of New Britain, of which it is the capital. It stands on Simpson Harbour and has a fine jetty and good anchorage. Pop. (non-native) 1,900.

Rabbi, title applied to a teacher of the Talmudic knowledge among the Jews.

Rabbit, common rodent mammal (*Lepus cuniculus*) of the family Leporidae. It closely resembles the hare, but is smaller, and has shorter ears and shorter legs and is social in habit, in the wild state living in burrows and in colonies whilst the hare sleeps in "forms" and is more or less solitary. Introduced into Australia in the middle of the last century, its prolificness has made it a pest of the first order, and rabbit-proof fences have been built across the Continent to protect the crops from its ravages. It is

used as a food, and its skin, under the name "coney," is dressed in imitation of more valuable furs. Many different varieties have been bred by selective methods in domestication. The Angora is notable for the length and quality of its fur which is "combed" and clipped for commercial purposes, the Flemish Giant for its size and the latter and crosses with the Belgium Hare, another true rabbit, are bred for table purposes. Wild rabbits are marketed extensively and imported in great quantities from Ireland and Australia but the flesh of "Ostend" rabbits is superior.

Rabelais, François, French humorist, Franciscan friar, born at Chinon; became a Franciscan friar, but later returned to lay life, studied medicine at Montpellier, and practised it at Lyons. There he began the series of writings that have immortalized his name, his *Gargantua* and *Pantagruel*, which he finished as curé of Meudon, forming a succession of satires in a vein of riotous mirth on monks, priests and pedants. (c. 1495-1553).

Rabies, or *Hydrophobia*, a disease of **Rabbits**, dogs and other canine animals, communicable to man. The second name ("fear of water") refers to one of its symptoms, the spasm consequent on an attempt to drink. It is usually due in human beings to a bite from an infected dog. The disease, probably due to a filterable virus, has been the subject of much research at the Pasteur Institute, as a result of which its terrors in man have been greatly lessened. The enforced 6-months' quarantine for dogs entering the country and the permitted muzzling have resulted in the disease being practically unknown in Britain.

Raccoon, a genus (*Procyon*) of carnivorous animals of N. America. (*P. Lotor*) is about the size of a large cat, with brown furry hair, tall bushy and ringed, unwieldy body and short legs. It has a characteristic habit of dipping its food in water before eating it. Its fur is used for clothing.

RACCOON

Raceme, an inflorescence in which the cells or subsidiary branches borne on the main stem.

Races of Mankind. Modern anthropological opinion usually divides mankind into five main races, the Negro, Mongolian, Alpine, Mediterranean and Nordic, who, in course of time have very largely interbred, especially the last three. The division is based on various features, especially the shape of the skull, nature of the hair, and skin coloration. Broadly the Negroes inhabit the centre and S. of Africa, parts of Malaysia, Oceania and Australia; the Mongolians, E. Asia and America; the Alpine peoples, a band stretching from Central Asia to the Alps; the Mediterranean, the area around the sea of that name, and the Nordics, N. and Central Europe. These classifications are subject to so many exceptions as to be of little practical value in deciding on the present race composition of the population of any country. All the races interbred, and probably had a single origin.

Rachel, wife of the Biblical patriarch Jacob, as was her elder sister Leah; mother of Joseph and Benjamin, at the birth of the latter of whom she died.

Rachmaninoff, Sergei Vasilievich, Russian pianist and composer. Born in Novgorod, he was educated at Moscow and St. Petersburg, and later appeared throughout Europe and America both as pianist and conductor. His most popular composition is his *Prelude in C Sharp Minor*; he has also written two operas and a number of symphonies, concertos, and chamber music. (1873-).

Racine, a flourishing city of Wisconsin, U.S.A., at the entrance of Root R. into Lake Michigan, 62 m. N. of Chicago; has an Episcopal university; trades in lumber, flax, leather goods, machinery and hardware. Pop. 67,500.

Racine, Jean, French tragic poet, born in La Ferté-Milon in the dept. of Aisne; was educated at Beauvais and Port Royal; in 1663 settled in Paris. He raised the French language to the highest pitch of perfection in his tragedies, of which the chief are *L'Andromaque* (1667), *Britannicus* (1669), *Mithridate* (1673), *Phèdre* (1674), *Esther* (1689), and *Athalie* (1691), as well as an exquisite comedy entitled *Les Plaideurs* (1692). (1639-1699).

Rack, an instrument of torture; consisted of an oblong wooden frame, fitted with cords and levers, by means of which the victim's limbs were racked to the point of dislocation. It was much resorted to by the Spanish Inquisition, and also at times by the Tudor monarchs of England, especially to extort confessions.

Rackham, Arthur, English water-colour painter and book-illustrator, famous for his illustrations of fairy tales, folk legends, and such books as *Alice in Wonderland*, *Ingoldsby Legends*, *Midsummer Night's Dream*, etc. (1807-).

Racquets, or Rackets, a ball game for two or more players, played with catgut circular-headed rackets weighing about 9 oz. and 30 in. long, and a small hard ball of about 1½ oz. weight, in a plain asphalted four-walled court, generally measuring about 63 ft. by 51 ft. A painted line 9 ft. from the ground denotes the service line; a white line across the ground 38 ft. from the front wall is the "short line" and a strip of board carried 26 to 27 in. above the bottom of the front wall forms the playing line. The whole is divided into right and left courts and squares called "service boxes." Game consists of fifteen "aces."

Radcliffe, town of Lancashire, Eng., land, on the Irwell; 7 m. NW. of Manchester; manufactures cotton, calico, and paper; has bleaching and dye works, and coal mines. Pop. 26,990.

Radcliffe, John, physician, born at Oxford; commenced practice in London; attended several members of the Royal Family and Court; left his property to the University of Oxford, where the Radcliffe Camera, the reading-room of the Bodleian Library, bears his name. (1650-1714).

Radek, real name Karl Berngardovich Sobolevskii, Russian politician, born at Lvov. In 1917 he accompanied Lenin to Sweden and later to Russia. Worked in Germany in 1918-1919 and 1922; was rector of the Chinese University at Moscow, 1925; joined the Trotskyist opposition in Russia, and was expelled from the Communist Party in 1927; was reinstated in 1930, but in 1937 was tried with others for conspiracy and sentenced to 10 years' imprisonment. (1885-).

Radetzky, Johann, Count von, Austrian field-marshal, born in Bohemia; entered the Austrian army in 1784; fought in the wars with Turkey and France; checked the revolution in Lombardy in 1848; defeated and almost annihilated the Piedmontese army under Charles Albert in 1849, and compelled Venice to capitulate, being then appointed Governor of Lombardy. (1766-1858).

Radial Artery, an artery passing along the forearm, in front of the radius (*q.v.*), and crossing the wrist to the back of the hand, joining the ulnar artery.

Radiation, the name given to energy transmission as electro-magnetic waves. According to the wave-length, different names are assigned to the radiation; thus the cosmic rays discovered by Millikan are the shortest waves, being followed in increasing order of wave-length by the gamma rays of radioactive bodies, X-rays, ultra-violet rays, visible light (violet, indigo, blue, green, yellow, orange, red), infra-red, and other heat rays, and electric waves such as are used in wireless. The cosmic rays have a wave-length of less than 10-10 cm., while wireless waves vary from about 10-3 cm. to 10-3 m.

Radiation occurs along straight lines only: its velocity in a vacuum is that of light, viz., 186,000 miles (300,000 kilometres) per second. Radiant heat is a form of radiation with which we are often concerned in daily life. The best heat radiator is a blackened surface, and the worst is a highly polished surface; hence a dark-painted enamel teapot needs a cosy, while a polished silver one does not. A few solids, such as rock-salt, resemble air in offering no obstacle to heat radiation, but most are opaque to it; glass, for example, is transparent to light, but is largely opaque to heat radiation, so that it may be used as a fire-screen.

Radical, in chemistry, a group of atoms of more than one element in a chemical compound that is not disintegrated

when the compound is broken up. Such radicals, however, are often incapable of existing except when compounded with other elements. An example is ammonium, NH_4 .

Radicals, a class of English politicians who, at the end of the 18th Century and the beginning of the 19th, aimed at the political emancipation of the mass of the people by giving them a share in the election of Parliamentary representatives. The name was first popularized by such men as Cobbett; later it was transferred from the school of "philosophic radicals" to the left wing of the ordinary Liberal party, and then became synonymous with Liberal. The French Radical party is mainly distinguished by its strong support of republican institutions.

Radio. See Broadcasting and Wireless.

Radio-activity. In 1896, the French chemist Becquerel observed that certain uranium salts continuously emitted radiations which electrically charged the air in their neighbourhood, and also affected a photographic plate wrapped in opaque paper. The phenomenon was investigated by M. and Mme. Curie, who showed that the radio-activity was a property of the uranium atom itself; they later discovered the still more radio-active elements, polonium and radium.

Lord Rutherford showed that the radiation from radium consisted of three types of rays, called alpha, beta and gamma. The alpha-rays are positively charged particles, and are now known to be the positive nuclei of helium atoms; they have small penetrating power, and leave the radium atom with a velocity of some 20,000 kilometres (12,000 miles) per second. The beta-rays are swiftly-moving negative electrons, their velocity sometimes approaching that of light, while the gamma-rays resemble X-rays but are of considerably shorter wave-length, travel with the velocity of light (300,000 kilometres or 186,000 miles per second), and have very great penetrative powers.

Further research showed that the radiation was caused by the actual disintegration of radium atoms, and thus the way was paved for modern work on the structure of atoms in general. Radium seems to be a disintegration product of uranium; it is itself the ultimate parent of a variety of lead, but the complete change of radium into lead occupies very many millions of years. Within the last decade it has been discovered that many elements, when bombarded with neutrons (q.v.) moving at high speed, become radio-active for a short time, and this discovery may have important results, e.g., in medicine, since radio-activity has proved valuable in the treatment of malignant disease and radium itself is extremely expensive. The gamma rays are chiefly used, but their effect is chiefly through beta rays produced.

Radiolarians, primitive minute marine animals of the class Protozoa, which form shells or skeletons of ancinthin or silica, which after the death of the animal petrify into beds of marine rock.

Radiology, the application of X-rays in medicine and surgery. It is important in the diagnosis of diseases and deformities of bone and tissue, a radiograph or X-ray photograph of the organ concerned often displaying affections which could otherwise be certainly identified only by actual inspection of the organs by surgical operation. Other applications are in the breaking down of malignant tumours; cancers, etc., are attacked by gamma-rays (see Radiation) from radium salts inserted near the growths concerned. Ultra-violet and other types of radiation are also applied to the human body for their tanno and other effects.

Radiometer, an instrument invented (q.v.) for measuring the mechanical effect of radiant energy and made to revolve by the action of light. It consists essentially of four thin discs fixed on aluminium arms at right angles to each other in an airtight glass globe, one side of the disc being white and the other coated with lampblack so that on rotating the white and black alternate—the black absorbing heat in greater quantity than the white.

Radish (*Raphanus sativus*), an annual herb of the cabbage family (Cruciferae), common in Britain and in Southern Europe, probably a cultivated form of the wild radish. Seed is usually sown from February onwards, often between other crops. The roots of the horse-radish (*Cochlearia Armoracia*), another cruciferous plant, is used as a condiment.

Radium, a metallic chemical element belonging to the same group as calcium, strontium, and barium. Symbol Ra; atomic number 88; atomic weight 226.05. It is a very scarce element, since it is continually disintegrating into other elements. It occurs in uranium minerals, e.g., in the Joachimsthal, Bohemia, one or two localities in the U.S.A., the Belgian Congo, and near the Great Bear Lake (Canada). Its principal property is radio-activity (q.v.); in its chemical properties it resembles barium, and is a white metal (melting-point 960°C .), which decomposes water in the cold, yielding hydrogen. Radium salts are white crystalline solids which shine in the dark with a characteristic greenish phosphorescence.

Radius, in geometry, the distance from the centre of a circle to any point on the diameter; in anatomy, the smaller bone of the forearm, articulated to wrist and elbow.

Radley, village of Berkshire, England, 2½ m. N.E. of Abingdon, the seat of a public school, the College of St. Peter, or Radley College. Pop. 1,000.

Radnorshire, the least populous of the Welsh counties; lies on the English border between Montgomery (N.) and Brecknock (S.); has a wild and dreary surface, mountainous and woody. Radnor Forest covers an elevated, heathy tract in the E.; is watered by the Wye and the Tems. The soil does not favour agriculture, and stock-raising is the chief industry; contains some excellent spas, that at Llandrindod, the county town, among them. Area, 470 sq. m. Pop. 21,800.

Radon, or Radium Emanation, formerly known as niton, is a non-metallic chemical element belonging to the group of noble or inert gases. Symbol Rn; atomic number 86; atomic weight 222. It is spontaneously and continuously evolved from radium by the disintegration of radium atoms into radon and helium. It is itself unstable, and soon splits up into helium and a radio-active solid known as radium A. Weight for weight, radon is about 100,000 times as radio-active as radium, and like the latter is used in the non-surgical therapy of cancerous growths.

Raeburn, Sir Henry, Scottish portrait-painter, born at Stockbridge, Edinburgh; after a two-years' visit to Italy settled in Edinburgh, and became famous as one of the greatest painters of the day. The portraits he painted included likenesses of all the distinguished Scotsmen of the period, at the head of them Sir Walter Scott, Joseph Hume, James Boswell and Christopher North; was knighted by George IV. a short time before his death. (1766-1833).

Raemaekers, Louis, Dutch cartoonist, 1st, born at Roermond. Learned painting at Amsterdam. His political cartoons during the World War were world-famous. His work later appeared daily in the *Amsterdam Telegraaf*, and weekly in *Brussels Sotr.* (1869-).

Raffia, or *Raphia*, a genus of Palms (Palmae), including 8 species found in tropical Africa and S. America (the Amazon valley). The most important species are the *R. vinifera*, the Wine or Bamboo Palm of the Amazon, yielding wine, as its name indicates, and the *R. pedunculata* or *Raffia Palm*, yielding the familiar raffia used for tying plants and for weaving light baskets, mats, etc.

Raffles, Sir Thomas Stamford, English colonial administrator, born in Jamaica; entered the East India Company's service; became Governor of Java, and wrote a history of it; held afterwards an important post in Sumatra, and founded the settlement at Singapore; returned to England with a rich collection of natural objects and documents, but lost most of them by the ship taking fire. (1781-1826).

Ragged Schools, institutions first begun by John Pounds, a Portsmouth shoemaker, in 1820, which supplied free education and sometimes bodily necessities for destitute children. A Ragged School Union was formed in 1844 to carry on the work, which was enthusiastically supported by the seventh Earl of Shaftesbury (q.v.). With the introduction of free compulsory elementary education in 1870 their work lost much of its importance.

Raglan, village of Monmouthshire, England, 7 m. SW. of Monmouth. Here stand the picturesque ruins of Raglan Castle, a fine feudal stronghold which was dismantled after its surrender to the Parliamentarians during the Civil War.

Raglan, Fitzroy Somerset, first Baron, youngest son of the Duke of Beaufort; entered the army at sixteen; became aide-de-camp to the Duke of Wellington and his military secretary; lost his right arm at Waterloo; was appointed commander-in-chief of the British forces in the Crimea, and was present at all the engagements, till he died in camp before Sebastopol. (1788-1855).

Ragtime, dance music of Afro-American negro origin, marked by strong syncopation (q.v.); introduced into Europe from America shortly before the World War, and popular ever since.

Ragusa. See Dubrovnik.

Ragwort (*Senecio Jacobaea*), a tall cotton-like plant with rayed bright yellow flowers, common on pasture lands and on the hedges of Britain. It is placed by botanists in the order Compositae.

Raikes, Robert, the founder of Sunday Schools, born in Gloucester, where his first school was begun in 1780; by profession a printer. (1735-1811).

Rail, the common name of a number of birds of the Rallidae family most of which belong to the genus *Rallus* and are characterized by the absence of a horny plate on the lower part of the forehead and by having lobate webbed feet. The species found in Britain include the Water-Rail (*Rallus aquaticus*), frequenting reed beds or dense vegetation in damp districts, and having wings short and rounded, and too small to support the bird in the air and legs long and often stout; and the Land-Rail or Corn-Crake (*Crex Crex*).

VIRGINIA RAIL

Railways. Railways of wood were used in collieries as early as 1660, the motive power being supplied by horses. Towards the end of the 18th Century cast-iron plates were substituted for the wooden rails, and in 1801 the first horse-drawn public railway, for goods transport only, was opened from Wandsworth to Croydon. Experimental locomotives were being built at this time by Hedley, Blenkinsop, Stephenson and others, and in 1804 Richard Trevithick ran the first locomotive on a colliery line near Merthyr Tydfil.

In 1825 the Stockton and Darlington Railway was opened. This was originally intended for animal power, but at the instance of Stephenson a locomotive was put in use in May. Four years later steam-traction was tried between Manchester and Liverpool. The year 1830 saw the opening of the Canterbury and Whitstable line, the first to convey passengers in steam-hauled trains. Other lines followed, and by 1836 some 490 miles had been opened in England and Wales. In 1846 Parliament passed an Act establishing 4 ft. 8½ in. as the standard gauge.

In Great Britain to-day there are some 20,120 miles of line. Many lines are now being electrified, especially in the S.; the first long-distance electric train ran from London to Brighton in 1933. In the majority of foreign countries railways are either state-owned or state-controlled. This applies to Australia and the Union of South Africa.

In Great Britain the railways are owned and operated by four great private companies, formed in 1921 by amalgamation of many smaller undertakings. These are: (1) the Southern; (2) the Great Western; (3) the London Midland and Scottish; (4) the London and North Eastern. Since 1919 the Ministry of Transport has supervised railway operation from the point of view of the state. The rapid growth of motor transport has adversely affected the railways, but in 1928 the four groups obtained power under certain conditions to operate road vehicles in conjunction with trains. This links up road and rail transport and in some cases provides for inter-availability of tickets.

The principal Trade Union for railway workers is the National Union of Railwaymen (N.U.R.), developed in 1913 from the old A.S.R.S. (Amalgamated Society of Railway Servants). Others are the Amalgamated Society of Locomotive Engineers and Firemen (A.S.L.E.F.), and the Railway Clerks' Association (R.C.A.).

Rain is produced by the condensation of the water vapour of the air, so that the minute particles that form clouds unite to form drops, which fall to the earth by gravity. Notwithstanding the extreme variability of the rainfall, the earth may be divided into three rain-provinces; one zone of periodical rain, included within the tropics; and two zones of variable rain, one lying to the N. the other to the S. of the tropical zone. In the zone of periodical rain there is a narrow belt lying between 4° and 9° N. latitude, upon which rain falls nearly every day. The greatest extent of rainless country is the immense desert which stretches almost without interruption from NW. Africa into the centre of Asia. In some parts of the world rain only falls during certain parts of the year, and these are spoken of as the "rainy seasons."

Rainbow, a heavenly phenomenon in. caused by the decomposition of light by drops of water. The colours, counting from inside the bow, are, in order, violet, indigo, blue, green, yellow, orange, red. If the light be intense, a second bow is formed outside the first, with the colours reversed and fainter. Rainbows always occur opposite to the sun,

and when observed from mountains are perfect circles.

Rain Gauge, an instrument for measuring rainfall; it consists of a copper funnel, whose top has a fixed area, and whose neck fits into a bottle or cylindrical can. The funnel and bottle are then enclosed in a metal cylinder considerably taller than the funnel, so as to retain snow when it falls. The measurement is made by pouring the contents of the bottle into a glass measure marked to represent hundredths of an inch.

Raisin, a grape dried in the sun, or—in the case of inferior qualities—in the oven. Grapes for raisin production are largely grown in California, U.S.A., Asia Minor, Greece, and other Mediterranean countries.

Rajah, a title which originally belonged to princes of the Hindu race who exercised sovereign rights over some tract of territory; now applied loosely to native princes or nobles with or without territorial lordship.

Rajputana, an extensive tract of India, S. of the Punjab, embracing 23 native states, of which Jodhpur is the largest; others are Bikaner and Mewar. The Aravalli Hills traverse the S., while the Thar or Great Indian Desert occupies the N. and W. Many of the inhabitants are Rajputs (q.v.) and most Hindus. The area of the states in the Agency is 131,200 sq. m., and the pop. 11,512,000.

Rajputs, a people of India, found in India, S. of the Punjab, and in other parts of the N. of the country, said to be descended from the Kshatriya caste. They are mostly Hindus by religion.

Raleigh, Sir Walter, English soldier, and man of letters, born at Hayes Barton, in Devon, of ancient family; at 17 joined a small

volunteer force in aid of the Protestants in France; in 1580 distinguished himself in suppressing a rebellion in Ireland; was in 1582 introduced at Court, fascinated the heart of the Queen by his handsome presence and his gallant bearing, and received favours at her hand; joined his half-brother, Sir Humphrey Gilbert, in an expedition to N. America, founded a colony, which he called Virginia in honour of the Queen, and brought home with him the potato and the tobacco plants, till then unknown in this country; rendered distinguished services in the destruction of the Armada; visited and explored Guiana, and brought back tidings of its wealth in gold and precious things; fell into disfavour with the Queen, but regained her esteem. Under King James he became suspected of disloyalty and was committed to the Tower, where he remained 12 years, and wrote his *History of the World*. On his release without a pardon, he set out to the Orinoco in quest of gold-mines there, but returned unsuccessful; was sentenced to die, and was beheaded in the Old Palace Yard. His *History of the World* went only as far as the Macedonian War of Rome. (1584-1628).

Raleigh, Sir Walter, English critic, literature at Oxford. Much of his work was in the field of Shakespearean study; he published *The English Novel* in 1894, and *Essays of Shakespeare*, Milton, and Wordsworth. (1861-1927).

SIR WALTER RALEIGH

Râma, in the Hindu mythology, the 7th avatar or incarnation of Vishnu, in the character of a hero, a destroyer of monsters and a bringer of joy, as the name signifies. The narrative of his exploits is given in the Indian epic, the *Râmâyana*.

Ramadan, the 9th month of the Mohammedan year, being the month in the life of Mohammed in which he received special revelations from Heaven. It is kept by all Moslems as a strict fast, no food or drink being taken during it between sunrise and sunset.

Ramadi, town of Iraq, on the Euphrates, 60 m. NW. of Bagdad. Here in 1917 a battle took place between the British, under General Maude, and the Turks, resulting in the surrender of the Turkish force.

Rambouillet, town of France, in the dept. of Seine-et-Oise, 18 m. SW. of Paris. It has a magnificent chateau, now the country-house of the French President, where Charles X. signed his abdication. Pop. 6,000.

Rameau, Jean Philippe, French composer, born in Dijon; wrote on harmony, and, settling in Paris, composed operas, his first *Hippolyte et Aricie*, and his best *Castor et Pollux*. He also wrote treatises on the theory of music. (1683-1764).

Rameses, the name of several ancient kings of Egypt, of whom

the most famous were **Rameses II** (1300-1230 B.C.), who erected a number of monuments in token of his greatness, and who may have been the Pharaoh of the Hebrew oppression; and **Rameses III** (1180-1150 B.C.), the first king of the 20th dynasty, possibly the Pharaoh of the story of the Exodus from Egypt.

Ramie, a popular name for the woven fibre of *Boehmeria nivea*, a perennial of the nettle family (Urticaceae). The stems contain a fibre which in China is woven into a fine linen-like cloth known as grass-cloth. It is also cultivated in Jamaica and the U.S.A. The fibre produced in Assam and called rhee is used for ropes.

RAMESSES II

Ramillies, Belgian village in Brabant, 14 m. N. of Namur; scene of Marlborough's victory over the French under Villeroi in 1706.

Rampant, in heraldry, a term denoting the position of the "common charge" or object represented, e.g., a lion, when standing on one foot as if attacking. An animal rampant towards the sinister is said to be counter-rampant; rampant-gardant, when the animal is looking full-faced; rampant-regardant, when looking behind.

Rampion, the popular name in Britain of several plants of the bell-flower (Campanulaceae) order, especially of the two native species of the *Phyteuma* genus, *P. orbiculare* and *P. spicatum*. They bear small massed heads of flowers. The name is also applied to the perennial *Campanula Rapunculus*, common in British gardens, and having succulent roots which are eaten as a salad.

Rampur, city of India, capital of a native state of the same name in the United Provinces; manufactures textiles. Pop. 74,500.

Ramsay, Allan, Scottish poet, born at Crawford, Lanarkshire; from wigmaking took to bookbinding, and published his own poems, *The Gentle Shepherd*, a pastoral, among the number, which, with

other of his writings, led to a revival of Scottish vernacular poetry. (1686-1758).

Ramsay, Sir William, British chemist, and afterwards at University College, London. He discovered helium and, with Rayleigh, argon in the atmosphere, as well as the other inert gases, neon, krypton, and xenon. He carried out many researches in organic and physical chemistry, being awarded a Nobel Prize in 1904. (1852-1918).

Ramsay, Sir William Mitchell, Scottish archaeologist and Church historian; born at Glasgow; has travelled much in Asia Minor and the Near East; Professor of Classical Art, Oxford, 1885; of Humanity at Aberdeen, 1887-1911. He has written much on archaeology in relation to the history of early Christianity. He was knighted in 1906. (1851-).

Ramsbottom, manufacturing town in Lancashire, England, on the Irwell, 4 m. N. of Bury, engaged in cotton-weaving, calico-printing, rope-making, etc. Pop. 15,500.

Ramsey, (1) port and pleasure resort in the Isle of Man, 14 m. N.E. of Douglas. Pop. 4,200. (2) town in Huntingdonshire, England, 10 m. from Huntingdon, with remains of a former Benedictine Abbey. Pop. 5,100.

Ramsgate, seaside resort in the Isle of Thanet, Kent, England, 78 m. E. by S. of London; has a famous harbour of refuge; to the W. lies Pegwell Bay with Ebbsfleet. Pop. 34,600.

Ranching, a term of Spanish derivation applied to the business of rearing cattle, as carried on in the Western United States, Canada, and Southern S. America. Vast herds of cattle in a half-wild condition are raised on the wide stretches of prairie land, and are tended by "cowboys," whose free, adventurous life attracts men of all sorts and conditions.

Rand, contracted form of Witwatersrand, the district in the Transvaal, South Africa, of which Johannesburg is the centre. It is one of the world's richest gold-mining areas, and occupies the ridge between the Orange and Limpopo rivers.

Ranee (Rani), name given to a Hindu princess or queen; a rajah's wife.

Ranelagh, former pleasure-ground for fashionable persons at Chelsea, London, during the last half of the 18th Century, with a promenade where music and dancing were the chief attractions. The gardens were closed in 1804. The name was later given to a polo club at Barnes, Surrey.

Range-finder, an optical instrument for finding the distance of a target from the firing point. All types depend on the principle that given the base and two angles of a triangle, the remaining elements can be determined by simple trigonometrical formula. Thus the Barr and Stroud instrument, used in the World War, involved measuring the angles which two beams of light from the objective made with the opposite ends of a known base-line. Modern artillery range-finders enable guns to fire accurately up to a distance of 15 to 18 miles or even more. Range-finders are also used for navigational purposes, for land survey and for anti-aircraft work.

Rangoon, capital and chief port of Burma, situated 20 m. inland from the Gulf of Martaban, on the Hsing or Rangoon R., the easternmost of the delta streams of the Irrawadi; British since 1852; a well-appointed city of modern appearance; contains the famous Shwe Dagon pagoda erected in the 6th Century; is the seat of a university; has extensive docks, and exports rice, ivory, oil, and teak. Pop. 400,500.

Ranjitsinhji, Kumar Shri, the Maharajah of Nawanagar, India, devoted himself to cricket, and became famous for his batting, playing for Sussex, and in Australia for England; succeeded to the throne in 1906. (1872-1935).

Rankine, William John Macquorn, Scottish engineer, born at Edinburgh; from 1855, Professor of Civil Engineering at Glasgow. He was one of the founders of thermodynamics as a science; his work is mainly recorded in scientific papers, a collection of which was published in 1881. (1820-1872).

Rannoch, Loch, a Scottish lake, 8 sq. m. in extent, in NW. Perthshire, from which the R. Tummel takes its rise.

Ranters, one of the extreme religious sects which arose in England in the Commonwealth period. They were accused by their enemies of serious immoralities. The name was also given to the Primitive Methodists (q.v.) who seceded from the Wesleyan body.

Ranunculaceae, a family of dicotyledonous plants, ledeonous plants mostly found in temperate regions, containing the typical genus *Ranunculus* (including the common buttercup), the marsh marigold, peony, anemone, clematis, and many other common wild and cultivated flowers.

Ranz des Vaches, a simple melody played on the horn by the Swiss Alpine herdsmen as they drive their cattle to or from the pasture.

Rapallo, holiday resort and port of Genoa, northern Italy, 15 m. from Genoa. Fishing and lace-making are the local industries. Pop. 700. The disputed boundaries between Italy and Yugoslavia after the World War were fixed by a Treaty signed here in 1920.

Rape, the felony of having carnal will or by personating her husband; punishable by penal servitude for life. Force is not essential, and sexual intercourse with a woman in a drunken stupor is just as much rape as violation by brute force. A man cannot be convicted of a rape on his wife, nor can a boy under 14 be convicted of rape.

Rape (*Brassica napus*), with the Cole (B. campestris), annuals of the cabbage family (Cruciferae), widely grown for their seeds which yield vegetable oils, known as Rape- or Colza-oil, the refuse being used to make oil-cake for cattle food.

Raphael, one of the seven archangels, Book of Tobit; a special concern with medical matters is attributed to him, his name meaning "God's healer." His emblem is a fish or a pilgrim's staff. Feast, October 24.

Raphael (Raffaello Sanzio), Italian painter, sculptor, and architect, born at Urbino; studied under Perugino for several years, visited Florence in 1504, and lived chiefly there till 1508, when he was called to Rome by Pope Julius II., where he spent the rest of his short life and founded a school, several of the members of which became eminent in art. He was one of the greatest of artists, and his works, which were numerous and varied, included frescoes, cartoons, Madonnas, portraits, easel pictures, drawings, etc., besides sculpture and architectural designs, all within the brief period of 37 years. He had nearly finished "The Transfiguration" when he died of fever caught in the excavations of Rome. His greatest works include the "Julius II." (Pitti Palace,

RAPHAEL

Florence), the cartoons (at the Victoria and Albert Museum, London) for the Sistine Chapel tapestries, the "St. Cecilia" at Bologna, and the frescoes at the Villa Farnese, including the "Galatea." (1483-1520).

Rapier, a light slender pointed sword, at first used for both cutting and thrusting, but later as a fencing sword for thrusting only, and having no edge. The blade has a lozenge-shaped section. The duelling rapier is a highly tempered weapon about 3 ft. long.

Rare Earths, the name applied in chemistry to the metallic elements of atomic number 57 to 71 inclusive; they are lanthanum (La, 57), cerium (Ce, 58), praseodymium (Pr, 59), neodymium (Na, 60), illinium or florentium (Il, 61), samarium (Sm, 62), europium (Eu, 63), gadolinium (Gd, 64), terbium (Tb, 65), dysprosium (Ds, 66), holmium (Ho, 67), erbium (Er, 68), thulium (Tm, 69), ytterbium (Yb, 70) and lutetium (Lu, 71). The elements yttrium (Y, 39), scandium (Sc, 21), hafnium (Hf, 72), and thorium (Th, 90) are sometimes included on account of their more or less similar properties.

They are uncommon substances, and though traces of them are fairly widely distributed, ores rich in rare earths, are seldom found. Few of them are of any industrial importance, though an alloy ("Mischmetall") consisting mainly of cerium and iron is the material of the so-called "flints" in cigarette-lighters, etc. Traces of cerium oxide are also necessary for maximum efficiency in the familiar incandescent gas-mantles, the chief constituent of which is the oxide of the related metal thorium. At the present day the principal source is the monazite sand occurring in Brazil, S. India (Travancore) and a few other localities.

Rare Gases, name given to the gases helium, neon, argon, krypton, and xenon (q.v.), which were first found in small quantities in the atmosphere by Sir William Ramsay and Lord Rayleigh. All of them are chemically inert.

Rarotonga, the largest island of the Cook group in the Pacific; discovered in 1777 and since 1901 under New Zealand control; inhabited mainly by Polynesians, once cannibals, now largely civilised; chief port Avatiu. Pop. 5,050.

Raspberry, a shrubby cane-stemmed plant (*Rubus Idæus*), of the Rosaceae family, native of Britain and the temperate zones of Europe; cultivated for its fruit which consists of an aggregate of small drupes. Propagation is mainly by suckers which in the wild state give rise to new plants and in cultivation can be dug up and transplanted. There are red, yellow and white varieties.

Rasputin, Gregory, Russian politician whose real name was Novikh. Son of a Siberian fisherman, he had no education and became a "holy man" in Moscow, exercising particular power over women, notably the Czarina. For years he was the real power behind the Russian throne, until he was murdered in Petrograd by influential Russians who had discovered that he was intriguing with Germany. (c. 1871-1916).

Rastatt, or Rastadt, a town in Baden, Germany, on the Murg, 15 m. SW. of Karlsruhe; manufactures hardware, beer, and tobacco. Here was held the Congress which terminated the War of the Spanish Succession in 1714. Pop. c. 14,000.

Rat, name popularly applied to the larger rodents (q.v.), but applied in particular to the two kinds of house-rats found in England, the English Black Rat (*Mus rattus*) and the Brown or Norway Rat (*Mus norvegicus* or *decanus*). The black rat is a small lightly-made animal with large ears and a long scaly tail; the

brown, which came to England from Central Asia, is much heavier and has shorter ears and tail and a smoother coat. The black is represented in warmer climates by the Alexandrian rat, a reddish-coated animal. Both kinds are destructive and may be the carriers of the organism which is transmitted to human beings as bubonic plague.

Ratchet and Pawl, a mechanical device consisting of a wheel with saw-shaped teeth (the ratchet) and a small arm (the pawl) which engages with the teeth; examples may be seen in the works of a clock or watch. It is used to permit of circular motion in a single direction, or to change reciprocating into rotary movement.

Ratel, or Honey-badger, a genus (*Mellivora*) of badger-like animals, the two chief species being the Indian and Cape rats. It has a stout body, short strong legs and long fessorial claws. A marked white stripe divides the grey and black coloration of the body.

Rates and Rating. The history of rating commences with the Poor Relief Act of 1601, which introduced a system of local taxation for poor relief. In its main outlines the system of rating and valuation of property was unchanged right down to 1925, when the Rating and Valuation Act vested the power of levying rates exclusively in the borough or district council. Uniformity of valuation was secured by the institution of county valuation committees. In urban districts, one consolidated rate, called the "general rate," is levied instead of a number of different rates; in rural districts the general rate has now been substituted for the old poor rate and the expenses under the Lighting and Watching Act are defrayed out of a special rate. In 1929 agricultural land and buildings were wholly derated; while productive industry was relieved of three-quarters of the burden of rates. The occupier of any land or building is liable to be rated for it, and similarly the right to receive the profits from land carries with it the liability to rates. Exemptions include land occupied by the Crown for central (not local) government purposes; churches and chapels; the premises of scientific societies, etc. The principle of valuation is to estimate the rent at which the property ought to let from year to year assuming the tenant paid the usual tenants' rates and taxes and bore the cost of repairs, etc. This result is the "net annual value" and is much the same as the former "rateable value," ascertained under the provisions of Acts passed in 1862 and 1869.

Rathenau, Walther, German-Jewish politician and industrialist, born in Berlin; assisted in organising Germany's national industrial effort during the World War, after which he became Minister of Reconstruction in 1921; as Foreign Minister in 1922 he negotiated the treaty of Rapallo with Russia. He was assassinated shortly afterwards. (1867-1922).

Rathlin, a picturesque, cliff-girt island (8½ by 1½ m.) off the N. coast of Antrim, Northern Ireland; fishing is the chief industry; has interesting historical associations with Robert the Bruce.

Ratibor, town of Germany, in Prussian Silesia, on the R. Oder; it manufactures metal goods, paper, glass and tobacco. Pop. 51,700.

Rationalism, in philosophy, the doctrine that the mind can obtain knowledge from no other source than the reason, being thus opposed to empiricism, which bases all knowledge on experience. The word is, however, commonly used to describe that state of mind which rejects all beliefs that are not based solely on

the use of the rational faculty, to the exclusion of faith, being thus in practice little different from agnosticism (q.v.).

Rationalization, the process of forming industrial concerns into large groups to reduce overhead charges and so to lower the cost of production. The word came into general use soon after the World War, when trusts were formed in British industry to meet the competition of larger foreign groups, notably in the United States and Germany.

Ratisbon. See *Regensburg*.

Ratitæ, an order of flightless birds, generally marked by their power of rapid running. It includes the ostriches, rheas, emus, cassowaries, the almost extinct kiwi of New Zealand, and a number of forms known only as fossils.

Rattlesnake, the English name for American genus *Crotalus*, the tail of which is furnished with hollow, horny segments, which, when vibrated, give out a rattling noise. The common rattlesnake (*C. divisi-*
simus) frequents arid regions and is widely distributed on the American continent. Its ground colour is brown, or sometimes yellow or blackish with dark yellow-bordered spots and a longitudinally striped head and neck. It may reach a length of 8 ft.

RATTLESNAKE

Rauch, Christian, German sculptor, born in Waldeck; patronized by royalty; studied at Rome under Thorwaldsen and Canova; resided chiefly in Berlin; executed statues of Blücher, Dürer, Goethe, Schiller, and others, as well as busts. His masterpiece is a colossal monument in Berlin of Frederick the Great. (1777-1857).

Ravel, Maurice Joseph, French composer; born at Ciboure (Basses Pyrénées); studied at Paris Conservatoire. Among his better known works are *Pavane pour une Infante défunte*, 1899; *L'Heure Espagnole* (opera), 1911; *Daphnis et Chloé* (ballet), 1912; etc., and *Bohème*, 1928. (1875-1937).

Raven (*Corvus corax*), a large black bird of the crow kind, found over most of the northern hemisphere, usually in the wilder regions. The plumage is entirely black, glossed with steel-blue; the bill is very stout. Its predatory habits, especially its attacks on lambs, sick animals, and young game, have led to its extermination in many districts. In popular belief it is essentially a bird of ill-omen. It is one of the birds that can imitate a human voice and is regarded as one of the most intelligent birds.

Raven-Hill, Leonard, English artist; he exhibited at the Royal Academy from 1889, but is best known for his drawings in *Punch*, with which he was connected from 1896. (1867-)

Ravenna, ancient city of Italy; once a seaport, now 5 m. inland from the Adriatic, and 45 m. E. of Bologna; was capital of the Western Empire for some 360 years; a republic in the Middle Ages, and a papal possession till 1860; especially rich in monuments and buildings of early Christian art; manufactures silk, lace, paper, and glass. Pop. 81,100.

Rawal Pindi, a trading and military town in the Punjab, 160 m. NW. of Lahore; has an arsenal, fort, etc., and is one of the most important centres for the Afghanistan and Cashmere trades. Pop. 119,300.

Rawlinson, George, historian and classical scholar, born in Oxfordshire; became a canon of Canterbury. His works include *Manual of Ancient History*, *History of Ancient Egypt*, and a standard translation of *Herodotus*. (1812-1902).

Rawlinson, Henry Seymour, first Baron, British general. Joining the army in 1884, he was A.D.C. to Roberts in India, saw service in Burma and in the Sudan, and was on the staff in the Boer War. At the start of the World War he was director of recruiting, commanded the 7th Division at Ypres in October, 1914, and at Neuve Chapelle. He led the 4th Army on the Somme in July, 1918, became British representative at Versailles, and in 1920 was made commander-in-chief in India. He was raised to the peerage in 1919. (1864-1925).

Rawlinson, Sir Henry, British Assyriologist, born in Oxfordshire; entered the Indian Army in 1827; held several diplomatic posts, particularly in Persia; was the first to decipher the cuneiform inscriptions of Persia, and excavated with Layard in Mesopotamia. (1810-1895).

Rawmarsh, urban district of Yorkshire, England, in the West Riding, on the Don, 2 m. N. of Rotherham. Coal is mined, and iron and steel, pottery and bricks are made. Pop. 19,000.

Rawtenstall, borough of Lancashire, England, 4 m. W. of Bacup. Cotton and woollens are the chief manufactures, and stone is quarried nearby. Pop. 27,700.

Ray, a common name for many flat sea-fishes, many belonging to the genus *Raja* (order Hypotremata), which includes the skates. They live on sandy bottoms near the coast. They are commonest in the northern seas and mostly found in temperate waters. The chief species on English shores is the Thornback Ray. Both rays and skates are pale underneath. The skate, however, is much larger than the rays and has a long pointed snout. Other species include the eagle, electric, and sting rays.

Rayleigh, John Strutt, third Baron, British physicist, professor at Cambridge and at the Royal Institution, and afterwards Chancellor of the University of Cambridge. With Ramsay he discovered argon in the atmosphere in 1894. He obtained many important results, both by mathematical analysis and experiment, in all branches of physics, especially sound and heat. He was one of the original members of the Order of Merit. (1842-1919).

Raynaud's Disease, a comparatively rare nervous disease, taking name from the famous French physician who first described it. It is due to a nervous spasm of the arteries and blood vessels of a part of the body resulting in exclusion of blood from the part which goes white, followed by a dilation of the arteries allowing an abnormal entry of blood and consequent pinkness of the part. There are many grades of attack and the parts affected may be the fingers, toes, tip of the nose or ear. In a very severe attack a small part of the affected organ may become dead.

Rayon. See *Artificial Silk*.

Razor, an appliance for removing bodily, especially facial, hairs. Early man's razor was of stone or bronze; after the introduction of steel the hollow-ground "cut throat" razor followed at the beginning of the 19th Century. The safety razor, in almost universal use to-day except by professional barbers, includes a device to prevent more than a small portion of the blade touching the skin. Automatic stroj devices have been produced for use safety-razor blades.

Razor-bill (*Alca torda*), the only living species of the genus *Alca* of the Auk family, about 18 in. long, with brilliant black plumage; and white underparts. It occurs as far N. as Labrador, and is found in considerable numbers on the steep headlands of the British coast. It is closely related to and probably very similar in appearance to the extinct Great Auk.

RAZOR-BILL

Razor-shell, a mollusc of the genus *Solen*, especially *Solen ensis*, so named from its sword-shaped shell. The *Solen stliqua* or *Pholas dactylus*, found off British coasts, is used for bait.

Ré, Isle of, small island, 18 m. by 3; off the French coast, opposite La Rochelle; salt-manufacturing the chief industry; also oysters and wine are exported. Chief town, St. Martin. Pop. c. 14,000.

Reactance, electrical circuit offers to an alternating current on account of its inductance and capacity, as distinguished from its ohmic resistance to a direct current.

Reade, Charles, English novelist, born at Ipsden, in Oxfordshire; called to the bar in 1842; began his literary life by play-writing; made his mark as novelist in 1852, when he was nearly 40, by the publication of *Peg Woffington*, which was followed in 1856 by *It Is Never Too Late to Mend*, and in 1861 by *The Cloister and the Hearth*, the last his best and the most popular; several of his later novels are written with a purpose, such as *Hard Cash* and *Foul Play*; his most popular plays are *Masks and Faces* and *Drink*. (1814-1884).

Reading, county town of Berkshire, England, on the Kennet, 36 m. W. of London; a town of considerable historic interest; was ravaged by the Danes; has ruins of a 12th Century Benedictine Abbey; was beleaguered and taken by Essex in the Civil War (1643); birthplace of Archbishop Laud; its manufactures and products include iron-ware, paper, sauce, nursery seeds, and biscuits. Pop. 100,000.

Reading, city of Pennsylvania, U.S.A., NW. of Philadelphia; has flourishing iron and steel works, and manufactures paper and hosiery. Pop. 111,000.

Reading, Rufus Isaacs, first Marquess of, British statesman and administrator, of Jewish extraction. After a successful career at the bar he took to politics, and having entered the House of Commons as a Liberal in 1904, became Attorney-General in 1910. From 1913 to 1921 he was Lord Chief Justice, and in 1916 and 1917 undertook special and important missions to the United States. In 1921 he was appointed Viceroy of India, a post he held for five years, and was Foreign Secretary for a time in 1931. He was raised to the peerage in 1914. (1860-1933).

Real, an old Spanish and Portuguese silver coin, formerly current also in Mexico and other South American states; of varying value, but approximating to 3d.

Realgar, a native sulphide of arsenic; a native sulphide of arsenic; it is a red mineral used as a source of arsenic and arsenious oxide, or arsenic.

Realism, as opposed to Nominalism, the philosophical doctrine that general terms denote real things and are not names or answers to the mere con- of them; or, as opposed to Idealism, belief that we have an immediate cogni- of things external to us, and that they are as they seem. In art and literature it is

the tendency to conceive and represent things as they are, without endeavouring to palliate their ugly or unsavoury elements.

Real Presence, in Roman Catholic theology, the substantial presence of the body, blood, soul and divinity of Jesus Christ in the bread and wine of the Eucharist after consecration. According to the Roman Catholic Church, this is effected by Transubstantiation, or the annihilation of the substance of the bread and wine, though their appearances remain.

Real Property, a legal term covering, broadly, freehold lands and buildings, and propri- rights in or over lands. Until 1925, under English law, real property on intestacy was inherited by the heir, while personal property went to the next-of-kin; but this distinction was abolished by the Law of Property Ac that year.

Reaping, the cutting of ripe stand crops for harvesting, performed with the wooden-handled curved steel sickle until the invention of the reaping machine in mid-19th Century. The machine was at first worked by horse power, the cutting machinery consisting of a pair of crossing blades whose motion was imparted by the locomotive wheels. Modern reaping machines are driven by petrol motors or drawn by tractors, and frequently reaping and threshing are performed by a single machine.

Réaumur, René Antoine de, French scientist, born in La Rochelle; made valuable researches and discoveries in the industrial arts as well as in natural history; is best known as the inventor of the thermometer that bears his name, which is graduated into 80 degrees from the temperature of melting ice to that of boiling water. (1683-1757).

Rebec, an ancient three-stringed musical instrument played with a bow, the forerunner of the viol. It was of Arabian origin and, in its earlier form, had a coconut-shell body over which was stretched parchment to serve as a sounding board.

Rebeccaites, a band of Welsh rioters who in 1843, dressed as females, went about at nights and destroyed the toll-gates, which in their view were scandalously numerous.

Rebekkah, the wife of Isaac, who by craft secured for her younger son, Jacob, the blessing which Isaac intended for the elder, Esau. See Gen. xxvii.

Rebus, a name, word or phrase, by pictures or figures suggesting syllables; thus a harrow and a gate would represent Harrogate. In heraldry, a bearing on a coat-of-arms containing an allusion to the owner's name; thus, a doe passant between three bells argent was the bearing of the Dobell family.

Récamier, Madame de, French social leader, born in Lyons; became at 15 the wife of a rich banker in Paris thence her own age; was celebrated for her wit, her beauty, and her salon; was a friend of Madame de Staël and Chateaubriand, whom she soothed in his declining years. She left behind her *Souvenirs et Correspondance*. (1777-1849).

Receipt, a written document acknowledging that a debt has been paid or that certain goods have been received. It should embody the date of receiving the money or goods; the name of the payer or deliverer and that of the recipient; the purpose for which the money was paid; and, if the sum concerned exceeds £2, a twopenny stamp. A receipt is the best but not the only evidence of payment, nor is it conclusive in favour of the payer; its effect may be rebutted by evidence, or by proof of error.

Receiver, one who is convicted of receiving goods knowing them to have been stolen. A convicted receiver is a felon liable to penal servitude for 14 years.

Receiver, an officer appointed by a court to receive the rents or profits of land or the proceeds from any other property which is in dispute in a suit in that court; or an officer appointed by the Bankruptcy Court to receive the profits or takings of any business or undertaking which is being wound up by that court. A receiver acts on behalf of the creditors, as well as for the person or persons who applied for his appointment. Official Receivers are appointed for the various County Court districts and the central Bankruptcy Court.

Receiving Order, an order by a court for the protection of the estate of a debtor who has committed an "act of bankruptcy." It may be made either on the petition of a creditor or creditors to the amount of £50 and presented within three months of the act of bankruptcy; or on the petition of the debtor himself, alleging that he is unable to pay his debts.

Rechabites, an Arab tribe mentioned in the Bible who attached themselves to the Israelites in the wilderness and embraced the Jewish faith, but retained their nomadic ways. They abstained from all strong drink, whence their name was adopted by a large modern friendly society whose members share that peculiarity.

Reciprocal, in mathematics, that number by which another number must be multiplied to give unity as a result; thus $\frac{1}{2}$ and 2 are reciprocals of 2 and $\frac{1}{2}$ respectively.

Reciprocating Motion, the name given to a regular oscillating movement in a straight line, as that of a piston in a steam-engine.

Reciprocity, a term used in economic treaties entered into by two countries by which it is agreed that, while a strictly protective tariff is maintained as regards other countries, certain articles shall be allowed to pass between the two contracting countries free of duty or subject to considerable reductions in the ordinary duty.

Reclamation, the process of reclaiming land from actual or threatened damage by the sea: it is well exemplified by the work that has been done in recent years in the Netherlands, under a plan which provides for the eventual draining of almost the whole of the Zuider Zee and the adding of a new province to the country, and in Italy, where under the Fascist régime a large part of the Pontine marshes has been dealt with and the new province of Littoria formed. The process is accomplished by the building of dykes, and the draining off by channels of surplus water. In England much of the Fen country has been rendered agriculturally useful by similar work undertaken in the 17th Century, and plans have been made for draining the Wash.

Recognizance, a bond to compel a person to appear before the court issuing it or to do some act relating to a proceeding pending before it, or to keep the peace or be of good behaviour for a stated period. The court can declare it forfeited and enforce payment on it as if it were a fine on conviction. Sureties may be required to guarantee it, and if it is broken, any monetary sanction involved can be entered against both principal and sureties.

Recorder, an ancient flute-like musical instrument, conical in shape, blown from the end, and resembling the flageolet (q.v.).

Recorder, in Great Britain, the chief judicial officer of a city or borough; discharges the functions of judge at the Quarter Sessions of his district; must be a barrister of at least five years' standing; is appointed by the Crown, but paid by the local authority; he may practise at the bar while in office.

Recorder, an electrical measuring instrument which records graphically on a moving paper chart the value of the quantity of electricity measured from moment to moment, so as to afford an unbroken record of the circuit conditions. Such instruments may be ammeters, moving coil voltmeters, dynamometers, etc. The chart, either a graduated disc or continuous roll, is moved forward by a spring-driven or electrically-driven clock.

Record Office, the institution (in London) in which are kept the English national archives, which until 1850 had been stored, with but little attempt at arrangement, in various places. Here are to be found many national documentary treasures, including Domesday Book, the Treaty of the Field of the Cloth of Gold, the Papal Bull giving to Henry VIII. the title of Defender of the Faith, many famous military despatches and records relating to the overseas Empire.

Recruit, one who is newly engaged to the Crown. Recruiting for the army is carried on by a department under the Director of Recruiting and Organization, under the control of the Army Council. Ordinarily a small pecuniary reward is given to recruiters and recruiting agents for each recruit attested and approved. After a period at the recruiting depot, a recruit is drafted to a regular unit in order to complete his training and take his place in the ranks. A high standard of physical and mental development is now required in view of the strain of mechanisation in the army.

Rectangle, a figure of four sides, all straight, the opposite sides being equal in length and one of the angles a right angle; it is a particular case of a parallelogram (q.v.); a square is a special kind of rectangle.

Rectification, the process of changing an alternating into an unidirectional current; in the case of a wireless set this is done by means of a valve. The name is also applied to the process of purifying alcohol and other volatile liquids by distillation, to produce "rectified spirits."

Rectified Spirit, otherwise known as white spirit, is ethyl (ordinary) alcohol of about 95 per cent. strength, the remaining percentage being water. It is obtained by fractional distillation or "rectification" of the crude product of fermentation.

Rector, a clergyman of the Church of England, who has a right to the great and small tithes of the living; where the tithes are inappropriate he is called a vicar.

Rectum (anatomical), the terminal part of the large intestine, in man, a part of the large intestine of somewhat variable length—usually about 8 in.—extending from the sigmoid flexure to the anus.

Recusants, persons who refused to attend the services of the Established Church in those days when such refusal involved legal penalties; the name was particularly applied to Roman Catholics between the reign of Elizabeth and 1829.

Red Admiral, a butterfly (*Vanessa atalanta*) found in Britain and other temperate countries, its wings being scarlet and black, marked with spots of blue and white. The food of its larva is the stinging nettle.

Redcar, borough and seaside resort of 665 m.; is a navigable river. **Redruth**, a town of Cornwall, England, on a hilly site nearly 10 m. SW. of Truro, in the midst of a tin and copper mining district; now amalgamated with Camborne (q.v.). Combined Pop. 35,300.

Red Cross, the international emblem of organizations for the relief of the sick and wounded in wartime. Their operations are recognized by international agreement as the result of the Geneva Convention of 1864. Similar work is carried on in Islamic lands by organizations which use the Red Crescent as their emblem. The neutrality and non-combatant status of Red Cross workers are recognized in all civilized countries.

Red Deer (*Cervus elaphus*), a large deer found through most of the Old World, including Great Britain, where it is found wild in south-western counties, and in parts of Scotland and Ireland. The average height is about 4 ft. at the withers, and the antlers are large, with a spread of over 3 ft. 6 in. They are symmetrically curved; the neck is thickly coated and grey, the body reddish-brown.

RED DEER

Redditch, town of Worcestershire, England, on the Warwick border, 13 m. SW. of Birmingham; manufactures needles, pins, fish-hooks, and motor cars. Pop. 22,200.

Redemptorists, a Roman Catholic religious order of men founded in the 18th Century by St. Alphonsus Liguori; mainly occupied in preaching and revivalist work.

Red Letter Days, the principal saints' days of the Church calendar, so called because in old service-books their names were frequently printed in red type.

Redmond, John, Irish politician; became leader of the Irish Nationalist party in 1900, when the Parnellite and Anti-Parnellite wings reunited, a post he retained till his death; on the outbreak of the World War assured Parliament that Britain could safely withdraw all troops from Ireland. To the end he remained a foe of Sinn Féin and its republican ambitions. (1851-1918).

Redoubt, a detached fieldwork enclosed parapet, with deep trenches behind and shelter pits. It may be either square, star-shaped, or irregular in plan according to the requirements of its site. It is used chiefly to resist infantry attacks and to keep open communications.

Redpoll, the common name of two small finches one of which, the Lesser Redpoll (*Carduelis linaria*), resembling the siskin in habits and size, with a red crown and streaked back, nests in the N. of England and is distributed over the whole country in winter, and the other, the Mealy Redpoll, a larger sub-species, is an occasional winter visitor.

Red River, (1) an important western tributary of the Mississippi; flows E. and SE. through Texas, Arkansas, and Louisiana; has a course of 1,600 m. till it joins the Mississippi; is navigable for 350 m.;

Red River of the North, flows out of Elbow Lake, Minnesota; forms the boundary between North Dakota and Minnesota, and flowing through Manitoba,

falls into Lake Winnipeg after a course of 665 m.; is a navigable river.

Redruth, a town of Cornwall, England, on a hilly site nearly 10 m. SW. of Truro, in the midst of a tin and copper mining district; now amalgamated with Camborne (q.v.). Combined Pop. 35,300.

Red Sea, an arm of the Arabian Sea, stretching in a NW. direction between the shores of Arabia and Africa; is connected with the Gulf of Aden in the SE. by the Strait of Bab-el-Mandeb, and in the NW. divides into the Gulfs of Suez and Akaba, between which lies the Sinai Peninsula; the Suez Canal (q.v.) joins it to the Mediterranean; is 1,200 m. long, and averages 180 in breadth; has a mean depth of 375 fathoms (greatest 1,200); receives no rivers, and owing to the great evaporation its water is very saline; as a seaway between Europe and the East its importance was greatly diminished by the discovery of the Cape route, but since the opening of the Suez Canal it has much more than regained its old position; owes its name probably to the deep red tint of the water often seen among the reefs, due to the presence of microscopic organisms.

Redshank, a shore bird (*Tringa totanus*) of the Plover family, common on British coasts and in Europe and Asia generally, so named from the colour of the bare parts of the legs. It is about the size of the snipe but has larger wings; nests in rushes or grass.

Red Spider, a very small web-spinning mite, pale red when grown, which infests and destroys certain plants, particularly the cotton plant and greenhouse plants. It feeds on the under sides of leaves and causes them to turn yellow and wither.

Redstart, a resident English song-bird of the Thrush family; has white forehead, grey upper parts, brown chest and white underparts. Another species, the Black Redstart (*Phoenicurus ochurus*), has a black head, throat and breast, brown tail and rump and grey underparts. It is a migratory bird occasionally seen in Britain in winter.

Reductio ad Absurdum, a term employed in logic when false conclusions are illogically deduced from the premises of the opponent. In this sense it is sometimes used in what are known as indirect demonstrations in propositions of geometry, where the proposition is shown to be true by proving that any supposition to the contrary would lead to an absurdity.

Reduction, in chemistry, is in its simplest form the removal of oxygen from a compound. Thus, when lead oxide is heated over charcoal, metallic lead is left, and the oxide is said to have been reduced. The term has, however, gradually acquired a wider meaning, and may now be taken to imply any process resulting in an increase in the proportion of electropositive constituent of a substance; the reverse process is known as oxidation. From the electronic point of view, reduction implies the addition of one or more electrons to the atom, or group of atoms, concerned, while oxidation occurs if one or more electrons are removed.

Redwing, a bird of the family Turdidae (*Turdus iliacus*), found in Britain as a winter bird of passage. In size it closely resembles the song-thrush, but its colouring is richer, a light marking being present over one eye, while its song is quieter and more even.

REDWING (Adult Male)

Redwood, any wood yielding a red dye. The more useful redwoods in commerce are brazilwood, sapanwood, camwood, peachwood, and red sandalwood. Redwood is hard and resinous and is used in cabinet work.

Reed, any water, marsh or ditch plant of the genus *Arundo*. Includes also *Phragmites*, *P. communis* being the common British reed, a stout perennial from 4 to 10 feet high with long broad leaves and a large panicle of flowers towards the end of summer.

Reed, in many musical wind-instruments the part that produces the note, as in the bassoon, clarinet, or organ. The pitch of the note is decided by the frequency of the interruptions to the air stream caused by stopping the mouth of, or a slot in, the reed.

Reefing, in navigation, is rolling or tying up parts of the sails in order to reduce the surface exposed to the wind.

Reeve, name given to magistrates of various classes in early English times, the most important of whom was the shire-reeve or sheriff, who represented the king in his shire; others were borough-reeves, port-reeves, etc.

Refectory, a refreshment room or eating room, especially a hall or apartment in a monastery or convent where the meals are eaten. In most monastic refectories a pulpit, often carved in stone, existed from which reading took place during meals.

Referee, Official, the name of certain officials of the High Court to whom are remitted for trial cases which involve prolonged examination of documents or accounts. A motion to set aside the judgment of a referee must be made not to the Court of Appeal but to a divisional Court.

Referees, Court of, a Court set up to consider claims for unemployment benefit under the Unemployment Insurance Acts, consisting of a chairman appointed by the Labour Ministry and two other members representing employers and insurance contributors respectively. An Insurance Officer deciding against a claim for benefit must refer the claim to such a court.

Referendum, a political device for vote the national will on a single definite issue. In the Commonwealth of Australia, for example, it is one of the requirements to be observed before the Constitution can be amended. It was used recently in Western Australia to sound the people on the issue of secession from the Australian Commonwealth, and in the Irish Free State in 1937 to secure approval for the new Constitution of Eire. In 1911 an abortive attempt was made in the House of Lords to introduce it into British practice. It is not infrequently resorted to in Switzerland, where on the demand of 30,000 citizens or 8 cantons any new federal law must be made the subject of a referendum.

Refinery, place where the process of refining, or rectifying sugar, oil, metals, etc., is effected. The process is dependent on the nature of the product to be refined, thus, for petroleum the process is fractional distillation (q.v.); sugar is refined or de-coloured by charcoal; metals are refined by electrolytic methods.

Reflection. When a narrow pencil of light falls on a smooth polished surface, another pencil, termed the "reflected pencil," is thrown off from the surface at the point where the ray falls. If a perpendicular be drawn meeting the surface at the point of incidence of the ray, the angles on both sides, between it and the direct and reflected pencils respectively, are equal. The same effect is produced in acoustics when a sound-wave strikes a solid body.

Reflex Actions, name given to the mechanical reactions which an animal or plant manifests in answer to certain stimuli; they play an important part in the lives of all organisms.

Reformation, the great religious movement of the 16th Century in which a large section of the church broke away from Rome. The revival of learning consequent upon the fall of Constantinople was in part responsible for the movement, which was also fostered by the growing nationalist spirit of western Europe fretting under the domination of Rome. The first clash came when Luther defied Leo X. and stood out at the Diet of Worms for the right of individual liberty. In England the occasion of the Reformation was more political than theological, Henry VIII. wanting a divorce from Catherine of Aragon and the Pope refusing to grant one. This led to Henry proclaiming himself head of the church in England, and the establishment of the Church of England in 1534. Socially the Reformation was of immediate importance by giving the Crown a new source of revenue, the incomes of the monasteries that were dissolved.

Reformatories, or **Industrial Schools**, education and reformation of convicted juvenile criminals (under 16). Under an order of court offenders may be placed in one of these institutions for from 2 to 5 years. They are supported by the state, the local authorities and by private subscriptions, and sums exacted from parents and guardians. They are now known as "Approved Schools."

Reform Bills, Parliamentary measures relating to the franchise. The first was passed in 1832, after two rejections, and abolished certain "pocket boroughs" and gave the vote to town-dwellers who paid a rent of £10. The 1857 Reform Bill gave a household and lodger franchise in boroughs, and further extensions were made in 1884. The 1918 Act extended the franchise to women over 30 and abolished all property qualification as well as plural voting. A measure of 1928 established practically universal suffrage regardless of sex at the age of 21.

Reformed Church, the churches land, Holland, Scotland, and elsewhere, accepting the doctrines of Calvin or Zwingli, or both, separated from the Lutheran on matters of both doctrine and policy, and especially in regard to the doctrine of the presence of Christ in the Eucharist.

Reformed Episcopal Church, an evangelical Protestant denomination, founded on the basis of recognizing only two orders—presbyters and deacons—though the first order is in fact divided into bishops and presbyters. It originated in New York some 50 years ago. It still has a small following in England, known as the Free Church of England.

Refraction, the effect produced when one medium to another of different density, so that its direction is changed, as when sunlight shines through a glass of water. The rays of light so transmitted are as a rule bent or "refracted," and a spoon standing in the water will appear as though bent or broken at the surface of the water. The relation between the direction of the ray before and after refraction is constant for any given medium. The index of refraction of a substance varies with the varying wave-length of the light refracted; thus a beam of white light, after

refraction, may appear as a band of coloured lights. (See *Spectrum*).

Refraction, Errors of, defects of refraction entering the eye; the abnormality is due to faulty structure or functioning of the transparent parts of the eye. In hypermetropia or long sight the lens of the eye has too long a focal length, and the image of objects near the eye is formed behind the retina instead of on it. In presbyopia, advancing age has caused loss of power to alter the shape of the lens to focus objects at various distances, so that objects at a great distance can be seen clearly, but for nearer ones spectacles are needed. Myopia, or short sight, is a consequence of the eye-lens possessing too short a focal length, so that the image of objects far from the lens falls in front of the retina. In astigmatism the cause of the defect lies in the shape of the cornea, or transparent muscular covering of the lens. If this is abnormally curved, instead of being equally curved in all directions, rays of light passing through it are not all brought to a single focus; hence when looking, for example, at a number of parallel lines, or at spokes radiating evenly from a point, the patient sees some lines as much darker and clearer than others. All these defects can be corrected by wearing suitable lenses.

Refrigeration, the production of mechanical methods. Modern methods are based on the principle that the change from the liquid to the gaseous state is to be brought about by the absorption of heat. In the absorption system the substances mostly used as refrigerants are carbon dioxide, ammonia, and methyl chloride. The first named is most often used on ships.

Refuse Disposal, is undertaken by the sanitary departments of local authorities. It may be either tipped in large "dumps," at suitable spots outside towns, or into the sea, both methods being in use in various parts of the country. It is nowadays generally sorted or screened at central depots, large quantities of suitable material being pulverized and used as agricultural fertilizer; cans are generally sold as "scrap"; the residuum may be incinerated in a refuse destructor. See also *Sewage Disposal*.

Regalia, the symbols of royalty, more particularly those used at a coronation. The English regalia includes the crown, the sceptre with the cross, the sceptre with the dove, St. Edward's staff (in reality dating from Charles II.'s coronation), the orbs of the king and queen, the sword of mercy called Curtana, the two swords of spiritual and temporal justice, the ring, bracelets, spurs, vestments, etc. They are normally exhibited at the Tower of London. The regalia of Scotland consists of the crown, the sceptre, and sword of state, and are on exhibition in the Crown Room in Edinburgh Castle.

Regeneration, in biology, the production of new tissue to supply the place of old tissue lost or removed. In certain lower animals a whole organ or limb may be thus replaced, but in man regeneration is far more restricted. If, e.g., a branch of continuity takes place in a muscle, it is repaired by a new growth of connective tissue, but muscular substance like that lost is not restored. Nerve, fibrous and areolar tissues are more easily restored.

Regeneration, baptismal, the doctrine of certain Christian sects that the power of spiritual life, forfeited by the Fall, is restored to the "reborn" soul by the proper administration of the rite or sacrament of baptism. The doctrine that a man must be "born again" was taught by Christ to Nicodemus (John III).

Regensburg, or Ratisbon, one of the oldest towns in Bavaria, Germany, on the Danube, 82 m. N.E. of Munich; medieval in appearance, with Gothic buildings and winding streets; has a small university; till 1806 was the seat of the Imperial Diet; manufactures tobacco, porcelain, brass, steel, and other wares, and has printing works. Pop. 81,000.

Regent, one who governs a kingdom or disability of the sovereign. Sometimes a council is appointed to act as regent, as in Great Britain in 1751. In hereditary governments the regent is usually the nearest relative of the sovereign who is capable of undertaking the office; thus, George, afterwards George IV., was regent during the incapacity of his father, George III. In 1910 a Regency Act was passed providing that if King George V. died, Queen Mary should become Regent. Acts to regulate regencies were also passed in 1761 on the death of Frederick, Prince of Wales; and in 1785, 1788 and 1811, on the occasions of the insanity of George III.

Reggio, name of two cities in Italy: (1) called Reggio di Calabria, on the Strait of Messina, built on the ruins of ancient Rhegium; manufactures silks, gloves, hose, perfumes, etc.; greatly damaged in the Messina earthquake of 1908. Pop. 119,800. (2) Called Reggio nell'Emilia, 36 m. N.W. of Bologna; manufactures cheese, locomotives, and leather goods. Pop. 94,000.

Regicides, murderers of a king, specially applied to the 87 members of the court who tried and condemned Charles I. of England, amongst whom were Cromwell, Bradshaw, Ireton, and others, of whom 10 living at the time of the Restoration were executed and 25 others imprisoned for life.

Regillus, Lake, celebrated in ancient Roman history as the scene of a great Roman victory over the Latins in 496 B.C.; site probably near the modern town of Frascati.

Regiment, a number of companies of a field officer. In the British Army regiments, until recently, varied in strength from 2 to 4 battalions, though only a few, such as the Middlesex Regt. and the Rifle Brigade, etc., had 4 battalions. Previous to 1881 the battalions linked together in that year under the territorial reorganisation were considered separate regiments. All infantry regiments now consist of 2 battalions under a lieutenant-colonel. The 2 battalions composing a regiment are, however, for all practical purposes separate units, serving at different stations. Territorial battalions are affiliated to the regular regiments, except the Guards. The whole corps of the Royal Artillery, Royal Engineers, Signals, etc., also constitute regiments.

Regina, capital of Saskatchewan, Canada, was founded as a North-West Mounted Police fort at Wascana Creek in 1882; is an important distributing and manufacturing centre, and the Western headquarters of the Royal Canadian Mounted Police (q.v.). Pop. 53,400.

Regional Planning, the development of territory in such a way as to conserve its natural beauties and make the best possible use of its resources; since the World War the art has received much attention in America and Europe, among its triumphs being the reclamation of parts of the marshy Italian coastal areas, the development in Russia of great industrial cities near the regions rich in minerals and power sources, the scheme for the improvement of the Tennessee Valley in the U.S.A., and the so far not very successful attempts to regulate the rapid growth of

Industrial establishments and residential suburbs in the area around London.

Registers, Parish. Records of births, baptisms, marriages and deaths, in each English ecclesiastical parish, were first ordered to be kept under Henry VIII., but no complete system of registration existed until 1836. All such registers are open to inspection on payment of a small fee, and for the last century copies of all entries made therein have also been recorded at the General Registry at Somerset House, London. See also *Registration*.

Registrar, (1) any official whose duty it is, as e.g., the registrar of Friendly Societies; the registrar of joint stock companies, who registers the memorandum of agreement of every company formed under the Companies Acts, and issues certificates of incorporation; the registrar of births, deaths and marriages; (2) judicial officers attached to various courts; these include registrars of the Chancery Division who prepare lists of causes for trial and notes of judgments in cases where an appeal is pending; registrars of the bankruptcy court or similar officials in county courts who conduct proceedings in bankruptcy; the registrar of the Principal Probate Registry at Somerset House, who determines certain interlocutory matters in probate and divorce cases; the Registrar of the Privy Council, who conducts preliminary proceedings in cases pending before the Judicial Committee of the Privy Council.

Registration of Births, Deaths and Marriages, is superintended by the General Registry Office at Somerset House, London, whose head is the Registrar-General. The whole country is divided into districts under superintendent registrars, and each district into smaller subdivisions under local registrars. When a birth takes place, personal information of it must be given to the local registrar and the register signed by the father, or mother, or the occupier of the house of birth, or falling all these, the person in charge of the child. Registration must be within 42 (in Scotland 21) days of the birth, and failure involves a penalty of forty shillings. After twelve months no birth can be registered without the Registrar-General's consent. In districts where the Notification of Births Acts, 1807-1916, have been adopted, notice of every birth must also be given by the father, or person in attendance on the mother, to the district medical officer of health within 36 hours of the birth.

There are similar regulations respecting registration of deaths. In default of relatives or other persons present at the death, an inmate of the house where the death occurred, or the person causing the body to be buried, must inform the local registrar of the occurrence and sign the register; and the registration must be within 5 days of the death, or within the same period, written notice of it sent to the registrar with a certificate of the cause of death signed by a registered medical practitioner if any such attended the deceased. A body must not be disposed of until the registrar has given a certificate that he has registered the death, or until the Coroner has made a disposal order.

Marriages are registered with the Registrar-General by the officials solemnising them.

Registration of Title. Titles to real property (q.v.) may be officially examined and registered in the Land Registry, London, as (1) absolute titles, (2) qualified titles, or (3) possessory or holding titles. In practice most registered titles are now either absolute or possessory. Registration is compulsory in London, and may be made so for any part of a county by order in Council and,

where it is compulsory, a valid legal title cannot be obtained by a purchaser unless his title is registered. The Land Registry was established by an Act of 1862 with the object of rendering dealings in land more simple and economical by setting up a State register of landowners who voluntarily submitted the titles to their land for approval by the Registrar on behalf of the State. The principle of compulsory registration was introduced by the Land Transfer Act of 1897. The Land Registration Act, 1925, consolidated and modified all the previous Acts. The principle of the system is that the machinery for land purchase and sale is assimilated to that for stocks and shares—the cost of buying, selling, or mortgaging registered land is much less than the cost in the case of unregistered land.

Regnault, Henri Victor, French physicist, born in Aix-la-Chapelle; rose to a professorship in Lyons; important discoveries in organic chemistry won him election to the Academy of Sciences in 1840; became director of the Imperial porcelain manufactory of Sèvres; famous for his research work in connection with specific heat and expansion of gases. (1810-1878).

Regulars, persons in the Christian Roman Catholic Church, who live in accordance with a religious rule, including monks, nuns, friars, and canons. They are bound by vows of poverty, chastity, and obedience.

Regulator, in mechanics, a contrivance for regulating and controlling motion. In the steam engine, it is a balance valve for controlling the admission of steam to the steam chest. In electrical instruments, an automatic device for regulating the voltage of a dynamo with varying load. In mining, a sliding door for controlling ventilation.

REGULATOR
on The Rocket

Regulus, Roman general; was twice defeated the Carthaginians, both by sea and land, but was at last taken prisoner; being sent, after five years' captivity, on parole to Rome with proposals of peace, dissuaded the Senate from accepting the terms, and despite the entreaties of his friends returned to Carthage according to his promise, where he was slain after excruciating tortures.

Rehoboam, the Jewish king on whose accession at the death of Solomon, in 976 B.C., the ten tribes of Israel seceded from the kingdom of Judah.

Reich, The, the German Empire; the "First Reich" being the old Holy Roman Empire, the "Second Reich" the German Empire of 1870-1918, the "Third Reich" the German state as remodelled by Hitler in 1933.

Reichstag, the German Legislature, representative of the German nation, elected by universal suffrage, male and female, under a system of proportional representation; formerly its functions were equivalent to those of the English Parliament, but since the Nazi revolution in 1933 it has been called together only to hear declarations of national policy made from time to time by the Führer. The destruction by fire of the Reichstag buildings in 1933, laid without incontestable evidence at the door of the Communists, was one of the earliest incidents of the Nazi revolution.

Reid, Sir George Houston, British, Imperial statesman, born at Johnstone, Renfrewshire; emigrated with his parents in 1852; adopted law as his profession; became

Minister of Education in 1883; Premier of N.S.W. in 1894; was a great Free Trader, and visited England for the Jubilee in 1897; Prime Minister of the Australian Commonwealth, 1904, and afterwards its High Commissioner in London; entered the British Parliament in 1916. (1846-1918).

Reid, Captain Mayne, Irish novelist, born in Co. Down; led a life of adventure in America, and served in the Mexican War, but settled afterwards in England to literary work, and wrote a succession of tales of adventure, including *The Scalp Hunters* and *The Headless Horseman*. (1818-1883).

Reid, Thomas, Scottish philosopher, and chief of the Scottish school, born in Kincardineshire; for a time minister in the Scottish Church; became professor of Philosophy in Aberdeen in 1752, and in Glasgow in 1763, where the year after he published his *Inquiry into the Human Mind*, which was followed in course of time by his *Philosophy of the Intellectual and Active Powers*. His philosophy was a protest against the scepticism of Hume. (1710-1796.)

Reigate, town in Surrey, England, the neighbouring towns of Redhill and Merstham, all mainly residential centres for Londoners. Pop. 36,000.

Reign of Terror, the name given to that period of the French Revolution which lasted from the fall of the Girondists on May 31, 1793, to the overthrow of Robespierre and his accomplices on July 27, 1794, during which several thousand supposed counter-revolutionaries were put to death by guillotine or otherwise.

Reims, city of France in the department of Marne, on the Vesle, 100 m. N.E. of Paris. As the former ecclesiastical metropolis of France it has historical associations of peculiar interest; the French monarchs were crowned in its cathedral (a Gothic structure of unique beauty) from 1179 to 1825; has a beautiful 12th Century Romanesque church, an archiepiscopal palace, a Roman triumphal arch, a Lycée, statues, etc. Situated in a rich wine district, it is one of the chief champagne entrepôts, and is also one of the main centres of French textiles, especially woollen goods; is strongly fortified. Entered by German troops in Sept., 1914, and sacked by them before being evacuated after nine days, the city was constantly bombarded for the next four years owing to the proximity of the enemy. This bombardment almost destroyed the cathedral, which was restored and reconsecrated in 1938. Pop. 116,700.

Reincarnation, the belief that after death the human soul is reborn, on earth or elsewhere, in another physical body. It was taught by the ancient Pythagoreans, and appears to have been held by Plato. It is a cardinal principle of Indian religion and of Mahayana Buddhism, whence it has been adopted by theosophists.

Reindeer, a deer (*Rangifer tarandus*) found throughout the

northern parts of both Old and New Worlds. Both male and female have antlers; in winter, the fur is long and grey-brown while the neck, hindquarters and belly are white. It has long been domesticated, and widely used from early times in Lapland as a beast of draught and carriage, the animal being admirably adapted to travelling over broken snow in these regions.

REINDEER

Reindeer Lake, a lake in Manitoba provs., Canada, whose outlet is the Reindeer R.; it is about 130 m. long by 30 m. broad.

Reindeer Moss, a lichen (*Cladonia rangiferina*) which is the winter food of the reindeer, common in Britain on moors, heaths, and mountains, and abundant in the pine forests of Lapland. It has the taste of wheat-bran.

Reinforced Concrete, concrete strengthened by the inclusion in it of steel nets, rods, girders, etc., the object of the steel skeleton being to increase the resistance of the concrete to tensional forces. It has become the standard building material of the great cities of Europe and America.

Reinhardt (properly Goldmann), Max, Austrian theatrical director; born at Baden, near Vienna; a bank clerk, but in 1894 appeared on the stage in Berlin, at the Deutsches Theater, of which he became director; staged British and classical plays, adopting striking schemes of light and colour; since 1909 has produced in many other cities in Germany and elsewhere, but left Germany in 1933 at the beginning of the Nazi régime. (1873-).

Reinsurance, the minimization of liability under an insurance contract by passing on part of the risk to other insurers.

Reiters, German cavalry soldiers of the 14th to the 17th Centuries, especially those who were employed in the religious wars of the Reformation era.

Reith, Sir John, first director-general of the British Broadcasting Corporation. Born at Stonchaven, the son of a clergyman, he was educated at Gresham's School, Holt, and took an active part in the early days of broadcasting in 1922. He was knighted in 1927, and in 1938 left the B.B.C. to become chairman of Imperial Airways, Ltd. (1889-).

Relapsing Fever, a contagious micro-organisms in the blood developed by bad hygienic conditions. It comes on suddenly with a temperature up to 105° or 106°, which drops rapidly within a week, followed by a relapse usually within 7 days of the first attack, generally between the third and fifth days. It occurs, spasmodically, in densely populated districts in India, China and Eastern Europe.

Relativity, a set of physical theories first put forward in 1905 by Einstein (*q.v.*), on the basis that the absolute motion of matter in space is impossible of determination. It is, of course, possible to measure the velocity of the earth relative to the sun, or to some system of stars which are regarded, for the purpose, as stationary; but since these bodies may themselves be in motion, this measurement gives no information regarding the earth's absolute motion. The consequences of the postulate of relativity include: (1) If two observers are in motion relative to one another, two events which appear to one of them to occur simultaneously will not necessarily appear to do so to the other, even if both have made full allowance for what they consider to be the times which elapse between the occurrence of each event, and their own perception of it. (2) Times and distances as measured by an observer are purely subjective, and differ for different observers. (3) What any observer perceives is a kind of cross-section of a four-dimensional continuum of which space and time are merely components.

When applied to mechanics, the theory of relativity predicts various deviations from the results to be expected if Newton's laws of

gravitation were true. These are usually extremely small, but are in some cases sufficiently large to be measured experimentally, and in every case where this is possible, experiment has confirmed the theory of relativity. Some of the effects which are accounted for by means of the theory are (a) the precession of the orbits of certain planets—in particular that of Mercury; (b) the bending of rays of light which pass close to the sun; and (c) the displacement of the lines of the spectra of atoms which are situated in intense gravitational fields.

Relativity of Knowledge, the doctrine that all knowledge is of things as they appear to us and not of things as they are in themselves or of phenomena and not of noumena, and is thus subjective rather than objective.

Relay, the process in telegraphy and in wireless used to secure reception of signals over a great distance by causing a faint signal (electric current or wireless wave) to control a more powerful force and relay a more powerful signal.

Relief, a sculptured figure standing out from a plane surface. Works in relief are of three kinds: *alto rilievo*, high relief; *mezzo rilievo*, medium relief; *basso rilievo*, low relief.

Religion, the belief in some supernatural power wholly or partly responsible for or governing the universe and especially man, and the complex set of opinions and practices which may or does arise in consequence of such a belief. The comparative study of religions is one of the latest of the sciences; it has thrown much light on the origins of the religious idea, but has produced no evidence in support of or tending to the overthrow of any particular religious manifestation. The great world religions which still have a great following at the present time are Christianity, with perhaps some 680 million nominal adherents, divided among its three main branches of Roman Catholics (330 millions), Orthodox Eastern Catholics (145 millions) and Protestants (205 millions); Islam or Mohammedanism, with some 210 million followers; Judaism, with about 16 millions; Hinduism, 230 millions; Buddhism, which may perhaps claim 450 millions, many of whom would declare themselves also adherents of Taoism, Confucianism, or Shinto. Many primitive peoples in Africa, Northern Asia, Oceania and elsewhere still adhere to some form of crude animistic belief. But in the case of all the religious systems mentioned, their dogmatic hold on many of their nominal adherents to-day is very tenuous.

Reliquary, a portable shrine or case for relics of saints or martyrs; it assumed many forms, and was often rich in material and of exquisite design.

Remainder. In real property law, an estate in remainder is one the effect and enjoyment of which only operates after the termination of a prior interest. Remainders are either contingent, only taking effect upon an uncertain event or in favour of an uncertain person; or vested, by which a present interest passes to the party, though it is to be enjoyed only in the future.

Remarque, Erich Maria, German writer. A student when the World War broke out, he enlisted at 18, served in the trenches, and took afterwards to teaching and later to business. In 1929 he published *All Quiet on the Western Front*, a vivid realistic study of the horrors of modern war, which quickly achieved success throughout the world. He was deprived of German nationality in 1938 by the Nazi Government. (1898-).

Rembrandt, or Van Rijn, Harmen, Dutch historical and

portrait painter and etcher, born at Leyden, where he began to practise as an etcher; removed in 1630 to Amsterdam, where he spent the rest of his life and acquired a large fortune, but lost it in 1656 after the death of his first wife, and sank into poverty and obscurity. He was a master of all that pertains to colouring and the distribution of light and shade. Of his pictures "The Woman Taken in Adultery" is in the National Gallery, London, while a number of his etchings are preserved in the British Museum. (1606-1669).

REMBRANDT

Remembrancer, name given to officials, including the King's Remembrancer, an officer of the Scottish Exchequer, and the City Remembrancer, who represents the London City Corporation before Parliamentary committees and boards of enquiry.

Remington, Philo, inventor of the Remington breech-loading rifle, born at Litchfield, New York State; for 25 years manager of the mechanical department in his father's small-arms factory; the Remington typewriter was also the outcome of his inventive skill. (1816-1889).

Remizia (*Remijia*), a genus of tropical trees of the order Rubiaceae, from which comes the cuprea bark used in manufacturing quinine, especially from the species *Remizia vellosii*. The bitter principle of the bark is "vicine" or viceric acid.

Remonstrance, the name given to a list of abuses of royal power laid to the charge of Charles I. and drawn up by the House of Commons in 1641. With the petition that accompanied it, it contributed to bring about the Civil War that shortly followed.

Remscheid, town of Prussia, near Düsseldorf, one of the most important of German cutlery-manufacturing centres. Pop. 101,200.

Remus, (g.v.), who was slain by the latter because he showed his scorn of the city his brother was founding by leaping over the wall.

Renaissance (*Renascence*), the name popularly given to the revolution in literature and art in Europe during the 15th and 16th Centuries, caused by the revival of the study of ancient models in the literature and art of Greece and Rome, especially the former. The Renaissance was firmly established in Italy before it had much influence elsewhere; thence it spread to Germany; its influence, when once it had crossed the Alps, spread with great rapidity. English writers took both their material and their literary forms from Italian works, and it is because these signs of the Renaissance are so much more obvious and permanent a record of it than any others, that critics are disposed to forget that the Renaissance was not primarily an artistic and literary change, but began with an intellectual and moral ideal.

Renan, Ernest, French Orientalist and Biblical scholar, born in Brittany son of a sailor. Destined for the Church, he entered the seminary of St. Sulpice, where his studies caused him to abandon Catholicism. He was appointed professor of Hebrew in the Collège de France in 1861, though not installed till 1870; and made a member of the French Academy in 1878. Having distinguished

himself by his studies in the Semitic languages, he, in 1888, achieved a European reputation by the publication of his *Vie de Jésus*, the first of a series bearing upon the origin of Christianity and the agencies that contributed to its rise and development. (1823-1892).

Renfrew, a royal burgh and county-town of Renfrewshire, Scotland, situated on the Clyde, 6 m. below Glasgow; industries include thread, cotton cloths, shawl factories, boiler-making, and shipbuilding. Pop. 15,000.

Renfrewshire, a south-western county of Scotland; faces the Firth of Clyde on the W., between Ayr on the S. and SW., and the R. Clyde on the N.; bordered on the E. by Lanark; hilly on the W. and S., flat on the E.; is watered by the Gryte, the Black Cart, and the White Cart; dairy-farming is carried on on an extensive scale. Nearly two-thirds of the county is under cultivation; coal and iron are mined, and in the Glasgow neighbourhood manufactures of all kinds are carried on. Largest towns Paisley, Greenock, Renfrew and Port Glasgow. Area 239 sq. m. Pop. 288,600.

Reni, Guido, Italian painter, born at Calvenzano, son of a musician. Studied at Bologna under Calvaert, the Carracci, and Ferrantini. His best known painting is "Phœbus and Aurora," on the ceiling of the pavilion of the Palazzo Rospiolosi, Rome, 1609. He died at Bologna; his works are scattered all over Europe. (1575-1642).

Rennes, town in Brittany, France, capital of the department of Ille-et-Vilaine, situated at the junction of the Ille and the Vilaine; consists of a high and low town, separated by the R. Vilaine, mostly rebuilt since the disastrous fire in 1790; has handsome buildings, a cathedral, etc., is a military centre, and manufactures sail-cloth, linen, shoes, and hats. Pop. 98,600.

Rennet, the contents of the stomach of an unweaned calf or other animal, or the lining membrane of the stomach, or any other preparation from animal intestines, used for curdling milk, and in the preparation of cheese. Its active element is the enzyme rennin.

Rennie, John, Scottish civil engineer, born at E. Linton, E. Lothian; employed by the firm of Boulton & Watt at Birmingham, and entrusted by them to direct the construction of the Albion Mills, London, he became at once famous for his engineering ability, and was in general request for other works, such as the construction of docks, canals, and bridges; the former London and Waterloo bridges, the Kennet and Avon Canal, and docks and harbours at Holyhead, Dun Laoghaire and London being among them. (1761-1821).

JOHN RENNIE

Reno, the largest city of Nevada, U.S.A., 30 m. N. of Carson City; it is a place of pilgrimage for Americans seeking divorce, on account of the ease with which this is permitted by the laws of the State. Pop. 18,500.

Renoir, Auguste, French impressionist painter, born in Limoges. He began to earn a living painting on porcelain at 18. From 1874 he worked at portraits, his works including studies of Cézanne, Wagner, and Monet. (1841-1919).

Rent, one of the three cardinal divisions of wealth—the others being the wages of labour and the profits of capital. Rent, in economics, is defined as that share of wealth which is claimed by owners of land. The rent of agricultural land is regulated by the fertility of the soil and the convenience of

situation, and when either of these conditions is altogether absent the land can command no rent. From the legal standpoint, rent is any monetary or other payment made for the use of land or of buildings thereon. It is generally due on the four quarter days, but, most small property being held on weekly tenancies the rent is payable weekly. In the case of many small houses the landlord compounds with the tenant for rates and rent, i.e., the landlord pays the rates and the tenant pays a lump sum to the landlord to cover both. Distress for arrears must be levied on the premises leased, but the landlord may follow goods fraudulently and secretly removed within 30 days. Six years' arrears are distrainable except in agricultural leases and in cases of bankruptcy, when the periods are 1 year and 6 months respectively.

Rentier, one who derives his income from investments in the French national funds or *rentes*.

Rent Restriction Acts, Acts passed during the World War and continued, with amendments, after the War, to give tenants of certain houses security of tenure. The Acts provided that if the tenant paid his rent he could not be evicted, but under the original Acts, the landlord who wanted the house for his own personal occupation could obtain possession provided he found the tenant suitable alternative accommodation. The Act of 1915 protected only 230 tenants; the Act of 1919 extended protection to houses rented up to £70. In 1920 permissive rent increases were authorized, subject to repairs being effected by the landlord, the maximum rent increase being 40 per cent. plus certain allowances for rates' increases. This security of tenure was continued by the Act of 1925, but a gradual form of decontrol was introduced in 1923. Properties not subject to the Act are houses erected since April 8, 1919, and those which since then have been converted into flats. Subject to a month's notice by the landlord, the Rent Acts ceased to apply (as from September 29, 1933) to houses where both the annual amount of rent and the rateable value exceed: in London, £45; Scotland, £45; elsewhere, £35. Houses below these values could still become decontrolled under the 1923 Act (when the landlord came into possession) except those of or below: £30 in London; £26.5 in Scotland, and £13 elsewhere. The Act of 1933 expired on June 31, 1938, in England (May 28, in Scotland) and the Increase of Rent and Mortgage Interest (Restrictions) Act which received the Royal Assent on May 28, 1938, extended the decontrol to houses with a rateable value of over £35 a year in England and Scotland and over £30 elsewhere ("Upper Class A" houses). Control was maintained in respect of controlled houses in "Lower Class B" with a rateable value in 1931 of more than £20 and not more than £36 in the Metropolitan Police area or over £13 and not more than £20 elsewhere. It was necessary to register "Upper Class B" houses which were entitled to become decontrolled before Aug. 26, 1938, or they were deemed to be controlled again unless within 9 months the landlord could show good reason in the County Courts for his omission to register within the specified time. Under this Act some 400,000 to 500,000 houses were entitled to become decontrolled.

Reparations, the amount of indemnity demanded of Germany by the Allies after the World War. This was fixed, under the Versailles Treaty, in 1921 by the Financial Council of the Allies, in Brussels, at 13 milliards of gold marks, or £6,600,000,000, payable in bonds. Failure by Germany to meet her obligations led to the French and Belgian occupation of the Ruhr Valley in 1923. But in 1924 a new scheme

(Dawes Plan) was agreed upon with Germany, which provided for yearly payments rising to 2,500,000,000 gold marks. Then, in 1930, reparations were again revised and Germany agreed to pay, during a term of 37 years, annuities averaging 1,989,000,000 marks, and thereafter, until 1987-1988, annuities varying between 1,711,000,000 and 898,000,000 marks (Young Plan). Finally, in July, 1932, at Lausanne, the so-called "Gentlemen's agreement" was concluded by which reparations were abolished; while Germany agreed to make an eventual payment of £150,000,000 by means of bonds as from the year 1935. The bonds are deposited with the Bank for International Settlements, and might be marketed, up to 1937, under safeguards for German credits, at a price not below 90. These bonds pay 5 per cent. interest, with 1 per cent. amortization, which will extinguish them in 37 years.

Repertory Theatre, a theatre company and a repertoire of plays. Charles Frohman tried to establish such a theatre in London in 1910, but apart from the Abbey Theatre, Dublin, there exists no true repertory theatre in the British Isles, though there are various theatres, including the "Old Vic," in London and several in the suburbs and provinces, with stock companies which perform a fresh play every week or fortnight. The Birmingham Repertory Theatre (founded in 1913) under Sir Barry Jackson has had a successful career.

Replevin, the name of an action which may be undertaken by a tenant to recover goods removed under any illegal distress.

Repousse, a name applied to a style of raised ornamentation in metal obtained by beating out from behind a convex design, which is then chased in front; was known to the Greeks, and carried to a high pitch of perfection by Benvenuto Cellini in the 16th Century; has been successfully revived, especially in France, in modern times.

REPOUSSE

Representatives, House of, the lower U.S.A. Congress; it consists of members from the various states, elected every second year on a population basis. The electorate comprises those who, by the laws of their state, may vote for members of the state legislature, which means in practice adult suffrage, at least for whites; various devices being adopted in the southern states to overcome the Constitutional provision forbidding disenfranchisement on the ground of race or colour. The actual number of members to which each state is entitled is determined by the decennial census. By the Apportionment Act consequent on the 1910 census the total was 435; it is at present 435. The lower House of the legislatures of the individual states is also called the House of Representatives.

Repression. In Freudian psychology many forms of mental disorder are held to be the consequence of conflict between repressed ideas and conscious thoughts, and the task of the psycho-analyst is to bring to the surface consciousness those repressed thoughts and ideas of which the subject is unconscious, so that they may be faced and overcome.

Reprieve, remission or commutation of a capital sentence. It may be granted by the King on the advice of the Home Secretary, or in the case of a

Joinion or Colony, by the Governor. In practice a reprieve is always granted in the case of a woman who is found by a jury of matrons to be pregnant; and in the case of a convicted person who becomes insane between sentence and the date fixed for execution.

Reprisal, in international politics the use of force by one nation against the property of another to obtain redress for supposed injuries without, at the same time, declaring war. There is no certainty in International Law as to what degree of force can be used without risking war, and in practice it is generally only exercised against weak nations, as e.g., when Germany seized a Spanish vessel during the Spanish Civil War (January, 1937). It differs from "retorsion" in that the latter consists of retaliation in kind for unfriendly or inequitable acts which are not at the same time illegal by International Law.

Reproduction, in animals is asexual (non-sexual). The former is affected by the contact of a germ-cell or ovum and a sperm-cell. Asexual reproduction is by gemmation (budding) and fission (division of cells into new ones); by internal gemmation; by alternation of generations; or by parthenogenesis (fertilization of the ovum without the aid of a sperm). In plants, also, there may be sexual or asexual reproduction; the former is by germ cells, the latter by spores, gemmae, conidia, etc.

The doctrine that every organism is the product of a single cell, which multiplies itself by successive divisions, thereby forming a cell group from which the organism is gradually evolved, is the basis of the whole study of comparative embryology.

No success has been achieved as a result of attempts to produce living matter in the laboratory, and science knows of no way in which life is produced except as the result of the reproduction of pre-existing living beings.

Reptile, any animal of the class Reptilia. The first appearance of reptiles is believed to be indicated by remains of a marine saurian of the Carboniferous age; but in Mesozoic times the reptilian type appears in such variety and in such a high state of development that the era has been distinguished as the Reptilian Age. Reptiles are popularly defined as including any animal which moves on its belly or on small, short legs, as the snake, lizard and caterpillar. In biological language, they are vertebrate animals having the skin covered with scales, or scutes, and distinguished from amphibians as being all air-breathers. The five chief groups are Chelonians (tortoises), Ophidia (snakes), Lacertilia (lizards), Rhynchocephala (New Zealand lizards), and Crocodilia (crocodiles).

Repton, a village of Derbyshire, England, 6½ m. SW. of Derby, once the capital of the Mercian kingdom; has a famous public school, founded in 1556. Pop. c. 1,000.

Republic, a form of political constitution in which the supreme power is exercised, not by an hereditary ruler, but either by certain privileged members of the community or by the whole community. The medieval republics of Venice and Genoa were exclusive oligarchies, the supreme power being vested in the nobles or a few privileged persons, but this older conception of republican policy has, apart from the constitutions of present-day totalitarian states under dictators, given way to the representative system, i.e., one in which the supreme power is vested in rulers chosen by and from the whole nation or by their representatives, as in France or the United States. Germany and Portugal afford outstanding examples to-day of republics ruled by dictators. Since the World War, Germany, Spain, Russia and Turkey have changed from monarchies to

republics; and new republics have been created in Czechoslovakia, Poland, and some minor states; while Greece, for a while republican, has reverted to monarchy.

Republicans, one of the two great parties of the U.S.A., the other being the Democrats. The party was organized in 1854 by Northern politicians who were agitating against slavery, and the first Republican President was Abraham Lincoln. It has been on the whole the dominant party in American political life; is strongly nationalist in outlook and stands for high protective tariffs. It sustained a great defeat at the Congressional and Presidential elections of 1932, and has not since been restored to power.

Requiem, a Mass offered for the soul of a dead person; many famous composers have written music for Requiem masses, among them Mozart, Brahms, and Verdi.

Reredos, the name given to the or screen behind and rising above a church altar; it is often ornamented with niches and figures, and stands out from the east wall of the church, but is sometimes joined to the wall; splendid examples exist at All Souls College, Oxford, Durham Cathedral, and St. Albans.

Reservation, the practice of pre-elements of bread and wine from Holy Communion in church, for administration to the sick and for purposes of devotion. In the Roman Catholic Church the custom is general, in the Anglican common, though it would appear to be forbidden by the Prayer Book, the revision of which in 1927-1928 contained proposals for permitting reservation which were among the reasons for its rejection by Parliament.

Reserve, Army. The British Army Reserve, serve comprises an "A" and "B" section; there is also a supplementary Reserve and, in theory, the Militia or Special Reserve. Normally, a man enlists on a twelve-year engagement, seven years being spent with the colours and five years with Section B of the Reserve (in the artillery the periods are six years with the colours and six with the reserve) and, as a reservist, he is paid a small retaining fee. Section "A" is composed of a certain number of reservists who are liable for active service at shorter notice than B reservists. The Supplementary Reserve is a post-war body of "tradesmen" (i.e., skilled men), and its purpose is to enable the technical corps to be brought up to establishment on mobilization. The strength of the Army Reserve and Supplementary Reserve is about 130,000.

Reservoir, an enclosed area for the storage and filtering of water to be used for the domestic and business supply of a town. Most reservoirs are artificial, being constructed by damming a valley containing plenty of water, conveying the water by pipe-lines to the town. The dammed way of impounding water is by means of dams of Portland cement, reinforced concrete or masonry. Masonry dams are now used in all countries, and generally have a triangular vertical section, the face on the water side being almost perpendicular, while the opposite or downstream face is built with a somewhat concave curve.

Resin, an organic substance of vegetable origin, transparent or translucent, and yellowish-brown in colour. Many varieties are products of the terpenes. The commercial varieties include copal, gulsacum, amber, lac and mastic; they are used in varnishes and soap. They are insoluble in water but soluble in alcohol and inflammable.

Resistance, the property of an electrical conductor by reason of which energy is expended in it when a current flows or a transfer of electricity occurs; or, in other words, the extent to which an electric conductor resists the passage of an electric current. The resistance is constant under constant physical conditions and varies according to the material of which the conductor is made.

Resolution, a formal decision or determination of a legislative or corporate body; or of a meeting or any association of individuals; or a formal proposition brought before a public body or meeting for discussion and adoption. In the House of Commons taxes and duties are brought before the members as "resolutions" before being included in the Finance Act; and money Bills are debated in the form of resolutions before coming on for second reading. A "special resolution," confirmed by the Court, is the statutory preliminary to the extension of the powers of a company.

Resonance, the phenomenon exhibited by vibrating systems, which are brought into oscillation by a periodic disturbance, the frequency of which is equal to that of the system; e.g., a tuned wireless circuit responds to waves of a definite length but to no others. Air in a pipe can be set in violent vibration by a tuning fork of a certain frequency, thus augmenting the sound. Troops break step when marching over an insecure bridge as the regular paces might give rise to oscillations in the bridge.

Respiration, the process of breathing, in which oxygen is taken into the lungs by inspiration, and carbonic acid expelled by expiration, the carbonic acid being given out by the blood, and oxygen taking its place. When respiration is obstructed, asphyxia takes place, except in "hibernation" (torpor). The number of the respiratory movements in health is from fourteen to eighteen a minute. Besides carbonic acid, watery vapour and a very small quantity of organic matter are extracted in respiration, the latter varying with the state of digestion. Respiration may be produced by artificial means in cases of apparent death from drowning. (See Artificial Respiration).

Restitution of Conjugal Rights, a decree for in the Divorce Court by a spouse who has been deserted by the other spouse. If such a decree is granted and disobeyed, the petitioner becomes entitled to a decree of Judicial Separation on the ground of desertion. It is uncertain how far applications for such decrees may still be necessary after the Matrimonial Causes Act of 1937.

Restoration, The, the name given to the re-establishment of monarchy and the return of Charles II. to the throne, May 28, 1660, after the fall of the Commonwealth, on the suggestion of Monk.

Restraint of Trade. In English law, a contract in general restraint of trade, such as an agreement not to practice any business or profession, is void. The law will not permit any one to restrain a person from doing what his own interest and the public welfare require that he should do. A valid restraint must be such as, in view of all the facts, is reasonable and necessary to the protection of the party intended to be benefited; it must not be harmful to the public; and it must not extend to every business or trade. The tendency of judicial decisions has been to allow greater latitude in the scope of these agreements, since the changed conditions of modern commerce have involved corresponding changes in the views of the courts

as to what is, and what is not, contrary to the public interest.

Resurrection, the resuscitation of the body after death and its reunion with the soul or vital principle. The belief in a resurrection has been mainly developed in Christianity and Mohammedanism, the ancient Jews having apparently held no such doctrine. Christian religious tradition until modern times usually taught a resurrection of the actual physical human body, though the belief in this crude form was never officially imposed. It would seem however, that Christian teaching generally insists on some degree of actual continuity between the earthly body and the "resurrection body."

Resurrectionist, one who stealthily exhumed bodies from the grave and then sold them for anatomical purposes, a practice at its height from the middle of the 18th Century to early in the 19th, and associated with the names of Burke and Hare, two Irish ruffians convicted at Edinburgh of murdering several persons for the sake of the money then acquired by selling the corpses.

Reszke, *Jean de* (properly *Jan Meczilaw*) Polish singer, born in Warsaw. He first appeared in public at Venice in 1874, and in London the same year, as a baritone, changing to tenor in 1879. He attained fame in the Wagner music-dramas. (1850-1925).

Retainer, a fee paid to secure a right professional adviser on behalf of the payer; the name is most generally used of a payment made to a barrister to ensure that his services in a case will be provided if called for. The right of retainer is the right of the executor of a will to pay any debts due to himself from the estate before the needs of other creditors are met.

Retaining Wall, in civil engineering, a wall for sustaining a bank of earth liable to a landslide. Sometimes the term is restricted to a wall supporting earth filled in after the wall has been built.

Retford, or *East Retford*, market town of Nottinghamshire, England, on the Idle, 24 m. E. by S. of Sheffield; has foundries, paper and flour mills and dye works. Pop. 14,200.

Retina, the sensory layer of the eye, on which light is focused in an image through the lens, the sense impression being passed thence to the brain.

Retort, in chemistry, a vessel in whose chamber an object is subjected to distillation (q.v.) or decomposition by heat, a neck conducting off the volatile products. The retort of the laboratory is made of glass, porcelain or platinum; is flask-shaped and has a long neck attached in which the products of distillation are condensed and from which they pass into the receiver. The retort of the gas-works is a cylinder made of iron or clay.

Retriever, the name given to a breed of dog which is a hybrid between the Newfoundland dog and the spaniel or poodle; it is employed in finding and bringing back game. The coat is generally black, but sometimes liver-coloured. There are three varieties, the flat-coated, curly-coated and Labrador.

RETORTS:

- (a) Earthenware.
- (b) Glass 18th Century.
- (c) Cast-iron for distilling Mercury.

Returning Officer, the official responsible for the arrangements made to hold a Parliamentary election. When the Speaker issues his warrants for an election, the writ, drawn up by the Clerk in Chancery, is directed to the returning officer, who is generally the Clerk of a County or Borough Council, or the university vice-chancellor. This officer receives the nominations, and the cautionary deposit of £150 from each candidate (except in university elections), announces the result, and reports it in proper form to the Speaker.

Reunion, (formerly *Ile de Bourbon*), a French island in the Indian Ocean, 420 m. E. of Madagascar, 38 m. long by 28 broad; a volcanic range intersects the island; produces sugar (chief export), rum, manioc, tapioca, spirits, etc. St. Denis, on the N. coast is the capital. It has been a French possession since 1649. Area, 970 sq. m. Pop. 198,000.

Reuss, name of two former German principalities stretching between Bavaria on the S. and Prussia on the N., now included in the German State of Thuringia.

Reuter, *Fritz*, German humorist, born at Jena took part in a movement on behalf of German unity; was arrested and condemned, after commutation of sentence of death, to thirty years' imprisonment, but was released after seven of them, in broken health; later wrote a succession of humorous poems in Low German, which placed him in the front rank of German humorists. (1816-1874).

Reuter, *Paul Julius*, Baron, the organizer of a telegraphic newspaper press service, born in Cassel; commenced at Aachen in 1849; in 1851 transferred his headquarters to London. The Press Agency so begun is now one of the world's most important news-collecting agencies. (1818-1899).

Reuters, an agency for the collection of news, for the press founded by Baron Reuter (q.v.), and now operating a service which covers the whole world, various national news agencies being affiliated to the organisation. Reuter telegrams are distributed in Great Britain by the Press Association.

Reval. See *Tallinn*.

Revelation, knowledge of God, or of the mind of man by His direct operation either on the individual soul or through an appointed intermediary.

Revelation, Book of, or the *Apocalypse*, the last book of the New Testament, differing markedly in character from the rest; it is generally supposed not to have been written by the same person as the Fourth gospel. It is largely concerned with the struggle then impending between the Christian Church and the Roman State, foreshadowing the victory of the former after a time of persecution; though in all ages it has likewise been taken by the devout as a prophecy of events to place in the last ages of the world. Predictions of the future have from time been made on the basis of *visions* based on its esoteric references.

Revels, *Master of the*, also called *Lord of Misrule*, in olden times an official attached to royal and noble households to superintend the amusements, especially at Christmas time. He was a permanent officer at the English court from Henry VIII.'s reign till George III.'s, but during the 18th Century the office was a merely nominal one.

Revelstoke, *John Baring*, second Baron, British banker, one time chairman of the Bank of England; he died in 1929 during a sitting of a committee of experts on reparations. (1863-1929).

Reverberatory Furnace, a furnace with a domed roof, from which the flames of the fire are reflected upon the vessel placed within. Such furnaces are used extensively for smelting metals.

Reverend, a title of respect given to the clergy. *Very Reverend* to deans, *Right Reverend* to bishops, and *Most Reverend* to archbishops.

Reversing Layer, a hazy cloud surrounding the photosphere of the sun; the layer is of lower temperature than the underlying layers and absorbs part of the radiation, giving rise to the dark lines in the solar spectrum.

Reversion, in biology, a tendency in an animal or plant to revert to the characters of previous generations. A supposed instance is the sudden appearance of coloured stripes on the legs and withers of asses, mules and horses. It has to a certain extent been explained by the laws of Mendelian inheritance (See *Mendellism*).

Reversion, the return of an estate to the grantor or his heirs or (as now) next of kin, after the death of any person to whom it has for a time been granted or left by will, or the interest which reverts to a landlord after the expiry of a lease.

Revival of Letters, the revival in the 15th Century of the study of classical, especially Greek, literature, largely owing to the arrival in Italy of certain learned Greeks, fugitives from Constantinople on its capture by the Turks in 1453, and promoted, by the invention of printing. See *Renaissance*.

Revivals, waves of religious enthusiasm worked up by powerful preachers. In the middle of the 18th Century the Wesley brothers and Whitefield met with great success with their open-air preaching, and subsequent revivalists have largely followed their methods. Of these Sankey and Moody, Torrey and Alexander, and since the World War Aimee McPherson and the Rev. Billy Sunday have been the most famous. They are a regular phenomenon of religious life in many parts of the United States and in Wales, though less so in England.

Revolution, a sudden change in the constitution of a country in consequence of internal revolt, particularly when a monarchy is superseded by a republic, as in France in 1789, in 1848, and 1870. The English Revolution was the transference of power from James II. to William of Orange in 1688-1689; the American Revolution that in which English rule was overthrown in 1776. Important 20th Century revolutions are the two Russian in 1917, by the first of which the Czar was overthrown, and by the second power came into the hands of the Bolsheviks; the German of 1918, which overthrew the Empire, and that of 1933 which established Nazi rule; the Italian Fascist revolution of 1922; and the Spanish revolution of 1931, in which King Alfonso XIII. was overthrown. Revolutions are of frequent occurrence in the less highly developed republics of South America.

Revolver, a pistol in which the chambers in a revolving cylinder, the firing of a shot causing the cylinder to rotate in readiness for the next. See *Pistol*.

Revue, a form of musical entertainment in a series of single scenes without connected plot, in which topical events and personalities play a prominent part; popular in Britain in the post-war years.

Rewa, native state in Central India, largely under forest, with valuable coal deposits. Area, 13,000 sq. m. Pop. 197,000. The capital, of the same name, has a pop. of c. 8,000.

Reykjavik, capital of Iceland, situated on the SW. coast; there is a cathedral and university; fish and skins are exported. Pop. 35,000.

Reynard the Fox, Middle Ages in which animals represent men. The principal characters are Isengrim the wolf and Reynard the fox, the former representing strength incarnated in the baron and the latter representing cunning incarnated in the Church, and the strife for ascendancy between the two, one in which, though frequently hard pressed, the latter gets the advantage in the end. There are versions in most Western European languages, including Latin, German, French and English.

Reynolds, Sir Joshua, chief of English portrait-painters, born at Plympton, Devon; went to London in 1740 to study art, and remained three years; visited Italy in 1749, lost his hearing, and settled in London in 1752, where he began to paint portraits, having as the subjects of his art the most distinguished people. He is said to have been responsible for over 2,000 portraits, of which that of Mrs. Siddons at Dulwich, London, is perhaps the best. He numbered among his friends all the literary notabilities of the day. He became in 1768 the first President of the Royal Academy, and delivered a succession of discourses to the students on the principles and practice of painting, 15 of which have been published. (1723-1792).

REYNOLDS

Rhabdomancy, a species of divination by means of a hazel rod to trace the presence of minerals or metals under ground. See *Divining Rod*.

Rhadamanthus, in Greek mythology, a son of Zeus and Europa, and a brother of Minos (q.v.); was after his death appointed one of the judges of the dead in the nether world along with Aeacus and Minos.

Rhætian Alps, the section of the N. of the Italian province of Lombardy; the highest peak being the Piz Bernina (13,300 ft.) and the chief pass the Splügen (6,950 ft.).

Rhapsodists, a class of minstrels who in early times wandered over the Greek cities reciting the poems of Homer, and through whom the latter became widely known and came to be translated with such completeness.

Rhatany (*Krameria triandra*), a leguminous Peruvian plant with an astringent root, used in medicine as a gargle and as a haemostatic.

Rhea, a family of flightless birds, found in S. America, akin to the ostriches of Africa and Arabia, and often called the South American ostrich.

It is smaller than the African ostrich, has three toes, and the neck and head are completely feathered. The tail is undeveloped and long feathers droop over the hinder part of the body. There are three species ranging from N.E. Brazil to the S. of the continent and found on prairie and pampas lands.

Rhea, in Greek mythology, a goddess, the daughter of Uranus and Gaia, the wife of Kronos, and mother of the chief

RHEA.

Olympian deities, Zeus, Pluto, Poseidon, Hera, Demeter, and Hestia. She was identified by the Greeks of Asia Minor with the great earth goddess Cybele.

Rhea Silvia, a vestal virgin, the mother of the twins Romulus and Remus, whom she bore to Mars, the god of war, who had violated her.

Rheims. See Reims.

Rhenish Wines, wines made from grapes grown in the Rhineland area, including the Moselle country; the better kinds are white, but red wines are also produced. Hock and Moselle are the most famous varieties.

Rhenium, a metallic chemical element related to manganese; Symbol Re; atomic number 75; atomic weight 186.31. It occurs in traces of many minerals, but is mostly extracted from molybdenite; the metal is also obtained as a by-product in the extraction of copper from certain ores. It has no important industrial uses.

Rheostat, a variable resistance placed in an electrical circuit to regulate the current flowing through it.

Rhesus, an Indian monkey of the Macaque genus, of small size, reddish-brown in colour with bright-red buttocks; extremely intelligent and frequently tamed. It is looked upon as a sacred animal by the Hindus and frequents the neighbourhood of temples.

Rhetoric, the science or art of persuasion, suasive or effective speech, written as well as spoken, which, both in theory and practice, was cultivated to great perfection among the ancient Greeks and Romans, and to some extent in the Middle Ages and later, but is much less cultivated either as a science or an art to-day.

Rheumatic Fever, an acute form (q.v.). The symptoms vary somewhat between adults and children. In adults there are moderate febrile symptoms and the temperature rises, though not necessarily above 102°. The most painful symptom is the inflammation of the joints, which, beginning with one joint, spreads to others. In children, the pain may tend to be localised in certain muscles and there is no acrid perspiration, as may be the case in adults. The cause is unknown, though a micro-organism of some kind is no doubt the infective agent; hereditary predisposition also plays a part. It is not seldom a sequel to scarlet fever. In children, recurrent attacks may lead to most serious complications, especially mitral valvular disease of the heart. One immediate concomitant may be chorea, or St. Vitus' dance.

Rheumatism, a group of diseases symptoms, among them chronic rheumatism, rheumatic gout, rheumatic fever, lumbago, rheumatoid arthritis, sciatica, and gout, involving sharp pains and swelling in muscles and joints. The joints most often attacked in chronic rheumatism are the knees, ankles, hips and shoulders. The complaint is aggravated by changes in weather and temperature. The pain is sometimes worse at night, but more frequently it is worse in the day, and on exposure to wet and cold.

Rheumatoid arthritis or rheumatic gout has probably little connection with rheumatism. It is a chronic complaint often mistaken for gout, and frequently attacks the hands, so as to incapacitate the patient from exertion. See also Lumbago; Rheumatic Fever; Sciatica.

Rheydt, manufacturing town of the Rhineland, Rhineland, Germany, 2½ m. SE. of Gladbach, chiefly engaged in the textile industry. There are also breweries and distilleries. Pop. 77,000.

Rhine, one of the chief rivers of Europe; of several small Alpine head-streams, the Neaar and the Farther Rhine are the two principal, issuing from the eastern flanks of Mt. St. Gothard; they join at Reichenau, whence the united stream—the per Rhine—flows N. to Lake Constance, and issuing from the NW. corner curves westward to Basel, forming the boundary between Switzerland and Germany. From Basel, as the Middle Rhine, it pursues a northerly course to Mainz, turns sharply to the W. as far as Bingen, and again resumes its northward course. The Rhine-Highland between Bingen and Bonn is the most romantic and picturesque part of its course. As the Lower Rhine it flows in a sluggish, winding stream through the Rhenish Lowlands, enters Holland near Cleves, at Nimuegen bends to the W., and flowing through Holland some 100 m. reaches the North Sea, splitting in its lowest part into several streams which form a rich delta, one-third of Holland. It is 770 m. in length; receives numerous affluents, e.g., Neckar, Main, Moselle, Lippe; is navigable for ships to Mannheim.

Rhine, Occupation of the. Under the terms of the Treaty of Versailles the territory on the left of the Rhine was to be occupied by Allied troops for 15 years from 1919, prior to which evacuation would be gradual. British, American, French, and Belgian troops were all represented; America withdrew in 1920; Britain remained at Cologne till 1925, when headquarters was transferred to Wiesbaden; in 1929 all British troops were withdrawn, and by 1930 total evacuation was effected.

Rhineland, also known as Rhine Province or Rhenish Prussia, a prov. of W. Prussia, Germany, adjoining Holland, Belgium and Luxembourg. It is watered by the Rhine and the Moselle, is mountainous, except in the N., and has many forests. The vine flourishes in the S., and cereals, flax, hops and tobacco are also grown. It contains the Ruhr coalfields, and many other minerals are worked. Industries include the making of iron and steel, chemicals, silks, and cottons. Coblenz is the capital, and among other important towns are Cologne, Essen, Duisburg-Hamborn, Wuppertal, Düsseldorf, Bonn and Aachen, where are mineral springs. Area, 9,250 sq. m. Pop. 7,632,000.

Rhinitis, inflammation of the nose, especially of the mucous membrane of the nostrils. Acute rhinitis is merely the common cold or hay fever, but it may also be caused by some gaseous or other irritant.

Rhinoceros, the largest and most powerful terrestrial mammal, except the elephant, to which it is allied; usually harmless, but fierce when provoked, and, though clumsy, can run at a great speed. It has a very thick skin, which is raised into strong definitely arranged folds; very large, pointed lateral incisor, and a single nasal

RHINOCEROS

horn, except in a two-horned Malaccan species. It is found in the East Indian islands, Northern India and Africa.

Rhode Island, the smallest but most densely populated of the United States, and one of the original 13; faces the Atlantic between Connecticut (W.) and Massachusetts (N. and E.); is split into two portions by Narragansett Bay (30 m. long); hilly in the N., but elsewhere level; enjoys a mild and equable climate, and is greatly resorted to by invalids from the E.; the soil is rather poor, and manufacturing

form the stable industry; coal, iron and limestone are found. Providence (the capital), Pawtucket, and Woonsocket are the chief towns. Area, 1,300 sq. m. Pop. 687,500.

Rhodes, or **Rhodes**, an island in the Mediterranean, 12 m. distant from the SW. coast of Asia Minor; area 49 m. by 21 m.; mountainous and woody; has a fine climate and a fertile soil, which produces grapes and other fruit in abundance, also some grain; its population is mostly Greek; sponges, carpets, and wines are the chief exports. It figures considerably in ancient history; was occupied by the Knights Hospitallers of St. John for more than two centuries, and was taken from them by the Turks in 1523; since 1923 it has been an Italian possession and naval station. Area, 540 sq. m. Pop. 62,000 (town, 27,500).

Rhodes, **Cecil John**, British imperial statesman, born at Bishops

Stortford; went to South Africa and amassed a large fortune from the diamond mines at Kimberley, entered the Cape Parliament, and became Prime Minister in 1890. He was active and successful in extending the British territories in South Africa, aiming at destroying race prejudice, and at establishing among the different colonies a federated union. He resigned in 1896 after the Jameson Raid but acting as a private individual he quelled a Matabele revolt and in the Boer War fought at Kimberley. On his death the bulk of his fortune was left to found the Rhodes Scholarships for British, American and German students at Oxford. (1853-1902).

CECIL RHODES

Rhodesia, name of two British colonies in central South Africa, between Lake Tanganyika and the Congo and the R. Limpopo; divided by the R. Zambesi into (1) **Southern Rhodesia**, a self-governing colony since 1923, comprising the two areas of Matabeleland and Mashonaland. Stock is raised, maize, tobacco and fruit, especially citrus fruits, grown, and there are valuable gold mines, while coal, asbestos, chrome ore and other minerals are worked. The capital is Salisbury (Pop. 33,000, including 11,400 Europeans); other towns are Bulawayo (29,000), Umtali and Gwelo. Area, 150,350 sq. m. Pop. 1,304,000 (55,500 Europeans).

(2) **Northern Rhodesia**, administered as a Crown colony. It grows maize, tobacco, coffee, etc., and has large deposits of copper, zinc, and other metals. Its capital is Lusaka; other towns are Livingstone and Broken Hill. Area, 290,300 sq. m. Pop. 1,376,000 (10,000 whites). There is a movement for the amalgamation of the two Rhodesias with a view to their eventual development into a self-governing Dominion, and in 1938 a British Commission of enquiry was investigating the problem.

Rhodium, a metallic chemical element related to ruthenium and palladium; it occurs in small quantities in the ores of platinum, osmium and iridium; Symbol Rh; atomic number 45; atomic weight 102.91. It is a bluish-white, lustrous metal, whose salts possess a rosy-red colour. It is used as an ingredient of various alloys, and particularly for "rhodanizing," or electroplating silver articles to render them completely untarnishable.

Rhododendron, a genus of evergreen of the order Ericaceae, of which some 250 species have been identified. They are native to both hemispheres, including N. America,

but the Asiatic (especially S. China and Himalayan) representatives are especially numerous. The first introduced to England was *Rhododendron ponticum* in the 18th Century and from this a whole series of cultivated garden varieties have been derived. Other species have since been introduced. The Azaleas are now assigned to the same genus of Ericaceae.

Rhodope, mountain range in Bulgaria, an offshoot of the Balkan system, between Macedonia and Thrace; the range attains a height of over 9,600 ft.

Rhombus, a quadrilateral with all its sides equal but with oblique angles; its diagonals bisect one another at right angles.

Rhondda, **David Alfred Thomas**, first industrialist and politician, one of the largest of Welsh coalowners; he entered the House of Commons as a Liberal in 1888, was President of the Local Government Board in 1916, and Food Controller in 1917; he was raised to the peerage in 1917. (1856-1918). On his death the title descended to his daughter **Margaret Haig** (b. 1883), author of a life of her father, an autobiography, *This was my World*, and other works. (1883-).

Rhondda, urban district of Glamorgan-shire, Wales, in the valley of the Rhondda, the centre of the S. Wales coalfield; a thickly populated area which has suffered much from the economic depression of 1931 and later. Pop. 129,900.

Rhône, one of the four great rivers of France, rises on Mount St. Gothard, in the Swiss Alps; passes through the Lake of Geneva, and flowing in a south-westerly course to Lyons, is there joined by its chief affluent, the Saône; thence it flows due S.; at Arles it divides into two streams, which form a rich delta before entering the Gulf of Lions, in the Mediterranean; length, 504 m.; navigable to Lyons, but the rapid current and shifting sandbanks greatly impede traffic.

Rhône, a dept. of France lying wholly within the western side of the Saône and Rhône basin, hilly and fruitful; wine is produced in large quantities; industries are mainly textile (especially silk); there is some metal and coal mining; capital, Lyons. Area, 1,100 sq. m. Pop. 1,028,000.

Rhubarb (*Rheum officinale* and *Rheum rhaponticum*), two species of cultivated plants of the order Polygonaceae. The leaf-stalks of *Rheum rhaponticum*, a tall coarse herb with large leaves, are used for food. The root of *Rheum officinale*, is used as a purgative drug, and is frequently known as Turkey rhubarb.

Rhumb Line, a circle

earth's surface making a given angle with all meridians which it crosses; applied in navigation to the track of a ship keeping to a constant course by compass.

Rhyl, watering-place of Flintshire, North Wales, situated on the coast at the mouth of the Clwyd, 16 m. E. of Conway; has a fine promenade, pier, esplanade, gardens, etc. Pop. 13,500.

Rhyme, a device used in poetry in English and many other languages; it consists in so arranging the words which end metrical lines that resemblances of sound occur between them at stated intervals according to fixed rules. Rhyme was not used by the poets of the classical world, but begins to be traced about the 4th Century B.C. A rhyme in the first syllable only (make, shake) is a male rhyme: one

extending over an accented and the following unaccented syllables (ponderer, wanderer), a female rhyme.

Rhymer, *Thomas the*, or *True Thomas*, *Thomas*, Erddidonne, a Berwickshire notability of the 13th Century, famous for his rhyming prophecies, who was said, in return for his prophetic gift, to have sold himself to the fairies; he is the hero of a well-known ballad.

Rhymney, a Welsh river, rising in Brecon, and for part of its SE. course of 30 m. forming the boundary between Monmouthshire and Glamorganshire. On the Monmouthshire bank is the town of the same name, with steel works and coal mines. Pop. 10,500.

Rhys, *Ernest*, British author and man of letters; born in London; general editor of the series of reprints of classical English works, the *Camelot Classics* and *Everyman's Library*; author of several volumes of verse, including *Lays of the Round Table*, and an autobiography, *Everyman Remembers*. (1859-).

Rhythm, the regular or measured flow of sound, as in music, poetry, or some kinds of prose, or in action, as in dancing. The measures of rhythm are the bar, in music, or the foot, in verse, and the rhythmical arrangement depends on the varying degrees of accent or stress to which these are subject, and the pattern formed by the periodical recurrence of similar bars or feet.

Ribbentrop, *Joachim von*, German politician and diplomat; by profession a wine merchant; a close friend of Hitler, who in 1935 appointed him Ambassador for the Reich on various special missions; from 1936 to 1937 German Ambassador in London and subsequently German Foreign Minister. (1893-).

Ribble, English river, rising in the Pennines, in Yorkshire, and flowing W. through Yorkshire and Lancashire to the Irish Sea at Southport. Preston is the chief town on its course of 75 m.

Ribbon, a narrow piece of cotton or silk, used as a trimming or fastening for dress; military and civil medals are worn suspended from pieces of ribbon (riband) of distinctive colouring, and these are worn alone on occasions of less ceremony as an indication of the wearer's possession of the medal. Ribbon-weaving is an important industry of Coventry (England), Saint-Etienne (France), and other towns.

Ribbon Development Act, a far-reaching Act, passed in 1935, directed towards preserving the amenities of roads, by checking "ribbon" building development and securing greater road safety. It gives power to local authorities to "sterilise" areas by the sides of roads, their width varying with local conditions, so that it is thereafter unlawful, without the consent of the local authority, to plant buildings along or to make new means of access to such roads.

Ribbon Fish, any of certain species of elongated, greatly compressed, deep-sea fishes, so named from their shape, among them the so-called "King of the herrings" (*Regalecus glesne*). Some six species have been found round British shores including the Scabbard Fish, the Silvery Hairtail, Hawkin's Gymnetrus and the Red Band Fish, though as a rule they are only found floating dead on the surface. Some species can reach up to 20 ft. long.

Ribera, *Jusepe*, a Spanish painter and etcher, known as *Lo Spagnoletto*, born near Valencia; remarkable for the gruesome realism of his paintings, which were mainly religious in subject-matter. (1588-1656).

Ribs, arched and very elastic bones from the vertebral column, forming the lateral walls of the thorax, normally twelve in number on each side, though sometimes a small additional rib is present. The first seven pairs of sternal ribs are affixed to costal cartilages, uniting them to the sternum; the three upper asternal ribs are joined by their cartilages to the ribs above them; the two lower, being unattached, are called floating ribs. The ribs protect the lungs from injury and serve to enlarge the chest for breathing.

Ricardo, *David*, English political economist, born in London of Jewish parentage; realized a large fortune as a member of the Stock Exchange; wrote on political economy from a mercantile standpoint, especially on taxation and currency, and was the first to enunciate clearly the quantity theory of money. (1772-1823).

Ricci, *Matteo*, founder of the Jesuit mission in China, born at Macerata, Italy; reached China in 1582, and initiated the policy of accommodation to Chinese manners and customs. (1552-1610).

Rice, an annual grass plant (*Oryza sativa*) bearing panicles of grain, each grain being enclosed in a separate husk. The original wild plant is supposed to be a native of the warmer parts of Asia, and from it have been derived many cultivated varieties, the majority adapted for lowland and marshy lands, and others, called hill rice, for growth on any land. By far the greater part of the enormous crop is grown on level stretches of land which are submerged in water by rainfall or by irrigation. The rice in the husk (paddy or *padi*) is threshed when ripe, and before consumption must be hulled, so that the husk may be removed. Polishing, though it improves the appearance and is supposed to preserve it from deterioration, is harmful, as it removes the bran and the germ, and so renders the consumer whose rice is the main diet liable to beri-beri. It is grown throughout the Far East, the Mediterranean countries (especially Egypt), the U.S.A., and Brazil.

Rice, *Elmer*, American dramatist, born at New York; among his best known works are *The Adding Machine* (1923), *See Naples and Die* (1929), *Judgment Day* (1934). (1892-).

Rice, *James*, English novelist, born at Northampton, intended for the law, but took to literature; best known as the successful collaborator of Walter Besant (*q.v.*) in such novels as *The Golden Butterfly* and *Ready-Money Mortiboy*; also wrote a history of horse-racing. (1843-1882).

Ricepaper, so named from its supposed made from the pith of *Tetrapanax papyriferum*, a wild Formosan plant of the order Araliaceae. It is used for drawing and painting in China.

Richard I. (surnamed *Cœur de Lion*), King of England from 1189 to 1199, second son and successor of Henry II. His early years were spent in Poitou and Aquitaine, where he engaged in quarrels with his father. After his accession to the throne he flung himself with characteristic ardour into the Crusade movement. In 1190 joined his forces with Philip Augustus of France in the third crusade; upheld the claims of Tancred in Sicily; captured Cyprus, and won great renown in the Holy Land, particularly by his defeat of Saladin; was captured after shipwreck on the coast on his way home by the Archduke of Austria, and handed over to the Emperor Henry VI. (1193); was ransomed at a heavy price by his subjects, and landed in England in 1194. His later years were spent in his French possessions warring against Philip, and he died of an arrow wound at the siege of Chalus. Not more than a year of his life was spent in England. (1157-1199).

Richard II., King of England from 1377 to 1399, son of the Black Prince, born in Bordeaux; succeeded his grandfather, Edward III. During his minority till 1389 the kingdom was administered by a council. In 1381 the Peasants' Revolt broke out, headed by Wat Tyler, as a result of the discontent occasioned by the Statutes of Labour passed in the previous reign, and more immediately by the heavy taxation made necessary by the expense of the Hundred Years' War still going on with France. A corrupt church called forth the energetic protests of Wycliffe, which started the Lollard (q.v.) movement; an invasion of Scotland (1385), resulting in the capture of Edinburgh, was headed by the young king. Coming under French influence, and adopting despotic measures in the later years of his reign, Richard estranged all sections of his people. A rising headed by Henry of Lancaster forced his abdication, and he was imprisoned for life in Pontefract Castle, where he died (probably murdered) soon after. (1367-1400).

RICHARD II.

Richard III., King of England from 1483 to 1485, youngest brother of Edward IV., and last of the Plantagenets, born in Fotheringhay Castle; in 1461 was created Duke of Gloucester by his brother for assisting him to win the crown; faithfully supported Edward against Lancastrian attacks; married (1473) Anne, daughter of Warwick, the King-maker; early in 1483 was appointed Protector of the kingdom and guardian of his young nephew, Edward V.; put to death nobles who stood in the way of his ambitious schemes for the throne. Doubts were cast upon the legitimacy of the young king, and Richard's right to the throne was asserted. In July, 1483, he assumed the kingly office; almost certainly instigated the murder of Edward and his little brother in the Tower; ruled firmly and well, but without the confidence of the nation. In 1485 Henry, Earl of Richmond, head of the House of Lancaster, invaded England, and at the battle of Bosworth Richard was defeated and slain. (1452-1485).

Richardia, an alternative name for the African arum lilies, comprising 10 species, of which the chief cultivated in Britain is the *Z. Africana*.

Richards, Gordon, jockey; born at Oakengates, Shropshire, son of a miner; began life as a clerk. He rode his first mount in 1920. He headed the list of winning jockeys every year from 1925 to 1938 inclusive, except in 1926 and 1930, and in 1933 broke Fred Archer's previous record by riding 250 winning horses. (1904-).

Richards, Theodore William, American scientist, born at Germantown; professor at Harvard. His greatest work was the careful revision of the atomic weights of the elements, for which he received a Nobel Prize in 1914. He also carried out work on problems connected with the structure of the atom. (1868-1928).

Richardson, Owen Williams, British physicist, professor at Princeton, U.S.A., and King's College, London, and Yarrow professor of the Royal Society; carried out much research and has written several books on the emission of electricity from hot bodies and the electron theory of matter and on Molecular Hydrogen and its spectrum; awarded the Nobel Prize for physics in 1928. (1879-).

Richardson, Samuel, English novelist; starting life as a printer, he became Master of the Stationers Company in 1754, and King's Printer in 1761; published his first novel, *Pamela* in 1740, his masterpiece *Clarissa*, written in the form of letters, in 1748, and *Sir Charles Grandison* in 1753; all three novels of sentiment, they mark the beginning of the development of psychological fiction in England. (1689-1781).

Richborough, village in Kent, England, where there are important Roman remains; converted in 1916 into a "mystery port," from which a train ferry ran to France.

Richelieu, Armand Jean Duplessis, Duke and Cardinal de, born in Paris; was minister of Louis XIII and

CARDINAL RICHELIEU

one of the greatest statesmen France ever had. From his installation as Prime Minister in 1624 he set himself to the achievement of a threefold purpose, the ruin of the Protestants as a political party, the curtailment of the power of the nobles, and the humiliation of the House of Austria in the councils of Europe. His administration was marked by reforms in finance, in the army, and in legislation. He commanded in person at the siege of La Rochelle in 1628. He was a patron of letters, and the founder of the French Academy, and left important Memoirs. (1585-1642).

Richmond, (1) borough in Yorkshire, England, on the Swale, 49 m. NW. of York; has a fine 11th Century castle, now partly utilized as barracks, remains of a Franciscan monastery, a race-course, etc. Pop. 17,900. (2) A town in Surrey, England, 9 m. W. of London; picturesquely situated on the summit and slope of Richmond Hill and the right bank of the Thames; has remains of the royal palace of Sheen, a magnificent deer park and a handsome river bridge; has many literary and historical associations. Pop. 38,300. (3) Capital of Virginia, U.S.A.; has a hilly and picturesque site on the James R., 116 m. S. of Washington; possesses large docks, and is a busy port, a manufacturing town (tobacco, iron-works, flour and paper mills), and is seat of two Baptist universities, white and coloured. As the Confederate capital it was the scene of a memorable year-long siege during the Civil War, ultimately falling into the hands of Grant and Sheridan in 1865. Pop. 183,000.

Richmond, Sir William Blake, British painter. Born in London, and studying at the Royal Academy, he achieved reputation as a painter of portraits and historical subjects, and did the mosaics inside St. Paul's dome; he is renowned for his pictures of children. He was a Slade Professor at Oxford, an A.R.A. in 1888, an R.A. in 1895, and two years later was knighted. (1842-1921).

Richter, Hans, Hungarian musical conductor; born at Győr. He conducted the Hungarian national opera at Budapest, 1871; and opera at Vienna from 1875 to 1900. From 1897 he acted as conductor of the Manchester Symphony Orchestra, frequently conducting Wagner in London. (1843-1916).

Richter, Johann Paul Friedrich, usually German humorist, called simply Jean Paul, German humorist, born at Wundstede, near Bayreuth, in Bavaria; had a scanty education,

but his fine faculties and unwearied diligence supplied every defect. His writings procured him friends and fame, and at length he settled down in Bayreuth, where he died. His works are numerous, and the chief are novels, *Hesperus* and his masterpiece, *Titan*, being the longest and the best. (1763-1825).

Richthofen, *Maurice*, Baron Von, German, man aviator, who became the most famous of German air fighters in the World War; between 1917 and 1918 he brought down over 80 Allied machines and was himself shot down behind the British lines in April, 1918. In his honour Richthofen squadrons have been formed in the regenerated post-war German air-force. (1888-1918).

Rickets, or *Rachitis*, an infantile disease marked by incomplete development of the bones and impaired digestion. It is caused by faulty diet, consequent vitamin deficiency, and want of light and air. The bones become softened, and enlargements are formed about the joints or ends of the bones, particularly in the ankles, junction of the ribs with the costal cartilages, wrists, and toes.

Ricketts, *Charles*, English painter, sculptor, and wood-engraver; born at Geneva; son of an English marine painter and a French mother. With Charles Shannon, he edited the *Dial*, 1889-97; the Vale Press was founded by him in 1896. His chief pictures in public galleries are "Death of Don Juan," Tate Gallery; "The Plague," Luxembourg; "Montezuma," Manchester. R.A., 1928. (1866-1931).

Rickshaw (*Jiriksha*), a light two-wheeled hooded vehicle on springs, drawn by one man, who runs between the shafts. They are very widely used in Japan, and in the Far East generally, and are supposed to have been invented by an American missionary.

Riddell, *George Allardice*, Riddell, paper proprietor; born at Duns, Scotland. A London solicitor from 1888 to 1903, he bought up provincial newspapers, and later the London weekly, *News of the World*. During the World War, he was one of the links between the Government and the Press. Ennobled, 1920. Published, amongst other works, *A War Diary*, 1933-4. (1865-1934).

Riddle, a puzzle in the form of a question, the answer to which is obvious only when the sense of the terms used in putting the question is understood. The most famous example is the Riddle of the Sphinx regarding the animal which walks on four legs when young, two when adult, and three in old age—the answer being man.

Rideau, river of Ontario, Canada, rising mainly N. to Lake Rideau and flowing mainly N. to the Ottawa R. at Ottawa. The Rideau canal, by way of river and lake, connects Ottawa with Kingston on Lake Ontario.

Ridley, *Nicolas*, English bishop and martyr, born in Northumberland. Fellow and ultimately Master of Pembroke College, Cambridge; on a visit to the Continent fell in with certain of the Reformers and returned convinced of the Protestant faith; became king's chaplain, bishop of Rochester, and finally of London; favoured the cause of Lady Jane Grey against Mary, who committed him to the Tower, and being condemned as a heretic was at Oxford burnt at the stake with Latimer. (c. 1500-1555).

Riel, *Louis*, Canadian rebel; headed the half-breeds in the North-West in the Red River rebellion of 1869-1870, which was suppressed by Sir Garnet (afterwards Lord) Wolseley; led a second rebellion in 1885, and established a government in Manitoba but when the rebellion was crushed, he was captured and executed. (1844-1885).

Rienzi, *Cola di*, Roman tribune, born in the city, of humble origin; gave himself to the study of the ancient history of the city, became inspired with an ambition to restore its ancient glory, and with Papal sanction persuaded his fellow-citizens to rise against the tyranny of the nobles, in which he at length was successful; but his own rule became intolerable, and he was assassinated seven years after beginning his political career; his life suggested the romance of the name by Bulwer-Lytton. (c. 1313-1354).

Riesengebirge, (c., Giant Mts.) a range of mountains in Czechoslovakia and German Silesia; Schneekoppe (5,260 ft.) is the highest peak; a favourite German summer resort.

Rievaulx, village of Yorkshire, England, in the N. Riding, famous for its 12th Century abbey, whose beautiful ruins still stand.

Rif, the name given to the N. coast-lands of Morocco from Tangier to Algeria; is a mountainous and woody region, with a rugged foreshore inhabited by Berber tribes, who are kept subject with difficulty to the authority of the French and Spanish governments, and are concerned in repeated revolts.

Rifle, a gun whose barrel is grooved so that the projectile may have a rotatory motion on its own axis. In the British army the old smooth-bore musket was superseded by the rifle in the first half of the 19th Century. The

ARMY RIFLE

rifle used by the army to-day is the Short Magazine Lee-Enfield, Mark III, a rifle loaded by breech-bolt action. See *Lee-Enfield*. The rifled shotgun for sport is rifled for the last few inches of its length, but the choke-bore is considered the better weapon. Large bore rifles are used only for hunting large and dangerous game.

Riga, seaport and capital of Latvia, on the Dvina, 7 m. from its entrance into the Gulf of Riga; has some fine medieval buildings, and a university; a busy and growing commercial and manufacturing town, exporting grain, timber, flax, linseed, and wool; cotton, glass, etc., are manufactured. It was captured by the Germans from Russia in 1917 after a previous unsuccessful attempt, and German troops remained in occupation until 1919 as a bulwark against Russia. Pop. 385,000.

Riga, *Gulf of*, an inlet in the N.E. of the Baltic, between Latvia, Estonia, and the Estonian islands Hiiumaa and Saaremaa, about 80 m. long by 100 m. broad.

Right, in politics, a general expression for those parties or elements in the state which are Conservative in tendency and opposed to innovation and revolution, generally representing the property-holding classes. The name arose from the fact that in the French National Assembly of 1789 the more moderate elements happened to be seated at the right side of the Chamber.

Right Ascension, the name given what corresponds to longitude in geography; it is measured round the celestial equator from the "first point of Aries" in hours and minutes. The right ascension of a star is the sidereal time at which it crosses the meridian.

Right of Way, a right of an individual or body of persons to pass over another person's lands. It is an easement (q.v.) and in the nature of a privilege or convenience and not a profit. It may be acquired by 20 years' uninterrupted user (prescription), by custom, by grant, or by "necessity" i.e., a conveyance of land must carry with it a right of access to the land; and it may be lost by release, or by non-user for 20 years (or less, if the intention be clear).

Rights, Declaration of, a declaration of the fundamental principles of the constitution drawn up by the Parliament of England and submitted to William and Mary on their being called to the throne, and afterwards enacted in Parliament when they became King and Queen. It secures their rights to the people as freeborn citizens and to the Commons as their representatives, while it binds the sovereign to respect these rights as sacred.

Right Whale (*Balaena*), the largest of the whalebone whales, reaching a length of 60 to 70 ft. The Greenland species (*Balaena mysticetus*), which sometimes reaches a length of 60 to 70 ft., has the lower jaw and tail marked with white; it is rapidly approaching extinction. There are several other species, including the Black Right Whales (*Balaena australis* and others) found in Northern and Southern temperate seas.

Rigi, an isolated mountain, 5,900 ft. high, in the Swiss canton of Schwyz, with a superb view from the summit; two toothed railways ascend it with a gradient of 1 ft. in 4.

Rigidity, in physics, resistance to change of form. A system of four forces acting tangentially to four faces of a rectangular block of solid material can alter the shape of the block without altering its bulk; the ratio of the force per unit area to the angular deformation of the block in the plane of the forces is then known as the rigidity of the material. The rigidity remains constant under increasing forces until a definite yield-point is reached.

Rigor, an attack of cold and shivering, accompanied by a rise of temperature, a condition often found at the onset of fevers. The stiffening of the muscles of a dead body which sets in several hours after death and lasts for three or four days is called *rigor mortis*, and is due to the coagulation of the proteins in the body.

Rigveda, the earliest and most important of the four Vedas (*g.v.*), including the body of the hymns or verses of invocation and praises.

Rimini, a walled city of N. Italy, of R. Marecchia, spanned by a fine Roman bridge close to its entrance into the Adriatic, 6½ m. SE. of Bologna; has a 15th-century Renaissance cathedral, an ancient castle, and other medieval buildings, and a Roman triumphal arch; manufactures silks and sail-cloth. Pop. 68,000.

Rimmon, a Syrian god mentioned in the Old Testament who had a temple at Damascus.

Rimsky-Korsakov, *Nicolai Andreyevich*, Russian composer; born at Tikhvin; while at St. Petersburg Military Academy he studied under Balakirev. His first symphony was produced at St. Petersburg, 1865; he was a professor at the Conservatoire there from 1871 till his death. He composed 13 operas, and re-orchestrated Mussorgsky's *Boris Godunov*. (1844-1908).

Rinderpest, or Cattle Plague, a fever of a malignant and contagious type, affecting cattle and other ruminants, usually fatal; it has not occurred in Britain during the last 50 years.

Ringbone, a hard, callous substance of the little pastern of a horse, just above the coronet; it sometimes goes quite round like a ring. It is due to injury or cold.

Ring Dove, or Wood Pigeon (*Columba palumbus*), a species of pigeon or dove, whose neck is surrounded by a ring-shaped mark; it occurs abundantly in the British Isles, causing much damage to green crops.

Ring Money, an early type of money, consisting of metal rings, known to have been used by the ancient Egyptians, among whom solid gold rings of a certain size and weight passed current as money. The early Britons and the Gauls also used ring money, and its use persisted even into the Middle Ages.

Ring-Ouzel (*Turdus torquatus*), a brownish-black plumaged

bird with a broad white patch on the throat, which nests in heather or on rough banks in moorland country. It belongs to the thrush family, and is a summer visitor to the British Isles and Europe generally.

Ring-Tailed

Eagle, the young **RING-OUZEL**, which is given this name for its tail being striped in its first two years.

Ringwood, market town in Hampshire, shire, England, in the Ringwood and Fordingbridge rural district, 8 m. NE. of Bournemouth; there are breweries and glove manufactures, and it is a tourist centre for the New Forest. Pop. 5,000.

Ringworm, a skin-surface disease, caused by a fungoid parasite. It is very contagious and causes some inflammation, but though children contracting it are often of poor constitution, it has no marked effect on the general health. Ringworm of the scalp, which leaves circular bare patches, may last a long while, but ringworm of the body is easily cured.

Rio de Janeiro, capital, federal seaport of Brazil, and after Buenos Aires largest city of South America, situated on the E. coast on the W. shore of a spacious and beautiful bay, 15 m. long, one of the finest natural harbours in the world; stretches some 10 m. along the seaside, and is hemmed in by richly clad hills; there is a university, national library, and museum, and many fine public buildings; has extensive docks; coffee, sugar and hides are the chief exports; manufactures cotton, flour, rubber, tobacco, etc. Pop. 1,711,000. The state of the same name (capital, Niteroy) has an area of 26,600 sq. m. and a pop. of 1,559,000.

Rio de la Plata, or River Plate, the estuary of the Uruguay and Paraná rivers, on the E. coast of South America, between Uruguay and Argentina. It is 145 m. wide at its mouth and extends inland for about 200 m., but is shallow and is gradually silting up. It is estimated that it receives the waters of about 1,200,000 sq. m. of land, and its muddy colour can be distinguished 70 to 80 m. out at sea. Montevideo stands on its left bank, Buenos Aires on its right.

Rio de Oro, Spanish colony of NW. Africa, S. of Morocco. It is mainly desert. Fishing is the chief industry. It is administered by the Governor of the Canary Is., and the capital is Villa Cisneros. Area (with Adrar), 109,200 sq. m. Pop. (white), c. 800.

Rio Grande (known also as *Rio Bravo del Norte*), river of North America, rises in the San Juan Mts. in Colorado; flows SE. through New Mexico, then divides Texas from Mexico, and enters the Gulf of Mexico after a course of 1,800 m.; is navigable for steamboats some 500 m.; chief tributary, Rio Pecos.

Rio Grande do Norte, a maritime state in the NE. corner of Brazil, called

after the Rio Grande, which flows N.E. and enters the Atlantic at Natal, the capital of the State. Area, 22,190 sq. m. Pop. 537,000.

Rio Grande do Sul, the southernmost state in Brazil, lies N. of Uruguay, fronting the Atlantic; capital, Porto Alegre. Area, 112,280 sq. m. Pop. 2,182,000.

Rio Grande do Sul, city of Brazil, in the state and on the river of the same name. It exports hides, preserved meat, wool, tallow, and Paraguay tea. Pop. 41,000.

Rioja, a province of W. Argentina, embraces some of the most fruitful valleys of the Andes, which grow cereals, vines, cotton, etc.; some mining in copper, silver, and gold is done. The capital, Rioja, is in a vine and orange district at the base of the Sierra Velasco, 350 m. N.W. of Cordoba. Area, 33,400 sq. m. Pop. 79,800.

Rio Negro, One of the larger tributaries of the Amazon, rises as the Guainia in S.E. Colombia; crosses Venezuela and Brazil in a more or less S.E. direction, and joins the Amazon (the Marañon here) near Manaus after a course of 1,350 m.; some of its tributaries connect the Orinoco with the Amazon.

Riot, peace by a tumult or disturbance of the English criminal law as constituted by a meeting of three or more persons assisting each other in some lawful or unlawful private enterprise and carrying out their object in a violent and tumultuous manner. It is a felony punishable by fine and imprisonment. Under the Riot Act, 1715, any unlawful assemblage of twelve or more persons can be commanded by proclamation (reading the Riot Act) to disperse on pain of forcible dispersal and prosecution for not doing so within one hour.

Rio Tinto, town of S. Spain, in Huelva province, the centre of one of the richest copper-mining regions in the world. Its mines were exploited by the Carthaginians and the Romans. Pop. 11,200.

Ripley, a manufacturing town of Derbyshire, England, situated 10 m. N.E. of Derby, in a busy coal and iron district; manufactures silk lace. Pop. 17,800.

Ripon, city and spa of Yorkshire, England, in the W. Riding, 24 m. N. of Leeds. It has a cathedral begun in Norman times, and in the vicinity are Fountains Abbey and Studley Royal. Leather goods and varnish are made. Pop. 3,800.

Ripon, Frederick John Robinson, Earl of, British statesman, younger son of Lord Grantham, entered Parliament in 1806 as a Tory; rose to be Chancellor of the Exchequer, and was for a few months in 1827 Prime Minister; was subsequently in different Cabinets Colonial Secretary, Lord Privy Seal, and President of the Board of Trade; created an Earl in 1833. (1782-1859).

Ripon, George Frederick Samuel Robinson, Marquis of, British statesman, born in London, son of preceding; entered House of Commons in 1852 as a Liberal; became Secretary for War (1863), and three years later for India; was President of the Council in 1868, a popular Viceroy of India (1869-1884), First Lord of the Admiralty in 1886, and Colonial Secretary in 1892-1895; was created Marquis in 1871; went over to the Catholic Church in 1874, resigning in consequence the Grand-Mastership of the Freemasons. (1827-1909).

Risaldar, in India, a native cavalry officer in command of a squadron of native cavalry.

Risca, urban district of Monmouthshire, England, on the Ebbw, 6 m. N.W. of Newport. It is a colliery town, possessing U.E.

also chemical and tinplate works. Pop. 16,600.

Rishton, urban district of Lancashire, England, 3 m. N.E. of Blackburn. It has coal-mines and paper, cotton and firebricks are among its other manufactures. Pop. 6,600.

Rita. See Humphreys, Mrs. W. Desmond.

Ritornello, in music, a brief repetition of an air, especially if played by one or more instruments while the principal voice pauses; also, the introduction to any musical piece.

Ritual, any organized system of behaviour with religion, especially in connection with the elaborate formalities of a Papal High Mass to the ordered silence of a Quaker meeting. In the Far East, especially by Confucianists, it has been cultivated almost as an independent art and science. The degree of ritual movement and artistic effect allowable in worship has been the subject of bitter controversy between Protestants and Catholics ever since the Reformation, but the tendency to allow a greater amount of fixed ceremony is a marked feature of 20th Century Protestantism in many countries.

Ritualism, name given by its opponents to that school of religious thought which insists on the importance of decorous ceremonial in public worship and the administration of the Sacraments. The word first came into use in England in connection with the Oxford Movement (*q.v.*), to characterize its insistence on outward religious forms.

Riu-Kiu, or Luchu Islands, a group of 90 small islands in the N. Pacific Ocean, having an area of 921 sq. m. The islands lie between Japan and Formosa. Sugar is grown. The group was formally annexed by Japan in 1879. Pop. about 460,000.

River, a natural stream of water flowing in a channel. As an active agent in altering the surface of the earth a river effects erosion of its bed and banks, and transport of material in one part of its course, while in another part it deposits this material. Many of the great valleys of the world have been excavated by rivers. The action of the flowing water is greatly assisted by the earth and stones carried along by the stream, the running stream itself having but little abrading power.

Most rivers are subject to a periodical increase in the amount of water they convey, and the seasons in which these "floodings" take place vary according to the latitude of the river, the nature of its source, and the direction of its course. In tropical countries, where violent rains fall in a short time, rivers rise with wonderful rapidity, converting the neighbouring land into sheets of water. Many great rivers form "deltas" *i.e.*, alluvial tracts at their mouths enclosed by diverging outlets. At times the pounding back of the waters by each rise of the tide in the mouth causes the deposition of the sediment to take the form of a line of accumulated material across the course of the river, known as a "bar."

Rivera, Miguel Primo de, Marquis of Estella, Spanish general and politician, born at Jerez de la Frontera; was distinguished in 1898 for bravery in a Moroccan campaign, and served in the Philippines in the Spanish-American War. In 1913 he formed a military directorate, with the approval of King Alfonso dissolved Parliament and ruled as a dictator, though subsequent revolts compelled him to restore some measure of liberty. Several attempts were made to assassinate him; he resigned office in 1930 and died the same year. (1870-1930).

River Hog (*Potamocharus*), a mammal found in W. African forests, also called the Red Bush-pig; it is red in colour, with a short, smooth coat, and is generally about 2 ft. high.

RIVER HOG

Riverina, district

is the W. of New South Wales, Australia, between the Lachlan and Murray Rr. It is good wheat-growing country, and very suitable for sheep, enormous herds being reared. Albury and Wagga-wagga are the chief towns.

Rivers, Richard Woodville, first Earl, a prominent figure in the reigns of Henry VI. and Edward IV.; was knighted in 1425; espoused the cause of the Lancastrians in the Wars of the Roses, but changed sides on the marriage of his daughter with Edward IV., who created him an earl in 1460; fell out of jealousy into disfavour with the nobility, and was beheaded in 1469.

Rivet, a short bolt with a flat head, used for uniting two plates, the stub end being swaged to prevent its withdrawal. In riveting iron plates together, as in boilers or tanks, the rivet is made red-hot and, while a sledge is held against the head, the end is swaged down by striking directly with a riveting hammer.

Riviera, an Italian term for coast-land, flanked by mountains, especially applied to the strip of land lying around the Gulf of Genoa from Nice to Leghorn, which is divided by Genoa into the Western and Eastern Riviera, the former the more popular as a health resort; but the whole coast enjoys an exceptionally mild climate, and is replete with beautiful scenery. Nice, Monaco, Mentone, and San Remo are among its most popular towns.

Riviere, Briton, British painter, born in London; among his pictures, which are largely animal paintings, are "Daniel in the Lions' Den," "Ruins of Persepolis," "Giants at Play" and "Vae Victis." (1840-1920).

Rivoli, (1) town in N. Italy, 8 m. W. of Turin; has two royal castles, and manufactures silks, woollens, &c. Pop. 8,000. (2) An Italian village, 12 m. NW. of Verona; scene of Napoleon's crushing victory over the Austrians in 1797. Pop. 1,700.

Rizzio, David, favourite of Mary, Queen of Scots, born in Turin; the son of a dancing-master; was employed by the queen as her secretary, and being offensive to the nobles, was by a body of them dragged from the queen's presence in Holyrood, Edinburgh, and stabbed to death, March 9, 1566.

Roach, a fresh-water fish (*Leuciscus rutilus*), with lower fins tinged with red and rather large scales, allied and very similar in appearance to the Dace and Chub. It swims in shoals in rivers and lakes. It is used as live bait for jack-fishing. They can scale up to 2½ lb. and a 3½ lb. specimen has been caught.

Roads. The great road-builders of the ancient world were the Romans; their lines of communication are still traceable in nearly all the countries of their dominion, Watling Street in England being a good example. The road of the Middle Ages was generally little more than a rough cart-track, but with the advent of the stage-coach in the 17th Century, attempts at improvement began, and the work of Macadam and Telford at the end of the 18th Century marked a new epoch in road-building. The first concrete road was laid in 1873 in Edinburgh, and the first reinforced concrete road in 1913 in Cheshire. Wood-block paving was first introduced in London in 1830.

Since the World War the enormous increase of motor traffic has compelled the construction of many hundreds of miles of new "arterial" roads and the replanning and widening of many others, under the supervision of the Ministry of Transport. The total mileage of roads in Great Britain amounts to some 179,000, divided into "Class I," "Class II," and "unclassified" roads. Their maintenance is the concern of local authorities, except for certain trunk roads of first importance, which since 1937 have been maintained by the state acting through the Ministry of Transport.

Roanne, an old French town in the dept. of Loire, on the R. Loire, 49 m. NW. of St. Etienne; has interesting Gallo-Roman ruins, a college, muslin and calico manufactures, dye-works, and tanneries. Pop. 38,000.

Roanoke, city of Virginia, U.S.A., on the Roanoke R.; centre of steel, iron, machinery, tobacco, and other factories. Pop. 69,200.

Roaring Forties, a sailor's term lying between 40° and 50° N. latitude, so called from the storms often encountered there.

Robbia, Luca della, Italian sculptor, born at Florence, where he lived and worked; executed a series of bas-reliefs for the cathedral, but is known chiefly for his works in enamelled terra-cotta, which is named after him "Della Robbia ware." (1399-1482.)

Robert, called The Devil, Duke of Normandy, mandy from 1028 to 1035, father of William the Conqueror; a cruel but able ruler who became, after his death, the subject of many legends, one of which is the groundwork of Meyerbeer's opera named after him.

Robert I. See Bruce.

Robert II., King of Scotland from 1371 to 1390, son of Walter Stewart and Marjory, only daughter of Robert the Bruce; succeeded David II., and was the founder of the Stuart dynasty; his nobles were turbulent, and provoked invasions on the part of England by their forays on the Borders. (1316-1390.)

Robert III., King of Scotland from 1390 to 1406, son of Robert II. During his reign the barons acquired an ascendancy and displayed a disloyalty which greatly diminished the power of the Crown both in his and succeeding reigns. The government fell largely into the hands of the king's brother, the turbulent and ambitious Robert, Duke of Albany. An invasion (1400) by Henry IV. of England and a retaliatory expedition under Archibald Douglas, which ended in the crushing defeat of Homild Hill (1402), are the chief events of the reign. (1340-1406.)

Roberts, Frederick Sligh Roberts, marshal; born at Cawnpore; entered the Bengal Artillery in 1851; served throughout the Indian Mutiny, winning the V.C.; commanded in the Afghan War, and achieved a brilliant series of successes; was made commander-in-chief of the Madras army in 1881, commander-in-chief in India in 1885, and commander of the forces in Ireland in 1896. He became commander-in-chief in South Africa in 1899, and at once the tide of the Boer War turned; defeating Kruger at Paardeberg he pushed on to Pretoria and then left Kitchener in charge. He was commander-in-chief of the British Army till 1904. He died of a chill caught while crossing to France in November, 1914. (1832-1914.)

Robertson, Frederick William, English ecclesiastic, born in London; entered the Church in 1846, was curate first at Winchester, next at Oshington, and finally settled in Brighton; attained a

great reputation as a preacher, his printed sermons being widely read. (1816-1853.)

Robertson, William, Scottish historian, born at Borthwick, Midlothian; became one of the ministers of Greyfriars Church, Edinburgh, and Principal of the University, having previously written his *History of Scotland*, which brought him other honours, and which was followed by a *History of Charles V.* and a *History of America*. (1721-1798).

Robertson, Sir William Robert, British field-marshal. Joining the army as a private in 1877, he was the first to rise from the ranks to field-marshal. He took a commission in 1888, served in India, and on the staff in the Boer War. In 1914 he became Quartermaster-General of the British Expeditionary Force, was chief of staff in France in 1915, and from 1916 to 1918, when he resigned, he was chief of the Imperial General Staff. From 1919 to 1920 he commanded the Rhine army. Knighted in 1913, he was made a baronet in 1919 and a field-marshal in 1920. (1860-1933).

Robeson, Paul Bustill, American-negro actor and singer; born at Princeton, N.J.; son of a Presbyterian minister. Graduated in law from Columbia University, 1923; but had already made his first theatrical appearance in *Simon the Cyrenian*, New York, 1921. He first appeared in England at Blackpool in 1922; has latterly made many appearances on the concert platform as a singer of "negro spirituals." He has attained fame for his performances in the plays of Eugene O'Neill. (1898-).

Robespierre, Maximilien, leader of the French Revolution, born at Arras, of Irish origin; he resigned his office as a judge because he could not bring himself to sentence a man to death; inspired by the gospel of Rousseau, became a violent Republican; as head of the Committee of Public Safety, was responsible for the death sentence on Marie Antoinette, and was one of the leaders in the Reign of Terror; had the Worship of Reason established in June, 1794; at the end of the month following was beheaded by the guillotine. (1758-1794).

Robey, George, stage name of George Edward Wade, English comedian, born in London. After working for four years as an engineer, took to the music-hall stage in 1891. He organised many charity performances during the World War. Later he appeared on the "legitimate" stage as Falstaff and in other roles. (1869-).

Robin (*Erithacus rubecula*), a small red-breasted bird of the Thrush family, found all over Europe, and W. Asia. It is found in the British Isles throughout the year, resting in holes in banks and walls, near the ground. Olive-brown above, it has a reddish-orange breast and throat. Its boldness and tameness render it a popular favourite and it plays a considerable part in folklore and popular legend.

Robin Hood. See Hood, Robin.

Robin Hood's Bay, a small sea-side resort of the N. Riding of Yorkshire, England, 5 m. S. of Whitby.

Robinia, or locust-tree, a genus of leguminous plants of N. America, of which *Robinia Pseud-acacia*, or the false acacia, a tall tree with long compound leaves and racemes of white flowers, is grown as an ornamental garden tree in England.

Robins, Benjamin, English mathematician and engineer, born at Bath; established himself in London as a teacher of mathematics, and issued several mathematical treatises; turned his attention to the theoretical study of artillery and fortification; in

1742 published his celebrated work, the *New Principles of Gunnery*, which revolutionised the art of gunnery; was appointed engineer-in-general to the East India Company (1748), and planned the defences of Madras. (1707-1751).

Robinson, Lennox, Irish playwright; manager of the Abbey Theatre, Dublin, from 1910 to 1914 and 1919 to 1923; born at Douglas, Cork. His first play *The Glancly Name*, was produced at the Abbey Theatre in 1908. His best-known later plays are *The Big House*, *The White-headed Boy* and *Far-Off Hills*. (1868-).

Robinson, William Heath, English black-and-white artist; has illustrated or assisted in illustrating Hans Andersen's *Fairy Tales*, *Arabian Nights*, Poe's *Tales*, *Don Quixote*, and Rabelais, and his cartoons have appeared in many periodicals. (1872-).

Robot, a machine that does all the work of a human being. The term is applied to people of machine-like efficiency, and is derived from Karel Capek's play *R.U.R.*

Rob Roy, a Highland freebooter, second son of Macgregor of Glenogle; assumed the name of Campbell on account of the outlawry of the Macgregor clan; traded in cattle, took part in the rebellion of 1715; had his estates confiscated, and indemnified himself by raiding. (1671-1734).

Roc, a gigantic legendary bird of Arabian tales, represented as capable of mighty feats of strength.

Roch, St. a French saint, of Montpellier, patron of the plague-stricken; being plague-stricken himself, and overtaken with the disease in a desert place, he was discovered by a dog, who brought him a supply of bread daily from his master's table till he recovered. (c. 1290-c.1372).

Rochambeau, Corde de, marshal of France, born at Vendôme; commanded the troops sent out by France to assist the American colonies in their rebellion against the mother-country. He served in the French Revolutionary armies until 1792, when he retired, and was subsequently imprisoned for a while, but released by Napoleon. (1725-1807).

Rochdale, town and cotton centre in Lancashire, prettily situated on the Roche, 11 m. N.E. of Manchester. Its woollen and cotton trade (damasks and calicoes) dates back to Elizabeth's time; has an interesting 12th Century parish church. Pop. 93,250.

Roche, Sir Boyle, Irish politician; served in the American war; obtained office in Irish revenue department, c. 1775; entered the Irish parliament in 1776. He was famous for his verbal bulls, his strong support of the Union, and his antagonism to Roman Catholics. Knighted, 1776; baronet, 1782. (1743-1807).

Rochefort, town in W. France, in dept. Charente-Inférieure, seat of a large trade with the French colonial empire. Shipbuilding is a main industry. Pop. 33,000.

Rochelle, La, seaport of France, on an inlet of the Bay of Biscay, 95 m. NW. of Bordeaux; capital of the dept. of Charente-Inférieure; has a commodious harbour; ship-building, glass-works, and sugar-refineries are among its chief industries. It is historically important as a stronghold of the Huguenots after the Reformation. Pop. s. 42,004.

Rochester, (1) city of Kent, England, on the Medway, lying between Strood and Chatham; the seat of a bishop since 604; has a fine cathedral, which combines in its structure examples of Norman, early English,

and decorated architecture; a hospital for lepers founded in 1078; a celebrated Charity House, and remains of a Norman castle. Pop. 40,000. (2) city in the state of New York, on the Genesee R., near Lake Ontario, 67 m. N.E. of Buffalo; has a university and theological seminary, and varied and flourishing manufactures, especially of photographic materials. Pop. 328,000.

Rochester, John Wilmot, second Earl of, English poet and courtier, author of some exquisite songs; born at Ditchley, Oxfordshire. Became one of Charles II.'s court favourites. (1647-1680).

Rochet, a linen vestment worn by bishops, abbots, and other dignitaries, in the form of a surplice, but shorter and open at the sides; the sleeves are caught round the wrist.

Rock, in geology, any solid part of the earth's crust whether hard or soft in consistency, and including clay, limestone, chalk, sand, coal, peat, granite, etc. The percentage of minerals in the earth's crust is feldspar, 48; quartz, 35; mica, 8; talc, 5; carbonates of lime and magnesia, 1; hornblende, pyroxene, diallage and peridot, 1; clay, 1; and all other substances, 1. Coal, peat and amber consist of organic matter derived from plants; chalk and coral are organic matter derived from minute animals; hence they are usually called organic rock materials.

Rocks are classified, according to their origin, into stratified or aqueous and unstratified or igneous rocks. Stratified rocks possess marks of bedding; are derived from previously existing rocks; are usually situated in plains, and are formed of minerals of non-crystalline structure; have been deposited one after another from above; and contain fossils. Igneous rocks are the oldest and primitive rocks; are situated in mountainous districts; are formed of minerals of crystalline structure; have been erupted from the interior; and contain no organic remains. Stratified rocks which have undergone great alterations in composition and structure are called metamorphic rocks; such are clay-slate, statuary marble, mica-schist and gneiss.

Rock-climbing, as a sport, is English Lake district, Snowdonia, and the Scottish Cairngorms. The paths followed are usually plainly marked, and the exercise affords an excellent training for serious mountaineering. The Fell and Rock Club caters especially for followers of the sport.

Rockefeller, John Davison, American financier; born at Richmond, New York, he made his fortune in oil, and in 1870 founded the Standard Oil Company, remaining its president till 1911. To charity and education he gave during his lifetime over 500,000,000 dollars. (1839-1937).

Rockefeller Foundation, an institution created by J. D. Rockefeller (q.v.) in 1913 for the advancement of knowledge in subjects related to human welfare. It has made large benefactions to hospitals, nursing institutions, etc., and has been responsible for much investigatory work in such diseases as malaria, yellow fever, etc.

Rocket, a name given to some plants of the order Cruciferae, especially the genus *Hesperis*, or "Sweet Rocket," a plant of Italian origin now common in English gardens and having fragrant single or double flowers white, lilac, or purple in colour. Two species of rocket are found in Britain growing wild, viz., the Sea Rocket (*Cakile maritima*), a plant of the Cruciferae order bearing fleshy leaves and having a tap root, and Yellow Rocket or Winter Cress (two species of *Barbarea*).

Rocket, a cylindrical tube of paper or metal filled with a mixture of sulphur, nitre and charcoal, which, on ignition at the base, hurls the tube forward by the action of the liberated gases against the air. Apart from their use in pyrotechnic displays, rockets are used as signals at sea, and for carrying life-saving lines to ships in distress.

Rocket, The, the first locomotive, invented by George Stephenson (q.v.), which won in the famous Rainhill trials of 1825 held to determine whether stationary engines or locomotives should be employed on the Liverpool and Manchester Railway.

Rockford,

town in Illinois, U.S.A., on the Rock R., 86 m. NW. of Chicago. It has many industries, including hosiery, agricultural implements and leather goods. Pop. 86,000.

THE ROCKET

Rockhampton, chief port of Central Queensland, Australia, on the Fitzroy, 35 m. from its mouth; in the vicinity are rich gold-fields, also copper and silver; has tanning and meat-preserving industries. Pop. c. 30,000.

Rockingham, Charles Watson Wentworth, second Marquis of, British statesman; succeeded to the title in 1750; opposed the policy of Butte, and headed the Whig opposition; in 1765 became Prime Minister, and acted leniently with the American colonies, repealing the Stamp Act; was a bitter opponent of North's American policy of repression; held the Premiership again for a few months in 1782. (1730-1782).

Rocking Stones, large stones, numerous in Cornwall, Wales and Yorkshire, so finely poised as to rock to and fro under the slightest force. The Logan Rock, near Land's End, Cornwall, is over 700 tons in weight.

Rock Island, town of Illinois, U.S.A., 180 m. SW. of Chicago; a busy centre of railway and river traffic; derives its name from an island in the river, where there is an extensive Government arsenal; machinery, building materials, and soap are produced. Pop. 38,000.

Rockling, the common name of three species of small fish of the genus *Motella*, belonging to the cod family, and found in the N. Atlantic. The three species are the three-, four- and five-bearded, the five-bearded being the most common. It is dark-brown in colour, has white underparts and is not unlike the common loach.

Rock Soap, or *Saponite*, a soft mineral, consisting of anhydrous magnesium and aluminium silicate found as deposits in basalt rock. It dries brittle and is used in the manufacture of crayons.

Rock Temples, temples hewn out of solid rock, found especially in Western India, such as those at Ellora (q.v.) and Elephanta. There are also examples at Petra in Arabia.

Rocky Mountain Goat (*Oreamnos*

Americanus), a goat resembling the Himalayan serow or goat-antelope with backward sloping horns; native to the N. Rockies; its colour is white, and its coat shaggy and long in winter.

Rocky Mountains, an extensive chain of mountains in North America, belonging to the Cordillera system, and forming the eastern buttress of the great Pacific

Highlands, of which the Sierra Nevada and Cascade Mountains form the western buttress, stretching in rugged lines of almost naked rock, interspersed with fertile valleys, from New Mexico through Canada to the Arctic Ocean, broken only by a wonderfully beautiful tract of elevated plateau in southern Wyoming; their total length is about 4,000 m.; reach their greatest height in the N., with Mount McKinley in Alaska (20,300 ft.), Mount Logan in Canada (19,850 ft.); the highest peak in the United States is Mount Elbert (14,421 ft.). There are many glaciers in the Canadian section. Gold, silver, copper and other minerals are found abundantly.

Rocky Mountain Sheep,

or Bighorn, a species of sheep (*Ovis canadensis*) found in N. America and NE. Asia. Its brown wool becomes grey in the cold season.

Rococo, architecture, overlaid with a tasteless profusion of fantastic ornamentation, without unity of design or purpose, which prevailed in France and elsewhere in the 18th Century.

Rocroi, a small fortified town of France, frontier, in the dept. of Ardennes; memorable for a great victory of the French under Condé over the Spaniards in 1643.

Rod, also known as **Pole** or **Perch**, an English linear measure equal to 5½ yards. A rod of bricks, consisting of a square rod, or 272½ sq. ft. is the measure used for brickwork estimating.

Rodents (*Rodentia*), an order of mammals, small in size, whose teeth are adapted for gnawing. They have in each jaw two functional chisel-shaped incisor teeth separated by long spaces from the back teeth and adapted for cutting hard substances. The order is divided into two sub-orders, the *Duplicidentata* or double-toothed rodents—hare, rabbit and pica; and the *Simplicidentata* or single-toothed rodents, including the squirrel, rat, mouse, jerboa, porcupine, and allied species.

Roderic, the last king of the Visigoths in Spain; slain in battle with the Moors, who had invaded Spain during a civil war near Jerez de la Frontera in 711.

Rodez, a town of France, capital of NE. of Toulouse; has a beautiful Gothic cathedral, and interesting Roman remains; manufactures textiles, leather, paper, and straw hats; coal is mined near. Pop. 15,200.

Rodin, (François) Auguste (René), French sculptor, born in Paris. His work embraced both portrait busts and symbolic groups, his bust of Victor Hugo being one of the best-known of the former, his "Burghers of Calais" of which there is a replica in the Victoria Tower Gardens, London, being an example of the latter. Other famous works are "La Belle Heaulmière" and "The Thinker." (1840-1917).

Rodney, English admiral, born at Walton-on-Thames; entered the navy at the age of 13, and obtained the command of a ship in 1742; did good service in Newfoundland; was made Admiral of the Blue in 1759, and in that year destroyed the stores at Havre de Grace collected for the invasion of England; in 1780 defeated the Spanish fleet off Cape St. Vincent; in 1782 defeated the French fleet under Comte de Grasse by breaking the enemy's line; was first made a baronet and then a peer, with a pension of £2,000, for his services to the country. (1718-1792).

Rodriguez, an interesting volcanic island lying far out in the Indian Ocean, 350 m. N.E. of Mauritius, of which it is a dependency; agriculture is the

chief employment; has a good climate, but is subject to severe hurricanes. Area, 42 sq. m. Pop. 9,700.

Roe Deer (*Capreolus caprea*), a small

elegant deer, still found in the northern counties of England and in Scotland. The adult male (roe buck) is about 2 ft. high, has a reddish-brown coat, which turns yellowish-grey in winter, large white patches on the hind quarters, and short antlers with two or three points.

ROEBUCK

Rogation Days,

the Monday, Tuesday, and Wednesday preceding Ascension Day, on which special litanies are sung or recited by the Roman Catholic clergy and people in public procession; has its origin in an old custom dating from the 6th Century. They are still marked in the Church of England Prayer Book, but no special ceremonies are associated with them.

Rogers, Samuel, English poet, born in London, by profession a banker; among his poems are *The Pleasures of Memory*, 1792, *Human Life*, 1819, and *Italy*, the chief, 1822. He was a good conversationalist, as is evidenced by his *Table-Talk*, published in 1856. On the death of Wordsworth he declined the post of Poet Laureate. (1763-1855).

Roget, Peter Mark, English physician and lexicographer, born in London; was professor of Physiology at the Royal Institution; was author of a *Thesaurus of English Words and Phrases*. (1779-1869).

Rohan, Prince Louis de, French ecclesiastical, became archbishop and cardinal, but, falling out with royalty, was debarred from court; tried every means to regain the favour of Marie Antoinette, which he had forfeited, was inveigled into buying for her a famous "Diamond Necklace" in hope of thereby winning back her favour, found himself involved in a scandal connected with it, and was sent to the Bastille. (1734-1803).

Rohilkhand, a northern division of India, the Provinces of Agra and Oudh, British India; is a flat, well-watered, fertile district; takes its name from the Rohillas, an Afghan tribe, who had possession of it in the 18th Century. Chief town, Bareilly. Area, 10,830 sq. m. Pop. 5,200,000.

Rohillas (i.e., hillmen), a tribe of Afghans who settled in Rohilkhand (q.v.) and rose to power in the 18th Century, till their strength was broken by the British in 1774.

Roland, Count of Mans, one of the famous paladins of Charlemagne, who, being inveigled into the pass of Roncesvalles, was set upon by the Basques and slain, together with the flower of the Frankish chivalry, the whole body of which happened to be in his train. He is represented as having been 8 ft. high and a prodigy of valour. In Italian romance he figures as Orlando. Roland's horse was named *Vergilantif*, his magic sword *Durandal*, and his horn *Oliant*.

Roland, Madame, French patriot, wife of Jean Roland de la Platière, a Girondist in the early days of the French revolution; was guillotined after summary trial, and is remembered for her exclamation on the scaffold, "O Liberty, what crimes are done in thy name!" (1754-1793).

Rolland, Romain, French novelist; as during the World War. He is known chiefly for his *Jean Christophe*, a long novel in ten volumes; has also written *above the Sea* and *a Life of Beethoven*. (1866-).

Roller, a bird of the family *Ceraculidae*, the name being suggested by its habit of turning somersaults in the air like a tumbler-pigeon. There are several species, confined to Europe, Asia and Africa, all brightly coloured. *Coracias garrula*, the common roller, has blue to pale-green head and breast and reddish-brown back and is about a foot in length.

LONG-TAILED
ROLLER

Rollin, **Charles**, French historian, born in Paris; rector of the University; wrote *Ancient History* in 13 vols., and *Roman History* in 16 vols., once extremely popular. (1861-1741).

Rolling Mill, an apparatus for rolling pieces of metal into rods, bars, sheets, plates, etc. It consists essentially of two heavy rollers, mounted in pairs one above the other, in the iron standards or cheeks, and driven in opposite directions so that a piece of metal inserted between them is drawn in and squeezed into the required shape. The iron or other malleable metal for rolling is first heated in the puddling furnace; but for securing fine and accurate finish or other special properties, cold rolling is carried out.

Rollo, or *Rolf*, Norse pirate chief, who seized Rouen and much of the surrounding area. Charles the Simple surrendered to him part of Neustria, which thereafter bore from his followers the name of Normandy. After this Rollo embraced Christianity, was baptized and became the first Duke of Normandy. (880-932).

Rollright Stones, a megalithic circle near Little Compton, Oxfordshire, England, which legend declares to be men turned to stone, one of the pillars being styled "the king" and five others "the knights."

Rolls, **Charles Stewart**, British engineer and aviator, born in London; joined with F. H. Royce to found the Rolls-Royce firm of motor manufacturers; made an early record aeroplane flight over the English Channel in 1910; killed whilst flying later in that year. (1877-1910).

Romagna, the former name of a district in Italy which comprised the NE. portion of the Papal States, embracing the modern provinces of Ferrara, Bologna, Ravenna, and Forlì. It was annexed to the Italian kingdom in 1860.

Roman Catholics, that section of the Christian Church which acknowledges the supremacy of the Pope. Doctrinally it has seven sacraments—Baptism, Confirmation, Eucharist, Penance, Extreme Unction, Orders, and Matrimony; its doctrinal basis is the teaching summarized in the Creed of Pope Pius IV. It is the church of the majority of Christians in Ireland, the Latin countries of Europe and America, Poland, Hungary, and Southern Germany, and has large numbers of adherents in the United States, as well as in Canada, Australia, and other parts of the British Empire. The total number of Roman Catholics is estimated at over 350 millions. It is organized under the Pope (who is assisted by the College of 70 Cardinals) into dioceses (or, in missionary countries, vicariates) under archbishops or bishops, of whom there are in England and Wales 4 archbishops and 14 bishops, in Scotland 3 archbishops and 6 bishops, and in Ireland 4 archbishops and 23 bishops. Until the Reformation the Roman Catholic Church was established by law in England, after which Roman Catholics were excluded from the exercise of many civil rights until 1829.

Romance, a term of wide and vague tale, told in a Romance dialect, such as Provençal or early French, notably the various tales of the Arthurian cycle, of Amadis de Gaula, etc. Also means, derivatively, any popular epic belonging to the literature of modern Europe. It now also means a kind of novel generally one depicting an entirely imaginary state of society, or a tale in which marvellous adventures befall the characters.

Romance Languages, the name given to the languages sprung from Latin, and spoken in the districts of South Europe that had been provinces of Rome; the principal are French, Spanish, Portuguese, Catalan, Provençal, Italian, and Rumanian.

Roman de la Rose, a celebrated poem, being an elaborate allegory on the theme of the art of love; it was written, partly by Guillaume de Lorris, c. 1260, and completed c. 1300, by Jean de Meung. Its length is approximately 28,000 lines.

Roman-Dutch Law, the name given by jurists to the compound law evolved by Grotius, the famous Dutch jurist and publicist, by adopting much of Roman law into the substance of international law. The Roman law which he thus adopted was largely composed of that *jus gentium* or law of nations which the jurists had elaborated by a comparison of the laws of different peoples and which they identified with natural law. Roman-Dutch law is the basis of the present law of the Netherlands and of the Union of South Africa.

Roman Empire, *Moly*. See *Moly*

Romanes, **George John**, British naturalist, born at Kingston, Canada; came under the influence of Darwin, whose theory of evolution he advocated and applied to the mental field in his works, e.g., *Scientific Evidence of Organic Evolution*, *Mental Evolution in Animals*, *Mental Evolution in Man*; founded the Romanes Lectures at Oxford. (1848-1894).

Romanesque, the style of architecture prevalent in Romanized Europe between the classical and Gothic periods, i.e., from about the fifth to the 12th Centuries. Classified into the debased Roman, including Byzantine modifications; and the late Gothic-Romanesque of the 12th Century, comprising the later Byzantine, Lombard, Saxon and Norman styles. The first of these divisions is closely assimilated to the Roman, but the last is essentially Gothic in the predominance of vertical lines.

Romanoff, the name of an old Russian family, from which sprang the last dynasty of Russian Cæars, the first Czar of which was Michael Fedorovich (1613-1645), and the last Nicholas II. (1868-1917).

Roman Question, the dispute between the Papal See and the Italian government which began in 1870 with the seizure of the States of the Church, and the occupation of Rome by Piedmontese troops. His sovereignty being no longer recognized, the Pope and his successors withdrew under protest as voluntary prisoners into the Vatican Palace. In 1929 Mussolini settled the dispute by the Treaty of the Lateran, which restored the Pope's temporal rule over a small area called the Vatican City (q.v.).

Romans, *Epistles* to the, an epistle written from Corinth, about the year 55, by St. Paul to the Church at Rome. It is the longest of his epistles, and is directed to prove that the special privileges of the Jews do not continue into the Christian dispensation.

Romanticism, the reactionary movement in literature and art at the close of the 18th Century and at the beginning of the 19th, against the formalism and classicism of the earlier part of the 18th Century. Among its leaders in England were Coleridge, Byron, Shelley and Wordsworth. It was closely bound up with a reawakened interest in the phenomena of nature and emphasized the value of feeling as opposed to correctness of style.

Rome, since 1871 capital of the modern kingdom of Italy (q.v.), on the Tiber, 16 m. from its entrance into the Tyrrhenian Sea. Legend ascribes its foundation to Romulus in 753 B.C., and the story of its progress, first as the chief city of a little Italian kingdom, then of a powerful and expanding republic (510 B.C. to 30 B.C.), and finally of a vast empire, together with its decline and fall in the 5th Century (476 A.D.), before the advancing barbarian hordes, forms one of the most impressive chapters in world history. As the mother-city of Christendom in the Middle Ages, and the later capital of the Papal States (q.v.) and seat of the Popes, it acquired fresh glory. It remains the most interesting city in the world, and is filled with the sublime ruins and monuments of its pagan greatness and the priceless art treasures of its medieval period. Of ruined buildings the most imposing are the Colosseum (a vast amphitheatre for gladiatorial shows) and the Baths of Caracalla (accommodated 1,800 bathers); the great aqueducts of its pre-Christian period still supply the city with water from the Apennines and the Alban Hills; the Aurelian Wall (12 m.) still surrounds the city, enclosing the "seven hills," the Palatine, Capitoline, Aventine, etc., but suburbs have spread beyond; St. Peter's is still the finest church in the world. The city is now being largely rebuilt and its streets rearranged so as to display its historic treasures to better advantage; it has few industries, but is a pilgrim resort for travellers from all parts of the world. Pop. 1,156,000. See also Vatican City.

Romford, town of Essex, England, on the Ingrebourne; 12 m. E. of London, of which it is a growing residential suburb; has cattle and corn markets; industries include brewing, market-gardening, etc. Pop. 60,000.

Romilly, Sir Samuel, English lawyer, born in London of a Huguenot family; was a Whig in politics, and was Solicitor-General for a time; devoted himself to the amendment of the criminal law of the country, and was a zealous advocate against slavery and the spy system. (1757-1818).

Romney, George, English painter, born in Lancashire; painted portraits in London for 35 years in rivalry with Reynolds and Gainsborough, among his best work being his studies of Lady Hamilton; specimens of his work may be seen at the National Gallery and Wallace Collection, London, but most are in private hands. (1734-1802).

Romney, New, one of the old Cinque Ports (q.v.), in S. Kent, 8 m. S.W. of Hythe; the sea has receded from its shores, leaving it no longer a port. As centre of the fine pastoral district of Romney Marsh, it has an important sheep fair; the little village of Old Romney lies 1½ m. inland. Pop. 1,800.

Romsey, town in Hampshire, England, on the Test, 8 m. N.W. of Southampton; has a remarkably fine old Norman church and a corn exchange; are leather manufactures. Pop. 5,800.

GEORGE ROMNEY

Romulus, legendary founder of Rome, reputed son of Mars and Rhea Silvia (q.v.), daughter of Numitor, king of Alba Longa; exposed at his birth, together with Remus, his twin-brother (q.v.); was suckled by a she-wolf and brought up by Faustulus, a shepherd; founded Rome in 753 B.C., peopling it by a rape of Sabine women and afterwards forming a league with the Sabines (q.v.); he was translated to heaven during a thunderstorm, and afterwards worshipped as Quirinus.

Ronald, Sir London, British musical conductor. He first appeared as a solo pianist, and began his career as a conductor at Covent Garden in 1884. In 1898 he became conductor of the Royal Albert Hall (later the New Symphony) Orchestra, and in 1910 Principal of the Guildhall School of Music. He was knighted in 1922. Besides conducting he composed a number of songs, with ballets and orchestral works. (1873-1938).

Ronaldsay, the Orkney Is. North Ronaldsay is the most northerly of the Orkney group; South Ronaldsay lies 6½ m. N.E. of Duncauby Head. Both have a fertile soil, and the coast fisheries are valuable.

Roncesvalles, a valley of the Pyrénées, 23 m. N.E. of Pampeluna, where according to medieval legend in 778 the rear of the army of Charlemagne was cut to pieces by the Basques, and Roland (q.v.) with the other Paladins was slain.

Rondeau, a form of short poem (originally French), usually consists of 13 lines, eight of which have one rhyme and five another; is divided into three stanzas, the first line of the rondeau forming the concluding line of the last two stanzas. The form was much used by Swinburne.

Rondebosch, a residential suburb, of Cape Town, S. Africa, 5 m. S. of the city. Here are Groote Schuur, the official residence of the premier, and the university.

Rondo, a form of musical composition (q.v.) in poetry; a sonata movement in which a principal theme is repeated two or three times after the introduction of subordinate themes.

Ronsard, Pierre de, French poet, born near Vendôme; was for a time attached to the Court; was for three years in the household of James V. of Scotland in connection with it, and afterwards in the service of the Duke of Orleans, but having lost his hearing devoted himself to literature, writing odes and sonnets. He was of the Pléiade (q.v.) school of poets, and contributed to introduce important changes in the idiom of the French language as well as in the rhythm of French poetry. (1524-1555).

Röntgen, Wilhelm Conrad von, discoverer of the Röntgen rays, born at Lennep, in Rhenish Prussia. In 1885 appointed Professor of Physics at Würzburg; his discovery of the Röntgen rays was made in 1895, and he received a Nobel Prize for Physics in 1901. (1845-1923).

Röntgen Rays. See X-Rays.

Rood, a cross or crucifix, especially one placed in a church over the entrance to the choir, and flanked by figures of the Virgin Mary and St. John; often fixed upon an ornamental partition of wood or stone, called the rood-screen, and having behind it a small gallery, the rood-loft, from which the Gospel was formerly chanted at High Mass.

Rook, a blue-black, hoarse-voiced bird of which nests in colonies (*Corvus frugilegus*). It is very common in the British Isles, many varieties are known.

in an expedition against Cadix destroyed the Plate-fleet in the harbour of Vigo in 1702; assisted in the capture of Gibraltar from the Spaniards in 1704, and fought a battle which lasted a whole day with a superior French force off Malaga the same year. (1650-1709).

Roon, general, born in Pomerania; was Minister of War in 1859 and of Marine in 1861; was distinguished for the important reforms he effected in the organisation of the Prussian army, and conspicuous in the campaigns of 1866 against Austria and 1871 against France. (1803-1879).

Roosevelt, Franklin Delano, thirty-U.S.A., a distant relative of President Theodore Roosevelt, born at Hyde Park, New York; became Assistant Secretary of the Navy in 1913, and was Governor of New York, 1929-1933. At the Presidential Election of 1933, as Democratic nominee, he carried 43 states, and began an active campaign to raise the country from its economic depression by his "New Deal," involving a complete overhaul of American economic life, the development of the national resources, and the safeguarding of living conditions for labour. In spite of checks from Congress and the Supreme Court he carried much of his plan, and was re-elected in 1936 by the largest majority ever known in the U.S.A., carrying 46 of the 48 states. (1882-).

Roosevelt, Theodore, twenty-sixth States, President of the United States, born at New York. He became a member of the New York State Legislature in 1881, tried unsuccessfully to become Mayor of New York, became one of the New York police commissioners in 1895 and Assistant-Secretary of the navy in 1897. In the Spanish War he raised a regiment to fight in Cuba, and on its conclusion he was elected Governor of New York. Elected Vice-President of the U.S.A. in 1900, he succeeded McKinley the following year and remained in office till 1909. He was a noted sportsman and an explorer, and won a Nobel Peace Prize in 1906. (1858-1919).

Root, in botany, that part of a flowering plant which remains below the soil and grows downwards to absorb nutritive material by which the plant is fed. Some plants, such as the carrot, turnip, etc., store food material in their so-called "tap roots." In some cases secondary or so-called adventitious roots are formed from the stem or upper parts of the plant, and these often remain wholly or partly above the surface.

Root, Clinton, New York. He became a Republican senator in 1908, was Secretary for War, 1898-1904, during the Philippine insurrection, and Secretary of State, 1905-1909, when his "Gentleman's Agreement" with Japan settled the immigration problem for years. Member of the Permanent Court of Arbitration at The Hague; he received a Nobel Peace Prize in 1912. (1845-1937).

Rope, thick cord of vegetable fibre or steel, metal wires, made by combining several strands, each made up of a number of twisted fibres. The fibres used for vegetable ropes are mainly hemp, cotton, jute, and sisal. They were formerly manufactured by hand in rope-walks, where the rope-maker walked away from a hand-operated wheel on which the rope was spun, but are now made by mechanical processes.

Rorke's Drift, a station on the Tugela R., Zululand, the defence of which was on the night of Jan. 22, 1879, successfully maintained by a small British detachment against 4,000 Zulu warriors.

Rorqual, the common name for a widely distributed genus of whales, *Balaenoptera*, differing from sperm whales in not congregating in schools and in yielding but little blubber.

The important species of *Balaenoptera* include the largest of all whales, the Blue Whale (*B. musculus*) which reaches a length of 100 ft.; the Common Rorqual (*B. physalus*) 65 to 85 ft. long in the adult stage; Rudolphi's Rorqual (*B. borealis*) and the Lesser Rorqual (*B. acutorostrata*) about 30 ft. in length, all of which have been seen in British seas and occasionally left stranded on British shores. The genus is of world-wide distribution; other species are found in southern waters.

BORQUAL

Rosa, Carl, father of English opera, born in Hamburg; introduced on the English stage the standard Italian, French, and German operas with an English text; died in Paris. (1843-1889).

Rosa, Monte, the highest mountain in Switzerland, attaining an altitude of 15,217 ft. It is in Canton Valais, on the Italian frontier, one peak of it, on which is an observatory, being in Italy.

Rosa, Salvatore, Italian painter, born near Naples, a man of versatile ability; could write verse and compose music, as well as paint and engrave. His paintings of landscape were of a sombre character, and generally representative of wild and savage scenes. He lived chiefly in Rome, but took part in the insurrection of Masaniello at Naples in 1647. (1615-1673).

Rosaceae, a natural order of plants, containing some 100 genera and over 2,000 species of cosmopolitan distribution. It includes the rose family and also most fruits of the temperate zone—apple, pear, plum, cherry, quince, strawberry, raspberry, blackberry, etc.

Rosario, second city of the Argentine Republic, on the Paraná, 190 m. NW. of Buenos Aires; exports wool, hides, maize, and wheat; flour, beer, etc., are produced. Pop. 509,600.

Rosary, a string of beads used by Roman Catholics as an aid to the memory during devotional exercises. It is usually in the form of a circle, containing 50 small beads with a larger bead between each 10 small ones, with a row of 3 or 5 extra beads and a crucifix attached to one of the larger beads. Similar devices are used by the Mohammedans and Northern Buddhists for like purposes.

Rosas, Juan Manuel, Argentine statesman, born in Buenos Aires; organised the confederation; was dictator from 1835 to 1852; failed to force the Plate River States into the confederation, and took refuge in England, where he died. His period of dictatorship was one of bloodshed and terror. (1793-1877).

Roscius, *Quintus*, famous Roman comic actor, born near Lanuvium, in the Sabine territory; was a friend of Cicero, and much patronised by the Roman nobles; was thought to have reached perfection in his art, so that his name became a synonym for perfection in any profession or art; d. about 61 B.C.

Roscoe, Sir Henry, English chemist, born in London, grandson of succeeding; professor at Owens College, Manchester, and later vice-chancellor of London University; was in Parliament for ten years from 1855; president of the British Association at Manchester, 1887; carried out research on spectrum analysis and the atomic theory; author of treatises on chemistry. (1833-1915).

Roscoe, William, English historian, born in Liverpool; author of the *Life of Lorenzo de' Medici* and of *Leo X.*, as well as

of *Handbooks of the Italian Renaissance*, and a collection of poems. (1753-1831).

Roscommon, an inland county of Connaught, Eire (Ireland); is poorly developed; one-half is in grass, and a sixth mere waste land; crops of hay, potatoes and oats are raised, but the rearing of sheep and cattle is the chief industry. The rivers Shannon and Suak lie on its E. and W. borders respectively. There is some pretty lake-scenery, interesting Celtic remains, castle, and abbey ruins, etc. Area, 951 sq. m. Pop. 77,500. The county town, Roscommon, 86 m. NW. of Dublin, has a good cattle-market, and remains of a 13th-century Dominican abbey and castle. Pop. c. 1,800.

Roscrea, an old market town of Tipperary, Eire (Ireland), 77 m. SW. of Dublin; its history reaches back to the 7th Century, and it has interesting ruins of a castle, round tower, and two abbeys. Pop. c. 2,700.

Rose, typical genus (*Rosa*) of the plant family Rosaceae, consisting of spiny, wing-leaved shrubs and beautiful, and usually fragrant, red, yellow or white flowers. There are a number of species, from which many varieties have been bred by gardeners, more than one thousand being recognized and named. Well-known wild British species are the Sweet-briar (*Rosa rubiginosa*), and the Dog rose (*Rosa canina*). In the wild state the flowers are single, but varieties such as the damask and musk roses have double flowers. Indian and Persian varieties, e.g. *R. moschata*, *R. damascena*, yield the toilet perfume rose-water, and the oil known as Otto or Attar of Roses.

DOG ROSE

Rosebery, Archibald Philip Primrose, fifth Earl of, British statesman, born in London; succeeded to the earldom in 1868; in 1881 became Under-Secretary for Home Affairs, and was twice Secretary for Foreign Affairs under Gladstone, in 1885 and 1892; was first Chairman of London County Council; became Prime Minister in March, 1894, on Gladstone's retirement, and resigned in June, 1895; one of the founders of the Liberal League; and the only Prime Minister to win the Derby while in office. (1847-1929).

Rosecrans, William Starke, American general, born at Kingston, Ohio; trained as an engineer, he had settled down to coal-mining when the Civil War broke out; joined the army in 1861, and greatly distinguished himself during the campaigns of 1862-1863, winning battles at Iuka, Corinth, and Stone River; but, defeated at Chickamauga, he lost his command; reinstated in 1864 he drove Price out of Missouri; was minister to Mexico, a member of Congress, and Registrar of the U.S. Treasury. (1819-1898).

Rosemary, an evergreen fragrant shrub of the family Labiatae, grown in S. Europe. The fragrant oil of Rosemary is distilled from it in France and Spain.

Rosenheim, town of Bavaria, Germany, on the Inn, 40 m. SE. of Munich. It has extensive salt works, and its saline and sulphur baths are noted. Pop. 18,000.

Rosenkranz, Johann Karl, German philosopher of the Hegelian school, born at Magdeburg; professor of Philosophy at Königsberg; wrote an exposition of the Hegelian system, a *Life of Hegel*, and *Goethe and his Works*. (1805-1879).

Rose of Jericho, a plant of the order Cruciferae.

(*Anastatica hierochuntina*), found in the sandy deserts of Palestine, Arabia, and other Near Eastern countries. In dry weather it loses its leaves, rolling up into the shape of a ball, but on being brought into contact with moisture reopens, displaying its branches and seed-vessels. It is also known as the Resurrection Plant.

ROSE OF JERICO

Roses, Wars of the, the most protracted and sanguinary civil war in English history, fought out during the reigns of Henry VI., Edward IV., and Richard III. between the adherents of the noble houses of York and Lancaster—rival claimants for the throne of England, whose badges were the white and the red rose respectively; began with the first battle of St. Albans (1455), in which Richard, Duke of York, defeated Henry VI.'s forces under the Duke of Somerset; but not till after the decisive victory at Towton (1461) did the Yorkists make good their claim, when Edward (IV.), Duke of York, became king. Four times the Lancastrians were defeated during his reign. The war closed with the defeat and death of the Yorkist, Richard III., at Bosworth, 1485, and an end was put to the rivalry of the two houses by the marriage of Henry VII. of Lancaster with Elizabeth of York, 1486.

Rosetta, town in Egypt, on the left bank of the delta of the Nile, 44 m. NE. of Alexandria, famous for the discovery near it by M. Bousard, in 1799, of the Rosetta stone with hieroglyphic inscriptions, demotic and Greek, by the help of which archaeologists have been able to interpret the hieroglyphics of Egypt.

Rose Window, a circular window by tracery and mullions, arranged so as to radiate from a central small circle; the compartments are frequently filled with stained glass. Rose windows were a special feature of the Gothic cathedrals of the 13th and 14th Centuries; many examples may be seen in English churches of that era. Those at Chartres Cathedral are generally considered the finest in the world.

Rosewood, wood used for furniture manufacture, making, veneering, the manufacture of musical instruments, etc., imported mainly from S. America, and derived from trees of the genus *Dalbergia*, especially *Dalbergia nigra*. Its name derives from the rose-like smell observed when it is sawn.

Rosicrucians, a secret society which takes its name from a German, Christian Rosenkreuz, at the beginning of the 15th Century; it pretended by the study of alchemy and other occult sciences to be possessed of sundry wonder-working powers. Modern societies in the U.S.A. and elsewhere have borrowed the name.

Ross, market town of Herefordshire, England, 12 m. SE. of Hereford. Beautifully situated on the Wye, it has old houses and a curious Market House. Here lived John Kyrie, the Man of Ross, written of by Pope. Pop. 4,700.

Ross, Sir Edward Baines, British philologist. He studied Oriental languages in London, Paris, and Strasbourg, and then travelled widely in Russia, Asia Minor, and the East; in 1886 he became a professor of Persian at University College, London, subsequently held official posts in India, and

from 1914 to 1916 was a keeper in the British Museum, after which he became Director of the London School of Oriental Studies; has written extensively on Eastern subjects. (1871-).

Ross, Sir James Clark, British explorer. He entered the navy in 1818, accompanied Parry and Sir John Ross on Arctic voyages, and in 1831 discovered the north magnetic pole. In his Antarctic expedition of 1839-1843 he discovered Mount Erebus, Victoria Land, and the south magnetic pole. (1800-1862).

Ross, Sir John, British Arctic explorer, born in Wigtownshire; made three voyages, the first in 1818, under Parry; the second in 1829, which he commanded and in which he discovered the Boothia Peninsula; and a third in 1850, in an unsuccessful search for Franklin, publishing on his return from them accounts of the first two, in both of which he made important discoveries. (1777-1856).

Ross, Sir Ronald, British physician, famous for his work on malaria; he showed that the disease was propagated by mosquitos and that a suppression of the latter reduced the ravages of malaria; awarded a Nobel Prize in 1902. (1857-1933).

Ross and Cromarty, mountainous, sparsely populated co. of N. Scotland, lying between Sutherlandshire and Inverness-shire, the Atlantic and the North Sea. Some of the Hebrides, including parts of Lewis, are included in it. Its coastline is indented with many firths and sea-lochs; deer forests occupy much of the area; cattle and sheep are reared and fishing is carried on. Dingwall is the county town. Area 3,039 sq. m. Pop. 63,000.

Rosbach, village in Prussian Saxony, where Frederick the Great gained in 1757 a brilliant victory with 22,000 men over the combined arms of France and Austria with 60,000.

Ross Dependency, the territories of the Ross Sea in Antarctica which were proclaimed a British Settlement in 1923 under control of the Governor-General of New Zealand. It is an important whaling centre.

Rosse, English astronomer, born at York; constructed a monster reflecting telescope at the cost of £30,000 at Parsonstown, his seat in Ireland, by means of which important discoveries were made, especially in the resolution of nebulae; he was president of the Royal Society from 1849 to 1854. (1800-1867).

Rossetti, Christina Georgina, English poetess, born in London, sister of Dante Gabriel Rossetti. Her first volume, called *Goblin Market*, contains a number of very beautiful short poems. She exhibits with a sense of humour, a rare pathos blended with religious fervour; wrote *The Prince's Progress* and other volumes of verse. (1830-1894).

Rossetti, Dante Gabriel, English poet and painter, born in London, the son of Gabriele Rossetti; was a painter one of the pre-Raphaelites (q.v.). Among his chief paintings were "Ecce Anania Domini," "Beats Beatrix," and "Dante's Dream," while his written works include *Dante and His Circle*, *Ballads and Sonnets*, and many translations from the poets. The *W* is one of his poems. (1828-1882).

D. G. ROSSETTI

Rossetti, Gabriele, Italian poet and orator, born in Vasto; for his patriotic effusions had to leave Italy, took refuge in London, and became professor of Italian in King's College, London; was the father of Dante Gabriel, Christina, and William Michael Rossetti, the last of whom translated his *Autobiography*. (1783-1854).

Rossetti, William Michael, English author, son of Gabriele Rossetti, born in London; held civil service appointments until 1894, when he retired; published a translation of Dante's *Inferno*, *Lines of Famous Poets* and a *Memoir* of his brother, D. G. Rossetti (q.v.). (1829-1919).

Rossini, Gioacchino, Italian composer of operatic music, born at Pesaro. His operas were numerous, and received with unbounded applause, beginning with *Tamara*, followed by *Barber of Seville*, *La Cenerentola*, *Semiramide*, *William Tell*, etc. He composed a *Stabat Mater*, and a *Mass* which was performed at his grave. (1789-1868).

Rosslare, a seaport of Co. Wexford, Eire (Ireland), 7 m. S.E. of Wexford, a fishing village until it was made the terminus of the steamship line from Fishguard, Wales. Pop. 700.

Ross Sea, part of the Antarctic Ocean, S. of New Zealand, lying between S. Victoria Land and King Edward VII. Land. It is free of ice in the summer, and was therefore used as a way of approach to the South Pole by both Amundsen and Scott.

Rostand, Edmond, French dramatist. He first came before the public as the author of *Cyrano de Bergerac* in 1898, but perhaps his best play was *Chamberlain*, written in 1910. Another famous drama was *La Princesse Lointaine*; and he published several volumes of verse. (1868-1918).

Rostock, German port in Mecklenburg, on the Warnow, 7 m. from its entrance into the Baltic; exports large quantities of grain, wool, and flax, has important wool and cattle markets; shipbuilding and fishing are among the varied industries; has a flourishing university, a beautiful Gothic church and a palace. Pop. 93,600.

Rostov-on-Don, town in the U.S.S.R., of Taganrog; manufactures embrace tobacco, ropes, leather, and shipbuilding. Pop. 521,000.

Rostra, (lit. beaks), a pulpit in the forum of Rome from which the orators

delivered harangues to the people, so called as originally constructed of the prows of war vessels taken at the first naval battle in which Rome was engaged, the Latin for a prow being *rostrum*, plural *rostra*.

ROSTRUM OF ROMAN SHIP

Rosyth, Scottish dockyard and naval base on the north side of the Firth of Forth; the site was acquired by the Government in 1800.

Rotary Club, a club belonging to the organization called the Rotary International, which is founded on the principles of service and international peace.

The name comes from the former practice of holding club meetings at members' houses, in rotation. The first club was formed in 1905 by Paul Harris of Chicago, and soon there were many others throughout N. America. The British Association of Rotary Clubs was formed just before the World War; this Association is now styled the Association for Great Britain and Ireland (Rotary International). Members are selected on a classification basis, various trades and professions being represented in all clubs, of which there are over 3,000 in the world.

Rotation, in astronomy, the movement of a planet about its imaginary axis. The word is applied in agriculture to the rotation of crops, the cultivation of a different crop each year over a period of years to prevent soil exhaustion.

Rothamsted, an agricultural station near Harpenden, Hertfordshire, England, founded and endowed by Sir John Bennet Lawes, where experimental work is carried on in soil testing, intensive farming, etc., with state assistance.

Rothenburg, town of Bavaria, Germany, many, 36 m. S.E. of Nuremberg. It retains its medieval appearance, and its capture by Tilly in the Thirty Years' War is commemorated annually. Pop. 10,000.

Rothenstein, Sir William, English painter, lithographer, and etcher; born at Bradford. He was for long an exhibitor at the New English Art Club, and has produced lithographed portraits of many notable persons. He was one of the official artists during the World War, and Principal, Royal College of Art, 1920-35. Knighted, 1931. (1872-).

Rother, small river of E. Sussex, rising near Rothamsted and flowing to the sea near Rye, passing Robertsbridge and Bodiam. Another Rother flows through W. Sussex, past Midhurst and Petworth to join the Arun near Pulborough.

Rotherham, town of Yorkshire, England, situated on the Don, 5 m. N.E. of Sheffield; its cruciform church is a splendid specimen of Perpendicular architecture; manufactures ironware, chemicals, pottery, etc. Pop. 75,000.

Rothermere, Harold Harmsworth, first Viscount, British newspaper proprietor. A younger brother of Lord Northcliffe (q.v.), and former owner of the *Sunday Pictorial*, he succeeded to the control of the *Daily Mail* groups of papers in 1922. He became Air Minister for a year in 1917 in the Coalition Government, and in 1919 was raised to the peerage. (1868-).

Roths, burgh of Moray, Scotland, 10 m. S.E. of Elgin. Distilling is carried on. Pop. 18,000.

Rothsay, watering-place on the W. coast of Scotland, capital of Bute, charmingly situated at the head of a fine hill-girt bay on the N.E. side of the Isle of Bute, 19 m. S.W. of Greenock; has an excellent harbour and esplanade; Rothersey Castle is an interesting ruin. Pop. 9,250.

Rothschild, Meyer Amschel, Jewish financier, founder of the celebrated Rothschild banking business, born at Frankfurt-on-the-Main; his original name was Bauer, that of Rothschild (Red Shield) being adopted from the family trading sign; began his career as a money-lender and made a large fortune (1743-1812); left 5 sons, who were all made barons of the Austrian empire—Amschel von R., eldest, head of the house at Frankfurt (1773-1855); Solomon von R., the second, head of the Vienna house (1774-1855); Nathan von R., the third, head of the London house (1777-1838); Karl von R., the fourth, head of the house at Naples (1788-1856); and Jacob von R., the fifth, head of the Paris house (1792-1868). Lionel, son of Nathan (1808-1879) became the first English member of Parliament of the Jewish faith; his son Nathan, (1840-1916) received a British peerage in 1886 as first Baron Rothschild, and was succeeded by Lionel, second Baron, (1868-1937), founder of a zoological museum at Tring, Hertfordshire; he was succeeded by Nathaniel, third Baron (1910-), Anthony Gustav de (1887-) and Lionel Nathan de Rothschild (1893-) are partners in the present London house of N. M. Rothschild.

Rothwell, urban district of Yorkshire, England, in the W. Riding, 4 m. S.E. of Leeds. There are coalmines, and rope and twine and matches are made. Pop. 24,600.

Rotorua, town of New Zealand, in N. Island, capital of Rotorua co., on the S.W. border of beautiful Lake Rotorua. It is in the hot spring district, at an altitude of 2,500 ft., and is a tourist and a health resort. Pop. 4,900.

Rotterdam, chief port and second city of Holland, situated at the junction of the Rette with the Meas, 16 m. from the North Sea and 35 m. S.W. of Amsterdam. The town is cut in many parts by handsome canals, which communicate with the river; the quaint old houses, the stately public buildings, broad, tree-lined streets, and canals, combine to give the town a picturesque appearance. Boymans' Museum has a fine collection of Dutch and modern paintings, and the Groote Kerk is a Gothic church of imposing appearance; there is also a large zoological garden. Shipbuilding, distilling, sugar-refining, machine and tobacco factories and the making of furniture, chocolate and chemicals are the chief industries. Pop. 589,000.

Rotunda, in architecture, a circular building covered by a dome, as the Pantheon in Rome or the large central chamber in the Capitol of Washington.

Roubaix, town in the Dept. of Nord, France; situated on a canal 6 m. N.E. of Lille; is of modern growth; actively engaged in the manufacture of all kinds of textiles, in brewing, etc. Pop. 107,000.

Rouble, a Russian monetary unit, since 1936 a gold coin equal in value to three French francs; it is divided into 100 kopeks.

Rouen, the ancient capital of Normandy, town on the Seine, 87 m. N.W. of Paris. A good portion of the old, crowded, picturesque town has given place to more spacious streets and dwellings; the old ramparts have been converted into handsome boulevards; it has several Gothic churches unrivalled in beauty, a cathedral (the seat of an archbishop), etc. The river affords an excellent waterway to the sea, and as a port Rouen ranks fourth in France. It is famed for its cotton and other textiles. William the Conqueror died here, and Joan of Arc was burned here in 1431. Pop. 123,600.

Rouge, properly a ferric oxide in the form of a fine red powder, used by jewellers as a polishing material, in flint-glass manufacture, and as a pigment in certain paints. The name is commonly used for a face cosmetic of varied composition.

Rouge-et-Noir (i.e., red and black), a gambling game of chance with cards, so called because it is played on a table marked with two red and two black diamond-shaped spots, and arranged alternately in four different sections of the table.

Rouget de Lisle, French military officer, born at Lons-le-Saulnier; immortalised himself as the author of the *Marsellaise* (q.v.); was thrown into prison by the extreme party at the Revolution, but was released on the fall of Robespierre; fell into straitened circumstances, but

of Bruges; engaged in manufacturing cottons, lace, etc.; scene of a French victory over the Austrians in 1794. Pop. 28,700.

Roulette, a game of chance, in extensive vogue at Continental casinos and gambling houses, especially at

Carlo. It is played with a revolving disc and a ball, bets being made as to the section of the disc in which the ball will come to rest.

Round Churches, churches built polygonal design adopted from Roman memorial buildings by Christian architects in the early Christian period and in the Middle Ages; a celebrated example is the church of S. Costanza at Rome. They are especially associated with the Knights Templars (q.v.), all of whose churches were built in this form.

Roundel, in heraldry, a sub-ordinary shape, in circular form. Roundels have distinguishing names, according to their tinctures; when blazoned or, they are called bezants; when argent, plates; when vert, pomels; when azure, hurts; when sable, pellets; when gules, torteaux, etc. A small circular shield used by 14th Century soldiers, composed of osiers or ropes covered with leather or metal plates, either concave or convex, with an umbo or boss in the middle, bore the same name.

Rounders, an outdoor ball and stick game, so named because the unit of scoring is a rounder or circular run by the player who has struck the ball. There are generally 10 players a side. The purpose of the fielding side is to dismiss the members of the striking side either by catching the ball as in cricket, or by striking the runner with it before he can reach a base. The American national game of baseball has developed from rounders.

Roundheads, the name given con- temptuously by the Cavaliers to the Puritans or Parliamentary party during the Civil War, on account of their wearing their hair close cropped.

Round Robin, a document, letter a number of persons in such a way that the order in which they have signed cannot be discovered.

Round Table, The name given to the knighthood of King Arthur, from the table at which they were seated when in general assembly, made in circular shape so that no question of precedence arose. There are said to have been two tables, a larger, including as many as 150 knights; and a smaller, including only 12 of the highest order, the latter being, it is said, preserved at Winchester.

Round Towers, ancient towers, found chiefly in Ireland, of a tall, round, more or less tapering structure, divided into storeys, and with a conical top, erected in the neighbourhood of some church or monastery, presumably of Christian origin, and probably used as strongholds in times of danger; of these there are 118 in Ireland, and three in Scotland.

Roup, a disease of domestic poultry, of a highly contagious character, manifested by oral and nasal discharges.

Rousseau, Jean Jacques, French philo- sopher, and one of the great prose writers of French literature, born at Geneva, the son of a watch-maker; in his early years led a vagrant life, acting as footman, lackey, secretary, etc.; was converted to Cath- olicism largely through the efforts of Madame de Warens, with whom in 1731 he took up residence for nine years as general factotum, and subse- quently lover. Sup- planted in the affections of his mistress, he took himself off, and landed in Paris in 1741; supported himself by music copying; formed a liaison with a servant-girl

JEAN JACQUES
ROUSSEAU

by whom he had five children, all of whom he handed over to the foundling hospital.

The foundation of his literary fame was laid in 1749 by *A Discourse on Arts and Sciences*, in which he audaciously negatives the theory that morality has been favoured by the progress of science and the arts; followed this up in 1753 by *A Discourse on the Origin of Inequality*, morosely rejected the advances of society, and from his retreat at Montlouis issued *The New Héloïse* (1780), *The Social Contract* (1762), and *Emile* (1762).

These lifted him into the widest fame, but brought down on him the enmity and perse- cution of Church and State; fled to Switzer- land, where, after his aggressive Letter *the Mountain*, he wandered about, the victim of his own suspicious, hypochondriacal nature; found for some time a retreat in England under the patronage of Hume; returned to France, and died, not without suspicion of suicide, at Ermenonville. His *Confessions* and other autobiographical writ- ings, although unreliable in facts, reflect his strange and wayward personality with won- derful truth. He had a great influence in bringing on the revolutionary movement. (1712-1778).

Rousseau, Pierre Étienne Théodore, a French artist, born in Paris; at 19 exhibited in the Salon; slowly won his way to the front as the greatest French landscape painter; in 1848 settled down at Barbizon, in the Forest of Fontaine- bleau, his favourite sketching ground. His pictures include "The Alley of Chestnut Trees," "Early Summer Morning" and "The Edge of the Forest." (1812-1867).

Rovigo, town of Venetia, Italy, 27 m. S. of Padua, with many fine old buildings and a famous library. Pop. 40,000.

Rovuma, or *Ruvuma*, river of East Territory from Mozambique. It is un- navigable. The Mozambique river of Lugenda is its chief tributary. Length about 275 m. It was the scene of fighting between German and Portuguese forces in the World War.

Rowe, Nicholas, English dramatist and poet-laureate, born at Little Bar- ford, Bedfordshire; was trained for the law, but took to literature, and made his mark as a dramatist. *The Fair Penitent* and *Jane Shore* long maintaining their popularity; translated Lucan's *Pharsalia*, which won Dr. Johnson's commendation; edited Shakes- peare; became poet-laureate in 1715; held some government posts; was buried at Westminster Abbey. (1674-1718).

Rowing, a way of propelling a boat by term refers to boat-racing (as distinct from sculling) between eights, fours or pairs, each member of the crew wielding an oar apiece. It has long been a British sport, which the Universities have done much to encourage. The oldest race is the Thames Waterman's Race, for Doggett's Coat and Badge, instituted in 1715 by Thomas Doggett, a comedian. It is rowed annually on Aug. 1 from London Bridge to Chelsea. A Thames race of more recent institution is the Head of the River Race. One of the most important rowing events is the Henley Royal Regatta, founded in 1839, a four days' meeting for amateurs only. It is here that the race for the Grand Challenge Cup for eights is rowed, the trophy being the most highly prized in the rowing world. But the best-known race is the University Boat Race, held at the end of March between Oxford and Cambridge. It was instituted in 1829 at Henley, and, since 1856, has been held annually (except during the World War, 1915-1919). It is rowed from Putney to Mortlake, on the flood tide. Up to and including the year 1938, Cambridge has won 47, and Oxford 42 races. In 1877

the race was drawn. The Henley Stewards are the governing body for rowing in England, but the Amateur Rowing Association issues rules and is in control of amateur regattas.

Rowlandson, Thomas, English caricaturist, born in London; studied art in Paris; displayed great versatility and strength in his artistic work, e.g., in "Imitations of Modern Drawings," illustrations to Sterne's *Sentimental Journey* and *Munchausen's Travels*; ridiculed Napoleon in many cartoons. (1756-1827).

Rowley Regis, town of Staffordshire, shire, England, 3 m. SE. of Dudley; has large ironworks and potteries. Pop. 43,000.

Rowton Houses, establishments where working-men can obtain lodging for the night, and facilities for cooking their food at a small charge. The name traces back to Lord Rowton, who opened the first such institution in 1892.

Roxana, wife of Alexander the Great, a daughter of Oxyartes the Bactrian, who fell into Alexander's hands at the hill-fort of Sogdiana, 327 B.C. After Alexander's death, she placed herself and Alexander's son under the protection of Olympias, wife of Philip II., but both, together with Olympias, were murdered by Cassander, 311 B.C.

Roxburghshire, a Border pastoral land, between Berwick (N.E.), and Dumfries (S.W.); the Cheviots form its southern boundary; lies almost wholly within the basin of the Tweed, which winds along its northern border, receiving the Teviot, Jed, etc.; includes the fine pastoral districts of Teviotdale and Liddesdale, where vast flocks of sheep are reared; agriculture and woollen manufactures are important industries; Hawick is the largest town, and Jedburgh the county town; near Kelso stood the royal castle and town of Old Roxburgh, which gave its name to the county, destroyed in 1460. Area, 666 sq. m. Pop. 62,800.

Royal Academy of Arts, in London; was instituted in 1768 by George III., as a result of a memorial presented to him by 29 members who had seceded from "The Incorporated Society of Artists of Great Britain" (founded 1765); for some years received grants from the privy purse, and was provided with rooms in Somerset House; removed to Trafalgar Square in 1836, and to its present quarters at Burlington House in 1869; receives now no public grant; holds yearly exhibitions, and supports an art school; membership comprises 42 Royal Academicians, besides Associates. The Royal Hibernian Academy (founded 1823) and the Scottish Academy (1826) are similar institutions.

Royal Academy of Music, a body founded in 1823 in London to provide musical education for professional students of music. It confers fellowships, associateships and licentiatehips, and conducts examinations jointly with the Royal College of Music (q.v.), besides offering a number of scholarships.

Royal Air Force. See Air Force, Royal.

Royal Army Medical Corps (R.A.M.C.), a British army corps founded in 1873 to deal with the health of troops, treatment of casualties, examination of recruits, field ambulances, and the maintenance and manning of military hospitals. Its members are not considered as combatants during hostilities, although they wear military uniform.

Royal Army Pay Corps,

an army unit which mans pay offices at home and abroad, and audits the pay accounts of the Army, Territorial Force and Reserve, and pays service pensions and reservists' allowances.

Royal Army Service Corps,

(R.A.S.C.), a military unit founded in 1870 to undertake transport work and the care of military stores, and to attend to the commissariat. In warfare transport units of the Corps operate with each brigade of the fighting divisions.

Royal College of Music,

a British institution for musical education which originated in the National Training School for Music, founded in 1873, and opened in 1876, its first principal being Sir Arthur Sullivan. In 1882 this college was taken over by the Royal College of Music and formally opened as such in 1883. It bestows Associateships by examination and gives fellowships. The pupils average over 600, about 80 being scholars and exhibitioners.

Royal Engineers.

See Engineers, Corps of Royal.

Royal Exchange, a mercantile building in London near the Bank of England, originally built by Sir Thomas Gresham in 1566. It was destroyed in the Great Fire, and was followed by a second, also burnt in 1838. The present building, designed by Sir William Tite, was opened in 1844. It is now used as the head offices of an Assurance company.

Royal Family, in Great Britain, comprising the reigning sovereign and all the members of his family, including collaterals. The surname of the present royal family was during the World War changed from Guelph to Windsor. Where the sovereign is a King, the first person of the Royal family after the King is the Queen consort, if any. Under the Royal Marriage Act, 1772, no descendant of George II. may lawfully marry without the consent of the King, all marriages in defiance of this rule being void. The King's eldest son at birth becomes Duke of Cornwall if his father (or mother) is on the throne. If and when the sovereign chooses he can make his eldest son Prince of Wales and Earl of Chester. The reigning sovereign can control the custody and education of the children of his heir. See also Household, Royal.

Royal Household.

See Household, Royal.

Royal Observatory, an astronomical observatory at Greenwich, founded in 1675 by Charles II. The building was designed by Moore and Sir Christopher Wren and opened in 1676. There are other Royal Observatories at Blackford Hill, Edinburgh, and at the Cape of Good Hope.

Royal Society, The, incorporated by royal charter in 1662; owes its origin to the informal meetings about 1645 of a group of scientific men headed by Theodore Haak, a German, Dr. Wilkins, and others. In 1665 the first number of their *Philosophical Transactions* was published, which, with the supplementary publication, *Proceedings of the Royal Society*, begun in 1800, constitute an invaluable record of the progress of science to the present day. Encouragement is given to scientific investigation by awards of medals (Copley, Davy, Darwin, &c.), the equipping of scientific expeditions (e.g., the *Challenger*, &c.). Weekly meetings are held at Burlington House (quarters since 1857) during the session (Nov. till June). It receives a parliamentary grant of £4,000 a year, and acts in an informal way as scientific adviser to Government.

Royal Standard,

incorporating the arms of England, Scotland and Ireland. It is flown only on buildings, ships, &c., in which the monarch is at the moment present.

Royal Tank

Corps, a British Army unit formed after the World War to man and operate tanks (*q.v.*). It is organized in seven battalions, and was largely increased and reorganized in 1937 and 1938.

the personal banner of the King,

ROYAL STANDARD

Royan, a pretty seaside town of France, on the estuary of the Gironde, 60 m. NW. of Bordeaux; trebles its population of about 8,000 in the summer.

Royston, market town of Hertfordshire, England, on the Icknield Way. It has artificial manure works, flour mills, and malting and brewing industries. Pop. 3,900.

Royton, a town of Lancashire, England, 2 m. from Oldham. Cotton spinning is carried on. Pop. 16,700.

Ruabon, a mining town in Denbighshire, Wales, 4½ m. SW. of Wrexham; has collieries and ironworks. Pop. 3,300.

Ruanda, a district to the E. of the Belgian Congo, on the border of Tanganyika Territory. Ruanda, together with the district of Urundi, were formerly part of German East Africa, and were handed over to Belgium as mandatory after the World War. Area of the two districts 20,535 sq. m. Pop. (est.) 3,510,000.

Rubber, formerly known also as caoutchouc, or gum elastic, is a product of the milky juices of several tropical and subtropical plants found chiefly in the East Indies, Ceylon, Central and South America, West Africa, and India. Its properties were partially known to the Spaniards in the West Indies early in the 17th Century; its first introduction to this country was about 1770, when it was employed by artists for erasing black-lead pencil marks, hence its familiar name. It is collected by making incisions in the tree-trunk and gathering the slowly exuding juice, which is first solidified by drying, then purified by boiling and washing. It is flexible and elastic, insoluble in water, and impenetrable to gases and fluids, and these qualities give it great commercial importance.

The use of pure rubber has been greatly superseded by that of "vulcanized" rubber; mixed with from ½ to 1 of its weight of sulphur and combined by heat, the rubber acquires greater elasticity, is not hardened by cold or rendered viscid by heat, and is insoluble in many of the solvents of pure rubber. The world production now approaches 800,000 tons per year, of which about two-eighths is produced in the British Empire; an output restriction scheme has been agreed on between Britain and the Netherlands. Artificial rubber has been made from isoprene; the process was used during the World War, but owing to its cost cannot compete commercially with the natural product.

Rubble, fragments of stone of irregular walls. Rubble boundary or fence walls can be laid dry, with a coping of edge stones set in earth. For walls of buildings, lime mortar is used for bedding the stones.

Rubefacient, a medicinal agent the skin induces redness or hyperæmia. The purpose of a rubefacient is to check inflammation by counter-irritation; those most

often used are mustard, pepper, chloroform and turpentine.

Rubens, Peter Paul, Flemish painter, born at Siegen, in Westphalia; came in 1587 to Antwerp, where he sedulously cultivated the painter's art, and early revealed his masterly gift of colouring; went to Italy, and for a number of years was in the service of the Duke of Mantua, who employed him on a diplomatic mission to Philip III. of Spain; executed at Madrid some of his finest portraits; returned to Antwerp in 1609; completed in 1614 his masterpiece, "The Descent from the Cross," in Antwerp Cathedral; with the aid of assistants he painted the series of 21 pictures, now in the Louvre, illustrating the principal events in the life of Marie de' Medici; during 1628-1629 diplomatic missions engaged him at both the Spanish and English Courts, where he executed many paintings for Charles I.—e.g., "War and Peace," in the National Gallery—and Philip IV.; was knighted by both; in all that pertains to chiaroscuro, colouring, and general technical skill Rubens is unsurpassed, and in expressing particularly the "tumult and energy of human action," but he falls below the great Italian artists in the presentation of the deeper and sublimer human emotions; was a scholarly, refined man, an excellent linguist, and a successful diplomatist; was twice married; died at Antwerp, and was buried in the Church of St. Jacques. (1577-1640.)

RUBENS

Rubiaceae, the madder family of the dicotyledonous plants, which contains 450 genera and over 5,000 species, mostly tropical; among the principal genera are *Coffea* and *Cinchona*, containing the species which yield coffee and quinine respectively; *Rubia*, which produces the rich scarlet madder dyes; and *Uragoga*, containing the species which yield ipecacuanha.

Rubicon, river of Italy, associated with the Flumecino, a mountain torrent which springs out of the eastern flank of the Apennines and enters the Adriatic N. of Rimini. It was the boundary between Roman Italy and Cisalpine Gaul, a province administered by Cæsar; his crossing of it in 49 B.C. was tantamount to a declaration of war against the Republic, hence the expression "to cross the Rubicon" is applied to the decisive step in any adventurous undertaking.

Rubidium, a metallic chemical element of the alkali metals; symbol Rb; atomic number 37; atomic weight 85.45. It colours a flame reddish-violet. It is widely distributed in soil in minute traces, and certain rare minerals such as lepidolite contain a fairly high percentage of it; it is weakly radioactive.

Rubinstein, Anton, Russian pianist of Jewish parents, near Jassy, in Moldavia; studied at Moscow, under Liszt in Paris, and afterwards at Berlin and Vienna; established himself at St. Petersburg in 1848 as a music-teacher; became director of the Conservatoire there; toured for many years through Europe and the United States, achieving phenomenal success; resumed his directorship at St. Petersburg in 1887; composed operas (e.g., *The Maccabees*, *The Demon*), symphonies (e.g., *Ocean*), sacred operas (e.g., *Paradise Lost*), chamber music, and many exquisite songs; as a pianist he was a master of technique and expression. (1829-1894.)

Rubrics, instructions in the Book of Common Prayer, the Roman Breviary and Missal, and similar service-books, for the recitation of prayers and the conduct of divine service; so called because they were originally written or printed in red characters.

Rubus, a genus of shrubs of the natural order Rosaceae, bearing white or pink flowers and edible fruits, including the blackberry or bramble (*Rubus fruticosus*) and the raspberry (*Rubus idaeus*).

Ruby, a gem which in value and hardness ranks next to the diamond; is dichroic, of greater specific gravity than any other gem, and belongs to the hexagonal system of crystals; is a pallid, ruddy-tinted stone, and, like the sapphire, a variety of corundum, also found (but rarely) in violet, pink, and purple tints. The finest specimens come from Upper Burma. The Spinel ruby is the commoner jeweller's stone, is of much less value, specific gravity, and hardness, non-dichroic, and forms a cubical crystal.

Rückert, Friedrich, German poet, born at Schweinfurt, in Bavaria; at Würzburg University showed his talent for languages, and early devoted himself to philology and poetry; was for 15 years professor of Oriental Languages at Erlangen; introduced German readers, by excellent translations, to Eastern poetry; filled for some time the chair of Oriental Languages in Berlin. (1788-1866).

Rudd, or Red Eye, British fresh-water fish (*Scardinius erythrophthalmus*) allied to the roach; tinged with bronze, and has reddish fins; the dorsal fin is farther back than in the case of the roach. It is found in lakes and slow streams, and apart from Britain is found in Europe (except Spain), Asia Minor and Siberia. It can grow as long as 18 in. and weigh 3½ lb.

Rudolf I., founder of the House of Hapsburg; born, the son of a count, at Schloss Limburg (Briegau); greatly increased his father's domain by marriage, inheritance, and conquest, becoming the most powerful prince in S. Germany; acquired a remarkable ascendancy among the German princes, and was elevated to the imperial throne in 1273, and by friendly concessions to the Pope, Gregory IX., terminated the long struggle between the Church and the empire; shattered the opposition of Ottocar, king of Bohemia, and brought peace and order to Germany. (1218-1291).

Rudolf II., Holy Roman Emperor, son of Maximilian II., born in Vienna; became king of Hungary in 1572, and of Bohemia three years later; ascended the imperial throne in 1576. He left the empire to the care of worthless ministers; disorder and foreign invasion speedily followed; persecution inflamed the Protestants. By 1611 his brother Matthias, supported by other kinsmen, had wrested Hungary and Bohemia from him. He had a taste for astrology and alchemy, and patronised Kepler and Tycho Brahe. (1552-1619).

Rudolf, Lake, in Africa, between the Anglo-Egyptian Sudan, Kenya, and Italian East Africa, 185 m. long and over 30 broad, and brackish in taste; discovered in 1888.

Rue (*Ruta graveolens*), an erect, bushy, evergreen shrub, 2 to 3 ft. high, type of the rue family (Rutaceae), introduced from S. Europe into Britain in the 16th Century and cultivated in many gardens. The leaves yield an oil valuable as a narcotic and stimulant, and the presence of this oil gives the plant a strong smell.

Rueil-Malmaison, a town in the dept. of Seine-et-Oise, France, on the R. Seine, 5 m. N.E. from Versailles. Photographic materials are manufactured. Pop. 24,900.

Ruff, a light-brown spotted or mottled bird (*Macheles pugnax*) native to

Africa, but a spring migrant to Britain and N. Europe generally, becoming ever rarer. In the breeding season the neck of the male is ringed with a ruff or frill of long, black, red-barred feathers. The males fight savagely for the female birds, which are known as reeves.

MALE RUFF

Ruffe, or Pope (*Acerina cernua*), a small, speckled, fresh-water edible fish, of olive-green hue marked with brown, common in the Norfolk Broads.

Rufiji, a river of Tanganyika Territory, East Africa. It rises in the Livingstone mountains by Lake Nyasa, flows E. and discharges by a delta into the Indian Ocean SW. of Mafia I.

Rugby, town in Warwickshire, England, the Avon, 83 m. NW. of London; an important railway centre and seat of a famous public school founded in 1587, of which Dr. Arnold (*q.v.*), and Archbishops Tait and Temple were former headmasters. The town is a centre of the motor industry, and near to it is the largest wireless transmitting station in the country, used for Imperial communication. Pop. 36,000.

Rugby Football. See Football, Rugby.

Rugby Union, the English association of Rugby football clubs, founded in 1871, to ensure uniformity of regulations. Scotland, Wales and Ireland have their own Rugby Unions. The English Union owns a ground at Twickenham, and the Scottish one at Murrayfield, Aberdeen.

Rugeley, market town of Staffordshire, England, 25 m. from Birmingham. Coal mines are in the district. Pop. 7,100.

Rügen, a deeply-indented island of Germany, in the Baltic, separated from the Pomeranian coast by a channel (Strela Sund) about a mile broad. The soil is fertile, and fishing is actively engaged in. Bergen is the capital. Pop. c. 45,000.

Ruhr, an affluent of the Rhine, which joins it at Ruhrort after a course of 142 m.; navigable to craft conveying the product of the coal-mines to the Rhine.

Ruhr Occupation, the advance of French and Belgian troops into the Ruhr valley in Germany in Jan., 1923, on account of the failure of the German government to meet its reparations (*q.v.*) obligations. The occupation was terminated in 1925.

Ruislip-Northwood, Urban District in Middlesex, England, 15 m. NW. of London, of which it is a rapidly-growing residential suburb. Pop. 16,000.

Rule of Faith, the name given to the ultimate authority or standard in religious belief, such as the Bible alone, as among Protestants; the Church and the Bible as interpreted by her, as among Roman Catholics; reason alone, as among rationalists; the inner light of the spirit, as among mystics.

Rum, an alcoholic spirit made from sugar cane. The ordinary clear Jamaican rum is distilled from the fermented skins of sugar-bollers and molasses, together with some cane juice to impart flavour. Like all other spirit, it is colourless as it issues from

the still, and is coloured either by storing in sherry casks or by adding burnt sugar. Much so-called rum is made in Europe from beet-sugar spirit with a flavouring of real rum.

Rum, a mountainous island in the Inner Hebrides, lies 15 m. off Ardnarmurchan Point; a very small portion of it is cultivated. Area, 42 sq. m.

Rumania, a kingdom of SE. Europe, wedged in between the Ukraine (N.) and Bulgaria (S.), with an eastern shore on the Black Sea; comprises the old principalities of Moldavia and Wallachia, which, long subject to Turkey, united under one ruler in 1859, and received their independence in 1878, in which year the province of Dobruja was ceded by Russia; in 1881 the combined provinces were recognized as a kingdom; after the World War Transylvania, formerly Hungarian, was added to the kingdom; and Bessarabia and Bukovina annexed. It forms a fertile and well-watered plain sloping N. to S., which grows immense quantities of grain; the chief exports are grain and cereals, petroleum, live animals and wood. Wheat, maize and barley are the main crops; natural gas, petroleum, salt and lignite the principal mineral wealth. The bulk of the people belong to the Greek Church; peasant proprietorship on a large scale is a feature of the national life; government is vested in a hereditary limited monarchy, a council of ministers, a senate, and a chamber of deputies. Bucharest is the capital, and Galatz the chief port, other large towns are Chisinau, Cernauti and Iasi. Area, 113,890 sq. m. Pop. 19,420,000.

Rumelia, Eastern, name for a district Thrace and a portion of Macedonia; it was incorporated in Bulgaria in 1885.

Rumford, Count (Benjamin Thompson), American soldier, phil-anthropist, and physicist, born at Woburn, Massachusetts; fought on the British side during the American War; became a lieutenant-colonel, and for important services was knighted in 1782 on his return to England; entered the Bavarian service, and carried through a series of remarkable reforms, such as the suppression of mendicancy, the amelioration of the poorer classes by the spread of useful knowledge, culinary, agricultural, etc.; was made a Count of the Holy Roman Empire, and placed in charge of the War Department of Bavaria; was a generous patron of science in England and elsewhere; his later years were spent in retirement near Paris, where he devoted himself to physical research, especially as regards heat. His great contribution to science was the recognition of heat as a form of energy. (1753-1814).

Ruminants, a division of the Mammalia, a malian order Ungulata, possessing the habit of chewing the cud. After swallowing their food, which passes in the first place into the paunch, it is later returned to the mouth for leisurely chewing, passing thence back to the stomach. The class includes camels, goats, deer, sheep and cattle.

Rump, The, name of contempt given to the remnant of the Long Parliament (q.v.) in 1659.

Runciman, Walter, first Viscount, South Shields. British statesman; born at South Shields. Entered Parliament as a Liberal in 1899; held minor government offices from 1905 to 1908, when he became President of the Board of Education; from 1911 to 1914 was Minister of Agriculture, and President of the Board of Trade from 1914 to 1916 and 1931 to 1937, in which year he received a peerage. In 1938 he undertook a mission to mediate unofficially between the Sudeten-Germans and the Czechoslovak Government. (1870-)

Runcorn, river-port of Cheshire, Eng., land, on the Mersey and the Manchester Ship Canal, 12 m. SE. of Liverpool, at the terminus of the Bridgewater Canal; has excellent docks; industries embrace ship-building and iron-founding. Pop. 23,600.

Runes, an alphabet used by the Northmen, men of Sweden, Norway, Denmark, Britain and Ireland, used mainly for cutting inscriptions on wood or stone. There are three runic alphabets, much alike, the oldest being the Gothic of 24 letters or runes. The letters are formed almost entirely of straight lines; it is uncertain whether they were derived from the Latin alphabet or had an independent origin.

Running, a form of athletics popular since earliest times, the principle track races to-day being classified as sprint (short distances requiring great speed), middle distance (requiring speed and endurance), and long distance (requiring great endurance). Other forms of running races are relay, cross-country, steeplechasing and the marathon (q.v.).

Runnymede, a meadow on the right bank of the Thames, near Staines, Middlesex, England, 36 m. SW. of London, where King John signed the Magna Carta, June 15, 1215.

Rupree, a silver coin, the monetary unit of India, with an exchange value of 1s. 6d.; 1 lakh of ruprees equals 100,000; a crore, 10,000,000. It is divided into 16 annas, 64 pice, or 192 pies.

Rupert, Prince, son of Frederick V., Elector Palatine, and grandson

of James I. of England; took part in the Thirty Years' War, and suffered 3 years' imprisonment at Linz; in England, at the outbreak of the Civil War was entrusted with a command by Charles I., and took an active part in all the great battles; finally surrendered to Fairfax at Oxford in 1646; two years later took command of the Royalist ships and kept up a gallant struggle till his defeat by Blake in 1651; escaped to the West Indies, where he kept up a privateering attack upon English merchantmen; came in for many honours after the Restoration, and distinguished himself in the Dutch War; the closing years of his life were quietly spent in scientific research. (1619-1682).

PRINCE RUPERT

Rupert's Land, a name given by the territory around Hudson Bay or Strait; it now forms part of Quebec, Manitoba and the NW. Territories.

Rural Dean, a clergyman of the Church of England, who, under the bishop and archdeacon, has the oversight of the clergy within a given district.

Ruschuk, town in Bulgaria, on the Danube, 40 m. S. by W. of Bucharest; manufactures pottery, bricks, sugar and soap; has a number of interesting mosques; its once important fortifications were reduced in 1877. Pop. 49,500.

Rush, the common name of the plants of the genus *Juncus* of the family Juncaceae, comprising some 225 species, 18 of which are found in Britain, generally in ditches, on riversides, and marshy places. The stems are cylindrical and soft, sometimes destitute of leaves, 2-3 ft. high, with flowers in clusters. They are used for making chair-seats, baskets, mats, etc.; the pith was formerly made into wicks for "rush-light" candles. One species *Juncus squarrosus*, is

especially common and affords valuable fodder for sheep if grass is scarce.

Rush, Benjamin, American physician, and professor, born at Byberry near Philadelphia; became professor of chemistry at Philadelphia in 1769; sat in Congress, and signed the Declaration of Independence (1776); held important medical posts in the army; resigned and assumed a medical professorship in Philadelphia; won a European reputation as a lecturer, philanthropist, and medical investigator; published several treatises, and from 1799 acted as treasurer of the U.S. Mint. (1745-1813).

Rushden, town of Northamptonshire, England, 4 m. SE. of Wellingborough; a centre of the boot and shoe trade. Pop. 14,260.

Ruskin, John, English art-critic and social reformer, born in London.

The first volume of his *Modern Painters*, mainly in defence of the painter Turner and his art, appeared in 1843, and soon extended to five considerable volumes, followed in 1849 by *The Seven Lamps of Architecture*; this was followed in 1851 by the *Stones of Venice*. In 1862 he published *Unto this Last*, on the first principles of political economy, the doctrines in which were further expounded in *Munera Pulveris*, *Time and Tide* and *Fors Clavigera*. From 1869 to 1879, and again from 1883 to 1884, he was professor of fine art at Oxford. The story of his life is told in part in his unfinished *Præterita*. (1819-1900).

JOHN RUSKIN

Russell, Bertrand Arthur William Russell, third Earl, British philosopher and mathematician. His works include *Principia Mathematica* (with A. N. Whitehead), *An Introduction to Mathematical Philosophy*, and numerous semi-popular works on social philosophy, ethics, and mathematical and physical questions. A convinced pacifist, he was imprisoned for 6 months in 1918 for a newspaper article; he has visited the U.S.A. and China in the cause of international peace. (1872-).

Russell, George William, Irish poet and writer under the pseudonym A. E.; born at Lurgan. He turned from painting to poetry in early life, and after 1897 became an enthusiast for agricultural co-operation in Ireland, in the interest of which he edited for some years from 1905 a weekly periodical, *The Irish Homestead*. His published volumes of verse and essays include *The Earth Breath*, *Impressions and Reveries*, and *The Avatars*. (1887-1935).

Russell, John, Earl, known best as Lord Russell, John Russell, British statesman, entered Parliament in 1813, took up vigorously the cause of parliamentary reform and Catholic Emancipation, joined Earl Grey's ministry in 1830 as Paymaster of the Forces, framed and zealously advocated the Reform Bill (1832), drove Peel from office in 1835, and became, under Lord Melbourne, Home Secretary and leader of the Commons. Four years later he was appointed Colonial Secretary, warmly espoused the cause of repeal of the Corn Laws, formed a ministry on the downfall of Peel in 1846, and dealt with Irish difficulties and Chartism; resigned in 1852, and in the same year became Foreign Secretary under Aberdeen; became unpopular on account of his management of the Crimean War (1855) and conduct at the Vienna Conference; again Foreign Secretary in Palmerston's ministry of 1859, an earl in 1861, and premier a second time in 1865-1866; author of various pamph-

lets, biographies, memoirs, etc.; was twice married; was nicknamed "Finality John" from his regarding his Reform Bill of 1832 as a final measure. (1792-1878).

Russell, William, Lord, English politician in Charles II.'s reign, younger son of the Earl of Bedford; entered the first Restoration Parliament, became a prominent leader in the Country Party in opposition to the Cabal (q.v.) and the Popish schemes of the King; vigorously supported the Exclusion Bill to keep James, Duke of York, from the throne in 1683; was charged with complicity in the Rye-house Plot, was found guilty on trumped-up evidence, and beheaded. (1639-1683).

Russell, William Clark, English novelist, born in New York; gained his experience of sea life during 8 years' service as a sailor; was a journalist before, in 1887, he took to writing novels, which include *John Holdsworth* and *The Wreck of the "Grosvenor"*. (1844-1911).

Russell, Sir William Howard, British war correspondent, born near Dublin; had already acted for some years as war correspondent for *The Times* before his famous letters descriptive of the Crimean War won him a wide celebrity; subsequently acted as correspondent during the Indian Mutiny, American Civil War, Franco-Prussian War, etc.; knighted in 1895. (1820-1907).

Russell of Killowen, Charles Russell, Baron, British lawyer and judge, born in Newry; called to the English bar in 1859, entered Parliament in 1880. Was counsel for Parnell in the *Parnell v. The Times* trial; became Attorney-General in 1886, receiving also a knighthood; in 1894 was elevated first to a Lordship of Appeal, later to the Lord Chief Justiceship, and created a life-peer. (1832-1900).

Russia, or the Union of Socialist Soviet Republics (U.S.S.R.), comprises a federation of 11 Soviet Republics (Russian, Ukrainian, White Russian, Armenian, Georgian, Azerbaijan, Turkmenistan, Uzbekistan, Tadzhik, Kazak and Kirghiz), with a number of other territories and regions in various states of political evolution. It occupies the whole of Eastern Europe and Northern Asia, the European boundaries marching with Finland, Estonia, Latvia, Poland and Roumania, the Asiatic with Turkey, Iran, Afghanistan, India, Tibet, Mongolia and Manchuria. Its total area is about 8,100,000 sq. m., and estimated population 166,000,000. The capital is Moscow.

A great part of the area is flat steppe, suitable especially in the Asiatic regions for pasture; agriculture, though still occupying most of the population, is giving place in many areas to manufacturing industries. The minerals include coal, iron, oil, manganese, copper, and gold. Agriculture is being reorganised by the establishment of collective farms, which are rapidly replacing peasant holdings. Since the revolution of 1917, which overthrew the power of the Czar, and established a Communist ("Bolshevik") administration, government has been carried on by local soviets federated by steps to a supreme Soviet at Moscow; but in actual fact the Communist Party exercises a practical dictatorship through its representatives in the local and central Soviets. Freedom of religion is in theory granted, but the state as such has no religious belief. Education is making rapid strides, great emphasis being laid on technical training. There are 22 Universities. The army ("Red Army") is organised on a universal service basis.

In 1928 and 1933 two Five-Year Plans were formulated, aiming at the development of Russia's natural resources, wide-scale industrialisation, economic planning on a Socialist

basis, and the attainment of universal education. In May, 1937, plans were required from the leaders of industry for a third Five-Year Plan. Since 1928 the U.S.S.R. has gradually been entering into the field of European politics. In 1928 it originated the move for general disarmament. In 1929 entered into diplomatic relationship with Gt. Britain, and in 1931 with France, the Franco-Soviet Pact being signed in 1936, and reaffirmed a year later. In 1932 the Soviet Government was recognised by the U.S.A., but on the other hand the U.S.S.R. feels itself gravely menaced by the growth of Fascist power in Europe and the encroachments of Japan in N. China. In 1934 it was admitted to the League of Nations, with a permanent seat on the Council.

Russian Revolution. The gradual discontent of the Russian masses with the Czarist government in the World War led in March 1917, to open rebellion, the collapse of that government, and the abdication of the Czar. A series of provisional democratic governments followed, but Lenin's return to Russia and the growth of Bolshevik sentiment eventually brought about the complete transfer of power to the Soviets on November 7, 1917. After a Constituent Assembly had met in the following year a period of chaos followed, the peace of Brest-Litovsk being signed with Germany, the Czar and his family assassinated, the Church disestablished and the national debt repudiated. Anti-Bolshevik groups in various parts of the country were supported by Allied intervention in N. Russia (Murmansk and Archangel).

In 1921 the anti-Bolshevik risings had been suppressed and the strict Communism of the early days of the revolution was replaced by a less revolutionary system allowing of private trading. Relations were gradually established with other Powers, though in 1927, after a raid on the London trade delegation premises, those with Great Britain were for a time suspended. Lenin, the leader of the nation throughout these years, died in 1924, and the effective power fell into the hands of Stalin (q.v.). Disunion broke out in the ruling Communist Party, and in 1928 Trotsky, the leader of the anti-Stalinists, was exiled to Siberia, later leaving the country.

Two successive "Five-Year Plans" for economic and industrial development were carried through with a high degree of success, but from the beginning of the "thirties" increasing dissatisfaction with Stalin's rule showed itself, and from time to time "purges" and mass trials of alleged "counter-revolutionaries" and "Trotskyists" took place, a large number of the chief figures of the early days of the Revolution being put to death or otherwise "liquidated." Meanwhile the military forces were organised on a defensive basis, and the U.S.S.R. entered the League of Nations. By 1938 the authority of Stalin seemed firmly established, and the Trotskyist opposition practically overthrown.

Russo-Japanese War, the, was started by Japan in 1904 on the failure of her demand that Russia should evacuate Korea and Manchuria. Russia suffered naval reverses in February off Port Arthur, and a military defeat at Nanshan in May. Despite strenuous efforts by Russia, Port Arthur fell in January, 1905, and after American mediation the war ended in September, Japan gaining most of her demands by the Treaty of Portsmouth (1905).

Russo-Turkish Wars, the three wars in (1) 1827-8, ended by the Treaty of Adrianople which secured independence for Greece and the freedom of the Dardanelles; (2) 1844-6,

(the Crimean War) in which the English and French supported Turkey, and which ended with the Peace of Paris guaranteeing Turkish integrity; (3) 1877-8, which ended in the Treaty of San Stefano, securing the independence of the Balkan States.

Rust, the film which appears on metals on account of atmospheric corrosion. It consists of the oxide of the metal, but also sometimes of basic carbonate or sulphate. The oxidation of iron is most difficult to counteract; but iron will not rust in the absence of carbon dioxide in the moisture film on its surface. Rust on copper forms a green patina which protects the metal from further action. In botany the name is given to a disease that attacks the leaves and stems of plants. Wheat rust (*Puccinia*) first develops on the leaves of the barley, the spores being then carried by the wind to the wheat stems and so causing the "red rust" of wheat.

Rutaceae, a family of dicotyledonous trees and shrubs, including the typical genus *Ruta* (of which *Ruta graveolens*, Rue, is the common one), and the genus *Citrus*, including the orange, lemon and shaddock, or grapefruit.

Ruth, a Book of the Old Testament telling the story of the marriage of a Moabitish woman, Ruth, an ancestor of David. It almost certainly dates from after the Exile, but nothing valid can be conjectured as to its exact date or its authorship.

Ruthenia, or Subcarpathian Russia, one of the constituent areas of Czechoslovakia, with an area of 4,900 sq. m. and a pop. of 726,000. It is mainly agricultural; the chief town is Mukachevo.

Ruthenium, a metallic chemical element related to rhodium and palladium; it occurs in small quantity in the ores of platinum, osmium and iridium, and was discovered in 1828 by Osann. Symbol Ru; atomic number 44; atomic weight 101.7. It has little application and is of no commercial importance.

Rutherford, Ernest, first Baron, British physicist, born in New Zealand and educated at Cambridge. Professor of Physics at McGill University (Montreal) and Manchester, he in 1919 succeeded Sir J. J. Thomson as Cavendish professor at Cambridge. He did much to lay the foundations of the study of radioactivity and the conduction of electricity through gases. His greatest work has been in connection with the structure of the atom. Carrying on the work of Thomson, he gave the experimental basis to modern theories of the atom. He brought forward the planetary theory of the atom. He received a Nobel Prize for Chemistry in 1908, the Order of Merit in 1925, and was created Baron Rutherford in 1931. (1871-1937).

Rutherglen, a town of Lanarkshire, Scotland, on the Clyde, 3 m. SE. of Glasgow, of which it is practically a suburb; an important metal and chemical manufacturing centre, with shipyards and collieries. Pop. 25,000.

Ruthin, an interesting old town of Denbighshire, Wales, on the Clwyd, 8 m. SE. of Denbigh, with mineral water manufacture. Pop. 3,000.

Ruthven, a conspiracy entered into by certain Scottish nobles, headed by William, first Earl of Gowrie, to seize the young King James VI., and break down the influence of his favourites, Lennox and Arran. At Ruthven Castle, or Huntingtower, in Perthshire, on August 23, 1582, the king was captured and held for 10 months. Arran was imprisoned, and Lennox fled, to die in France. The conspirators were proclaimed guilty of treason, and Gowrie was executed in 1584.

Ruthwell Cross, a remarkable 17½ ft. high, found in Ruthwell parish, 9 m. SE. of Dumfries, Scotland; dates back to the 7th Century; bears runic and Latin inscriptions; was broken down in 1642, but found and re-erected in 1802.

Rutland, the smallest county of England, bounded by Lincoln, Northampton, and Leicester; has a pleasant undulating surface, with valleys in the E. and extensive woods; is watered by the Welland; is largely pastoral, and raises fine sheep; dairy produce (especially cheese) and wheat are noted; Oakham is the county town. Area, 152 sq. m. Pop. 17,400.

Rutland, a title in the English peerage, first conferred (an earldom) on Edward Plantagenet (1373-1415), son of Edmund, duke of York, and later assumed (perhaps without real title) by other members of the house of York. The earldom was conferred again in 1525 on Thomas Manners (d. 1543) and has been held in his family ever since. The most important members of this line have been Thomas himself, a favourite of Henry VIII. from whom he received Belvoir Castle, the family residence; and John the ninth earl (1632-1711) who favoured the 1688 Revolution and was created marquis of Granby and duke of Rutland in 1703 by Queen Anne; and John, the seventh duke, an English statesman, associated with the "Young England" party under Disraeli, subsequently holder of a number of governmental offices. (1818-1906). The present duke, John Henry Montagu Manners, the ninth of the line, succeeded to the title in 1925. (1886-).

Ruwenzori, a mountain range of Central Africa between Lakes Albert and Edward. It has a length of about 65 m. and a width of 30 m. The highest peaks, about 17,000 ft., are Mt. Stanley and Mt. Margherita. The range was discovered by Stanley in 1888.

Ruysdael, Jacob, Dutch landscape painter, born and died at Haarlem. Few particulars of his life are known. His best pictures, to be seen in the galleries of Dresden, Berlin, and Paris, display a fine poetic spirit. (c. 1628-1682).

Ruyter, Michael Adriaaszoon de, Dutch admiral, born at Flushing; from a boy of 11 served in the merchant and naval service; commanded a ship under Van Tromp in the war with England, 1652-1654; was ennobled in 1660 by the king of Denmark for services rendered in the Dano-Swedish war; for two years fought against Turkish pirates in the Mediterranean; commanded the Dutch fleet in the second war against England, and in 1667 struck terror into London by raiding and burning the shipping in the Thames; held his own against England and France in the war of 1672; co-operated with Spain against France; was routed and mortally wounded off the coast of Sicily. (1607-1675).

Ryazan, city of Russia, 114 m. SE. of Moscow, a railway centre with industries of various kinds. Pop. 56,000.

Rybinsk, town in Russia, on the Volga, 48 m. NW. of Yaroslavl; connected by canal with Leningrad; industries embrace boat-building, brewing, and distilling. Pop. 37,000.

Rydal Water, Westmorland, one of the smaller English lakes. It lies immediately SE. of Grasmere, from which it receives the R. Rothay, and is about ½ m. in length and between 1 and 2 m. in circumference. In the centre of the lake is an island with groups of lofty pine trees, and near its western head is the famous "Wishing Gate." It is famous for its associations with Wordsworth and other literary men.

Ryde, watering-place on the NE. coast of the Isle of Wight, 4½ m. SW. of Portsmouth; rises in pretty wooded terraces from the sea; has a fine promenade, park, and pier. Pop. 18,900.

Rye, town and former port in the SE. e. corner of Sussex, situated on rising ground flanked by two streams, 63 m. SE. from London; is one of the Cinque Ports (q.v.); the recession of the sea has left it now 2 m. inland; has a fine Norman and Early English church. Pop. 4,000.

Rye, the grain, *Secale cereale*, the prevailing cereal of Scandinavia, the Netherlands and Northern Germany. It grows on poor soils unsuited to wheat, and is about 90 per cent. as nutritious. It is the chief grain from which Hellands is distilled. It is subject to a disease known as ergot, and when attacked thereby is said to be "spurred."

RYE

Rye Grass, the common name of certain grasses of the genus *Lolium*, applied especially to the *Lolium italicum* and *Lolium perenne*, cultivated as fodder. Several weeds are included in the same genus, including the damel (*Lolium temulentum*), the only poisonous British grass, the poison being due to a fungus in the grain.

Rye House Plot, an abortive conspiracy to assassinate Charles II. of England and his brother James, Duke of York, planned by Colonel Rumsey, Lieutenant-Colonel Walcott, the "plotter" Ferguson, and other reckless adherents of the Whig party. The conspirators were to conceal themselves at a farmhouse called Rye House, near Hertford, and to waylay the royal party returning from Newmarket. The plot miscarried owing to the king leaving Newmarket early; the chief conspirators were executed.

Rykov, Alexei Ivanovich, Russian politician. Born at Saratov; before the World War was several times imprisoned for revolutionary activities; after the 1917 revolution he was elected to the Central Committee of the Moscow Soviet. In 1918 he was made chairman of the Supreme Economic Council, and in 1924 succeeded Lenin as President of the Council of People's Commissars; was expelled from the Communist Party from 1929 to 1931, after which he became Commissar for Posts and Telegraphs; in 1937 he was sentenced to 10 years' imprisonment as a Trotskyist. (1881-).

Rylands, John, English textile manufacturer, and philanthropist, born at St. Helens; inherited and improved a large business begun at St. Helens and removed to Wigan, with branches elsewhere. His widow founded as his memorial the John Rylands Library, Manchester. (1801-1838).

of the most prominent men of his day, including the monument to Sir Isaac Newton in Westminster Abbey, statue of Marlborough, busts of Walpole, Bellingbrooke, and Pope. (1684-1710).

Ryswick, Peace of, signed in September, 1697, at the village of Ryswick, 2 m. S. of The Hague, by England, Holland, Germany, and Spain on the one hand and France on the other, terminating the sanguinary struggle which had begun in 1688.

Ryton, urban district of Durham, England, on the R. Tyne, 3 m. from Gateshead. There are collieries in the district. Pop. 14,300.

S

Saadi. See *Sadi*.

Saale, river of Germany, rises in the Fichtelgebirge, near Zell, in Upper Bavaria, flows N. for 226 m. and joins the Elbe at Barby; Jena, Halle and Naumburg stand on its banks.

Saar, or Saarland, state of Germany, adjoining the French frontier and lying N. of Lorraine. It is watered by the R. Saar, has an area of 738 sq. m., and is an important source of coal and iron. Saarbrücken is the chief town. Chiefly belonging to Prussia prior to 1920, by the Peace Treaty the Saar was placed under the rule of the League of Nations for 15 years, and in 1935, as the result of a plebiscite, was returned to Germany. Pop. 812,000.

Saarbrücken, town of Germany, capital of the Saar state; it stands on the R. Saar, 50 m. ENE. of Metz, and is the centre of an important colliery district which supports many local industries, including the manufacture of glass and iron goods, chemicals and textiles. Pop. 125,000.

Saarlouis, a town in the Rhine province of Prussia, on the R. Saar, 31 m. SE. of Trier. There are manufactures of leather, pottery and glass, and in the district are coal-mines. Pop. 16,300.

Sabæans, a trading people in ancient Arabia, the modern regions of Yemen, Hadhramaut and Asir, bordering the Red Sea. They early became supreme in S. Arabia, and their kingdom—of which the famous Queen of Sheba, or Saba, who came to visit Solomon, is thought to have been queen—was rich and powerful. In the 1st Century B.C. they suffered from incursions by the Romans and local tribes; in the 6th Century A.D. the Abyssinians, and later the Persians, conquered the country. They have left numerous inscriptions in a Semitic dialect and also the great stone dam at Marib (the ancient Saba, their capital), a masterpiece of engineering.

Sabatini, *Rafael*, English novelist and dramatist, born at Jesi, in Central Italy, of an Italian father and an English mother, author of many popular novels, including *Scaramouche*, *Anthony Wilding*, *The Black Swan*, *Captain Flood*, etc., also of a number of plays and biographies of Cesare Borgia and Torquemada. (1875-).

Sabbath, the seventh day of the week, observed by the Jews as a day of abstinence from all work and regarded as sacred to the Lord, in commemoration of His rest from the work of creation. In the Christian church observance of the Sabbath has been transferred to the first day of the week, in commemoration of Christ's resurrection.

Sabellianism, the doctrine of Sabellius (flourished c. 230), a Christian theologian of Libya, who maintained that there was in the Godhead only one person, in three functions or manifestations. His doctrine, in various modifications, was prominent until the 4th Century.

Sabine, a river of the U.S.A., which, rising in the NE. of Texas, flows SE. and S., forming for 250 m. the boundary between Louisiana and Texas. It passes through Sabine Lake and enters the Gulf of Mexico after a course of 500 m.

Sabines, an ancient tribe of Italy, near Rome, neighbours of Rome, a colony of whom is said to have settled on the

Quirinal and contributed towards the formation of the Roman people, especially the patrician class.

Sable (*Mustela sibirica*), a small carnivorous mammal of the

weasel tribe, about 18 in. in length, found in Northern Asia, and hunted for its fur; it is brown in colour with yellowish-grey markings at the neck. Allied species are found in Japan and N. America.

SABLE

Sable, in heraldry, the colour or "tincture" black. In engraving it is represented by intersecting perpendicular and horizontal lines.

Sabotage, a name given to methods of obstruction in industrial establishments on the part of workmen who damage machinery, slow down the rate of operations, or otherwise interfere with normal production as a protest against economic conditions or as a method of propaganda; it is sometimes extended to any attempt to interfere with the normal working of an institution or system of any kind directed to similar ends.

Sabre, a sword with a broad, heavy blade, curved towards the point (in the typical weapon), and adapted for both cutting and thrusting. Of oriental origin, it was introduced into Europe by the Turks and Hungarians, and by the Napoleonic period had become the favourite cavalry weapon. The British cavalry sabre is 32 in. in length and has a straight blade, sharpened on one edge. In sabre-fencing a lighter weapon is used, introduced from Italy; actually it is blunt and unpointed, but for the purpose of scoring is assumed to be sharp. The sabre is employed for duelling on the Continent.

Saccharin, a chemical sweetening substance (ortho-benzolsulphinide), prepared from toluene, a coal-tar product. It is 700 times as sweet as ordinary sugar when pure, and is used by diabetics, who cannot take sugar.

Sacco and Vanzetti, two Italian-American communists who were executed in 1927 for a double murder committed in Massachusetts in 1921. They were arrested at a time when there was a stern campaign against alien revolutionaries, and their case became a political question, as it was alleged that their Radical opinions were being used against them. Legal delays postponed the execution for six years, and when it eventually took place there were widespread demonstrations and riots.

Sacheverel, *Henry*, an English clergyman who became notorious in the reign of Queen Anne for his embittered attack (contained in two sermons in 1709) on the Revolution Settlement and the Act of Toleration. The impolitic impeachment of Sacheverel by the unpopular Whig Government roused intense popular feeling in his favour. He was suspended from preaching for three years, at the expiry of which time the Tories, then in power, received him with ostentatious marks of favour. (1674-1724).

Sachs, *Hans*, German poet, born at Nuremberg; by trade a shoe-maker he became a Meistersinger and an ardent

champion of Luther, whose cause he assisted with his pen. He wrote well over 6,000 compositions—songs, lyrics, tales, fables and lively dramatic pieces. (1494-1576).

Sack, an old name for various kinds of drink, dry wines, especially sherry; a sack-pot was a drink compounded of milk, sack and spices.

Sackbut, a primitive form of trombone, developed originally out of the Roman buccina, or long, straight trumpet, by the addition of a slide by which the pitch could be varied and additional fundamental notes obtained. The Biblical "sackbut" was a stringed instrument, and the term there is a mis-translation.

SACKBUT

Sackville, George, first Viscount, British soldier and minister. As Lord George Sackville, he distinguished himself at Fontenoy, 1745, and in subsequent campaigns, but was dismissed the service for refusing to move up the British cavalry at Minden, 1758, on the orders of Prince Ferdinand. As colonial secretary under Lord North (1775) he was responsible for conducting the war with the American colonists. (1716-1785).

Sackville, Thomas, Earl of Dorset, English poet and statesman, born at Buckhurst, Sussex; entered Parliament in 1558 and for years was engaged in important diplomatic work, but is best known as the author, with Thomas Norton, of *Gorboduc*, the first real English tragedy; he also contributed to a collection of legends called the *Mirror for Magistrates*. (1536-1608).

Sacramento, river of the U.S.A., the largest in California. It rises in the N.E., in the Sierra Nevada, follows a SW. course, draining the central valley of California, and falls into San Francisco Bay, after a course of 400 m.

Sacramento, city of the U.S.A., the capital of California, situated on the Sacramento R., 90 m. N.E. of San Francisco; the chief industry is fruit-canning, and there are factories for meat-packing, pickling, box-making and rice-cleaning. Pop. 93,800.

Sacraments, ceremonial observances the celebration of which was enjoined by Christ upon his followers, namely, the ceremonies of baptism and the Eucharist. The Roman and Eastern Churches observe five additional sacraments: confirmation, penance, holy order, matrimony and extreme unction.

Sacred Heart, a name applied by the Roman Catholics to the Heart of Jesus Christ considered as a symbol of his love for humanity. Devotion to the Sacred Heart was most advanced by the 17th-Century French saint, Margaret Mary Alacoque, and a feast in its honour, on the second Friday after Trinity Sunday, was established throughout the Church in 1856, its liturgical rank being raised to the first class in 1928. It is one of the most popular of Catholic devotions.

Sacred Wars. See Amphictyonic Council.

Sacrilege, in criminal law, a felony committed in a place of divine worship (including a vestry), accompanied by breaking into or out of such a place. The punishment can be as much as penal servitude for life, and even attempted sacrilege may be punished with seven years' imprisonment.

Sacristan, an officer of the church in whose care are the sacred vessels and church furnishings, etc. In English cathedrals the sacristan is a minor canon.

Saddle, a seat, usually of leather, placed on the back of a horse or other animal for the use of its rider; the name is applied by extension to the rider's seat on a bicycle or motor-cycle. The saddle was not in use until about the 8th Century, the horse's back being previously covered, if at all, merely with a cloth. Saddles vary in shape according to their purpose; the lady's "side-saddle," enables the rider to keep both legs on the same side of her mount.

Sadducees, a sect of the Jews prominent in the time of Christ by their opposition to the Pharisees. They acknowledged the obligation only of the written law, and refused to accept tradition at the hands of the Scribes. They denied the immortality of the soul and the existence of angels and spirits. At bottom a purely political party, they disappeared from Jewish history with the fall of the Jewish state in A.D. 70.

Sade, Donatien Alphonse Francois, Comte de, French novelist, usually known as the "Marquis" de Sade. He was sentenced to death for an unnatural offence in 1772, and having escaped, was recaptured and imprisoned in the Bastille, where he wrote a number of licentious romances; he died a lunatic. The term "sadism," used in psychology for a form of sexual perversion characterized by delight in cruelty is derived from his name. (1740-1814).

Sadi, Shiraz. He spent many years in travel, making the pilgrimage to Mecca no fewer than 15 times; captured by Crusaders, he was ransomed by a merchant of Aleppo, and afterwards retired to a hermitage near Shiraz. The most celebrated of his works are the *Bustan*, or "Fruit-garden," and the *Gulistan* or "Rose-garden," being collections of moral tales in verse, full of philosophical reflections and maxims. (c. 1184-1292).

Sadler's Wells, a London theatre, in Rosebery Avenue, Islington, where in 1683 a surveyor named Sadler discovered chalybeate wells. The site had been used from Elizabethan times for entertainments. It was last rebuilt in 1931 and has since been run jointly with the Old Vic (especially by the late Lillian Baylis), latterly for the production of Opera and Ballet. It has a flourishing school of Ballet, and is the centre of a powerful new movement in English ballet.

Sadowa (Czech, *Hradec Králové*), a village of Czechoslovakia, near Königrätz. Here was fought in 1866 the decisive battle of Sadowa (known in Germany as the Battle of Königrätz) between the Prussians and Austrians, the victory resting with the Prussians.

Safeguarding. See Protection.

Safety Lamp, a lamp used by coal-miners and specially constructed so as to minimise the danger of igniting the explosive mixture of natural gases known as "fire-damp." To-day electric safety lamps are extensively used. See also *Safety Lamp*.

Safety Valve, a contrivance for avoiding the risk of explosion (generally in a steam boiler), operating upon the principle of opposing the pressure inside the boiler by a force that will yield before it reaches danger-point and allow the steam to escape. The simplest type is the "pop" valve, consisting of a metal plate or other device pressed down upon an aperture in the boiler by a weight or spring, and steam-tight at normal pressures. Upon a rise of steam pressure above a pre-determined limit, the valve opens, remaining open until the pressure has been sufficiently reduced and then being closed again by the control.

Saffron (*Orocroc sativus*), a plant of the iris family, with purple flowers, a native of S. Europe and W. Asia. The orange-yellow stigmas yield the dye and flavouring known as saffron. For Meadow Saffron, see *Colchicum*.

SAFFRON

Saga, the name given to a Scandinavian myths and legends worked into a continuous narrative and forming a sort of prose epic. Sagas originated in the recital of tales by the skald, or poet, during convivial banquets, especially in ancient Iceland, and for long were handed down by word of mouth. They usually centre on some mythological or historical hero; among the greatest are the Njala Saga, and the Volsunga saga.

Sage (*Salvia officinalis*), a dwarf shrub of the Mint family, with hoary leaves and blue flowers. It has long been known as a culinary herb, and formerly was used for making the infusion known as "sage tea."

Saghalien, or Sakhalin, a large island of the N. Pacific, situated close to the E. coast of Siberia, from which it is separated by the Gulf of Tartary; about 600 m. in length from N. to S., and between 16 m. to 105 m. in breadth, with an area of 29,000 sq. m. It is divided between Russia and Japan, the S. or Japanese portion (known as Karafuto), covering about 14,000 sq. m. Mountainous and forest-clad in the interior and rich in wild life, it produces quantities of larch and fir, but a cold, damp climate prevents successful agriculture. There are valuable coal-mines, and iron, gold, naphtha and amber are found; the fishing and whaling industries are important. Pop. Karafuto: 332,000; Russian part: 12,000.

Saginaw, city in Michigan, U.S.A., about 15 m. from Lake Huron, on the river of the same name; mainly a distributing centre for commerce; there are railway-wagon works. Pop. 80,700.

Sagittarius, the ninth sign of the zodiac, which the sun enters on or about November 20. The constellation of Sagittarius, which lies in the Milky Way, is remarkable for its great number of star clusters, nebulae, cepheid variables and other phenomena, indicating a maximum extension of the stellar galactic system in this direction.

Sago, a popular article of food, especially used for making milk puddings, prepared from the pith of the sago palms (*Macrocydon rumphii* and *M. levee*), native of the East Indies. After having been extracted, the pith is dried and granulated through sieves; it consists chiefly of starch.

Sagunto, town in the province of Valencia, Spain, also called Muviedro. As the ancient Saguntum, it played a large part in the wars between Rome and Carthage. Pop. 8,000.

Sahara, desert of N. Africa, stretching from the Atlantic to the valley of the Nile, a distance of 3,000 m. Limited on the N. by the Atlas Mts., and on the S. by the valleys of the Senegal and Niger Rs., it consists of undulating sand-dunes, elevated plateaux, and hill and mountain ranges furrowed by dried-up watercourses and dotted with fertile oases, which yield date-palms, oranges, lemons, figs, etc. The most sterile tract is in the W., between Cape Blanco and Fezzan. Rain falls over the greater part at intervals of from two to five years. Regular caravan routes connect Timbuktu and the central Sudan with the Niger and coastlands. The greater part lies within the sphere of French influence.

Saharanpur, a town of India, in the United Provinces, 125 m. N. of Delhi, in a district formerly malarial, but now drained and healthy. It is an important railway junction, with repair-shops, and has a celebrated wood-carving industry. Pop. 78,700.

Saigon, capital of French Cochinchina, on the delta streams of the Mekhong, 34 m. from the China Sea. It has a government house, law courts, cathedral, and botanical and zoological gardens. It is the chief French military base in the Far East, and has a modern harbour, with a large rice trade. Pop. 109,500.

Sails and Sailing. The sails of a ship are supported by the masts, spars, or stays of the vessel, and take their names from the mast, yard or stay on which they are stretched or set, as the mainsail, foresail, jib, mizen, etc. A sail set upon a gaff, boom, or stay is called a fore-and-aft sail. A square sail is one extended by a yard hung or slung by the middle and balanced. Sailing is the art of navigating a vessel by means of the propulsive force of the wind. Also, the navigating of any vessel at sea, whether mechanically propelled or wind-driven.

Sainfoin (*Onobrychis sativa*), a perennial, tough-rooted plant of the leguminous family; the pink flowers are borne in clusters and somewhat resemble miniature pea-blossoms; it is cultivated for fodder.

SAINFON

Saint, one whose life has attained a state of outstanding holiness; in a more restricted sense, one who has been canonized by the Christian church. See Canonization.

St. Abb's Head, a promontory in Berwickshire, Scotland, 4 m. NW. of Eyemouth. It is 310 ft. high and is surmounted by a lighthouse.

St. Albans, city of Hertfordshire, England, on an eminence by the Ver, a small stream which separates it from the site of the ancient Roman city of Verulamium. It is notable for its splendid cathedral, with a Norman tower, founded in 1077; industries include brewing, printing and straw-plaiting; two famous battles (1455 and 1461) were fought here during the Wars of the Roses. Pop. 28,600.

St. Aloysius. See Gonzaga, Luigi.

St. Andrews, city of Fifeshire, Scotland, on St. Andrews Bay, 4½ m. NE. of Edinburgh, associated with many stirring events in Scottish history; it has numerous interesting ruins, including those of a 12th Century priory, a cathedral and a castle or bishops' palace, built in the 13th Century; the celebrated university dates from 1411. The town is a healthy and popular holiday resort, and is especially famed as the "home of golf," where the Royal and Ancient Club, with its splendid links, is located. Pop. 8,900.

St. Anne's-on-Sea, seaside resort of Lancashire, England, 4 m. S. of Blackpool. Since 1922 it has been incorporated with Lytham, in the borough of Lytham St. Anne's. It has remains of Roman baths.

St. Asaph, city of Flintshire, N. Wales, 8 m. SE. of Rhyl. Its cathedral, one of the smallest in the kingdom, dates mainly from the 16th Century, but has

been much restored; the bishop became in 1920 the first archbishop of the disestablished church in Wales. Pop. 1,800.

St. Austell, town in Cornwall, Eng., land, on St. Austell Bay, 8 m. S. of Bodmin, with a china-clay industry. Pop. 8,300.

St. Bernard, *Passes of*, two mountain passes in the Alps: (1) the Great St. Bernard, in the Pennine Alps, leading from Martigny to Aosta, is 8,120 ft. high; near the summit stands a famous hospice of Augustinian monks, who, with the aid of the celebrated St. Bernard dogs, have done noble service in acting as guides and rescuing travellers from the snow; (2) the Little St. Bernard (7,180 ft.) in the Graian Alps, crosses the mountains which separate the valley of Aosta from Bourg St. Maurice, in Savoy. Hannibal is supposed to have crossed the Alps by this pass. There are now motor roads over both passes.

St. Bernard Dog, a handsome dog

foundland and famous for its intelligence in guiding and rescuing travellers lost in the snow of the Great St. Bernard Pass, Switzerland. The true St. Bernard is large and massive in build; muzzle, short; ears, medium in size and lying close to the cheeks; eyes, small and deep-set; nose, large and black. It should stand about 34 in. high at the shoulder.

ST. BERNARD DOG

St. Catharine's, city and capital of Ontario, Canada. It is on the Welland Canal, 13 m. NW. of Niagara, and has engineering shops and fruit-growing, paper-making and ship-building industries. Pop. 24,800.

St. Christopher's, or St. Kitts. See *St. Christopher's*, town of France, near the Seine, 10 m. W. of Paris.

St. Cloud, the former site of a fine chateau, built by Louis XIV.'s brother, the Duke of Orleans, and for long the favourite residence of Napoleon. In the park is the factory where the porcelain, known as St. Cloud, has been made since the 17th Century; the town is a popular pleasure resort. Pop. 12,500.

St. Croix, or Santa Cruz, island of the West Indies; it belongs to the U.S.A., having been purchased from Denmark, with others of the group, in 1917. Farming, cattle-raising, and the production of sugar and tomatoes occupy the people. There are two small towns, Christiansted (the capital) and Frederiksted. Area, 82 sq. m. Pop. 11,400.

St. Cyr, L'école, town of France, 3 m. W. of Versailles, where Louis XIV., at the request of Madame de Maintenon, founded an institution for the education of poor girls of noble birth, which was suppressed at the time of the Revolution, and afterwards converted into a military school. Pop. 5,000.

St. Davids, town of Pembrokeshire, Wales, on the E. Alun, 1 m. N. of St. Bride's Bay; its small but beautiful cathedral, rebuilt after 1180, was at one time a famous resort of pilgrims. On the other side of the Alun stand the ruins of Bishop Gower's palace (c. 1243). Pop. 1,800.

St. David's Head, headland in Pembrokeshire, Wales, to the N. of White sands Bay, near St. David.

St. Denis, town of France, 4 m. N. of Paris, of which it is a suburb; noted for its old abbey church, founded by Dagobert I. in the 7th Century, in

which most of the French monarchs were buried. The tombs and the church itself are masterpieces of Gothic art. The town manufactures chemicals, printed calicoes, machinery and soap. Pop. 78,400.

St. Denis, capital of the French island of Réunion, in the Indian Ocean, on the NW. coast. It stands at the mouth of the St. Denis R. Pop. 24,800.

St. Denys, or Denis, the patron saint of France, known as the Apostle of the Gauls, among whom he introduced the Gospel about 250. He became the first bishop of Paris, but refusing to give up his faith, was executed by the Roman governor in 272. Festival, Oct. 9.

St. Dunstan's, a British charitable organization founded in 1915 by Sir Arthur Pearson for caring for men of the fighting forces blinded in the World War, or in any subsequent wars. The inmates are taught useful trades, by which they can afterwards support themselves, and there is also provision for pensions and allowances, sickness benefits, etc.

Sainte-Beuve, Charles Augustin, French literary critic, born at Boulogne-sur-Mer; studied medicine and wrote for the *Globe* newspaper the articles *Premiers Lundis*; in 1827 came under the influence of Victor Hugo, and began to write in different poetry; in 1840 became keeper of the Mazarin Library, and in 1849 began his famous series of weekly literary articles *Causeries de Lundi*, published in various journals; in 1845 he was elected to the Academy; for variety of interest, subtlety, and psychological insight, he ranks among the greatest constructive critics. (1804-1869).

St. Elias, Mount, an isolated volcano close to the Pacific Ocean and upon the frontier of Canada. It is 18,010 ft. in height; on the S. is the vast Malaspina glacier.

St. Elmo's Fire, a popular name for appearances which sometimes play about the masts of ships, steeples, etc., accompanied at times with a hissing noise; commoner in southern climates and known also by other names, e.g., Fire of St. Clara, Corpocant, etc.

St. Étienne, town of France, capital of the dept. of Loire, on the R. Furens, 36 m. SW. of Lyons. The "Birmingham" of France, it is the centre of a rich coal district, and produces every kind of iron and steel product, including armaments; the manufacture of silks and ribbons is also an important industry; there is a school of mines. Pop. 190,000.

St. Gall, or St. Gallen, a canton of N.E. frontier. It entirely surrounds the canton of Appenzel, and on the N.E. borders Lake Constance; it has splendid lake and mountain scenery and mineral springs (especially at Ragatz, a popular resort). The manufacture and embroidery of cottons and other textiles are important industries. It joined the Swiss confederation in 1803. Capital is St. Gall. Area, 771 sq. m. Pop. 284,000.

St. Gall, town of Switzerland, the capital of the canton of St. Gall, on the Steinhof, 53 m. E. of Zurich. It has a magnificent medieval cathedral and an old Benedictine monastery now used for government purposes, but still contains its famous collection of MSS. Embroidering textiles is the chief industry. Pop. 44,000.

Saint-Gaudens, Augustus, American sculptor, born in Dublin, Ireland (Ire). After studying in Paris and Italy, he made his home in New York, and by his statue of Admiral Farragut (in Madison Square) became world-famous in 1856. His

many other fine works include a rugged statue of Abraham Lincoln, the beautiful Adams memorial at Rock Creek, and an equestrian bronze of General Sherman. (1848-1907).

St. George's Channel, the ocean separating Wales from Ireland. It is about 100 m. in length and 55-80 m. in width.

St. Germain-en-Laye, town of France, 13 m. W. of Paris. It has a fine terrace overlooking the valley of the Seine, and a splendid forest over 20 m. in circumference. Pop. 22,000. Here in Sept., 1919, was signed the Treaty of St. Germain-en-Laye, terminating the state of war between Austria and the Allies and establishing the independence of Hungary, Czechoslovakia and Yugoslavia, former Austrian possessions.

St. Gotthard, fine Alps between Switzerland and Italy. There is a famous zigzag carriage-road over the pass, while the electric railway from Lucerne to Milan passes through a series of spiral tunnels below it, the main tunnel being 9½ m. long and reaching an altitude of 3,786 ft.

St. Helena, island of the S. Atlantic, lying 1,500 m. NW. of Walvis Bay (on the W. coast of Africa) and constituting a British crown colony; the vegetation is largely exotic, but crops are few, apart from potatoes and flax; Jamestown, a port, is the only settlement, and near by is Longwood House, home of the exiled Napoleon Bonaparte from 1815 till his death in 1821; the island has since been repeatedly used as a place of banishment, notably for refractory Zulu chiefs and oriental potentates, while Boer prisoners were interned there in 1899-1902. Ascension I., 700 m. NW., is a dependency. Pop. 4,300.

St. Helens, town of Lancashire, England, land, of modern growth, 21 m. W. by S. of Manchester. It has an enormous glass industry, as well as copper-smelting works and foundries, and also manufactures chemicals and pottery. Pop. 106,800.

St. Helier, seaport, holiday resort, Channel Is., on St. Aubin's Bay. The old court-house is the meeting-place of the States of Jersey. Fishing and ship-building are important industries. Pop. 26,000.

St. Ives, town of Huntingdonshire, England, on the Great Ouse, 5 m. E. of Huntingdon, noted for its agricultural fair. Pop. 2,700.

St. Ives, a quaint old fishing town and Bay, on the N. coast of Cornwall, England, 8 m. NE. of Penzance. It is a favourite haunt of artists, being remarkable for its tortuous streets and huddled fishermen's cottages, and for its magnificent open bay and wide sandy beaches. Pop. 6,700.

St. James's Palace, an old, brick palace

in Pall Mall, London, built by Henry VIII. It was a royal residence from 1897 to 1837, but is now only used for occasional State functions, though the British Court is still officially the "Court of St. James's."

Saint-Jean-de-Luz, seaport and famous holiday resort of France, at the mouth of the Nivelle, 14 m. SW. of Bayonne; it has an old Basque church, a château and

ST. JAMES'S PALACE

a hydrotherapeutic establishment, and there are golf and sea-bathing. Pop. 8,000.

St. John, city of New Brunswick, Canada, on the estuary of the St. John R., 277 m. NW. of Halifax, incorporated with the adjacent towns of Portland and Carleton. It has an excellent ice-free harbour. Shipbuilding, fishing, and the export of timber, fish and agricultural produce are the chief industries, while textiles and engineering products are made. Pop. 47,500.

St. John of Jerusalem, Order of, British order of chivalry, being a revival, in 1827, of the Order of the Hospital of St. John of Jerusalem, founded in the 11th Century, during the First Crusade. Modern order was incorporated by chs in 1888, the British sovereign being its supreme head, while the heir to the throne is its grand prior. It is concerned with Red Cross hospital work, especially with the St. Jo Ambulance Association.

St. John's, seaport and capital of Newfoundland, situated on a splendid harbour on the E. coast, the centre of the fishing industry. It has oil-refineries, foundries, tanneries and rope-works. Pop. 42,000.

St. John's Wort, a bright-yellow blossoming plant

which, with its glittering stamens, is very well known by its generic name of *Hypericum*; but, as the floral symbol of superstition, its old English appellation of St. John's wort is most appropriate. In Scotland it was long carried about as a charm against witchcraft.

ST. JOHN'S WORT
(*Hypericum Calycinum*)

St. Kilda, a lonely island in the Atlantic, 60 m. W. of Harris, 3 m. long by 2 m. broad, with a precipitous coast. It was inhabited for a thousand years by settlers who lived by fishing and fowling but was abandoned in 1930 on account of its inaccessibility and the exhaustion of the soil.

St. Kitts, or St. Christopher's. See Christopher's, St.

St. Lawrence, a great river of N. America which issues from Lake Ontario (previous to which, as the St. Louis, it has passed through Lakes Superior, Huron, Erie and Ontario) and flowing NE., discharges into the Gulf of St. Lawrence, forming a broad estuary. It is 750 m. long and from 1 to 4 m. broad. It is navigable for large steamers as far as Montreal; the Ottawa is its chief tributary; in winter, ice prohibits navigation.

St. Leonards-on-Sea, parish of Sussex, England, forming part of the borough of Hastings. It is a popular seaside resort, with a pier, promenade, bathing-pool, etc.

St. Louis, capital of Missouri, U.S.A., situated on the Mississippi (here spanned by two fine bridges), 18 m. below its confluence with the Missouri; a handsomely built city, it has spacious parks, two universities, and public libraries; it has a huge tobacco industry, and also carries on meat-packing, smelting and printing and the manufacture of motor-cars, shoes, drugs and hardware. Pop. 822,000.

St. Lucia, a rocky, forest-clad island in the British West Indies; the largest of the Windward group. It exports sugar, cocoa, logwood and spices. The capital is Castries, a port on the NW. coast. Area, 233 sq. m. Pop. 66,200.

St. Malo, seaport of France, on the Brittany coast (dept. of Ille-et-Vilaine), at the mouth of the Rance; the old town is built on an islet connected with the mainland by a causeway 215 yds. long. There is a good harbour, and a considerable amount of shipping is done, especially in fruit, potatoes and dairy-produce; there is a regular passenger service with Southampton. Pop. 13,000.

St. Mary's, the largest island of the Scilly Is., 30 m. W. of Cornwall. Hugh Town, on the W. coast, is the capital of the island and the group. Star Castle is an Elizabethan fortress. There is an important meteorological station. Pop. 1,400.

St. Mary's, river of Canada, an outflow from Lake Superior to Lake Huron, it forms part of the boundary between Ontario and Michigan, U.S.A., and is about 45 m. long. At Sault Ste. Marie, on the U.S.A. side, is the St. Mary's Falls Ship Canal, the largest of its kind in existence, and there is another large canal on the Canadian side.

St. Michael and St. George,

the Most Distinguished Order of, instituted 1818 and, later, reserved for those who have served the Crown in, or on behalf of, the overseas parts of the Empire; Grand Master, the Earl of Athlone; ribbon, saxon blue with crimson centre; motto, "Ausplicium melioris evi"; G.C.M.G., Knight Grand Cross; K.C.M.G., Knight-Commander; C.M.G., Companion. The Chancery of the Order is in the Colonial Office.

ORDER OF
ST. MICHAEL
AND ST. GEORGE

St. Michael's Mount. See Mount's Bay.

St. Mihiel, town of France, on the R. Meuse, 23 m. S. by E. of Verdun. It has a famous Benedictine Abbey, founded in 709, and a splendid Gothic church. In the World War, in Sept., 1918, American and French troops won a celebrated victory over the Germans at the St. Mihiel salient. Pop. 4,500.

St. Moritz, a celebrated Alpine resort and watering-place in the Upper Engadine, Switzerland, 27 m. S.E. of Coire, situated at an altitude of over 6,000 ft. It has chalybeate springs and winter sport facilities, including the famous Cresta Run. Pop. 2,600.

St. Nazaire, seaport of France, on the Loire, 40 m. W. of Nantes; it has a modern harbour, with graving and floating docks, and has a large naval and mercantile shipbuilding industry, as well as foundries, sawmills and steelworks. Pop. 40,000.

St. Omer, town of France, on the R. Aa, 26 m. S.E. of Calais; has a fine old Gothic cathedral, a ruined Benedictine abbey church, and a Catholic college. From Oct., 1914, until March, 1916, it was the British G.H.Q. during the World War. Pop. 18,900.

St. Pancras, a parish and a Parliamentary borough of NW. London. It contains University College, the North London Hospital and the railway terminus St. Pancras, King's Cross and Euston. Pop. 198,100.

St. Paul, capital of Minnesota, U.S.A., on the Mississippi, opposite Minneapolis, with which it is closely linked. The state capitol is a magnificent building, and its public library contains celebrated works of art; there are two universities, and a notable cathedral. It is a leading trading

centre, particularly in horses, cattle and foodstuffs, and manufactures motor-cars, rolling-stock, shoes, clothing, etc. There is a large meat-packing industry. Pop. 271,800.

St. Paul's, cathedral church of the city of London, England, on the summit of Ludgate Hill. A Saxon church stood on the site till destroyed by fire in 1086, and a Norman cathedral subsequently erected perished in the Great Fire of 1666. The present building, designed by Sir Christopher Wren, was finished in 1710. Classic in design, it cost nearly \$1,000,000, and is noted for its massive dome, surmounted by a cross 365 ft. above ground level; extensive repair work was completed in 1930.

St. Paul's School, an English public school for boys, founded by John Colet, Dean of St. Paul's Cathedral, at the beginning of the 16th Century, in the cathedral precincts; now at Hammersmith, W. London.

St. Peter Port, seaport, holiday resort and capital of Guernsey, Channel Is. It has daily steamer services with England and France. Trade is chiefly in flowers, fruit and tomatoes. The former residence of Victor Hugo is now a museum. Pop. 16,200.

St. Peter's, cathedral of Rome, the focal point of Roman Catholicism. The foundations were laid in 1452 by Pope Nicholas V., on the site of a medieval church built by Constantine, and the building was erected by Bramante, Sangallo and many other architects in succession. Michelangelo was responsible for the dome, and Bernini completed the building about 1660 and added the colonnades.

St. Petersburg, former name for the city of the U.S.S.R., now called Leningrad (q.v.).

Saint-Pierre, Bernardin de, French novelist, born at Havre, an engineer by profession. He became in 1768 a government official in Mauritius and wrote a celebrated journal of the voyage thither (1773); but his chief work is the sentimental novel *Paul and Virginia*, which had a huge success. (1737-1814).

St. Quentin, town of France, on the Somme, 95 m. N.E. of Paris; manufactures all kinds of cotton and woollen goods, machinery and paper; has a fine old Gothic church and town hall. Here the French were defeated by the Spaniards in 1557, and by the Germans in 1871. Almost throughout the World War the town was held by the Germans, who in March, 1918, severely defeated the British; in the following October the Allies' offensive here was victorious. Pop. 49,000.

Saint-Saëns, Charles Camille, French composer, born in Paris; for 18 years organist of the Madeleine; composer of a number of operas—indifferently successful, with the notable exception of *Samson and Delilah* (1877)—several oratorios and cantatas, such as the *Christmas Oratorio*, *The Wedding of Prometheus*, *The Deluge*, and orchestral and chamber music. (1835-1921).

Saintsbury, George Edward Searman, English man of letters, born at Southampton; professor of rhetoric at Edinburgh from 1895 to 1915. His works are concerned with the criticism and history of both English and French literature, and include *The English Novel*, *A History of Criticism*, and *A History of the French Novel*. (1845-1933).

Saint-Simon, Claude Henri, Comte de, French socialist, born in Paris, a descendant of the Duc de Saint Simon, memoir writer, fought for the colonists in the American War of Independence, but during the French Revolution was

imprisoned; of his Socialistic writings the chief is *The New Christianity*, 1825. His doctrine, in essence, was a reconstruction of society by the abolition of the hereditary principle, and the vesting of the instruments of production in the state for the welfare of all its members. (1780-1825).

Saint-Simon, Louis de Rouvroy, Duc de, French courtier and diplomatist in the reign of Louis XIV.; fought in the Netherlands and attached himself to the Duke of Orleans, afterwards Regent. His life was spent at Court, largely in quarrels over social precedence; and in his immortal *Memoirs* he has left a valuable record of the times; depicting with remarkable insight the manners of the Court and the characters of the courtiers. (1675-1755).

St. Stephen's, a name given to the Parliament, derived from an old chapel in the former building.

St. Thomas, volcanic island in the Gulf of Guinea, belonging to Portugal, lying 166 m. from the Gabon coast. The chief town is St. Thomas, or São Tomé, on the NE. coast; cocoa, coffee, coconuts and cinchona are produced. Area 400 sq. m. Pop. 51,000.

St. Thomas, island of the West Indies, one of the Virgin Is., 87 m. E. of Porto Rico; the productions are unimportant, but the capital, St. Thomas, on the S. coast, is an important coaling-station; formerly Danish, the island was purchased by the U.S.A. in 1917. Pop. 9,600.

St. Vincent, one of the Windward Indies, lying 105 m. W. of Barbados; mountainous and volcanic, with a warm but healthy climate. It exports copra, arrowroot, molasses, Sea I. cotton and copra. The chief town is Kingston, a port on the SW. coast. Mt. Soufrière erupted disastrously in 1902. Area 150 sq. m. Pop. 48,000 (2,000 whites).

St. Vincent, Cape, a lofty and extensive SW. of Portugal, off which have been fought several naval battles, the most memorable being the great victory of Jervis and Nelson over the Franco-Spanish fleet, Feb. 14, 1797.

St. Vincent, John Jarvis, Earl of, in Staffordshire; ran away to sea when a boy, and by conspicuous gallantry at Quebec in 1759, and otherwise, rose rapidly in the service; commanded the naval attack upon the French West Indies (1793), and four years later, with Nelson, defeated the Franco-Spanish fleet off Cape St. Vincent; during 1801-1803 was a successful First Lord of the Admiralty. (1735-1823).

St. Vitus's Dance. See Chorea.

Sakai, seaport of Japan, on the island of Honshu, on the Inland Sea, 6 m. S. of Osaka. Cotton and steel goods are manufactured. Pop. 141,800.

Sake, a kind of strong beer made from rice, the national beverage of Japan; yellow in colour, and tasting like cherry, it is drunk hot at meals.

Saki, the common name of several species of S. American monkeys of the genus *Pithecia*. They have long, non-prehensile tails, well-developed thumbs, and a thick coat, with a crown of hair on the head; they are found in the forests of the Amazon.

Sakyamuni, the name given to the tribe of the Sakyas in Northern India.

Salaam, an Oriental term of salutation meaning "Peace," especially used by Mohammedans.

Saladin, sultan of Egypt and Syria, leader of the Saracens in the third crusade; of Kurdish origin, he fought under Nureddin, and rose to be vizier of Egypt, and ultimately sultan in 1175; captured Damascus and Aleppo, and entering the Holy Land defeated the Christians at Tiberias, thereafter taking Jerusalem and laying siege to Tyre; finding in Richard of England a formidable foe, he concluded a truce in 1192. (1138-1193).

Salado Rio (Salt River), a river of the Argentine Republic. It rises in the Andes and flows SE. through the Gran Chaco, joining the Paraná R. at Paraná, after a course of 1,000 m.

Salamanca, city of Spain, on the Tormes, here spanned a Roman bridge, 172 m. by rail NW. of M long famous for its university, it has fine old cathedral, colleges, and other ings; it is an important railway junction and manufactures leather, pottery and textiles; here Wellington won a great victory over the French on July 22, 1812, and in 1938, in the Civil War, it was for a time the headquarters of the rebels. Pop. 54,300.

Salamander, a reptile of the genus *Salamandra*, allied to

the newt, but differing from it in its less compressed tail and terrestrial habits. Salamanders are viviparous, the young being deposited in fresh water, where they live until metamorphosis is complete. There are several species, confined to Central and S. Europe, N. Africa, SW. Asia, and Asia Minor. The medieval salamander was a creature believed to live and delight in fire.

Salamis, a mountainous island of Greece, on the NW. coast of Attica, the strait between which and the mainland was the scene of a naval victory over Xerxes by the combined fleets of Athens, Sparta and Corinth in 480 B.C. On the island is the chief naval station of Greece, with an arsenal. Pop. 12,000.

Sal Ammoniac, common name for Ammonium Chloride, a salt obtained as a by-product in the manufacture of coal-gas. It is used in industry, especially in the composition of electric batteries, and in medicine as an expectorant and stomachic.

Salcombe, seaport of Devonshire, England, 11 m. SW. of Dartmouth. It affords safe anchorage for small vessels; fishing is carried on. Nearby is Bolt Head. Pop. 2,400.

Sale. The law governing the sale of goods is to be found in the Sale of Goods Act, 1893. "Goods" includes all personal chattels except money. An actual sale often transfers the ownership in the goods at once, but an agreement for sale only becomes a sale when the conditions are fulfilled subject to which the ownership is to be transferred. An agreement to sell relates chiefly to goods which have not come into existence, or have not been acquired by the seller, at the date of the contract.

The price in a contract of sale must consist of money, otherwise the contract is one of exchange. If the price is not fixed, a reasonable price is to be presumed to have been intended. Usually only the owner can sell and give a good title, but this is subject to exceptions in the case of goods sold in market overt, sales by pawnbrokers, by authorized agents, by the possessors of documents of title to goods, the sale of negotiable instruments, etc.

A contract of sale may be in any form, but if the value of the goods is \$10 or more, it may be unenforceable unless evidenced by writing or part-performed (as by part-payment of the price, or receipt of the goods). The buyer is entitled to delivery and to have any conditions and warranties observed. The seller is entitled to be paid and to have the goods accepted, provided the buyer has had an opportunity of examining them. Usually a seller cannot compel the buyer to return rejected goods—he is entitled only to notice of rejection; but if the contract is broken by the buyer, the seller has the right to sue the buyer and, in some cases, rights against the goods, e.g., the right of stoppage in transit against an insolvent buyer.

Sale, town of Cheshire, England, situated on the R. Mersey, 5 m. SW. of Manchester, of which it is a residential suburb; it has market-gardens. In 1930 the urban districts of Sale and Ashton-upon-Mersey were amalgamated, and in 1935 the district was created a borough. Pop. 28,000.

Salé, or *Sallee*, seaport of Morocco, known to the natives as *Sia*. It is situated on the Atlantic coast, opposite Rabat. It has mosques and Muslim sanctuaries and manufactures carpets, but is remembered chiefly as the lair of the "Sallee rovers," corsairs who in the 16th Century and long afterwards terrorized the Mediterranean. Pop. 32,000.

Salem, city of British India, in the Salem district of Madras, 120 m. NE. of Palghat. Textiles, carpets and cutlery are manufactured. Pop. 102,200.

Salem, city and seaport of the U.S.A., on a peninsula in Massachusetts Bay, 15 m. NE. of Boston; famous for its witchcraft trials in 1692, and as the birthplace of Nathaniel Hawthorne; it manufactures cotton. Pop. 43,400.

Salem, capital of Oregon, U.S.A., on the Willamette R., 52 m. SW. of Portland. An agricultural centre, it carries on canning, sawmilling and paper-making. Pop. 26,000.

Salerno, seaport of S. Italy, on the gulf of Salerno, 33 m. SE. of Naples; has some fine Gothic buildings, notably the cathedral of St. Matthew; in the Middle Ages its medical school and university were celebrated; cotton-spinning is the chief industry; in the neighbourhood are the ruins of Paestum and an old Lombard castle. Pop. 67,000.

Saley, a group of islands in the Netherlands East Indies. The chief island, Saley, about 50 m. long, is separated from Celebes by the Strait of Saley. The products include tobacco, indigo and cotton. Pop. 63,000.

Salford, city of Lancashire, England, adjoining Manchester W. of the Irwell. It is an important industrial centre, with large docks on the Manchester Ship Canal, manufacturing cotton, iron goods, chemicals, clothing, etc. Pop. 253,400.

Salicin, a bitter crystalline substance obtained from the bark of the willow and poplar, and used in medicine, especially in the treatment of rheumatism and neuralgia.

Salic Law, a code of laws among the *inter alia* excluded females from succession to land; the popular belief that it barred them specifically from the French throne is erroneous.

Salicylic Acid, or *Ortho-hydroxybenzoic Acid*, a white crystalline solid, melting at 158° C., and practically insoluble in cold water, though it dissolves readily on heating. It was formerly obtained from willow-bark and other natural sources, but is now manu-

factured from phenol (carbolic acid). Its chief use is in the preparation of dyestuffs; it is also a strong antiseptic (though its use as a food preservative is now prohibited in several countries), and is used in medicine as an analgesic and anti-rheumatic, though generally in the form of its less irritating acetyl derivative, aspirin or acetylsalicylic acid.

Salisbury, also known as New Sarum, county town of Wiltshire, England, 84 m. WSW. of London. It contains many fine old buildings including the cathedral, built 1220-1238, one of the finest specimens of early English architecture. The neighbourhood is rich in megalithic remains, 2 m. to the N. being the half-obliterated site of Old Sarum (a prehistoric fortress), where the city stood till the 13th Century. Excavations in 1936-1938 revealed important remains of Clarendon Palace, a country seat of the Plantagenet kings, where the Constitutions of Clarendon were enacted in Henry II.'s reign. Pop. 26,500.

Salisbury, capital of S. Rhodesia, in Mashonaland, standing at an altitude of nearly 9,000 ft., 1,600 m. NE. of Cape Town by rail. It has a cathedral and a government laboratory and experimental farm. There are goldfields in the district. A railway connects it with Beira, 374 m. distant, in Portuguese East Africa. Pop. 33,000 (11,000 whites).

Salisbury, Robert Arthur Gascoyne Cecil, third Marquis of,

English statesman, born at Hatfield; as Lord Cecil, entered Parliament in 1853, and as Lord Cranborne became Secretary for India in 1866; entered the House of Lords as Lord Salisbury in 1868, and distinguished himself in debate; again Secretary for India under Disraeli in 1874, and Foreign Secretary and leader of the Conservatives

LORD SALISBURY

in 1881; premier in 1885, he was ousted by Gladstone, but returned to power next year, remaining premier till 1892; again in office, 1895, he finally retired after the Boer War, in 1902. (1830-1903).

Salisbury Plain, an expanse of low, undulating downland in Wiltshire, England, commencing just N. of the town of Salisbury and extending to the centre of the county. It is about 20 m. in length and 15 m. in breadth. There are a number of villages on the Plain, which is used as a military training-ground, with permanent barracks and artillery and rifle ranges. There is an R.A.F. station at Upavon. The Plain is rich in archaeological remains, including the megalithic group of Stonehenge, 6 m. N. of Salisbury.

Saliva, a watery fluid, secreted by the salivary glands. It serves to moisten the inside of the mouth and throat, while the ptyalin and other enzymes which it contains help to predigest food, especially starches, before it passes into the stomach.

Salix, a genus of deciduous trees of the catkins, including the willow and osier.

Sallow, or *Goat Willow* (*Salix caprea*), a tree of the willow family, which reaches a height of 40 ft. The bark, at first smooth, later shows a network of shallow fissures; the leaves are wrinkled, smooth and dull green; it produces the handsome catkins used for "Palm" at Easter.

Sallust, Roman historian, born at Amiternum, in Sabine territory; became quaestor and tribune (52 B.C.), though a plebeian; for a misdeemeanour was expelled the Senate; joined Caesar's party in the

Civil War, and became governor of Numidia, enriched himself by extortions and returned to Rome to devote himself to literature. His works, often inaccurate though written in a tense and forcible style, include histories of Rome (largely lost), the Catiline conspiracy and the Jugurthine war. (86-34 B.C.).

Salmon, a silver-scaled fish (*Salmo*, being the typical fish of the family Salmonidae, much esteemed for its rich, delicious flavour; it is widely distributed in N. Europe and N. America. Upon leaving the egg, the young salmon is in the form of a larva, or "alevin," and is nourished by an attached yolk-sac; at the end of about two months it measures 1½ in. or so in length, and is olive brown in colour, with dark bars along the sides, and is then known as a "parr." It begins to feed actively and at the age of 15 months reaches the "smolt" stage, having by now gained a silvery appearance; at this stage it enters the sea, to return again (as "grilse") after some months, or even several years, to the river, generally to spawn. The salmon is lean and out of condition after breeding and is then termed a "kelt." It usually returns to the sea to regain its condition, but may return repeatedly to fresh water to breed.

Salmonidae, a family of sea- and fresh-water fishes of the order Teleostei, of which the salmon (*q.v.*) is typical; other members are the trout, grayling, and smelt.

Salome, the name of two women mentioned in the New Testament. Of these, one followed Jesus from Galilee and witnessed his crucifixion from afar (Mark xv. 40), and afterwards visited the sepulchre (Mark xvi. 1). The other Salome (Matt. xiv. 6) is presumed to have been the daughter of Herod Philip by his wife Herodias who had deserted him for his brother Herod Antipas; Herodias instigated her to ask, as a reward for her dancing, the head of John the Baptist (Mark vi. 22).

Salonica, city and seaport of Greece, the capital of Macedonia, situated 370 m. SW. of Istanbul, the Thessalonica of the Bible. It is surrounded by walls and has many fine antiquities, Greek, Roman, Byzantine and Turkish, including the 6th Century cathedral, afterwards a mosque. It is one of the largest seaports of S. Europe, and has a modern harbour, exporting grain, silk, manganese, iron, wool, tobacco and livestock. Yugoslavia has had a free zone in the port since 1924, and there is also a fiscal free zone; there was a disastrous fire in 1917. An Allied force landed at Salonica in 1915 and was reinforced at the end of the year, taking part in severe fighting until Bulgaria surrendered in Sept., 1918, and the entire Balkan peninsula fell into Allied hands. In 1937 the name of the city was changed to Thessaloniki. Pop. 236,500.

Saisette, an island N. of the city of Bombay, India, with which it is connected by a causeway. It is mountainous and wooded, and produces much rice. There are numerous Buddhist cave temples of the 2nd Century A.D. Area 246 sq. m. Pop. 150,000.

Salsify, a biennial composite herb (*Tragopogon porrifolius*) with purple flowers and grass-shaped leaves; its root is used as a table vegetable.

Salt, a term used in chemistry for the compound formed when the hydrogen in an acid is partly or entirely replaced by a metal or by a group of elements taking the place of a metal and known as a base. The prototype of the whole class of salts is common salt, chemically known as sodium chloride, NaCl. This is formed, together with water, when hydrochloric acid, HCl, neutralizes sodium hydroxide, or caustic soda, NaOH

(the requisite base). Salts derived from sulphuric acid are called sulphates, those from nitric acid nitrates, those from phosphoric acid phosphates, those from nitrous acid nitrites, and so on.

The famous mines of rock salt (common salt) at Wieliczka, near Cracow, in Poland, are perhaps the biggest in Europe. The most important deposits of rock salt in the British Isles are those in Cheshire, in the neighbourhood of Northwich, Middlewich, etc. Here, too, there are brine springs which furnish a large proportion of the salt of commerce, obtained by evaporation. The value of these springs for rheumatic ailments has made the reputation of such places as Droitwich, in Worcestershire. In S. Europe, India, California and other parts, salt is obtained from sea-water by evaporation, while elsewhere, notably in Australia and the U.S.A., it is got from saline lakes.

Saltaire, town of Yorkshire, England, in the W. Riding, 34 m. NW. of Bradford, on the R. Aire. It was established as a model village by Sir Titus Salt (1803-1876), who in 1853 set up works here for the production of alpaca goods. Pop. 13,500.

Saltcoats, seaport town of Ayrshire, Scotland, 30 m. SSW. of Glasgow. It is a popular watering-place, with good bathing facilities. Pop. 10,200.

Saltillo, city of Mexico, the capital of the state of Coahuila, situated at an altitude of 5,200 ft., 45 m. SV. of Monterrey. It manufactures cottons, shawls and flour. The battle-field of Buena Vista (1847) is in the vicinity. Pop. 66,600.

Saltire, in heraldry, an "ordinary" consisting of a cross in the shape of an X, or St. Andrew's cross, dividing the field diagonally.

Salt Lake City,

city and capital of Utah, U.S.A., the stronghold of Mormonism; it stands on the R. Jordan, 780 m. NE. of San Francisco. Founded by Brigham Young, the Mormon leader, in 1847, it contains the great Mormon temple and tabernacle, the state capitol and other imposing buildings. The university of Utah is located here and there are numerous colleges and schools. Meat-packing, oil-refining and lead- and copper-smelting are carried on. In the Great Salt Lake, 11 m. to the W., it is impossible to sink, owing to the extreme salinity. Pop. 140,300.

Saltpetre, the common name for Nitre or Potassium Nitrate, a white crystalline substance formed naturally during the decay of nitrogenous matter under particular conditions. It is used in the manufacture of glass, nitric acid and other substances and as a main constituent of gunpowder; it is also employed in medicine, the fumes being inhaled to relieve the spasm of asthma. Chile saltpetre, or sodium nitrate, which is used for making nitre, is a valuable fertilizer, as also is wall saltpetre, or calcium nitrate, found as an efflorescence on walls.

Salt Range, a tract of lofty tableland by mountain ranges 3,000 to 5,000 ft. high, and stretching across the Punjab E. and W. between the Jhelum and Indus Rs.; rich deposits of rock salt are extensively worked.

Saltwort, a seashore plant (*Salsola* *kali*), common in Gt. Britain; its ashes, like those of the glasswort, yield barilla, a crude carbonate of soda formerly much used for making glass and soap. The leaves are fleshy and end in a spine.

SALTIRE.

Salût, *Îles du,* a group of three islands in French Guiana, consisting of Île Royale, Île de St. Joseph, and Île du Diable (Devil's I.), the notorious penal settlement, where Capt. Dreyfus was confined.

Salute, a form of greeting showing respect. The form of salute towards a person of rank varies according to the standing of the official. In the navy, distinguished personages are saluted by the firing of guns, e.g., 21 for Royalty, 19 for an ambassador, 7 for a consul, etc. In the army, officers of a rank above captain are saluted by troops on parade presenting arms. The colours of a regiment are saluted by all troops, and it is obligatory for a private or N.C.O. to salute an officer whether the latter be in or out of uniform—in the latter case, of course, only if the officer is recognised.

Salvador, republic of Central America, bordering the Pacific for about 170 m., between Guatemala, on the W., and Honduras, on the E. It is the smallest but most densely populated of the Central American States. The rich alluvial coast-lands slope up to high plateaux, which stretch, seamed and broken by rivers and volcanoes, to the Cordillera frontier of Honduras; the soil is extremely fertile and produces coffee (the chief export), maize, cacao, balsam, tobacco, indigo, sugar and rubber. The natives are chiefly Spanish-speaking Indians. The government is vested in a president and chamber of deputies. Salvador broke away from Spanish control in 1821 and joined the Central American Confederation, but since 1839 has enjoyed complete independence. The capital is San Salvador; other large towns are Santa Ana, San Miguel, and Santa Tecla. Area 13,178 sq. m. Pop. 1,500,000.

Salvage, the reward allowed to persons who save a ship and its cargo from shipwreck, capture or similar jeopardy. The salvor must show that he was under no contract to perform the work; that there was skill and peril and some enterprise involved in doing it; and that his services were beneficial. The salvor has a lien, extending to ship, freight and cargo, upon the property saved, which ranks before all other liens. The cargo-owners are liable for salvage in proportion to the value of the property saved.

Salvage Corps, London, an organisation for the purpose of saving property, as distinct from life, from fire; it is supported mainly by joint contributions from fire insurance companies, and supplements the work of the London Fire Brigade, under control of the London County Council.

Salvarsan, an arsenical compound in the form of a bright yellow powder, which is used as an injection in the treatment of syphilis and some other diseases. It is popularly called "606," because it was the 606th compound of a series of substances investigated for the purpose by its discoverer, Dr. Ehrlich, in 1909. A derivative, neo-salvarsan, or "914," is, however, more commonly employed.

Salvation Army, an international religious organisation which developed out of revivalist services conducted in Whitechapel, London. The name Salvation Army was officially adopted in 1878, when the movement was re-organised upon semi-military lines, with a distinctive uniform and military degrees of rank and such accessories as brass bands and banners. There are now branches in every part of the world, where, bound up with religious propaganda, the Salvation Army conducts an enormous amount of social amelioration, including rescue work, the care of the sick, education, overseas settlement, aid for "down-and-outs," and emergency assistance in national disasters, such as fires,

earthquakes and floods. As an essential part of this work, it controls homes of rest, hostels, workshops, farms, schools, hospitals, leper colonies and other institutions all over the globe. Its chief official publication is *The War Cry*. William Booth, the first general, was succeeded in 1912 by his son William Bramwell Booth, who in 1920 was superseded in favour of E. J. Higgins, upon whose death Evangeline Booth, daughter of the founder, was elected general, 1934.

Salvini, Tommaso, Italian tragedian, born in Milan; was trained to the stage, and joined Ristori's company in 1847; served with distinction in the revolutionary war of 1849, and, returning to the stage, won an international reputation, his greatest successes being in Shakespeare's *Othello*, *King Lear*, and *Macbeth*, and in dramas by Alfieri and others. (1829-1915).

Sal Volatile, Spirit of, a mixture with oil of nutmeg, oil of lemon and alcohol; it is a favourite remedy for faintness.

Salween, river of Asia, which rises in Tibet, S. of the Kunlun range, and flowing due E. turns S. in Chwanben and traverses Yunnan and the Shan States, afterwards forming part of the boundary between Siam and Lower Burma. It eventually enters the gulf of Martaban by two mouths, after a course of about 1,800 m. Owing to reefs and rapids, it is mostly unnavigable, except by native boats, but is valuable for floating teak down to the port of Moulmein at the mouth.

Salzburg, city of Austria, the capital of the province of Salzburg, situated on the hill-girt banks of the Salzach, 80 m. SE. of Munich; it is a handsome and historical city, with many fine old buildings, including a cathedral, archbishop's palace, imperial palace, monasteries, etc., but is chiefly memorable as the birth-place of Mozart; the annual summer musical festival is attended by visitors from all over the world. Pop. 63,200.

Salzburg, a western province of Austria, between Tyrol and Upper Austria; woody and mountainous, especially in the S., where there is fine lake and river scenery among the Alps. Excellent meadow-land favours the rearing of cattle and horses, and there is an important timber industry; salt, copper, iron and marble are found; there is an important tourist traffic. The capital and only large town is Salzburg. Area, 2,762 sq. m. Pop. 245,800.

Salzkammergut, a mountain district of Austria, between Salzburg, on the W., and Styria, on the E.; salt-mines and springs give a rich yield of salt, but the district is chiefly celebrated for its beautiful scenery and has become a tourist resort. Here are Lakes Atter, Traunsee, Hallstätter and others, while among numerous superb mountain peaks is Dachstein, rising to 9,830 ft. Gmunden, Ischl and Hallstatt are among the most popular resorts.

Samar, one of the Philippine Is., forming, with outlying islands, the province of Samar. The area of Samar I. is 6,124 sq. m.; it produces sugar, rice, cereals, coffee, cacao and tobacco. Pop. 380,000.

Samara, district in SE. European Russia, in the Middle Volga area, mainly occupied in agriculture and horse-breeding, but now being rapidly industrialised. Pop. c. 3,600,000. Area, 58,000 sq. m. The capital, Samara, on the Volga, has a pop. of c. 250,000.

Samarcand, city of the U.S.S.R., in the Uzbek Republic, situated at the W. base of the Tian-Shan Mts.,

150 m. SE. of Bokhara. It was sacked by Genghis Khan in the 13th Century, became Timur's capital in the 14th; and was captured in 1868 by the Russians, who have improved and enlarged it. It manufactures silk, cotton, and paper, and has a large trade in fruit and corn. Pop. 154,800.

Samaria, an ancient city of a district of between Judea and Galilee. It became the capital of the North Kingdom of Israel; was desolated by the hosts of Assyria in 720 B.C., but re-peopled afterwards by Assyrian settlers, who were converted to the Jewish faith. When the Jews rebuilt the Temple of Jerusalem, the Samaritans' offer of assistance was rejected, and this led to a bitter and permanent hostility. The site, now occupied by the small village of Sebastiyeh, has yielded remains and inscriptions.

Samarium, a metallic chemical element belonging to the rare-earth group; it was discovered in 1879. Symbol, Sm; atomic number, 62; atomic weight, 150.43.

Samaveda, the section of the Veda chants, intended for singers.

Sambar, the name of a kind of deer (*Cervus unicolor*) native to India and Ceylon. The antlers are long and three-pronged, and the animal has a well-developed mane.

Sambre, river of Europe, which rises in the dept. of Aisne, France, and flows ENE. to Belgium, joining the Meuse at Namur, after a course of 112 m. Here was fought, on Nov. 4, 1918, the last engagement of the World War, the three British armies involved capturing many thousands of prisoners and the battle ending at the armistice with the Germans in full retreat.

Samnites, a warlike people of ancient Italy whose territory lay SE. of Rome. They gave the Romans much trouble till, after wars commencing in 343 B.C. (in which, in 321, the Roman army suffered the catastrophe of the Caudine Forks), they were subdued in 290 B.C. A revolt in 90 B.C. led to their extermination as a nation.

Samoa, a group of 14 volcanic islands in the W. Pacific. All are mountainous and richly wooded; climate is moist and warm; copra is the chief export, and cotton, coffee, tobacco, etc., are also grown. The islands are divided into two groups: (1) the territory of W. Samoa, previously a German possession; captured by New Zealand forces in 1914, it is now administered by the New Zealand government under mandate. This group includes the larger islands of Savaii and Upolu; Apia (in Upolu) is the chief place. Pop. 58,000. (2) the Samoan Is., belonging to the U.S.A.; they include the larger islands of Tutuila, Tau and Manua. Pago Pago, in Tutuila, is an important coaling-station. Pop. 10,000.

Samos, island in the Aegean Sea, belonging to Greece, about 80 m. long and 8 m. wide. It is separated from the mainland by a narrow strait. It played an important rôle in ancient history, became subject to Turkey in the 16th Century, but was restored to Greece after the World War. Wine, oil, raisins, tobacco and cotton are produced. The capital is Limen Vathos. Pop. 70,500.

Samothrace, a mountainous, bleak island in the Aegean Sea, NW. of the mouth of the Dardanelles, belonging to Greece. Sponge-fishing is the main occupation. The famous "Winged Victory," now in the Louvre, was found here in 1863. Pop. 5,000.

Samoyedes, a people of the Mongolian race, occupying the N. shores of Russia and Siberia from the

White Sea to the Yenisei; live by hunting and fishing, and practice shamanism.

Sampan, a Chinese river vessel, used, especially on the Canton R. as a dwelling for a boatman and his family, and propelled generally by a scull at the stern and an oar at the bow, and sometimes by sails.

SAMPAN

Samphire, an umbelliferous perennial herb (*Crithmum Maritimum*), which grows wild along the coast in Europe, including Great Britain; the glaucous, salty-flavoured leaves are often pickled.

Sampler, a sheet of canvas on which Biblical texts, etc., are worked in wool; simple embroidery; the making of sampler was a part of girls' education in Victorian days.

Samson, a hero of the Old Testament, one of the judges of Israel (Judges xiv.-xvi.). He was a Nazirite of the tribe of Dan and a man of prodigious strength. At the time of his birth the Israelites, or at least a part of them, were subject to the Philistines, and in a series of single-handed exploits he did much to discomfit them, his most notable feat being the killing of a thousand of them with the jawbone of an ass. He fell a victim to the wiles of a Philistine woman, Delilah, revealed to her the secret of his strength, the preservation of his vow as a Nazirite to remain unshaven, and was delivered to his enemies, who blinded and imprisoned him. His strength returned, however, and he dragged down on the heads of the Philistines the roof of the building where he was brought to make sport for them, the killed numbering 3,000.

Samuel, a Jewish prophet, born of the tribe of Levi. Consecrated by his mother to the service of the Lord, he became a judge when he was 40; anointed first Saul and then David to be king over the, till then, disunited tribes of Israel, and thus became the founder of the Jewish monarchy.

Samuel, Books of, two books of the Old Testament, originally forming one book, but afterwards divided in the Septuagint. The narrative embraces a period of 125 years, and extends from the time of the Judges to the close of the reign of David, including the intermediate judgeship of Samuel and the reign of Saul, with a view to exalting the prophetic office on the one hand and the kingly office on the other.

Samuel, Herbert Louis, first Viscount, British politician. Entering the House of Commons in 1902, he served from 1905 in the Liberal Governments, successively as under-secretary to the Home Office, chancellor of the duchy of Lancaster, postmaster-general, and president of the Local Government Board, and in the 1916 coalition he became Home Secretary. From 1920 to 1925 he was High Commissioner for Palestine, in 1926 presided over the Royal Commission on the coal trade, being instrumental in drawing up the Samuel Report, and in 1927 he became chief organizer of the Liberal party. Elected for the Darwen division, 1929, he was Home Secretary in the National Government (1931-32). A member of the Privy Council, 1908, he was knighted in 1926 and made a viscount in 1937. He has written on politics and ethics. (1870-).

Sana, or Sana'a, the capital of Yemen, Arabia, situated in a well-cultivated valley at an altitude of 7,360 ft. It is enclosed by walls, and has several decorated mosques. The chief trade is in coffee; arms, jewellery, and silks are made. Pop. about 80,000.

San Antonio, city of Texas, U.S.A., on the San Antonio R., 80 m. SW. of Austin; has a Catholic college, cathedral and arsenal and many fine old Spanish buildings, and is a military post and airport. Iron and steel, textiles, leather and tobacco are manufactured. There are oil-wells and medicinal sulphur-springs near by. Pop. 231,500.

Sanatorium, in a general sense, an institution where patients are cared for during convalescence, but specifically a home for the treatment of those suffering from tuberculosis. Insured persons who have contracted tuberculosis may apply to enter a sanatorium for treatment, under the terms of the National Health Insurance Act. A feature of such treatment is exposure to open-air, both by day and night, and the buildings are specially designed to this end. Suitable diet is prescribed, and specially graded exercises follow a period of complete rest.

San Bernardino, city of California, U.S.A., the capital of San Bernardino county, situated 60 m. E. of Los Angeles. It is surrounded with orange-groves, vineyards and orchards. There are large railway repair-shops, foundries and aeroplane works. Pop. 57,500.

Sanction, in jurisprudence, that which is done to enforce obedience to a law; specifically, a penalty incurred by the infringement of a covenant. The word has become current in connection with the measures taken to enforce compliance with the Covenant of the League of Nations, notably in 1935, when Italy unlawfully invaded Abyssinia; the sanctions, which took the form of restrictions on imports and exports (especially restrictions on the import to Italy of war material), stoppage of credits, &c., were generally admitted to have failed in achieving the result expected, and were eventually withdrawn.

Sanctuary, a sacred place where one who had committed a crime had the right of safe refuge and was secure from arrest or punishment. In England, this immunity was intended for 40 days, and applied to all crimes save sacrilege; the fugitive had to confess his guilt, clad in sack-cloth, before the coroner, and take an oath to leave the kingdom. There were over 20 prescribed sanctuaries in England, generally religious edifices but also including several whole cities and the precincts of royal palaces. The right was abolished in 1823 so far as concerned felons, though debtors were able to take refuge in Whitefriars, the Savoy and other places in London and elsewhere until the end of the 17th Century.

Sanctus, a hymn sung in the Roman Catholic Church during the prayer of consecration at the celebration of the Eucharist, when also the Sanctus bell is rung.

Sand, the grains of mineral matter formed by the disintegration of rocks. They consist chiefly of small fragments of quartz (silica), and may be coloured, e.g., yellow, red or brown by varying amounts of iron oxide, or green by grains of glauconite. All sands, however, contain grains of other rocks, such as mica, feldspar, garnet, topaz, etc., in a greater or less degree. Sand of high purity is widely employed for the manufacture of glass, pottery, concrete, mortar, and for use in such forms as filter-beds and abrasives.

Sand, river of the Orange Free State, S. Africa, a tributary of the Vet R., which it joins 10 m. above Vergelegen; gave name to a convention, signed on its banks in 1852, granting recognition by the British Government to settlers on the other side of the Vaal.

Sand, George, the assumed name of Armandine Luella Aurore Dupin, French novelist, born in Paris; in 1822 married Baron Dudevant, but after nine years separated from him and went to Paris to make her way in literature; formed a connection with Jules Sandeau, from whose name she derived her *nom de plume*; afterwards became involved in a number of liaisons, notably with Alfred de Musset, Chopin and Franz Liszt; one of the finest modern novelists, her works include *Consuelo*, *Spiridon*, *Elle et Lui* and *Lucrèce Floriani*, the two latter being inspired by her relations with Musset and Chopin, also *La Petite Fadette*, *Françoise de Champi*, and other studies of rustic life. The last two are considered among her best. (1804-1876).

Sandal, a simple foot-covering usually by strings or straps passing round the ankle and between the toes. It was the normal footwear of the classical Greeks.

Sandalwood, a fragrant wood obtained from *Santalum album*, an Indian tree, or from several related species, and extensively used in the East for making ornamental boxes, etc.; it is also employed as incense, while its essential oil is a powerful perfume.

first intrigue, he wrote with her *Rose of Blanche*, 1831, and independently many novels and plays; was elected to the Academy (1858), and was librarian of the Mazarin Library and St. Cloud. (1811-1883).

Sanderling (*Chlidias arenaria*), a bird of the plover family, about 8 in. in length, with a chestnut brown back, chestnut breast with darker spots, white underparts, and a long straight, black beak; in winter it assumes a distinctive plumage of pale grey above and white underparts. It feeds on small molluscs and crustaceans, and visits Great Britain about August, staying until April.

Sandgate, watering-place of Kent, England, situated 1½ m. W. of Folkestone. Near by is Shorncliffe camp. Pop. 2,600.

Sand Grouse, the common name of birds belonging to the family Pteroclididae, native to the warm parts of Asia. The tail and wings are pointed, and the legs are longer than those of ordinary grouse, which the bird in general resembles. It frequents arid plains and deserts, where its dull plumage renders it inconspicuous.

Sand Hopper (*Talitrus saltator*), a small, segmented,

laterally-flattened crustacean of the order Amphipoda, common along most sea-shores, where it burrows in the sand above high-water mark and is a useful scavenger. It is closely related to the shorehopper (*Orchestia gammarus*), which is found among rocks.

Sandhurst, town of Berkshire, England, 6 m. N. of Aldershot. Pop. 3,500. The Royal Military College, originally established at Great Marlow in 1859, was removed to a site 2 m. SE. of Sandhurst in 1913. It has accommodation for 700 cadets, who are trained as infantry and cavalry officers. In the neighbourhood are Wellington College, the famous public school, and Broadmoor criminal lunatic asylum.

SAND HOPPER

Sander, or *Sandra*, (*Lucioperca lucioperca*), a species of pike-perch, common in the rivers and lakes of E. Europe, W. Asia and also found in N. America. It is the largest of the pike-perches and can reach 4 ft. in length.

Sanderling, a small wading bird wintering in Great Britain, grey and white in winter, mottled chestnut or light brown in summer.

San Diego, city and seaport of California, U.S.A., situated 124 m. SE. of Los Angeles, an important military, naval and air station, with a splendid harbour and modern facilities. Aeroplanes, parachutes, cotton-seed products, etc., are manufactured, and fishing and fish-canning are leading industries. Pop. 148,000.

Sand Lizard (*Laocerta agilis*), a lizard found on sandy heaths in Great Britain and Central Europe. It is about 7 in. long; the male is green in colour, the female a sandy brown.

Sandown, watering-place of the I. of Wight, England, 6 m. S. of Ryde. It has fine sands, golf-links, and sea-bathing. Pop. 6,200.

Sandown Park, racecourse in Surrey, England, near Esher railway station, about 15 m. SW. of London. The Eclipse Stakes is run here annually, in July.

Sandpiper, a group of small birds belonging to the plover family. They haunt the sea-shore and banks of rivers and feed on worms, small molluscs, insects, etc. The common sandpiper (*Tringa hypoleucos*) has brown upper parts, with a greenish iridescence; the breast is light brown, with darker streaks, while the belly and flanks are white; it is a summer visitor to Great Britain. The green sandpiper (*Tringa ochropus*), an autumn and spring visitor, has dark brown upper parts spotted with white and showing a green gloss, a greyish-brown throat and breast and a white tail. There are several other species.

Sandringham, a small village of Norfolk, England, 7½ m. NE. of King's Lynn. In the neighbourhood are the two royal residences, Sandringham House, a splendid mansion in Elizabethan style, purchased by Edward VII in 1861, and York Cottage; the surrounding estate of 7,000 acres includes a fine royal park.

Sandstone, a rock consisting of grains of sand cemented together into a compact mass. The sand is chiefly quartz, but may include felspar, mica and clay. Sandstone varies from grey to reddish-brown in colour according to the type of cementing substance—glauconite, clay, calcite, iron oxide, etc.—and usually is distinctly stratified. It is employed extensively as building stone and for making grindstones.

Sandwich, town of Kent, England, on the Stour, 12 m. E. of Canterbury. Formerly one of the leading Cinque Ports, it is now 2 m. from the coast, owing to the receding of the sea. It is a popular holiday resort and has noted golf-links. Pop. 3,300.

Sandwich, Edward Montagu, first Earl of, English admiral; fought for the parliament during the Civil War, and in 1656 was appointed "general-at-sea." Although he had been intimate with Cromwell, he helped to restore Charles II. to the throne, fetching him from Holland, and in reward was made Earl of Sandwich, 1660. Later, fought successfully against the Dutch at sea, but fell into disgrace and was dismissed. Again given a command in 1672, he perished during the action in Southwold Bay. (1625-1672).

Sandwich Islands. See Hawaiian Islands.

Sandwort (*Arenaria*), a genus of plants of the natural order Caryo-

phyllaceae, comprising low herbs, usually with awl-shaped leaves and small white flowers. Several species are found in Great Britain, chiefly on sandy shores, especially *A. peploides*, the sea-purslane. A number of species native to Alpine regions, the Balearics and Spain are grown in rock-gardens in England.

SEA-PURLANE

Sandy Hook, a narrow peninsula of New Jersey, U.S.A., forming part of the boundary of New York Lower Bay. The America's Cup yacht race is held off its coast.

San Francisco, city of California, U.S.A., premier port of the Pacific coast, occupies N.E. corner of a tongue of land stretching between the Pacific and San Francisco Bay, which forms a sheet of water 65 m. long, communicating with the ocean by the Golden Gate. The rise of San Francisco began with the discovery of gold in 1848, and it is now one of the world's finest cities, with splendid buildings, parks, and other amenities and numerous educational establishments, including three universities. As the western terminus of the great continental railroads and outlet for the produce of a rich wheat district, it has an enormous shipping trade. Important industries are shipbuilding, meat-packing, sugar-refining and the manufacture of metal goods and clothing. The city was almost entirely destroyed by earthquake and fire in 1906. Pop. 634,000.

Sanger, George, English showman (popularly known as "Lord" George Sanger), born at Newbury, Berks., son of a showman who had fought at Trafalgar; began as a conjurer with his brother John, with whom he leased the Agricultural Hall and later, in 1871, Astley's Amphitheatre; afterwards travelled on his own with circuses over most of Europe; he was murdered by an employee. (1825-1911).

Sangrail. See Grail, Holy.

Sanhedrin, a council of the Jews, 71 sittings in Jerusalem and claimed authority and jurisdiction over the whole Jewish people; it was presided over by the high-priest. Its authority was seriously curtailed about the time that Jesus was arraigned before it as a false prophet (John xi., 47).

Sanitation, a department of public health. It comprises the arrangements for water supply, the disposal of sewage and refuse, etc. The relative laws are administered by the local sanitary authority, who maintain sanitary inspectors to see that building by-laws as regards internal sanitation, drains, etc., are observed, and that no nuisance is allowed to arise in respect of the disposal of refuse. Other duties included in the responsibilities of the sanitary authority are the maintenance of satisfactory ventilation in buildings, the notification of infectious diseases and steps to apply the proper disinfection of the premises, inspection of meat and animals, dairies, cowsheds and milkshops, examination of canal boats and common lodging-houses, and the supervision of the carrying out of the various Shops and Factory Acts.

San José, city of California, U.S.A., SE. of San Francisco; there is a large fruit-canning industry, and near by is a quicksilver mine and sulphur springs. Pop. 57,800.

San José, capital of Costa Rica, situated on a fertile and elevated plain between the Caribbean Sea and the Pacific. Grain, the vine, and many fruits are grown in the neighbourhood; coffee exporting, flour-milling and distilling are the principal industries. Pop. 63,600.

San Juan, a mountainous province of the Argentine Republic, on the Chilean border; rich in minerals but, excepting gold and copper, these are not worked, and agriculture is the chief industry. The town of San Juan (pop. 20,000), 95 m. N. of Mendoza, is the capital. Area, 34,432 sq. m. Pop. 202,500.

Sankey, *Ira David*, American religious revivalist, and hymn-writer, born at Edinburgh, Pennsylvania. He made a great impression by his preaching and solo singing during his visits to England in 1873 and 1883 with D. L. Moody, with whom he collaborated in composing the popular *Sacred Songs and Solos*. (1840-1908).

Sankey of Moreton, *John*, first English judge. Called to the bar in 1892, he became a K.C. in 1909 and a judge in 1914. In 1928 he was appointed a Lord Justice of Appeal and in 1929 Lord Chancellor, retiring in 1935. He was chairman of the Coal Industry Commission, 1919, and also of committees convened during the Imperial Conference and the Indian Round Table Conference, 1930. He was created a viscount in 1932. (1866-).

San Luis, province of the Argentine Republic, with an area of 29,700 sq. m. It produces cereals, potatoes, grapes and alfalfa, and cattle are reared, but lack of water hinders development. The mineral wealth comprises copper, gold and graphite. The capital (pop. 18,000) is San Luis. Pop. 186,600.

San Luis Potosí, a state of Mexico, with an area of 24,415 sq. m., most of which forms a portion of the Central Plateau, where cattle are raised. The lower ground is very fertile, and there is much mineral wealth, especially silver. The principal rivers are the Verde, Tampico and Pánuco. Pop. 580,000. The capital of the state is a city of the same name, 327 m. N. of Mexico City. It has textile factories and silver-smelting works. Pop. 91,800.

San Marino, a little republic of Rimini, and totally enclosed by Italian territory. It has maintained its independence since the 4th Century, and claims to be the oldest state in Europe. It comprises the small town of San Marino and several villages perched on the eastern slopes of the Apennines; agriculture and cattle-rearing are carried on, and building stone is quarried; the state is ruled by a grand council; there is a treaty of friendship with Italy. Area 38 sq. m. Pop. 13,900.

San Remo, town of the Italian Riviera, on a bay in the Gulf of Genoa, 26 m. NE. of Nice. It is sheltered by a semicircle of hills, and owing to its mild climate is a favourite winter resort; flowers, olives, palms and lemons are grown for export. Pop. 24,700.

San Salvador, capital of the republic of El Salvador, situated at the base of an extinct volcano, 25 m. NE. of La Libertad, its port. It manufactures soap, candles, silks and cigars. There is a cathedral and a university. It has suffered frequently and severely from earthquakes, notably in 1854 and 1873. Pop. 99,800.

Sansculottes (i.e. "without breeches"), a term of contempt applied by the aristocratic party in France to U.E.

the Revolutionists, who generally wore long trousers instead of the "culottes," or knee-breeches, fashionable in society; the "sansculottes" accepted the name as a designation of good patriots.

San Sebastian, seaport and watering-place of Spain, on a small peninsula jutting into the Bay of Biscay, 10 m. from the French frontier. Since its bombardment by Wollington in 1813 it has been spacious rebuilt. In 1936, during the Spanish Civil War, it was captured by the insurgents, being severely damaged. Pop. 86,300.

Sanskrit, the ancient language of the Hindus, a member of the Aryan family of languages, among the known members of which it is the closest to the lost "mother-language." Highly inflected and subject to complex and artificial phonetic laws, it has long been a dead language, having been superseded by its simpler descendants, the modern Aryan tongues of N. India, but is still assiduously cultivated in India as the sacred language of Brahmanism and for the sake of its rich and varied literature.

Vedic Sanskrit, the oldest known form of the language, in which the Vedic hymns and other Brahman scriptures were composed, is more primitive in structure and vocabulary, with a greater wealth of inflections than are found in classical Sanskrit which succeeded it and in which the secular literature is composed. Paramount among the latter are the two vast Indian epics, the *Mahabharata*, which in general dates from several centuries B.C. and is seven times as extensive as the *Odyssey* and *Iliad* combined; and the *Ramayana*, ascribed to the poet Valmiki. There are a number of other epics of less extent and known, some being the work of Kalidasa (c. 450 A.D.), the greatest Indian poet and dramatist, who is chiefly known for his poetical dramas, especially *Sakuntala*, or *The Lost Ring*. Sanskrit literature is rich in fables, stories and didactic verse, as well as in scientific and technical works, embracing philosophy, religion, law, history, medicine, prosody, grammar, rhetoric, music, astronomy, mathematics and almost every other branch of intellectual activity.

Sansovino, *Andrea Contucci del Monte*, Italian sculptor, born at Monte San Savino, Arezzo, from which he took his name; studied in Florence under Antonio Pollaiuolo, and in 1490 became sculptor and architect to the king of Portugal, for whom he designed a palace. Most of his best work consists of statues and monuments in churches in Florence, Geneva and Rome—especially, in the last-named, the monuments to Cardinal Sforza and Bishop Basso in Santa Maria del Popolo. (1460-1529).

San Stefano, town and seaside resort of Turkey, 7 m. SW. of Istanbul, on the Sea of Marmara. Here, in 1878, was signed the Treaty of San Stefano, terminating the Russo-Turkish War, which had broken out in the previous year.

Santa Ana, town of El Salvador, the capital of the inland dept. of the same name, bordering on Guatemala. The town is situated about 45 m. NW. of San Salvador, at a height of 2,100 ft. It has railway communication with San Salvador and the port of Acajutla, on the Pacific; exports coffee and sugar; cigars, textiles, spirits, sugar and pottery are manufactured. Pop. 79,700.

Santa Barbara, city of California, U.S.A., on the Pacific coast, 90 m. NW. of Los Angeles, beautifully situated on a fine bay. It has quaint Spanish colonial architecture and is a leading holiday resort; in the district is the Painted Cave, with prehistoric paintings. Pop. 33,600.

Santa Catharina, a state of Brazil, bordered E. by the Atlantic Ocean, N. and S. by the states of Paraná and Rio Grande do Sul, and W. by Argentina. Much of the interior is wooded and mountainous. The coast is low-lying. The state is chiefly agricultural and has an area of 20,785 sq. m. The capital is Florianópolis. Pop. 986,900.

Santa Clara, town of Cuba, capital of Santa Clara, situated 185 m. SE. of Havana. It is the centre of a district producing sugar and coffee. Pop. 97,800.

Santa Claus, contraction of St. Nicholas (q.v.).

Santa Cruz (de Tenerife), seaport and capital of the Canary Is., on the NE. coast of the island of Tenerife. It is an important coaling-port for ocean steamers, and exports cochineal, wine and garden produce. Pop. 60,000.

Santa Fé, city of the Argentine republic, the capital of the province of Santa Fé, situated on a branch of the Paraná R., 300 m. NW. of Buenos Aires. It is an old settlement with several fine buildings, including a cathedral, bishop's palace, university and government buildings. Pop. 145,000.

Santa Fé, capital of the state of New Mexico, U.S.A., situated at an altitude of 7,000 ft., about 60 m. NE. of Albuquerque; notable for its Spanish colonial and Indian pueblo architecture. It has an old governor's palace (now a museum), a cathedral and several old churches; the original Spanish plaza is in the centre of the city. Near by are hot springs, turquoise mines, Indian cliff-dwellings and a petrified forest. Pop. 11,200.

Santa Maria, a town of Brazil, in the state of Rio Grande do Sul, about 80 m. NW. of Porto Alegre. It is an important railway junction and has a busy trade in agricultural products and livestock. Pop. about 59,000.

Santander, seaport of Spain, situated on a fine bay facing the Bay of Biscay, 316 m. N. of Madrid. The numerous light industries include cigar-making, brewing, cotton-spinning and flour-milling; flour, wine and cereals are exported. Pop. 86,000.

Santayana, George, philosopher of Spanish extraction, born in Madrid but settled in the U.S.A. from the age of 11; became Professor of Philosophy at Harvard, 1889-1912; published a book of *Sonnets*, 1894. He is the author of *The Sense of Beauty and Interpretation of Poetry and Religion and The Life of Reason*, his greatest work. (1863-).

Santiago, capital of Chile, situated 90 m. SE. of Valparaíso, on an elevated plain overhanging the N. and E. by the snow-clad peaks of the Andes. The city has spacious plazas, well-paved streets and many fine public buildings, including a cathedral, a university, art, agricultural and military schools and zoological gardens. Cloth, flour, machinery, leather, beer and ice are made. Pop. 696,200.

Santiago (de Compostella), city of Spain, in the province of Coruña, of which it was formerly the capital, 26m. NE. of Carril, its port; has an interesting old Romanesque cathedral containing the shrine of St. James, (a noted place of pilgrimage in the Middle Ages) with magnificent cloisters, a university, and several ruined monasteries. Pop. 26,000.

Santiago (de Cuba), city and seaport of Cuba, on a beautiful land-locked bay on the S. coast; the city is the see of an archbishop, and has an old Spanish cathedral. There are foundries, tan-

yards, soap-works and cigar factories. An historical city, it was until 1589 the capital of Cuba. Pop. 104,000.

Santiago (del Estero), province of Argentina, in the NW., situated S. and W. of the Chaco; it has an area of 53,450 sq. m., much of which is wooded. Agriculture is largely carried on, the main products being wheat, maize and lucerne. The chief rivers are the Salado and the Dulce; the town of Santiago del Estero (Pop. 65,700) is the capital. Pop. 454,200.

Santley, Sir Charles, English baritone singer, born in Liverpool; studied in Milan, made his debut in 1857, and became a favourite with the public in both oratorio and opera; he was knighted in 1907, and in 1909 published *Reminiscences*. (1834-1922).

Santo Domingo, capital of the Dominican Republic, a fortified port on the S. coast of the island of Haiti, at the mouth of the R. Ozama, a typical, quaint old Spanish colonial town, with a 16th Century cathedral. It was laid waste by a hurricane in 1930, but has been re-built and re-named Ciudad Trujillo; coffee and sugar are exported. Pop. 71,000.

Santo Domingo. See Dominican Republic.

Santos, city and seaport of Brazil, in the state of São Paulo, situated on a beautiful bay, 230 m. SW. of Rio de Janeiro. It has a splendidly equipped harbour and is the leading coffee-exporting port of the world. Formerly swampy and unhealthy, it has now become a holiday resort. Pop. 103,000.

São Francisco, river of Brazil; for the most part navigable. It rises in the SW., near the source of the Paraná, and flows N., NE., and SE., reaching the S. Atlantic after a course of 1,800 m. and forming in its lower part the boundary between the maritime provinces of Sergipe and Alagoas. Higher up it divides Bahia and Pernambuco.

Saône, river of E. France, a tributary of the Rhône, 301 m. long. It rises among the Faucilles Mts. in Vosges, and flows SW. and S. to join the Rhône at Lyons. Châlon and Mâcon stand on its banks.

Saône-et-Loire, dept. of France in the east-central part of the country. It is bounded by the Saône on the SE. and by the Loire on the W., and has an area of 3,330 sq. m. It is fertile and is noted for its cattle and wine. Iron and coal are mined, and the manufacture of cotton goods, pottery and machinery is carried on. Mâcon is the chief town, and others include Châlon, Autun, Le Creusot and Cluny. Pop. 525,700.

São Paulo, a large state of Brazil, engaged in the production of coffee, sugar, tobacco, cocoa, cotton. It is one of the principal sources of the world's coffee. Area 91,300 sq. m. Pop. 6,800,000. The capital of the state is a city of the same name, situated on a plain 310 m. SW. of Rio de Janeiro. It is the chief centre of the Brazilian coffee export, and has manufactures of cotton, tobacco and spirits. Pop. 1,120,000.

Sap, the juice or fluid transported through the tissues of plants, and corresponding in its functions to blood in animals. It consists of water in which are dissolved mineral salts derived from the soil, and essential to the life and growth of the plant. The fluid enters the roots by osmosis and runs up the stem by some such power as capillary attraction or the cohesive force of water, assisted by the pull exerted by evaporation from the leaves. It is mainly in the leaves, by photo-chemical action, that the crude sap is converted into food substances suitable for cell-building.

Saponification, the decomposition of a fat by an alkali, with the formation of a soap or glycerine. The word is used as practically equivalent to hydrolysis, e.g., when stearin treated with caustic potash yields potassium stearate and glycerol.

Sapper, name for a private in the Royal Engineers; originally a sapper was a soldier employed in digging saps, or ditches. The Royal Corps of Sappers and Miners was formed in 1813, during the Peninsular War, and existed until 1856, when it was merged in the newly-formed Corps of Royal Engineers. There are still three corps of sappers and miners in the Indian Army.

Sapphire, a precious stone of the corundum class, differing from the ruby only in colour, which is a blue of various shades. The finest specimens are found in Ceylon, while Siam, Madagascar, Australia and parts of the U.S.A., especially Montana, are important sources of sapphires.

Sappho, a lyric poetess of Greece, of the 7th Century B.C., whose poems were among the masterpieces of antiquity, though only two of her odes and some short fragments of others remain; numerous papyrus texts, badly mutilated, were found in Egypt in the late 19th Century. The story of Sappho's death-leap from a rock owing to a disappointment in love is regarded as a myth.

SAPPHO

Saracens, the name given in medieval times to the Arabs or Mohammedans, and extended to all the non-Christian races with whom the Crusaders or Christian peoples came in contact. The word seems to have originated among the Greeks and Romans and was probably derived from Sarakene, a place in the Sinaitic peninsula.

Saragossa (Spanish, *Zaragoza*), city of Spain and capital of the province of the same name, on the Ebro, 212 m. N.E. of Madrid; one of the most ancient towns of Spain, with a stirring history, which includes the memorable defence against the French in 1808. It has many notable buildings, including two cathedrals, a university, citadel, and archiepiscopal palace. It is an important railway junction. Pop. 189,000.

Sarajevo, a city of Yugoslavia, formerly the capital of Bosnia, on the Miljacka; now chief town of the banovina or province of Drinska. The town is noted chiefly for the assassination of Francis Ferdinand of Austria on June 28, 1914, a crime which led to the Great War. (See *Prinsep*.) Pop. 78,200.

Sarasate, *Pablo Martin Meliton de*, Spanish violinist, born at Pamplona; studied at the Paris conservatoire and made his debut at the age of 16; next year played in London, which he afterwards visited repeatedly; became world-famous for his polished and expressive playing; composed celebrated *Spanish Dances* for the violin. (1844-1908).

Saratoga Springs, one of the best-known watering-places of the U.S.A., in New York State, 38 m. N. of Albany; plentifully supplied with mineral springs; 12 m. to the E. is the scene of Burgoyne's surrender to Gates, Oct. 17, 1777. Pop. 13,300.

Saratov, city of Russia, on the Volga, 500 m. E.E. of Moscow. Its industrial activities include distilling, oil and tobacco, and it trades in corn, salt, textiles. Pop. 327,600.

Sarawak, an independent state under British protection in NW. Borneo, fronting the China Sea on the NW.; was granted as an independent rajahship to Sir James Brooke by the Sultan of Borneo in 1842, and is still ruled by his descendants as rajahs; is very fertile, and grows sugar, coconuts, rice, sago, rubber and tea; is rich in minerals and oil is produced; capital Kuching, on the Sarawak R. Area, 50,000 sq. m. Pop. 475,000.

Sarcoma, a malignant tumour made up of cells of imperfectly developed connective tissue, which may occur in any part of the body; it frequently contains a numerous supply of blood-vessels.

Sarcophagus, a stone coffin or receptacle for a dead body; the oldest known sarcophagi are Egyptian; they were also used by the Phœnicians, Etruscans, Persians and Romans, and were frequently elaborately carved.

Sard, a rare variety of carnelian which displays on its surface a rich reddish-brown hue, but, when held between the eyes and the light, appears of a deep blood-red.

Sardanapalus, Greek name of the last king of Assyria, and conqueror of Babylon. According to a Greek legend, surprised when at his ease by a large army of invaders, he suddenly developed into a hero, till hard pressed at length and shut up in Nineveh, and after 2 years' defence, finding resistance hopeless, he reared a funeral pile, and, setting fire to it, perished in the flames. (c. 669-622 B.C.).

Sardine, a small fish of the herring family, especially the pilchard (*Clupea pilchardus*), in its young stage salted and preserved in oil. The Norwegian pilchard, so prepared, is frequently sold under the name.

SARDINE

Sardinia, an island of the Mediterranean, 170 m. long and 75 m. broad, situated to the S. of Corsica; since 1859 part of the kingdom of Italy. It has a fruitful soil, and presents a diversified surface of hill and valley. It produces many minerals, timber and wine; there are important fisheries. The capital is Cagliari in the S. Area, 9,300 sq. m. Pop. 1,034,000.

Sardis, capital of ancient Lydia, in Asia Minor, at the foot of Mt. Tmolus, celebrated in olden time for its wealth, its trade, and luxury. In the 4th Century it was taken by the Greeks, who were succeeded by the Romans; was sacked and destroyed by Tamerlane in the 15th Century.

Sardonyx, a beautiful and rare variety of onyx consisting of alternate layers of sard and white chalcedony.

Sardou, a French playwright, born in Paris; gave up medicine for literature, his first successes being *Monsieur Garat* and *Les Près Saint-Gervais*, both in 1860. From that date his popularity grew and wealth flowed in upon him. His work was taken up by Sarah Bernhardt, for whom he wrote *Fédora*, *Théodora* and *La Tosca* (1887). His plays are characterized by clever dialogue and stage effects. (1831-1908).

Sargasso Sea, an area of the N. Atlantic Ocean which is largely covered with sea-weed (chiefly *Sargassum bacciferum*). It is of changing dimensions, but lies approximately between 35° and 75° W. longitude and 20° and 40° N. latitude, and is free from ocean currents.

Sargent, John Singer, British painter. Born at Florence, of American parentage, he studied there and in Paris before settling in Chelsea to paint portraits, and later landscapes. He was made an A.R.A. in 1894, and an R.A. in 1897. (1856-1925).

Sargon II., the assumed title of a usurping king of Assyria, who seized the throne in 722 B.C., on the death of Shalmaneser IV. He carried off over 27,000 captives from Samaria to Mesopotamia and Media, reconquered many revolted provinces, and besieged Jerusalem.

Sark, one of the Channel Is., $3\frac{1}{2}$ m. in length and $1\frac{1}{2}$ m. broad, 6 m. E. of Guernsey, and 24 m. from the French coast. It has steep cliffs 100 to 320 ft. high. Adjoining the island is Little Sark, connected with it by a narrow isthmus. Creux harbour is on the E. coast. Pop. 579. Sark is a dependency of Guernsey.

Sarpedon, the "Nestor" and king of the Lycians, son of Zeus and Europa, one of the heroes of the *Iliad*; assisted the Trojans in their war against the Greeks, and was slain by Patroclus.

Sarpi, Paolo, an Italian historian born at Venice; was the champion of the Republic against the Pope; was summoned to Rome and, on his refusal to obey, excommunicated. His life being in peril, he retired into his monastery, and wrote the *History of the Council of Trent*, with which his name has ever since been associated. He was held in high esteem by the Venetians, and was honoured at his death with a public funeral. (1552-1623).

Sarrail, Maurice Paul Emmanuel, French general. After seeing service in Algeria and Tunis and holding various staff appointments he took charge of the 3rd Army at the battle of the Marne in 1914. He was in Salonica in 1915 and 1916 and retired in 1917. From 1924 to 1925 he was High Commissioner in Syria. (1856-1929).

Sarsaparilla, the name of several plants of the genus *Smilax*, which yields the medicinal sarsaparilla used in the treatment of rheumatism and skin diseases, and as a beverage.

Sarthe, a river of France rising in the dept. Orne, and flowing SW. towards the Mayenne, which it joins near Angers. It gives its name to a dept. whose capital is Le Mans; cereals and apples are grown, and there are hemp and pottery manufactures and distilleries. Area, 2,410 sq. m. Pop. 388,600.

Sarto, Andrea del, more properly Andrea d'Agnolo, a Florentine artist; painted in oil and fresco numerous works; died of the plague at Florence. His work displays accuracy of drawing and delicacy of feeling, as exemplified in his "Charity" in the Louvre, Paris, and his frescoes in Florence. (1486-1531).

Sarum, an ancient and now deserted borough in Wiltshire, England, 2 m. N. of Salisbury, to which the name New Sarum is given. It was once a considerable city. The bishop had a castle there, but the see was removed to Salisbury in 1219. The site is now national property and has been excavated. It was famous as a "pocket borough" before 1832.

Saskatchewan, (1) a province of western Canada, constituted in 1905, and comprising portions of the former territories of Athabasca, Assiniboia and Saskatchewan; one of the world's

finest grain-growing areas. Capital, Regina. Area, 251,700 sq. m. Pop. 931,000. (2) one of the great navigable rivers of Canada, rises among the Rockies in two great branches, called respectively the N. and S. Saskatchewan, 770 and 810 m. long, which, flowing generally E., unite and after a course of 282 m., pass into Lake Winnipeg, whence the river issues as the Nelson, and flows 400 m. NE. to Hudson Bay.

Saskatoon, second city of Saskatchewan, chewan, Canada, on the Saskatchewan R. The university of the province is situated here. It trades wood and wheat. Pop. 41,600.

Sassafras, a genus of plants of the order Lauraceae, the best known being the sassafras laurel (*S. officinale*), a small tree or bush found in the woods of N. America. The root, or an essential oil prepared from it, is used in medicine as a stimulant.

Sassanids, a dynasty of Persian monarchs, founded by Ardashir I. in A.D. 226, after a revolt against the Parthian rulers. Continually at war with the Roman, and later the Eastern (Byzantine) emperors, the line fell before the Moslem invaders in 637.

Sassari, the second city of Sardinia, in the NW., prettily situated amid olive and orange groves, 12 m. from the Gulf of Asinara; has an old cathedral, castle, and university, and does a good trade in olive-oil and grain. Pop. 52,000.

Sassoon, Siegfried, English poet and critic, became a pacifist during the World War. His *War Poems*, 1919, were a forcible expression of the disillusion of the time. *Memoirs of a Fox-hunting Man*, 1928, and *Memoirs of an Infantry Officer*, 1930, established his reputation as prose writer. In 1938 he published a new volume, *The Old Century*; and *Seven Years After*. (1886-).

Satan, an archangel who, according to Jewish and Christian belief, revolted against the Most High, particularly when required to do homage to Adam; for his disobedience he was, with all his following, cast into the abyss of hell. The only Scriptural information concerning him is that given in the books of Job and the Revelation of St. John, apart from the story of Jesus' temptation by him in the wilderness.

Satellites (*W. attendants*), name given to the secondary bodies which revolve round the planets of the solar system, of which the Earth has 1, Mars 2, Jupiter 11, Saturn 10, Uranus 4, and Neptune 1; Venus and Mercury have none.

Satinwood, the wood of the tree native to the mountainous parts of the East Indies and Ceylon. The wood is deep yellow in colour, and, when cut, shows a very smooth, ornamental surface; this quality makes it valuable for veneers, cabinet and furniture making. A similar wood is imported from the West Indies.

Satire, a species of poetry or prose writing in which the vice or folly of the times is held up to ridicule, a medium in which Horace and Juvenal excelled among the Romans, Dryden, Pope and Swift among English writers, and Voltaire, Molière and Cervantes among those of the Continent.

Satrap, a governor of a province under the ancient Persian monarchy, with large military and civil powers; when the central authority began to wane, some of them set up as independent rulers.

Satsuma Ware, a kind of pottery manufactured in Satsuma, the southern portion of Kyushu, Japan. It is buff in colour, and is

SARSAPARILLA
(*Smilax*
medica)

glazed to give a creamy, cracked effect. Modern Satsuma has little value. Genuine old Satsuma faience pieces are rather small, with minute crackle, decorated with enamel colours and matt gold, of delicate design slightly raised.

Saturated Solution, in chemistry, a solution which, when placed in contact with excess of the dissolved substance, undergoes no change. It is contrasted with (a) an unsaturated solution, which, under similar conditions, will dissolve more of the substance, and (b) a supersaturated solution, which will give up some of the substance it has already dissolved.

Saturday, the seventh day of the week, so named in honour of Saturn. As the Sabbath it is the weekly rest days of members of the Jewish faith, and is also kept as such by certain Christian bodies, including the Seventh-day Adventists.

Saturn, in Roman mythology, a primitive god of agriculture in Italy, corresponding roughly to the Greek Kronos, the father of Zeus, and sovereign of the Golden Age; was represented as an old man bearing a sickle.

Saturn, the planet of the solar system whose orbit is outside that of Jupiter; is 886 millions of m. from the sun, round which it takes 10,759 days or nearly 30 years to revolve, rotating on its own axis in a little over 10½ hrs. Its diameter is 9 times greater than that of the earth; it is surrounded by bright rings that appear as 3, and is accompanied by 10 moons; the rings are thin, and are supposed to consist of former satellites that have exploded.

Saturnalia, a festival in ancient Rome at the end of December, in honour of Saturn, in which all classes enjoyed and indulged in all kinds of merriment without restraint. The festivities associated with Christmas probably in part descend from it.

Satyr, in Greek mythology, semi-animal woodland deities who roamed the hills generally in the train of Dionysus or Pan (q.v.), dancing to rustic music; represented with long pointed ears, flat noses, short horns, and a hair-clad man's body, with the legs and hoofs of a goat; they were of lustful nature, and fond of sensual pleasures.

Sa'ud, Abdul-Aziz ibn, King of Saudi Arabia, including the Hejaz, Nejd and dependencies. At one time Sultan under Turkish rule, he first threw off the foreign yoke in 1913, and in 1917 became independent Sultan of Nejd. From 1917 to 1923 the British Government subsidised him to the extent of £500,000. In 1926 he was proclaimed King of the Hejaz, and in 1932 unified his possessions under their present name. (1882-).

Sauerkraut, a favourite article of food in Germany and elsewhere in N. Europe; formed of thinly sliced young cabbage laid in layers, with salt and spice-seeds, pressed in casks and allowed to ferment.

Saul, a Benjamite, the son of Kish, who was anointed by Samuel to be the first king of Israel. He distinguished himself in the field against the enemies of his people, but fell at the hands of the Philistines after a reign of 40 years, and after several attempts on the life of David, who had been elected to succeed him.

Sault Sainte-Marie, (1) a lake port of Ontario, Canada, on the Sault Ste.-Marie ship canal and the St. Mary's R., which connects lakes Huron and Superior. It is a mining centre for various ores. Pop. 23,100. (2) city in Michigan, U.S.A., on the St. Mary's R.,

by bridge over which it is connected with Sault Sainte-Marie, Ontario. The river rapids, which are by-passed by ship canal, provide water power for the town's industrial works. Boat-building, lumbering and paper manufacture are carried on. Pop. 13,800.

Saumur, town of France, in the dept. of Maine-et-Loire, situated on the Loire and partly on an island in the river, 32 m. SE. of Angers; once famous for its Protestant theological seminary, and till the Edict of Nantes a stronghold of the Huguenots; has trade in grain, dried fruits, and rosaries; is the site of an important military school. Pop. c. 14,000.

Sauterne, a village of dept. Gironde, France, which gives its name to a well-known white wine.

Savage, Richard, English poet and dramatist, who alleged that he was the illegitimate child of Lord Rivers, and gained the regard of Johnson. His chief poem, *The Wanderer*, has no poetic merit. (1697-1743).

Savannah, a name used chiefly in Florida and neighbouring states to designate the wide, treeless plains of those parts; is practically an equivalent for "pampa," "prairie," and "steppe."

Savannah, a city and port of Georgia, U.S.A., on the Savannah R., 18 m. from its mouth; an important naval stores station and second cotton port of the U.S.A.; it has foundries, railway and machine shops, and lumber and paper-mills. Pop. 85,000.

Save (Sava), a river in Yugoslavia, a tributary of the Danube, which it joins at Belgrade after a course of 550 m. from its source in the Julian Alps.

Savernake Forest, a large stretch of woodland, largely beech-clad, 3 m. SE. of Marlborough, Wilts, England. It covers about 4,000 acres, and is rich in deer and game. In 1938 it was taken over by the Forestry Commission for preservation and development.

Savings Banks, banks for the receipt of small savings. The Post Office Savings Bank in Great Britain, under State management, permits the deposit of any sum from 1s. to £500, paying interest at 2½ per cent. per annum. A depositor may have more than one account; there is no limit to the amount which may stand to his credit, but he may not deposit more than £500 in the aggregate in any one calendar year. There are some 10½ million active accounts in the P.O. Savings Bank, and holders' deposits, represented by Government Stock, aggregate over £170,000,000. Trustee Savings Banks are directed by local voluntary Trustees and Managers whose duties are defined by Statute and in rules certified by the Registrar of Friendly Societies, and are subject to government supervision. The total assets of these banks are over £260,000,000, representing nearly 2½ million active accounts.

Savings Certificates, National, first issued in February, 1916, to raise money for the World War, since which year there have been five later issues and one conversion issue. The first issue was at the cost price of 16s. 6d. each certificate with a maturity value of 26s. after 10 years and interest at 1d. a month after the tenth year; the price of the other issues was 16s., excepting the sixth, which was 15s., and the period 10 years for the 2nd, 3rd, Conversion, and 6th issues, 11 years for the 4th, and 12 years for the 5th issue. The total number of certificates, other than those of the Conversion issue, sold from 1916 to 1937 was over 1,302,000,000, representing a cash investment of close on £1,023,000,000.

Savoie, dept. of S.E. France, mountainous and watered by the R. Isère, on the frontier of Italy; the capital is Chambéry. There are mineral springs at Aix-les-Bains and elsewhere. Area, 2,390 sq. m. Pop. 239,000.

Savona, seaport of Italy, on the Gulf of Genoa, on the Riviera, 26 m. S.W. of Genoa, in the midst of orange groves; has a 16th-Century cathedral; exports pottery and has important ironworks, glassworks, tanneries, and a silk industry. Pop. 64,000.

Savonarola, Girolamo, Italian reformer, born at Ferrara, became at 24 a Dominican monk, was fired with zeal for the purity of the Church, and issued forth to denounce the vices that everywhere prevailed under her sanction, with threats of divine judgment on her head. The impression his denunciations made was especially marked in Florence, where for three years the reformer's influence became supreme, till a combination of enemies headed by the Pope succeeded in subverting it, and securing his ejection from the Church, his imprisonment, and final execution. (1452-1498).

Savory, the common name of the genus *Saturcia* of the order Labiatae, especially the common savory, an annual with large white or purple flowers grown in kitchen-gardens the leaves and young shoots of which are used as flavouring. *S. hortensis* is the summer savory, *S. montana* the winter savory. They were introduced into English gardens from S. Europe about 1575.

SUMMER SAVORY

Savoy, a hardy variety of cabbage (q.v.). It has curled and crinkly leaves.

Savoy, a former duchy, in the S.E. of France, on the Italian frontier, comprising the two departments of Haute-Savoie and Savoie; was ceded by the kingdom of Sardinia to France in 1860; the Lake of Geneva bounds it on the N. and the lofty Graian Alps flank it on the E., forming part of the Alpine highlands; it is picturesque, with mountain, forest, and river (numerous tributaries of the Rhone); has excellent grazing lands; grows the vine abundantly, besides the usual cereals; Aix-les-Bains, Evian, and Challes are popular watering-places. Capitals (Haute-Savoie), Annéc; (Savoie) Chambéry. Area (Haute-Savoie), 1,775 sq. m.; (Savoie) 2,390 sq. m. Pop. (Haute-Savoie) 260,000; (Savoie) 239,000.

Savoy, House of, an ancient royal house of Europe (represented now by the king of Italy), whose territorial possessions were constituted a county of the Empire in the 12th Century under the name Savoy; was created a duchy in the 15th Century. By the treaty of Utrecht (1713) the island of Sicily was ceded to Savoy and the title of king bestowed upon the duke; in 1720 Victor Amadeus II. was forced to cede Sicily to Austria in exchange for Sardinia, which with Savoy and Piedmont, etc., constituted the kingdom of Sardinia till its dissolution in 1860, when Savoy was ceded to France and the remainder merged in the Italian kingdom under Victor Emmanuel.

Savoy, The, a district of the Strand, London, in which a palace was built in 1245 called the Savoy, in which John of France was confined after his capture at Poitiers. It was burnt at the time of the Wat Tyler insurrection, but rebuilt in 1506 as a hospital; it included a chapel, which was damaged by fire in 1864, but restored by Queen Victoria.

Saw, general name for various forms of cutting wood, stone, or metals. The handsaw used by carpenters consists of a toothed blade set in a wooden handle; for woodcutting a long saw with a handle at each end is often used. A mechanical circular saw is in the form of a circular blade revolved at a high speed by machinery. Other forms in use for special purposes include the keyhole saw and mortise- and-tenon saw.

Sawfish, a family (Pristidae) of tropical fish, sometimes attaining 15 or 20 ft. in length, whose snout is extended into a long flat toothed beak with which it attacks and burrows in mud for its prey. They are included in the Ray order of fishes.

SAWFISH

Saw Fly, name for various hymenoptera, terous insects which are familiar plant pests. The ovipositor of the female is composed of two broad plates, with serrated edges, by means of which they cut into the stems of plants and deposit their eggs in the slits thus formed. There is a large number of species, some of which are particularly destructive to rose trees, pine plantations, etc.

Saxe, Maurice de, marshal of France, natural son of Augustus II., king of Poland; distinguished himself under Marlborough and Prince Eugène, and eventually entered the service of France. Commanding in the War of the Austrian Succession, he took Prague and Eger, was made a marshal, and appointed to the command of the army of Flanders, in which he gained victories and captured fortresses, and was thereafter loaded with honours by Louis XV.; was one of the strongest and most dissolute men of his age; died of dropsy, the result of his debaucheries. (1696-1750).

Saxe-Coburg-Gotha, a small duchy of Germany, now included with Saxe-Meiningen and Saxe-Weimar, in the state of Thuringia (q.v.). Albert, Prince Consort of Queen Victoria, was a member of the ducal house of Saxe-Coburg-Gotha, whence the British kings Edward VII. and George V. used the name as their dynastic title until it was changed to Windsor in 1917.

Saxhorn, a conical-tubed brass wind instrument, invented by Adolph Sax in 1842; and used in Continental brass bands.

Saxifragaceae, a natural order of 90 genera and some 750 species of world-wide distribution, though chiefly found in temperate regions. They are mostly perennial herbs. The typical genus is *Saxifraga* (see Saxifrage). Other important genera are *Hydrangea* (25 species) and *Ribes* (60 species, including the black and red currants and the gooseberry).

Saxifrage, a popular name of various plants, of the genus *Saxifraga* and the order Saxifragaceae. They are mostly inhabitants of alpine and sub-alpine regions of the northern zone. Most of them are true rock plants, with tufted foliage and panicles of white, yellow or red flowers. Varieties include meadow saxifrage, mossy saxifrage or ladies' cushion, and thick-leaved saxifrage. They are extensively cultivated in rock-gardens.

Saxo Grammaticus, a Danish chronicler who flourished in the 12th Century; wrote *Gesta Danorum*, a history of Denmark down to the year 1168.

Saxons, a people of the Teutonic stock who settled early on the estuary

of the Elbe and the adjoining islands, who in their piratical excursions infested and finally settled in Britain and part of Gaul, joining with the Angles to invade and conquer England in the 5th to the 7th Centuries.

Saxony, a state of Germany, within on the E., between Bavaria (S.) and Prussia (N.), the mountainous frontier of Bohemia; spurs of the Erzgebirge, Fichtelgebirge, and Riesengebirge diversify the surface; is a flourishing mining and manufacturing country; Dresden is the capital, and other important towns are Leipzig, Chemnitz, Meissen, Plauen, and Wickau. By the time of the Thirty Years' War the electorate of Saxony, which in its heyday had stretched to the North Sea, and from the Rhine to the Elbe, had sadly dwindled away. It suffered much at the hands of Frederick the Great during the Seven Years' War, and in 1815, having sided with Napoleon, a portion of its territory was, by the Congress of Vienna, ceded to Prussia; was defeated with Austria in 1866, and joined the N. German Confederation, to be incorporated afterwards in the German Empire. Area, 5,785 sq. m. Pop. 5,200,000.

Saxony, Prussian, a province of that part of Saxony (q.v.) added to Prussia in 1815; situated in the centre of Prussia, N. of Saxony; is watered by the Elbe and its numerous affluents and diversified by the Harz Mts. and Thuringian Forest; contains some of the finest cereal-growing land in Prussia; salt and lignite are valuable products, and copper is also mined. The capital is Magdeburg, and other notable towns are Halle (with its university) and Erfurt. Area, 9,860 sq. m. Pop. c. 3,400,000.

Saxophone, a musical instrument its inventor, and having a reed and clarinet mouthpiece. It was introduced from abroad when jazz (q.v.) became popular at the end of the World War, and in 1927 was introduced among the instruments of the band of the Grenadier Guards.

Sayers, Tom, pugilist and champion of England, who only suffered one defeat in his career; famous for his fight with Heenan, the American, in 1860. (1826-1865).

Scabious (*Scabiosa*), an extensive genus of annual and perennial herbs of the order Dipsacaceae. They have entire or divided leaves and heads of blue, white or yellowish flowers. Devil's-bit (*S. succisa*) is a common British variety. Sheep's-bit scabious is *Jasione montana*, a wild English flowering plant of the order Campanulaceae.

Scad. See Horse Mackerel.

Sca Fell, the highest of English mountains, with 2 peaks, one 3,210 ft. and the other, Sca Fell Pike, 3,161 ft. high; situated on the Cumberland-Westmorland border, 16 m. E. of Egremont.

Scald, the name given to the wandering bards and minstrels of ancient Scandinavia.

Scale, in music, a succession of notes between a given note and its octave. The chromatic scale includes the 12 tones and semitones of a given octave; the diatonic scale, major or minor, neglects the semitones.

Scale, a bony or bony outgrowth from the skin of certain mammals such as the scaly anteater, reptiles such as snakes, and particularly fishes; they also occur on the legs of birds. The name is also used in

botany of the small rudimentary or vestigial leaf constituting the covering of buds, corms, etc.

Scaliger, Joseph Justus, French scholar, in Agen; accepted the chair of *belles lettres* in the University of Leyden on condition that he should not be called upon to lecture, and gave himself up to a life of study, especially on matters philological and literary; was a man of universal knowledge, and the creator of modern chronology. (1540-1609).

Scaliger, Julius Caesar, surnamed the Elder, Italian classical scholar, became page to the Emperor Maximilian, and served him in war and peace for 17 years; at 40 left the army, and took to studying the learned languages among other subjects; wrote a treatise on poetics and a commentary on the physics and metaphysics of Aristotle, and became an authority on the Aristotelian philosophy. (1484-1558).

Scallop, a bivalve mollusc (genus *Pecten*) of the order Filibranchia, with a fan-shaped shell, of which there are numerous species, many of them beautifully coloured. They move through the water by opening and closing their valves, and are remarkable for the prominent eyes borne on the mantle. A number of species are found in British waters, two of which, the Great Scallop (*Pecten maximus*, growing up to 5 in. across the shell) and the Queen or Quin (*P. opercularis*, a pink shelled variety) are fished for food. The scallop-shell in the Middle Ages was an emblem of the pilgrim to the shrine of St. James at Compostella.

Scalp, the outer covering of the cranium. It is formed of several layers, the outermost being the skin bearing the sweat and sebaceous glands and hair follicles, next the fibrous layer, and finally a layer of loose areolar tissue.

Scalping, the removal of the skin of the skull with hair attached, as proof of a warrior's prowess. The practice was in vogue in early times among the Scythians and Celts and Teutons, but is chiefly associated with the N. American Indians, among whom it was attended with elaborate ritual.

Scanderbeg (i.e., Iskander Beg, Albanian national hero, who, in the 15th Century renounced Islam for Christianity, and by his military prowess and skill freed Albania from the Turkish yoke; throughout his lifetime maintained its independence, crushing again and again the Turkish armies; was known among the Christians as George Castriot. (c. 1407-1467).

Scandinavia, general name for the great northern peninsula of Europe, which embraces Norway (q.v.) and Sweden (q.v.). It is often used to include Denmark, Iceland, and even Finland, countries (except the last) whose peoples and languages are closely allied.

Scandium, a metallic chemical element belonging to the group of the rare earths (q.v.). Symbol Sc.; atomic number 21; atomic weight 45.10. It was discovered by Sir William Crookes.

Scapa Flow, the basin of the Orkneys, surrounded by the islands of Pomona, Burray, South Ronaldshay, Walls, and Hoy. It is 8 m. wide and 15 m. long. In 1911 its pier was enlarged to accommodate destroyers; from 1914 to 1919 it was the headquarters of the Grand Fleet, and in June, 1919, Admiral Reuter here scuttled the interned German fleet.

Scapula, or Shoulder blade, the flat, triangular bone which in most mammals forms the chief part of the shoulder girdle, and is the main support of the upper limbs on the trunk.

Scarab, the Scarabeus, or sacred beetle of the Egyptians, of which steatite or stone representations, formerly worn as amulets, are often found in tombs.

Scarborough, sea-side town and watering-place in Yorkshire, England; built on rising ground on the shores of a fine bay; is a place of great antiquity, with interesting ruins; has churches, harbour, piers, and a fine promenade. Pop. 41,400.

SCARAB
(Top and side view)

Scarlatti, **Alessandro**, Italian composer, born at Trapani, Sicily. He produced an opera at Rome in 1679, and was patronised by Christina, Queen of Sweden. From 1684 he was Maestro di Capella to the viceroy of Naples, where most of his operas (numbering 135) were produced and where he died. His most noteworthy operas were *Laodicea e Berenice*, 1701; *Il Tigrane*, 1715. (1659-1725).

Scarlet Fever, an acute infectious disease, characterized by the appearance of a rash, and an inflammatory condition of the throat. It is found most frequently during the years from six to puberty. Greatest infectivity is during the eruption or rash, and the infection is carried by the discharges from the throat, nose and ears. "Peeling" is now regarded as innocuous unless contaminated by these discharges. The incubation period is usually two to three days. The onset is sudden, with vomiting, headache and sore throat. The temperature rises very quickly. The rash, usually of a diffuse, bright red colour with deeper spots, varies in intensity.

Scent, odour or perfume produced by plants, and by certain secretions in animals. In plants oil-glands may occur in leaves, glandular hairs, or the petals of flowers, the scent serving as a protection against insects, or in flowers for the attraction of insects in pollination. Scent glands occur in many animals, and serve as a defence against enemies, a means of recognition of their own species, or for sex attraction. Scent is perceived by the olfactory nerves of the nose through irritation set up by minute particles of the substance, and not through "waves," as in sound and light.

Scepticism, in philosophy, an attitude of doubt regarding the possibility of real or ultimate knowledge. In religion it is generally applied to a doubt of, strong enough to amount to a practical disbelief in, the existence of the supernatural or of a god concerned with the welfare of the universe.

Sceptre, a symbol of royal power in the shape of a rod, usually of precious metal heavily ornamented, and having a knobbed head. It is used by the Sovereign at his coronation and on similar solemn occasions.

Schafer, **Sir Edward Sharpey**, British physiologist at Edinburgh from 1899; inventor of the system of artificial respiration (q.v.) known by his name. (1850-1935).

Schaffhausen, canton in the extreme N. of Switzerland, surrounded N.E. and W. by Baden; the Rhine flanks it on the S.; is hilly, with fertile valleys sloping to the Rhine, and is chiefly given up to agriculture. Area, 115 sq. m. Pop. 31,200. The capital, Schaffhausen, occupies a picturesque site on the Rhine, 31 m. NW. of Constance; has a 12th-Century cathedral and an interesting old castle. The famous falls, the finest on the Rhine, are 3 m. below the town. Pop. 21,000

Scharnhorst, **Gerhard von**, a Prussian general, born at Bordenau; distinguished as the organiser of the Prussian army, or the establishment of a national force instead of a mercenary; died of a wound in battle. (1755-1813).

Scheele, **Karl Wilhelm**, Swedish chemist, born in Pomerania; was an apothecary at Upsala and Köping; during his residence at the latter made numerous important discoveries, and published many chemical papers, his chief work *Experiments on Air and Fire*. He discovered oxygen independently of Priestley, as well as chlorine, tungsten, glycerine, and many organic acids; the mineral Scheelite, from which tungsten is obtained, is named after him. (1742-1786).

Scheele's Green, a brilliant green prepared by adding copper sulphate solution to ammonium arsenite solution, and formerly popular as a colouring-matter for wall-paper; but since, when damp, paper so coloured is liable to evolve poisonous arsenical vapours, it is no longer used for this purpose.

Scheelite, a mineral from which tungsten is obtained; named after K. W. Scheele (q.v.).

Scheer, **Reinhold von**, German admiral; entered the navy in 1909; after a creditable naval career he was given command of the High Sea Fleet in 1915, and led the German forces at Jutland, becoming Chief of the Naval Staff in 1918. (1863-1928).

Scheldt, an important river of Belgium and Holland, rises in the French dept. of Aisne, and flows northwards past Cambrai (its highest navigable point) and Valenciennes, entering Belgium a little S. of Tournai and continuing northward, with Oudenarde, Ghent, and Antwerp on its banks; enters Holland, and splits into the Wester Scheldt and the Ooster Scheldt, which enter the North Sea, the former at Flushing, the latter at Bergen-op-Zoom; length 267 m., much the greater part being in Belgium.

Schelling, **Friedrich Wilhelm Joseph**, born in Würtemberg; studied at Tübingen, where he became acquainted with Hegel; wrote first on theological subjects and then on philosophical; went to Jena and became a disciple and follower of Fichte; gradually abandoned Fichte's position and began to develop ideas of his own, and in conjunction with Hegel edited the *Critical Journal of Philosophy*; held afterwards a professorship at Munich and a lectureship at Berlin. His philosophy is no finished or completed system, but is essentially a history of the progressive stages through which he himself passed. (1775-1854).

Schenectady, a city of New York State, on the Mohawk R., 16 m. NW. of Albany. The Union University, founded in 1795, is situated here. The city has engineering and electric works. It was burned by the French and Indians in 1690. Pop. 95,700.

Scherzo, a piece of music in a playful style, indulging in whimsical surprises and unexpected modulations. It is a development from the minuet of the early suites, and is sometimes used as a movement in symphonies, sonatas, etc.

Scheveningen, watering-place of the Netherlands, 1 m. NW. from the Hague. It has important fishing industries. The English and French fleets defeated the Dutch here in 1653. Pop. 26,500.

Schiedam, a port of S. Holland, Netherlands, on the R. Schie. It is the centre of gin manufacture in Holland; other liquors are also made. Pop. 59,200.

Schiehallion, a mountain in Perthshire, Scotland, near Loch Rannoch, and 10 m. WNW. of Aberfeldy. Elevation, 3,547 ft.

Schiller, **Johann Christoph Friedrich** von, German poet and dramatist, born at Marbach; trained for law and then for medicine, but took chief interest in philosophy and literature, to the cultivation of which he devoted his life; his first work, a play, *The Robbers*, which on its publication in 1782 produced quite a ferment, was followed in 1783 by two tragedies, *Fiesco* and *Kabale und Liebe*; but it was with *Don Carlos* in 1787 his mature authorship began, and this was followed by the *History of the Netherlands* and *History of the Thirty Years' War*, to be succeeded by *Wallenstein* (1799), *Maria Stuart* (1800), *The Maid of Orleans* (1801), *The Bride of Messina* (1803), and *Wilhelm Tell* (1804). He wrote, in addition, a number of ballads and lyrics. In 1794 his friendship with Goethe began. (1759-1805.)

Schipperke, the name of a breed of a foxy head, small brown eyes, short hair and a bristling ruff on the neck and only a rudimentary tail. It weighs about 12 lb., was bred in Belgium, and is common on Dutch and Belgian canal boats as a watch-dog and rat-catcher.

Schism, term applied to a rift in a religious body, resulting in the breaking off of a section to form a new body, such as the schism of 1054 which resulted in the breach between the eastern and western Churches. The Great Schism is the name given to the period between 1378 and 1409, when the allegiance of Catholic Christianity was divided between two rival claimants to the Papacy.

Schist, a geological term applied to which have a polished structure and split in thin irregular plates, as opposed to the regular cleavage of clay-slate, etc., and the laminae due to simple stratification, as in flagstones.

Schleiermacher, **Friedrich Ernst Daniel**, German theologian, born at Breslau; brought up among the Moravians. His philosophical studies turned him from their creed, and he addressed himself to the task of elaborating a theology in which justice should be done to the claims of the intellect and the emotions of the heart, and began by translating Plato. Soon he formed a school, which included men such as Neander, to which all the schools of theology in Germany since have been more or less affiliated. (1768-1834).

Schleswig-Holstein, **Prussia**, province of, forming the connecting link between Germany and the peninsula of Jutland; Danish from 1773, it was annexed by Prussia after the Austro-Prussian War of 1866, but after the World War the northern portion of Schleswig was restored to Denmark, as a result of a plebiscite in 1920, and is officially known as "Sønderjydske Landsdele" or South Jutland Provinces, popularly by the spelling Sleevig. The chief towns are Kiel, Schleswig and Flensburg. Area, 5,820 sq. m. Pop. 1,580,000.

Schliemann, **Heinrich**, German archaeologist, born in Mecklenburg-Schwerin; from 1870 excavated at his own cost the ruins, among others in Greece, of Hissarlik, in the Troad, believing them to be those of Troy; he later carried on excavations at Mycenae, Ithaca, Tiryns and elsewhere; died at Naples after publishing various treatises. (1822-1890).

Schmalkaldic League, a league of the Protestant states of Germany, concluded in 1530 at Schmalkalden, Prussia, in

defence of their religious and civil liberties against the Emperor Charles V. and the Catholic states. Its formation was followed by a war in 1546-1547 in which the League was defeated, but in 1552 the Treaty of Passau secured freedom for the German Protestants.

Schneekoppe, a mountain of the highest point of the Riesengebirge. It is 10 m. from Hirschberg.

Schneider Trophy, an international aviation trophy for seaplanes, valued at £1,000, and presented in 1913 by Jacques Schneider, a French patron of aviation. France won the first contest at Monaco in 1913 at a speed of 45½ m.p.h. The following year Britain won at 88½ m.p.h.; there were no contests during the World War, but they were resumed in 1919, America and Italy both winning races, as well as Britain. After 1927 the race was held every two years, and Britain won the Trophy outright in 1931 by a third successive victory, a speed of 379 m.p.h. being attained.

Schnitzer, **Eduard**, physician, born at Breslau; went to Turkey, entered the Turkish medical service, adopted the name Emin Pasha, and was appointed by Gordon medical officer of the Equatorial Province of Egypt, and raised to the rank of Pasha; soon after the outbreak of the Mahdist insurrection he was cut off from civilization, but was discovered by Stanley in 1889 and brought to Zanzibar, after which he was murdered by Arabs. (1840-1893).

Scholasticism, the name given to the philosophy that prevailed in Europe during the Middle Ages, particularly in the 12th and following centuries. It has been generally characterised as an attempt at conciliation between dogma and thought, faith and reason, and an attempt to form a scientific system on that basis, founded on the pre-supposition that the creed of the Church was absolutely true and capable of rationalisation. Its greatest exponents were St. Thomas Aquinas (d. 1274) and Duns Scotus (d. 1308).

Schönberg, **Arnold**, Austrian musical composer, born in Vienna; where after self-teaching, he was taught by Zemlinsky. His symphonic poem, *Pelleas and Melisande*, appeared in 1903; *Gurrelieder* in 1911. He conducted in London in 1914. Some of his music is written to accompany spoken poetry, as *Pierrot Lunaire*, 1914. An extreme musical theorist, he has devised new scales and other ultra-modern peculiarities. (1874-).

Schönbrunn, imperial palace near Vienna, built by Maria Theresa in 1744, until the World War the summer residence of the Austro-Hungarian rulers.

School Boards, local bodies set up in England by the Education Act of 1870 to administer compulsory elementary education. They were elected by ratepayers by a form of proportional representation, but in 1902 they were abolished, and their duties transferred to Education Committees of County and Borough Councils under the supervision of the Board of Education.

Schooner, a small vessel with two masts, and the principal sails on both of the fore-and-aft type. They are of two chief types: the top-sail schooner and the fore-and-aft schooner, the former carrying a square top-sail and top gallant sail on the foremast, and the latter having fore-and-aft sails alone.

SCHOONER

Schopenhauer, Arthur, German philosopher, born at Danzig, of Dutch descent; developed his pessimistic system in his great work, *Die Welt als Wille und Vorstellung* ("The World as Will and Idea"), which he published in 1818; was deeply influenced by Indian philosophy, to which his own system is definitely akin in the main lines of its thought. (1788-1860).

Schottische, a dance resembling the polka, with two figures; the name sometimes also refers to the Scottish dance also known as the "Highland Fling."

Schreckhorn, one of the loftiest of the Swiss Alps, having an elevation of 13,386 ft. It is in the Bernese Oberland, between the Finsteraarhorn and the Wetterhorn. It was first ascended by Leslie Stephen in 1861.

Schreiner, Olive, South African Lutheran clergyman at Cape Town; achieved a great success by *The Story of an African Farm* in 1883, which was followed in 1890 by *Dreams*, also later *Dream Life and Real Life*, and *Trooper Peter Halket*; wrote also on feminism. (1859-1920.)

Schreiner, William Philip, Premier of the Cape Parliament from 1898 to 1900, brother of preceding; favoured arbitration in the South African difficulty, and threatened to keep the Cape neutral in the war between Great Britain and the Transvaal; in 1914 became High Commissioner of the Union of South Africa in London. (1857-1919).

Schubert, Franz Peter, Austrian musical composer, born at Vienna; at 11 was one of the leading choristers in the court-chapel, later on became leading violinist in the school band; his talent for composition in all modes soon revealed itself, and by the time he became an assistant in his father's school (1813) his supreme gift of lyric melody showed itself in the song *Erl King*, the *Mass in F*, etc.; his too brief life, spent chiefly in teaching, was harassed by pecuniary embarrassment, embittered by the slow recognition his work won, though he was cheered by the friendly encouragement of Beethoven; his output of work was remarkable for its variety and quantity, embracing some 500 songs, 9 symphonies, 6 masses, operas, sonatas, etc.; his abiding fame rests on his songs, which are infused, as none other are, by an intensity of poetic feeling. (1797-1828).

Schumann, Robert, German composer, poet and musical critic, born at Zwickau, Saxony. Law, philosophy and travel occupied his early youth, but in 1831 he was allowed to follow his bent for music and settled to study at Leipzig; two years later started a musical paper which, for more than 10 years, was the vehicle of essays in musical criticism. During these years also appeared his greatest pianoforte works, songs, symphonies and varied chamber music. In 1841-1842, appeared his piano Quartet and Quintet for piano and strings. *Paradies and the Peri* and *Scenes from Faust* appeared in 1843. He withdrew to a quieter life at Dresden, where much of his operatic and other music was written. During 1850-1854 he acted as musical director at Düsseldorf, but insanity at last supervened, and he died in an asylum two years later. (1810-1856).

Schuykill, a river of Pennsylvania, U.S.A., rises on the N. side of the Blue Mts. and flows SE. 130 m. to its junction with the Delaware R. at Philadelphia; is an important waterway for the coal-mining industry of Pennsylvania.

Schwarzenburg, Karl Philip, Prince, born at Vienna; distinguished himself in the wars against the Turks, the French and Napoleon; fought at Auster-

litz and Wagram; negotiated the marriage of Napoleon with Marie Louise; commanded the Austrian contingent sent to aid France in 1812, but joined the allies against Napoleon at Dresden and Leipzig, and captured Paris in 1814, at the head of the army of the Rhine. (1771-1820).

Schwarzwald, the Black Forest (q.v.) in Germany.

Schweinfurth, Georg, German explorer, botanist and archaeologist, born at Riga. In 1863 and again in 1868 he went to Egypt, studying the flora of the Nile, and on the second expedition discovering the Uele R. and the pigmies of the Akka. He accompanied Rohlfs, in 1873-1874, through the Libyan desert; he lived at Cairo making further journeys at intervals, 1875-1888. His books include: *Heart of Africa*, 1873, and *Af Sketchbook*, 1925. (1836-1925).

Schwerin, former capital of Mecklenburg-Schwerin, Germany; has a pretty site on the Lake of Schwerin (14 m. by 3), 47 m. SE. of Lübeck, a 14th Century cathedral and Renaissance castle, and manufactures of lacquered ware and machinery. Pop. 53,700.

Schwyz, one of the three original cantons of Switzerland, German-speaking and Catholic; Lake Zürich forms part of the N. border, and Lake Lucerne part of the S.; Zug with its lake is on the W.; is mountainous, but good pasture favours cattle-breeding, sheep and goat rearing; important industries in cotton and silk are carried on; Einsiedeln, with its famous monastery, attracts thousands of pilgrims, and the Rigi is a favourite resort of summer visitors. Area, 350 sq. m. Pop. 62,300. The capital Schwyz, is prettily situated 26 m. E. of Lucerne. Pop. c. 8,000.

Scialoja, Vittorio, Italian jurist, born at Turin; as minister of Foreign Affairs assisted in framing the Covenant of the League of Nations. (1856-1933).

Sciatica, neuralgia of the sciatic nerve, running down the back of the leg; it is not uncommonly associated with lumbago. It is manifested in pains which occur in the region of the hip, varied sometimes by acute paroxysms of extreme stabbing pain along the back of the thigh.

Science, originally meaning "knowledge," in its broadest sense, is nowadays generally restricted to what were previously called the "physical sciences"—the study of the various departments of man's environment. Science in this sense is concerned with description, not with explanation; it attempts to say *how* things happen, not *why* they happen. It is based in the final event on measurement and classification; and, therefore, does not claim to deal with those things which are not susceptible to treatment by these means. The most remarkable and far-reaching development of science in the 20th Century has been the realization that no single science can be pursued purely independently of the others, and in consequence considerable effort has been spent on schemes for a philosophical correlation of the scientific results attained by experimentation and observation in various fields.

Scilly Islands, a rugged group of islands belonging to Cornwall, England, 37 m. SW. of Lands End; consists of 6 larger islands—St. Mary's (1,526 acres) the largest, Treco, St. Martin's, St. Agnes and Bryher also being inhabited—and some 30 smaller, besides numerous rock clusters; climate is damp and mild, the cultivation and export of flowers, and fishing, are the principal industries. The only town is Hugh Town, on St. Mary's. There are some interesting ecclesiastical ruins, etc., Area, 4,040 acres. Pop. 1,700.

Scimitar, a short, curved-bladed sword much used by cavalry and apparently introduced into Europe from the East about the time of the Crusades. The blade broadens from the handle, being curved at the back and with a cusp at the point.

SCIMITAR

Scintillation, the twinkling effect of light radiated from a star as seen by the naked eye through the earth's atmosphere, which produces an irregular refraction of the light. The phenomenon is mainly confined to the so-called "fixed" stars.

Scipio, Publius Cornelius, The Elder, surnamed Africanus Major, Roman general, was present at the engagement near the Ticinus and at Cannæ; was appointed proconsul of Spain at the age of 24, and made himself master of nearly the whole of it against the Carthaginians; on his return to Rome was made consul; transferred the seat of war against Carthage to Africa, and landed at Utica; met Hannibal on the field of Zama, totally defeated him, and ended the Second Punic War in 202 B.C. In 190 B.C. he overthrew Antiochus at Magnesia. He was accused two years before his death of malpractices in connection with the war against Antiochus, but, by a powerful speech induced the people to drop the prosecution. (237-183 B.C.).

Scipio, Publius Cornelius, The Younger, surnamed Africanus Minor, adopted by the Scipio family, his proper name being Lucius Æmilius Paulus; after distinguishing himself in Spain proceeded to Africa to take part in the Third Punic War; laid siege to Carthage, took it by storm, and levelled it with the ground in 146 B.C.; he was afterwards sent to Spain, where he captured Numantia after a stubborn resistance; an upright and magnanimous man, he died by the hand of an assassin. (c. 185-129 B.C.).

Sclerosis, a term in medicine applied to the hardening of an organ as a result of an excessive growth of connective tissue, with special reference to "disseminated sclerosis," in which hard patches appear on the brain and spinal column, resulting in paralysis, and to arteriosclerosis, or the hardening of the middle coat of the arteries. Cirrhosis of the liver is a form of sclerosis.

Scone, a village in Perthshire, Scotland, 2 m. N. of Perth; once the capital of the Pictish kingdom, and the place of the coronation of the Scottish kings. The British "Coronation Stone," now placed in the Coronation Chair at Westminster Abbey, was at Scone until removed by Edward I.

Scopolamine, also called *Hyoscyne*, a white crystalline alkaloid obtained from various plants of the natural order Solanaceae, e.g., deadly nightshade and henbane. It is excessively poisonous, but, in extremely small doses, is used in medicine as a hypnotic.

Score, an arrangement of the different parts of a musical composition on the page so that each bar may be read in all parts simultaneously. The arrangement generally followed is that established by Beethoven, in which the order from above to below is woodwind, brass, percussion, strings.

Scoresby, William, British explorer and physicist, born at Whitby; in 1822 undertook surveying work in Greenland; later entered the Church, but continued his scientific researches in terrestrial magnetism, oceanography and other subjects. The Royal Research Ship "William Scoresby," which is used by the "Discovery

Committee" of the British Government for whaling research, is named after him. (1789-1857).

Scorpio, the eighth sign of the zodiac, which the sun enters on Oct. 20.

Scorpion, an order (Scorpiones) of the Arachnida (q.v.), consisting of small animals varying considerably in size and shape of tail, claws, etc., and black or yellow in colour. The head and thorax are fused together into one single mass called the Cephalothorax.

SCORPION

The jointed tail usually bent back over the body bears a venomous sting, and there are four pairs of legs. They are found in most countries of the world except New Zealand, live mostly in forest and deserts, are nocturnal and prey upon spiders and other insects which they catch with their claws and sting to death with the poison injected from the needle-sharp sting in the tail.

Scorpion Fly (Panorpidae), a family of neuropterous (nerve-winged) insects, about 1-in. long, with a beak-like head and in the male a slender black body turning up at the extremity like a scorpion's tail.

Scot, Reginald, author of a famous work, *The Discoverie of Witchcraft* (1581), one of the earliest exposures of the absurdities of witchcraft and kindred superstitions, which provoked King James's defence *Demonology*; educated at Oxford, and spent a peaceful life gardening and studying; wrote also *The Hoppe Garden*. (c. 1538-1595).

Scot and Lot, contributions to parish funds by householders formerly assessed in certain boroughs, and based upon their ability to pay. The payment entitled the payer to vote, a right which continued after the Reform Act of 1832.

Scoter Duck (*Eidemia*), genus of wild ducks, marine in habit, some species of which are found round the British coasts. The male of the Common Scoter (*Eidemia nigra*) has glossy black, and the female dark brown plumage.

Scotland, the northern portion of the island of Great Britain, separated from England by the Solway, Cheviots, and Tweed, and bounded N. and W. by the Atlantic and E. by the North Sea; inclusive of 788 islands (600 uninhabited), it is divided into 33 counties, and has a coastline longer than England's by 700 m.; greatest length from Dunnet Head (most northerly point) to Mull of Galloway (most southerly) is 288 m., while the breadth varies from 32 to 175 m., Buchan Ness being the most easterly point and Ardnamurchan Point the most westerly.

From rich pastoral uplands in the S.—Cheviots, Moffat Hills, Lowthers, Moorfoots, and Lammermoors—the country slopes down to the wide, fertile Lowland plain—growing fine crops of oats, barley, wheat, etc.—which stretches, with a varying breadth of from 30 to 60 m., up to the Grampians (highest peak, Ben Nevis, 4,406 ft.), whence the country sweeps northwards, a wild and beautiful tract of mountain, valley, and moorland, diversified by some of the finest loch and river scenery in the world. The east and west coasts present remarkable contrasts, the latter rugged, irregular, and often precipitous, penetrated by long sea-lochs and fringed with numerous islands, and mild and humid in climate; the former low and regular, with few islands or inlets, and cold, dry and

braeing; of rivers the Tweed, Forth, Tay, Dee and Clyde are the principal, and the Orkneys, Shetlands and Hebrides the chief island groups.

Coal and iron abound in the Lowlands, more especially in the plain of the Forth and Clyde, and granite in the Grampians; staple industries are the manufacture of cottons, woollens, linen, jute, machinery, hardware, paper, and shipbuilding. Glasgow is the largest city and chief industrial centre, while Edinburgh (capital) is the chief seat of law, education, etc. The established church (the Church of Scotland) is Presbyterian in organisation; there are four Universities (Edinburgh, St. Andrews, Glasgow and Aberdeen). The Lowlanders and Highlanders still retain distinctive characteristics of their Teutonic and Celtic progenitors, the latter speaking in many parts of the Highlands their native Gaelic.

Originally the home of the Picts (q.v.), and by them called Alban or Albyn, the country, already occupied as far as the Forth and Clyde by the Romans was in the 5th Century successfully invaded by the Scots, a Celtic tribe from Ireland. In 843 their king Kenneth was crowned king of Picts and Scots, and by the 10th Century the country (known to the Romans as Caledonia) began to be called Scotia or Scotland. Government and power gradually centred in the richer Lowlands, which, through contact with England, and from the number of English immigrants, became distinctively Anglo-Saxon. Since the Union with England in 1704, the country has been governed as an integral part of Great Britain, but in the 20th Century there has been a gradual revival of national Scottish institutions, and there is a flourishing Nationalist Movement which aims at "Home Rule." Area, 30,400 sq. m. Pop. 4,843,000.

Scotland, Church of. The established church of Scotland is a Presbyterian body, governed by a General Assembly which meets annually under the presidency of a Moderator in the presence of a Lord High Commissioner representing the King. Its doctrinal basis is the Westminster Confession of 1646. From time to time various secessions from it have occurred, but in 1929 the largest seceding body, the United Free Church of Scotland, reunited with it, save for a small number of dissenting ministers and congregations. Its present membership is about 1,250,000.

Scotland Yard. New, the headquarters of the London Metropolitan police, including the Criminal Investigation Department; popularly thought of as the central national institution for crime investigation, though in fact it has no concern with crimes committed outside the Metropolitan area unless its services are specially requested by the local police of the district concerned.

Scots, a tribe of Celts from Ireland who settled in Argyllshire and the neighbouring parts of North Britain, and who, having gained ascendancy over the Picts in the E., gave to the whole country the name of Scotland.

Scots Pine, or Scots Fir (*Pinus sylvestris*), a fine North Scottish coniferous tree which attains a height of 150 ft. The bark is brown and fissured; the needles are twisted and borne in pairs on dwarf shoots, which fall after three years; the winged seeds are liberated after 18 months. The wood (yellow deal) is used for packing-cases and mine-props.

Scott, Charles Prestwich, British journalist, for 57 years editor of the *Manchester Guardian*; born at Beth. He entered the office of the *Manchester Guardian*, 1871, becoming editor in the following year, and made it the second paper in the kingdom. From 1895 to 1906 he was in Parliament as a

Liberal. His paper opposed the British war policy in 1899 and 1914. (1846-1932).

Scott, Charles W. A., British airman, born in London; in 1931 flew 10,450 m. in 109 hours 50 min. from England to Port Darwin, Australia; in 1932 he reached Australia in 8 days, 20 hrs. 44 min., a new record which was beaten by Kingsford-Smith in 1933. With C. Black he won the MacRobertson trophy, a prize in the race to Melbourne, Oct. 1934, his time being just under 3 days. In 1936 he won the London-Johannesburg air race in connection with the Johannesburg Exhibition. (1903-).

Scott, Sir George Gilbert, English architect, born in Buckinghamshire; was the builder or restorer of buildings both in England and on the Continent after Gothic, and wrote several works on tecture. Among his works are the Memorial, London, and several of the London Government offices. (1811-1878)

Scott, Sir Giles Gilbert, British architect, born in Buckinghamshire; was the builder or restorer of buildings both in England and on the Continent after Gothic, and wrote several works on tecture. Among his works are the Memorial, London, and several of the London Government offices. (1811-1878)

Scott, Robert Falcon, British naval officer and explorer. Born at Devonport, he early joined the navy, and in 1900 took the ship *Discovery* to the Antarctic, returning in 1904 after making important discoveries. Promoted to captain, he left England again in 1910 in the *Terra Nova*, and with Wilson, Oates, Evans, and Bowers succeeded in reaching the Pole on January 18, 1912, to find Amundsen (q.v.) had preceded him by three weeks. On the return journey he and his colleagues perished. (1868-1912).

Scott, Sir Walter, Scottish novelist, born at Edinburgh, of Scottish Border blood; lost the use of his right leg when 18 months old, which determined, to a marked extent, the course of his life; spent much of his childhood in the country, where he acquired that affection for all natural objects which never left him. Professionally he was a lawyer, but though he received at length a sheriffship worth £300 a year, and a clerkship to the court worth £1,500, he early chose a literary career. His first success was the publication in 1802, of *The Minstrelsy of the Scottish Border*, followed the same year by *Caithness Castle*, and by *The Lay of the Last Minstrel* in 1805, the first poem which gained him popular favour, by *Marmion* in 1808, and by *The Lord of the Isles* in 1814. On the rise of Byron to poetic fame Scott turned to novel-writing. The period of his productivity in this line extended over 15 years, commencing with the year 1814, by which time he had built his home at Abbotsford on the Tweed, near Galashiels. This was the year of the publication of *Waverley*, which was followed by that of *Guy Rannering*, *The Antiquary*, *Rob Roy*, *Old Mortality*, and *The Heart of Midlothian* in the year 1819, when he was struck down by an illness, the effects of which were seen in his after-work. *The Bride of Lammermoor*, *Ivanhoe*, *The Monastery*, *The Abbot*, *Kenilworth*, and *The Pirate* belong to the years that succeeded that illness, to which may be added *Redgauntlet* and *The Fortunes of Nigel*, together with *Quentin Durward* and *Woodstock*. His later years were clouded by a burden of debt, but he continued to write to the end. He was buried at Dryburgh Abbey. (1771-1832).

Scott, William Bell, Scottish painter, poet, born at Edinburgh; his paintings include series illustrating Northumbrian history and the battle of Chevy Chase at Wallington Hall; he published, besides verses, lectures on art and an autobiography. (1811-1890).

Scott, Winfield, American General, born at Laurel Branch, near Petersburg, Va. He left law for the army in 1808, and fought in the war with Britain in 1812, winning the battle of Chippewa in 1814. He prepared the first tactical manual for the U.S. Army, and in 1847 took command of the army in the Mexican War, occupying Mexico City. He was defeated as Whig candidate for the Presidency in 1852. (1788-1866).

Scottish Terrier, or Aberdeen Terrier, a rough

wire-haired dog, originally native to the Isle of Skye, used for fox-bolting. The size, shape and colour (black, white or brindled), vary; some breeds are prick-eared, some drop-eared. The West White Highlander, the Cairn, and the Skye are variations of the Scottish terrier.

SCOTTISH TERRIER

Scouting (military), a term originally applied to the practice of North American Indians in tracking their foes. In the army scouting, or reconnaissance, as it is called, forms part of normal military training. In manoeuvres, scouts are sent out, in parties, in pairs, or singly, ahead of the main body of troops, to gain information on the topographical features of the country, or to ascertain the movements and disposition of the enemy.

Scranton, town in Pennsylvania, U.S.A., on the Lackawanna R., 144 m. N.W. of New York; does a large trade in coal, and is the centre of a busy steel, iron, and machinery industry. Pop. 143,000.

Scrap of Paper, a famous phrase mann Hollweg, Chancellor of Germany, in reference to the treaty (1839) guaranteeing the neutrality of Belgium when the British Ambassador presented his country's ultimatum on August 4, 1914, after Germany had violated Belgian neutrality.

Screen, in photo-engraving, the two sealed glass plates used in half-tone process work. Each plate is etched with diagonal lines, and the two plates are put together so that the diagonal lines form a crosswork pattern. For very fine work there may be as many as 200 lines to the inch, whereas coarser screens may have as few as 60. Placed in the camera between the lens and the sensitive plate, the screen by the action of light has the effect of breaking up the tones of the picture into fine dots.

Screen, a partition of stone, metal, or wood, serving to cut off one part of an ecclesiastical building from the rest. The sanctuary screen separates the sanctuary proper from the choir, and the chancel or choir screen the chancel or choir from the nave. The name "choir screen" is sometimes applied to the partitions separating the choir from aisles running on each side of it. See also Rood.

Screw Propeller, in a ship, a carrying two or more symmetrically arranged blades or flanges. While its general effect is to create a forward thrust of the ship by forcing a column of water in the opposite direction, the exact mechanics of the process is even yet not fully understood. It is, however, necessary to shape and adjust the flanges so that the thrust is equal over their whole surface, and not to run the propeller so fast that the required flow of water over the flanges is no longer attained.

Scriabin, Alexander Nicolas, Russian composer, born at Moscow, where from 1898 he was a professor at the

Conservatoire; for many years he toured Europe composing. *Prometheus* is probably his best-known composition; others include *The Divine Poem*, and *The Poem of Ecstasy*. (1871-1915).

Scribes (i.e., writers), a non-priestly class among the Jews devoted to the study and exposition of the Law, who rose to a position of importance and influence in the Jewish community, and were known in the days of Christ also by the name of Lawyers, and were addressed as Rabbi.

Scriptorium, the name given to a cloister in monasteries set apart for the use of scribes copying manuscripts.

Scrofula, a constitutional weakness produced in early life by lack of nourishment, often predisposing to tuberculosis; it is sometimes revealed by a disease of the neck glands, formerly known as "King's evil" (q.v.).

Scrophulariaceae, a family of dicotyledonous plants, mainly found in the temperate regions, of which various species are found or grown in Britain, including the toadflax, foxglove, antirrhinum, veronica and pentstemon. Some 200 genera and 2,600 species are recognized in the order.

Scrub, name given to a stunted growth of non-succulent plants with strong transpiration (i.e., exhalation of watery vapour from the stomata of the plants), covering large areas in certain semi-desert parts of the world, as in much of central Australia.

Scullin, James Henry, Australian politician, born in Victoria, he earned his living as a journalist, and in 1910 he became a Labour member in the House of Representatives. In 1928 he was elected Leader of the Labour party, then in opposition, and in 1929 succeeded to the Premiership until his defeat by Joseph Lyons' United Australia Party in 1932. (1876-).

Sculling, the art of propelling a boat through the water with the aid of 2 sculls or oars, both wielded by one person. Single-sculling or double-sculling skiffs are heavy boats with fixed seats and fixed rowlocks. Racing sculling-boats proper, known as "funnies" and "whiffs," are narrow clinker-built boats, coxswainless, single- or double-sculling, with sliding seats and outrigger rowlocks. The chief sculling events are the World's Championship, the Wingfield Sculls, and the Diamond Sculls (rowed at the Henley Regatta).

Sculpture, the art of three-dimensional representation whether in hard or plastic media, by means of carving or modelling; the name is often applied to bas-relief, where the forms and figures project from a flat background instead of being free. The method of working varies with the material used. Stone, ranging from Parian marble, Purbeck marble and granite to alabaster, may be carved direct from the block, or by the mechanical process of "pointing." Modellings in soft substances such as clay may be perpetuated by means of bronze castings, the best hollow casts being obtained by the cire-perdue method.

Many fine examples of sculpture exist from antiquity, notably the Egyptian granite and basalt statues of Pharaohs dating from 3000 B.C., Assyrian sculpture from Nineveh and other sites, and from the 7th Century B.C., a magnificent range of Greek sculpture, both religious and secular, culminating in the work of Phidias, the decorator of the Parthenon in the 5th Century B.C., and Praxiteles, the sculptor of the Olympian Hermes in the 4th. The "Winged Victory of Samothrace" and the Aphrodite from Melos are well-known examples of later work.

In ancient India and Central America also there were flourishing schools of sculpture in the last five centuries before Christ, marked by strong conventions of style and method. It was the Greek ideal of sculpture, however, that persisted in Europe and dominated the Renaissance schools in Italy, in particular the 14th Century Florentine school which produced Donatello, Luca della Robbia, Michelangelo and Cellini. The same tradition made its way with various modifications to France, Spain and later England, but at the close of the 19th Century, the powerful romanticism of Rodin in France heralded its abandonment.

In the 20th Century, fresh impetus was given to sculpture by the growth of interest in African sculpture and the rise of the abstract ideal in art, the creation of form for its own sake divorced from obvious connection with external nature. Epstein and Henry Moore are two sculptors of this century whose work exemplifies these tendencies.

Sculptured Stones, *n a m e* applied to certain commemorative monuments (usually rough-hewn slabs or boulders, and in a few cases well-shaped crosses) of early Christian date found in various parts of the British Isles, bearing rude lettered and symbolic inscriptions and ornamental designs resembling those found in Celtic MSS. Lettered inscriptions are in Latin, Ogham (*q.v.*), and Scandinavian runes, while some are uninscribed; usually found near ancient ecclesiastical sites, and their date is approximately fixed according to the character of the ornamentation. Some of these stones date as late as the 11th Century.

Scunthorpe, town and borough of Lincolnshire, England, 12 m. SE. of Goole; a rapidly growing centre of the iron and steel industry. Pop. 38,700.

Scurvy, a disease resulting from a diet deficient in fresh fruit and vegetables; caused by the lack of certain vitamins (*q.v.*) contained in these foods. The disease was at one time common among sailors who existed for long periods on salt meat.

Scutage, in feudal law, a tax on a knight's fee or holding paid in commutation of personal service to the overlord. It was frequently levied in England from the time of Henry II., and its gradual substitution for feudal military obligations was one of the chief causes contributory to the decay of feudalism.

Scutari (*Shkoder* or *Skodra*), Albania, at the S. end of the lake of the same name; manufactures arms and textiles; Pop. 29,000. Also name of a suburb of Istanbul, Turkey, on the Asiatic side of the Bosphorus; manufactures silk and muslin. Pop. c. 125,000.

Scylla and Charybdis, in Greek legend, two rocks opposite each other at a narrow pass of the strait between Italy and Sicily, in the cave of one of which dwelt Scylla, a fierce monster that barked like a dog, and under the cliff of the other of which dwelt Charybdis, a monster that sucked up everything that came near it, so that any ship passing between in avoiding the one became a prey to the other.

Scyros, *Skoros*, or *Skyro*, an island of the Aegean Sea, 24 m. NE. of Euboea. It is mountainous and has an area of about 80 sq. m. Sheep and goats are raised and fruit cultivated.

Scythians, a people whose various tribes, in classical times, occupied the steppes of SE. Europe, and the adjoining regions of Asia, and were of nomadic habit; herd herds of cattle and horses, and were mostly in a semi-savage state. The region they occupied is called Scythia.

Sea Anemone, a radiate animal of the order Anthozoa. Gelatinous and fleshy in substance, it consists of a short thick tube which attaches itself firmly to a rock by a cup-like disc at the base. Tentacles conceal the mouth and are used for catching prey. It is beautifully coloured, and reminiscent of a large flower.

Sea Bass (*Morone labrax*), a sea-fish of the family Percidae, the commonest of British sea-perches; it is found in the Mediterranean and round the British Isles; bluish grey in colour, edible but rather coarse.

Sea Cow (*Sirenia*), the order of sea mammals which includes the Manatees and Dugongs (*q.v.*).

Sea Elephant (*Morunga leonina*), a gigantic seal with a

trunk-like nasal projection. There are two species, a northern and an Antarctic, the latter sometimes reaching a length of 21 ft.

Seaford, *SEA ELEPHANT*.

a town and watering-place of East Sussex, England, 60 m. from London. The Onse ran into the sea here until the storm of 1570 diverted it to Newhaven. There are remains of British and Roman camps at Seaford Height. Pop. 6,900.

Seagull. See *Gull*.

Seaham, town in Durham, on the coast. 5 m. from Sunderland. It has an important harbour, blast furnaces, factories and collieries. Pop. 27,000.

Sea Heath (*Frankenia laevis*), a perennial herb found in the Channel Islands and on salt-marshes of Southern England, with procumbent, wiry branches, and small rose-coloured flowers blooming from July to August.

Sea Holly (*Eryngium maritimum*), a thistle-like blue flower and a large root formerly used for the manufacture of a sweetmeat. It belongs to the natural order Umbelliferae and is not uncommon on British shores.

Sea Horse (*Hippocampus*), a genus of small fishes of the family Syngnathidae, allied to the needle-fish and the pipe-fish. One species, the *Hippocampus brevisrostris*, is found in British waters. It has a horse-like head, and swims with the body in a vertical position, motive power being supplied by the dorsal fin. The prehensile tail serves as an anchor.

Sea Kale or **Sea Cabbage** (*Crambe maritima*), a perennial plant of the family Cruciferae, with stout branching stems; grows on sandy shores. It is cultivated as a table vegetable, the young shoots and "blanched" stems being edible.

Seal, a family of marine carnivora of the order Carnivora, almost universal distribution. There are two main groups: the earless or true seals (Phocidae), and the eared seals (Otariidae). The true seals include those perfectly adapted for an aquatic existence, but their skin being covered with only coarse hairs and there being no soft underfur, they are for the most part of little commercial value. The common seal (*Phoca vitulina*) breeds in certain parts of the British shores. The grey seal also is found. They are destructive to fishing though they receive a certain measure of protection. The eared seals include several species yielding valuable fur, especially the fur seal (*Otaria ursina*) of the N. Pacific. The other species include the sea-lions. Unlike the earless true seals, they can use their hind feet for walking on land by doubling them under the body.

Seal, an impression made in wax or other soft medium with an incised stamp of metal or other material. The word is often used of the stamp itself. The earliest seals were probably those of Babylonia, Assyria, and Egypt, and were cylindrical in shape. The Greeks used wooden seals, and later carved gems. The first Great Seal of England was made during the reign of Edward the Confessor. Since the knowledge of writing and the possibility of holograph signatures has become general, the use of seals has degenerated into a mere formality, though they are still required by law to authenticate certain documents issuing from corporate bodies.

Sea Lavender (*Statice limonium*), a perennial herb found on coasts and salt-marshes in temperate regions. The leaves are radical, and the bluish-purple flowers are borne on tall, branching stems.

Sealed Orders, orders given to the commanding officer of a ship or squadron which he is not allowed to open till he has proceeded a certain distance into the high seas; an arrangement in order to ensure secrecy in a time of war.

Sealing Wax, an artificial compound used for sealing letters and envelopes, composed of shellac and turpentine tinted with vermilion or other colouring matter.

Sea Lion, name given to several members of the eared seal family. The southern sea lion is about 7 to 8 ft. long. The male is reddish-brown, with a heavy mass of stiff curly hair on the neck and shoulders. Another species, the Californian sea lion, found off the western coasts of N. America, is frequently trained for menageries. See also **Seal**.

Seaman, **Sir Owen**, British poet and comic editor of *Punch*; he was knighted in 1914; among other volumes he wrote *Horace at Cambridge* and *In Cap and Bells*. (1860-1936).

Seamew, an alternative name for the seagull. See **Gull**.

Sea Otter. See **Otter**.

Seaplane, a heavier-than-air flying machine so built as to be capable of alighting on or rising from the sea. It may be either a flying boat or float-plane. The former is better adapted to ocean travel and is in use for the British Empire Mail Services. There is also an "amphibian" type, fitted with terrestrial landing gear as well as floats. A float-plane is similar in construction to a land-plane, except that float gear takes the place of wheels; speedier than a flying boat, it is not capable of carrying so heavy a load.

Searchlights, an apparatus used for other purposes in warfare. It consists of a lamp with powerful reflectors and a projector so adjusted that a broad beam of light travels in a horizontal path. For signalling the searchlight waves long or short flashes in the sky in the Morse Code. The maximum intensity of a modern electric searchlight is anything up to 60,000,000 candle power in the projector beam. Searchlights are especially useful for tracking aircraft in flight. They are also used by merchantmen in navigating streams at night, and by warships to detect the approach of hostile craft, and on forts.

Search Warrant, a magistrate's permitting a search by the police of private premises. Various Acts of Parliament permit the issue of such warrants under certain conditions in cases of suspected theft, or to enable searches to take place for illicit stills, explosives, betting or gaming implements or documents, neglected children, etc.

Sea Serpent, a marine monster of which is generally accepted as mythical, though several seemingly authentic accounts of its appearance have been circulated. It is generally supposed that such serpent-like appearances are caused by enormous cuttlefish swimming on the surface of the water, with their 20 ft. long tentacles elongated fore and aft. Other fishes which might also be mistaken for the sea-serpent are the basking-shark, tape-fish, marine snake, and oar-fish, which reaches a length of 50 ft.

Sea-sickness, nausea and vomiting produced by the rolling and pitching of a vessel at sea; the disturbance of the body in relation to its surroundings gives a shock to the nervous system, while the stomach also suffers displacement.

Sea Snake, a family (*Hydrophiinae*) of aquatic reptiles, brilliantly coloured, found in the Indian and Pacific Oceans. The sea snake differs from the land snake in its compressed and oar-like tail, which is used as a paddle. It is extremely venomous. Diet consists of fish and other marine creatures.

Seasons, the climatic and meteorological effects produced regularly each year in any given area by the changing position of the earth in relation to the sun. In temperate climates four are distinguished, spring, summer, autumn (or fall), and winter; in equatorial regions usually only two, the wet and dry seasons, are strongly marked. The winter of the southern hemisphere corresponds in time with the summer of the northern, one face of the earth being turned from the sun while the other is directly facing it.

Seathwaite, a village in Borrowdale, Cumberland, on the R. Derwent. Plumbago was formerly mined here. It is remarkable for its rainfall, varying from 120 to 140 inches annually, the heaviest in England.

Seaton, seaside resort on the S. coast of Devon, England; 10 m. S. of Honiton, at the mouth of the R. Axe. Garnet, beryl, quartz and other minerals are found in the parish. Pop. 2,350.

Seaton Valley, urban district of Northumberland, England, 7 m. N. of North Shields. Coal mining is carried on in the neighbourhood. Pop. 28,200.

Seattle, the largest city in the state of Washington, U.S.A., on Elliott Bay, 45 m. SE. of Port Townsend and 60 m. from Olympia. It is an important Pacific port, with direct steamer service to the East, and the trading port of the Alaska fisheries. The State University of Washington is situated here. The industries are varied and include ship-building yards and canning works. Pop. 385,500.

Sea Urchin (*Echinoidea*), a group of marine animals of the class Echinodermata. The body is, in most species, almost spherical, and is covered with spines like the quills of a hedgehog. There are both coastal and deep-sea species; they feed mostly on sea-weeds.

Sea Water. The amount of salts and other chemicals present in sea water averages about 3½ per cent. by weight, over three-quarters of this being common salt (sodium chloride). Other salts present include potassium and magnesium chlorides, magnesium, potassium and calcium sulphates, calcium carbonate, etc. The proportions vary considerably from sea to sea, the Dead Sea in Palestine having a salt content of about 25 per cent. owing to the evaporation of the water, and the Salt Lake also being very saline.

Sea Weeds (*Algae*), a large group of marine plants of the order Thallophyta. There are over 400 varieties, divided into three main groups: *Chlorophyceae*, green; *Phaeophyceae*, brown; and *Rhodophyceae*, red sea-weeds. The green variety is found fairly near the surface of the sea; the red lower; and the brown at all depths. Great use is made of sea-weed both medicinally and as manure for the cultivation of crops. It is also used in the manufacture of soaps, jellies, and paper varnish. In Roman times an alkaline dye was obtained from it.

Sebastian, St., a Roman soldier at Narbonne, martyred under Diocletian, when it was discovered that he was a Christian; a favourite subject with painters, by whom he is generally depicted bound naked to a tree and pierced with arrows. Feast, January 20. (255-288).

Sebastopol, or **Savastopol**, seaport of the U.S.S.R., situated on a splendid natural harbour (4½ m. by ½ m.), on the SW. of the Crimea; during the Crimean War was destroyed and captured by the French and English after a siege lasting from Oct. 9, 1854, to Sept. 18, 1855; has, since 1885, been restored, and was a Russian naval station before the World War. Pop. 78,300.

Second Advent, the belief in the second coming of Christ (see Matt. xxiv.); specifically the belief shared by a sect, the Adventists, numbering some 150,000, founded in America about 1830, now divided into several groups, the largest being the Seventh Day Adventists.

Secondary Schools. See Education.

Second Chamber, the higher or House in a bicameral system of government. Its members are frequently not directly elected by the people, as are those of the "lower chamber," but are nominated or, as in the case of the House of Lords, are hereditary or life peers. In the United States and other federal countries, the Senate, as the Second Chamber is called, is composed of members chosen by the constituent States or Provinces of the Federation. In the British Dominions they are generally elected, except in Canada, where they are nominated. In those Crown Colonies which have a Second Chamber, it is usually nominated and is most often called the Executive Council. In Eire (Ireland) the members of the Senate are partly nominated, and partly elected on a vocational basis. The traditional role of a second chamber is to act as a check on rash legislation. Southern Rhodesia has only one Chamber (Legislative Assembly). In Barbados and the Bahamas the Legislative Council (nominated) is virtually a Second Chamber.

Second Empire, the government in France in 1852, by Louis Napoleon, subsequent to the Revolution of 1848, and the *coup d'état* of 1851. Originally absolutist, it became liberalised by constitutional changes enforced by the opposition while the surrender of Napoleon in the disastrous Franco-Prussian War of 1870, completed its downfall.

Second Lieutenant, the lowest rank of commissioned officer in the British Army, that in which cadets enter it after passing through the Royal Military colleges. The badge of rank is a single star.

Second Sight, name given to the supposed power of seeing things future or distant, particularly of obtaining knowledge of the time of deaths of persons at a distance, and embracing telepathy and clairvoyance; a power superstitiously ascribed to certain people in the Highlands of Scotland.

Secretary Bird, the common name of a family of

birds (the *Serpentariidae*), the only one of its order and itself including only two species the *Serpentarius serpentarius* and the *S. gambiensis*. They are birds of prey found in South Africa and Senegambia respectively, mainly grey and white in colour, with a crest of feathers whose resemblance to a "pen behind the ear" has given the bird its name. It is protected in Africa because of its usefulness in destroying poisonous snakes.

SECRETARY BIRD

Secretary of State,

name given to nine members of the British Cabinet, whose departments are respectively concerned with Home Affairs, Foreign Affairs, War, India, Burma, the Dominions, the Colonies, the Air, and Scotland. The office traces back to the reign of Elizabeth, when there were two such secretaries. There were sometimes two and sometimes three Secretaries of State during the 18th Century; in 1801, there was one for home affairs, one for foreign matters, and a third for war and colonial work. In America the Secretary of State is a member of the Cabinet; is in charge of foreign affairs, and enjoys, by tradition, pre-eminence over other ministers. He succeeds automatically to the Presidency in the event of the President and Vice-President dying during their term of office.

Secretin, discovered by Bayliss and Starling in 1902, is a hormone produced in the small intestine, which passes into the blood and causes the pancreas to secrete the digestive juices.

Secretion, a liquid excreted by a gland in the human or animal body and necessary to the chemical functioning of the whole. The physiology of the internal secretions of such glands as the thyroid, pituitary, suprarenals, etc., generally known as hormones (q.v.) is one of the most important branches of modern medicine.

Secret Service, an espionage or intelligence service, organized by most States, for the purpose of acquiring information as to the naval and military concerns of other States. Such information is acquired by agents acting abroad, and is necessarily a hazardous undertaking, for if detected the agent receives no protection from his employers.

Secret Societies, societies for special purposes to which the members are bound by oath, being also sworn to secrecy; they are now forbidden in England by law, charitable societies and those having a quasi-religious basis (e.g., Freemasonry) being excepted. Noted secret societies were the Assassins (Mohammedan fanatics, 11th Century), the Vehmnic Tribunal (religious society in Westphalia, 12th Century), the Rosicrucians (German mystical society, 14th Century), the Ribbon men (Irish anti-landlord society, founded 1820), the Carbonari (Italian society against French rule, founded 1808), the Fenians (Irish anti-English society, founded 1858), the Ku-Klux-Klan (American anti-negro society, founded 1865).

Sector, a portion of a circle enclosed by an arc and two radii and part of the circumference.

Secularist, one who, discarding as irrelevant all theories and observances bearing upon the other world and its interests, holds that we ought to confine our attention solely to the immediate problems and duties of this.

Secunderabad, town of Hyderabad, India, 6 m. N. of Hyderabad. It is an important military station. Pop. 56,000.

Sedan, a town of France, in dept. of Ardennes, on the Maas, 164 m. NE. of Paris; once a strong fortress, but dismantled in 1875, where in 1870 Napoleon III. and 86,000 men under Marshal MacMahon surrendered to the Germans; noted for its cloth manufactories. Previous to the Edict of Nantes was a celebrated centre of Huguenot industry and theological learning. Pop. c. 16,500.

Sedan Chair, a conveyance with one seat, carried on poles

by two men; first used in England in 1581, were in general use from 1650 to about 1750; the name is said to be derived from the town of Sedan, whence the chairs originally came.

SEDAN CHAIR

Seddon, Richard John, Premier of New Zealand from 1893; born at Eccleston Hill, St. Helens, Lancashire; emigrated to Victoria, 1863; and to New Zealand 1866. Becoming a miners' champion, he was elected to Parliament in 1879, joining the Liberal Cabinet in 1891, and succeeding to the Premiership in 1893, remaining in office till his death. (1845-1906).

Sedge (*Carex*), a genus of perennial grass-like herbs of the family Cyperaceae. The stems are usually leafy, with spikes of flowers. They are found in all climates, but more abundantly in cold regions and in marshy districts. The genus includes 900 species, some 80 of which are found in Britain, *Carex arenaria* being, like marram grass (*Ammophila arenaria*), valuable for binding sand-dunes.

Sedgemoor, district in central Somersetshire, England, 5 m. SE. of Bridgwater, scene of a famous battle between the troops of James II. and those of the Duke of Monmouth on July 6, 1685, in which the latter were completely routed.

Sedgley, a parish of Staffordshire, England, 3 m. N. of Dudley. Manufactures hardware, nails, etc., and has tube-filling works. The district is agricultural and abounds in coal, lime, and ironstone. Pop. 19,300.

Sedimentary Rocks are those laid down as deposits, chiefly by water action. Most of them have been formed on the sea bottom of the material brought down by rivers, or, as in the case of some limestones, of the remains of animals. Some sedimentary rocks have been formed by the deposition of salts from solution in lakes; some by accumulations of volcanic ashes, and others by glacial action. Sedimentary rocks are classified as *arenaceous* (e.g., sandstones and grits), *argillaceous* (e.g., muds, clays, and shales), *calcareous* (e.g., chalk and limestones), and *pyroclastic* (e.g., volcanic ashes). Deposits such as peat and coal are formed of the remains of plants.

Sedition, conduct aimed at disturbing the peace of the realm or producing civil commotion or public disorder, whether by act, speech, or writing. It is punishable in various ways according to the gravity of the offence.

Seduction, consists in persuading a female to surrender her chastity. Formerly seduction gave rise to an action for damages, but, under present English law, apart from the possibility of obtaining damages against a co-respondent in a divorce petition, there is no civil remedy

for the mere debauchery of a man's wife or daughter or other female dependent; though damages may be obtained for the proved loss of actual services previously rendered by her.

Seed, a germ produced from the ovum of a plant after fertilization from which a new plant will, under favourable circumstances, develop. Plants are divided into two great classes according as their seeds are contained in a seed-vessel or fruit (*angiosperms*) or are naked (*gymnosperms*). Official seed-testing stations supervised by the Board of Agriculture test seeds for viability, dyeing and so forth.

Seeland. See Zealand.

Seeley, Sir John Robert, English author, born at London; became Professor of History at Cambridge in 1869; his *Esse Homo* was published in 1865, which in its denial of the self-originated spirit of Christ offended orthodox belief and excited much adverse criticism; wrote, in 1882, a work entitled *Natural Religion*, in which he showed the same want of sympathy with supernatural ideas, as also several historical works. (1834-1895).

Segment, the part of a circle cut off by a chord; a segment greater than a semicircle is known as a *major segment*, one less than a semicircle as a *minor segment*.

Segou, a town of the French Sudan, on the Joliba, 400 m. SW. of Timbuktu; chiefly occupied by trading Arabs; once the capital of a now decayed native state. Pop. ... 7,000.

SEGMENTS :

- (a) *Minor*
- (b) *Major*

Segovia, Spanish city, capital of a province of the same name; crowns a rocky height looking down on the R. Eresma, 32 m. NW. of Madrid; its importance dates from Roman times; has a great aqueduct, built in Trajan's reign, and a fine Moorish castle and Gothic cathedral; cloth-weaving is the only important industry. Pop. of province, 177,000; of city, c. 17,000.

Segrave, Sir Henry, British racing motorist, born in America of British parents. During the World War he saw active service in the Royal Air Force. In 1927 he established a world's record at Daytona, Florida, of 203 miles an hour, and with another car set up a further record of 231 miles an hour in 1929 on the same track, for which he was knighted. While engaged on an attempt to beat the world record for motor boat racing in 1930 his boat capsized on Windermere and he was killed. (1896-1930).

Seidlitz Powder, an aperient composed of two powders, one of sodium bicarbonate and tartaric acid, the other of Rochelle Salt, which are mixed together in water and consumed while the liquid effervesces.

Seigniorage, a charge made by mints of gold or silver into currency.

Seine, an important river of France, rises in the tableland of Langres, takes a winding course to the NW., passing many important towns, Troyes, Fontainebleau, Paris, St. Denis, and Rouen, and discharges into the English Channel by a broad estuary after a course of 482 m., of which 350 are navigable.

Seine, the smallest but most populous dept. of France, entirely surrounded by the dept. of Seine-et-Oise; Paris and its suburbs cover most of the area; presents a wooded, undulating surface, traversed by the

Seine in a NW. direction. Area, 185 sq. m. Pop. 4,968,000.

Seine-et-Marne, a north-midland dept. of France lying E. of Seine; the Marne crosses the N. and the Seine the S.; has a fertile soil, which grows cereals, vegetables, and fruits in abundance; many fine woods, including Fontainebleau Forest, diversify its undulating surface. Melun (capital) and Fontainebleau are among its important towns. Area, 2,275 sq. m. Pop. 409,000

Seine-et-Oise, a dept. of NW. France, encloses the dept. of Seine; grain is grown in well-cultivated plains and the vine on pleasant hill slopes; is intersected by several tributaries of the Seine, and the N. is prettily wooded. Versailles is the capital; Sèvres and St. Cloud are other interesting places. Area, 2,185 sq. m. Pop. 1,413,500.

Seine-Inférieure, a maritime dept. of NW. France, in Normandy, facing the English Channel; is for the most part a fertile plain, watered by the Seine and smaller streams, and diversified by fine woods and the hills of Caux; is a fruit and cider-producing district; has flourishing manufactures. Rouen is the capital, and Havre and Dieppe are important trading centres. Area, 2,450 sq. m. Pop. 915,600.

Seine-net, or *Sean*, an open bag-net for sea-fishing, weighted at the bottom and suspended from floats; the fish are scooped in as the net is dragged through the water by the seine-boats.

Seisin, in feudal law, a term for possession of landed or other property, the holder being said to be "seised" of the property in question.

Seismology, the study of earthquakes and their causes and effects. Earthquakes are recorded by the seismometer or seismograph, a delicate instrument by which the distance and intensity of the slightest earth tremors can be ascertained.

Selangor, one of the four Federated Malay States. It came under the protection of Great Britain in 1874. The capital is Kuala Lumpur. The chief industries are rubber-growing and tin-mining. It has an area of 3,160 sq. m. Pop. 617,600.

Selborne, a village of Hampshire, England, SW. of Farnham, famous as the parish of which Gilbert White (q.v.) was curate, and to which his *Natural History of Selborne* relates. Pop. c. 2,000.

Selby, market town of Yorkshire, England, in the West Riding, on the Ouse, 15 m. S. of York; has a noted cruciform abbey church, founded in the 12th Century and exhibiting various styles of architecture; manufactures flax, ropes, leather and bricks. Pop. 10,000.

Selden, John, English jurist and author, born at Salvington, Sussex; published various works bearing on old English jurisprudence and antiquities generally; a *History of Tithes* (1618) got him into trouble with the Church; was imprisoned in 1621 for encouraging Parliament to repudiate James's absolutist claims; continued to play an important part throughout the troublous reign of Charles I.; he was one of the framers of the Petition of Right, and suffered imprisonment with Holles; sat in the Long Parliament, but disapproved of the execution of Charles; held various offices, e.g., Keeper of the Rolls and Records in the Tower; is best

remembered for his *Mare Clausum*, an answer to the *Mare Liberum* of Grotius, in which he proved that sovereignty over the narrow seas had been exercised by England from the earliest times; and also for his charming *Table Talk*, in which occurs the famous passage likening equity to the length of the Chancellor's foot. (1584-1654).

Selection, the process by which, according to the evolutionary theory in biology, species originate. It was simultaneously propounded by Charles Darwin and Alfred Russel Wallace, and was founded on the fact that individuals vary from each other, though it affords no explanation of the origin of these variations. The selection is supposed to take place largely by the process known as the "survival of the fittest," which means that those individuals best adapted to their environment stand the best chance of living long enough to mate and breed, passing on their individual characteristics to their offspring.

Selene, in Greek mythology, the moon-goddess, the sister of Helios, and designated Phoebe as he was Phoebus. She became by Endymion the mother of fifty daughters.

Selenium, a non-metallic chemical element belonging to the same group as oxygen, sulphur and tellurium; discovered in 1817 by the Swedish chemist Berzelius. Symbol Se; atomic number 34; atomic weight 78.96. It occurs mostly in the form of selenides, i.e., compounds of selenium with metals and also in certain kinds of iron pyrites (see *Pyrites*). Like sulphur, it exists in several different varieties, one of which, the so-called "metallic" selenium, is an iron-coloured hard substance with the striking property of altering its electrical resistance according to the intensity of the light falling on it; the greater the illumination, the less the resistance. This remarkable power of selenium is made use of in certain photo-electric cells. In its general chemical behaviour selenium closely resembles sulphur; it finds some commercial application in the manufacture of red glass.

Selenium Cell, an electrical apparatus utilising the sensitivity of selenium (q.v.) to light, and its decreased electrical resistance when exposed thereto, to operate burglar alarms, traffic signals, automatic lamp-lighting apparatus, etc.

Seleucia, founded by the Seleucid rulers of Syria, especially (1) Seleucia on the Tigris, N.E. of Babylon, destroyed by Trajan in 116; (2) Seleucia on the Orontes, in Syria, which for some time was the seaport of Antioch.

Seleucidæ, a dynasty of Asiatic rulers founded by Seleucus called Nicator, one of the generals of Alexander the Great, who on the latter's death secured the rule of Babylonia and Syria (c. 356-281 B.C.). For its most famous members see *Antiochus*.

Self-denying Ordinance, a resolution of the Long Parliament passed in 1644, whereby the members bound themselves not to accept certain executive offices, particularly commands in the army.

Self-determination, the conception of the right of subject peoples and national minorities to autonomous rule, formulated in 1916 by President Wilson and, in theory, the basis of the Treaty of Versailles and other post-World War settlements. It has been invoked repeatedly since 1918 by communities in various parts of Europe and elsewhere desirous of obtaining some degree of political independence, as by the Sudeten Germans (q.v.) in Czechoslovakia, the Flemings in Belgium, the Croats in Yugoslavia, etc.

Selfridge, Harry Gordon, British business magnate, born at Ripon, Wisconsin, U.S.A., was a member of the firm of Marshall Field & Co., Chicago, 1890-1903. In 1906 he emigrated to England, and in 1909 opened his department store on the N. side of Oxford Street, London; it has since been greatly enlarged. (1864-)

Seljuks, a Turkish people who in the 10th Century broke away from their allegiance to the khan of Kirghiz, adopted the Mohammedan faith, and conquered Bokhara, but were driven across the Oxus and settled in Khorassan. Under Toghril Beg, grandson of Seljuk, they in the 11th Century won for themselves a wide empire in Asia, including the provinces of Syria and Asia Minor. They were in part gradually absorbed by the advancing Mongol tribes, while numbers fled westward, where they were at length incorporated in the Ottoman Empire in the 14th Century.

Selkirk, county town of Selkirkshire, Scotland, on the Etrick, 40 m. SE. of Edinburgh; famed at one time for its "Souters" (shoemakers), who figured in Border conflicts; is a centre of the manufacture of tweeds. Pop. 5,700.

Selkirk, Alexander, shipwrecked sailor who was put ashore on the island of Juan Fernandez, South America, and whose experiences inspired Defoe to write his *Robinson Crusoe*. (1676-1721).

Selkirk Mountains, a range of Columbia extending from the U.S.A. northward to the Columbia R. The highest peaks are Sir Donald, 10,645 ft., and Mt. Dawson, 10,800 ft.

Selkirkshire, a S. inland county of Scotland; extends S. from the corner of Midlothian to Dumfriesshire, between Peebles (W.) and Roxburgh (E.); the grassy slopes of its hills afford splendid pasturage, and sheep-farming is a flourishing industry; manufactures are mainly confined to Galashiels and Selkirk; is traversed by the Etrick and the Yarrow, whose romantic valleys are associated with much of the finest ballad literature of Scotland. Area, 282 sq. m. Pop. 22,600.

Selle, river in France; rising near Le Scheide, it flows N. to join the Schelde. It was the scene of fighting in October, 1918, when British and American troops gained a victory over a German force superior in numbers; some 20,000 prisoners and 475 guns were captured.

Selous, Frederick Courtenay, British hunter and explorer, born in London. Between 1871 and 1881, as a big-game hunter and ivory-trader, he travelled in South Africa, doing much valuable work as a field naturalist; later he acted as guide to exploring and hunting parties in Mashonaland and elsewhere, and secured mineral rights there, and in Matabeleland, for the British South Africa Company. He fought in the Matabele Wars in 1893 and 1895, and was killed while fighting in the World War in Tanganyika. He wrote several accounts of his game-hunting expeditions. (1851-1917).

Selsey, village of W. Sussex, England, once an island, now on a peninsula, 8½ m. from Chichester, whither the former episcopal see was removed in 1072. The sea has encroached beyond the site of the old cathedral. Pop. 2,600.

Selwyn, George Augustus, English ecclesiastic; was appointed first bishop of New Zealand, in which capacity he worked so zealously that his diocese, by his extension of Episcopacy, was subdivided into seven. On his return to England he was made bishop of Lichfield. Selwyn College, Cambridge, was endowed in his memory. (1809-1878).

Semaphore, the mechanism employed prior to the discovery of the electric telegraph; invented in 1787 by Richard Edgeworth, but first extensively used by the French in 1794, and afterwards adopted by the Admiralty in England; consisted at first of six shutters set in two rotating circular frames, which, by opening and shutting in various ways, were capable of conveying 63 distinct signals; these were raised on the tops of wooden towers erected on hills; later a different form was adopted consisting of a mast and two arms worked by winches. The speed at which messages could be transmitted was very great; thus a message could be sent from London to Portsmouth and an answer received within 45 seconds. The railway signal now in use is a form of semaphore.

Semarang (Samarang), port near the N. coast of Java, Dutch East Indies, 250 m. E. of Batavia. It is situated on a canal and the R. Semarang, and is the capital of the district of the same name. The products of the district include coffee, spice, and timber. Pop. 150,000.

Semele, in Greek mythology, the daughter of Cadmus and the mother of Dionysus by Zeus; was tempted by Hera to pray Zeus to show himself to her in his glory. He appeared before her as the god of thunder and consumed her by the lightning.

Seminoles, a nomadic tribe of American Indians who from 1832 to 1839 offered a desperate resistance to the Americans before yielding up their territory SE. of the Mississippi (Florida, &c.).

Semiramis, legendary queen of Assyria, to whom tradition ascribes the founding of Babylon with its hanging gardens, and who is said to have surpassed in valour and glory her husband Ninus, the founder of Nineveh; she seems to have been in reality the Venus or Astarte of the Assyrian mythology. The story goes that when a child she was deserted by her mother and fed by doves.

Semites, a group of races, speaking original habitat is in the neighbourhood of Arabia and Mesopotamia; they include the Jews, Arabs, Syrians, and the ancient Phœnicians, Carthaginians and Assyrians. They played a large part especially in Mesopotamia, in the development of civilisation; they have tended to be a trading and nomadic rather than an agricultural people. They have apparently acted rather as disseminators and handers-on of the knowledge of others, rather than makers of new contributions to knowledge or civilisation; the great monotheistic religions, Christianity, Judaism and Islam, are among their most important legacies to the world.

Semliki, a river in the Belgian Congo, flowing NE. from Lake Edward, and discharging into the southern end of Lake Albert. **Semolina**, a granular material made from wheat, and used in the production of spaghetti, macaroni, and similar products, as well as for puddings.

Sempach, a small Swiss town, 9 m. NW. of Lucerne, on the Lake of Sempach. Here on July 9, 1386, a body of 1,500 Swiss soldiers completely routed the Austrians, 4,000 strong, under Leopold, Duke of Austria.

Sempervivum. See *Houseleek*.

Senate (i.e., "an assembly of elders"), a name first bestowed by the Romans on their supreme legislative and administrative assembly; its formation is traditionally ascribed to Romulus; after the foundation of the Empire, its powers gradually diminished until membership became a mere honorary distinction; in modern times is used

to designate the "Upper House" in the legislature of various countries, e.g., France and the United States of America, and some of the British Dominions; is also the title of the governing body in many universities. See also **Second Chamber**.

Sendai, town in Japan, in the province of Miyagi, of which it is the capital; it is 225 m. from Tokio and is an important trading centre. Pop. 220,000.

Seneca, Lucius Annæus, Roman philosopher, sophist, son of Marcus Annæus, born at Cordova, and brought to Rome when a child; practised as a pleader at the bar, studied philosophy, and became the tutor of Nero; acquired great riches; was charged with conspiracy by Nero, as a pretext, it is believed, to procure his wealth, and ordered to kill himself, which he did by opening his veins till he bled to death; he was of the Stoic school in philosophy, and wrote a number of treatises bearing chiefly on morals; d. A.D. 65.

Senegal, an important river of French West Africa, formed by the junction, at Bafoulabé, of two head-streams rising in the highlands of western Sudan; flows NW., W., and SW., a course of 700 m., and discharges into the Atlantic 10 m. below St. Louis. Navigation is somewhat impeded by a sand-bar at its mouth, and by cataracts and rapids in the upper reaches.

Senegal, a colony of French West Africa, lying S. of the Senegal R.; largely devoted to stock-rearing; ground-nuts (the chief export), maize, millet, gum and rice are grown, and there are weaving and jewellery industries. The capital is St. Louis (pop. 38,000); Dakar (pop. 93,000), the seat of government of the French West African territories, and an important naval station and seaport, is the largest town. Area, 74,000 sq. m. Pop. c. 1,698,000.

Seneschal, an important functionary in the courts of Frankish princes, whose duty it was to superintend household feasts and ceremonies; the name was later applied in the Middle Ages to a similar official at the court or hall of any important feudal lord.

Senility, general name for the physical conditions accompanying old age in man; it is marked by such symptoms as hardening of the arteries, a lessening of nervous control and muscular power, weakness of memory, and generally slow reaction to external stimuli. In extreme cases it may involve the brain to such an extent as to produce the general mental breakdown known as senile dementia.

Senlis, town of France, on the Nonette, in the dept. of Oise, 23 m. N.E. of Paris, the headquarters of the French General Staff at the time of the Armistice in 1918. Pop. 7,300.

Senna, a valuable purgative drug, and pods of a number of other rubs and herbs of the genus *Cassia* (natural order Leguminosae). The most valuable species for this purpose are the Alexandrian (*Cassia acutifolia*), Italian (*C. echinata*), Arabian (*C. angustifolia*) and Purgative Senna (*C. fistula*). The purgative known as "black draught" is a combination of senna with Epsom salts.

Sennacherib, a king of Assyria, son of Sargon (q.v.), whose reign extended from 702 to 681 B.C., and was distinguished by the projection and execution of extensive public works; he endeavoured to push his conquests westward, but was

defeated in Judaea by the miraculous destruction of his army. See 2 Kings xix., 35.

Sensation, the effect produced on a sense-organ by an external stimulus, or the effect produced in the brain by the reception of a nerve-message from the sense-organ affected by the stimulus. Philosophically it denotes those forms of perception which are concerned with sense-objects or images.

Sensitive Plant, term applied to plants which are sensitive to the touch, in particular to the *Mimosa pudica*, whose leaves fold together and whose stalks droop at night, and which will assume this position at the slightest touch. Other species of mimosa also are sensitive, though not to the same degree.

Sensitizers are dyes added to photographic films to increase or adjust the sensitivity of the film to light of various colours. A film treated with the red dye eosin, for example, is much more sensitive to green light than an ordinary untreated one.

Senussi, a Mohammedan brotherhood in the Sudan, founded by Mohammed-es-Senussi from Mostaganem, in Algeria, who flourished between 1840 and 1900. They fought under a Turkish commander against the Allies in the World War, invading Egypt in 1915; but their headquarters at Sollum were occupied and their activities suppressed in the following year.

Seoul, now *Keijo-fu*, capital of Korea, a walled city and trading centre. Pop. 404,200.

Sepals, the small leaves which form collectively the outer covering of a flower; that part which envelops the flower when it is in bud. Sometimes the sepals form distinct leaves, but in certain cases they are gamosepalous, i.e., joined at the edges. They are usually green or light brown in colour.

Sepia, a brown pigment obtained from cuttlefish, used by painters as a water-colour.

Sepoy, a native of India employed as a soldier in the British-Indian army.

September, the ninth month of the "seventh," year, its name, meaning "seventh," being due to its position in the old Roman calendar.

September Massacres, an indiscriminate slaughter in Paris which began on Sunday afternoon, Sept. 2, 1792, when 30 priests on their way to prison were torn from the carriages that conveyed them, and massacred, after which a number of political prisoners in the Paris gaols were killed by the mob. It marked the height of the so-called "Reign of Terror."

Septicæmia, a condition in which is polluted by bacteria multiplying within the body; it is marked by an inflamed condition of the tissues surrounding the wound or abrasion through which the bacterial infection has been received, and general feverishness. It is a gravely serious condition which frequently results in death.

Septuagesima, the third Sunday of Lent; so called because it is roughly 70 days before Easter. It marks the beginning of the Church's penitential season in commemoration of Christ's passion and death. In the Eastern Church the time between Septuagesima and the First Sunday of Lent is kept as a partial fast.

Septuagint, the oldest known complete version in Greek of the Hebrew Scriptures, executed at Alexandria, in Egypt, by different translators at

ALEXANDRIAN
SENNNA

different periods, commencing with 280 A.C., for the use of Jews resident in Egypt; the name Septuagint, or Seventy (LXX) was given to it from the tradition that it was the work of 70, or rather 72, Jews, who were fabled to have executed the whole in as many days and, according to another, to have each done the whole apart from the rest, with the result that the version of each was found to correspond word for word with that of all the others. It was the version current everywhere at the time of the planting of the Christian Church, and the numerous quotations in the New Testament from the Old are, with few exceptions, taken from it; it is the version still used for public reading in the Greek-speaking sections of the Eastern Church.

Sepulchre, Holy. See *Holy Sepulchre*.

Sequestration, a writ of the Court directed to Commissioners called Sequestrators, authorizing them to enter on the lands and take the property of a person who has refused to obey a judgment or order of the Court. A writ of sequestration will not issue against the corporate property of any corporation without special leave. In Scots law, the seizing of a bankrupt's estate, by decree of Court, for the benefit of creditors, is so called.

Sequoia, a genus of large evergreen trees of a coniferous nature, native to California.

The two recognized species attain a great height; the largest specimen "mammoth tree," *S. gigantea*, having attained a height of 320 ft. and a girth of 35 ft. at an age of 1,500 years. The close-grained red timber of the other species, the redwood (*S. sempervirens*), which grows even taller (340 ft. though it attains a girth of only 28 ft.) is much used in joinery.

Seraglio, in its usual sense applied in the East to a harem or women's quarters in a royal household. The name was properly applied to the palace of the former Turkish sultans at Istanbul (Constantinople), on a projecting piece of land between the Golden Horn and the Sea of Marmora, enclosing within its 3 m. of wall government buildings, mosques, gardens, etc., the chief being the harem, occupying an inner enclosure.

Serajevo. See *Sarajevo*.

Serampur, modern aspect in Bengal, British India, on the Hooghly, 13 m. N. of Calcutta; purchased by Britain from Denmark in 1845; manufactures paper and mats. Pop. 78,700.

Seraphim, in Jewish and Christian angelology, the highest order of Angels, who stand continually in the presence of God awaiting His commands.

Serbia, a former Kingdom of Europe occupying a central position in the Balkan Peninsula between Austria (N.) and Turkey (S. and W.), with Rumania and Bulgaria on the E.; it now forms part of Yugoslavia (q.v.). Austria's declaration of war on her in July, 1914, was the start of the World War, during which Serbia fought on the side of the Allies, and on the conclusion of which she decided to throw in her lot with the new nation of the Serbs, Croats, and Slovenes.

Originally emigrants in the 7th Century from districts round the Carpathians, the Serbs had by the 14th Century established a kingdom considerably larger than their present domain; were conquered by the Turks in 1389, and held in subjection till 1815, when a national rising won them Home Rule, but remained tributary to Turkey until 1877, when they proclaimed their independence, which was confirmed by the Treaty of Berlin in 1878.

Serenade, a musical composition intended originally for open-air performance; the name is often applied to piano and violin pieces of a light nature, or to sonata movements.

Sereth (Siret), river of Rumania, rising in the Bukovina Carpathians and flowing SE. to within 6 m. W. of Galatz, where it joins the Danube. Length about 280 m.

Serfs, under feudalism a class of labourers who were attached to the soil and could be transferred with it, being prohibited from transferring their services to another estate. They differed from slaves only inasmuch as they could not be sold from one person to another except with the estate on which they worked. They were sometimes able to obtain freedom by performing military service or escaping to a corporate borough and taking up residence there for a year. With the break-up of feudalism they gradually gained their emancipation. The system lasted in Russia until 1863, when serfs to the number of 20,000,000 were liberated by a decree of the Czar Alexander II.

Serge, a hard-wearing worsted, frequently dyed to a dark blue shade, used for wearing apparel. The name was formerly applied to some types of textiles woven from silk yarns.

Sergeant, in the army a non-commissioned officer, ranking above a corporal; his duty is to maintain discipline and assist the platoon commander. A sergeant-major is a senior non-commissioned officer who assists the company officer. Until 1875 the name was also given to certain English barristers practising in the Common Law courts who enjoyed certain privileges of precedence, and so forth, in relation to other barristers. The sergeant-at-arms is an officer of each House of Parliament in Great Britain who attends on the Speaker or Lord Chancellor, carries the mace, and executes orders of arrest, etc., made by Parliament.

Series. See *Progression*.

Seringapatam, city of S. India, Mysore State, situated on an island in the Kaveri, 10 m. NE. of Mysore city; in the latter part of the 18th Century was the strong-hold of Tippee Sahib, who was successfully besieged and slain by the British in 1792. Pop. c. 12,000.

Serpent, the alternative name for snake (q.v.), though it is generally used only in reference to the larger members of the order.

Serpentine, a crystalline green mineral composed of silicate of magnesia.

Serpent Worship, or *Ophiolatry*, was practised in ancient times by the Egyptians and has survived in India and Africa; the symbol of the snake is prevalent in early European art; in N. and western America this form of worship long obtained among aboriginal tribes. Symbolically the serpent represented regeneration, from the periodical shedding of its skin; its shape also suggested a connection with phallic symbolism.

Sertorius, *Quintus*, Roman statesman and general; joined the democratic party under Marius (q.v.) against

SEQUOIA GIGANTEA
(Leaf and cone)

Sulla: retired to Spain on the return of Sulla to Rome, where he sought to introduce Roman civilization while opposing, at the head of native troops, the levies sent against him from Rome; was assassinated c. 73 B.C.

Serum, a pale yellow liquid, the residue of the plasma or liquid part of the blood after the fibrin yielded by the plasma has been removed. Inoculation and vaccination are performed by an injection of serum obtained from animals which have been rendered immune from a particular disease.

Service, **Robert William**, Canadian writer, but born at Preston, Lancashire. He went to Canada in 1895, and spent eight years in the Yukon Territory. Among his published volumes are *Songs of a Soundough*, 1907; *Ballads of a Cheechako*, 1909, and several novels. During the World War he acted as War correspondent for a Toronto newspaper. (1874-).

Service Tree (*Sorbus* or *Pyrus domestica*), a small fruit-tree of the order Rosaceae, resembling the mountain ash (q.v.) and bearing an acid pear-shaped fruit eaten when over-ripe. It is native to Europe or temperate Asia but does not occur wild in Britain. The Wild Service (*Sorbus torminalis*), also known in various parts of England as "Shir," "Lezzory" and "Lizzory," grows to a height of 80 ft., and is widely distributed in Europe, including England. It is deciduous, has deeply-lobed leaves and bears masses of cream-white flowers in corymbs in May. The fruit, sometimes called "Chequers," on account of the corky warts on its surface, is acid but edible when retted (allowed to become over-ripe) like the medlar. It is sometimes sold as "Sorbus" berries.

Servius Tullius, the legendary Rome, from 578 to 534 B.C., divided the Roman territory into 30 tribes, and the people into 5 classes, which were further divided into centuries.

Sesame (*Sesamum*), a genus of 15 plants of the order Pedaliaceae, found in tropical Africa and Asia. One species, *Sesamum indicum*, is cultivated in India and other Eastern lands for the sake of the seeds, which are crushed and an oil extracted, used for making oil cake and soap, in cookery, and as a lubricant.

Sesostris, a legendary monarch of Egypt, alleged to have achieved universal empire in a very remote antiquity, and to have executed a variety of public works by means of the captives he brought home from his conquests, which extended to India; his story may be a reminiscence of Ramesses II.

Session, **Court of the Supreme Civil**, Court of Scotland. It is composed of an Outer House in which sit eight Lords Ordinary of co-ordinate jurisdiction, and an Inner House comprising two divisions of four judges each. The President of the First Division is the Lord President; the Lord Justice Clerk presides over the Second Division. These two Divisions are mainly appellate tribunals, but have original jurisdiction in bankruptcy, lunacy cases, and Common lands. The Court has no criminal jurisdiction.

Sessions, See **Justice of the Peace**; **Petty Sessions**; **Sessions**; **Quarter Sessions**.

Sestertius, a Roman coin, either fourth of a denarius, originally worth 2½ asses but afterwards 4 asses; up to the time of Augustus was worth fully 2d., and subsequently one-eighth less. The *Sestertium*, a Roman "money of account," never a coin, equalled 1,000 sestertii, and was valued at about 25 15s.

Setter, a gun-dog of the spaniel family, trained to assist in the taking

SETTER

of game, being taught to crouch when game is perceived. Of the various types the English Setter is perhaps the best known; in colour it is usually black and white, or liver and white. It is easily trained and good-tempered. Other varieties include the Irish or Red Setter, the Russian Setter, Gordon or black-and-tan Setter.

Settle, **Elkanah**, English playwright, immortalized in the pages of Dryden's satire *Abraham and Achitophel*; enjoyed a brief season of popularity as author of *Cambyzes* and *The Empress of Morocco*; degenerated into a "city poet and a puppet-show keeper," and died in the Charterhouse; was the object of Dryden's and Pope's scathing sarcasms. He was the "Doog" of John Dryden's poem *Abraham and Achitophel*. (1648-1724).

Settlement, in English law, a transfer of real or personal property to trustees to hold for the benefit of persons in succession. A settlement may be made either by deed *inter vivos* or by will. A marriage settlement provides not only for the intended spouses and their issue, but also for other members of the family in whom the property to be settled is also vested. A settlement may also be made by a separation deed, to provide for a spouse and children where the spouses have agreed to separate. Where the settler settles property of any description without receiving adequate consideration the settlement is a "voluntary settlement," and if the settler becomes bankrupt within two years of the date of the settlement it will be void and the property will be available for the settler's creditors.

Settlement, Act of, passed by Parliament in 1701, settled the crowns of England, Scotland, and Ireland on the Electress Sophia of Hanover and her heirs. The Act was designed to prevent the crown reverting to the Stuarts, and also stipulated that kings of England must be members of the established Church. The claim of the present Royal Family to the British throne traces back to this Act.

Seurat, **Georges Pierre**, French painter, born and died at Paris; one of the early "pointillistes," a style manifested in his "Uno dimanche d'Été à la Grande Jatte," 1886. He also painted landscapes of Normandy and Asnières. (1859-1891).

Seven Champions of Christendom, are, traditionally, St. George, of England; St. Denis, of France; St. James, of Spain; St. Anthony, of Italy; St. Andrew, of Scotland; St. Patrick, of Ireland; and St. David, of Wales.

Seven Deadly Sins, Pride, Envy, Lust, Gluttony, Avarice, and Sloth.

Seven Dolours of the Virgin

Mary, the predilection of Simeon (Luke II., 35); the flight into Egypt; the loss of the child Jesus in Jerusalem; the sight of her Son bearing the cross; the sight of Him upon the cross; the descent from the cross; and the entombment.

Sevenoaks, town and urban district of Kent, England, 20 m. from London. Near the town is Knole Park, the seat of the Backville-West family, one of England's most famous country houses. Pop. 12,400.

Seven Sages of Greece,

Solon of Athens, his motto "Know thyself"; Chilo of Sparta, his motto "Consider the end"; Thales of Miletus, his motto "Whoso hateth suretyship is sure"; Bias of Priene, his motto "Most men are bad"; Cleobulus of Lindos, his motto "Avoid extremes"; Pittacus of Mitylene, his motto "Seize Time by the forelock"; Perander of Corinth, his motto "Nothing is impossible to industry."

Seven Weeks' War,

the conflict in 1866 between Prussia and Austria, the former having Italy as ally, for the hegemony of the German Confederation. Its pretext was a quarrel over the possession of the Schleswig-Holstein duchies. The victory lay with Prussia. Out of this combat grew the reputations of Bismarck and von Moltke, as statesman and general, respectively. The Austrians were heavily defeated by Moltke at Sadowa, but the Italian fleet was severely beaten at Lissa by the Austrian Admiral Tegethoff. The Prussians won further battles at Kissingen and Falkenstein, after which an Armistice was signed. One result of the war was the union of Lombardy and Venetia, previously Austrian possessions, with Italy.

Seven Wonders of the

World, according to the traditional enumeration, were the pyramids of Egypt, the hanging gardens of Babylon, the tomb of Mausolus, the temple of Diana at Ephesus, the Colossus of Rhodes, the statue of Jupiter by Phidias at Olympia, and the Pharos at Alexandria.

Seven Years' War,

the name given to the third and most terrible struggle between Frederick the Great of Prussia and Maria Theresa, Empress of Austria, for the possession of Silesia, which embroiled almost all Europe in war, and had far-reaching effects on the destinies of England and France as well as Prussia; began in 1756 by Frederick's successful advance on Dresden, anticipating Maria Theresa's intention of attempting the recovery of Silesia, lost to her in the previous two wars. With Austria were allied France, Sweden, Poland, and Russia, while Prussia was supported till 1761 by England. In 1762 Peter III. of Russia changed sides, and Frederick, sometimes victorious, often defeated, finally emerged successful in 1763, when the war was brought to a close by the Peace of Hubertsburg. Besides demonstrating the strength and genius of Frederick and raising immensely the prestige of Prussia, it enabled England to make complete her pre-eminence in N. America and to establish herself securely in India, while at the same time it gave the death-blow to French hopes of a colonial empire in those lands.

Severn, the second river of England, rises on the E. side of Plinlimmon, in Montgomeryshire, and flows in a circuitous southerly direction through Montgomeryshire, Shropshire, Worcestershire, and Gloucestershire, falling into the Bristol Channel after a course of 210 m.; is navigable to Welshpool (180 m.); chief tributaries are the Wye and the Stratford Avon; there is a "bore" perceptible 180 m. from the mouth. Many important towns stand on its banks.

Severus, Lucius Septimius, Roman emperor, peror, born at Leptis Magna, in Africa; the only African to attain to the imperial throne; was in command in Pannonia, and elected emperor on the murder of Pertinax, and after conquering his rivals achieved victories in the East, especially against the Parthians; thereafter subdued a rebellion in Britain and secured S. Britain against invasions from the N. by a wall; died at York. (146-211).

Severus, (Marcus Aurelius) Alexander, Roman Emperor from A.D. 222; born at Arca Cesarea, Palestine; the cousin and adopted heir of Heliogabalus, whom he succeeded. He fought against Artaxerxes IV. of Persia in Mesopotamia, and claimed to have defeated him. He was killed with his mother near Mainz, by conspiracy of Maximinus, who succeeded him. (205-235).

Sévigné, Marquise de, before her marriage Marie de Rabutin - Chantal, writer of a famous series of letters, born at Paris; married at 18 the dissolute Marquis de Sévigné, who left her a widow at 25; thereafter she devoted herself to her son and daughter, and the social intercourse of a wide circle of friends. Her letters, written chiefly to her daughter in Provence, contain the outpourings of her heart in language of unstudied grace. (1626-1696).

Seville (Sevilla), Spanish city and river port on the Guadalquivir, 62 m. NE. of Cadix, capital of the province of the same name (Pop. 850,000). Many of the old picturesque Moorish buildings have given place to modern and more commodious structures. The great Gothic cathedral (15th Century), containing paintings by Murillo, is among the finest in Europe; the Moorish royal palace, the great Roman aqueduct (in use until 1883), the museum, with masterpieces of Murillo and Velazquez, the university, archbishop's palace, Giralda campanile, and the vast bull-ring, are noteworthy. Manufactures embrace cigars, machinery, pottery, and textiles; while lead, iron ore, quicksilver, wines, olive-oil, and fruits are exported. Pop. 238,700.

Sèvres, French town on the Seine, 10½ m. SW. of Paris, celebrated for its fine porcelain ware (especially vases), the manufacture of which has been a State industry since 1755; has a school of mosaic work and museums for pottery ware of all ages and countries. Pop. c. 15,000.

Sèvres, Deux-, a dept. of W. France; is watered by two rivers, and in the N. thickly wooded; a varied agriculture, cattle and mule breeding, and cloth manufacture are the principal industries; coal and granite are produced. Niort is the capital. Area, 2,340 sq. m. Pop. 308,800.

Sewage, Disposal of. An adequate sewage system must carry off all waste organic matter from populous areas as well as deleterious inorganic waste from factories; and the drains and sewers must be so arranged as to ensure an even flow from all points of the collecting area. Ventilation and the isolation of noxious gases need also to be provided for. Purification or decolorization is essential before town sewage can be discharged into streams or rivers. Before this process the sewage is "screened," i.e., passed through a rack and then into a decritus tank for the removal of heavy inorganic matter or grit. Purification may be effected by chemical precipitation, filtration, or bio-aeration. The application of chlorine is also usual. The disposal of sewage along a coast is often effected by leading out a channel to deep water well beyond low tide.

Seward, Anna, English poetess, born at Hyam, Derbyshire, but from the age of seven spent her life at Lichfield, where her father was residential canon; author of *Louisa*, a novel in poetry, *Sonnets*, and other poems. (1747-1809).

Seward, William Henry, American statesman, born at Florida, New York State; was called to the bar at Utica in 1822, and became one of the finest forensic orators of his country; engaged actively in the politics of his State, of which he was governor in 1838 and 1840; entered the U.S. Senate in 1849 as an abolitionist, becoming soon the recognized leader of the

Anti-Slavery party; served under Lincoln as Secretary of State, conducting the foreign affairs of the country during the Civil War and up to the accession of President Grant in 1869; spent his closing years in travel and retirement. (1801-1873).

Sewell, Anna, English authoress, remembered for a single children's book, *Black Beauty*, the life-story of a horse, published in 1877. (1820-1878).

Sewing Machine, an automatic device for sewing, invented in 1840 by an American, Elias Howe, though crude machines for the same purpose had been tried some years earlier in England. The Singer machine, with vertical needle, came in 1851. Machines of various patterns are now made for special operations, such as button-holing, carpet manufacture, shoe-making, glove manufacture and other kinds of leather sewing; and modern domestic machines frequently have attachments for quilting, pleating and other special operations.

Sex, the function by which most animal, and plant species are perpetuated, as a result of the fusion of two nuclei from separate individuals. It is present in some form in all but the lowest organisms (see **Reproduction**). In lower plants (algae, etc.) the female ejects ova and the male sperms into the water; in most flowering plants the pollen from the male anther is carried to the pistil, whence it is conveyed to the female reproductive organs either by wind or by insects, methods which involve considerable waste. In the animal world there is gradual organization and adaptation both of the actual reproductive organs and of the whole organism, to eliminate waste and secure fertilization, thus giving rise to marked differences in the sexes, of both primary and secondary character. The study of sex as a human function has greatly developed in the late 19th and 20th Centuries, largely under the impulse given by the Freudian school of psycho-analysts, who see almost all forms of human activity as sublimations of the sexual instinct. It has been recognized in consequence of their work that the characters of both sexes are in some degree present in every individual, and that human beings may exhibit almost every shade of gradation between the perfect male and the perfect female.

Sexagesima Sunday, the second Sunday before the beginning of Lent.

Sextant, an instrument used in navigation and in land-surveying for measuring the altitudes of celestial bodies and their angular distances; consists of a graduated brass sector, the sixth part of a circle, and an arrangement of two small mirrors and telescope; invented in 1730 by John Hadley.

Sexton, a church lay officer whose duties include the digging of graves and frequently the care, cleaning, etc., of the church building.

Seychelles, a group of some 30 islands, largest Mahé (55 sq. m.), situated in the Indian Ocean, 600 m. N.E. of Madagascar; taken from the French by Britain in 1794, and until 1897 under the governor of Mauritius, but now a separate Crown colony; are mountainous and mostly surrounded by coral reefs; produce coconuts, essential oils and phosphates; Victoria, in Mahé, is the chief town. Pop. 30,600.

SEXTANT

Seymour, Jane, third queen of Henry VIII., married 1536, was daughter of Sir John Seymour, of Wolf Hall, Savernake, Wiltshire, and sister of the Protector Somerset. She was a lady-in-waiting to both Katherine of Aragon and Anne Boleyn, and deliberately contributed to the latter's downfall. She died soon after giving birth to the future Edward VI. (c. 1509-1537).

Sforza, an Italian family celebrated during the 15th and 16th Centuries, founded by a military adventurer, a peasant of the name of Muzia Allendolo, who received the name. They became dukes of Milan, and began by hiring their services in war, in which they were always victorious, to the highest bidder, the first of the number to attain that rank being Francesco Sforza, the son of the founder, in 1450 (1401-1466), the last of the series being another Francesco (1492-1535).

's Gravenhage. See Hague, The.

Shackleton, Sir Ernest Henry, British explorer; born in Ireland, he joined the mercantile marine, and in 1900 served under Scott in the *Discovery* Antarctic expedition. From 1907 to 1909 and from 1914 to 1917 he was again in the Antarctic, and in 1922 died at sea while in command of a third expedition on board the *Quest*. (1874-1922).

Shad, the common name of several species of sea-fish of the order Clupeidae. They are found in Atlantic waters, swim in small companies and ascend rivers at spawning time. Two British species are Allis Shad (*Alosa Alosa*) and Twaite Shad (*Alosa Finta*). They are reputed to thrash the surface of the sea with their tails, and it is claimed that under fair conditions the noise can be heard some distance away.

Shaddock. See Grapefruit.

Shadwell, Thomas, English dramatist, law and adopted literature, in which he made a successful start with the comedy *The Sullen Lovers* (1668); his numerous plays, chiefly comedies, are of little poetic value, but serve as useful commentaries on the Restoration period; quarrelled with and satirized Dryden in the *Meditation of John Boyes*, which drew forth the presentation of him as MacFlecknoe in Dryden's *Abraham and Achitophel*; succeeded Dryden as poet-laureate in 1688. (1640-1692).

Shaft, that part of a machine to which motion is communicated by torsion, as the screwshaft of a steam vessel or the crank-axle of a locomotive. In mining, a perpendicular or slightly inclined pit, sunk by blasting or digging, and in soft ground, lined by "cribbing." The shaft pipe of a ship is the pipe in the stern through which the propeller-shaft passes in-board. The "shafting" in a machine-shop is the system of shafts for transmitting power to the different machines, for which function it is provided with belts and drums. These shafts may be either horizontal or vertical.

Shaftesbury, town and borough of the Wiltshire border, 102 m. from London. The town is famous for its Benedictine nunnery founded by Alfred the Great A.D. 888. King Canute died here 1035. The chief trade of the town is in agricultural and dairy produce. Pop. 2,806.

Shaftesbury, Anthony Ashley Cooper, politician, first Earl of, British politician, born in Dorsetshire; sat in the Short Parliament of 1640; changed from the Royalist to the Parliamentary side during the Civil War, and was a member of Cromwell's Council of State, but latterly attacked the

Protector's Government, and was one of the chief promoters of the Restoration; Chancellor of the Exchequer in 1661, and later a member of the "Cabal"; in 1672 he was created an earl and Lord Chancellor, but, hoodwinked by Charles in the secret treaty of Dover, went over to the Opposition, lost his chancellorship, supported an anti-Catholic policy, leagued himself with the Country Party, and intrigued with the Prince of Orange; came into power again, after the "Popish Plot," as the champion of toleration and Protestantism, became President of the Council, and passed the Habeas Corpus Act. His virulent attacks on James and espousal of Monmouth's cause brought about his arrest on a charge of high treason (1681), and although acquitted he deemed it expedient to flee to Holland, where he died. He is the *Achilles* of Dryden's great satire. (1621-1683).

Shaftesbury, Anthony Ashley Cooper, third Earl of, grandson of the preceding, English philosopher, born in London; entered Parliament in 1694, moving to the Upper House on the death of his father in 1699, where he gave steady support to William III.; withdrew from politics on the accession of Anne, and followed his bent for literature and philosophy. In 1711 his collected writings appeared under the title *Characteristics*, in which he expounds a somewhat uncritical optimism, enunciating the doubtful maxim that ridicule is the test of truth. (1671-1713).

Shaftesbury, Anthony Ashley Cooper, seventh Earl of, Eng-

lish statesman and philanthropist, born in London; entered Parliament as a Conservative in 1826, took office under Wellington in 1828, and was a lord of the Admiralty in Peel's ministry of 1834; succeeded to the earldom in 1851. His reputation lives by reason of his life-long philanthropy, which took shape in numerous Acts of Parliament, such as the Mines and Collieries Act (1842), excluding women and boys under 13 from mine work; the Better Treatment of Lunatics Act (1845), called the Magna Charta of the insane; the Factory Acts (1867); and the Workshop Regulation Act (1878); while outside Parliament he worked with rare devotion on behalf of benevolent and religious schemes of all sorts, notably the Ragged School movement and the better housing of the London poor. (1801-1885).

Shagreen, obtained from the leather of sharks and other fish; imitations are made from the skin of horses, camels, etc., in which the granulated appearance of real shagreen is imitated by pressing seeds into the wet skin. It is usually dyed green, and is used in the manufacture of luxury articles; it is also employed by cabinet-makers for polishing wood.

Shah (Pers. "King"), an abbreviation of Shah-in-Shah ("King of Kings"), the title by which the monarchs of Iran (Persia) are known; it has also been used in Afghanistan and other Asiatic countries and by the rulers of the Mogul empire in India. It was revived in Iran by Reza Khan Pahlavi in 1925.

Shah-Jehan ("King of the World"), fifth of the Mogul emperors of India; succeeded his father in 1627; a man of great administrative ability and a skilled warrior; conquered the Deccan and the kingdom of Golconda, and generally raised

the Mogul Empire to its zenith. The greatest monument of his reign is the famous Taj Mahal, erected by the emperor as a tomb for his favourite wife. (1592-1666).

Shakers, a fanatical sect founded in England in 1774 by one Ann Lee, so called from their extravagant gestures in worship; they were celibates and communists. They have disappeared in Gt. Britain, but still exist in the U.S.A.

Shakespeare, William, English poet and dramatist, born

at Stratford-on-Avon, Warwickshire; his father, John Shakespeare, a respected burgess of Stratford; his mother, Mary Arden, the daughter of a well-to-do farmer, through whom the family acquired some property; was at school at Stratford, married Anne Hathaway, a yeoman's daughter, at 18, she being eight years older, and had by her three daughters; left for

WILLIAM SHAKESPEARE

London somewhere between 1585 and 1587, in consequence, it is said, of a deer-stealing frolic on the estate of Sir Thomas Lucy of Charlecote; is said to have taken charge of horses at the theatre door, and later on to have become an actor. His first poetical work, *Venus and Adonis*, appeared in 1593, and *Lucrece* the year after; became connected with various theatres, in some of which he bought shares and acted, thus earning enough to buy a house in his native place, where he chiefly resided for ten years before his death.

Of the poet's further history we know but a few facts; there is record of his having bought land near Stratford in 1602; a year later he figured in Burbage's company at the Blackfriars Theatre, London; there is record, too, of actions brought by him against certain people, mostly for debts; in 1613 he was purchasing more property in London; in 1616 he appended his signature to his will, dying about a month later from, it is alleged, the results of over-indulgence at a convivial meeting with Ben Jonson and Drayton. He was buried in the church at Stratford.

As a poet Shakespeare's fame rests on his *Sonnets* (1609), and the many lyrics found in his plays, in addition to the poems mentioned above. Shakespeare's plays, with the order of their publication, are as follows: *Love's Labour's Lost*, 1590; *Comedy of Errors*, 1591; 1, 2, 3 *Henry VI.* 1590-1592; *Two Gentlemen of Verona*, 1592-1593; *A Midsummer Night's Dream*, 1593-1594; *Richard III.*, 1593; *Romeo and Juliet*, 1591-1596 (?); *Richard II.*, 1594; *King John*, 1595; *Merchant of Venice*, 1596; 1 and 2 *Henry IV.* 1597-1598; *Henry V.* 1599; *Taming of the Shrew*, 1597 (?); *Merry Wives of Windsor*, 1598; *Much Ado about Nothing*, 1598; *As You Like It*, 1599; *Twelfth Night*, 1600-1601; *Julius Caesar*, 1601; *All's Well that Ends Well*, 1601-1602 (?); *Hamlet*, 1602; *Measure for Measure*, 1603; *Troilus and Cressida*, 1603-1607 (?); *Othello*, 1604; *Lea*, 1605; *Macbeth*, 1606; *Antony and Cleopatra*, 1607; *Coriolanus*, 1608; *Timon of Athens*, 1608; *Pericles*, 1608; *Cymbeline*, 1608; *Tempest*, 1610; *Winter's Tale*, 1610-1611; *Henry VIII.*, 1612-1613. (1564-1616).

Shale, name given by geologists to clay which has been hardened and possesses a fissile structure.

Shallot, or *Echalot*, (*Allium ascalonicum*), a bulbous-rooted plant of the Liliaceae order, closely resembling garlic, native to Palestine. It is used as a seasoning in cookery and for pickling.

SEVENTH EARL OF SHAFTESBURY

Shamanism, a name given to the races of northern Central Asia, consisting essentially in a belief in spirits, both good and evil, who can be persuaded to bless or curse by the incantations of a priest called a Shaman.

Shamrock, a small trefoil plant, the national emblem of Ireland; the plant to which the name is now generally applied is either the *Trifolium repens*, the *Trifolium minus*, or the wood-sorrel.

Shanghai, the chief commercial city and port of China, on the Wu-Sung R., an affluent of the Yang-tse-kiang, 12 m. from the coast, and 160 m. SE. of Nanking; large, densely peopled suburbs have grown round the closely packed and walled city, with its narrow, unclean streets; the so-called "International Settlement" occupies the area N. of the Chinese city. The low-lying site exposes the city to great heat in the summer, and to frequent epidemics of cholera and fever. An extensive system of canals draws down a great part of the interior produce, and swells the export trade in tea, silk, cotton, rice and sugar. In 1927 a British force was sent to Shanghai to protect British interests during the Chinese civil hostilities then in progress, and troops have since remained there. In 1938 the Chinese city was in Japanese occupation. Pop. 3,490,000 (including International Settlement, 1,008,000, and the French concession, 497,000).

SHAMROCK
(*T. minus*)

Shanklin, watering-place in the Isle NE. of Ventnor, with mineral springs and a famous chine. Pop. 25,000.

Shannon, the largest river of Ireland, rises in the Cullcagh Mountains, Co. Cavan; flows in a south-westerly direction through Loughs Allen, Ree and Derg, besides forming several lough expansions to Limerick, whence it turns due W., and opens out on the Atlantic in a wide estuary between Kerry (S.) and Clare (N.); has an entire course of 254 m. and is navigable to Lough Allen, a distance of 213 m. The dam at Ardarausha, near Limerick, with the generating station attached, supplies electric power to almost the whole of Eire.

Shannon, **Charles Hazlewood**, English painter and etcher, born at Sleaford. He first exhibited 1885; in 1897 he exhibited "Man in Black Shirt" (himself) at Royal Society of Portrait Painters, and "Souvenirs of Van Dyck" at New English Art Club. "The Embroidered Shawl" is a well-known later picture. R.A., 1921. (1863-1937).

Shannon, **Sir James Jebusa**, painter, born at Auburn, New York State; after settling in England in 1878 became famous for his portraits, of which those of the Marchioness of Granby and Lady Henry Bentinck are best known; his "Flower Girl" was purchased under the Chantrey bequest. He became a Royal Academician in 1908. (1862-1923).

Shans, or **Lao**, a Mongol people, descendants of aborigines of China, forming several large tribes scattered round the frontiers of Burma, Siam, and South China, whose territory, roughly speaking, extends N. as far as the Yunnan Plateau of South China; some are independent, but the bulk of the tribes are subject to Siam, China, and the British in Burma. The so-called **Shan States** are a portion of Burma (area, 62,340 sq. m.) but are subject to a special administration. Pop. 1,500,000.

Shan-si, inland province of northern China, extremely rich in coal and iron; wheat is grown. Capital Yangchu. Area, 80,500 sq. m. Pop. 11,600,000.

Shan-tung, mountainous coastal province of China, on the Yellow (Hwang-ho) R., to the N. of the Yellow Sea. Wheat and millet are grown; it is one of the most densely populated areas of the country. Capital Tsi-nan. Area, 69,200 sq. m. Pop. 38,000,000.

Shark, general name for the fishes of the order *Pleurostomata*, containing

many species both extinct and still living. They are generally bluish-grey in colour, with a crescentic mouth placed on the under side of the head. The

BLUE SHARK

The internal skeleton is cartilaginous. Their distribution is world-wide, among the found in British waters being the Corbeagle (*Lamna cornubica*) and the Thresher (*Alopias vulpes*). The Whale Shark (*Rhineodon*) is the largest existing shark. It is found in tropical waters, and may attain a length of 50 ft. The Basking Shark (q.v.) (*Cetorhinus maximus*) is another large species found on British shores. Shark fins are used by the Chinese in cooking, and the skin makes a leather of high quality. The Great Blue Shark or "Man-eater," which grows to a length of 40 ft. and which normally feeds chiefly on fish, is another visitor to British waters detested for the damage it does to fishing and to nets.

Sharp, a musical sign (#) denoting that the note to which it is prefixed is raised a semi-tone in pitch.

Sharp, **Cecil James**, English musician and expert in folksong and folk-dance, born in London. For a time he was Associate to the Chief Justice of South Australia. From 1899 he began the collection and preservation of folk melodies and dances, many of which he arranged and published. During the World War he was engaged on similar work in the Appalachians. (1859-1924).

Sharp, **James**, Scottish ecclesiastic, born in Banff Castle; in 1643 was appointed "regent" or professor of philosophy at St. Andrews, a post he resigned five years later to become minister of Crail. During the Protectorate he pleaded the cause of the Scottish moderate party before Cromwell in London; in 1660 intrigued with Charles at Breda, and with Clarendon and the magnates of the English Church to restore Prelacy in Scotland, he himself being appointed archbishop of St. Andrews. In 1668 his life was attempted in Edinburgh by a Covenanting preacher, and ultimately on Magnus Muir, May, 1679, he was mercilessly hacked to pieces by a band of Covenanters. (1613-1679.)

Sharp, **William**, Scottish poet and man of letters, born at Paisley; under his own name wrote many volumes of verse, biography, and criticism; from 1894 published many stories, poems, and dramas under the pseudonym of "Flona Macleod," among these being *Pharais*, *The Sin-eater*, *The Washer of the Ford*, *The Divine Adventure*, *The Immortal Hour*, afterwards used as the libretto for an opera by Rutland Boughton, and *Deirdre*. (1855-1905.)

Shaw, **George Bernard**, British author. The son of a civil servant, he was born at Dublin and educated there. At 16 he was placed in a land agent's office, but four years later he threw up his job and came to London, and after desultory attempts to enter business he began writing; by 1883 had written five novels, but had had none of them

published, and was earning money chiefly as a musician and artist. In 1892 *Widowers' Houses*, his first play, appeared. Meanwhile he had joined the Fabian Society, and thrown himself actively into Socialist work.

By the early years of this century he had produced *Arms and the Man*, *Mrs. Warren's Profession*, *The Doctor's Dilemma*, *John Bull's Other Island*, and a number of other plays, but his reputation for a long while rested with a small public. It was after the World War that *Saint Joan* established his popularity with the wider public and made his plays commercial successes. In 1929 came *The Apple Cart*, a political satire on democracy. Besides some 40 plays Shaw has produced novels, essays such as *The Quintessence of Ibsenism*, and political books like *The Common Sense of Municipal Trading*, and *The Intelligent Woman's Guide to Socialism*. His plays *Man and Superman* and *Back to Methuselah* contain most of his gospel, which is belief in a life-force working through creative evolution, from which it follows that man must aim at producing something better than the human race as we know it, and must be rid of all sentiment. (1856-).

Shaw, Thomas, English Labour politician, born at Colne, Lancashire. In his childhood he worked in a cotton mill, and in 1911 became Secretary to the International Congress of Textile Workers. From 1918 to 1931 he was M.P. for Preston, and served as Minister of Labour in 1924 and Secretary for War, 1929-1931. He was joint secretary of the Labour and Socialist International, 1923-1925. (1872-1938).

Shawm, a musical instrument of the wood-wind class, popular in Europe from the 12th to the 16th Century. Like the oboe, which superseded it, it had a double reed, but was of wider bore.

Shawnees, a tribe of American Indians of the Algonquin family, located originally in the eastern slopes of the Alleghenies, but now removed to Missouri, Kansas, and Oklahoma.

Shear, a term in mechanics for the strain the stress, is so exerted on the surface that its component layers tend to slide sideways. The shear strain on a body is proportional to the stress, and can therefore be calculated.

Shearwater, the common name of the genus *Puffinus* of the petrel (Procellariidae) family, the name being derived from their manner of skimming over the water so as just to touch its surface. The Manx shearwater (*Puffinus puffinus*), the great shearwater (*Puffinus gravis*), and the sooty shearwater (*Puffinus griseus*) are all found at times off the British coasts; the first, a black bird with white underparts, breeds in the Scillies and other British Islands.

Sheathbill (Chionidiidae), a family of S. American birds, including only three known species, having a horny sheath at the base of the bill, bare cheeks and wings armed with spurs. They are found on the islands of the south of the continent, the commonest of the three being the *Chiono alba* with white plumage and the *Chionarchus minor* with wattles on its cheeks, and in different ways resembling both the pigeon and the ptarmigan.

Sheba, probably a region in S. Arabia, along the shore of the Red Sea; the Queen of Sheba is recorded in the Old Testament as having visited King Solomon. The imperial dynasty of Abyssinia claimed descent from her.

Shechem, ancient city of Palestine near Mount Gerizim. Its site is occupied by the modern city of Nablus. The city played a very prominent part in Biblical history.

Shee, Sir Martin Archer, P.R.A., British artist, born in Dublin, came to London in 1788, and, through a rich uncle, obtained footing in artistic circles. A trustworthy portrait painter, he also wrote two novels and a banned play. Elected to the Royal Academy in 1800, he succeeded Lawrence as its President. (1769-1850).

Sheep, a ruminant mammal (genus *Ovis*) of the family of Ungulates, or hoofed mammals. There are various closely-related species of wild sheep, mostly found in northern Europe and Asia, generally inhabiting open mountainous country, and distinguished by their massive horns, hairy coats and large size. Examples of these are the N. American "bighorn," the Mongolian argali, the wild sheep (*Ovis poli*) of Central Asia, and the mouflon, found chiefly in Sardinia and Corsica. The domestic sheep is of smaller size, has shorter horns, a woolly coat and longer tail than the wild breeds. Among British breeds are the Shetland, characterized by its very soft fleece intermixed with hair, the Welsh and Irish, which produce excellent meat, the Southdown, which has most flesh in proportion to its size, and the Leicester long-woolled breed.

Sheep-dog, a domestic dog trained from its first year to tend

and round up sheep. The breed known as the Old English sheepdog is similar in build to a low greyhound, but with thick, shaggy hair, grey, black or brown in colour. The legs and feet are strongly built to withstand constant exercise. Other breeds used for sheep-tending are the Scotch and Welsh collies.

SHEEP DOG.

Sheepshead, a species of fish of the Sparidae (sea-bream) family, akin to perch and cod. It is found in N. American waters, and is one of the best salt-water fish of the U.S.A. Its name arises from a fancied resemblance to the sheep in the shape of the head and the dentition.

Sheerness, a seaport, pleasure resort, and important garrison town with dockyards and naval arsenal in Kent, England, occupying the N.W. corner of Sheppey Isle, where the Medway joins the Thames, 52 m. E. of London; the place of origin of the Mutiny of the Nore. The town is strongly fortified, and was attacked by German aircraft during the World War. Pop. 16,800.

Sheffield, city of Yorkshire, England, and chief centre of the English cutlery trade, built on hilly ground on the Don near its confluence with the Sheaf, whence its name, 41 m. E. of Manchester; is a well-built town, with notable churches, a fine modern City Hall, the well-known Mappin Art Gallery, and other public buildings; does a vast trade in all forms of steel, iron, and brass goods, as well as plated and britannia-metal articles; last century it greatly developed its manufactures of armour-plate, rails and other heavier goods. Its importance as a centre of cutlery dates from very early times, and the Cutlers' Company was founded there in 1624; it is the seat of a university, founded in 1905. Pop. 518,000.

Sheffield Plate, a type of silver-plated ware made first in 1743 at Sheffield by Thomas Boulsover, who discovered the method of plating by fusion; it was manufactured both in Sheffield and Birmingham till late in the 19th Century.

Sheikh, the chief of an Arab tribe; used often as a title of respect, Sheikh-ul-Islam being the ecclesiastical head of Mohammedans in Turkey, and the Sheikh-el-Gami of those in Egypt.

Shekel, among the ancient Hebrews originally a weight, and later the name of a gold or silver coin, its value varying with the price of the precious metals. Several kinds of shekel were in use; the average value may have been about 3s. (silver) and £2 (gold).

Shelburne, William Petty, Earl of, statesman, born in Dublin; succeeded to his father's title in 1761, a few weeks after his election to the House of Commons; held office in the ministries of Grenville (1763), of Chatham (1766), and of Rockingham (1782). His acceptance of the Premiership in 1782, after Rockingham's death, led to the resignation of Fox and the entry of William Pitt, at the age of 23, into the Cabinet; his short ministry (July, 1782, to February, 1783) saw the close of the Continental and American wars, and the concession of independence to the American colonies, collapsing shortly afterwards before the powerful coalition of Fox and North; in 1784, on his retirement from politics, was created Marquis of Lansdowne. He was a Free Trader, and a supporter of Catholic emancipation. (1737-1805).

Sheldon, Gilbert, English ecclesiastic, born at Ellarton, Derbyshire. He was ejected from his fellowship of All Souls, Oxford, in 1634, and imprisoned, but on the Restoration became Bishop of London in 1660, and Archbishop of Canterbury in 1663. In 1677 he became Chancellor of Oxford University; he was the builder and endower of the Sheldonian Theatre (q.v.). (1598-1677).

Sheldonian Theatre, the "Senate House" of Oxford, built by Wren and endowed by Archbishop Sheldon (q.v.). It was completed in 1669 and is used for University ceremonies and the conferment of degrees.

Shelduck, or Sheld Duck, the common name of a number of species of sea ducks of the genera *Tadorna* and *Casarca*. The common Shelduck (*Tadorna cornuta*) in many ways resembles a goose, is found on sandy coasts of Europe, N. Africa and various parts of Asia; it is rather larger than the ordinary duck, and has a red bill, dark green head and white collar, with black bars on the body and green wings. It is frequently kept in Britain on ornamental waters. The Ruddy Shelduck (*Casarca rubra*) is also a visitor to British shores, occasionally in great numbers. Its upper parts are orange-brown and its head buff.

Shell, the hard outer covering of many animals, particularly molluscs, e.g., snails, oysters, etc. It is a cuticular structure, generally containing calcium carbonate. The shell of turtles, tortoises, etc., is a modification of the skeletal system. The name is also given to the outer covering of the eggs of birds, in which also it consists mainly of carbonate of lime.

Shell, a hollow steel container, filled with high explosive, and adapted for discharge from a mortar or field gun. Spherical shells of cast-iron, filled with gunpowder, and fitted with a slow-burning composition which acted as a fuse, were used as early as 1600. The shell is usually made to explode upon striking its objective, but shells with time-fuses are also in use. Modern shells are cylindro-conical in shape; during and since the World War many new types, including smoke shells and gas shells, have been evolved.

Shellac, the refined form of stick-lac, insects on certain Eastern trees, especially the bayberry. It is used in making spirit varnishes, sealing wax, etc.

Shelley, Mary Wollstonecraft, English writer, daughter of William Godwin and Mary Wollstonecraft; became the wife of the poet Shelley in 1816 after a two years' illicit relationship; besides *Frankenstein* (1818), wrote several romances, *The Last Man*, *Lodore*, and *Falkner*, also *Rambles in Germany and Italy*; edited with valuable notes her husband's works. (1797-1851).

Shelley, Percy Bysshe, English poet, born at Field Place, near Horsham, Sussex, eldest son of Sir Timothy Shelley, a wealthy landed proprietor; was educated at Eton, and in 1810 went to Oxford, where his impatience of control and violent heterodoxy of opinion, characteristic of him throughout, burst forth in a pamphlet, *The Necessity of Atheism*, which led to his expulsion in 1811; henceforth led a restless, wandering life; married at 19 Harriet Westbrook, a girl of 16, from whom he was separated within three years; under the influence of William Godwin (q.v.) his revolutionary ideas of politics and society developed apace; engaged in quixotic political enterprises in Dublin, Lymouth, and elsewhere, and above all put to practical test Godwin's heterodox views on marriage by eloping (1814) to the Continent with his daughter Mary, whom he married two years later after the unhappy suicide of Harriet.

PERCY BYSSHE SHELLEY

In 1816, embittered by Lord Eldon's decision that he was unfit to be trusted with the care of Harriet's children, and with consumption threatening, he left England never to return; spent the few remaining years of his life in Italy, chiefly at Lucca, Florence, and Pisa, in friendly relations with Byron, Leigh Hunt, Trelawney, etc. During this time were written his greatest works, *Prometheus Unbound*, *The Cenci*, his noble lament on Keats, *Adonais*, besides other longer works, and most of his finest lyrics, *Ode to the West Wind*, *The Skylark*, etc.; was drowned while returning in an open sailing boat from Leghorn to his home on Spezia Bay. His ashes are interred at Rome. (1792-1822).

Shellfish, a term in common use to a hard external shell; it is incorrect, as such animals are not fishes, but mainly either crustaceans, such as the crab, lobster, shrimp and prawn, or molluscs, such as the "univalve" (single-shelled) whelk or the "bivalve" (double-shelled) oyster, mussel, etc.

Shell-shock, the name given to the symptoms found in many persons who have endured bombardment, etc., in war. These symptoms may be purely physical, but are more often nervous; among their very varied number are sleeplessness, loss of memory or speech, deafness, paralysis, etc. Psychotherapeutic treatment has been found successful in many cases.

Shenandoah, a river of Virginia, U.S.A., formed by two head-streams which unite 85 m. W. of Washington, and, flowing N.E. through the beautiful "Valley of Virginia," fall into the Potomac at Harper's Ferry, after a course of 170 m.; also the name of a town in Pennsylvania, 110 m. N.W. of Philadelphia; centre of an important coal district. Pop. 22,000.

Shen-si, Chinese province lying S. of the Great Wall, and bounded on the W. by the Yellow R. It is watered by the Weiho, and is mountainous in the S. It is rich in minerals, coal, iron, gold, etc., but they are little exploited. Chang-man is the capital. Area 72,380 sq. m. Pop. 9,718,000.

Shenstone, William, English poet, born at Halesowen, Worcestershire; during the years 1737-1742 produced three vols. of poetry, the most noted being *The Schoolmistress*. After 1745 he turned to landscape-gardening, which won him in his day a wider reputation than his poetry. His *Essays* have considerable critical merit and originality, while his poetry—ballads, odes, songs, etc.—has music and grace despite its conventional diction. (1714-1763).

Sheol, belief, the underworld of Hebrew departed spirits.

Shepherd Kings. See Hyksos.

Shepherd's Purse (*Capsella Bursa-pastoris*), a common English weed, self-fertilised, with two valved seed pouches and white flowers.

Sheppard, Hugh Richard Lawrie, English cleric, educated at Marlborough and Cambridge; became secretary to the Bishop of Stepney. In 1914 he served for a time as a chaplain in France, and the same year became vicar of St. Martin's-in-the-Fields, London, where he earned a nation-wide reputation for progressive methods. He resigned in 1927, was made a Companion of Honour, and in 1929 became dean of Canterbury. He was mainly responsible for the formation of the Peace Pledge Union, an organisation of pacifists pledged not to support or sanction future wars. (1883-1937).

Sheppard, Jack, English highwayman and criminal, born at Stepney, whose audacious robberies and daring escapes from Newgate Prison made him for a time the terror and talk of London; drew some 200,000 people to witness his execution at Tyburn; figures as the hero of a well-known novel by Harrison Ainsworth. (1702-1724).

Sheppey, Isle of, an islet in the estuary of the Thames, England, at the mouth of the Medway, belonging to Kent, from which it is separated by the Swale (spanned by a swing-bridge). Great clay cliffs rise on the N., and, like the rest of the island, are rich in interesting fossil remains. Corn is grown, and large flocks of sheep raised. Chief town is Sheerness (q.v.). The district is gradually diminishing before the encroaching sea.

Shepton Mallet, urban district and Somerset, England, 5 m. SE. of Wells. It has an old church and grammar school, and manufactures rope and beer. Pop. 4,100.

Sheraton, Thomas, English furniture-maker, born at Stockton, who has given his name to a style of design which superseded the work of Hepplewhite (q.v.) in popularity. His work is on more severe lines than that of his predecessor. (1751-1806).

Sherborne, town of Dorsetshire, England, pleasantly situated on rising ground overlooking the Yeo, 118 m. SW. of London; has one of the finest Perpendicular minsters in S. England, ruins of an Elizabethan castle, and King Edward's School, re-founded in 1550 and ranking among the best of English public schools. Pop. 6,500.

Sherbrooke, city of Quebec, Canada, S. of the St. Lawrence. It is an important industrial centre with large machine shops, cotton and woollen factories and sawmills. Pop. 31,000.

Sherbrooke, Robert Lowe, Viscount, English statesman, born at Bingham, Notts; in 1842 emigrated to

Australia; made his mark at the Sydney bar, taking at the same time an active part in the politics of the country; returned to England in 1850, and entered Parliament, holding office under Lord Aberdeen (1853) and Lord Palmerston (1855). He was included in the Liberal ministry of 1868 as Chancellor of the Exchequer, a post he held till 1873, when he became Home Secretary. A man of great intellectual force and independence of judgment. He was created a viscount in 1880. (1811-1892).

Sheridan, Philip Henry, American general, born, of Irish parentage, at Albany, New York; obtained a cadetship at West Point Military Academy, and entered the army as a second-lieutenant in 1853; served in Texas and during the Civil War; won rapid promotion by his great dash and skill as commander of a cavalry regiment; gained wide repute by his daring raids into the S.; cleared the Confederates out of the Shenandoah Valley in 1864, and by his famous ride (Oct. 19, 1864) from Winchester to Cedar Creek snatched victory out of defeat, routing the conjoined forces of Early and Lee; received the thanks of Congress, and was created major-general; took an active part under Grant in compelling the surrender of Lee, and in bringing the war to a close; subsequently was promoted to lieutenant-general; visited Europe in 1870 to witness the Franco-Prussian War, and in 1883 succeeded Sherman as general-in-chief of the American army. (1831-1888).

Sheridan, Richard Brinsley Butler, Irish dramatist and politician, born at Dublin; in 1773 settled down in London with his gifted young wife, Elizabeth Linley, the singer, and scored his first success with *The Rivals* in 1775, following it up with the *Duenna*; aided by his father-in-law became owner of Drury Lane Theatre, where his most brilliant satirical comedy, *The School for Scandal* (1777), and the *Critic*, set flowing the tide of prosperity. Turning his attention to politics he entered Parliament under Fox's patronage in 1780, and two years later became Under-Secretary for Foreign Affairs in Rockingham's ministry. His great speech (1787) impeaching Hastings for his treatment of the Begums placed him in the front rank of orators, but although he sat for 32 years in Parliament, only once again did he reach the same height of eloquence, in a speech (1794) supporting the French Revolution, and generally failed to establish himself as a reliable statesman. Meanwhile his theatrical venture had ended disastrously, and financial troubles thickened around him until his death. He was buried in Westminster Abbey. (1751-1816).

Sherif, or *Shereef*, a title of dignity, among Mohammedans of either sex, bestowed upon descendants of the Prophet through his daughter Fatima and her husband Ali. As a distinguishing badge women wear a green veil, and men a green turban.

Sheriff, in England the chief officer of the Crown in every county, appointed annually, and entrusted with the execution of the laws and the maintenance of peace and order, with power to summon the *posse comitatus*. The office originated in Anglo-Saxon times, when it exercised wide judicial functions which have been gradually curtailed, and such duties as remain—the execution of writs, attendance at executions, the summoning of juries, etc.—are mostly delegated to an under-sheriff and bailiffs, while the sheriff himself, generally a person of wealth (the office being unalaried and compulsory, but not necessarily for more than one year), discharges merely honorary duties.

Sheriffmuir, a barren spot stretching N. of the Ouhla, in Perthshire, Scotland, 6 m. N.E. of Stirling;

was the scene of an indecisive conflict between 2,000 Jacobites under the Earl of Mar and 3,500 Royalists under the Duke of Argyll, Nov. 13, 1716.

Sheringham, urban district and seaside resort of Norfolk, England, 4 m. W. of Cromer. There is a fishing industry, particularly for crabs. The coast in the neighbourhood is being steadily eroded by the sea. Pop. 4,200.

Sherman, William Tecumseh, American general, born at Lancaster, Ohio; first saw service as a lieutenant of artillery in the Indian frontier wars in Florida and California; resigned from the army in 1853, and set up as a banker in San Francisco, but at the outbreak of the Civil War accepted a colonelcy in the Federalist ranks; distinguished himself at the battles of Bull Run (1861) and Shiloh (1862); received promotion and, as second in command to Grant, rendered valuable service in reducing Vicksburg and Memphis; was present at the victory of Chattanooga, and during 1864 entered into command of the SW.; captured the stronghold of Atlanta, and after a famous march seaward with 65,000 men took Savannah, which he followed up with a series of victories in the Carolinas, receiving, on April 26, 1865, the surrender of General Johnston, which brought the war to a close; was created general and commander-in-chief of the army in 1869; published memoirs of his military life. (1820-1891).

Sheriff, Robert Cedric, English playwright, writer and novelist, born at Kingston-on-Thames. His service in the World War stood him in good stead in the construction of his very successful first play, *Journey's End*, produced in London in 1929, and followed the next year by *Badger's Green*. *Windfall* was produced in 1933. (1896-).

Sherrington, Sir Charles Scott, British physiologist at Liverpool, Royal Institution and Oxford; his most important work has been on the human nervous system; was president of the Royal Society and of the British Association in 1922, and was awarded the Order of Merit in 1924; in 1932 he shared a Nobel Prize. (1861-).

Sherry, a Spanish wine from the region surrounding Jerez de la Frontera. The grape-juice is twice fermented, the first time with an addition of sulphate of lime, the second with brandy. Sherries are very carefully blended before shipment. The fine dry varieties are Amontillado and Vino de Pasto, the full-bodied Golden Sherry, and the intermediate Oloroso and Amoroso.

's Hertogenbosch (*Bois-le-Duc*), capital of N. Brabant, in the Netherlands, 45 m. SE. of Amsterdam, with a fine cathedral. Pop. 46,800.

Sherwood Forest, once an extensive forest, the scene of Robin Hood's exploits, in Nottinghamshire, England, stretching some 25 m. between Worksop and Nottingham, and originally joining the great wooded area of Barnsdale in Yorkshire; now a hilly, disafforested tract occupied by country houses and private parks, several villages, and the town of Mansfield.

Shetland, or Zetland, a group of over 100 islands, islets, and skerries, of which 29 are inhabited, forming the northernmost county of Scotland, lying out in the Atlantic, NNE. of the Orkneys; Mainland (378 sq. m.), Yell, and Unst are the largest. The coastline is boldly precipitous and indented, while the scenery all over the islands is very grand. The soil is peaty, ill adapted to cultivation, but there is considerable rearing of stock, and the little native pony is well known; fishing is the

chief industry. Originally a Norse settlement the islands came under British rule on the marriage of James III. of Scotland to Margaret, princess of Norway, in 1469, the Orkney and Shetland Isles forming part of her dowry. Lerwick (q.v.) is the capital. Area, 550 sq. m. Pop. 21,500.

Shetland Pony, a small shaggy-coated horse,

brown or black in colour, indigenous to the Shetland Isles. It possesses marked agility and intelligence and is specially favoured as a mount for children.

Shibboleth,

a word by which the Gileadites distinguished an Ephraimite, from his inability to sound the *sh* in the word, and so discovered whether he was friend or foe (see Judges xii. 6); hence it has come to denote, in a derogatory sense, a party cry or watchword.

Shield, in heraldry, the escutcheon or field on which are placed the bearings or charges in coats-of-arms. Shields are of various forms; those for widows or single women are lozenge-shaped. The form most commonly used is heart-shaped, but with a straight top, and sometimes placed at an angle (couched). The use of shields to protect the body in warfare ceased soon after the introduction of firearms, but a trace of it remains in the steel screen attached to field-guns to protect the men serving them.

Shields, North, seaport of Northumberland, land, England, on the Tyne, near its mouth, 8 m. NE. of Newcastle-upon-Tyne, and forming part of the municipal borough of Tynemouth; the docks cover 80 acres, and a large export trade in coal is carried on. Pop. (Tynemouth) 66,800.

Shields, South, busy seaport and county borough in Durham, England, with a frontage of 2 m. on the south bank of the Tyne, 9 m. NE. of Newcastle-upon-Tyne, a place of residence from ancient times, with Roman remains; exports immense quantities of coal and coke; there are manufactures of chemicals and machinery, and a shipbuilding industry. Pop. 112,000.

Shigatse, city of Tibet, standing at an altitude of about 12,000 ft. It is the seat of the great monastery of Tashilhumpo, the residence of the Tashi Lama. Pop. 9,000.

Shiites, a sect of the Mohammedans, who reject the "Sunna" or traditions, championed the claims of Ali, Mohammed's cousin and son-in-law, to succeed to the Caliphate, and maintain the divine right of his descendants to represent the prophet in the Mohammedan Church. Shiism is the national religion of Iran, and is followed by a majority of the Moslems of Iraq.

Shikarpur, capital of a district in N. Sind, India, situated on rich alluvial ground, 18 m. W. of the Indus, and 330 m. N. of Karachi; formerly an important commercial entrepôt between India and Khorassan; the vicinity produces excellent grain crops, and carpets and cottons are manufactured in the town. Pop. 62,600.

Shikoku, one of the main islands of Japan, between Kiushiu and Honshu. Area, 7,250 sq. m. Pop. c. 3,500,000.

Shilling, a British silver coin equivalent in value to twelve pence, or one-twentieth of a pound; first became a current coin of the realm in the reign of Henry VII., and was the first English coin to bear the portrait of the sovereign. From

1825 onwards "lion" shillings were struck, bearing a lion crowned and standing on a crown. The coinage of George VI. in 1937 introduced for the first time two alternative designs for the coin, one bearing the Scottish royal monogram.

Shiloh, a village 20 m. N. of Jerusalem, the site of the resting-place of the Tabernacle on the settlement of the Jews in Canaan, and their religious centre before the establishment of the Temple at Jerusalem. **The Battle of Shiloh**, in the American Civil War, was fought near Pittsburg Landing, on the Tennessee R., in April, 1862, the Federal troops under Grant gaining a victory over the Confederates under Johnston.

Shimonoseki, seaport and commercial town of Japan, in Honshu, at the W. outlet of the Inland Sea. In 1864 it suffered bombardment by ships of the English, U.S., French and Dutch fleets. Pop. 133,000.

Shingles (*Herpes Zoster*), acute inflammation of the nerve ganglia in the spine; the symptoms are rise in temperature, pain in the side, and later a vesicular eruption in the region where the pain occurred. The disease has affinities with chicken-pox.

Shintoism, the native religion of Japan. It is a highly nationalistic creed, its chief outward manifestation being the payment of religious honour to the Mikado and the genius of the nation, combined with ancestor-worship. It has been considerably influenced by Confucianism and Buddhism, and is often held in conjunction with the latter. It is divided into about a dozen sects.

Shinty, an ancient Scottish game of hockey, played by teams of twelve players. The ball has a cork core bound with worsted and covered with leather. A club similar to a hockey-stick is used.

Ship Canals. The Suez Canal is 100 m. long and 31 ft. deep, the Kiel Canal is 61 m. long and 45 ft. deep, the Panama Canal is 50 m. long and 45 ft. deep, the Elbe and Trave Canal is 41 m. long and 10 ft. deep, the Manchester Canal is 35½ m. long and 26 ft. deep, and the Welland Canal, since its reconstruction, is 26½ m. long and 25 ft. deep. The widest is the Panama (q.v.); the Kiel is 150 ft. wide, the Suez is 147 ft. wide, and the Manchester 120 ft. The Amsterdam-North Sea Canal has a length of 15½ m. and a depth of 33 ft.

Shipley, town and urban district of the West Riding of Yorkshire, England, on the Aire, 3 m. N. of Bradford. Woollens and worsteds are manufactured. Pop. 36,700.

Ship-money, a tax levied by Charles I. in imitation of an old war-tax leviable on port-towns to furnish a navy in times of danger, but imposed by Charles in a time of peace, without consent of Parliament, upon inland as well as port-towns, provoking thereby widespread dissatisfaction. Hampden's refusal to pay, with the trial and decision in favour of Charles, contributed to bring about the Civil War, which cost Charles his life. The tax was declared illegal by the Long Parliament in 1640.

Shipping. Mercantile shipping includes all ships (cf. Mercantile Marine) engaged in the transport of goods or passengers, and subject to certain conditions all ships must be registered. A copy of the Board of Trade certificate must be posted in a conspicuous position on the ship. The

various Merchant Shipping Acts constitute a voluminous code of sea-law. The main matters dealt with are registration, tonnage, liability of owners, food, health, &c., of seamen, medical inspection, overloading, wrecks and salvage, lighthouses, &c. The leading shipping nations are the British Empire (20,800,000 tons); United States (12,430,000 tons); Japan (4,475,000 tons); Norway (4,348,000 tons); Germany (3,937,000 tons), and Italy (3,213,000 tons); and the biggest ships afloat arranged in order are, *Normandie* (French), 83,000 tons; *Queen Mary* (British), 81,000 tons; *Berengaria* (British), 52,100 tons; *Bremen* (German), 51,700 tons; *Rea* (Italy), 51,000 tons; *Europa* (German), 49,750 tons; *Leviathan* (U.S.A.), 49,000 tons.

Shipton, Mother, a probably legendary English prophetess of the reign of Henry VIII., whose preternatural knowledge revealed in her prophecies, published after her death, was ascribed to an alliance with the devil. Among her prophecies were the great Fire of London, invention of the steam engine and the electric telegraph.

Shiraz, city of Iran, occupying a charming site on an elevated plain, 165 m. N.E. of Bushire; founded in the 8th Century; was for long a centre of Persian culture, and a favourite resort of the royal princes. Its beauties are celebrated in the poems of Hafiz and Sadi, natives of the place. It is noted in the East for its wines, and also manufactures silks, carpets, rosewater, &c. Pop. 119,000.

Shire Horse, or English Black, a powerful but slow; of muscular build and with short strong legs. Modern breeds often have white-starred foreheads.

Shirley, James, English dramatist, born in London; entered the Church, but turning Catholic resigned, and after an attempt at teaching established himself in London as a playwright; wrote with great facility, producing upwards of thirty plays before the suppression of theatres in 1642; fell back on teaching as a means of livelihood, and with the revival of his plays shortly after the Restoration eked out a scanty income till his death in the Great Fire of London. Among his plays were *The Witty Fair One*, *The Wedding*, *The Lady of Pleasure*, *The Traitor*, *The Grateful Servant*, *Hyde Park*, *The Gamester*, and *The Cardinal*. (1596-1666).

Shittim Wood, a hard, close-grained acacia wood of an orange-brown colour found in the Arabian Desert, and employed in constructing the Jewish Tabernacle.

Shoa, the central part of the former kingdom of Abyssinia (q.v.) in the neighbourhood of Addis Ababa; was an independent country till its conquest by Theodore of Abyssinia in 1855; is traversed by the Blue Nile, and has a mixed population of Gallas and Abyssinians.

Shock, a sudden depression of the system produced by violent injury or strong mental emotion, which may amount in serious cases to complete prostration. In the state of collapse consequent upon shock the patient lies completely prostrate, the face pale and bloodless, the skin cold and clammy, and the features contracted and expressive of great languor. There is also extreme muscular debility and the pulse is frequently so weak as to be scarcely perceptible. Shock may occur in consequence of surgical operations, even when the patient is unconscious during their performance under an anæsthetic.

Shoddy, a textile material made up from cotton or woollen waste, or from pieces of old fabric intermixed with material.

JOHN
HAMPDEN

Shoeburyness, town in Essex, England, near Southend, of which it now forms part; it is an important station of the Royal Artillery.

Shogun, the former hereditary chief of the army in Japan, from the beginning of the 17th Century until 1868 the actual ruler of the country, the *de jure* ruler or Mikado being a merely nominal ruler. He was also known to Europeans by the name Tycoon.

Sholapur, city of Bombay Presidency, India, in a district of the name. 283 m. E. of Bombay; has cotton and silk manufactures. Pop. 144,700.

Shops Acts, Acts regulating the retail and other shops. An Act of 1904 empowered the local authority of any district with a population of over 20,000 to make closing orders fixing the hours at which all shops or those of a specified class were to be closed for serving customers. The Shops Act of 1912 introduced the obligatory half-holiday. This Act, which applies to wholesale shop and warehouse, as well as retail, shop assistants, restricts the weekly hours of assistants under 18 years of age to 74 hours including meal-times; shops employing females must provide seats for their female assistants; intervals for meals must be so arranged that no assistant may be employed for more than 6 hours without an interval of at least 20 minutes and, where the hours include those from 11 a.m. to 2.30 p.m., 1-hour must be allowed for dinner and, where they include those from 4 p.m. to 7 p.m., 1-hour for tea.

Shops must close at 1 p.m. on one day every week, but many trades and businesses are exempt from early closing provisions, including those for selling meat, fish, fruit, milk, tobacco, motor accessories, medical and surgical goods, etc. The Shops Act of 1928 makes the "general closing hour" 9 p.m. on "one late day" and 8 p.m. for every other day of the week; the late day must be Saturday unless the local authority decide otherwise; and if, under the Act of 1912, they have fixed any particular day as the half-holiday for any class of shop, they must choose some other day for the late day. Special exceptions may be made for shops in holiday resorts and in trades dealing in refreshments, tobacco, and certain perishable goods. Sunday closing, except in certain special areas inhabited largely by a Jewish population, is rendered compulsory for most shops by an Act of 1937.

Shop Stewards, workers in factories and industrial establishments who, on behalf of the Trades Unions they represent, act as leaders in industrial disputes, supervise the collection of subscriptions, report on working conditions to their Unions, and are responsible for the enlistment of new members. During the war-time truce in industry the shop-steward was the only vehicle of negotiation between employer and employee, and his status was therefore much improved during that time.

Shore, mistress of Edward IV., of Jane, was the wife of a London goldsmith till she was taken up by the King, through whom, till the close of the reign, she exercised great power; was ill-treated and persecuted by Richard III. for political purposes; subsequently lived under the patronage of Lord Hastings, and afterwards of the Marquis of Dorset, surviving till 1527; the story of her life has been made the subject of many ballads, plays, etc. (1445-1527).

Shoreditch, borough of E. London, adjoining the City, on the N.E. has varied manufactures, especially of Pop. 85,000.

Shoreham, port and holiday resort in Sussex, England, 5 m. W. of Brighton; has oyster and other fisheries and boat-building yards. In the neighbourhood is Lancing College, a well-known public school. Pop. 8,800.

Shoring, a method of preventing the subsidence of a wall or building. The simplest is to prop the wall with 3 or more timbers placed

SHORING

at varying angles against the wall and securely resting on the earth. Two buildings with facing walls at no great distance apart may have "flying" shores, i.e., timbers stretching at right angles from one wall to the other. This type of shoring is necessary when removing a building from between two others to which it is attached. Another method, used when raising a building, is to insert "needles," passed through the wall and protruding from it. A supporting piece is placed under the needle, the whole being raised by jack-screws. Cast-iron screws are now used capable of lifting 14 in.

Shorncliffe, village of Kent, England, 2 m. W. of Folkestone, site of a large military camp.

Shorthand, a system of more or less rapid writing by means of signs or symbols briefer than those used in ordinary writing. Systems of shorthand were in use among the Romans under the republic. Famous English systems before Pitman's Shorthand were those of Byrom (1742), Samuel Taylor's (1786) and Harding's, which Isaac Pitman learned and used before he invented his famous "phonography," first published in 1837. Pitman's system is based upon a philosophical theory of the sounds of the language, and each symbol represents a sound. The system has a strongly predominant position, not only in this country, but throughout the English-speaking world, and in most of the stenographic work in Parliament and the Senate, on the press, in business and commercial offices. In recent years Gregg's system has made considerable progress. As opposed to Pitman's, it consists of more smoothly flowing outlines and a greater speed is claimed for it. The fastest speeds attained in Pitman's shorthand exceed 240 words a minute.

Shorthorn, the name given to a popular breed of domestic cattle; used both for dairy purposes, owing to its rich milk yield, and for beef. Of British origin, it is the most widely distributed of all breeds of domestic cattle. The colour varies considerably, but roan is the commonest. The breed was first developed in Durham in the 18th Century.

Shorthouse, Joseph Henry, English novelist, born at Birmingham; best known for his historical novel, *John Inglesant*, which was received with great acclaim, but afterwards gave rise to charges of extensive plagiarism; wrote also *Sir Percival* and *Little Schoolmaster Mark* (1834-1903).

Short Parliament, called by Charles I. in 1640; it lasted only three weeks.

Shottery, village of Warwickshire, 1 m. W. of Stratford-on-Avon, famous as the home of Anne Hathaway, Shakespeare's wife, whose cottage is still to be seen there.

Shotts, or Kirk o' Shotts, village of Lanarkshire, Scotland, 8 m. E. of Glasgow. Coal and ironstone are mined in the neighbourhood, and there are ironworks, brick yards, &c. Pop. 20,500.

Shoulder, the joint formed by the humerus (bone of the upper arm) with the scapula (shoulder-blade), the former having a rounded head fitting into the socket of the latter. Another bone called the acromium, projecting from the scapula, forms with the clavicle (collarbone) an arch over the shoulder joint, which is protected by a thick muscle.

Shovel, Sir Cloudeley, English admiral, born at Clay, Norfolk; was apprenticed to a cobbler, but ran away to sea, and by 1674 was a lieutenant in the Mediterranean fleet; was knighted in 1689 for his gallantry as commander of a ship in the battle of Bantry Bay, and in the following year as rear-admiral was prominent at the engagement off Beachy Head; in 1692 gave heroic assistance to Admiral Russell at La Hogue, and in 1702 to Rooke at Malaga. Elevated to the commandership of the English fleets, he in 1705 captured Barcelona, but on his way home from an unsuccessful attack upon Toulon was wrecked with other ships of his fleet on the Scilly Isles and drowned. (c. 1650-1707).

Shoveler, or **Spoon-Billed Duck**, a so-called genus (*Spatula*) of ducks specially adapted for retaining its food, which consists chiefly of shell-fish, insects, etc. There are four species, the chief being the Common Shoveler (*Spatula clypeata*), which breeds in Great Britain. The female is similar to the common Wild Duck; the male has gorgeous plumage of dark green, chestnut and white, though in summer it resembles the female.

SHOVELER DUCK

Shrapnel, a type of shell invented in 1784 by Colonel Henry Shrapnel, a British soldier. It contains bullets which travel forward at great speed when released by the bursting charge. It is very effective when used against troops in the open owing to its wide range.

Shreveport, city of Louisiana, U.S.A. NW. of New Orleans. Cotton is grown in the neighbourhood and cattle reared, and cotton goods are made. Pop. 77,000.

Shrew, or **Shrew-Mouse**, a small animal resembling, but unrelated to, the mouse, belonging to the family Soricidae of the Insectivora. It has a long pointed snout, rounded ears and cusped incisor teeth; some live in river-banks, others in fields and woods. The shrew family includes some of the smallest of living mammals. They are terrestrial animals. The British representatives include the Common Shrew (*Sorex araneus*), and the Pigmy Shrew (*Sorex minutus*).

Shrewsbury, county town of Shropshire, shire, England, situated on a small peninsula formed by a horseshoe bend of the Severn, 42 m. W. of Birmingham; it has a Norman castle, abbey church, and ruined walls; the public school, founded by Edward VI., ranks amongst the best in England. It was formerly an important border fortress against the Welsh. A Parliament met here in 1397-1398, and in 1403 the town gave its name to the battle which resulted in the defeat of Hotspur and the Earl of Douglas by Henry IV. It was taken by the Parliamentarians in 1644. Chief industries are glass-painting, malting, and iron-founding. Pop. 37,500.

Shrewsbury, Charles Talbot, Duke of, English politician; was among those who invited William of

Orange to England in 1688, accompanying him on his journey from Holland and becoming Secretary of State; but later entered into secret negotiations with James at Saint Germain. He was created a duke in 1694; in 1710 he became Lord Chamberlain and in 1714 Lord Treasurer, assisting on Anne's death in securing the Hanoverian succession. (1669-1718).

Shrike. See Butcher Bird.

Shrimp, a crustacean of the family prawn, but smaller in size, and with a shorter beak. The common shrimp (*Crangon vulgatus*) is greyish in colour, almost indistinguishable from its sandy habitat, and is found in shallow waters round the coasts of the British Isles. As with the lobster, the pink colouring of the animal, as sold for eating, is produced by boiling.

Shropshire, often contracted to **Salop**, mining county of England, on the Welsh border, between Cheshire (N.) and Hereford (S.); is divided into two fairly equal portions by the Severn, E. and N. of which it is low, level and fertile, excepting the Wrokin (1,330 ft.), while on the SW. it is hilly (Cle Hills, 1,805 ft.). Ellesmere is the largest of several lakes. Coalbrookdale is the centre of a rich coal district, and iron and lead are also found. There are many interesting antiquities, including the remains of the Roman city of Uriconium, five abbeys, and a number of castles. Area, 1,347 sq. m. Pop. 244,200. Shrewsbury is the capital.

Shrove-tide, the period immediately before Lent, ending on Shrove Tuesday, when in the Middle Ages the people "shrove" themselves, or made their annual confession of sins, afterwards giving themselves up to sports and relaxations. The custom of eating pancakes on Shrove Tuesday marks a relic of the last use of eggs before the Lenten fast, during which they were not allowed as food.

Shrub, the term applied to any hard-wooded plant of smaller and thicker growth than a tree, the branches of which spring from the root, or from the stem immediately above the ground. Many species of flowering shrubs are widely used for decoration in gardens, among the most popular being rhododendrons, daphne, lilac, flowering currant and myrtle.

Shuttle, an instrument used in weaving for shooting the thread of the woof between the threads of the warp; also a pointed and metal-capped wooden reel upon which the yarn is wound.

Sialkot, district and town of the Punjab, India. The town, a military cantonment, is 72 m. NE. of Lahore. Tents, sports outfits, cotton, cloth and paper are made. Pop. (dist.) 980,000; (town) 101,000.

Siam, **Sagam** or **Muang-Thai**, an independent kingdom, occupying the central portion of the Indo-Chinese peninsula, wedged in between Annam and Cambodia (E.) and Burma (W.), and extending down into the Malay Peninsula; the wide Gulf of Siam forms the southern boundary. The rich alluvial valleys of the Menam and the Mekong produce great quantities of rice (chief export), teak-wood, rubber, coconuts, tobacco and cotton, but of the land surface only a small proportion is cultivated, much of the rest lying under forest and jungle. Trade is largely in the hands of the Chinese; the mining of gold, tin and especially rubies and sapphires is also carried on. A university was founded at Bangkok in 1917. The national religion is Buddhism. Trade is mainly with the Malay States, Hong Kong and Japan. The country is undergoing rapid westernization. Bangkok is

the capital. The present king, Ananda (Mahidol), born 1925, succeeded to the throne in 1935. Area, 200,150 sq. m. Pop. 14,464,000.

Siam, Gulf of, inlet of the S. China Sea between the SW. shores of French Indo-China and the E. coast of the Siamese portion of the Malay Peninsula.

Siaman (*Hylobates syndactylus*), the largest of the gibbons, found only in Sumatra; its height when standing is about 3 ft., and it has long black hair. Unlike most gibbons, it possesses a web of skin between the second and third toes of the foot, and a pouch at the throat similar to the Orang-utan.

Siamese Twins, male twins born in Siam, of Chinese parents, whose bodies were united by a fleshy band extended between corresponding breast-bones; were purchased from their mother and exhibited in Europe and America; married and settled in the U.S.A. Having lost by the Civil War, they came over to London and exhibited, where they died, one 2½ hours after the other. The name has been applied to other cases of "joined twins" who have been born later. (1811-1874).

Sian, a walled city of China, in the province of Shensi, with trade in tea, silk, cotton, sugar, etc. Pop. (est.), 1,000,000.

Sibelius, Johan Julius Christian, Finnish musical composer, born at Tavastehus. A state grant from 1897 enabled him to devote his life to musical composition, his output being for that reason considerable. Something of the natural features of his own country and of the character of his countrymen finds expression in his genius; his tone-poems are replete with the life of folk-songs; while his symphonies are instinct with the might and mystery of nature. His first Finnish opera, *The Maid of the Tower*, was published in 1896; among his many works, which include symphonies, symphonic poems, songs, etc., the best known are *Finlandia* and the *Valse Triste*. (1865-).

Siberia, name formerly applied to the whole of the Russian possessions in Asia, with the exception of those in the Caucasus area to the SW. This territory is now divided between Tadzhikistan, Kazakhstan, and the Kara-Kalpak and Kirghiz Republics, the Far Eastern Region, the Yakutsk and Buriat-Mongol Republics; and the Eastern and Western Siberian regions, with an area of 1,721,000 sq. m. and a pop. of 11,336,000, constitute the present-day Siberia. The capital of W. Siberia is Novosibirsk; of E. Siberia, Irkutsk. Other cities are Omsk, Tomsk, Barnaul and Krasnoyarsk.

There are enormous deposits of coal and of iron, copper and other ores; agricultural development is being speeded up, and large areas are now under corn crops. The N. is mostly tundra and forest. Horses are bred in large numbers. Before the fall of the Czarism, Siberia was largely peopled by political exiles from European Russia. The country was first opened up by the Trans-Siberian Railway, from Europe to the Far East, opened in 1901; railway development has continued under the Soviet Government, a line connecting Siberia with Turkestan being the most important new link of communication. In recent years the Trans-Siberian Railway has been double-tracked. Civil Aviation routes of international importance also cross Siberia, the most important being the Moscow-Vladivostok line.

Sibthorp, John, British botanist, born at Oxford; professor of botany at Oxford from 1784. He was one of the founders of the Linnean Society, and wrote treatises on the flora of Greece and of Oxford. (1758-1798).

Sibthorpia, a genus of trailing plants of the natural order

Scrophulariaceae. There are 6 recognised species, of which one, *Sibthorpia europaea*, the Cornish money-wort (q.v.), is found in the S. of England.

Sibyl, the name given to a woman, or to a number of women, much fabled in antiquity, endowed with visionary prophetic power, the most famous of the class being the Sibyl of Cumæ, who offered King Tarquin of Rome 9 books for sale, which he refused on account of the exorbitant sum asked for them, and again refused after she had burnt 3 of them, but in the end paid what was originally asked for the 3 remaining, which he found to contain oracular utterances bearing on the worship of the gods and the policy of Rome. These, after being entrusted to keepers, were afterwards burned, and the contents replaced by a commission appointed to collect them in the countries around, to share the same fate as the original collection. The name was applied in medieval times to figures representative of the prophets who foretold the coming of Christ; the prophets so represented were reckoned sometimes 10, sometimes 12 in number.

Sicilian Vespers, the name given to a massacre of the French in Sicily at the hour of vespers on the eve of Easter Monday in 1282, the signal for the commencement being the first stroke of the vesper bell. The massacre included men, women and children to the number of 8,000 souls, and was followed by others throughout the island.

Sicily, the largest island in the Mediterranean, ranean, lying off the SW. extremity of Italy, to which it belongs, and from which it is separated by the narrow strait of Messina, 2 m. broad; the three extremities of its triangular configuration form Capes Faro (N.E.), Passaro (S.), and Boco (W.). Its mountainous interior culminates in the volcanic Etna, and numerous streams rush swiftly down the thickly wooded valleys. The coastlands are exceptionally fertile, growing excellent crops of wheat and barley, as well as an abundance of fruit. Sulphur-mining is an important industry, and large quantities of the mineral are exported. There are valuable tunny, sardine, and other fisheries. It enjoys a fine, equable climate, but malaria is in parts endemic. The inhabitants are a mixed—Greek, Italian, and Arabio—race, and differ considerably in dialect and appearance from Italians proper. Palermo, the largest city, is situated on the precipitous N. coast; other towns are Messina, Catania, Trapani and Marsala. As part of the "Kingdom of the Two Sicilies," comprising Sicily and Naples, it was overrun by Garibaldi in 1860, and in the same year was incorporated with the kingdom of Italy. Area, 9,935 sq. m. Pop. 4,000,000.

Sickert, Walter Richard, British Whistler in his youth, but after going to Paris he came under the influence of Degas and the Impressionists. Scenes of low life were his speciality, and he excelled in painting interiors. In 1924 he was made an A.R.A., and in 1934 an R.A., but resigned from the Academy the following year. In 1928-1929 he was President of the Royal Society of British Artists. (1880-).

Sidcup and Chislehurst, urban district of Kent, England, 13 m. S.E. of London, chiefly a residential suburb of London. The Emperor Napoleon III. resided

SIBTHORPIA
EUROPEA

at Chislehurst after his abdication, and died there. Pop. 54,000.

Siddons, Sarah, English tragic actress, born in Brecon, the daughter and eldest child of Roger Kemble, manager of an itinerant theatrical company; became early a member of her father's company, and at 19 married a member of it. Her first appearance at Drury Lane as Portia in 1775, was a failure; by 1782 her fame was established, after which she joined her brother, John Kemble, at Covent Garden, and continued to act there till her retirement in 1812. She was distinguished in many parts, above all as Lady Macbeth, in which character she took farewell of the stage. (1755-1831).

MRS. SIDDONS

Sidereal Day, the period elapsing between two successive transits of a meridian by a star; it is approximately 23 hrs. 56 mins.; *sidereal time* is reckoned from the moment when the first point of Aries crosses a given meridian.

Sidereal Year, the period during which the earth makes a revolution in its orbit with respect to the stars; it is a fraction over 365 days.

Sidgwick, Henry, English ethical and political philosopher, born at Shipton, Yorkshire; professor of Moral Philosophy at Cambridge; author of *Methods of Ethics*, in which he supported a compromise system between the intuitionists and utilitarians, *The Principles of Political Economy*, and the *Elements of Politics*. He held a high place in all these three studies. (1838-1900).

Sidlaw Hills, a range of hills extending from Kinnou Hill, near Perth, N.E. to Brechin, in Angus, and reaching nearly 1,500 ft. in height; most interesting point Dunsinane (1,114 ft.).

Sidmouth, watering-place on the S. Devonshire coast, England, 14 m. E.S.E. of Exeter; lies snugly between high cliffs at the mouth of a small stream, the Sid. Pop. 8,500.

Sidmouth, Henry Addington, Viscount, in London, the son of a physician; entered Parliament in 1783, and was Speaker from 1789 till 1801, in which year, after the fall of Pitt over Catholic emancipation, he formed a ministry, assuming himself the offices of First Lord of the Treasury and Chancellor of the Exchequer. This ministry of the "King's Friends" went out of office in 1804, after negotiating the Peace of Amiens (1802), and in subsequent governments of Pitt Sidmouth held various offices, being an unpopular Home Secretary from 1812 to 1821; created viscount in 1805. (1757-1844).

Sidney, Algernon, English politician and soldier of extreme republican views, second son of Robert, second Earl of Leicester, and nephew of Sir Philip Sidney; first came into public notice in 1641-1642 by his gallant conduct as leader of a troop of horse in the Irish Rebellion; came over to England in 1643, joined the Parliamentarians, rose to a colonelcy and command of a regiment in 1645; was subsequently governor of Dublin and of Dover (1647), entered Parliament (1648), and although appointed one of the commissioners to try Charles I., absented himself from the proceedings, but afterwards approved of the execution; withdrew from politics during Cromwell's Protectorate, but on the reinstating of the Long Parliament (1659) became a member of the Council of State; was on a diplomatic mission to

Denmark when the Restoration took place, and till his pardon in 1677 led a wandering life on the Continent; intrigued with Louis XIV. against Charles II., assisted William Penn in drawing up the republican constitution of Pennsylvania, was on trumped-up evidence and on the evidence of his own *Discourses concerning Government*, which had never been published, tried for complicity in the Rye House Plot and executed, his attainder being, however, reversed in 1689. (1622-1683).

Sidney, Sir Philip, English poet and courtier; born at Penshurst, Kent, the son of Sir Henry Sidney, lord-deputy of Ireland; quit Oxford in 1572, and finished his education by a period of Continental travel, from which he returned imbued with the love of Italian literature; took his place at once in the court of Elizabeth, and received rapid promotion, being sent as ambassador in 1576 to the court of Vienna; his favour with the queen was not impaired by his bold *Remonstrance* against her projected marriage with the Duke of Anjou, and in 1583 he was knighted. Two years later the queen forbade him to accompany Drake to the West Indies, and appointed him governor of Flushing, but in the following year he received his death-wound at the battle of Zutphen gallantly leading a troop of Netherlanders against the Spaniards. His fame as an author rests on his euphuistic prose romance *Arcadia*, his critical treatise *The Defence of Poesy*, and above all on his exquisite sonnet series *Astrophel and Stella*, in which he sings the story of his hapless love for Penelope Devereux, who married Lord Rich. (1554-1586).

SIR PHILIP SIDNEY

Sidney Street Siege, an affair in the East-end of London in Jan., 1911, when two armed alien criminals held the police at bay from a barricaded house. Winston Churchill, then Home Secretary, personally intervened, and called out troops and artillery to storm the house, which eventually caught fire and trapped the hunted men.

Sidon, an ancient Phœnician city on the E. of the Mediterranean, 20 m. N. of Tyre, with an extensive commerce; was famed for its glass and purple dye.

Siebengebirge, a range of hills in the right bank of the Rhine, 20 m. above Köln, distinguished by its seven high peaks.

Siege, tress by hostile troops in order to induce it to surrender either by starvation or by attack at a suitable juncture. In ancient and medieval warfare sieges played a great part, but under modern conditions of mechanised warfare long sieges seem likely to become a historic memory, as present-day siege artillery is in advance of any possibility of effective fortification.

Siemens, Ernst Werner von, German electrician and inventor, born at Lenthe, Hanover; served in the Prussian artillery, and rendered valuable services in developing the telegraphic system of Prussia; patented a process for electroplating in gold and silver, and was the first to employ electricity in exploding submarine mines; retired from the army in 1849, and with Halske established a business in Berlin for telegraphic and electrical apparatus, which has become notable throughout the world, and has allied establishments in Ot. Britain; made many contributions to electrical science; was ennobled in 1888. (1816-1892).

Sienna, an Italian city of much importance during the Middle Ages, in Central Italy, 60 m. S. of Florence; is still surrounded by its ancient wall, and contains several fine Gothic structures, notably its marble cathedral (13th Century) and municipal palace; has a university and institute of fine arts; silk and cloth weaving, ironwork, and a wine and oil trade are the chief industries. Pop. 49,000.

Sienna, an iron oxide mixed with other substances, used as a pigment. "Burnt" sienna gives a dull brown tint, "raw" sienna a bright reddish brown.

Sierra Leone, a British maritime colony since 1788, on the W. coast of Africa, having a foreshore of 180 m. between *Rivieres du Sud* (N.) and *Liberia* (S.); includes the peninsula of *Sierra Leone* proper with its densely wooded *Sugar-Loaf Mt.*, and a number of coast islands, and stretches back to a highland eastern frontier ill-defined; the climate is hot, humid, and unhealthy; has been called "The White Man's Grave"; is fertile but not well exploited by the negro population, half of whom are descendants from freed slaves; ground-nuts, kola-nuts, ginger, hides, and palm-oil, are the principal exports. Freetown is the capital. The Protectorate of *Sierra Leone* extends over a region adjoining the Colony. Area (Colony), 4,000 sq. m.; (Protectorate), 26,000 sq. m. Pop. (Colony), 103,000; (Protectorate), 1,672,000.

Sierra Madre, one of the main mountain chains of Mexico, extending in a N. direction to Arizona, and forming the W. buttress of a fertile plateau stretching eastwards; to the W. the states of *Sinaloa* and *Sonora* slope downwards to the sea.

Sierra Morena, a mountain chain forming the watershed between the valleys of the *Guadiana*, on the N., and *Guadalquivir*, on the S.; has valuable deposits of lead, silver, quicksilver, copper, and other metals.

Sierra Nevada, (1) a mountain range in S. Spain, 60 m. in length; it lies for the most part in *Granada*, crossing the province E. and W. in bold, rugged lines, and clad on its higher parts with perpetual snow, whence the name (Spanish: *nevada*, "snow"); the *Cerro de Mulhacen* (11,421 ft.) is the highest peak in Spain. (2) A mountain system in California, stretching NW. and SE. for 450 m., and forming the eastern buttress of the *Great Central Valley*; the highest peak is *Mt. Whitney* (14,502 ft.). (3) A lofty mountain group in *Colombia*, S. America, stretching NE. almost to the borders of *Venezuela*.

Sight, a metal device fixed to the barrel of a rifle or other small arm to assist accuracy of aim. It consists of two portions, the *fore-sight*, which is usually fixed, and the *rear-sight*, which is adjustable. The rear-sight is notched or perforated in such a way that the fore-sight is visible through the opening and covers the target when the gun is correctly aimed. In artillery, the necessity for making allowance for wind, travel of target, drift and other important factors, and the fact that the target is often quite invisible from the gun, have led to the evolution of complex sights and an elaborate technique of using them.

Signalling, communication by signs. In a military sense it includes line telegraphy and telephony, wireless, visual signalling and message-carrying agencies. The means available for visual signalling are roughly four in number: flags, heliograph, lamps, and shutters. With flags, which can be used in daylight only, two methods of signalling are employed, *viz.*, *morse*, with a single flag, and

semaphore (*q.v.*) with two flags. The heliograph depends for its effect upon the intermittent reflecting of sunlight by a mirror. By this means messages can be read in favourable conditions at a distance of 70 m. Lamp signals can be read at a distance of about 4 m. by day and 8 m. by night. Shutters are small portable structures having a black surface which changes to white when the signalling surface is exposed. Messages can only be sent for short distances by shutters. A machine for semaphore signalling is carried on all warships, while a searchlight (*q.v.*) is commonly used for signalling; either by day or night, and is quite effective over long distances.

Signet, or *Privy Signet*, the royal seal depends for its effect upon the intermittent reflecting of sunlight by a mirror. By this means messages can be read in favourable conditions at a distance of 70 m. Lamp signals can be read at a distance of about 4 m. by day and 8 m. by night. Shutters are small portable structures having a black surface which changes to white when the signalling surface is exposed. Messages can only be sent for short distances by shutters. A machine for semaphore signalling is carried on all warships, while a searchlight (*q.v.*) is commonly used for signalling; either by day or night, and is quite effective over long distances.

Signet Ring, a finger-ring on which is engraved the monogram or initials of the owner, which may be impressed on sealing-wax as an authentication of documents, etc., in the manner of a seal.

SIGNET RING

Sign-Manual, the signature, formerly affixed to grants, letters patent, etc., now referring to sign-manual warrants, which, when countersigned by a secretary of state or other responsible minister, may be issued under the Great Seal.

Sikhs (*the disciples*), a native religious and military community of the Punjab, India, and forming some fifteen states dependent on the Punjab government; founded by one *Nanak* (born 1469) as a religious monotheistic sect purified from the grosser Brahmanical superstitions and practices; were organised on a military footing in the 17th Century, and in the 18th Century acquired a territorial status, ultimately being consolidated into a powerful military confederacy by *Ranjit Singh*, who, at the beginning of the 19th Century, extended his power over a wider territory. In 1845-1846 they crossed their E. boundary, the *Sutlej*, and invaded English possessions, but were defeated by *Sir Hugh Gough* and *Sir Henry Hardinge*, and had to cede a considerable portion of their territory; a second war in 1848-1849 ended in the annexation of the entire Punjab, since when the Sikhs have been the faithful allies of the English, notably in the *Indian Mutiny* and the *World War*.

Si-kiang, river of S. China, rising in the mountains of *Yunnan* and flowing mainly E. for 1,250 m. to *Canton*, where it enters the sea through a large delta. It is navigable to *Wuchow*, over 200 m. upstream.

Sikkim, a small native state in NE. of the *Himalayas*, bounded on the W. by *Nepal* and on the E. by *Bhutan* and *Tibet*. It has an area of 2,818 sq. m., and is under British protection. It is heavily forested and produces rice, fruit, maize, millet and wool. The people are chiefly *Nepalese*, *Lepchas* and *Bhutias*. *Gangtok* is the capital. Pop. 109,800.

Silchester, village of Hampshire, England, 7 m. N. of *Basingstoke*. Here excavations from 1896 onwards revealed the foundations of the Romano-British town of *Calleva Atrabatum*, including those of the first Christian church in Britain, an amphitheatre, forum, basilica etc., as well as traces of private houses and streets. The objects found are in *Reading Museum*.

Silesia, district of Europe, since 1919 divided between Prussia, Poland and Czechoslovakia; the Oder flows NW. through the heart of the country, dividing the thickly forested and, in parts, marshy lands of the N. and E. from the mountainous and fertile W. Rich coalfields lie to the S., and zinc is also a valuable product; agriculture and the breeding of cattle, horses and sheep flourish, and cottons and linens are manufactured.

Prussian Silesia comprises Upper and Lower Silesia, the former covering 3,746 sq. m. and being predominantly industrial (Pop. 1,483,000), while the latter is agricultural and has an area of 10,277 sq. m. (Pop. 3,204,000). Breslau is the chief town of Prussian Silesia. Polish Silesia forms a county, with an area of 1,628 sq. m. (Pop. 1,295,000); it included, until 1938, the former Austrian town of Teschen but not the famous coal basin of that name. Czechoslovakian Silesia (formerly part of Prussian Upper Silesia) has an area of 1,708 sq. m. and, until 1938, included the Teschen coal basin, which has now been surrendered to Poland. (Pop. 735,300).

Silhouette, a portrait taken in profile and filled in with black, or cut out of black paper. The name is derived from Etienne de Silhouette, minister of finance under Louis XV. of France (in whose reign the silhouette became popular as a cheap method of portraiture), in satirical allusion to his extreme economy.

Silica, usual name for the dioxide of silicon, SiO_2 . It is found in most of the minerals which are common in igneous and sedimentary rocks in the form of the silicates of soda, potash, alumina and lime (e.g., feldspars, etc.). Silica itself is found in many forms, e.g., quartz, chalcedony, jasper, agate and flint; in the form of quartz sand, it is a main constituent of glass. The silicate of soda is known as "water-glass" and is commonly used for preserving eggs.

Silicon, a non-metallic chemical element, discovered by Berzelius in 1823. Its chemical symbol is Si; atomic number, 14; atomic weight, 28.06; and melting-point, 1,420°C. It is rarely found except in compounds, e.g., silicon dioxide, or silica (sand), silicon tetrachloride, silicon trichloride, and in various hydrogen compounds. Compounds of silicon are used extensively in industry (as sand, glass, carborundum, water-glass etc.), but the element itself is used mainly in the production of ferro-silicon alloys, which are extremely hard.

Silk, a lustrous thread or fabric manufactured from the larvae of certain moths. The chief silk-producing larvae belong to the Bombycidae family, which includes the common silkworm (*Bombyx mori*). The Chinese were the first to produce silk, and China is still the chief silk-producing country. Silk was known and used by the ancient Greeks, but the cultivation of the silkworm was not introduced into Europe until the 6th Century.

In silk manufacture the first operation is reeling the silk from the cocoons; the silk is then washed, wound on bobbins and sorted. Silk yarns are long, uniform in diameter, fine, elastic, lustrous and durable. In the manufacture of silk fabric France takes first place in Europe, Lyons being the centre of the trade. Many purposes for which silk was at one time employed are now served by the much cheaper artificial silk (q.v.) or rayon.

SILK WORM AND MOTH

Siloam, a pool mentioned in the Bible, also under the name of Shiloah (Isaiah viii., 6); it seems to have been outside Jerusalem, on the S., and to have been connected with an upper pool by a conduit (II. Kings xviii., 17).

Silurian, the name given to the Palaeozoic rocks lying above the Ordovician and below the Devonian. In the British Isles deposits of this age are found in S. Wales, the Welsh border, and Southern Scotland, and include the Wenlock limestone and Ludlow slates. The first true fish appeared in Silurian times, but the characteristic fossils are echinoderms and brachiopods.

Silver, a metallic chemical element belonging to the same group as copper and gold. Symbol, Ag (from the Latin *argentum* "silver"); atomic number, 47; atomic weight, 107.88. It is one of the comparatively few elements that occur native (in Peru, Mexico, Canada, New South Wales and elsewhere), but it is chiefly found in the form of its compounds with sulphur, chlorine and other elements. The chief ore is argentite, or silver sulphide. Much silver is also obtained from lead ores, which are almost always argentiferous.

Silver is a brilliant white metal, melting at 960.5°C. and boiling at about 2,000°C.; its specific gravity is about 10.47. Silver is the best known conductor of electricity, and only its high price prevents its extensive use in electrical work. British "silver" coinage is actually only one-half silver, the remaining alloy being copper, nickel and zinc. Certain silver compounds, especially the nitrate and the oxide, are employed extensively in medicine.

Silver Fir (*Abies pectinata*), a fine coniferous tree native to Central Europe and especially characteristic of the Alps. It thrives well in the cooler parts of Britain; reaching a height of more than 150 ft. It has a conical crown reaching nearly to the ground, and the branches stand out in flat tiers. The wood is used for masts and spars, and the tree yields turpentine.

Silversmith, a worker in silver. Silver-work was produced by the ancient Greeks. After the Middle Ages Italian work reached perhaps the pinnacle of the silversmith's art in the work of such masters as Benvenuto Cellini. English silver ware was especially distinguished during the Georgian era. To-day much fine silver-work is produced at London, Paris, Brussels, Antwerp and Nuremberg.

Silvertown, an industrial district of N. bank of the Thames, adjoining the Royal Victoria Dock; the scene of a disastrous munition works explosion during the World War in January, 1917.

Simbirsk, former name of the town of Ulianovsk (q.v.), of the U.S.S.R. now known as Ulianovsk (q.v.).

Simeon, son of Jacob and founder of one of the twelve tribes of Israel; the territory assigned them in the division of the Holy Land among the tribes was in the extreme south.

Simferopol, town of the U.S.S.R., Republic, situated 49 m. N.E. of Sebastopol; surrounded by gardens, orchards and vineyards, it exports a great quantity of fruit. There is a modern medical institute. Pop. 98,800.

Simla, the chief town of a district in the summer (May-October) hill-quarters of the British administration in India; beautifully situated on the wooded southern slopes of the Himalayas, 7,158 ft. above sea-level, and

170 m. N. of Delhi. It has a cool and equable climate, and possesses two vice-regal palaces. Pop. 27,500.

Simnel, Lambert, English impostor, son of an Oxford tradesman. Educated by Richard Simon, a priest, he was taken by him to Ireland as Edward, Earl of Warwick, son of the Duke of Clarence, Yorkist claimant to the throne, who was then incarcerated in the Tower. Crowned king at Dublin, 1487, he invaded England with an army, but was defeated by Henry VII. at Stoke-on-Trent. He was pardoned and made the king's scullion. (c. 1475-1534).

Simnel Cake (Latin, *simila*, fine flour), originally bread or biscuit made of fine flour and water; later, a rich cake eaten in mid-Lent.

Simon, Rt. Hon. Sir John, English lawyer and politician; called to the bar in 1899 (K.C., 1908), he entered the House of Commons as a Liberal in 1906, became Solicitor-General in 1910, Attorney-General in 1913, and Home Secretary in 1915. In 1927 he was chairman of the Indian Statutory Commission ("Simon Commission"), whose recommendations were later embodied in the new Indian constitution. He was Foreign Secretary, 1931-35, and Home Secretary, 1935-37, and became Chancellor of the Exchequer in 1937. (1873-).

Simonides, Greek lyric poet, born in Ceos; little of his work, which included lyrics, elegies, and epigrams, is extant, but he is famous for a two-line epitaph on the Spartans slain at Thermopylae. (c. 556-c. 465 B.C.).

Simon Magus, a sorcerer of Samaria, who, when he saw the miracles wrought by the Apostles, offered them money to confer the like power on himself (Acts viii.). Hence simony, the sin of buying or selling spiritual privileges for material profit.

Simony, an ecclesiastical offence consisting in the offer or acceptance of money or other reward for nomination or appointment to ecclesiastical office. Under existing English law it consists in the acceptance of reward for the presentation of a particular person to a benefice; and the commission of simony invalidates the presentation. See **Simon Magus**.

Simoom, or **Simoon**, a hot, dry windstorm, bearing clouds of sand and dust, occurring in the regions about the Red Sea and in parts of north Africa.

Simplon Pass, an Alpine pass at a height of 6,600 ft. connecting Brieg in Switzerland with Domodossola in Italy. It is crossed by a road built by Napoleon. The Simplon tunnel, by which the railway passes from Brieg to Iselle, has a length of 12 m. 560 yds.

Sims, George Robert, English journalist and playwright, born in London; was on the staff of *Fun*, also a contributor to the *Referee* and *Weekly Dispatch*, making his mark by his humorous and pathetic ballads and stories, over the signature "Dagonet"; also wrote several popular plays, including *The Lights of London* and *The Roman Rye*. (1847-1922).

Sims, William Sowden, American admiral; born in Ontario, Canada. Served as naval attaché at Paris and elsewhere; in 1917 on the entry of the U.S.A. into the World War was placed in supreme command of the American fleet in European waters. (1858-1936).

Sinai, Mount, one of a range of three mountains on the Sinai Peninsula, between the Gulf of Suez and the Gulf of Akaba, at the head of the Red Sea. From the summit or slopes of Sinai Moses is said to have received the Ten Commandments from

Jehovah. At a monastery here, in 1844, Tischendorf discovered the famous *Codex Sinaiticus* of the Gospels, now in the British Museum.

Sinclair, Sir Archibald, British politician; entered the army in 1910, and two years later succeeded to the baronetcy. Entering Parliament in 1922, he became chief Liberal Whip (1930-31), and Secretary of State for Scotland (1931-32). In 1935 he was elected chairman of the Parliamentary Liberal Party. (1890-).

Sinclair, Upton, American novelist; born at Baltimore, Maryland.

An ardent Socialist and reformer, he wrote *The Jungle*, 1906, which exposed the conditions prevalent in Chicago stockyards and led to the passing of pure food laws; *King Coal*, 1917, focused attention on the mining industry, while *The Brass Check*, 1919, was aimed at the corruption of the Press. Other polemical novels were *The Goose Step*, 1923 (on endowed universities), *Money writes*, 1927, *Boston*, 1928 (in defence of Sacco and Vanzetti), *The Way Out*, 1933, and *Co-op*, 1936. (1878-).

Sind, or **Sindh**, province of NW. India, in Bombay Presidency. It extends from Baluchistan and the Punjab, on the N., to the Indian Ocean and the Rann of Cutch, on the S., and is traversed by the Indus, whose delta it includes. The Lloyd Irrigation scheme, with its great barrage at Sukkur, irrigates about 41 million acres; on the N. and E. are wide stretches of desert land, and in the S. are the Hala Mts. Area, 46,378 sq. m. Pop. 3,887,000. Sind was annexed to British India in 1843, after the victories of Sir Charles Napier over the amirs; it was constituted an autonomous province in 1937; the chief city and port is Karachi.

Sindhia, the hereditary title of the Central India, founded in 1738 by Ranaji Sindhia, who rose from being slipper-bearer to the position of hereditary prime minister of the Marhattas. These princes offered determined resistance to the British, but in 1803 were crushed by Sir Arthur Wellesley, much of their territory passing into British hands. The dynasty was later reinstated and proved loyal during the Mutiny.

Sinecure, an office to which very light, or no, duties are attached. Under the patronage system of government appointments which existed in Great Britain until the middle of the 19th Century, a large number of such offices, to which considerable salaries were often attached, were in existence, and served to provide rewards for political service. An existing example is the Cabinet office of Lord Privy Seal.

Singapore, town and island in the Straits Settlements, Malay Archipelago, belonging to Great Britain; the island of Singapore measures 27 m. by 14 m., and has an area of 225 sq. m.; it is connected with the Malay Peninsula by a causeway, and produces rubber, pineapples and other fruit. Pop. 651,500. The town of Singapore stands on the S. coast of the island and ranks as the chief British naval base in the Far East and one of the most powerfully defended ports in existence; it is also a military and air station. The splendid harbour has a huge floating and other docks, and coaling-wharves. There is an enormous trade, while tin-smelting, fruit-canning and the preparation of rubber are carried on. Pop. 350,000.

Singer, Isaac Merritt, American inventor, born at Pittstown, N.Y.; began work at 12, and led a wandering life; invented and marketed the Singer sewing machine about 1851, and founded the Singer Company; afterwards settled at Torquay, England. (1811-1875).

Single-stick, a fencing weapon, consisting of a round tapering stick of ash, about 34 in. in length, provided at the thicker end with a basket-work hand-guard; it is employed chiefly as a practice substitute for the cutlass or sabre.

Single Tax, a method of taxation proposed by the American economist Henry George, who claimed that a single tax on rent values, properly assessed, would solve problems of national income. The idea was based on the assumption that wealth, in the economic sense, is best represented by land alone. In agricultural lands the scheme might be workable, but the industrial character of modern countries presents great and complex difficulties.

Sing-Sing, an American prison at Ossining, 30 m. N. of New York City, built in 1825 by convict labour. The regime, long of notorious harshness, has undergone great modifications during recent years, and it is now run on enlightened lines.

Sinister, in heraldry, the left side of a shield—that is, the side which is to the observer's right as he faces the shield. A bend sinister, or transverse band passing diagonally across the shield from sinister chief (top) to dexter base (bottom) is the heraldic indication of illegitimacy.

Sin-kiang, the Chinese portion of Turkestan, N. of Tibet between the Tian-Shan and Kun-lun ranges; its capital is Urumtsi (Tihwafu); other towns are Kashgar, Khotan and Ili. Wool, cotton, silk and jade are produced. Area, 550,000 sq. m. Pop. 1,200,000.

Sinking Fund, a fund formed by amounts out of earnings to make good, either annually or at the end of a period of years, the wear and tear of plant, machinery and other physical assets. A sufficient reserve fund is accumulated to maintain depreciation rates and to provide for special classes of losses not covered by insurance. In Government finance, a sinking fund is formed for the purpose of paying off the National Debt. The essence of the system consists in raising the fund out of the excess of the revenue over the expenditure.

Sinn Fein, an Irish republican and whose name means "Ourselves Alone." It first became powerful in 1915, and the following year fomented the Easter rebellion in Dublin; the movement progressed under De Valera, and organised the Irish Republican Army, which waged war against the British troops till 1922, and only lost its power when the establishment of the Irish Free State split its own ranks.

Sinope, seaport of Turkey, in Asia Minor; situated on a narrow isthmus, 350 m. N.E. of Istanbul; it possesses two fine harbours, a naval arsenal, and Byzantine ruins; the ancient Greek town of Sinope was the birthplace of Diogenes and the capital of Mithridates. Pop. 32,400.

Sinus, in anatomy, a cavity containing either blood, as in the venous sinuses of the brain, or air, as in the accessory sinuses of the nose, which are cavities in certain bones of the head and face, lined with mucous membrane and communicating with the nose. They are liable to infection (sinusitis) during a cold in the head.

Sioux, or Dakota, Indians, a N. American Indian tribe once spread over the territory lying between Lake Winnipeg, on the N., and the Arkansas R. on the S., but now confined chiefly to S. Dakota and Nebraska. Failure on the part of the U.S.A.

Government to observe certain treaty conditions led to a great uprising of the Sioux in 1862, which was only put down with difficulty; conflicts also took place in 1876 and 1890, the Indians finding in their chief, Sitting Bull, a determined and skilful leader.

Sioux City, city of Iowa, U.S.A., on the Missouri R., occupied in meat-packing, pottery and cement making, and other industries. Pop. 80,000.

Siphon, an apparatus for transferring liquids from one vessel to another by the use of air pressure. Its essential element is a bent tube, with one arm longer than the other; the short end is dipped into the liquid to be drawn off, the vessel into which it is to be decanted so placed that the mouth of the other arm is below the level of the liquid in the other vessel.

Sirdar, the title of the commander-in-chief of the Egyptian army.

Siren, an instrument for estimating the pitch of a given note by measuring the frequency of the sound waves. It consists essentially of a disk with equally spaced holes through which air is blown, rotating the disk; the number of holes passing a given point in a second can be easily calculated, and hence the frequency may be deduced. From its powerful, piercing sound the siren is often used as a warning signal in lighthouses, &c.

Sirenias, an order of aquatic mammals, without hind limbs, the forelimbs specialized as flippers, flattened tails and, save for the lips, no hair; represented only by the Dugong (*q.v.*) and Manatee (*q.v.*), though other species, now extinct, are known.

Sirens, in Greek mythology, nymphs who were fabled to lure passing sailors to their doom by the fascination of their music. Ulysses had his ears stuffed with wax and himself lashed to the mast till he had passed safely by them. Orpheus, however, surpassed their music by his melodious notes, so that they flung themselves into the sea out of mortification and were changed into boulders.

Sirius, or *The Dog-star*, the brightest star in the heavens, belonging to the constellation of Canis Major; it is comparatively near the earth, being at a distance

a double star, its companion having a density 61,000 times that of water.

Sirocco, a warm, damp, S. or SE. wind prevalent in Mediterranean lands during the winter; also, a hot, dust-laden wind in Sicily and S. Italy, blowing from N. Africa.

Sisal, a fibre obtained from the leaves of *Agave sisalana*, a plant of the natural order *Amariyllidaceae*, native to Yucatan and increasingly grown in Mexico, the SE. United States and Tanganyika; cords and ropes are prepared from its fibres.

Siskin, British song-bird of the Finch family, about 4½ in. long, green in main colouring, with patches of yellow and black; it is usually found in the neighbourhood of pine woods.

Sistine Chapel, the private chapel of the Pope, in the Vatican, constructed by order of Pope Sixtus IV. in 1478 and decorated with frescoes by Michelangelo representing the Creation of the World, the Creation of Man, the Deluge, The Last Judgment, and other subjects. The singing of the Sistine choir is famous.

SISKIN

Sisyphus, a mythical king of Corinth, was doomed in the nether world to roll a huge stone up a hill, which before reaching the top rolled back again, making his toil endless. In various authorities he is described as son of Aeolus and Enarete or of Autolycus.

Sitka, formerly New Archangel, the capital of Alaska, U.S.A.; on the W. coast of Baranof I., surrounded by snowy mountains, it has a good harbour, and is a naval coaling-station; salmon fishing and curing are the chief industries. Pop. 1,000.

Sittingbourne, market town of Kent, England, 10 m. SE. of Rochester; paper, cement and bricks are made, and there are oyster fisheries. The town stands on the Roman Watling Street, has an ancient earthwork and other remains, and was a halting-place for the Canterbury pilgrims. Pop. (with Milton Regis, near by) 30,000.

Sitwell, Edith, English poetess, sister of Osbert and Sacheverell Sitwell; according to *Who's Who*, she early developed "an intense dislike to simplicity, morris-dancing, a sense of humour and every kind of sport except reviewer-baiting"; first published work *The Mother and Other Poems*, 1915, followed by *Wheels*, 1916, *Alexander Pope and Collected Poems*, 1930, *Aspects of Modern Poetry*, 1934, *Victoria of England*, 1936, and other works often displaying originality and wit. (1887-).

Sitwell, Osbert, English poet and novelist; served in the World War in the Grenadier Guards; began his literary career with *Twentieth Century Harlequinade and Other Poems*, 1916, followed by *Argonaut and Juggernaut* (satires), 1919; *Before the Bombardment*, 1926, and *The Man Who Lost Himself*, 1929 (novels), and numerous other works, including *Miracle on Sinai*, 1933, and *Penny Foolish*, 1935. (1892-).

Sitwell, Sacheverell, English poet and critic, brother of the foregoing; his poems include *The Hundred and One Harlequins*, 1922, and *The Cyder Feast*, 1927; an enthusiast for baroque art, his critical studies include *German Baroque Art*, 1927, *Spanish Baroque Art*, 1931, *Mozart*, 1932, *Liszt*, 1934, *Dance of the Quick and the Dead*, 1936. (1900-).

Siva, Hindu divinity, the destroyer in the creator and Vishnu the preserver. His spouse is the dread Kali or Durga, and his emblem the linga, symbolizing the creation which follows destruction. His cult is post-Vedic.

Sixtus, the name of five Popes. **S.I.** (Saint), Pope from 116 to 125; **S.II.** (Saint), Pope from 257 to 258; **S.III.**, Pope from 432 to 440; **S.IV.**, Pope from 1471 to 1484; **S.V.**, Pope from 1585 to 1590; only the two following are of any note.

Sixtus IV., born near Savona, the son of a fisherman; became general of the Franciscans; succeeded Paul II. as Pope, 1471; was notorious for his nepotism; abetted Pazzi in his conspiracy against the Medici at Florence, but was a good administrator and a man of liberal views; he built the Sistine chapel and bridge. (1414-1484).

Sixtus V., born near Montalto, of poor parents; succeeded Gregory XIII. in 1585, and set himself to stamp out disorder and replenish the exhausted treasury of the Church; allowed freedom of worship to the Jews, but was zealous in crushing heresy. (1521-1590.)

Sizar, formerly a poor student at the Sizar, universities of Cambridge and Dublin, so called from the "sizar," or allowance of food they received out of the college buttry; nowadays, a student who pays reduced fees.

Size, a thin glue prepared from ordinary animal or fish glue, refined and diluted with water. Size prepared by boiling gum or powdered ochre in linseed oil forms a basis for laying gold-leaf. Size is also used in the paper and other industries, and to stiffen fabrics.

Skagerak, an arm of the North Sea between Norway and Denmark, and connecting the Cattegat with the North Sea; it is 140 m. long and 75 m. broad, and deep towards the Norwegian coast.

Skald, the name given to a bard or poet among the ancient Scandinavians, whose function it was to compose and relate the sagas or stories of the exploits of chiefs and heroes. The last of the bards was Skurla (d. 1284).

Skate, the common name of a number of the family *Raïdæ*, sub-class *Elasmobranchii*; distinguished by the pectoral fins being extended to join the head, while the body is flattened and there is a long, slender tail. There are a number of British species, the largest being the common skate (*Raia hatis*), which attains a width of 7 ft.

Skating, as practised by early northern peoples, was with suitably shaped bones, bound to the foot. Modern skating is done with a pair of steel blades, fitted to a steel frame, or, in the case of roller-skating, with rollers fitted to a frame which can be clamped to the boot. Style skating depends upon upright carriage, the free foot being held near the ice, with the arms hanging easily and used in assisting movement. In speed skating, the body is bent forward and the hands clasped behind the back.

The International Skating Union holds championship meetings five times annually. Figure-skating, or describing symmetrical and often complex figures upon the ice, is a highly specialized branch of the art. Very popular to-day is ice-hockey, the fastest of all games; this and other forms of skating are often indulged in upon indoor rinks of artificially made ice in those countries whose climate prohibits outdoor skating.

Skeat, Walter William, English philologist, born in London; professor of Anglo-Saxon at Cambridge (1878), he was the author of an *Etymological English Dictionary* and was a great authority on early English literature; he was president of the English Dialect Society, and edited numerous texts. (1835-1912).

Skegness, seaside resort of Lincolnshire, England, 12 m. E. of Spilsby. It has fine sands and golf links and a pier, bathing-pool and boating-lake. Pop. 9,000.

Skeleton, a framework of rigid or semi-rigid structures which serve chiefly to support the body in animals. The simplest form of skeleton is that of sponges, consisting of spicules of mineral matter, while insects, crustaceans, centipedes, etc., have an external skeleton (exoskeleton) composed of hard plates. It is only in vertebrates that a true internal skeleton (endoskeleton) is found, consisting of an assemblage of bones and cartilage made up of two divisions, an axial skeleton comprising a vertebral column, ribs and skull, and an appendicular skeleton including the pelvic and pectoral girdles and their appendages. In addition to support, the skeleton provides a system of levers upon which the muscles act.

Skelton, John, English poet and satirist, born at Diss, in Norfolk; his chief works are: *Why come ye not to Court?* a satire against Wolsey; the *Book of Colyn Cloute*, against the corruption of the Church; and the *Book of Phylipp Sparowe*, the lament of a schoolgirl for the death of her pet sparrow. (c. 1480-1529).

Ski, a form of snow-shoe originating in Norway, and consisting of a long, narrow board, curved upward in front and strapped to the foot. A pair of ski-sticks are generally used in conjunction with these shoes, for balancing, braking, etc.; the stick has a metal wheel or disk near the point to prevent its sinking too far into the snow.

Skiing has become one of the most popular of winter sports, flourishing in Switzerland, Germany, Canada, Australia, New Zealand, and the U.S.A., apart from Scandinavia, the place of its origin, where a great international ski tournament is held every February, near Oslo. The Ski Club of Gt. Britain, founded in 1924 by amalgamation of existing clubs, rules the sport as regards the British Isles.

Skiddaw, mountain in Cumberland, England, 3,054 ft. in height; it is about 3 m. N. of Keswick, the usual starting-point for its ascent.

Skin, the external covering of the body. It is made up of two layers, the epidermis, or cuticle, and the dermis, or corium (the true skin). The epidermis is composed of several layers, the deepest of which, the basal layer, is formed of regular rows of columnar cells which multiply and eventually form the superficial or horny layer. The corium is made up of fibrous tissue with blood-vessels, nerve-endings, lymphatics, hair follicles, involuntary muscle-fibres, sebaceous glands, sweat-glands, etc. Pigment, when present, is found in granules mainly in the basal layer of the epidermis; it forms a protection against the injurious effects of excessive sunlight. The skin is a powerful excretory organ, constantly pouring waste products out of the body in the form of sweat and moisture; it also regulates the body temperature and assists in respiration.

Skipton, town of Yorkshire, England, in the W. Riding, 26 m. NW. of Leeds; there is a grammar school, founded in 1548, also some Norman remains; textiles are made, and there is a large agricultural trade. Pop. 12,400.

Skittles, a game played in a covered wooden skittle-alley with nine wooden skittles or "pins," about 1 ft. in height, at which is hurled a flat wooden ball or "bowl," weighing about 10 lb., the object being to knock all the skittles over with the fewest possible throws; there are several varieties of the game.

Skua (*Stercoraria*), a family of sea-birds found in N. and S. Atlantic regions. One of their distinctive features is the "cere," the bare wax-like base of the bill. The Great Skuas of the genus *Megalestria*, of which four species are recognised, include the Bonxie (*M. catarrhactes*) breeding in the Shetlands, Richardson's Skua (*Stercorarius crepidatus*), a long-tailed species, and a somewhat smaller one occurring in the N. of Scotland. Although apparently well adapted to swimming and diving, all skuas live chiefly by bullying other birds into disgorging their prey.

Skull, the name applied collectively to the bones of the head, composed in most vertebrates of a facial and a cranial portion, and enclosing the brain and most of the organs of sense. The skull of man includes twenty-two bones, united, except in the lower jaw, by immovable joints.

Skunk, a genus (*Mephitis*) of carnivorous mammals belonging to the weasel family (Mustelidae). The common skunk (*Mephitis mephitis*), which inhabits N. America, is about the size of a large cat. Its fur is black, streaked longitudinally with white, and is much prized. The skunk is notorious

for the yellow fluid with a persistent, disgusting odour which it can emit from the anal glands—sometimes to a distance of 12 ft.—when disturbed or annoyed.

Skye, the largest of this group, separated from the mainland of Inverness-shire (in which county it is included) by the narrow channel Kyle Rhea; has a deeply indented coastline and a surface consisting largely of moorland, the most notable features being the lofty 'loolins' (highest point 3,309 ft.); sheep and Highland cattle are raised, and there are valuable fisheries; Portree is the chief town and port. Other towns are Bradford, and Kyleakin, whence there is a ferry to Kyle of Lochalsh. Area, 600 sq. m. Pop. 11,600.

Skye Terrier, a long-haired dog of the terrier family, originally bred in the western Isles of Scotland, especially in Skye. It is a long-bodied dog with short legs and a blue, grey or fawn coat. There are two varieties, prick-eared and drop-eared. An average Skye terrier weighs about 18 lb., and is 40 in. in length and 9 in. high at the shoulder.

Skylark. See Lark.

Skyscraper, a term for the very high feature of modern American architecture. They are constructed of stone and cement on a steel frame, and are usually designed as office buildings, apartments or hotels. The more modern buildings are built on the "zoning" principle, in which the stories recede as the height increases, whereby the light and ventilation of the street and adjacent buildings are not unduly impeded. Among the skyscrapers of New York City are the Empire State Building and the Chrysler Building.

Sky-writing, a form of commercial advertising in which the names of products, exhortations to purchase them, and similar slogans are traced against the sky as a background by clouds of white smoke emitted from aeroplanes.

Slade School, Gower Street, London, attached to University College, named after Felix Slade (1790-1868), English art collector, who founded professorships of art at London, Oxford and Cambridge. Sir E. J. Poynter was the first professor at the Slade School (1871), but Legros was the real founder of the school's reputation.

Slag, a metallurgical by-product obtained in smelting ores after the metals have been extracted. Various kinds of slag are used for cement manufacture, road-making, as fertilisers, and in other ways.

Slander, spoken words which from their to an actionable wrong. Special damage must be shown to have followed the utterance in order to ground an action, except in the following cases, when the words are said to be actionable *per se*—where the words obviously impute a criminal offence; where they impute having a contagious disease, which would cause the person affected to be excluded from society; where they convey a charge of unfitness, dishonesty or incompetence in a profession, trade or office of profit; and where they impute unchastity to a woman.

Slang, expressions in common colloquial use but regarded as being outside the accepted standard of the language in question. Apart from the slang used in talk by everyone (much of the most terse and pithy slang current in English-speaking countries is of American origin), almost every trade and profession has its own particular slang, while thieves, beggars, convicts, etc., have their own cant or lingo constituting a kind of secret language only to be understood by one of their fraternity.

Slate, an indurated, laminated argillaceous rock, which splits readily into thin slabs along planes of cleavage that do not necessarily follow the bedding-planes. The best slates come from N. Wales. They contain mica, quartz and other minerals; purple and red slates contain micaceous hematite, while green slates contain chlorite. The chief use of slate is as a roofing material, but it is also employed for sinks, slabs, shelves, mantelpieces, billiard tables, etc.

Slate Clubs, organizations among the working classes arranging for weekly contributions to be stored up till Christmas and paid out to members with interest. They originated in the days when the slate was the common means of recording transactions.

Slaughterhouse. See *Abattoir*.

Slave Coast, the name given to the coast of the Bight of Benin, in W. Africa, from Lagos to the Volta R.

Slave River, Great, river of Canada, flowing into the Great Slave Lake, which it connects with Lake Athabasca; its length is about 258 m. Its chief tributary is the Peace R.

Slavery, the state or condition of a slave; involving the obligation to work for the benefit of a master without the consent or contract of the slave. The word "slave" originally signified a member of the Slavonic race reduced to servitude by the Teutons. The sources of slavery, whether in the Old Testament or in ancient Roman times, were much the same, namely, war, debt, paternal authority, purchase, and descent from slaves. War was the most fruitful source, and it was, in fact, an upward step in civilization when slavery was substituted for slaughter of the captives. The Egyptians, Carthaginians, Greeks, Romans and Spaniards, even when their civilization was at its highest, all had slaves.

In modern times, a long succession of humanitarians declaimed in vain against the slave trade. In 1786 William Wilberforce brought the subject before Parliament, but the Act abolishing the slave trade only became law in 1807. Agitation was then directed against slavery itself, and in 1833 an Act was passed which liberated nearly 800,000 slaves in the British West Indies, compensation being paid to their owners. In 1838 slavery was abolished in India. The American Civil War (1861-65) arose out of the slavery question, and the ultimate success of the North under Lincoln led to the abolition of slavery throughout the Union. It still exists in some countries, notably in certain more remote parts of Africa, and in Arabia, China and elsewhere, but is gradually being extinguished by the spread of enlightenment and international co-operation under the auspices of the League of Nations.

Slavonia, district of Yugoslavia. See *Croatia and Slavonia*.

Slavs, an important branch of the Aryan race-stock, comprising a number of European peoples chiefly inhabiting eastern Europe, including (among others) the Russians, Serbs, Czechs, Poles, Croats, Moravians, and the Sorbs, Wends and Lashubers now merged in the population of Germany. At the dawn of history we find them already settled in Europe, chiefly in the neighbourhood of the Carpathians, whence they spread N., E., and W., assuming their present position by the 14th Century.

Sledge, or *sligh*, a vehicle for transport, porting passengers or goods over ice; flat, smooth runners replace wheels. The sledge may be drawn by hand, by animal power (reindeer, dog, etc.) or propelled by a motor; a hand sledge used on slopes, mainly for sporting purposes, is called a toboggan.

Sleep, the condition normally recurring every night and lasting some hours in which the nervous system is largely inactive and the organs of sense and locomotion and some of the intellectual functions are in a state of abeyance. In sleep the functions of organic life are not much affected. The eyes are closed and the pupils contracted proportionally to the intensity of the sleep. The very young need much sleep; in adult life about eight hours are required; in old age there should be more, but generally there is less. A morbid tendency to excessive sleep implies imperfect nutrition and sometimes disease of the nervous tissue; but it may be due to overwork, undue heat or cold, or other causes.

Sleeping Sickness (*Trypanosomiasis*), a tropical disease prevalent in E. Africa (especially in Tanganyika Territory), in northern Nigeria, and also, sporadically, in W. Africa. Lethargy is the characteristic symptom, followed by stupor and death. The disease is probably conveyed by contaminated water, but the parasitical origin is not known, though the tse-tse fly is a common vehicle of infection.

Sleeplessness. See *Insomnia*.

Sleepy Sickness. See *Encephalitis Lethargica*.

Slesvig. See *Schleswig-Holstein*.

Slide Rule, an instrument in the form of a rule in which a second movable rule runs in a groove cut into its longitudinal axis; the lengths of the graduations on the rule and slide are proportional to the logarithms (g.v.) of the numbers they indicate, so that by manipulation of the slide the instrument may be used for rapid mechanical multiplication and division. Other forms of rule, generally cylindrical in shape, are also found, which enable a greater degree of accuracy to be obtained.

Slieve Bloom, mountain range in Eire (Ireland), forming part of the border between Offaly (King's Co.) and Leix (Queen's County). The highest point is about 1,730 ft.

Sligo, seaport of Eire (Ireland), the county town of Sligo, in Connaught; it is at the mouth of the Garvogue, 137 m. NW. of Dublin; it has a cathedral and a ruined 13th Century abbey, and exports agricultural produce. Pop. 11,000.

Sligo, maritime county of Eire (Ireland), in the province of Connaught; the land, sloping N. to the coast from the Ox Mts., is chiefly pasture, divided into small holdings; Sligo Bay is a fine sheet of water, and in the S. and E. are the picturesque Loughs Arrow and Gill; the area is 797 sq. m.; fishing and the manufacture of coarse woollens and linens are the principal industries; the Moy, Owenmore, and Garvogue are navigable rivers. Pop. 67,300.

Slips, an inclined plane consisting of a wooden framework with or without metal rails, along which a ship is run from the building yard to the water at its launching.

Sloane, Sir Hans, Irish physician and naturalist, born in Co. Down; became a leading physician in London, and in 1727 president of the Royal Society; an indefatigable botanist and collector, his valuable museum was purchased by the nation and formed the nucleus of the British Museum. (1680-1753).

Sloe, See *Blackthorn*.

Sloop, a fore-and-aft rigged vessel with one mast, similar to a cutter, but with a jib-stay and a fixed bowsprit. A sloop-of-war (now obsolete) was any cutter-rigged vessel equipped with guns on the upper deck only.

Sloth, a group of tropical S. American feeders, edentate mammals, vegetable-clinging to the underside of the branches, and of sluggish habits. Their slow and awkward movement is due to the peculiar structure of the wrist and ankle-joints, the feet being turned in towards the body and provided with long claws, while the forelimbs are disproportionately long. The coarse, shaggy coat accumulates a growth of greenish algae, which effectually conceals the animal among the tree-tops.

TWO-TOED SLOTH

Slough, town of Buckinghamshire, England, 18 m. W. of London, on the Grand Junction Canal. It is an important engineering and manufacturing centre. Pop. 33,600.

Slovakia, province of Czechoslovakia, between Ruthenia and Moravia, with an area of 18,900 sq. m.; it is generally mountainous and includes the High Tatra Mts.; grain, sugar-beet, tobacco and fruit are grown, and cattle-rearing and the mining of silver, iron, copper, lead and rock salt are leading industries. Bratislava is the capital. The province formed part of Hungary until 1918. Pop. 3,330,000.

Slovaks, a Slavonic peasant people, subject to the crown of Hungary until 1918 and included then in the state of Czechoslovakia then formed, especially in the provinces of Slovakia and Moravia.

Slovenes, a southern Slavonic people, bordering on Austria and Italy and once included in Austro-Hungarian territory, but since 1918 united with the Serbs and Croats to form Yugoslavia.

Slow-worm, or Blind Worm, (*Anguis fragilis*), a limbless lizard resembling a snake, which, contrary to popular belief, is neither slow nor blind; widely distributed throughout Europe, it is nocturnal and feeds mostly upon worms and slugs. It is common in England.

Slug, name of a group of terrestrial molluscs related to land snails but devoid of an external shell, though an internal shell may be present. They are very widely distributed and very destructive to field and garden crops in moist weather, though becoming dormant in frosts. Slugs breathe through a small orifice on the right-hand side, and progress by contractions of the flattened, broad, muscular foot.

Sluis, or Sluys, town of the Netherlands, in Zeeland, 9 m. N.E. of Bruges. In 1340 the French were defeated near here in a sea-fight by the fleet of Edward III. Pop. 2,750.

Small Arms, a term including rifles, machine guns, swords, bayonets, lances and similar light and easily portable weapons. Courses of training in the use of small arms are given at the Small Arms Schools at Hythe (chiefly for rifles and light automatics) and Netheravon (for machine guns). Chief small arms factory in England is at Enfield, Middlesex.

Small-holding, a plot of agricultural land of not more than 50 acres. County and borough councils can, under the Small Holdings and Allotments Act, 1926, acquire land to provide such holdings for renting to the cultivators but if the land acquired exceeds 50 acres its annual value for income-tax purposes must not exceed £100. There are about 300,000 small holdings in Great Britain.

Smallpox, or Variola, an acute infectious disease, characterized by fever and an eruption developing into pustules. Its cause is not known, though it is

believed to be due to a filter-passing virus. One attack generally gives immunity to subsequent infection. The incubation period is on an average 12 days. The symptoms are rigor, followed by fever, with a temperature of 103-104°F. or even higher, quick pulse, costiveness, thirst, painful headache, vomiting and back-ache. The eruption begins to appear 3 or 4 days after the onset of the symptoms. "Confluent" smallpox shows the severest symptoms, this condition being almost entirely confined to the face, which it disfigures, leaving deep scars. Cases of smallpox have been much less frequent since the introduction of vaccination.

Smeaton, John, English civil engineer, born near Leeds; began life as a mathematical instrument maker; made improvements in mill-work, and gained the Copley Medal in 1759; the same year finished the rebuilding of Eddystone Lighthouse, burnt down in 1755; engineer of the Forth and Clyde Canal, he also designed many harbours, bridges, canals and drainage schemes. (1724-1792).

Smelt, or Sparling, (*Osmerus eperlanus*), a small edible sea fish akin to the salmon; silvery in colour, with an olive green back, it attains a length of 13 in., and is found between the English Channel and Scandinavia.

SMELT

Smelting, the process of obtaining metal from its ore by the combined action of heat, air and fluxes. The most important agent for smelting iron, copper and lead is the blast furnace. Working is continuous, coke, flux and ore being charged at the top, and the molten products tapped at intervals from the hearth below.

Smethwick, town of Staffordshire, England, 3 m. W. of Birmingham; it is an industrial centre, manufacturing nuts and bolts, scales, lighthouse appliances, glass, etc. Pop. 84,354.

Smew (*Mergellus albellus*), a water bird of the duck family, averaging about 16 in. in length, mainly white in colour, with black back, black markings on head and wings and a crest of feathers on the head; it is found off the E. coasts of Britain in winter, occasionally visiting inland waters.

Smigly-Rydz, Edward, Polish soldier, created and dictator; served in the Polish Legions throughout the World War, and in the Russo-Polish War of 1920; created and trained the modern Polish army, becoming inspector-general after the death of Pilsudski, whom he succeeded as "marshal"—virtually equivalent to dictator, with the official rank of second person in the state after the president. (1888-).

Smiles, Samuel, Scottish author, born at Haddington; abandoned medicine for literature, and in 1857 published a *Life of George Stephenson*, followed by other biographies; his most popular work, *Self Help*, appeared in 1859. (1812-1904).

Smillie, Robert, British labour politician, born at Belfast; starting in a factory at the age of 11, he afterwards held numerous labouring jobs, and as a miner in Lancashire gained first-hand knowledge of colliery life; he became president of the Scottish Miners' Federation (1894-1918) and was re-elected in 1921; from 1912-1921 he was president of the Miners' Federation of Gt. Britain, being instrumental, as a result of the great coal strike of 1912, in securing a national minimum wage; he sat on the royal commission on mines in 1919; he was Labour M.P. for Morpeth, 1923-1929, and has written *My Life for Labour*, 1924. (1857-)

Smith, Adam, British political economist, born at Kirkcaldy, Fife; studied at Glasgow and Oxford, was appointed to the chair of Logic in Glasgow in 1751, and next year to that of Moral Philosophy. In 1776 he produced his *Inquiry into the Nature and Causes of the Wealth of Nations*, a work which has had a world-wide influence upon economic thought. In 1787 he was elected lord rector of Glasgow University. (1723-1790).

ADAM SMITH

Smith, Sir Grafton Elliot, British anthropologist, born in New South Wales; demonstrator of anatomy at Cambridge, he conducted brilliant researches on the anatomy of the mammalian brain; professor of anatomy successively at Cairo, Manchester and London. His researches upon skulls of prehistoric man discovered at Piltdown, England, and in Africa, Java and elsewhere, did much to develop a new school of anthropology. He wrote *The Ancient Egyptians*, 1911; *The Royal Mummies*, 1912; *Human History*, 1930; *The Search for Man's Ancestors*, 1931; *The Diffusion of Culture*, 1933, and other works. (1871-1937).

Smith, John, English soldier and colonist, born in Lincolnshire; after a life of adventure and peril in Europe, he became in 1606 a leader of the English colonists of Virginia; established friendly relations with the Indians, after his life had been saved by Pocahontas, the Indian princess, whom on his return to England he presented to Queen Elizabeth; explored much in New England and wrote pamphlets advocating colonization. (1580-1631).

Smith, Joseph, founder of the Latter Day Saints or Mormons, born at Vermont, U.S.A. In 1827 he professed to dig up the *Book of Mormon*, inscribed on gold plates. On this he founded his cult, claiming to be a Divine medium; though the founder of Mormonism, he was not a polygamist; together with his brother, he was lynched while in gaol by a hostile mob. (1805-1844).

Smith, Sydney, English political writer and wit, born at Woodford, Essex. Having taken orders, he settled in Edinburgh in 1798, becoming an editor and contributor of the *Edinburgh Review*; afterwards removed to London, where in 1831 he became a canon of St. Paul's; an ardent champion of Catholic emancipation and parliamentary reform. His writings deal with abuses of the period; he is chiefly remembered for many witty sayings. (1771-1845).

Smith, William Henry, English business man and politician, the pioneer of railway station bookstalls. Entering parliament in 1858, he was successively Secretary to the Treasury, First Lord of the Admiralty, Secretary for War, Irish Secretary, and Leader of the Conservative Party; his widow was created Viscountess Hambleden. (1836-1891).

Smith-Dorrien, Sir Horace Lockwood, British general. Joining the infantry in 1876, he served in the Zulu War, and in the Egyptian, Sudan, Tirah and Chitral campaigns, and commanded a division in the Boer War. In the World War he led the 2nd Corps in the retreat from Mons, and fought the heroic battle of Le Cateau, but, failing to agree with Sir John French, retired in 1915; from 1918 to 1923 he was Governor of Gibraltar. (1858-1930).

Smithsonian Institution, a celebrated American institution of learning in Washington, D.C., endowed by James Smithsonian (1765-1829), British chemist and mineralogist. The

institution, housed in a fine building, is under government control; it encourages scientific research, administers various funds, museums, collections, etc., and directs scientific expeditions.

Smoke, a suspension of fine solid particles in a gas. Coal smoke consists mainly of small particles of carbon, which aggregate to form soot. Cigarette smoke appears blue because the particles are very fine, with diameters of the order of a wave-length of light; smoke rising from a chimney in dry, clear air also appears blue, but on a damp day it appears greyish-white and opaque, because the particles are larger, owing to the condensation of moisture on them. The earliest provisions for smoke abatement were framed in 1845 and 1847. Furnaces not consuming their own smoke and chimneys emitting volumes of black smoke are nuisances under the Public Health Act, 1875, and succeeding Acts.

Smokeless Powder, an alternative powder, but producing far less smoke and recoil; it consists of gun-cotton or nitrated cellulose; it is largely used for sporting guns.

Smolensk, town of the U.S.S.R., on the Dnieper, 244 m. SW. of Moscow; surrounded by walls. It has a fine cathedral, and a university, founded in 1919; is an important railway junction, and has metallurgical and engineering industries. Here in 1812 Napoleon defeated the Russians on his march to Moscow. Pop. 104,000.

Smollett, Tobias George, British novelist, born at Dalquhurn, Dumbartonshire. His first effort in literature was a failure. In 1746 he travelled as a surgeon's mate on board a warship to the West Indies, and on his return to England in 1748 achieved his first success with *Roderick Random*, which was followed by *Peregrine Pickle*, 1761, *Ferdinand Count Fathom*, 1763, and *Humphrey Clinker*, 1771.

The plot of his novels is a mere sequence of incidents, but in cynical characterization he is not easily equalled. (1721-1771).

Smuggling, importing or exporting goods clandestinely and without paying the duties imposed by law. By an Act of 1779 it was made a felony, but is now punishable by fine and imprisonment. Under the Customs Consolidation Act, 1876, smuggled goods are subject to forfeiture. Taking goods out of warehouses without paying duties is a misdemeanour; signalling to smuggling vessels renders the offender liable to a fine of £100.

Smut, a disease of cereal and other plants, characterized by a blackening of the grain. It is caused by a fungus (*Ustilago*) which attacks the ears of barley, oats and rye; the blackening, if examined under a microscope, will be found to be composed of round spores. Soaking the grain in a dilute solution of lysol, formalin or copper sulphate, previous to planting, is a preventive.

Smuts, Rt. Hon. Jan Christian, South African general and politician. During the South African War he led the Boer forces in Cape Colony against the British; after the war he became minister, successively, of the interior, of defence, and of finance. In the World War he led the British forces in E. Africa, and in 1917 became South Africa's representative in the Imperial War Cabinet. Premier of South Africa, 1918-1924, and, in 1933, became minister of justice. He has also shown himself to be a philosopher of merit, his chief work being *Hottentot*. (1870-).

TOBIAS SMOLLETT

Smyrna. See Izmir.

Smyrna, Gulf of, an inlet of the Aegean Sea, 40 m. in length by 20 m. in breadth.

Smyth, Dame Ethel Mary, British composer; born in London, she studied music in Leipzig, and produced her first opera, *Fantasio*, in 1898; it was followed by *The Wreckers*, 1909, which, together with *The Boatwain's Mate*, 1917, is her best known work. She has also composed a mass, chamber music and symphonies, including *The Prison*, 1931. A prominent suffragette, she has written several volumes of reminiscences. In 1922 she was made a D.B.E. (1858-).

Snaefell, the highest mountain in the Isle of Man, situated 5 m. SW. of Ramsey; its height is 2,034 ft.

Snail, the common name of certain more or less similar shelled molluscs, chiefly belonging to the family Helicidae. The common garden snail is noted for its slow creeping motion, round spiral shell, long eye-stalks retractible at will, and for its great destructiveness to garden crops. Snails are most active in warm, moist weather.

Snake, the common name for all the reptiles of the sub-order Ophidia of the Squamata (Lizards and Snakes) order. They have elongated bodies, covered with horny scales; no limbs, apart from vestigial hind limbs which appear in some boas and pythons as minute spur-like processes; hooked conical teeth, and in a large number of species special fangs for injecting venom from a gland. The jaw is distensible, so that prey can be swallowed whole.

Snakes are essentially tropical, the species rapidly diminishing in number the further the distance from the equator. Pythons, boas and in general, the largest snakes are non-poisonous and rely upon their enormous crushing power for overcoming their prey. Only three snakes are native to Great Britain, the venomous viper or adder (*Viper berus*), the harmless grass-snake (*Natrix natrix*), and the smooth snake (*Coronella austriaca*).

Snake River, river of N. America, which rises in Wyoming amid the Rockies; flows S. and NW. through Idaho, forming the Shoshone Falls; through southern Washington it flows W. under the name of the Lewis or Fork R., and discharges into the Columbia after a course of 1,050 m.

Snapdragon, popular name for *Antirrhinum* (q.v.)

Snell, Henry Snell, first Baron, English politician; born at Sutton-on-Trent. As a lad he worked on farms, as a postman, clerk, etc.; in 1895, he became Secretary to the Director of the London School of Economics; for many years a propagandist and public speaker on behalf of Socialism and the Ethical movement; entered the House of Commons, 1922; in 1931 received a peerage and became Parliamentary Under-Secretary for India; Chairman of the London County Council, 1934-1937, and leader of the Labour party in the House of Lords (1865-).

Snipe, the common name of a number of birds of the Plover family,

especially of those of the genus *Gallinago*. The most important species is the Common Snipe, a wading bird with a long, straight bill, noted for its curious angular flight when disturbed. It breeds in marsh land in Europe and N. Asia; is brown mottled with black above and white below, and is a favourite with the sportsman and epicure.

JACK SNIFE

Other species occurring in Britain are the Great Snipe, a bird very similar in appearance to the Common Snipe, and the Jack Snipe, which is somewhat smaller.

Snorri Sturluson, Icelandic historian and poet; the author of the great prose *Edda* and of the collection of sagas entitled *Heimskringla*. He was a man of position and influence in Iceland, but having provoked the ill-will of King Hacon was at his instigation assassinated. (1179-1241).

Snow, aqueous vapour solidified into icy particles, which cohere in regular symmetrical forms, having usually six rays or sides; a number of such crystals usually cling together and fall as snowflakes. Their white appearance is due partly to enclosed air particles and partly to the reflection of light at their numerous surfaces. Snow is never seen at sea-level in the tropics, and seldom reaches a limit of 15° from the tropics; but above certain altitudes it falls in all parts of the world. The snow-line is the zone on a mountain above which snow always lies.

Snow-bunting (*Plectrophenax nivalis*), an Arctic bird of the Finch family, a winter migrant to Great Britain. In summer the head, neck, lower parts and a patch on the wings are pure white, while the rest of the plumage is black; in winter the plumage is white, tinged with ruddy brown. The bird has a shrill, piping note not unlike that of the lark.

Snowden of Ickornshaw, Philip, first Viscount, British politician; born at Keighley, Yorkshire, he entered the civil service, but took to journalism and politics, becoming chairman of the Independent Labour Party in 1903, and again in 1917. In 1906, he entered the House of Commons, served on several royal commissions, and in 1924 became Labour's first Chancellor of the Exchequer, a post he again held in the second Labour Government of 1929. In 1931 he was prominent in the National Government, becoming Lord Privy Seal and a viscount. (1864-1937)

Snowdon, a mountain range in Caernarvon, N. Wales, extending from the coast to near Conway; it has five distinct summits, of which Moel-y-Wyddfa (the conspicuous peak) is the highest, being 3,560 ft.; the easiest ascent is from Llanberis, on the N.

Snowdrop (*Galanthus nivalis*), one of the earliest British spring flowers, in mild seasons flowering as early as January. It is of the natural order Amaryllidaceae, grows from a bulb, and has linear leaves and an erect, slender stalk, bearing a solitary, white, bell-shaped flower.

Snow-plough, an apparatus for removing snow from roads, railway tracks, etc. On roads a motor-propelled vehicle with a wedge-shaped frame to push the snow aside for subsequent melting or carting away is generally used; on railways a plough with cutting blades fixed to a rotating wheel that will throw the cut snow clear of the line is the general form.

Snuff, a powdered preparation of tobacco, inhaled through the nostrils. It is made by fermenting and drying tobacco leaves, and grinding them in a mill. The peculiar flavour of "high-dried" snuffs depends on the mode of drying. Dry snuffs are sometimes scented or adulterated with quicklime; moist snuffs, like rappee, with hellebore or ammonia.

Soane, Sir John, English architect, born near Reading, studied in Italy, and became architect to the Bank of England, which he rebuilt; bequeathed his house in Lincoln's Inn Fields, with an important art collection, to the nation. This house was recently rebuilt. (1753-1837).

Soaps, the sodium salts (hard soaps) or potassium salts (soft soaps), of various fatty acids; they are made by a process of saponification, which consists in hydrolysing a fat by heating it with a solution of caustic alkali, e.g., sodium hydroxide. After the reaction, soap and glycerine are both left in solution, and the former is obtained as a precipitate by "salting-out," i.e. by the addition of common salt. It is filtered off, partially dried, compressed and cut up into blocks of suitable shape and size. The glycerine, an important by-product, is also extracted. Among the chief fats and oils used in the manufacture of soap are tallow, palm-oil, cotton-seed oil, olive oil, whale oil and coconut oil.

Soapstone, a synonym for *Steatite* (q.v.).

Soapwort, or *Fueller's Herb* (*Saponaria officinalis*), a perennial herb of the pink (*Caryophyllaceae*) family. It grows 2-3 ft. high and has a lilac or white flower. The gummy sap which froths with water is used in India for washing clothes.

Soar, river of England, which, rising in Leicestershire, flows through the latter county and joins the Trent 10 m. ESE. of Derby, after a course of 40 m.

Sobieski, surname of the great patriot king of Poland, John III, born at Olesko, in Galicia. He was elected king of Poland in 1674, having shown his ability by repeated victories over the Turks and Russians. A wise and brave ruler, his greatest feat was the rout of the Turks who were besieging Vienna in 1683 (1624-1696.)

JOHN SOBIESKI

Sobraon, a town in the Punjab, India, on the Sutlej, in the vicinity of which Sir Hugh Gough won a decisive victory over the Sikhs, February 10, 1846, terminating the first Sikh War.

Socage, name given to a feudal tenure service (such as agricultural work or the payment of rent) other than knight service.

Social Contract. The social contract theory of politics teaches that the right of a government to govern is based upon an agreement made before the institution of the first organized State that the subjects would obey the ruler on condition of his affording them security and protection. The theory was taught by most early English political philosophers, including Hobbes and Locke, but owed most of its popularity to Rousseau's (q.v.) treatise of that name.

Socialism, the political and economic doctrine which seeks to reorganise Society by the abolition of competition, and to replace capitalist production for profit by co-operative production for use. It first entered the domain of serious consideration in the 19th Century, when various thinkers, writers and experimenters, such as Robert Owen and William Morris in Great Britain, Fourier in France, and Karl Marx and Engels in Germany, made from various angles contributions to the general fund of socialist thought.

It has developed along various lines, the State Socialists anticipating the gradual extension of the activity of the State until it covers the whole field of economic activity; the industrial Socialists, Syndicalists, Guild Socialists and Trade Unions seeking the organization of a scientific system of production and distribution by the extension of trade unionism and the assumption by producers'

and consumers' organizations of the machinery of government; and the Communists, following Marx, asserting that the violent overthrow of existing governments by revolution will pave the way first for the Socialist State and later for the supersession of the State altogether as a result of the abolition of class distinctions.

British Socialism before the Great War was mainly non-Marxian, its theory being largely due to the work of the Fabian Society, and its political propaganda being mainly in the hands of the then predominantly Trade Unionist Labour Party. Since the Russian Revolution of 1917 there has been a general overhaul of Socialist theory, and except in English-speaking countries the name has tended to fade into disuse as representing any theory of economics or politics essentially different from Communism, though the Nazi party of Germany, like many political bodies in other parts of Europe with similar aims, officially claims to be "Socialist." In Great Britain the Labour Party looks forward to a Socialist state as its objective. See *International; Communism; Labour Party; Syndicalism*.

Social Wars, an insurrection (90-88 B.C.) of the allied states in Italy against the domination of Rome, in consequence of their exclusion from the rights and privileges of citizenship. The revolting states were confined to the Sabellians and their kin, the Sabines and Volscians remaining loyal to Rome and the Umbrians and Etruscans keeping aloof; they were eventually defeated by L. Cornelius Sulla.

Society Islands, a island group in the Pacific, consisting of 13 principal islands and numerous islets, the chief being Tahiti and Moorea. They are mountainous and surrounded by coral reefs, and have a fertile soil and luxuriant vegetation. Phosphate and copra are the main products. The group belongs to France. Pop. about 25,000.

Society of Friends, commonly called *Quakers*, a religious sect founded in 1652 by George Fox; though at first much persecuted, grew in numbers and influence. Silence plays a large part in the meetings of the Quakers, and they have no external sacraments. They are opposed to war and have supplied leaders for all kinds of philanthropic work. Friends' House, Euston Road, London, is the headquarters of the society.

Society of Jesus. See *Jesuits*.

Socinians, a sect of Unitarians taking their name from Faustus Socinus. Besides denying the doctrine of the Trinity, they deny the divinity of Christ and the divine inspiration of Scripture. They originated in the 16th Century in Poland, and eventually spread into Prussia, the Netherlands and England.

Socinus, Latinised name of Faustus, Fausto Sozzini, Italian theologian, born at Siena. After a period of service with the Tuscan court, he visited Poland in 1579, married the daughter of a nobleman and gained many important adherents to the Unitarian doctrines which he had helped to found. In 1598 he was injured by an anti-Protestant mob in Cracow; he was one of the leading figures of the later Reformation. (1539-1604).

Sociology, the science which treats of the nature and development of society and social institutions; a science to which Herbert Spencer, in succession to Comte (who coined the word) and Frédéric Le Play, contributed more than any other writers, deducing a series of generalisations by comparison of individual with social organisms.

Socrates, Athenian philosopher, pronounced by the Delphic

oracle the wisest of men; began life as a sculptor, but soon turned to philosophy, his pupils being the most promising men of the city. He wrote no book, propounded no system, and founded no school, but strove to instil into all and sundry a love of justice and truth. Charged with not believing in the State religion, with introducing new gods, and corrupting youth, he was convicted and condemned to death. To an offer of escape he turned a deaf ear and drank the hemlock potion prepared for him with perfect composure. The best ancient account of his life, death and teaching is in Plato's *Dialogues* and *Crito*. His most celebrated pupils were Xenophon and Plato. (c. 469-399 B.C.).

SOCRATES

Soda, a name applied to three distinct substances, viz., sodium hydroxide, or caustic soda; sodium carbonate decahydrate, or washing-soda, and sodium bicarbonate, or baking-soda. Anhydrous sodium carbonate is sometimes known as soda-ash.

Sodium, a metallic chemical element belonging to the group of the alkali metals. Symbol, Na (Latin, "natrium"); atomic number, 11; atomic weight, 23.00. It was first isolated in 1807 by Sir Humphrey Davy by electrolysis. Being an extremely reactive substance, it does not occur in nature in the free state. Its principal natural compounds are sodium chloride, or common salt, sodium nitrate, or Chile saltpetre, and trona, or sodium sesqui-carbonate. It is a soft, silvery-white metal which may be easily cut with a knife. It floats on water, with which it vigorously reacts, forming sodium hydroxide and hydrogen. In moist air it rapidly tarnishes, and when heated in air or oxygen takes fire and burns with a brilliant golden-yellow flame. Commercially the chief use of sodium is for conversion into sodium cyanide, NaCN, which is employed in the extraction of gold.

Sodium Bicarbonate, or **Baking-soda**, a white crystalline solid of the formula NaHCO_3 . It is slightly soluble in water, and the solution is practically neutral to litmus. On heating, whether dry or in solution, it readily decomposes into sodium carbonate, water, and carbon dioxide. When mixed with dough and heated, Sodium Bicarbonate yields carbon dioxide in this way, and the gas makes the dough rise; hence, the use of Sodium Bicarbonate in cooking. Sodium Bicarbonate is also used as a remedy for certain forms of indigestion.

Sodium Carbonate, or **Soda-Ash**, a white crystalline solid of the formula Na_2CO_3 . Washing-soda consists of crystals of sodium carbonate decahydrate; it is prepared by dissolving Sodium Carbonate in water and concentrating the solution by heat until it will deposit crystals of the decahydrate on cooling. A hydrated form of Sodium Carbonate occurs naturally in East Africa, Queensland, and a few other localities, but most Sodium Carbonate is made by the ammonia-soda process invented by Ernest Solvay (1838-1922), a Belgian chemist. Sodium Carbonate dissolves in water to give an alkaline solution, though its alkalinity is less pronounced than that of caustic soda. The decahydrate loses its water of hydration on heating, but the anhydrous substance is unaffected by heat. The decahydrate crystals (washing-soda) gradually lose

nine-tenths of their water on mere exposure to dry air; they fall to a white powder of the monohydrate and are said to effloresce. Sodium Carbonate is mainly used in the manufacture of glass, caustic soda and soap, though it has a host of minor uses. Its domestic applications depend mainly on its power to soften hard water and on its detergent action.

Sodium Chlorate, a white crystalline solid made by the electrolysis of hot concentrated brine. It evolves oxygen when heated and is a powerful oxidizing agent; its chief use is as a weed-killer, for which purpose it is often mixed with calcium chloride and applied as an aqueous solution.

Sodium Hydroxide, or **Caustic Soda**, a chemical compound of the formula NaOH . It is obtained commercially by the electrolysis of sodium chloride (common salt) solution, when it collects in solution round the negative electrode or cathode, but principally by a method first introduced by William Gossage (1799-1877). It is a white crystalline solid, with a burning ("caustic") action on the flesh; in the air it rapidly becomes wet owing to the absorption of atmospheric moisture, in which it finally dissolves. On solution in water it produces considerable heat; the solution is slimy to the touch and strongly alkaline in character. (See **Alkali**.) Sodium Hydroxide is largely used in chemical laboratories, e.g., for forming sodium salts by the neutralization of acids, for liberating ammonia gas from ammonium salts, and for precipitating insoluble metallic hydroxides. It is also a good absorbent of carbon dioxide, with which it yields first sodium carbonate (g.v.) and then sodium bicarbonate (g.v.). Commercially it is used as a source of metallic sodium, for the manufacture of soap and artificial silk, in the dye industry, and for a wide variety of other purposes.

Sodom and Gomorrah, two ancient cities of Palestine which for their wickedness were consumed by fire from heaven (Gen. xix.). Lot and his family alone being spared. They are supposed to have stood near the S. border of the Dead Sea.

Sodor and Man, Anglican diocese of the Isle of Man, included now in the province of York. The ancient bishopric of Sodor (Norse for "southern islands," including the Isle of Man), together with certain Scottish isles, was included in the Norwegian province of Trondhjem, and the name survived after the Norwegian association was terminated in 1266.

Sofia, city and capital of Bulgaria, situated near the R. Isker, 75 m. NW. of Plovdiv. Formerly oriental, it has largely undergone reconstruction, and with hotels, banks, a government palace and other buildings presents a fine modern appearance. There is a national university; an important trade emporium, it manufactures cloths, silks and leather, and has long been famous for its hot mineral springs. Pop. 287,000.

Soho, a district in west-central London, Avenue; of Oxford Street and Shaftesbury Avenue; it has a large foreign colony, and is famous for its restaurants; the district was fashionable in the 17th and early 18th Centuries, and has many literary associations.

Soil, the upper layer of the solid land, consisting of a deposit of particles of decomposed rocks, generally clay and sand, mixed with decaying vegetable and animal matter (humus), which together furnish a reservoir of solid and liquid materials that nourish vegetation. The chief agents in this disintegration and decomposition are moisture, changes of temperature, frost, chemical and bacterial action, etc. On upland slopes with a northern aspect, or in places where for other

regions sunshine does not penetrate, the dead vegetable matter tends to change into peat, an important constituent of soil in mountain regions.

Soissons, town of France, in the dept. of Aisne, on the R. Aisne, 65 m. N.E. of Paris; has a 12th Century cathedral and ruins of a famous abbey; chief industries are brewing and the manufacture of textiles; it has figured in many wars, from the days of Clovis and Pépin to the World War, when it was twice occupied by the Germans. Pop. 17,300.

Sokoto, province of the British protectorate of Nigeria, W. Africa, bounded N. by the Sudan and S. by the R. Benue, the main affluent of the Niger. The dominant people are Fulahs, and the capital is Sokoto, on the Kebbi R., 220 m. NW. of Zaria; groundnuts and cotton are exported. Area, 38,860 sq. m. Pop. 1,687,000.

Sokotra, an island off the E. coast of Africa, 148 m. N.E. of Cape Guardafui, over 70 m. long and 20 m. broad; it is mountainous, comparatively barren and inhabited by Mohammedans, who rear sheep, goats and cattle; the sultan is a feudatory of Great Britain. Pop. c. 12,000.

Solanaceae, a family of dicotyledonous plants of great economic importance, of which the typical genus *Solanum* includes the Potato (*Solanum Tuberosum*), tomato (*Solanum Lycopersicum*), and Bittersweet or Nightshade (*Solanum Dulcamara*). Tobacco (*Nicotiana Tabacum*) is also a member of the family, as is Deadly Nightshade (*Atropa Belladonna*).

Solar Cycle, a period of 28 years, at the end of which, in the Julian calendar, the days of the month return to the same days of the week.

Solarium, a room or balcony exposed to the sun's rays, especially one adapted for sun-bathing or for treatment by artificial sunlight.

Solar System, The. Of the whole universe, that part which is of the most immediate interest to man is the solar system. The sun is one of the stars of the Milky Way, and it is believed that at some remote period—perhaps about 2,000,000,000 years ago—another star approached the sun very closely, or possibly actually collided with it. As a result of the cataclysm, gaseous fragments were ejected, and these afterwards cooled to form the planets. Minor fragments torn from the planets soon after their birth remained in association with them as moons. The planets of the system, in order of their distance from the sun, are Mercury, Venus, Earth, Mars, the minor planets or asteroids, Jupiter, Saturn, Uranus, Neptune and Pluto. The asteroids were probably formed by the disintegration of a single planet which came so close to Jupiter as to be broken up by the tidal influence of the latter. The only planets other than the earth upon which life as we know it seems to be at all possible are Venus and Mars.

Solar Year, the period of 365 days 45.5 seconds which the earth takes to complete a revolution round the sun.

Solder, a fusible alloy of varied composition used for joining pieces of metal. Soft solders, for metals which melt at a comparatively low temperature, are usually alloys of tin, lead and bismuth; hard solders of copper, lead, and (for the precious metals) silver. The surfaces to be soldered are cleaned with a "flux" of borax, resin, etc., according to the nature of the metal, and the solder, with the metal surfaces to be joined, heated with a blowpipe or, in the case of soft solders, with a soldering iron.

Sole, the common name of the flat-fish of the genus *Solea*. The common sole (*Solea vulgaris*) is a highly-valued food fish, abundant in the English Channel.

The upper side of the body is dark brown, the lower white; the eyes are upon the right side of the head, the teeth upon the left side. Other species include *Solea lascaris*, or lemon sole, and *Solea variegata*, or variegated sole.

VARIEGATED SOLE

Solemn League and Covenant. See Covenant.

Solent, the western portion (Spithead) of the strait which separates the Isle of Wight from the mainland of Hampshire, England. It is 15 m. long, with an average breadth of 3 m., but at its W. entrance, opposite Hurst Castle, contracts to ½ m.

Solferino, a village in N. Italy, 20 m. NW. of Mantua, where the Austrians were defeated by the French and Sardinians, June 24, 1859.

Solicitor, an attorney or law-agent, one who represents another in a law court. The term was formerly restricted to agents practising in the Chancery courts, but by the Judicature Act, 1873, all persons practising in the Supreme Courts are called solicitors, and the term attorney is now obsolete. In Scotland the term is applied to writers to the signet or general legal practitioners. In America a solicitor may act as counsel, whereas in England he can only do so in a county court, or before a magistrate.

To become a solicitor, qualifying examinations must be passed and a certificate to practise obtained from the Incorporated Law Society (see Lawyer). Admission to the rolls is allowed in certain cases, after four years' service under articles, to those who have passed one or other of various specified examinations. Discipline over the members of the profession is maintained by the Incorporated Law Society. Under the Solicitors' Act, 1928, a solicitor may not employ any person who has been struck off the rolls or suspended from practising, without the written consent of the Society.

Solicitor-General, a law officer of the Crown, ranking below the Attorney-General, whose deputy he is; he draws a salary of £4,000 and fees. Scotland has its own Solicitor-General.

Solids. Matter exists in three physical states: solid, liquid and gaseous (though perhaps the colloidal state should be added). In the gaseous state, the molecules of the substance are so far removed from one another that the force of attraction between them is negligible, and they are free to move in any direction and to any distance within the bounds of their containing vessel. In a liquid, the molecules are much closer together, and, although they have considerable freedom of movement, the force of attraction between them is sufficient to keep them from parting company immediately. In a solid, however, the molecules are so close together, and in general so methodically and regularly packed, that freedom of locomotion has vanished, although there is presumably still some freedom of vibration.

Soliman I., the Magnificent, tenth and greatest of the Ottoman sultans, the son of Selim I., whom he succeeded in 1520. After making peace with

Persia, and pacifying Syria, he captured Belgrade and wrested Rhodes from the Knights of St. John, 1523. He twice led his army into Hungary, besieging Vienna in 1529, but, being repulsed, he turned his arms towards the East, conquering large parts of Armenia, Persia and N. Africa. He died at Szigetvár while opening a new campaign against Hungary. (1494-1566).

Solingen, a manufacturing town of Prussia, situated near the Wupper, 13 m. E. of Düsseldorf; has long been famed for its steel and iron works and outlery manufactures. Pop. 140,200.

Solomon, King of Israel from c. 974 to c. 937 B.C., second son of David and Bathsheba, and David's successor; famed for his love of wisdom and the glory of his reign. The buildings he erected in Jerusalem, including the Temple and a palace on Mount Zion, were raised regardless of expense. Taxes multiplied and reduced large sections of the people to poverty or actual slavery. The Temple took 7½ years to complete.

Solomon Islands, a large group of islands in the W. Pacific; 500 m. E. of New Guinea. They are volcanic in origin, mountainous, wooded, and thickly populated by Melanesians; copra, coconuts and pearl shells are produced. The islands are in two divisions, the S. division forming a British protectorate with an area of 375,000 sq. nautical miles, the headquarters being at Tulagi. Pop. 94,000. The N. division was formerly German and is now administered by Australia under mandate; Bougainville, the largest island, covers 3,880 sq. m., and Buka, 190 sq. m. Pop. about 45,000.

Solomon's Seal (*Polygonatum*), a genus of plants of the natural order Polygonaceae, of which it is the typical genus, comprising 275 species, mostly found in temperate regions, 3 being found in Britain, including the common species (*Polygonatum officinale*), a common English wild-flower, which grows to a height of 1-3 ft. The flowers are greenish white and pendulous, the berries blue-black and pulpy. The name is derived from the somewhat seal-like scars left upon the creeping rootstock by the detachment of the dead annual shoots.

SOLOMON'S SEAL

Solon, Athenian lawgiver, and one of the seven sages of Greece, born in Athens; elected archon in 594 B.C., with power to ordain whatever he might deem of advantage for the benefit of the state, he framed a constitution in which property, not birth, was made the basis of the organization. He divided the citizens into four classes, gave additional power to the assemblies of the people, and made the archons and official dignitaries responsible to them; but after an absence of 10 years he returned to find things lapsing into the old disorder, whereupon he withdrew into private life. (c. 638-c. 558 B.C.)

Solothurn (French: Soleure), a canton of NW. Switzerland, in the Jura, covering 308 sq. m. It is hilly, but fertile and well-cultivated, especially in the valley of the Aar. The inhabitants are mainly German-speaking Catholics. Soleure, the capital, situated on the Aar, 18 m. N.E. of Berne, has a fine cathedral, and manufactures cottons, cloaks and cement. Pop. (canton), 144,290; (town), 13,700.

Solo Whist, a card game resembling whist (q.v.), for four players. A player may combine with his partner in an effort to take eight tricks, or seek to take five or nine tricks—solo or abundance respectively—against the three

remaining players; or by calling *misère* declare his intention of taking no tricks.

Solstice, either of the two points on the ecliptic at which the sun is farthest distant N. or S. from the equator. They mark mid-summer and mid-winter respectively, the times at which these points are reached being about June 21 and Dec. 21.

Solution, a homogeneous mixture of two or more substances, e.g. a gas in a gas, liquid or solid, a liquid in a liquid, a solid in a liquid, or a solid in a solid. If one of the substances in the mixture is in much greater proportion than the other or others, it is known as the solvent, the other substance(s) being known as the solute(s). If, however, no one substance greatly exceeds the rest in amount, the aggregation is usually described as a mixture. There is no hard and fast distinction between solute and solvent, though when a solid is dissolved in a liquid it is conventional to describe the latter as the solvent, no matter what its proportion may be to the solid dissolved.

Solway Firth, an arm of the Irish Sea, separating Cumberland from the S. of Scotland (Kirkcudbright and Dumfries); it is 38 m. in length, and from 2 m. to 22 m. in width, and receives the Annan, Dee, Nith, Eden and Derwent, and has valuable salmon-fisheries; it is spanned near Annan by a railway viaduct 1,960 yds. long.

Solway Moss, a former swampy tract now drained and cultivated, in Cumberland, on the Scottish border, the scene of the defeat of the Scottish army in 1542.

Somaj, *Brahma*. See *Brahma-Samaj*.

Somaliland, British, a British protectorate of NE. Africa, extending 400 m. along the Gulf of Aden from Lahadu Wells to Bandar Ziyada and bounded inland by Abyssinia and French and Italian Somaliland. Skins, gums, livestock and gold are exported. The chief settlements are Berbera, Hargeisa and Burao; the inhabitants are Somalis, Mohammedan nomads who came under British protection in 1884. Area, 68,000 sq. m. Pop. 345,000.

Somaliland, French, colony of the Somal coast, NE. Africa, situated between British Somaliland and Eritrea. Djibouti is the capital and an important port, as also is Obok. The chief industry is the transit trade from the interior of Abyssinia, Djibouti being linked with Addis Ababa by rail. French influence began here in 1862, and was gradually extended by agreement with the native sultans. Area, 8,500 sq. m. Pop. 44,500.

Somaliland, Italian, colony of NE. Africa, extending S. from Bandar Ziyada, on the Gulf of Aden, to the border of Kenya, and covering 194,000 sq. m.; cattle-rearing and agriculture are the chief occupations; the capital is Mogadiscio; in 1936 the territory was incorporated as a province of Italian E. Africa. Pop. 1,032,000.

Somerset, Duke of, Protector of England during the reign of Edward VI. The brother of Jane Seymour, third wife of Henry VIII, he was prominent in the French and Scottish wars in the latter's reign. Created Earl of Hertford, 1537, on Henry's death 10 years later he was made protector and Duke of Somerset; as part of an attempt to marry Edward VI. to Mary Queen of Scots, he repeatedly defeated the Scots, notably at Pinkie, 1547. A zealous Protestant, he strove to introduce the first book of Common Prayer, and having made numerous enemies in this and other ways, was imprisoned in 1549, but soon released; imprisoned again for treason, 1551, he was beheaded on Tower Hill. (c. 1500-1552).

Somerset, Robert Carr, Earl of, Scottish favourite of James I; accompanied the king to England as a page in 1603, and four years later was knighted; by 1612, when he became the king's secretary, his ascendancy over the latter was complete. In 1614 he became Lord Chamberlain, but next year was accused of poisoning Sir Thomas Overbury, who had opposed Carr's marriage (1613) with the divorced countess of Essex; imprisoned until 1622, when he was pardoned. (c. 1590-1645).

Somerset House, a Government building in London, between the Strand and the Victoria Embankment, built on the site of the palace of the Protector Somerset, and opened in 1786; departments accommodated include the Inland Revenue, Audit and Exchequer, Wills and Probate and Registry-General. The E. wing is occupied by King's College.

Somersetshire, a maritime county of England fronting the Bristol Channel, between Devon on the SW. and Gloucestershire on the NE., with Wiltshire and Dorset on the E. and SE.; diversified by the Mendips (NE.), Quantock Hills, Exmoor (SW.) and other smaller elevations, it consists chiefly of level plains largely given over to pasture. It is watered by the Bristol Avon, the Parret and other lesser streams, and its orchards rank next to those of Devon. Taunton is the county town, but Bath is the largest; other towns are Yeovil, Bridgwater, Wells and Weston-super-Mare. Area, 1,621 sq. m. Pop. 475,000.

Somerville, city of Massachusetts, U.S.A., in Middlesex county, on the Mystic river, adjoining Boston, of which it is a residential suburb. Pop. 103,900.

Somme, dept. of N. France, fronting the Seine-Inférieure, on the SW., and Pas-de-Calais, on the N.; one of the most prosperous agricultural and manufacturing districts of France, it covers 2,440 sq. m.; Amiens is the chief town. Pop. 466,600. The district was the scene of two of the biggest battles of the World War; the first was fought from July to November, 1916, when an Allied offensive gained ground at tremendous cost to both sides; the second was from March to April, 1918, when Germany launched her final offensive and met with some partial, though temporary, success.

Somme, river of N. France, which rises in the dept. of Aisne, near St. Quentin, and flows 150 m. SW. and NW. to the English Channel, which it enters near St. Valéry; it is navigable as far as Abbeville, an ancient town of Gujrat.

Somnath, India, in the SW. of the peninsula of Kathiawar; close by is a Hindu temple, despoiled in the 11th Century of its treasures and gates. In 1842 Lord Ellenborough brought from Afghanistan what he supposed to be the famous "Gates of Somnath," which are now in the arsenal of Agra. Pop. 7,000.

Sonata, a musical composition usually designed for one or two instruments; it developed in the 18th Century out of the customary suite of dance measures, and consists of several movements (generally three or four) related in key but contrasted in tempo.

Song, a short poem to be sung to music, but more especially a musical setting of a short poem. The word is usually applied to solos, but also to compositions for more than one voice. The "madrigal" of the Elizabethan period was a composition in contrapuntal style, being a part-song for voices only. "Folk-songs" are those spontaneously created by peoples with an intuitive gift for matching national sentiment with

music. Cecil Sharp's work in collecting English folk-songs has caused a revival of interest in them. Earlier English song-writers include Purcell, Handel and Dr. Arne, while among modern song-writers are Elgar, Delius, Sterndale Bennett, Holst, Sir Charles Parry, Sir Charles Stanford, Arthur Somervell, Vaughan-Williams, Roger Quilter, John Ireland, Peter Warlock and Arthur Bliss. The leading German song-writers are Schubert, Mendelssohn, Loewe, Brahms, Schumann, Hugo Wolf and Franz Liszt. Later names are Richard Strauss, Joseph Marx, Max Reger, Gustav Mahler, Hans Pfitzner, Paul Graener, Felix Weingartner, Zilcher and numerous others. Among the French school are Duparc, Fauré, Gounod, Debussy, Ravel, Saint-Saëns, Massenet and Honegger.

Sonnet, a form of poetical composition invented in the 13th Century, consisting of 14 decasyllabic or hendecasyllabic iambic lines, rhymed according to two well-established schemes which bear the names of their two most famous exponents, Shakespeare and Petrarch. The Shakespearean sonnet consists of three four-lined stanzas of alternate rhymes clinched by a concluding couplet; the Petrarchan of two parts—an octave (the first eight lines) rhymed abbaabba and a sestet (the concluding six lines) arranged variously on a three-rhyme scheme.

Soochow, city and treaty port of the province of Kiangsu, 50 m. NW. of Shanghai, on the Grand Canal; walled all round; it carries on printing and manufactures fine silk. Pop. 260,000.

Sophia, granddaughter of James I. of England by his daughter Elizabeth; in 1658 she married Ernest Augustus, Elector of Hanover; their son George became, in 1701, George I. of England. (1630-1714).

Sophia, St., or "Holy Wisdom," the name of several Christian churches, especially the famous Byzantine church at Istanbul (q.v.), erected by Justinian.

Sophists, a class of teachers in ancient Greece, which arose about the middle of the 5th Century B.C. and later developed the principle that we have only a subjective knowledge of things, and no knowledge at all of objective reality; by means of a subjective dialectic, they sought to destroy all that had ever been objectively established, such as the laws of the state, inherited custom, religious tradition and popular belief.

Sophocles, Greek tragic poet, born in Athens. His first appearance as a dramatist was in 463 B.C., when he had *Æschylus* as his rival and won the prize with his *Triptolemus*. He was afterwards defeated by Euripides, but retrieved the defeat the year following by the production of his *Antigone*. In 440 B.C. he served as a general under Pericles in the Samian War. Of his hundred or so tragedies only 7 survive—*Aias*, *Antigone*, *Electra*, *Œdipus Tyrannus*, *Trachiniae*, *Œdipus Coloneus* and *Philoctetes*—all alike remarkable for the intense humanity, sublime passion and lofty morality that inspires them. (495-406 B.C.).

Soprano, the highest type of female voice, with a range usually from C below the treble clef to G or A above it. Until the late 18th Century adult male sopranos ("castrati") were frequently employed, both in operatic and church music.

Sorbonne, a celebrated college of founder, Robert de Sorbon, chaplain to Louis IX. in the 13th Century. It maintained a predominant influence on the theological thought of Europe until the rise of the new learning of the Renaissance (16th Century). Suppressed in 1792, during the Revolution, it was revived by Napoleon in

1808, and is at present the seat of the Académie Universitaire de Paris, with faculties of science and literature.

Sordello, Italian troubadour, born at Mantua. In 1220, having seduced the wife of his patron at Verona, he was forced to flee to Provence. Later he served Charles of Anjou, and in 1266 was imprisoned at Naples; his end is obscure. Several of his satires, love songs and longer poems survive. He figures in Dante's *Il Purgatorio* and in a famous poem by Robert Browning.

Sorghum, an annual cane-like cereal, bearing a dense head of spikelets, with small corn-like seeds. *Sorghum vulgare* is the Indian or Great Millet, or Guinea-corn. In India it forms with rice and wheat one of the staple foods of the people. Bread, porridge, etc., are made from it; its seeds, when crushed, constitute an auxiliary food for cattle, sheep and poultry. It is also extensively cultivated in various parts of Africa.

Sorrel, the common name of a number of British perennial meadow or pasture plants, containing a high proportion of potash oxalate, giving it an acid taste, the leaves sometimes being used as a salad. Important species are the sorrel-dock (*Rumex acetosa*) of the order Polygonaceae. Some other species of *Rumex* are also known as sorrels. Wood-sorrel (*Oxalis acetosella*) is a small British herb, the leaves of which droop or "sweep" at night and in cold weather.

SORREL
(*Rumex acetosa*)

Sorrento, a watering place on a promontory of the Bay of Naples, Italy. Fruit growing is carried on in the neighbourhood, and wine and silk are manufactured. It was the birthplace of Tasso. Pop. c. 9,000.

Sortes Virgilianae ("Virgilian lots"), a common method of "fortune telling" adopted in the Middle Ages; it consisted in opening a copy of Virgil's *Aeneid* at random, putting the finger on a passage, and deciding one's course of action on the basis of the passage so chosen.

Sou, a former French coin of silver or copper, equivalent to one-twentieth part of the livre. The name is still popularly applied to the five-centime piece.

Soufflé, a dish consisting of beaten whites of egg, flavoured with some essence or other agent, and baked until a brown puffy top is formed. The most usual soufflé flavourings are chocolate, coffee, cheese, ginger and lemon.

Soul, that part of the nature of man (or other animal) which is conceived of as immaterial; generally used to mean the seat of his sentiments, emotions and aspirations, but not necessarily including his mind, intellect or apparatus of thought. In Christian theology the soul, or principle of divine life, is usually conceived of as being infused into the body at conception or birth, and is differentiated, though not always very clearly, from the "spirit," or the highest of the three parts of man's nature. The Scholastics distinguished between the vegetative soul, or principle of life, common to man and other animals, and the rational soul, peculiar to man (though perhaps possessed also by angels and other higher spiritual beings, if such exist). In Eastern religions the soul is frequently conceived of as an eternal principle which makes its home in a succession of differing bodies; the southern school of Buddhists denies the existence of a soul

altogether, asserting that what man thinks of as such is nothing more than a series of continuously changing states. Other thinkers, including many mediæval Arabic philosophers and later pantheists, would make all souls parts of, or manifestations of, a single "world-soul."

Soult, Nicholas-Jean de Dieu, marshal of Bastille, dept. of Tarn; enlisted as a private in 1785, and by 1794 was general of a brigade; gallant conduct in Swiss and Italian campaigns under Masséna won him rapid promotion, and in 1804 he was created a marshal; served with Napoleon in Germany, and led the deciding charge at Austerlitz, and for his services in connection with the Treaty of Tilsit received the title of Duc de Dalmatie; at the head of the French army in Spain he outmanœuvred the English in 1808, conquered Portugal, and opposed to Wellington a skill and tenacity not less than his own, but was thwarted in his efforts by the obstinate incompetence of Joseph Bonaparte; turned Royalist after the abdication of Napoleon, but on his return from Elba rallied to the emperor's standard, and fought at Waterloo; was subsequently banished, but restored in 1819; became active in the public service, and was honoured as ambassador in England in 1838; retired in 1847 with the honorary title of "Marshal-General of France." (1769-1851).

Sound, a sense-impression produced on the impact of waves in the atmosphere vibrating at rates roughly between 20 and 20,000 per second—vibrations at higher or lower rates than this being inaudible. If the waves follow one another at regular intervals they are perceived as a musical note; if not, they constitute a noise. The pitch of a musical note is determined by the number of vibrations which reach the ear per second. If this number is large the pitch is high. Sound waves travel in air at a speed of 1,100 ft. per second, and since light travels at a much greater speed (186,000 miles per second), a peal of thunder is always heard after the appearance of a lightning flash which occurs simultaneously with it. For the same reason soldiers at the rear of a long column marching behind a band usually appear to be out of step with those in front.

Sound waves are reflected by any large obstacle, and produce an echo if the time which elapses between the arrival of the direct and reflected wave is sufficient to enable an observer to distinguish them. In water sound travels at a speed of 4,500 ft. per second, and the depth of water may be determined by transmitting sounds through it to the bottom, and measuring the interval which elapses before the echo is heard. High pitched notes are reflected better than those of lower pitch. Hence the high pitched sounds produced by traffic in a busy street are reflected backwards and forwards between the buildings on either side, and from an adjoining quiet side street a low rumble is heard.

Sound, a strait 50 m. long, between Sweden and Denmark, which connects the Kattegat with the Baltic Sea.

South Africa, the Union of British dominion, extends from the Cape of Good Hope to the E. Limpopo, with a total area of 472,550 sq. m. The Orange, the Vaal, and the Limpopo are the chief rivers, and Table Mountain, the Bergens, Drakensbergen, Nieuweveld, Roggeveld, and Sneeuwbergen are the principal mountains. Originally discovered by Bartholomew Diaz, a Portuguese, in 1486, the Cape of Good Hope was visited 11 years later by Vasco de Gama; it was nearly 200 years later that the Dutch and English began to settle, and in 1814 the Cape became a British

colony, as did Natal in 1843. The Transvaal and Orange Free State were colonized by Dutch Boers (q.v.), and at the end of the last century there was a clash with Britain that resulted in the Boer War (q.v.), and the ultimate establishment of the Union of South Africa as a British Dominion. Dominion status dates from 1909.

The Union comprises Cape Province, Natal, the Orange Free State, and the Transvaal, and is governed by a Governor-General, an executive council, and two Houses of Parliament, which meet at Cape Town, though Pretoria is the seat of government. In addition, each province has its own Provincial Council. Agriculture is the main occupation of the people, wheat and fruit-growing being the chief industries, though large quantities of cotton and wool are also produced; there is a growing wine industry, and tea and sugar are also cultivated. Industrial development is rapidly proceeding, especially in the Transvaal. Gold mining is the main source of wealth, and diamonds, coal, copper and tin are also mined. Gold, wool, hides and skins, diamonds and citrus fruits are, in that order, the principal exports.

Since 1920 the Union Government has held a mandate for the former German territory of South-West Africa; it is seeking to take over from Great Britain the administration of the native protectorates of Basutoland, Bechuanaland, and Swaziland. The white population is largely Dutch-speaking, and mainly Protestant. The total population is 9,590,000, including about 2,000,000 of European extraction.

South Africa Company,

The British, a chartered company founded by Cecil Rhodes in 1889 to administer Rhodesia. Besides supervising trade it was responsible for governing the district, and it also rented land to settlers. When the charter expired in 1923, Southern Rhodesia was granted responsible self-government, and a year later the Company was relieved of the administration of Northern Rhodesia, which was taken over by the Colonial Office.

Southall, a borough of Middlesex, England, 9 m. W. of London; it is largely a residential suburb of the metropolis, but has motor-car making, chemical and other industries. Pop. 49,500.

South America. See America, South.

Southampton, the third seaport of Great Britain, in Hampshire, 79 m. SW. of London, situated on a small peninsula at the head of Southampton Water between the mouths of the Itchen (E.) and the Test (W.); portions of the old town walls and four gateways still remain; is the headquarters of the Ordnance Survey; has splendid docks, the property of the Southern Railway, which have recently been greatly enlarged and improved, and is an important port of call for liners and cargo vessels for America, Canada, the West Indies, Brazil, and South Africa; yacht and ship-building and engine-making are flourishing industries. There is a university college with buildings at Highfield. Pop. 177,500.

Southampton, *Henry Wriethesley*, Earl of, born at Cowdray, Sussex; he was an early patron of Shakespeare, who dedicated to him *Venus and Adonis* and *Lucrece*, and most of whose sonnets are by some supposed to have been addressed to him. For his part in the Earl of Essex's rising, 1601, he was condemned to death, but was merely confined in the Tower and deprived of his titles, which were restored on the accession of James I. He interested himself in colonial projects, and died in the service of the Dutch at Bergen-op-Zoom. (1579-1634).

Southampton Water, an inlet of the sea on the S. coast of England, running about 7 m. NW. from the Solent past Southampton. It is about 2 m. broad at its entrance near Calshot Castle. On the eastern shore are the ruins of Netley Abbey, on the W. the New Forest. It receives the rivers Itchen and Test, and forms an excellent harbour for the passenger liners and other vessels using the port of Southampton.

South Australia, third largest of the States of Australia, stretches N. and S. in a broad band through the heart of the continent from the Southern Ocean to the Northern Territory, having Queensland, New South Wales, and Victoria on the E., Western Australia on the W., and the Northern Territory on the N. Until 1926 it included the last-named, which was then constituted a separate Territory under the direct administration of the Commonwealth Government. South Australia begins about 26° S. latitude, and is traversed southwards by the Finke R. as far as Lake Eyre (3,706 sq. m.), by the Flinders Range, and the lower Murray R. in the E., and diversified here and there by low ranges and Lakes Amadeus (NW.), Torrens and Gairdner (S.). The S. coast is penetrated by the great gulfs of Spencer and St. Vincent, round and to the N. and E. of which the bulk of the population is gathered; wheat, fruits, and wine are produced, and there are important copper mines; chief exports, wool, wheat, barley, meat, iron ore, and copper. The railway and telegraph systems are well developed, the Overland Telegraph Line (1,973 m.) stretching across the continent from Adelaide to Darwin being a marvel of engineering enterprise. Began to be settled in 1836, and five years later became a Crown colony. The capital is Adelaide. Area, 380,100 sq. m. Pop. 589,000.

South Bend, a city of Indiana, U.S.A., situated on the St. Joseph R., 85 m. SE. of Chicago. It has many manufactures, including agricultural implements, freight cars, woollen goods and paper, and is the seat of the important university of Notre Dame. Pop. 104,200.

South Carolina. See Carolina, South.

Southcott, Joanna, English religious fanatic, born in Devon, of humble parents; imagined herself to be with child, and predicted she would on a certain day give birth to the Prince of Peace, for which occasion great preparations were made, but she died of dropsy two months after the time predicted. She left a box with instructions that it was to be opened in time of national crisis in the presence of a number of bishops; her box was X-rayed in 1927 and found to contain only rubbish, though her followers declared that the box in question was not the genuine one. (1750-1814).

South Dakota. See Dakota, North and South.

Southend-on-Sea, the Thames estuary, one of the largest and most frequented holiday resorts in England; within the borough borders are Westcliff, Leigh, Thorpe Bay and Shoeburyness; its pier is the longest in the country. Pop. 136,000.

Southern Cross, a constellation of the southern heavens, the five principal stars of which form a rough and somewhat irregular cross, the shape of which is gradually changing. It corresponds in the southern heavens to the Great Bear in the northern.

Southern Railway, the smallest of the four main railway systems of Great Britain, founded in 1825 by the fusion of the London

and South Western, London Brighton and South Coast, South Eastern and Chatham, and some smaller systems. A great part of the mileage has been electrified, including the whole of the London suburban tracks and the lines from London to Hastings, Brighton and Portsmouth. The London terminal stations are Waterloo, Victoria, London Bridge, Cannon Street, Charing Cross and Holborn Viaduct.

Southernwood, a scented worm-wood (*Artemisia abrotanum*), a shrubby, hoary plant of the order Compositae, with yellow flowers. Popular names for it are "old man" and "boy's love."

Southey, Robert, English poet-laureate, born at Bristol; was expelled from Westminster School for a satirical article in the school magazine against flogging; in the following year (1793) entered Balliol College,

where he only remained one year; married (1795) clandestinely Edith Fricker, sister to Mrs. Coleridge, and visited his uncle at Lisbon, where in six months he laid the foundation of his knowledge of Spanish history and literature; still unsettled he again visited Portugal, and finally was relieved of pecuniary difficulties by the settlement of a pension on him by an old school friend, which he relinquished in 1807 on receiving a pension from the Government; meanwhile had settled at Keswick, where he prosecuted with untiring energy the craft of authorship; *Joan of Arc*, *Thalaba*, *Madoc* and *The Curse of Kehama* won for him the laureateship in 1813, and in the same year appeared his prose masterpiece *The Life of Nelson*. Of numerous other works mention may be made of his *Histories of Brazil and the Peninsular War*, *Lives of Bunyan and Wesley*, and *Colloquies on Society*. (1774-1843).

ROBERT SOUTHEY

South Foreland, a chalk headland, in Kent, England, between Dover and Deal, at the S. extremity of the strip between the Kentish coast and Goodwin Sands known as "The Downs."

South Georgia, an island in the Atlantic Ocean, about 800 m. SE. of the Falkland Is., of which it is a dependency. It is a mass of high snow-covered mountains. A whaling station has been established at Grytviken. Pop. c. 100.

South Island, the largest of the three principal islands of New Zealand. It has an area of 58,100 sq. m. The chief towns are Christchurch, Dunedin, and Invercargill. Sheep farming, dairying, and butter and cheese-making are the chief industries. Pop. 556,000.

Southport, seaside resort of Lancashire, shire, England, situated on the southern shore of the Ribbles estuary, 18 m. N. of Liverpool; is a town of quite modern growth. Pop. 79,300.

Southsea. See Portsmouth.

South Sea Bubble, the disastrous financial project set on foot in 1711 by Robert Harley to relieve the national debt and restore public credit, which produced an unparalleled rush of speculation, ending in the ruin of thousands of people. Through the efforts of Harley a company of merchants was induced to buy up the floating national debt of £10,000,000 on a Government guarantee of 6 per cent. interest, and a right to a monopoly of trade in the South Seas. The shares rose by leaps and bounds as tales of the fabulous wealth of the

far South Seas circulated, till, in 1720, £300 shares were quoted at £1,000; earlier in the same year the company had taken over the entire national debt of upwards of £30,000,000. In the craze for speculation which had seized the public hundreds of wild schemes were floated. At length the "Bubble" burst. The chairman and several directors of the company sold out when shares had reached £1,000; suspicion followed, confidence vanished, stock fell, and in a few days thousands from end to end of the country were bewailing their ruin. The private estates of the fraudulent directors were confiscated for the relief of the sufferers. To Sir Robert Walpole belongs the credit of extricating the finances of the country from the muddle into which they had fallen. The South Sea Company continued to trade along legitimate business lines until 1750.

Southwark, metropolitan borough of the Thames, London, on the Surrey side of the Thames, opposite the City. It is known pre-eminently as "The Borough," and until recent years was for certain purposes under the immediate jurisdiction of the City authorities. It is partly industrial and partly residential; its buildings include the Anglican cathedral of St. Saviour and the Catholic cathedral of St. George. Its streets and alleys play a large part in the novels of Dickens. Pop. 152,000.

Southwell, village-city in Nottinghamshire, shire, England, 16 m. from Nottingham; it is famous chiefly for its minster, mostly of 12th Century work; the nave is Norman; it was made a cathedral church in 1884. Pop. c. 3000.

Southwell, Robert, English poet; born in Norfolk; studied at Douai, and became a Jesuit priest; came to England as a missionary, was thrown into prison, tortured ten times by the rack, and after three years confinement executed at Tyburn as a traitor for disseminating Catholic doctrine. His poems, religious chiefly, were finally collected under the title *St. Peter's Complaint, Mary Magdalen's Tears, and Other Works*. *The Burning Babe* is one of his best-known productions. (c. 1560-1595).

South-West Africa, a man-territory of the Union of South Africa, and formerly a German colony. Since 1925 it has had a measure of self-government subject to the Union. It forms a portion of the South African plateau, having a mean average height of about 3,600 ft. It is interspersed with small mountain ranges. Brandberg has an elevation of 8,550 ft., and the Moltkeblick, 8,148 ft. Apart from the boundary rivers there are no perennial streams. The country is fairly rich in minerals, diamonds and vanadium being worked; stock-raising is the principal industry, the country being generally unsuitable for agriculture. There is a considerable native population, largely of Hottentots and Bushmen. During 1937 the Government found it necessary to curb the political activities of the German-speaking inhabitants, numbering some 10,000, who have been affected by Nazi ideals.

Southwood, First Baron, cr. 1937, of Fernhurst (Julius Salter Elias); newspaper proprietor and publisher. Born at Birmingham. At the age of 16 worked as a newsboy. Now directs over 60 publications, totalling a sale of nearly 20,000,000 copies weekly, including *Daily Herald*, *The People*, *John Bull*, *Sporting Life*, *Woman*, *Ideal Home*, *Everywoman's Picturegoer*, *Passing Show*, *Weekly Illustrated*, *Tatler*, *Sketch*, *Bywander*, *Illustrated London News*, *Sphere*, *Illustrated Sporting and Dramatic News*, *Britannia and Eve*, *Drapers' Record*, *Men's Wear*, etc., etc. Festival President in 1931 of the News-vendors' Benevolent and Provident Institution, Festival President of the

Printers' Pension, Almshouse and Orphan Asylum Corporation in 1934, Trustee of the Newvenders' Benevolent and Provident Institution, Trustee of the Printers' Pension, Almshouse and Orphan Asylum Corporation, President of the Lloyd Memorial Carlton Seaside Home, President of the Hornsey Central Hospital, President of the London School of Printing and Kindred Trades, President of Association of Teachers of Printing and Allied Subjects, President of the Advertising Association, 1938, etc., etc.

Sovereign, the standard gold coin current in Britain of 22 carat fineness, value one pound sterling or 20 shillings; weight 123.274 grains troy. It became the standard of British monetary value by the Coinage Act, 1816. Since the World War it has been replaced in ordinary use by paper Treasury, or later Bank, notes. Its actual gold value in August, 1938, was about 33s. 5d.

Sovereignty. The sovereignty of a State is the person, body, or authority whose will is supreme and cannot be contravened by the subjects of the State. It is quite possible for the legal and actual sovereignty to be separated; thus, in Soviet Russia legal sovereignty would appear to reside with the Supreme Soviet of the U.S.S.R., but in actual fact it is exercised by the Communist Party. In Great Britain the legal sovereignty resides in the King and Parliament; in some states, such as the U.S.A., which comprises a federation of so-called sovereign states, sharing sovereign powers with a Federal government, it is not easy to say wherein resides the legal sovereignty. In a democratic government, such as those of Great Britain, France, and the U.S.A., the people hold the political sovereignty, but in a totalitarian state the popular will is subordinated to that of the dictatorship, which is both legal and political sovereignty. Each state in international law is sovereign in and over its territory but, though this sovereignty presupposes a certain amount of independence, it is not necessary that there should be complete independence; e.g., in many states the control of foreign policy may be dependent on the will of another or protecting state. The sovereignty of mandated territories lies in the mandatory state which is under obligation to make a report annually to the League of Nations.

Soviet, a Russian name for a workers' council, such as were first formed in the unsuccessful rising of 1905, and became the organs of government after the 1917 revolution; the Soviet system is based upon the idea of a series of local elective bodies from the village and town soviets at the base to the supreme Soviet of the U.S.S.R., at the top. Thus the primary assembly, council or soviet of all the workers in a particular factory, or of all the agricultural workers or peasants in a particular village, sends representatives to the next higher soviets, or provincial congresses of soviets; thence go delegates to the All Russian Congress which, according to the Constitution, meets every two years.

Soya, or Soy, bean, the seeds of a leguminous plant (*Glycine soja*) indigenous to Ceylon, Manchuria, Japan and other parts of Asia. Its seeds are crushed to make margarine, and are used in the East to produce the table condiment, soya bean sauce, as well as for fodder and as a manure crop. Another cultivated variety of similar commercial value is sometimes distinguished as a separate species, the *Glycine hispida*.

SOYA BEAN

Spa, a watering-place in Belgium, 20 m. S.E. of Liège; a favourite health and fashionable resort on account of its springs and its picturesque surroundings. For part of the World War it was the general headquarters of the German army, and the residence of the Kaiser after the summer of 1918. It was in an hotel here that he abdicated on November 9, and it was from his château the following day that he escaped into Holland. Here also were conducted negotiations for the Armistice, and in 1920 an international conference on reparations payments. Pop. c. 9,000.

Spa, a general name for a mineral spring or for the locality in which such springs occur. Among well-known Continental spas are Spa in Belgium, which has given its name to them as a class, Aix-les-Bains, Baden, Contrexéville, Homburg, Karlsbad, Kissingen, Seiditz and Wiesbaden. British spas include Bath, Buxton, Leaton, Cheltenham, Harrogate and Matlock.

Space, extension in three dimensions; in unbounded or unlimited extension in every direction, regarded as empty of matter. Kant concluded that Space, like Time, was not an objective reality, but only a subjective appearance under which we cognise a reality which in itself is non-spatial as well as non-temporal, or one of the necessary forms by which outer sense material must be apprehended to enable us to arrive at necessary *a priori* truths and to render mathematics possible.

Before Kant, Berkeley taught that the idea of space is conceived under the joint influence of retinal sensations, and of muscular sensations of motion in a way analogous to that by which the laws of dynamics have been evolved from experience. This theory was elaborated by Mill, Lotze, and Wundt, and is accepted by most modern scientific psychologists.

Einstein's theory of relativity demands a complete revolution in the fundamental idea of three-dimensional geometrical space, requiring us to abandon Newton's conception of "absolute space" as that which "remains always similar and immovable." The system of geometry imposed by the theory of Relativity is four-dimensional, four factors being essential in determining the position of an "event" as well as the three dimensions of the place of the "event"; in other words, the position of an event is determined in space-time, and this space-time is non-Euclidean in its properties.

Spaghetti, a foodstuff made from wheat paste, in the form of long thin tubes, resembling macaroni, but smaller in diameter; popular in Italy and Southern France. It is now also manufactured on a large scale in the U.S.A. The hard wheats from which it is made are rich in the gluten which is an important element in its popularity.

Spahi, an Algerian cavalry soldier serving in the French army. The name is derived from a Persian word which has also given rise to "sepoy" (q.v.).

Spahlinger, Henry, Swiss scientist; devoted himself to the study of bacteriology, especially to tuberculosis and its treatment; during the World War he was engaged in the output of tetanus serum; director of the Geneva Bacteriological Institute. (1882-).

Spain, a republic of SW. Europe, which, with Portugal, occupies the entire Iberian Peninsula, and is divided from France on the N. by the Pyrenees, and on the E. and S. is washed by the Mediterranean; the NW. corner fronts the Bay of Biscay (N.), and the Atlantic (W.), while Portugal completes the western boundary. Its area is, together with the Canaries and the Balearic Isles, divided

into 50 provinces, although the names of the 14 old kingdoms, states and provinces (New and Old Castile, Galicia, Aragon, etc.) are still in use. The coast-line is short compared with its area. It is in the main a highland country, a vast plateau, 2,000 to 3,000 ft. high, occupying the centre, buttressed and crossed by ranges (Sierra Nevada in the S., Sierra de Guadarrama, Sierra Morena, etc.), and diversified by the long valleys of the Ebro, Douro, Tagus, Guadalquivir, and other lesser rivers. Climate varies considerably, but, over all, is the driest in Europe; agriculture is by far the most important industry, and Valencia and Catalonia the provinces where it is most successfully carried on, wheat and other cereals, the olive and the vine being the chief products. Other important industries are mining, the Peninsula being extremely rich in the useful minerals, merino sheep farming, anchovy and sardine fisheries, wine-making and the manufacture of silk, leather, paper, and cotton; chief exports are wines, fruits, mineral ores, oil and cork. Madrid, Barcelona, Valencia, Seville, and Malaga are the chief towns. Roman Catholicism is the religion of the majority; until very recent years education was in a backward condition, and illiteracy common, though great strides were made in this field after 1931, under the Republican Government. Area, 196,600 sq. m.; Pop. 23,570,000.

The outstanding fact in the history of Spain, after the downfall of the Roman Empire, of which she had long formed a part, is the national struggle with the Moors, who overran the Peninsula in the 8th Century, firmly established themselves, and were not finally overthrown till Granada, their last possession, was taken in 1492; 16 years later the country became a united kingdom, and, for a brief period, with its vast American colonies and wide European possessions, became, in the 16th Century, the dominant power of Europe; thereafter she lagged more and more in the race of nations, and her once vast colonial empire gradually crumbled away till practically nothing remained. Spain succeeded in keeping out of the World War, but thereafter the history of the country was one of unrest and violent political changes.

Up to 1931 the government was a hereditary and avowedly constitutional Monarchy with a Cortes consisting of a Senate and a Chamber of Deputies, though universal suffrage, which prevailed, was for Spain a modern innovation. But beneath were corruption and intrigue in high places seeking to stem the ever-rising tide of threatening revolution. In 1931 Alfonso XIII., abandoned by his ministers, his army and even his courtiers, fled to England, and a republic was proclaimed. Between 1931 and 1936 there were no fewer than 8 changes of government, notwithstanding that the new Constitution, under which all these changes took place, was a most enlightened one. Its fundamental principles were that Spain was a democratic republic of workers of all classes, organized in a regime of liberty and justice, constituting an integral State, but allowing for a large degree of autonomy for such regions as Catalonia and the Basque Provinces; having no official religion, and with all citizens equal before the law; even war was renounced as an instrument of national politics.

In August, 1932, General Sanjurjo, head of the picket guard, who had refused to employ his picked force of 40,000 men to save the monarchy, brought out the Seville garrison to overthrow the new regime, but failed and fled. His attempt exasperated the Anarchists of Catalonia and Andalusia, and very soon there was armed revolt against the republic which was only finally suppressed after the Government had introduced Moorish troops. Later power fell to the parties of the Right,

with an alliance between the old Republican party led by Lerrour and the strong Catholic party led by Gil Robles. During this regime occurred a revolt of miners in the Asturias, which was suppressed. Finally, early in 1936, the newly-created Popular Front, composed of Socialists, Communists, and Left Republicans, won an overwhelming electoral victory, on which supervened, almost immediately, the Spanish Civil War (q.v.).

Spalding, a market town in Lincolnshire, England, 34 m. SE. of Lincoln, in the heart of the Fens; has a 13th Century church and the ruined Wykeham Abbey in the vicinity; chief industries are agricultural produce and the raising of bulbs. Pop. 12,400.

Spandau, town of Prussia, Germany, in the confluence of the Spree and Havel, 8 m. W. by N. of Berlin, in which it is now included. In the "Julius Tower" of the powerful citadel was preserved before the World War the German war-chest of 26,000,000, retained from the French indemnity of 1871. There is a fishing industry, and porcelain and cloth are manufactured. Pop. c. 100,000.

Spandrel, in architecture, the space between the outer curves of an arch and the square head over it; also the space between the outer mouldings of two arches and the string-course.

SPANDREL

Spaniel, a large drooping-eared, long-haired variety of dog, with silky coat, used by sportsmen and kept as a pet. The Cocker is a small breed used for flushing woodcock; its coat is variously black-and-white, red-and-white or liver-and-white. The Springer is a slower and heavier dog; varieties of the Springer are the Clumber and Sussex; their colour is generally lemon-and-white. The Water spaniel has short crisp curls, long deeply-fringed ears, broad spreading feet, and is usually liver-and-white in colour. There are many varieties of toy spaniels, all characterized by short muzzles and bulging eyes.

Spanish-American War, a conflict between Spain and the U.S.A. in 1898, consequent upon disturbances in Cuba and the blowing-up in Havana Harbour of an American battleship, the *Maine*. The Americans occupied Cuba and the Philippine Islands, which, by the peace treaty of the following year, were, with Puerto Rico, finally evacuated by Spain, Cuba becoming independent under American protection, Puerto Rico and the Philippines falling to the United States.

Spanish Civil War, a conflict which opened in July, 1936, the immediate cause being the murder of the Monarchist leader, Calvo Sotelo, while the real cause was the conflict between the immature Republican elements and the old order as represented by the Army leaders. It began with a revolt which broke out in Morocco on July 18. Fighting then spread to Seville, Malaga, Cadix, and the Canaries, while the Spanish Foreign Legion, organized by Franco (q.v.) and other rebel elements, held Melilla and Ceuta against Government forces.

The rebels soon took Pamplona, Zaragoza, Valladolid, and Burgos, which last-named became their headquarters in the N. The conflict in European eyes now took on the aspect of a struggle between Fascists and Communists, and sympathies were aligned accordingly. Great Britain and France led efforts to arrange a pact of non-

intervention, but though this was eventually accomplished with some little success in 1937, large bodies of troops had previously been landed in Spain by Germany and Italy. In August, 1936, insurgent cruisers shelled San Sebastian, and Irun was bombarded from the air, both towns falling. A remarkable resistance to the Government was offered by rebel forces in the fortress of the Alcazar at Toledo, the greater part of which was blown up during the operations. Toledo fell to Franco on September 28. On November 4, the insurgents captured Getafe, the airport of Madrid, but the aerodrome had been completely destroyed. The fighting for the city was protracted and bitter in the extreme.

In the early part of 1937 insurgent vessels, endeavouring to blockade government territory, sank a number of ships off the Spanish coasts; in April the world was horrified by the destruction from the air by the rebel forces of Gernika (Guernica), the ancient Basque capital. Continual fighting round Madrid failed to win the city for the rebels, but Bilbao was occupied in June, and Santander in August. The government established itself at Valencia, and later in Barcelona as the year advanced, and in 1938, Franco's rebel army held all W. and N. Spain, but Catalonia and most of Aragon were firmly held by the Republicans. Naval attacks on neutral shipping by "unknown submarines" became a frequent feature of operations in the Mediterranean, and in spite of Italian denials many observers continued to suppose that "unknown" meant in fact Italian. One of the fiercest battles of the War developed on the Ebro in September, 1938, following a successful government offensive a month earlier. See also **Non-Intervention Committee**.

Spanish Main (i.e. mainland), a name given at one time to the S. American provinces of Spain bordering on the Caribbean Sea, and also to the Caribbean Sea itself; was the scene of the activities of buccaneers, whose refugees were in its many islands.

Sparking Plug, an electrical device used in internal combustion engines for igniting the mixture of air and petrol by which the motive force is supplied to the engine.

Sparrow, or **House Sparrow** (*Passer domesticus*), a small house-haunting bird of the Finch family, the inveterate follower of civilized man. Ranges over the whole British Isles, Europe, N. Africa and Asia. The plumage is brown striped with black, head bluish-grey. It has no song apart from the familiar "chirrup." An allied species, the Tree Sparrow (*Passer montanus*) has a black patch on the cheeks and a white patch at the throat. It occurs in hedgerows, etc., in the country. The Hedge Sparrow (*Prunella modularis*) is also a common species.

Sparrow Hawk, the common name of a genus (*Accipiter*) of birds of prey of the Falconidae family. The common species *Accipiter nisus* is widely distributed in the British Isles. It is dark grey on the back, reddish white barred with brown underneath, about 12 in. long, and is very destructive to young birds and small animals.

Sparta, or **Lacedaemon**, the capital of ancient Laconia, in the Peloponnese, on the right bank of the Eurotas, 50 m. from the sea; was 6 m. in circumference, consisted of several distinct quarters, originally separate villages, never united into a regular town. It

was unvalued, depending for defence on the bravery of its citizens. Its mythical founder was Lacedaemon, who called the city Sparta from the name of his wife. One of its early kings was Menelaus, the husband of Helen; Lycurgus (q.v.) was its law-giver; its policy was aggressive and its sway gradually extended over the whole Peloponnese, extinguishing at the end of the Peloponnesian War the rival power of Athens, which for a time rose to ascendancy, and its supremacy was unquestioned thereafter for thirty years, until all Greece was overborne by the Macedonians.

Spartacus, leader of the revolt of the slaves at Rome, which broke out about 73 B.C.; was a Thracian by birth, a man of powerful physique, in succession a shepherd, a soldier and a captain of banditti; was in one of his predatory expeditions taken prisoner and sold to a trainer of gladiators, and became one of his slaves; persuaded his fellow-slaves to attempt their freedom, and became their chief and that of other runaways who joined them. Two years they defied and defeated one Roman army after another sent to crush them, and laid Italy waste, till at the end of that time Licinius Crassus overpowered them in a decisive battle at the R. Silarius, in which, in 72 B.C., Spartacus was slain. The German Communist organization, which under Karl Liebknecht and Rosa Luxemburg led a revolt in 1919, took the name Spartakusbund from him.

Spasm, a sudden convulsive movement, or contraction of a muscle, either clonic, when there is a rapidly repeated succession of contractions and relaxations of the muscles, or tonic, as in tetanus, when the contraction persists for some time without relaxation. The affection is in either case due to abnormal working of the central nervous system and is a symptom rather than a disease.

Spawn, the name given to the eggs of fishes and amphibians. In the case of most fishes the spawn is deposited by the female outside her body, and impregnated by the male ejecting his milt or spermatic fluid over the ova so deposited. The spawn before deposition is commonly known as "hard," and the milt as "soft," roe.

Speaker of the House of Commons, the member who is elected by the House of Commons to preside over its deliberations and to represent the House as a whole when the Commons and Lords meet together in presence of the King. He possesses a casting vote, which he uses if necessary, but does not take part in debates or vote as an ordinary member. By custom he is re-elected at the beginning of every Parliament until he sees fit to resign, and is not generally opposed in the constituency which he represents; but this custom was broken at the General Election of 1835.

Spear, a very ancient war and hunting weapon, consisting of a blade fixed on the end of a long shaft. It has been replaced as a cavalry weapon by the lance. The Assyrian spear must have been very strong, for on monuments a warrior is seen dislodging stones of buildings with it. The Macedonian spear-phalanx was famous in the history of tactics. In England it was used as late as Flodden. As a hunting instrument a spear, fitted with barbs, is used for pig-sticking and for stabbing fish.

Spearmint. See **Mint**.

Special Constables, in England to help the police in times of emergency, a task in which all citizens are liable for em-

SPARROW
HAWK

ployment, under penalties imposed by the 1831 Special Constables Act. This Act was passed at the time of the Reform riots, and special constables were enrolled then, during the Chartist riots, at other times of political unrest, and notably in the World War and during the General Strike of 1926. A permanent body of Special Constables is now attached to each police force, and is called on to perform police duties when necessary at the discretion of the head of the force.

Special Reserve, a section of the British Army instituted in 1907, when the Territorial Force was created and the old Militia abolished. The special reserve battalions attached to each regular infantry regiment supplied drafts to the latter in the World War. In 1921 the term "Special Reserve" was abolished and the term "Militia" restored, but no appointments have been made to the force.

Species, a group of plants or animals so closely resembling each other that they may be considered as mere individual varieties of a common type. As a general rule members of a single species are able to interbreed. If several species share several characters in common, they are grouped together to form a genus. When the genus and species of a plant or animal have been decided, its scientific name is expressed by two words, the former of which denotes the genus and the latter the species. Thus the zoological name of the springbok is *Gazella euchore*, *Gazella* being the name of the genus that includes all gazelles, while *Euchore* is the name of the species including springboks only.

Specific Gravity, the ratio of the volume of a substance to the weight of the same volume of some standard substance; the latter is usually water in the case of solids and liquids, and hydrogen or air in the case of gases. The specific gravity of a solid may be determined by measuring its weight in grams, finding its volume in cubic centimetres, and then dividing the weight by the volume. A given floating body will sink deeper in a liquid of low than in one of high specific gravity, and upon this fact is based the instrument known as a hydrometer, which is used for rapidly measuring the specific gravity of a liquid. It consists typically of a hollow glass tube weighted at the bottom to make it float upright, and contains a graduated vertical scale with appropriate figures; it is allowed to float in the liquid and the specific gravity can be read off directly from the graduation on a level with the surface of the liquid.

Specific Heat, the ratio of the amount of heat required to raise the temperature of one gram of the substance through one degree Centigrade to that required to raise the temperature of one gram of water through the same interval. The amount of heat required for the latter purpose is taken as the unit of heat, viz., the calorie, so that a body's specific heat is the number of calories required to raise the temperature of one gram of it 1° C. In comparison with most other substances, water has a high specific heat, which is one reason why it is such a suitable substance for domestic heating circuits; it carries a great deal of heat with it, and this heat is transferred to neighbouring objects as it cools down.

Spectator, The, a celebrated English of Richard Steele's *Tatler*, to which Addison, the originator of the *Spectator*, was a prolific contributor. Its first number appeared in 1711; Addison and Steele were the chief contributors, in nearly equal proportions.

Others were Pope, Thomas Tickell, Swift, Isaac Watts and John Hughes. The paper terminated in 1714. The modern review of the same name was established in 1828, the founder and first editor-proprietor being Robert Stephen Rintoul (d. 1858). Among its noted contributors were Carlyle, Edward Gibbon Wakefield, Walter Bagehot, and St. John Lee Strachey.

Spectroscope, an instrument for the spectra are to be measured also; an instrument called a spectrometer is used. The principles involved in both these instruments are the same. A convex lens is placed at the distance of its focal length from a narrow adjustable slit; light from the slit falls on a prism where dispersion takes place; the rays fall on another convex lens which brings them to a focus; the slit and the first lens form the "collimator" (to bring the rays into line) and the second lens and an eyepiece, also of two lenses, form the "telescope."

Spectrum, the name given to the coloured band, red at one end and violet at the other, which is perceived when a ray of white light passes through a prism. The fact that coloured light can be produced from white light was known to the ancients, and Seneca (a.d.) observed that the colours of a rainbow are identical with those formed by the bevelled edge of a piece of glass.

The first accurate work on the subject, however, was carried out by Newton, who, allowing a sunbeam to enter a darkened room through a hole in the shutter and to fall upon a glass prism, found that a band of coloured light was formed on a white screen held on the other side of the prism, and gave the succession of colours as red, orange, yellow, green, blue, indigo, and violet. He rightly assumed that the explanation of the phenomenon was that white light is not homogeneous, and that rays of different colours are differently refracted (see *Refraction*) in passing through the prism.

The coloured band is called a spectrum, and to the casual observer the spectrum of sunlight is apparently continuous. W. H. Wollaston (1766-1828) and J. Fraunhofer (1787-1826) later discovered that the solar spectrum contained a number of black vertical lines, some strong and some faint. The significance of the "Fraunhofer lines" was discovered in 1859 by G. Kirchhoff and R. W. Bunsen, who showed that if a coloured flame is examined through a spectroscope the spectrum often consists of a few bright lines instead of a continuous band. Thus if a sodium compound is heated in the Bunsen flame it gives a bright yellow colour and the spectrum consists simply of two brilliant yellow lines close together—the rest of the band is dark. Other elements or their compounds produce different spectra, each element possessing its own individual spectrum. Kirchhoff and Bunsen next showed that if white light is viewed through a coloured flame the spectrum of which contains bright lines, the spectrum of the white light is no longer continuous, but has dark vertical lines in the position of the bright lines of the coloured flame.

From a study of individual spectra, and a comparison of them with the Fraunhofer lines, it has been possible to ascertain the composition of the sun's atmosphere; and similar work has been carried out on other stars. In chemical research the investigation of spectra has had important results; several elements, such as cesium, rubidium and helium, were first discovered spectroscopically, while exact measurement of lines has afforded much insight into the structure of atoms.

Spee, Maximilian, Count von, German admiral. Born at Copenhagen, he was a pioneer of the German navy, and in November, 1914, he won the battle of Coronel against Craddock; the following month Admiral Sturdee met him off the Falkland Is. the German squadron lost, and Von Spee went down in the *Scharnhorst*. (1861-1914).

Speed, Harold, English painter, born at London; studied at South Kensington and the Royal Academy Schools. His portraits include Edward VII., King Albert of Belgium, John Burns, John Redmond, Campbell-Bannerman, Holman Hunt, Baden-Powell, Lord Grey of Fallodon. His "Alcantara, Toledo," bought by the Chantry Bequest, is in the Tate Gallery. He has done much mural decoration. (1873-).

Speed Indicator, or **Tachometer**, an instrument for indicating the revolutions per minute of a revolving shaft by means of a hand moving over a graduated scale. The various types include centrifugal, air-vane, and magnetic.

Speedometer, a speed-indicator in vehicle. It enumerates wheel revolutions, being connected with the road-wheel through a flexible drive. In the chronometric type the number of revolutions of the driving shaft during a finite interval is automatically and repeatedly recorded. Electrical speedometers as used on motor coaches comprise a small generator driven off the gear-box and connected to a moving-coil voltmeter.

Speedwell, the genus of the natural order Scrophulariaceae, comprising 250 species found in temperate regions only and many in Alpine districts. They are hardy shrubs and plants, with white, blue or purple flowers, so named because the blossoms fly off as soon as the plant is gathered; seventeen species are native to Britain, *Veronica Chamadrys* being the commonest speedwell. See also *Veronica*.

Veronica Andersonii can be obtained with variegated foliage. (*Veronica* while other species are glabrous. *Chamadrys*)

Speke, John Hanning, British explorer, born in Somersetshire; served as a soldier in the Punjab; joined Burton in 1854 in an expedition into Somaliland, and three years after, in an attempt to discover the sources of the Nile, and setting out alone discovered Victoria Nyanza, which he maintained was the source of the river, but which Burton questioned. On his return he published in 1863 an account of his discovery, which he was about to defend in the British Association when he was accidentally shot. (1837-1864).

Spelt, an inferior hardy kind of wheat, *Triticum Spelta*, also known as German wheat, since it is much grown in that country; it has a solid straw with strong spikes of grain.

Spelter, name given by Boyle to zinc; with which zinc was once confused. The term is now used for commercial zinc, containing about 97-98 per cent. of zinc, 1-3 per cent. of lead, up to 0.1 per cent. of iron and, more rarely, some cadmium and arsenic.

Spenborough, urban district of the county of York, W. Riding of Yorkshire, England. Its manufactures include textile machinery, chain belting, soap, clothing, cotton goods, and worsted. Pop. 36,400.

Spencer, Herbert, English philosopher, born at Derby; adopted at first the profession of a railway engineer, which in about eight years he abandoned for

literature, his first effort being a series of *Letters on the Proper Sphere of Government* in the *Nonconformist* in 1842, and his first work, *Social Statics*, published in 1851, followed by *Principles of Psychology* four years after. In 1861 he published a work on *Education* and his *First Principles* the following year, after which he began to construct his system of *Synthetic Philosophy*, which established his fame. He published treatises on biology, psychology, ethics, and sociology, but was unable to complete his intended conspectus of all the science of his time. His reputation in his day was extremely high, especially among the successors of the Utilitarians, but later developments in philosophy have somewhat overshadowed it. (1820-1903).

Spenser, Edmund, author of the *Faerie Queene*, and one of England's greatest poets; details of his life are scanty and often hypothetical;

EDMUND SPENSER

born at London, he entered Pembroke Hall, Cambridge, as a "sizar" in 1589, and during his seven years' residence there took a master's degree, and formed an important friendship with Gabriel Harvey. Three years of unsettled life followed, but were fruitful in the production of the *Shepherds' Calendar* (1579), which at once placed him at the head of the English poets of his day; had already become the friend of Sir Philip Sidney and Leicester, and in 1580 was appointed private secretary to Lord Grey, then proceeding to Ireland as the Lord Deputy, and on his master's return continued to make his home in Ireland, where he obtained some civil appointments, and in 1591 entered into a considerable estate as the advocate of the repressive policy set forth in *A View of the Present State of Ireland*; he was little loved by the Irish, and on the outbreak of Tyrone's rebellion in 1598 his house was sacked and burned, and he himself forced to flee to London, where he died a few weeks later "a ruined and heart-broken man." The rich promise of the *Shepherds' Calendar* had been amply fulfilled in the *Complaints*, *Amoretti*, *Colin Clouts Come Home Again*, the *Epithalamium*, and above all in the six published books of the *Faerie Queene* (1589-1596), in which all his gifts and graces as a poet are at their best. (1552-1599).

Spermaceti, a white waxy matter from the head of the sperm-whale (q.v.). Candles made of it yield a particularly steady and bright light. It is also used as a lubricant.

Spermatozoon, reproductive cell of an animal, which fuses with and fertilizes the female gamete or egg-cell (ovum).

Sperm Whale. See *Cachalot*.

Spey, a river of N. Scotland which, rising in Badenoch, flows N.E. through Inverness, Elgin, and Banffshire, and falls into the Moray Firth after a course of 107 m.; the salmon-fisheries are valuable; it is the swiftest of the rivers of Great Britain.

Speyer, or *Spire*, German town on the left bank of the Rhine, in the Palatinate, 14 m. SW. of Heidelberg, with a Romanesque 11th Century cathedral, of its kind one of the finest in Europe, and the remains of the Retscher, or imperial palace, where in 1529 the Diet of the Empire was held at which the Reformers first got the name of Protestants, because of their protestation against the imperial decree issued at Worms

prohibiting any further innovations in religion. Pop. c. 28,000.

Spezia, the chief naval station of Italy; occupies a strongly fortified site at the head of a bay on the W. side of Italy, 56 m. SE. of Genoa; manufactures mostly cables, machinery, and olive oil. In its bay Shelley was drowned. Pop. c. 110,000.

Sphagnum. See *Bog-Moss*.

Sphenodon, a reptile, *Hatteria punctata*, found in New Zealand, and called by the Maoris Tuatara. See *Hatteria*.

Sphere, complete revolution of a semi-circle about its diameter; or in other words, a solid body every point of whose surface is equidistant from the centre. The area and volume of a sphere are respectively $4\pi r^2$ and $\frac{4}{3}\pi r^3$.

Spheroid, a body approximating to a sphere in shape, but not a perfect sphere; in other words, a solid figure produced by the revolution of an ellipse about one of its axes. An oblate spheroid is a spheroid produced by the revolution of an ellipse about its shorter axis; the most familiar case being that of the earth.

Sphinx, a fabled animal, an invention of the ancient Egyptians, with the body and claws of a lioness, and the head of a woman, ram, or goat, often with wings and tail, effigies of which were frequently placed before temples on each side of the approach: a Greek legend tells that one waylaid travellers and tormented them with a riddle, and if they could not answer it devoured them, but Oedipus answered it, whereupon she threw herself into the sea. The great sphinx at Gizeh, Egypt, near the second pyramid, is 190 ft. in length and 70 ft. in height.

Sphygmograph, recording variations in pulse-beats; it consists of a pad which when resting against the artery of the wrist operates a pen or recorder which traces a curve on paper or smoked glass corresponding to the pulse movement.

Spice, a general name for vegetable substances possessing aromatic and pungent properties, such as pepper, cloves, nutmeg, ginger, cinnamon, caraway, etc. They are mostly imported from the Far East, especially the Dutch East Indies, Malaya, and the neighbouring countries, and are derived from the root, stem, bark and fruits of various tropical plants.

Spice Islands. See *Moluccas*.

Spider, general name for a large and widely distributed order (Araneae) of Arachnida, most of which secrete a thick fluid by which they form webs used both for entrapping their insect prey and as dwellings. Some of the tropical species, especially the tarantula, attain a considerable size. The spider is eight-legged, the last joint of each leg being armed with two toothed hooks; has a soft tumid abdomen, eight eyes, but apparently no auditory organ. The bite of the spider is not generally poisonous to man, though cases of death from the bite of the tarantula have been reported. Spiders are remarkably pugnacious, and often, in fighting, lose a limb which, however, they have the power of reproducing. Species indigenous to Britain include the common Garden Spider (*Aranea diadema*), the Jumping Spider (*Epiblemum scuticum*), the Water-Spider (*Argyroneta aquatica*), etc.

Spiderwort, a genus (*Tradescantia*) of the order Commelinaceae native to tropical and N. America. A few species, including *T. virginica*, or Virginia spiderwort, with purple flowers, are grown in Great Britain as stove greenhouse or hardy perennials.

Spikenard, a Himalayan plant, *Nardostachys jatamansi*; its root sends up numerous stems with small spikes of purple flowers, each having four stamens. An aromatic substance of great repute in the ancient world for anointing the body was prepared from it.

Spilsbury, Sir Bernard, British pathologist, pathological adviser to the Home Office, whose expert evidence is frequently decisive in murder trials. (1879-).

Spinach, herbaceous plant (genus *Spinacia*) of the order Chenopodiaceae; *Spinacia oleracea* is the common or Garden Spinach; is a hardy annual with large, succulent, triangular leaves on long petioles, which are used as a table vegetable.

Spindle-tree, a tree (*Eucynymus europaeus*) of the order Celastraceae, found in coppes, thickets, and hedges throughout England, generally as a tall bushy shrub, but it may reach 20 ft. in height. It has a short trunk of coarsely-grained bark, and orange-crimson berries. Furnishes a hard-grained wood used for spindles and skewers.

Spine, the backbone or vertebral column, the axial support of the body of vertebrate animals, composed of a series of vertebrae or bones placed one against the other and connected by ligaments. In man there are 24 true vertebrae, with the sacrum and coccyx, each consisting of 4 or 5 vertebrae fused together. The spinal cord, an extension from the brain of the central nervous axis, is situated within the canal formed by the concavities of the vertebrae. It is encased in three successive membranes, the pia mater, arachnoid, and dura mater. Curvature of the spine results from distortion of the vertebrae, and sometimes results in the development of a compensatory "hump"; Pott's disease is a special form of spinal curvature generally found in children.

Spinel, a vitreous mineral occurring in octahedral crystals, embedded in crystalline limestone and associated with calcite. It may be of almost any colour, transparent to opaque, and, when pure, consists of 72 parts of alumina to 28 of magnesia. Varieties known as spinel rubies, balas rubies, and sapphirines are used as gems.

Spinnet, or *virginal*, a musical instrument, with a keyboard, related to the harpsichord, in vogue between 1500 and 1760.

SPINET

Spinning, drawing out and twisting textile materials into threads, either by hand or with machinery. One of the earliest of human inventions, it was at first performed with spindle and distaff; the process is represented on Egyptian tombs. A spinning wheel was invented in Nürnberg about 1530, and soon afterwards introduced into England. About 1767 James Hargreaves (q.v.) invented the spinning jenny (i.e. gin or engine) by which one person could spin at least 16 threads simultaneously. This was the forerunner of the mule, invented in 1774 by Samuel Crompton (q.v.), who combined the principle of drawing by rollers, introduced in 1738 by Lewis Paul, with that of the jenny. Arkwright's spinning-frame was invented in 1767; its chief value was its provision of the warp, which the jenny was unable to supply.

In modern cotton-manufacture spinning is the final process after scutching, carding, drawing and slubbing; it is performed by the ring spinning frame or the mule—the action of the latter being intermittent. Machines of the self-actor type can be built to produce

coarse, medium, or fine counts. The chief elements of a silk-spinning machine are a viscose pipe, spinning pipes for taking up the viscose, and a metal spinning jet drilled with holes of diameters according to the fineness of the filament required.

Spinoza, *Benedict or Baruch*, philosopher, born at Amsterdam, of a Jewish family of Portuguese extraction; exchanged his early studies in Jewish theology for that of physics and the works of Descartes, in which inquiry he drifted farther and farther from the Jewish creed, and at length openly abandoned it. This exposed him to a persecution which threatened his life, so that he left Amsterdam and finally settled at The Hague, where he lived by polishing optical glasses; he suffered from ill-health, and died of consumption when he was only 44; his great work, the *Ethica*, was published a year after his death. He taught that all existence may be summed up in the ideas of extension and thought, which are attributes of God, the sole unlimited and simple substance, in whom all else is comprehended. His system, neglected in his own day and after his death, had great influence on thinkers of the 18th and 19th Centuries, and the "God-intoxicated man" is now firmly established as one of the greatest philosophers of all time. (1632-1677).

Spion Kop, a battle in the British-South African war fought near a hill of that name in January, 1900, and resulting in heavy British losses.

Spiraea, genus of plants of the natural order Rosaceae, of which meadow-sweet (*Spiraea ulmaria*) is a British species. The flowers are mostly white or pink in colour; height from 6 inches up to 7 feet.

Spiral, a curve which winds in a plane from a fixed centre, like a watch-spring; or a curve which winds about a cylinder while at the same time rising or advancing forward, like a lighthouse stairway.

Spire, a slender tapering pyramidal or conical structure on the top of a tower or steeple; rare in Norman architecture, the earliest spires of that period being merely conical roofs. In medieval buildings, the spires are generally octagonal or circular in plan, hollow or solid, and elegantly decorated with crockets, panels and bands, especially in the early English Gothic architecture. The spire almost always terminates in a finial. A spire rising from the exterior of the wall of a tower without gutter or parapet at the base is called a broach.

Spirit, in philosophy and theology, the supreme principle in man, that part of his personality by which he is in contact with the transcendental or the divine. The name is also given to that part or residue of man which, in the belief of some, is able after physical death to manifest its continued existence by communicating in various ways with those left behind on earth.

Spirit, the Holy, the third Person of the Christian Trinity; in the belief of the Western churches proceeds from the Father and the Son, in that of the Eastern churches from the Father through the Son. He is also known by the alternative names of Holy Ghost and Paraclete or Comforter. He is the indwelling divine life in the Christian church, whom Jesus promised should be shed upon His followers after His own death, and who, according to the New Testament tradition, was manifested in the Apostles, as described in the Book of Acts, shortly after the Ascension.

Spirits of Salts. See *Hydrochloric Acid*.

Spiritualism, in philosophy, denotes the only real is the spiritual; in religion indicates a belief in the existence of spirits with whom

we, by means of certain mediums, can hold correspondence, and who, whether we are conscious of it or not, exercise in some cases an influence over human destiny; especially those of the dead who, from their continued interest in the world, continue to mingle in its affairs. In recent years, particularly since the World War, spiritualism has become the basis of a popular and rapidly-spreading creed in English-speaking countries.

Spithead, the eastern portion of the strait which separates the Isle of Wight from the Hampshire coast, 14 m. long, with an average breadth of 4 m.; is a sheltered and safe riding for ships, and as such is much used by the British navy; receives its name from a long "spit" or sandbank jutting out from the mainland.

Spitsbergen (*Svalbard*), an Arctic archipelago lying 350 m. N. of Norway, embracing West Spitsbergen, North-East Land, Stans Foreland, King Charles Land or Wiche Island, Barents Land, Prince Charles Foreland, besides numerous smaller islands; practically lies under great fields of ice, enormous glaciers, and drifts of snow, pierced here and there by mountain peaks, hence the name Spitsbergen; the home of vast flocks of sea-birds, of polar bears, and Arctic foxes, while herds of reindeer are attracted to certain parts by a scanty summer vegetation; there are valuable coal deposits, which are now being worked. It was discovered in 1596 by Barents (q.v.), and has been the starting point of many expeditions to the North Pole. Since 1925 it has been a Norwegian possession. Area, 24,300 sq. m. There is a small permanent population.

Spleen (anatomy), a soft, vascular organ situated between the cardiac end of the stomach and the diaphragm; about 5 in. long by 3 in. broad and weighing 6 oz. It increases in size after a meal, reaching its full size in about 5 hours; becomes enlarged in fevers, and in prolonged ague is permanently atrophied; occurs only in the vertebrates. Its functions are not fully known, but like the other ductless glands it produces secretions which appear to be of importance in stimulating digestion, and it helps to promote the formation of blood corpuscles.

Spleenwort, popular name of a genus of the order Polypodiaceae, so-called either because its lobular leaves are spleen-shaped or because of its medicinal properties. *Asplenium Trichomanes* is the common or maidenhair spleenwort; the wall-rue or wall spleenwort is a good rock fern; *Asplenium Nidus* or bird's nest fern is a fine tropical plant.

COMMON SPLEENWORT

Splint, an application for preventing an injury to or movement in a part of the body, generally a limb, that has been wounded or injured. It usually consists of a piece or pair of pieces of wood bound tightly against or on either side of the injured portion.

Split (formerly *Spalato*), town of Yugoslavia, in Dalmatia, finely situated on a promontory on the E. side of the Adriatic, 160 m. S.E. of Fiume; a place of considerable antiquity, and one of the great cities of the Roman world; is chiefly famed for the vast palace built by Diocletian, which became his residence after his abdication; subsidiary buildings and grounds were enclosed by walls, within which now a considerable part of the town stands; the noblest portions of the palace are still extant; the

modern town carries on trade in grain, wine, oil, and cattle; is noted for its liqueurs. Pop. 35,300.

Splügen, an Alpine pass in the Swiss canton of the Grisons; the roadway 24 m. long, opened in 1822, crosses the Rhetian Alps from Chur, the capital of Grisons, to Chiavenna in Lombardy, and reaches a height of 6,595 ft.

Spode, a kind of porcelain named after Josiah Spode who owned pottery works at Stoke-on-Trent at the end of the 18th Century. His son, Josiah, made a porcelain composed of felspar, china clay and bone ash which has long been the common type in England. Its patterns are frequently imitations of Oriental designs.

Spohr, Ludwig, German musical composer and violinist, born in Brunswick; produced both operas and oratorios, *Faust* among the former, the *Last Judgment* and the *Fall of Babylon* among the latter, as well as several violin concertos and symphonies; for many years he was Court conductor at Cassel; wrote a handbook for violinists. (1784-1859).

Spokane, city of Washington, U.S.A., on the R. Spokane, 230 m. E. of Seattle. It has a large timber industry, machine-shops, foundries, and numerous manufactures, for which the near-by waterfalls provide power. Pop. 115,500.

Spoleto, an ancient city of Central Italy, built on the rocky slopes of a hill, in the province of Umbria, 65 m. N.E. of Rome; is protected by an ancient citadel, and has an interesting old cathedral with frescoes by Lippo Lippi, an imposing 7th Century aqueduct, and various Roman ruins; was capital of a Lombard duchy, and from 1220 to 1860 was joined to the Papal States. Pop. c. 10,000.

Spondee, a metrical foot consisting of two successive long or accented syllables.

Sponges, a group (Porifera) of simple aquatic animals of cellular structure, the outer coating of whose bodies is perforated to allow the entrance of water, which provides the animal with food and oxygen; they do not swim freely, but are always attached to some external object. The sponges of commerce are dredged for mainly in the Mediterranean Sea and off the coast of Florida, U.S.A.

Spoonbill, a family (Plataleidae) of large wading birds of which there are three genera and a number of species.

They are allied to the storks and herons, are also long-legged but have the bill flattened at the base like a spoon. One species, the Common Spoonbill (*Platalea leucorodia*) formerly bred in Britain, but now occurs only as a stranger. They breed in colonies, and build their nests in trees or reed-beds.

Sporades, a group of islands in the Greek Archipelago, in the Aegean Sea; there are two groups, the Northern, including Skyros, Lemnos, Chios, and Lesbos or Mytilene, belonging to Greece; the Southern, including the Dodecanese, to Italy.

Spores, in non-flowering plants, minute reproductive cells which develop when they fall on damp soil or moist food-containing substances. In the case of ferns, each spore sends out a delicate rhizoid which grows downwards into the soil and a green thread which grows along the surface, and gradually changes into a multicellular layer or prothallus out of which develops the young plant.

SPONBILL

Sporozoa, a class of unicellular parasitic Protozoa, fitted to live in water, and like other Protozoa, may be taken to represent the earliest animals. Reproduction is by means of spores (q.v.). The class includes the disease germ of malaria, which is developed in the Anopheles mosquito.

S.P.Q.R., Roman official initials standing for Senatus Populusque Romanus (the Senate and Roman People); were inscribed on the Roman military standards.

Sprain, violent straining or twisting of the ligaments, tendons or soft parts around the joints, but without dislocation; generally attended with swelling and some inflammation of the sprained part. The ankle, wrist and knee are the joints most frequently affected.

Sprat, a small smooth-scaled fish, *Clupea sprattus*, common in all parts of the European Atlantic coasts; it is caught in large numbers as a food fish, being usually sold dried and salted; those exported from Norway in tins are sold as brillings. The average length is about 3 inches.

Spree, a river of Germany, rises in E. Saxony close to the Czechoslovakian border, follows a winding and generally N. and NW. course of 227 m. till its junction with the Havel at Spandau; chief towns on its banks are Bautzen, Kottbus, Lübben, and Berlin; is connected with the Oder by the Friedrich Wilhelm Canal.

Spring, an uprush of water from the ground at a single point. Springs are always found at a lower level than the ground from which their supply is derived. They are met with in valleys, near hillsides, on hillsides, in caverns and even under water. Some flow forth naturally, while others have been formed after artificial boring through the superficial strata. Where the water issues from a great depth it is warm, and as warm water can dissolve more mineral matter than cold, hot springs are always richer in dissolved salts than cold ones.

Springbok (*Gazella euchore*), a South African antelope about 30 in. in height, yellow or dun coloured, white beneath; two folds of skin rise from the root of the tail and terminate near the middle of the back. It is remarkable for its power of leaping, being able to jump several times its own height when alarmed.

Springfield, (1) capital of Illinois, a flourishing coal district, 185 m. SW. of Chicago; has an arsenal, two colleges, and a handsome marble capitol; coal-mining, foundries, and flour, cotton, and paper mills are the chief industries; the burial-place of Abraham Lincoln. Pop. 72,000. (2) city of Massachusetts, U.S.A., on the Connecticut R., 90 m. W. of Boston; settled in 1636; has important manufactures of textiles, motor-cars, paper, and a variety of other articles, besides the United States armoury. Pop. 150,000. (3) capital of Greene County, Missouri, 332 m. WSW. of St. Louis; has rapidly increasing manufactures of cottons, woollens, and machinery; in the vicinity was

Colliery, Ohio, one of the largest in the U.S.A., 70 m. N.E. of Cincinnati; is an important railway centre, and possesses numerous factories of machinery, bicycles, and paper. Pop. 69,000.

Springtail, a sub-order of minute wingless insects (Collembola), whose chief characteristic is their power of suddenly leaping when alarmed. They are soft-bodied and are commonly seen on decaying vegetable matter, herbage, and on stagnant water, one species at least being equally at home on land and on the surface of ponds.

It sometimes causes trouble in cisterns as it can live under water. Springtails are probably surviving representatives of the most primitive insects. They do not undergo a metamorphosis.

Sprocket, a toothed gear wheel used in chain-drives, e.g., the wheels on the pedal shaft and rear hub of pedal cycles.

Spruce, the common name of a number of coniferous trees, applied especially to the Spruce-fir, or Norway Spruce (*Picea excelsa*), a native of the mountains of N. and Central Europe. It was introduced thence into Britain in the 17th Century and has been extensively cultivated. In some countries it may grow to nearly 200 ft. high. The bark is smooth and reddish-brown. The wood—called white deal—is much used for rough carpentry. It also yields resin and turpentine. *Picea moranda*, the Himalayan Spruce, is also a valuable timber tree.

Spur, an apparatus fastened to the heel of a horseman, having a rowel or wheel of points to prick a horse's flank. The spur was the peculiar badge of knighthood, whence the phrase "to win one's spurs." All cavalry soldiers and horse-artillerymen wear spurs, rather for ornament than use. The hard, pointed projection on a cock's leg, which serves for defence and attack, is also so called.

SPURS

Spurge (*Euphorbia*), a genus of plants, the typical one, of the natural order Euphorbiaceae, comprising 750 species chiefly found in sub-tropical and warm climates, but 17 native to Britain. Some are shrubs, but all British species are herbs. The species found in dry climates resemble Cacti. Besides those found wild in Britain, including the Caper Spurge, *Euphorbia lathyris*, reputed to have been introduced by the Romans but now naturalized, a few only are grown as stove and greenhouse plants, the rest being valueless in cultivation.

Spurgeon, Charles Haddon, English preacher, born at Kelvedon, Essex; began preaching at Cambridge when a boy, and was only 17 when he was appointed to a pastorate. In 1861, a large chapel was built for him in Southwark, London, around which he established a number of institutions in the interest of humanity and religion. His sermons were also widely circulated in printed form. (1834-1892).

Spurn Head, a low headland of E. Riding of Yorkshire, England, at the eastern extremity of the N. shore of the Humber.

Spy, a person who, acting clandestinely or on false pretences, seeks to gather information in the zone of operations of a belligerent in order to communicate it to the adverse party. By international law he may be shot if captured. Soldiers who have openly penetrated into such a zone are not treated as spies, nor are soldiers or civilians openly conveying dispatches for their own or the enemy's army. A spy cannot be punished without trial and cannot be treated as a spy if captured after he has rejoined his own army. See also *Secret Service*.

Squadron, a division of a cavalry regiment consisting of two "troops"; four squadrons compose a regiment, each under a captain. Also a number of warships grouped into a temporary unit under an officer of flag rank; battleships and battle cruisers are usually grouped into squadrons of four. In the Royal Air Force,

a squadron is the smallest number of machines under a single command; a "flight" is equivalent to half a squadron.

Square Root, a quantity which, when multiplied by itself, produces the number of which it is the square root; thus the square root of 49 is 7, and $\frac{1}{2}$ is the square root of $\frac{1}{4}$.

Squash Racquets, a variety of racquets, but played in a smaller court. It originated in England and is said to have been played first at Harrow. It is played with a hollow rubber ball about the size of a golf ball. In 1922 the game was standardized, and a Central Squash Racquets Committee formed.

Squatter, one who settles on new or uncultivated land. In Australia the term was formerly used for a liberated or ticket-of-leave man who built a bark-hut on vacant ground and lived either by sheep-stealing or illicit liquor selling.

Squid, a class of cephalopod (q.v.) cuttlefish of the order Dibranchia. The common squid, *Loligo vulgaris*, about 18 in. long, is found round the Devon and Cornish coasts and is used as bait. It is blue in colour, with dark spots, and white beneath and, like the cuttlefish, secretes an inky fluid which it ejects to cover its retreat when attacked. The shell of this mollusc has been replaced by a horny structure called a pen, which is frequently found on beaches. Some tropical species, such as *Architeuthis princeps*, may reach a span of 40 ft. with extended tentacles.

Squill (*Urginea Scilla*), a liliaceous plant growing on the shores of the Mediterranean. Its large round bulbs contain a substance known as scillitoxin, which is used in medicine as a powerful expectorant because of its power of increasing the flow of saliva. It acts as an irritant on the stomach and other organs, however, and in some circumstances cannot be used. It gives the bulbs a bitter taste.

Squinting, or Strabismus, a defect of the eyes not being parallel. Squinting may affect one or both eyes, and may be upwards, downwards, inwards or outwards. The cause is usually a defect in the nerves or muscles of the eyeball, though convulsions, ophthalmia and even teething may predispose to it.

Squire, in the military organization of the Middle Ages, a young man in attendance on a knight, awaiting his own opportunity to receive knighthood. In England, it came to mean a landed proprietor, who was also a justice of the peace, and practically equivalent to the lord of the manor. The "squirearchy" indicated the body of such country gentlemen, who, prior to the Reform Bill of 1832, were the dominant political force in the Commons.

Squire, Sir John Collings, English man of letters, born at Plymouth. His early work was in comic and satiric vein: *Imaginary Speeches*, 1912; *Steps to Parnassus*, 1913. Parodies collected, 1921. In 1919 he founded the famous literary review, *The London Mercury*, remaining its editor until 1934. He has edited several collections of verse, and received a knighthood in 1933. (1884-).

Squirrel, genus (*Sciurus*) of tree-dwelling rodents, of wide distribution. *Sciurus vulgaris*, the common "red," squirrel of England and Europe generally, is characterized by its pointed and tufted ears, long bushy tail, furry coat and bright eyes. It has found a competitor in the Grey Squirrel, a species introduced from N. America, which in recent years has spread rapidly in Britain at the expense of its relative. Other species show a great variety of size, the Pigmy Squirrel of Borneo being only the size of a

mouse, the Purple Giant of India being as big as 12 in.

Srinagar, capital city of Kashmir, India, on the E. Jhelum; has metal-working, wood-carving, and carpet-weaving industries. Pop. 174,000.

Stability, the property by which a body tends to keep its original position, or a moving system to recover its typical configuration when slightly disturbed. The tendency of the centre of gravity to occupy the lowest possible position creates three kinds of equilibrium—stable, unstable, and neutral. In stable equilibrium, the body when disturbed tends at once to return to its original position; in unstable equilibrium, it tends to depart farther from that position; in neutral, it simply remains in its new position. The degree of stability is a matter of the highest importance in the design and use of ships and aircraft. A "stabilizer," in aircraft, is the fixed horizontal tail-plane intended to reduce the pitching motion in the air.

Stabilization, efforts to counteract the large fluctuations in the relative value of monetary units. The economic depression of 1930-32 brought the subject into prominence and it was discussed, but without practical results, at the World Economic Conference, 1933. Normally, monetary units have a known value which is based on the gold standard, and stabilization in its current sense means giving a monetary unit, such as the pound, franc, or mark, a new value in relation to gold, which value is expressed by the exchange value of one currency in terms of another. Speculative elements and the movements of capital tend to obscure the problems of stabilization, and some economists believe that no *de facto* stabilization is possible while emergency exchange restrictions exist and until gold bloc currencies have been effectively devalued.

Stachys, a widely-distributed genus of including the betony (q.v.).

Stack, Sir Lee Oliver Fitzmaurice, British general, who in 1919 became Governor-General of the Sudan and Sirdar of the Egyptian army, and was murdered in Egypt in November, 1924. (1868-1924).

Stadium, the course on which were celebrated the great games (foot-racing, wrestling, etc.), of ancient Greece, held at Olympia, Athens, and other places; the most famous was that laid out at Olympia; length 600 Greek feet, which was adopted as the Greek standard of measure, and equalled 606½ English feet.

Stadtholder, an anglicized form of the Dutch "stadhouder" (i.e. stead-holder), a title conferred on the governors of provinces in the Low Countries, but chiefly associated with the rulers of Holland, Zealand, and Utrecht. In 1544 the title was held by William the Silent and continued to be the designation of the head of the new republic of the United Provinces of the Netherlands until 1802. The name in its German form of Statthalter has been revived in Nazi Germany, where the old Federal States are each under the rule of a Reichstatthalter, who is the Führer's personal representative.

Staël, Anne Louise, Madame de, French writer, born in Paris, daughter of Necker, a woman of eminent ability, and an admirer of Rousseau; wrote *Letters* on his character and works; married the Baron de Staël-Holstein, Swedish ambassador in Paris, where she lived all through the events of the Revolution. In 1795 her *salon* became the centre of the literary and political activity of the time. She was ordered by Napoleon to leave Paris; soon after she went to Weimar, where she met Goethe and Schiller, and then to Berlin. Her great work on Germany, *L'Allemagne*, was seized by the French

censors. After this she again quitted France, to which she had returned; and settled in Switzerland, at Coppet, where she died. (1766-1817).

Staffa ("pillar island"), an uninhabited islet of basaltic formation off the W. coast of Scotland, 54 m. W. of Oban; 1½ m. in circumference, and girt with precipitous cliffs, except on the sheltered N.E. where there is a shelving shore; is remarkable for its caves, of which Fingal's Cave is the most famous, having an entrance 42 ft. wide and 66 ft. high, and penetrating 227 ft. See also *Basalt*.

Staff College, a military college for selected officers in staff duties and in the higher branches of the art of warfare. Camberley in Surrey and Quetta in India are the two colleges for the British Army. The Naval Staff College is at Greenwich, that for the Air Force at Andover.

Stafford, county town of Staffordshire, England, 29 m. NNW. of Birmingham; has manufactures of boots and shoes, motor-cars, machinery, and cutlery. Pop. 31,000.

Staffordshire, a midland mining and manufacturing county of England, wedged in on the N. between Cheshire (W.) and Derby (N.), and extending southward to Worcester, with Shropshire on the W., and Leicester and Warwick on the E.; with the exception of the wild and hilly "moorland" in the N. consists of an undulating plain crossed by the Trent, and intersected in all directions by canals and railways; embraces two rich coal-fields, one in the "Black Country" of the S., where rich deposits of ironstone are also worked, and one in the N., including the district of the "Potteries"; famous breweries exist at Burton. Stoke-on-Trent is the largest town; others are Wolverhampton, Walsall, and Smethwick. Area 1,154 sq. m. Pop. 1,434,000.

Stag, the male of the red-deer (q.v.). As a Stock Exchange term, the name is applied to a person who applies for an allotment of shares not wishing to hold them but in the hope of selling the allotment at a premium; if he fails in this, he abstains from paying the amount due on his allotment and his deposit is forfeited.

Stag Beetle, the common name of a insects (the Lucanidae), characterized by an enlargement of head and jaws in the males having a resemblance to stag's horns. The male of the British species, *Lucanus cervus*, is as much as 2 in. long.

Stage Coach, for over a century before the railway era the principal European public passenger vehicle for journeys between towns; it was drawn usually by two or four horses. Luggage was stored in a so-called "boot," between the coachman's seat and the passenger portion of the vehicle. See also *Coaches* and *Coaching*.

Staghound, the Scotch deer-hound; also called the wolf-dog, a breed resembling, but larger than, the greyhound; used for deer-stalking and hunting mostly by sight. It is wiry-coated and shaggy, the best breed being iron-grey with white chest.

Stained Glass, used in windows for purposes of decoration, especially when forming pictorial scenes. The ecclesiastical stained glass of the Middle Ages, carried to its highest point in the windows of such buildings as Chartres Cathedral, are among the most wonderful productions of medieval art. Good English examples are the glass panels in the choir at Canterbury Cathedral representing Biblical subjects, set in a blue or ruby ground, and

framed in brilliantly coloured scroll work. Later, stained glass lost its early moral character, and became translucent in tone and freer in design. York Minster, Tewkesbury Abbey, and Merton College, Oxford, and the church of Fairford, Gloucestershire, all have examples of such windows glowing with luminous coloured pictures, of figures in architectural canopies with borders of ivy and vine. Modern stained glass work is on the whole far inferior to that of the 13th to 15th Centuries, the secret of producing certain colour effects having been lost.

Stainer, Sir John, English musical composer, singer and organist, born in London; professor of music at Oxford. Among his works are the oratorio *The Crucifixion* and two sacred cantatas, *The Daughter of Jarius* and *Mary Magdalen*. (1840-1901).

Staines, town of Middlesex, on the Thames, 6 m. S.E. of Windsor; has breweries, mustard-mills, and other factories; is developing as a residential town for London workers. Pop. 21,300.

Stainless Steel, an alloy of iron with about 16 per cent. of chromium so as to resist corrosion. It was invented in Sheffield in 1913. The Brearley patented stainless steel contains over 12 per cent. of chromium and a small percentage of carbon. The Gordon process gives ordinary steel a coating of stainless steel which makes the whole absolutely rustless. Sheets of ordinary steel are given a coating of one-thousandth of an inch or less.

Stair, John Dalrymple, 1st Earl of, Scottish jurist and politician, called to the bar in 1672; got into trouble with Claverhouse, and was fined and imprisoned, but in 1687 was received into royal favour, became Lord Advocate, a Lord Ordinary in the Court of Session, and subsequently as Secretary of State for Scotland was mainly responsible for the massacre of Glencoe (q.v.); was created an earl in 1703, and later was active in support of the union of the English and Scottish Parliaments. (1648-1707).

Stair, John Dalrymple, 2nd Earl of, second son of preceding; entered the army at 19, and fought at Steinkirk; studied law for some time at Leyden, but went back to the army, and fought with distinction under Marlborough at Venlo, Ramillies, Oudenarde, the siege of Lille and at Malplaquet; was active in support of the Hanoverian succession, and subsequently in the reigns of George I. and II. filled important diplomatic and military posts. (1673-1747).

Stalactite, a cone of carbonate of lime hanging from the roof of a cavern, and formed by the dripping of water charged with the carbonate from the rock above; the cone formed on the floor by the dripping from a stalactite above is called a stalagmite.

Stalin, Josif Vissarionovich (Djugashvili), Russian statesman, son of a peasant shoemaker, born in Georgia, intended for the Church and trained at a theological college; became a revolutionary propagandist, was arrested in 1902 and exiled to Siberia in 1903, a fate which he suffered again in 1908, having in the meantime escaped, his final period of political activity in Northern Siberia from 1913 to 1917.

He was one of the leaders of the plot to overthrow Kerensky in Nov., 1917, fought in various campaigns in 1919 and 1920, became secretary of the Russian Communist Party and Commissar for Outer Nationalities. When Lenin died he stepped into his place, expelled from the party any who opposed him, even the

redoubtable Trotsky, whose banishment he eventually secured, and finally became autocratic dictator of Soviet Russia. He is the author of a book on *Leninism*. The name "Stalin," originally a nickname, means "man of steel." (1879-).

Stalinabad (formerly Dushanbe), but renamed in honour of Stalin, the capital of Tajikistan S.S.R., Central Asia. Pop. 60,000.

Stalingrad (formerly Tsaritsyn), a town of Russia, on the Volga, 110 m. SSW. of Kamishin. It is a transhipment station, and has important manufactures of metalware, tractors, machinery, and wool. Pop. 388,000.

Stalybridge, manufacturing town of Cheshire, England, on both banks of the Tame, 7½ m. E. of Manchester; is of modern growth, and noted for its large cotton-yarn and calico factories, iron-foundries, and machine-shops. Pop. 24,000.

Stamboul, or Stambul, the city of known as Constantinople. See Istanbul.

Stamen, the male or pollen-bearing organ of a flower. The stamens may equal the petals in number and alternate with them, or be twice as numerous and arranged in a circle. They rise from the space between the base of the petals and that of the ovary; and they may be on different flowers or plants from the pistils.

Stamford, town in Lincolnshire, England, on the Northamptonshire and Rutland borders, 12 m. WNW. of Peterborough; was one of the five Danish burghs. Near by is Burghley House, a noble specimen of Renaissance architecture. The district is mainly agricultural, but the town has breweries and a coachbuilding industry. Pop. 9,950.

Stamford Bridge, a village of the Derwent, 9½ m. NE. of York; the scene of Harold's victory over the invading forces of Harold Hardrada on Sept. 25, 1066.

Stamfordham, Sir Arthur George Biggs, first Baron, came under the notice of Queen Victoria in the Zululand campaign, when the French Prince Imperial served under him. In 1895 he became her Private Secretary, and after her death filled the same office for the future King George V., remaining in his service after his accession. He became a peer in 1911. (1849-1931).

Stammering, hesitation in speech or inability to pronounce certain syllables or endless repetition of the same syllable or word. It does not indicate any defect of the brain or speech organs, but is rather nervous in origin, or a functional disorder due to faulty co-ordination between the parts concerned with speech. It may be due to confusion, shyness, or actual fear, especially in childhood.

Stamp, Josiah Charles, first Baron, English economist. He entered the Inland Revenue department in 1896, becoming Assistant Secretary in 1916. Secretary and director, Nobel Industries, 1919-1928; director, Imperial Chemical Industries, 1927-28. He is a director of the Bank of England, and since 1927 has been chairman of the London, Midland and Scottish Railway. He was made a peer in 1938. Frequently examiner in Economics for universities of Cambridge, London, Edinburgh, and Glasgow; he has served on numerous commissions and courts of inquiry, and is author of several works on Economics. (1880-1941).

Stamp Act, a measure passed by Grenville's Ministry in 1765 enacting that all legal documents used in the colonies should bear Government

STALIN

stamps. The Americans resisted on the ground that taxation without representation in Parliament was unjust. Riots broke out, and the stamped paper was carefully avoided. In 1766 Pitt championed the cause of the colonists, and largely through his eloquence Government in that year was induced to repeal the Act, which, however, was one of the grievances that led to the War of Independence.

Stamp Duties, duties imposed, purposes, on various kinds of legal documents or instruments, and collected by means of impressed or adhesive stamps. The law governing the duties payable and the methods of payment is contained in the Stamp Act, 1891, and various subsequent Finance Acts. Duties range from 2d. on a receipt (*q.v.*) or 6d. on a simple contract or bill of lading up to a 10s. deed stamp or an *ad valorem* stamp, which may run to any amount, on a share transfer or an issue of capital by a joint stock company. Unless forbidden by statute any instrument may be stamped after execution on payment of a penalty of £10 and the duty, together with interest.

Stamp Mill, or **Stamping Mill**, an apparatus for crushing ores by means of a pestle or series of pestles operated by machinery; or an oil-crushing mill similarly constructed. Usually, as in the Cornish "tin stampers," the stamps, which are very heavy, are arranged in a row and lifted by cams on a revolving shaft turned by water-power. The stamps descend in turn on to the ore which is lying in chambers so constructed that the refined ore escapes while a constant stream of water carries away the slime.

Standards Department, a department of the Board of Trade, which secures uniformity in weights and measures. It has the custody of the legal standards to which they should conform, and its inspectors examine the weights and measures of traders to see that the law regarding them is observed.

Standard Time. Until the latter part of the 19th Century each nation generally used the time of its own capital, but since 1883 the system of Standard Time Zones has been gradually accepted, and now Standard Time differing from that of Greenwich by an integral number of hours, either fast or slow, is used almost throughout the world. Time 1 hour fast on Greenwich, known as Mid-European time, is used in Scandinavia, Germany, Italy, and many other countries; United States time varies between 4 and 8 hours slow on Greenwich, according to the region of the country concerned.

Standing Order, in British parliamentary procedure, a resolution of either House made for the guidance and order of its proceedings. These orders are conventions of the Constitution framed like written laws, but either House can suspend them at will. Every corporate body or assemblage of persons has the power to make its own standing orders for the regulation of its proceedings.

Standing Stones, rude unhewn stones standing singly or in groups in various parts of the world, and erected at remote periods as burial-places or with some prehistoric religious significance. They sometimes take the form of circles or avenues. Examples are those at Stonehenge, and at Carnac in Brittany.

Standish, Miles, one of the Pilgrim Fathers, of Lancashire birth; served in the Netherlands as a soldier, went to America in the *Mayflower* in 1620, and was helpful to the colony in its relations both with the Indians and the mother-country;

U.S.

is the hero of a poem by Longfellow. (c. 1650-1656).

Stane Street (from "Stone Street"), a name applied to several Roman roads in England, but chiefly to one in Sussex and Surrey running from Chichester to London, and still traceable for great part of the way.

Stanford, Sir Charles Villiers, Irish composer, born in Dublin, where from 1873 to 1892 he was organist of Trinity College. From 1892 he was professor of composition at the Royal College of Music, and from 1897 of Music at Cambridge. His operas include:—*The Velled Prophet of Khorassan*, performed 1881; *Shamus O'Brien*, 1896; *The Travelling Companion*, 1926. (1862-1924).

Stanislawow, southernmost county of Poland, on the border of Rumania (Area, 6,520 sq. m.; pop. 1,480,000); also its chief town, 75 m. S.W. of Lwów, with tanneries, dyeworks, and a trade in agricultural produce. Pop. 60,000.

Stanley, urban district of county Durham, England, 6 m. N.W. of Chester-le-Street. It is a coal-mining district. Pop. 52,000. (2) urban district of the W. Riding of Yorkshire, 2 m. N.E. of Wakefield. Coal-mining is carried on. Pop. 15,800.

Stanley, Arthur Penrhyn, English ecclesiastic and historian, born at Alderley, Cheshire; published his *Life of Dr. Arnold* in 1844, his *Sinai and Palestine* in 1855, after a visit to the East; held a professorship of Ecclesiastical History in Oxford for a time, and published lectures on the Eastern Church, the Jewish Church, the Athanasian Creed, and the Church of Scotland; became Dean of Westminster in 1863; wrote *Historical Monuments of Westminster Abbey and Christian Institutions*. (1815-1881).

Stanley, Sir Henry Morton, British explorer, born at Denbigh, Wales; served in America in the Confederate army; became a newspaper correspondent, and was ordered by the *New York Herald* to go and "find Livingstone." After many an impediment he did so, on Nov. 10, 1871, at Ujiji, Lake Tanganyika, and after accompanying him in explorations, returned to England. In 1874 he set out again at the head of an expedition across Central Africa, traversing the lakes and tracing the course of the Congo, returning home to publish *Congo and the Free State* and *In Darkest Africa*; made his last visit to Africa in 1887 at the head of the Emin Pasha relief expedition, and discovered Mt. Ruwenzori and the Albert Edward Nyanza. (1841-1904).

Stannaries, Court of the, an ancient English court for the administration of justice amongst those connected with the tin mines of Cornwall and Devon; the heir to the British throne holds the title of Lord Warden of the Stannaries; and his vice-warden presides over the courts. Up to 1752 representative assemblies of the miners, called Stannary Parliaments, were held. Appeals from the Stannary Courts may be made to the higher courts of England.

Staple, Merchants of the, the merchants who in the Middle Ages traded in such commodities as wool, tin, and leather. They enjoyed a monopoly of purchase and export, and all such goods imported or exported had to pass through their hands at the officially appointed "Staple towns," such as London, Norwich, and Bristol, where duties were collected and goods assessed.

Starch, a carbohydrate found in most plants, especially rice, cereals, and potatoes. It is a foodstuff of great importance to men and animals, being changed into sugar by the operation of certain

enzymes and digestive juices. It is also used as an adhesive, and in industry for stiffening clothing, sizing textiles, etc.

Star-Chamber, a court which originated in the reign of Edward III., and consisted practically of the king's ordinary council, dealing with such cases as fell outside the jurisdiction of the Court of Chancery. It was revived and remodelled by Henry VII., and since in that age the ordinary courts were often intimidated by powerful offenders, often rendered much service to the cause of justice. By the reign of James I., it had acquired jurisdiction as a criminal court over a great variety of misdemeanours—perjury, riots, conspiracy, high treason, etc. In the reign of Charles I. it became an instrument of the grossest tyranny, supporting the king in his absolutist claims, and in 1641 was swept away by the Long Parliament.

Starfish

name for any sea animal of the star-shaped family Asteridae of the order Echinodermata. The common starfish, *Asterias rubens*, which is familiar off British coasts, has five or more lobes radiating from a central disc, and containing prolongations of the viscera. The starfish is voracious, and very destructive to fishermen's bait.

STARFISH

Starhemberg, Ernst Rudiger Camille, born at Eferding Castle; in 1934 the Heimwehr, under his command, with the connivance of Dollfuss, suppressed Socialism in Austria by a sanguinary coup d'état. He became Vice-Chancellor and tried to establish a Fascist Austria in close touch with Italy but lost all power in 1938 when he was forced by Schuschnigg to resign and his Heimwehr was disbanded. (1898-).

Starling (*Sturnidae*), a family of birds found in the old world only, where they are very common. They are characterised by their gait on the ground, which consists of walking instead of hopping as do most other birds, and by the fact that in their first year their plumage is streaked. The Common Starling (*Sturnus vulgaris*), a common English bird, is small and glossy black with metallic undertints and brown legs and feet, buff wing-tips and yellowish bill. Its length is 8 to 9 in., and it generally haunts fields and meadows, though it is frequently seen in urban districts where it is credited with damage to mortar, presumably in its search for insects, its chief food. In rural districts it can be destructive to fruit.

Star-of-Bethlehem, the popular name of the name of the genus *Ornithogalum*, a number of species of which are grown in Britain as hardy or greenhouse plants, the most important species being *Ornithogalum umbellatum*, a hardy plant bearing star-shaped white flowers. It is a common English garden

of India, The Most Exalted Order of the Star of India, instituted in 1875; Grand Master, the Viceroy of India; ribbon, light blue with white edges; motto, "Heaven's Light our Guide"; G.C.S.I., Knight Grand Commander; K.C.S.I., Knight Commander; C.S.I., Companion.

Stars, general name for all celestial bodies, other than comets, including the sun and planets as well as those commonly

called stars. They are at enormous distances from the earth; they are of unequal brightness, and are classified as of the 1st, 2nd, down to the 16th magnitude. Those visible to the naked eye include stars from the 1st to the 6th magnitude, and number about 4,500, while several million are visible by the telescope; of those in the Milky Way (q.v.) alone there may be from 50 to 100 millions. They have from ancient date been grouped into constellations of the northern and the southern hemispheres and of the zodiac (q.v.). Recent astronomical theories suggest that the Milky Way, or Galaxy, is a "self-contained system of stars."

Stars and Stripes, the flag of the United States, the 13 stripes representing the original States of the Union, the 48 stars the total number of States.

State, the personification of the inhabitants of a defined territory as a single political unit. Until the Middle Ages it was based on territory rather than race, but since the Renaissance it has tended towards the form of the nation-state, comprising all or as many as possible of the human beings sharing a common language, culture, and tradition. With increasing civilisation the state occupies more and more of the functions previously left to the enterprise of private citizens, and political science is largely concerned with the extent to which interference by the state with the liberty of the subject is permissible. This depends largely on the form of the state; thus, in modern totalitarian or Fascist states, that interference is much greater than in a democratic state. See also *Sovereignty*.

State Island, an island belonging to New York State, and comprising the borough of Richmond, part of the city of New York; is a picturesque island (14 m. long), separated from Long I. by the Narrows and from New Jersey by the Kill van Kull and Staten I. Sound; it includes a number of residential villages. Pop. 158,000.

States-General, name given to an assembly of the representatives of the three estates of nobles, clergy, and bourgeoisie, or the *Tiers Etat* as it was called in France prior to the Revolution of 1789; first convoked in 1302 by Philip IV. They dealt chiefly with taxation, and had no legislative power; they were convoked by Louis XIII. in 1614, and dismissed for lacking into finance, and not convoked again till the last time in 1789. The same name was borne by the sovereign assembly of the Netherlands from 1593 to the French Revolution, and is still applied to the Netherlands legislature.

Statics, that branch of mechanics which deals with bodies at rest or in uniform motion, with forces in equilibrium and with similar problems. The principal elementary theorems in statics are those of the triangle, the parallelogram and the polygon of forces according to which any three or more forces acting in different directions can be represented by proportionate straight lines and the resultant force found.

Stationers' Hall, the hall of the London Stationers, incorporated in 1567, who till the Copyright Act of 1842 enjoyed the sole right of having registered at their offices every pamphlet, book, and ballad published in the kingdom. Although no longer compulsory, the practice of entering books at Stationers' Hall was generally continued until the Copyright Act of 1909 made other provision for securing copyright.

Stationery Office, the department responsible for the preparation, publication and sale of all official reports, statistics, and other matter

issued on behalf of the British Government, including the daily report of Parliamentary debates known as *Hansard* from its original publisher. It also manufactures and supplies all kinds of stationery for the use of Government offices.

Stations of the Cross, incidents in the passage of Jesus from the hall of judgment to Calvary; in Roman Catholic and some Anglican churches pictures of them—14 in number—are frequently placed for devotional purposes.

Statistics, tabulated summaries of information on such matters as the number, age and occupation of the population of a country, its trade, commerce, health, etc. The preparation of such information is an important part of the work of all modern governments, and in Great Britain the Stationery Office issues year by year large numbers of collections and reports in which they are contained, a useful summary of the most important being the *Statistical Abstract for the United Kingdom*. Similar collections are issued by most local government authorities, public corporations, and so forth, covering their own special fields of work.

Statius, Publius Papinius, Latin poet, born at Naples; lived at Rome at the court of Domitian, but retired to his native place after defeat in a competition. His chief work is the *Thebais*, an epic in 12 books, embodying the legends connected with the war against Thebes. A collection of short pieces named *Silvae* is also extant. (61-96).

Statute, an enactment of the legislature, or written law; in Great Britain, an Act of Parliament made by the Sovereign, by and with the advice of Parliament. The "Statute Book" is the complete body of legal enactments. The Statutes of a corporation or body of persons are, similarly, the permanent rules governing its operations, limiting its competence, and defining its purposes.

Statute Law, law based on or contained in Acts of Parliament, as opposed to Common Law, or the law based on tradition, precedent, and judicial decisions of the past. All Statutes remain in force until they are repealed by the authority that made them, though in some cases they are allowed, when no longer in accord with the spirit of the times, to fall into desuetude.

Stavanger, a port of Norway, on a fjord on the SW. coast, 100 m. S. of Bergen; is of modern aspect, having been largely rebuilt; has two excellent harbours, a fine 11th Century Gothic cathedral, and important fisheries and manufactures. Pop. 47,000.

Stave, in music, a term applied to the lines upon which the notes or rests are written. A great stave has 11 lines, formed by the ordinary treble and bass staves, connected by a dotted line on which Middle C is written.

Staveley, a village of Derbyshire, England, situated on an eminence close to the valley of the Rother R., 4½ m. from Chesterfield. The parish is rich in coal and iron; there are large iron-works, and a manufacture of brushes. Pop. 17,900.

Stead, William Thomas, British journalist; after editing a Durham paper, succeeded Morley in the editorship of the *Pall Mall Gazette* in 1883; he made the paper famous for its sensational news stories, and his revelations regarding the traffic in girls between England and the Continent led to the Criminal Law Amendment Act. Founded the *Review of Reviews* in 1890; wrote among other books, *If Christ Came to Chicago*, and *Satan's Invisible World*. He was drowned when the *Titanic* sank, and having been a convinced Spiritualist, was believed by many

to have communicated from the after-life to his fellow-believers. (1849-1912).

Steam is water vapour at a temperature of 100°C. or above. It is a colourless, invisible gas; the so-called "steam" appearing as a cloud at the spout of a kettle is really a cloud of minute droplets of liquid water formed by the condensation of true steam. It is used as a source of power (see *Steam Engines*), as a means of conveying heat from one place to another, and as a raw material in many chemical operations, e.g., the manufacture of hydrogen. Superheated steam is steam whose temperature has been raised to the required degree, as for example by passing it through red-hot tubes. At normal pressure (760 mm. of mercury) steam condenses to liquid water at 100°C. At increased pressure, however, it may be so condensed even at higher temperatures; in other words, the boiling-point of water is raised. Above 374°C. steam cannot be condensed to liquid water by any applied pressure, however great; hence 374°C. is described as the critical temperature of steam.

Steam Engines, machines which enable heat energy to be converted into mechanical energy, using steam as the working substance. Steam engines are of two chief types: (a) the cylinder and piston type, and (b) the steam turbine. For the latter see *Turbines*.

In the former type of steam engine, steam at high pressure flows from a boiler into a cylinder containing a movable piston. The steam forces the piston back along the cylinder. When the piston has moved a short distance the steam supply is cut off, but the steam which is already in the cylinder continues to expand, and to exert a force on the piston until the latter reaches the end of its stroke. That end of the cylinder which contains the steam is now connected to the exhaust port, through which the steam can escape, and at the same time steam from the boiler is admitted to the other end of the cylinder to force the piston back to its initial position. The other end of the cylinder is now connected to the exhaust port, and the cycle of changes is repeated over and over again.

If the steam leaves an engine at a given temperature the efficiency of the machine can be increased by increasing the temperature at which steam is supplied to it. It is therefore an advantage to use steam at the highest possible temperature. This involves using steam at high pressure, and the use of superheated steam (see *Steam*). Moreover, the steam which passes out of the engine, after having done its work, should be at the lowest possible temperature. Hence, when practicable, a condenser is fitted at the exhaust end of the engine. In the condenser the steam is cooled by means of cold water, and condenses to form water, which is removed by a pump.

Steam Power is usually applied to steam engines (q.v.), but is also used in steam hammers and other devices. In a simple steam hammer, the hammer block is raised by admitting steam under pressure into a cylinder, the block being attached to the piston-rod. When the steam is allowed to escape through an adjustable valve, the piston, with its block, falls under the force of gravity. By manipulation of the valve, the hammer may be made to descend as far and as fast as desired. By admitting steam to another cylinder on the down-

STEAM HAMMER

ward journey, the force of gravity can be aided, and the magnitude of the blow increased.

Stearic Acid, a fatty acid which occurs in some plants, and in some waxes. When pure, it is waxy and colourless, insoluble in water, and forms salts with alkalis. It is liberated from palmitic acid by fractional precipitation with magnesium acetate.

Stearin, commercial name for a mixture of stearic and palmitic acids, which, with paraffin, is used for making candles. Also the name given to glycerides of stearic acid.

Steatite, or Soapstone, a magnesium silicate or talc, with a soapy surface, found in serpentine rock generally in association with magnetite and chromite. It is used in porcelain manufacture, and sometimes for carved ornaments.

Steed, Henry Wickham, British journalist; served as correspondent of *The Times* at Berlin, Rome, and Vienna, becoming foreign editor of the paper in 1914 and its editor from 1919 to 1922, after which he became proprietor and editor of the *Review of Reviews*. His books include *Through Thirty Years* (1924); *The Antecedents of Post-War Europe* (1932); and a number of other volumes on current events and foreign affairs. (1871-).

Steel, iron containing a small quantity of carbon; a small change in the carbon content gives rise to a large change in the properties of the steel, which also depend upon the method by which it is cooled. Sudden cooling or chilling produces a hard, brittle metal, whilst if it is slowly cooled, or annealed, soft ductile steel is produced. Properties intermediate to the two extremes may be obtained by tempering the steel. Special steels for certain purposes are made containing manganese, chromium, tungsten or nickel. See also *Stainless Steel*.

Steele, Sir Richard, English essayist, born at Dublin; enlisted (1694) as a cadet in the Life Guards; in the following year received an ensigncy in the Coldstream Guards, and continued in the army till 1706, by which time he had attained the rank of a captain; while still a soldier, he wrote *The Christian Hero* and several comedies; appointed Gazetteer (1707), and for some two years was in the private service of the Prince Consort, George of Denmark; began in 1709 to issue the famous tri-weekly paper, the *Tatler*, where his essays constituted a fresh departure in literature. Aided by Addison, he developed this form of essay in the *Spectator* (q.v.) and *Guardian*; sat in Parliament as a Whig, and in George I.'s reign received various minor court appointments. (1672-1729).

Steelyard, a balance or weighing machine, consisting of a lever

with unequal arms. In the "Roman" steelyard the article is suspended from the shorter arm, while a weight slides along the longer arm until equilibrium is reached. The "Danish" steelyard is the inverse of the "Roman"; the weight and load are suspended at the respective ends, and a suspension loop is shifted along the beam till equilibrium is secured.

ROMAN STEELYARD

Steen, Jan, Dutch painter, born in Leyden; was a genre painter of the style of Rembrandt, and his paintings display severity with sympathy and a playful humour. (1636-1679).

Steenbok (*Steenbok*), a genus (*Nanotragus*) of South African antelopes, including the tiny *Nanotragus*

pygmaeus, the smallest of the deer family, sometimes only 10 in. in height. The commonest species, *Nanotragus campestris*, is a swift, reddish animal about 2 ft. in height, with short, forward-curving horns.

Steeplechase, a race across a stretch of country which involves jumping over ditches, hedges, walls or other obstacles. The name probably originates from the fact that church steeples offered the most conspicuous landmarks. The name is extended to cover horse races in which similar obstacles are encountered on the course. The principal British steeplechase is the Grand National, run annually at Aintree, Liverpool. Racehorse steeplechasing is controlled by the National Hunt Committee.

Stefansson, Vilhjalmur, explorer. Of Icelandic parentage, he was born in Canada and educated in the United States; after expeditions in Iceland and Alaska, he travelled N. in 1908 and discovered the so-called "blond Eskimos"; between 1913 and 1918 he was again in the Arctic, discovering Prince Patrick Land. In 1924 he undertook an expedition in Central Australia. He has issued accounts of his travels, among them *Hunters of the Great North*. (1879-).

Stegosaurus, a species of dinosaur found in the upper

Jurassic beds of N. America; some 30 ft. in length, its back was covered with heavy bony plates, and its head was remarkably small in comparison with its unwieldy body and heavy tail: like the Brontosaurus, it was herbivorous. It is included in the Sub-Order Stegosauria or Armoured (plated) Dinosaurs.

STEGOSAURUS

Stein, Sir (Marc) Aurel, archaeologist, of Hungarian parentage, born at Budapest. From 1888 to 1899 he was Principal of the Oriental College, Lahore; thereafter he undertook exploring expeditions in Turkestan, W. China and Persia, making artistic and archaeological discoveries of the highest importance, on which he has published many books and essays, including *Innermost Asia and On Ancient Central-Asian Tracks*. (1882-).

Stella, the name given by Swift to Hester Johnson, the daughter of a lady-companion of Lady Gifford, the sister of Sir William Temple, to whom he wrote the *Journal to Stella*, which has been called "the most faithful and fascinating diary the world has ever seen." (1681-1728).

Stellenbosch, a town of Cape Colony, of Cape Town; one of the earliest European settlements in the Colony. It has a university, formerly Victoria College, and schools of agriculture and mining. Pop. c. 11,000.

Stem, in botany, the herbaceous or woody axis of a tree or plant; usually erect, but sometimes creeping, climbing or procumbent. It is the channel of communication between roots and leaves, and one of its functions is to raise the latter, and the flowers, into the sunlight and fresh air.

Stencilling, a process of printing on various surfaces letters or designs. The characters are cut out in thin plates of metal or cardboard, which are then laid on the surface to be imprinted, and the colour, by means of a brush, rubbed through the cut spaces.

Stentor, a Greek herald who accompanied the Greeks in the Trojan War, and whom Homer describes as "the great-hearted, brazen-voiced Stentor, whose

shout was as loud as that of fifty other men"; hence the epithet stentorian.

Stephen, king of England from 1155 to 1159, nephew of Henry I., his mother being Adela, daughter of William I.; acquired French possessions through the favour of his uncle and by his marriage; in 1157 swore fealty to his cousin Matilda, daughter of Henry I., as his future sovereign, but on the death of his uncle usurped the throne, an action leading to a violent civil war, which brought the country into a state of anarchy. The Scots invaded on behalf of Matilda, but were beaten back at Northallerton (the Battle of the Standard, 1138). Foreign mercenaries introduced by the king served to embitter the struggle; the clergy, despoiled by the king, turned against him, and in the absence of a strong central authority the barons oppressed the people and fought with one another. In 1141 Matilda won the battle of Lincoln and for a few months ruled the country, but, "as much too harsh as Stephen was too lenient," she rapidly became unpopular, and Stephen was soon again in the ascendant. The successes of Henry, son of Matilda, led in 1153 to the treaty of Wallingford, by which it was arranged that Stephen should retain the crown for life, while Henry should be his heir. Both joined in suppressing the turbulent barons. (c. 1094-1154).

Stephen, the name of ten Popes; **S. I.**, Pope from 254 to 257, signalized by his zeal against the heresies of his time; **S. II.**, Pope in 752; **S. III.**, Pope from 752 to 757, in whose reign, under favour of Pápin le Bref, began the temporal power of the Popes; **S. IV.**, Pope from 768 to 772, sanctioned the worship of saints and images; **S. V.**, Pope from 816 to 817; **S. VI.**, Pope from 885 to 891, distinguished for his charity; **S. VII.**, Pope from 896 to 897, strangled after a reign of 18 months; **S. VIII.**, Pope from 929 to 931, entirely under the control of his mistresses; **S. IX.**, Pope from 939 to 942; **S. X.**, Pope from 1057 to 1058, vigorously opposed to the sale of benefices and the immorality of the clergy.

Stephen, St., protomartyr of the Christian Church, who was stoned to death in A.D. 33. His death is a frequent subject of the old painters; when the saint himself is depicted, he is represented usually in a deacon's dress, bearing a stone in one hand and a palm-branch in the other, or both hands full of stones.

Stephenson, George, English inventor, born, the son of a poor colliery engine-man, at Wylam, near Newcastle; worked in his youth as a cowherd and colliery fireman; in 1815 invented a safety lamp for miners, which brought him a public testimonial of £1,000; turned his attention to the application of steam to machinery, and thus constructed his first locomotive in 1814 for the colliery tram-road; superintended the construction of the Stockton and Darlington Railway (1821-1825), the Liverpool and Manchester Railway (1826-1829), over which he ran his locomotive, the "Rocket," at a maximum rate of 35 m. per hour; became principal engineer on many of the new railways. (1781-1848).

Stephenson, Robert, English engineer, son of preceding, born at Willington Quay; began in 1823 to assist his father, and after several years' engineering work in S. America assisted in the construction of the "Rocket," and as joint-engineer with his father of the London and Birmingham line was mainly responsible for its construction; he constructed the Britannia and Conway Tubular bridges, besides many others, including those over the Nile, St. Lawrence, etc.; entered Parliament in 1847. (1803-1859).

Stepney, metropolitan borough of London, adjoining the "City" on the E. There is a number of small industries, and extensive docks and wharves. It includes the distinctively Jewish quarter of Whitechapel. Pop. 208,060.

Steppes, the name given to the wide, treeless plains, barren except in spring, of the SE. of Russia and SW. of Siberia.

Stereochemistry, that branch of chemistry which studies the three-dimensional arrangement of atoms in molecules. Its foundations were laid by Pasteur, van't Hoff, and Le Bel, and more recently important advances were due to Sir W. J. Pope and his pupils. It is mostly concerned with the carbon compounds, and depends on the fact that the four valencies or combining bonds of a carbon atom are not in one plane, but are directed towards the corners of a tetrahedron imagined as surrounding the atom.

Stereoscope, a simple optical apparatus which, when two

photographs of an object taken from slightly different standpoints (so as to secure the appearance it presents to either eye singly) are placed under its twin magnifying lenses, presents to the eyes of the observer a single picture of the object standing out in natural relief.

STEREOSCOPE

Stereotype, a device for reproducing printed matter after the original type has been broken up. It consists of a plate cast from a papier-mâché or plaster mould or matrix, on which is a facsimile of the page of type as set up by the compositor, from which impressions may be taken in the same way as with movable type.

Sterilization, in bacteriology, the killing of the spores of bacteria by dry or moist heat. Surgical instruments, glass apparatus, bedding, etc., are sterilized by dry heat in an oven, a temperature of 150° C. being maintained for about 30 minutes. Sterilization may also be effected by prolonged heating in boiling water. Milk is sterilized by "pasteurization," which is also a heating and cooling process. The word is used also of methods for incapacitating the mentally or physically unfit from propagation. In this sense sterilization by State or voluntary action is practised with the approval of the law in Germany, certain of the United States, and elsewhere, and a section of opinion is seeking its legalization in Great Britain.

Sterling, a term applied to the British coinage, denoting that it is in accordance with the established standard of purity, fineness and value. The word is a corruption of Esterling, a name applied to the Hansa merchants, who were "the first moneyers in England."

Sterne, Laurence, English humorist, born at Clonmel, Ireland; educated at Halifax and Cambridge, and took orders; in 1759 appeared the first two volumes of *Tristram Shandy*, and in 1767 the last two; in 1758 his *Sentimental Journey*, and in the interim his *Sermons*. (1713-1768).

Stethoscope, a medical instrument used to listen to the action of the heart and chest organs, invented by Dr. Laennec in France in 1816.

Stettin, town and river-port in Germany, capital of Pomerania, on both banks of the Oder, 30 m. from its entrance into the Baltic, and 60 m. N.E. of Berlin; lies contiguous to the smaller towns of Breslau, Grabow, and Zülchow; principal buildings

are the royal palace (16th Century) and two Gothic churches. The industries include ship-building, the manufacture of machinery and chemicals and bricks. By the Treaties after the World War Czechoslovakia was given certain rights in the use of wharves there. Pop. 371,000.

Stevenson, Robert, Scottish engineer, years was engineer to the Board of Lighthouses, and built as many as 23 lighthouses round the coast of Scotland, his most noted erection being that on the Bell Rock; introduced the catoptric system of illumination and other improvements; was also much employed as a consulting engineer in connection with bridge, harbour, canal and railway construction. (1772-1850).

Stevenson, Robert Louis Balfour, British son of the preceding, born at Edinburgh; turned from law to literature, and in 1878 appeared his first book, *An Inland Voyage*, quickly followed by *Travels with a Donkey, Virginibus Puerisque, Familiar Studies*; with *Treasure Island* (1883) found a wider public as a writer of adventure and romance, and established himself permanently in the public favour with *Kidnapped* (1886), *The Master of Ballantrae*, *Dr. Jekyll and Mr. Hyde*, etc.

His versatility in letters was further revealed in his charming *A Child's Garden of Verses, Ballads, Memories and Portraits and A Footnote to History* (on Samoan politics). In 1890 falling health induced him to make his home in the island of Samoa, where he wrote *The Bottle Imp, The Ebb Tide, The Wrecker*, and the unfinished *St. Ives*, all these being South Sea stories, and where he died. (1850-1894).

Stevenston, a parish on the shore of the Firth of Clyde, Ayrshire, Scotland, 2 m. SE. of Ardrossan. Chemicals and munitions of war are manufactured. Pop. c. 11,000.

Steward, Lord High, in early times the England, ranking next to the sovereign. Hereditary during many centuries, the office lapsed in the reign of Henry IV., and since has been revived only on special occasions, e.g., a coronation or a trial of a peer, at the termination of which the office is demitted, the Lord High Steward himself breaking in two his wand of office.

Stewart, Balfour, Scottish physicist, born at Edinburgh; became director at Kew Observatory, and professor of Natural Philosophy at Owens College, Manchester; made discoveries in radiant heat, and was one of the founders of spectrum analysis. (1828-1887).

Stewart, Dugald, Scottish philosopher, born at Edinburgh, where from 1785 he held the Moral Philosophy chair for 25 years, lecturing on a wide range of subjects connected with metaphysics and the science of mind. He wrote *Elements of the Philosophy of the Human Mind, Philosophical Essays*, etc. (1752-1838).

Stibnite, the most important natural source of antimony, of which it is the sulphide.

Stick-Insects (Phasmidae), a family of insects of the order Orthoptera, popularly so-called on account of their close resemblance in their natural surroundings to sticks, twigs, leaves, etc. By means of this mimicry (e.g.) they are enabled to remain unobserved by their foes. In most species the male has wings, the female none.

Stickleback, a sub-order (Gasterosteidae) of small generally fresh-water fish, deriving their popular

name from the spines which take the place of the dorsal fin. The common English species include the Three-spined Stickleback (*Gasterosteus aculeatus*) ranging from 2 to 3 in. long, the Ten-spined (*Gasterosteus pungitius*) and the Fifteen-spined (*Gasterosteus spinachia*), the last two being found on the coast as well. All the species are active, voracious, pugnacious and very destructive to the fry of other fishes. One peculiarity is their habit of building nests, the male taking a part in the attention to nest and eggs.

Stiff Neck, or **Wry-neck**, a form of muscular rheumatism caused by sitting in a draught or by exposure to wet. The neck muscles become very painful, and, to relax them the patient bends the head to the affected side, when they tend to become rigid. Torticollis or congenital stiff-neck is due to some defect of the sternomastoid muscle, generally through an injury at birth.

Stigand, English ecclesiastic, favourite of Edward the Confessor, who advanced him to the bishopric of Elmham and Winchester and to the Archbishopric of Canterbury in 1052; his appointment was popularly regarded as uncanonical, and neither Harold nor William the Conqueror allowed him to perform the ceremony of coronation; through William's influence was deprived by the Pope of his office and condemned to imprisonment; d. 1072.

Stigma, the pistil of a plant to which the pollen is applied, generally situated at the upper end of the style. It is a glandular body, secretes a viscous matter, and varies greatly in form.

Stigmata, impressions of marks corresponding to the wounds received by Christ at His crucifixion, with which certain holy persons are said to have been supernaturally marked in memory of His. St. Francis of Assisi is the most famous case, but many others are recorded, including that of a Bavarian girl, Theresia Neumann, in the 20th Century.

Stilicho, Flavius, a Roman general, son of a Vandal captain under the emperor Valens; on the death of Theodosius I., under whom he served, became the ruler of the West, and by his military abilities saved the Western Empire; defeated Alaric the Goth in a decisive battle and compelled him to retire from Italy, as he did another horde of invading barbarians afterwards; aspired to be master of the Roman empire, but was assassinated at Ravenna (c. 359-408).

Stilt, a long-legged wading bird of the plover family (*Himantopus scandius*), common in the marshy districts of the Rhine valley, and an occasional visitor to the Lincolnshire fen districts. It has white plumage with black wings and back.

Stilton, village of Huntingdonshire, England, which gives its name to an English cheese. It is on the Great North Road, 75 m. from London. Pop. 800.

Stimson, Henry Lewis, American jurist and statesman, born in New York. He was War Secretary in President Taft's cabinet from 1911 to 1913; served with the American forces in France during the World War; in 1927 he became Governor of the Philippines, and in 1929 Secretary of State under President Hoover. From 1934 he was one of the Judges of the Permanent Court of International Justice. (1867-

Sting Ray, a family (Trygonidae) of tremata) order, having no dorsal fin and in most species a serrated spine on the tail capable of inflicting a severe wound. They are mostly tropical fish, only one species (*Trygon pastinaca*) being found in British waters in autumn.

STING RAY

Stinnes, Hugo, German industrialist and financier. Inheriting a fortune from his father, he was an official government contractor in the World War, and subsequently acquired control of the German coal, iron, and steel industries, besides several newspapers and shipping companies, making himself the most powerful man in the country. (1870-1924).

Stint, the name of certain of the smaller sandpipers, the best known in Britain being the Little Stint (*Eriola minima*), a small wading bird no more than 6 in. in length, frequently seen as a winter visitor on the coast. It has reddish brown upper parts, a reddish brown breast and white belly.

Stipendiary Magistrate, a salaried whole-time magistrate who in London and certain large towns exercises the powers and performs the duties carried out in the provinces by Justices of the Peace. The term includes London Police-Court Magistrates and Borough Recorders. A stipendiary magistrate has all the powers that can be exercised by two or more Justices of the Peace at Petty Sessions.

Stipple, a mode of engraving by dots instead of lines, each dot when magnified showing a group of small ones.

Stirling, the county town of Stirling-shire, Scotland, one of its most ancient and historically interesting cities; on the Forth, 36 m. NW. of Edinburgh and 29 m. NE. of Glasgow; most prominent feature is the rocky castle hill, rising at the westward end of the town to a height of 420 ft., and crowned by the ancient castle; has manufactures of tartans, tweeds, carpets, etc., and a trade in agricultural and mining products. Pop. 22,600.

Stirlingshire, a midland county of Scotland, stretching E. and W. from Dumbarton (W.) to the Forth (E.); between Lanark (S.) and Perth (N.) it forms the border-land between the Lowlands and the Highlands; Loch Lomond skirts the western border, and on the northern Loch Katrine, stretching into Perthshire; Ben Lomond and lesser heights rise in the NW.; main streams are the Avon, Carron, Bannock, etc.; between Alloa and Stirling stretches the fertile and well-cultivated plain, "The Carse of Stirling"; in the W. lies a portion of the great western coal-field, from which coal and ironstone are largely extracted; principal towns are Stirling (q.v.), Falkirk, and Kilsyth; interesting remains of Antonine's Wall, from Forth to Clyde, still exist; within its borders were fought the battles of Bannockburn, Sanchieburn, Stirling Bridge, and Falkirk. Area 451 sq. m. Pop. 168,500.

Stirrup Cup, a "parting cup" given as leaving and have their feet in the stirrups. The custom originated among the Scottish Highlanders.

Stitch, a pain in the side, occurring suddenly, and often disappearing as suddenly. It is usually due to cramp in the muscles, and rubbing may give relief, but

it may be associated with pleurisy or other respiratory troubles.

Stitchwort (*Stellaria Holosteia*), an English hedge-plant of the natural order Caryophyllaceae, so named because used in some places as a remedy for stitch in the side; its star-shaped flowers are white.

Stoat, an alternative name for the Ermine (q.v.) (*Putorius ermineus*), especially when clothed in its white winter fur, which is used by peers of the realm for their ceremonial robes. It is a bloodthirsty little beast, which preys mainly on rats, rabbits and water voles.

STITCHWORT

Stock, an abbreviation of stock gilly-native to Britain, from which has been derived garden stocks, of which there are many sub-varieties. The ten-weeks-stocks have been developed from *Matthiola annua*, a Mediterranean species. The best known are Brompton stocks, the variety of colours and tints of which is practically inexhaustible, both double-flowered and single-flowered heads of bloom being produced, all deliciously scented. The night-scented stock surpasses all in its pervasive perfume at night, though it is a rather insignificantly-flowered single stock.

Stockade, a defensive barrier of stakes or piles across a piece of water or around a building; or a barricade for entrenchments made of stout timbers planted in the ground so as to touch each other, and loopholed for rifle or machine-gun fire. It may have a ditch in front and a banquette in rear. The name is applied by engineers to a row of piles serving as a break-water or protection for an embankment.

Stock Exchange, a mart for the buying and selling of Government stocks, company shares and various securities, carried on usually by the members of an associated body of brokers having certain rules and regulations. Such associations exist now in most of the important cities of the United Kingdom, and the commercial world generally (on the Continent they are known as *Bourses*). The London Stock Exchange, transacting business in handsome buildings in Capel Court, facing the Bank of England, was established in 1801, stock exchange transactions previous to then being carried on in a loose, ill-regulated fashion by private parties chiefly in and around Change Alley, the scene of the memorable South Sea Bubble (q.v.) speculation. Its members are either brokers, who buy and sell shares on commission on behalf of the public, or jobbers (q.v.). Provincial Stock Exchanges exist in Birmingham, Manchester, Liverpool, Bristol, and at Glasgow and Edinburgh in Scotland, and Belfast and Dublin in Ireland.

Stockholm, capital of Sweden; occupies a charming site on the channel leading out of Lake Mälaren into a bay of the Baltic; stands partly on the mainland and partly on nine islands, communication between which is facilitated by handsome bridges and a busy service of boats. Its wooded and rocky islands, its winding waterways, peninsulas, crowded wharves, and outlook over the inlet lake, with its handsome ancient and modern buildings, including the famous City Hall, perhaps the most successful architectural achievement of recent times, make it one of the most picturesque cities of Europe. Town L., the nucleus of the city, is occupied by the royal palace, principal wharf, etc., while on Knights' I. stand the Houses of Parliament, law-courts, and other public buildings. Norrmalm, with the Apodotry

of Science, National Museum, Academy of Fine Arts, Hop Garden, etc., is the finest quarter of the city; manufactures embrace sugar, tobacco, silks, linen, and cotton, besides which there are flourishing ironworks and a busy export trade in iron and steel, oats, and tar, despite the hindrance caused by the ice during three or four months in winter. Pop. 544,980.

Stockport, town of Cheshire, England, with Manchester; occupies a site on the slopes of a narrow gorge overlooking the confluence of the Thame and Goyt (forming the Mersey), 37 m. E. of Liverpool; a handsome viaduct spans the river; has an old grammar-school, free library, technical school, etc.; during last century grew to be a busy centre of cotton manufactures, and has besides iron and brass foundries, machine-shops, and breweries. Pop. 131,900.

Stocks, or **Pillory**, a timber frame in which malefactors were exposed to the jeers and missiles of the mob. Used until mid-19th Century for petty offenders such as vagrants and trespassers, it was previously a favourite means of punishing State criminals, and many famous men, such as Defoe, Prynne, and other Puritan pamphleteers, were pilloried. Stocks are still to be found in position on village greens in many parts of England.

STOCKS

Stocks and Shares. A share is a part of the capital of a company entitling its holder to receive a part of the profits of the company. The distinction between stocks and shares is that a share represents a minimum amount, as, say, £1 or £100, and cannot be divided, while stock may be held for any uneven or fractional amount. Shares are bought and sold through the Stock Exchange (q.v.), and are classed as *ordinary*, *preference*, *deferred*, etc., according to the nature of the right to dividends which they confer on their holder.

Stockton-on-Tees, town and port of co. Durham, England, on the Tees, 4 m. from its mouth; an iron bridge spanning the river connects it with Thornaby-on-Tees; steel and iron, ship-building, foundries, machine-shops are the principal industries; the first public passenger railway in England, opened in 1823, ran from hence to Darlington. Pop. 66,900.

Stoicism, the philosophical system instituted by the Athenian Zeno (336-264 B.C.), whose followers, called *Stoics*, derived their name from the *stoa* or portico in Athens where their master taught. The doctrines of the school were completely antagonistic to those of Epicurus, and among its disciples are to be reckoned some of the noblest spirits of the heathen world immediately before and after the advent of Christ. Its moral teaching was of a specially high order; the principle of morality was defined to be conformity to reason, and the duty of man to lie in the subduing of all passion and a composed submission to the will of the gods. It was popular in the Roman Empire, producing the two noble figures of the Emperor Marcus Aurelius (q.v.), whose *Meditations* have made its principles familiar to many later disciples, and the slave Epictetus, whose *Enchiridion* is one of the most remarkable in spirit of the extant works of classical

spens of Gray's *Elegy in a Country Churchyard*. The poet is buried there, and a monument to him, standing in 13 acres of adjoining ground, is the property of the National Trust. Pop. 1,900.

Stokes, Sir George Gabriel, British mathematician and physicist, born at Skreen, co. Sligo, Ireland; carried out many researches in physics, especially relating to hydrodynamics and wave motion, and the theory of light. He opened up new fields of investigation and supplied later experimenters with valuable hints. He was one of the foremost physicists of his day; president of the British Association at Exeter in 1869. (1819-1903).

Stoke-upon-Trent, city of Staffordshire, England, on the R. Trent, 15 m. S.E. of Crewe, the chief town of the area known as the Potteries. The city was formed in 1912 by the amalgamation of Stoke, Hanley, Burslem, and some adjoining smaller towns. It is of modern growth, and is engaged in the manufacture of all sorts of porcelain ware, earthenware, encaustic tiles, etc., besides which there are flourishing iron-works, machine-shops, and coal-mines. Pop. 273,100.

Stole, a long silken scarf worn by bishops and priests in the administration of the sacraments of the Church, and sometimes when preaching. Its colour varies according to the nature of the feast or fast that is being celebrated.

Stomach, in vertebrates, a membranous sac, formed by a dilatation of the alimentary canal, in which food is received and subjected to the processes of digestion. The human stomach is an elongated, curved pouch, from 10 to 12 in. long, and 4 to 5 in. in diameter at its widest part, lying almost immediately below the diaphragm. The food enters it through the oesophagus by the cardiac orifice, and, after having been acted on by the gastric juice, is passed on in a pulpy state through the pylorus into the small intestine. It is subject to ulceration, perforation, cancer, and other diseases.

Stone, a market town of Staffordshire, England, 7 m. S. of Stoke-upon-Trent. The Mersey canal runs through the town. Shoe-making is the principal industry; there are also breweries. Pop. 6,400.

Stone, Marcus, English draughtsman and painter; illustrated several of Dickens' works, and painted numerous domestic and other scenes of extreme popularity in Victorian days. He exhibited at 68 consecutive Academy shows. R.A., 1887. Died at Kensington. (1840-1921).

Stone Age, a period in the history of man, when the weapons of war and the tools and implements of industry were made of stone, either roughly chipped and flaked, or at a higher stage polished; is divided into two periods, the Palaeolithic (q.v.) or Early Stone Age, and Neolithic (q.v.) or New Stone Age. (See *Stoicism* for *Stoicism*).

Stonechat, a bird of the thrush family, brown above and buff below, with a collar of white, frequenting heaths and commons in Britain and various European countries. It is so named from its note resembling the clack of two pebbles. The name is often improperly applied to the wheatear and the whinchat.

Stone Circles, circles of standing stones (q.v.) found in various parts of Great Britain, N. Europe generally, and also in N. India. They were set up in most cases to mark the circular boundary of a place of burial. They have been erroneously ascribed in this country to the Druids. Most interesting of those still remaining in Britain are those of Stonehenge, in Wiltshire, with a circumference of 240 ft.

Stoke Poges, village in Buckinghamshire, shire, England, 3 m. N. of Slough. Its churchyard is famous as the

Arebury, in Wiltshire, and **Stonehenge** (*q.v.*) **Stonecrop**, a popular name for the perennial plants of the natural order Crassulaceae, so named because they grow wild on stone walls and have dense crops of flowers, amongst the most important species being *Sedum acre*, common stonecrop, a summer-blooming yellow-flowered herb.

Stonehaven, a fishing port and county town of Kincardineshire, Scotland, situated at the entrance of Carron Water (dividing the town) into South Bay, 16 m. SSW. of Aberdeen; has a small harbour, and is chiefly engaged in herring and haddock fishing. Pop. 4,200.

Stonehenge, a large and well-preserved prehistoric stone circle (*q.v.*) situated on Salisbury Plain, Wiltshire, 7 m. N. of Salisbury; "consists of two concentric circles, enclosing two ellipses"; the diameter of the space enclosed is 100 ft.; the stones are from 13 ft. to 28 ft. high; it is generally supposed to have some connexion with sun-worship. Since 1918 it has been a national possession.

Stonehouse, a mining village of Lanarkshire, Scotland, on Avon Water, 8 m. SE. of Hamilton. Pop. 3,700.

Stonyhurst, a Roman Catholic college in E. Lancashire, 10 m. N. of Blackburn; established in 1794 by certain Jesuit fathers who, after the suppression of their seminary at St. Omer, in France, by the Bourbons, took up their residence at Bruges and then at Liège, but fled thence to England during the Revolution. It is generally considered the most important of English Roman Catholic schools.

Stool-Ball, an old-time sport which survives in Sussex, where it is still a popular pastime; is a primitive form of cricket, the bat having a short handle and a short, broad blade, and the wicket being an upright stick with a square of wood at the top.

Stool of Repentance, an elevated seat in a Scottish Presbyterian church allotted in former times to those guilty of sins of the flesh, who were there exposed to public reprobation.

Stopes, **Marie Carmichael**, English propagator of birth control; born at Edinburgh. She was instructor in paleobotany at Manchester University from 1904, being the first woman to be appointed to its scientific staff. With her husband, H. V. Roe, she founded the Mothers' Clinic for Constructive Birth Control, and is the President of the Society for Constructive Birth Control and Racial Progress. She has written a novel, plays, and several works on love, marriage and contraception. (c. 1880-).

Storage Cells. See **Accumulators**.

Stork, the common name of three related families of birds, viz., the

Balenictipidae or **Shoe-billed Storks**, the **Scopidae** or **Hammer-head Storks** and the **Ciconiidae** or **true Storks**. The most peculiar of all is the **Whale-headed Stork** or **Shoe-bill** (*Baleniceps rex*), the only representative of the family, a large bird with a tremendous head and a hooked bill adapted for ripping open its food, which consists of fish and reptiles. It is found only in the marshlands of the Upper Nile. There is also only one **Hammer-head Stork**, the *Scopus umbretta*, found in Madagascar

WHALE-HEADED STORK

car and Abyssinia. The true Storks include the **Adjutant** (*q.v.*), the **Jabiru** (*q.v.*), and also the **White Stork** (*Ciconia alba*), and the **Black** (*C. nigra*), occasionally seen in Britain. The **White Stork** is a tall, wading bird, resembling the heron, but stouter, with a larger bill and shorter toes. It often nests on house-tops; the plumage is a dirty white with black wing-coverts. The **Black Stork**, from Central and East Europe, has the upper surface black and lower parts white.

Stormont, the seat of the Northern Ireland Parliament, opened in 1932. It is adjacent to the boundary of the city of Belfast.

Storms, Cape of, name originally given Hope by the Portuguese navigator Bartholomew Diaz.

Storms, Magnetic, irregular variations in the earth's magnetic field, in the opinion of some connected with the spots on the sun's surface. They are frequently coincident with appearances of the *Aurora Borealis* (*q.v.*).

Stornoway, a fishing port, the capital of Lewis, Scotland, and the chief town in the Outer Hebrides. Pop. c. 4,000.

Storting (*i.e.*, great court), the national Parliament of Norway, composed of two chambers, the **Lagting** or **Upper Chamber**, and the **Odelsting** or **Lower**.

Stour, England; the name of several rivers forming part of the boundary of Essex and Suffolk, at the mouth of which is **Harwich**; (2) a river rising in Wiltshire, following SW. into Dorset, thence SE. into Hampshire, joining the **Avon** at **Christchurch**; (3) a river of Kent, which rises near **Hythe**, passes close to **Canterbury**, thence to **Stourmouth**, where it receives the **Lesser Stour** and flows to **Sandwich** and **Pegwell Bay**; (4) a river of Staffordshire and Worcestershire, which joins the **Severn** at **Stourport**.

Stourbridge, manufacturing town in Worcestershire, England, on the R. **Stour**; its staple products are glass, pottery, and fireclay. Pop. 34,000.

Stourport-on-Severn, town of Worcestershire, England, 22 m. from Birmingham, at the junction of the R. **Stour** and **Severn**. It has an important power station which supplies electricity to three counties. The manufactures include porcelain ware. Pop. 7,300.

Stow, **John**, English antiquary, born in London; by profession a tailor; wrote several works on antiquities, the chief and most valuable being his *Survey of London and Westminster*. He ended his days in poverty. (1525-1605).

Stowe, **Harriet Beecher**, American author, whose fame rests on one book, *Uncle Tom's Cabin*, a novel that did a great deal to awaken American public opinion to the evils of the slave trade in the southern cotton plantations. (1811-1896).

Stowmarket, town of East Suffolk, Ipswich on the R. **Gipping**. It has a corn exchange, chemical works, motor works, and a trade in cattle. Pop. 8,400.

Stow-on-the-Wold, market town of Gloucestershire, England, on the **Fosse Way**, 36 m. NE. of Gloucester. The town was the scene of conflicts during the Civil War of 1642-1645. Pop. 1,390.

Strabane, a market town of co. Tyrone, N. Ireland, 182 m. W. of Belfast, on the R. **Moine**. Pop. 5,800.

Strabo, an ancient geographer, born at Amasia, in Pontus; flourished in the reign of Augustus, and the early part of

that of Thucydides; lived some years in Rome, and travelled much in various countries; wrote a history in 43 books, all lost, and a work on geography, in 17 books, which has come down to us almost complete. The work is in general not descriptive; it comprehends principally important political events in connection with the countries visited, with a notice of their illustrious men, or whatever seemed to him characteristic in them or was of interest to himself; born about 63 B.C.

Strachey, *Giles Lytton*, British author and biographer of Queen Victoria, for which he is perhaps best remembered. *Eminent Victorians* and *Elizabeth and Essex* are other well-known books of his. (1869-1932).

Strachey, *John St. Lee*, British man of letters; from 1896 he edited the *Cornhill Magazine*, and in 1897 became editor of the *Spectator*; was author of several books on social and religious questions. (1860-1937).

Stradivari, *Antonio*, Italian musician. Born in Cremona, best studied under Amati, and is famous as a maker of "Stradivarius" violins, specimens of which have in recent years changed hands for as much as £23,000. (1644-1730).

Strafford, *Thomas Wentworth, Earl of*, English statesman, born in London; after some months' travel on the Continent entered Parliament in 1614, but took no active part in affairs till 1621. He took sides at first with the party for freedom, but in 1622 felt compelled to side with the king, with the result that he acquired greater and greater influence as his counsellor. His policy, which he called "Thorough," was to establish a strong Government with the king at the head, and to put down with a firm hand all opposition to the royal authority. Appointed Lord-Deputy in Ireland in 1633, he did all he could to increase the royal resources, and was at length, in 1640, exalted to the Lord-Lieutenancy, being at the same time created Earl of Strafford. He had risen by this time to be the chief adviser of the king, and was held responsible for his arbitrary policy. After the meeting of the Long Parliament he was impeached for high treason; the impeachment seemed likely to fail, when a Bill of Attainder was produced. To this the king refused his assent, but he had to yield to the excitement his refusal produced, and as the result Strafford was beheaded on Tower Hill. (1593-1641).

EARL OF STRAFFORD

Straits Settlements, British Colony in Malaya, comprising Singapore (with Christmas I. and the Cocos I.), Penang, Malacca and Labuan. The bulk of the inhabitants are Chinese; about a quarter are Malays, the rest mainly Indians, Europeans or Eurasians. Rubber, coconuts, rice, pineapples, and other fruits are grown, and in addition to these, tin, copper, motor spirit and areca nuts are exported. Singapore is an important British naval and air base. Raffles College at Singapore is an educational institution of university standard. The total area of the Settlements is 1,356 sq. m. Pop. 1,349,000.

Straisund, a seaport of N. Prussia, on the island of Rügen, in the Baltic, and 66 m. NW. of Stettin, forms of itself an inlet, and is connected with the mainland (Pommern) by bridges; is a quaint old town, dating back to the 13th Century; figured often in the wars of Prussia. It has manufactures of sugar, leather, and oil, and a considerable shipping. Pop. 44,000.

Strang, *William*, British artist and etcher. Born at Dumbarton, he came to London as a boy of 16 and studied under Legros at the Slade School, where his drawings attracted attention. Portraits and imaginative book illustrations were his chief work. (1859-1921).

Strangford, seaport of co. Down, N. Ireland, situated immediately opposite Portaferry on the western shore of Strangford Narrows, and at the mouth of Strangford Lough, a large inlet of the sea, with many small islands, extending between Downpatrick and Newtownards.

Stranraer, a royal burgh and seaport of Wigtownshire, Scotland, finely situated at the southern extremity of Loch Ryan, 73 m. W. of Dumfries; has an interesting 16th-Century castle and a handsome town hall and court-house. There is some shipping in agricultural produce, and steamers ply daily between Stranraer and Larne, in Ireland. Pop. 6,400.

Straparola, *Giuseppe Francesco*, Italian author; compiled the collection, *Placoviotti Notti*, after the style of Boccaccio's *Decameron*, partly borrowed and partly genuine folk-stories, which ranks as an Italian classic and has been translated into various European languages; flourished in the 16th Century.

Strasbourg, city of dept. Bas-Rhin, France, and its chief town, on the Ill, a few miles above its confluence with the Rhine, 89 m. N. of Basel; is a city of Gothic origin, and contains a magnificent Gothic cathedral (11th Century) with a famous astronomical clock, an imperial palace, and university; manufactures embrace leather, cutlery, machinery and jewellery; Strasbourg pies are famous among epicures; there is also a busy transit trade. A free town of the German empire in the 13th Century, it fell into the hands of the French in 1681, and was captured by the Germans, after a seven weeks' siege, on Sept. 28, 1870, after which it became the capital of German Alsace-Lorraine, until it was restored to France in 1919 by the Versailles Treaty. Pop. 193,000.

Strategy, the science, as distinguished from the art, of war, or the general direction of a campaign. Strategy is distinct from tactics (q.v.), which concern the minor operations by which it is sought to execute the general plan of the campaign. The end of strategy may sometimes even be the avoidance of a pitched battle, as in the classic instance of Fabius against Hannibal. It is, however, the main task of the strategist to endeavour to ensure victory by the careful disposition of his troops. He must secure every possible advantage of numbers, ground, supplies and morale. In all strategy the element of surprise is of the utmost importance; this, combined with mobility, is often an effective counter to the strategy of force.

Stratford, district on the R. Lea, 4 m. E. of London, in the borough of West Ham; manufactures candles, paint, chemicals, soap, perfumes, etc.; there are large railway workshops. Pop. c. 40,000.

Stratford de Redcliffe, Sir Stratford Canning, 1st Viscount, British diplomat, born in London, cousin of Canning the statesman; entered the Foreign Office in 1807; 5 years later became minister-plenipotentiary at Constantinople, where he speedily gave evidence of his remarkable powers as a diplomatist by arranging unaided the Treaty of Bucharest (1814) between Russia and Turkey, and so setting free the Russian army to fall upon Napoleon, then retreating from Moscow; as

minister to Switzerland aided the Republic in drawing up its constitution, and in the same year (1815) acted as commissioner at the Congress of Vienna; was subsequently employed in the United States and various European capitals, but his unrivalled knowledge of the Turkish question brought him again, in 1842, to Constantinople as ambassador; exerted in vain his diplomatic skill to prevent the rupture between Turkey and Russia, which precipitated the Crimean War; resigned his embassy in 1858; was raised to the peerage in 1852. (1786-1890).

Stratford-on-Avon, market town of Warwickshire, England, on the right bank of the Avon, 8 m. SW. of Warwick; famous as the birth and burial place of Shakespeare, with whom all that is of chief interest in the town is associated; the house he was born in, his old school, Anne Hathaway's cottage at Shottery (q.v.) near by, the fine early English church (14th Century) in which he lies buried, museum, and the Shakespeare Memorial Theatre, the present building replacing one opened in 1879, and destroyed by fire in 1926. Pop. 11,600.

Strathclyde, an ancient kingdom of the Britons, which originated in the 8th Century, and comprised the W. side of Scotland between the Solway and the Clyde, and at times a part of NW. England covering the modern Cumberland, Westmorland, and part of Lancashire; the Scottish portion was permanently annexed to Scotland by David I.

Strathcona and Mount Royal, Donald Smith, first Baron, Canadian politician and business man. Born in Scotland he emigrated to Canada as a young man and served with the Hudson Bay Company, of which he later became general manager and finally governor. He took a hand in quelling a rebellion in the Red River territory in 1869, and later sat in the Dominion Parliament. He was a pioneer of the Canadian Pacific Railway in 1881, and in 1886 was knighted. In 1896 he became Canada's High Commissioner in London and was raised to the peerage. (1820-1914).

Strathmore ("Great Valley"), the great plain of Scotland stretching for 100 m. (5 to 10 m. broad), in a north-easterly direction from Dumfries-shire to Stonehaven, in Kincardineshire, between the great mountain barrier of the Highlands, the Grampians, and the Southern Lennox, Ochil, and Sidlaw Hills; in a more restricted sense denotes the plain between Perth and Brechin. The father of Queen Elizabeth, consort of King George VI, takes his title of Earl of Strathmore from this area.

Strathpeffer, a watering-place in Ross and Cromarty, Scotland, 5 m. W. of Dingwall, a health resort much frequented on account of its mineral waters and bracing air. Pop. c. 1,000.

Strathspey, a Scottish national dance, taking its name from the valley of the R. Spey, where it is said to have originated. It is always followed by a reel. Strathspey tunes were frequently used by Robert Burns as the basis of his verses.

Stratum, the geological name for a bed of rock when such beds are found in roughly parallel layers (see *Rock*). When beds or strata lie parallel to each other they are said to be "conformable," but if one set of beds rests on the upturned and worn edges of another there is "unconformable" stratification. Such an arrangement indicates a great lapse of time since the rocks in question were deposited. Even where the strata have not been disturbed, but lie horizontally as deposited, they have often been carved out

in hills and valleys by the action of rain, rivers and other atmospheric agencies.

The relative ages of the various stratified rocks have been determined in several ways, e.g., by observing their relative position, their mineral composition, and, above all, the fossil animals and plants they contain. On this basis the various strata have been divided into three groups: Primary or Palaeozoic (subdivided into Permian, Carboniferous, Devonian, Silurian, Cambrian and Archean); Secondary or Mesozoic (subdivided into Cretaceous, Jurassic or Oolitic, and Triassic); and Tertiary or Cainozoic (subdivided into Pliocene, Miocene, Oligocene, and Eocene). A fourth period, called Post-Tertiary, or Quaternary, which consists of alluvial and glacial deposits, is also often added.

Stratus, a cloud formation, a widely continuous horizontal sheet, increasing from below upwards. It is generally a fine-weather cloud, and appears low down in the evenings and early mornings of the brightest days.

Strauss, David Friedrich, German theologian and Biblical critic, born at Ludwigsburg, Württemberg; studied at Tübingen under Baur, was ordained in 1830, attended the Berlin lectures of Hegel and Schleiermacher, and, returning to Tübingen, gave lectures on Hegel in 1833, meanwhile maturing his famous theory published in his *Life of Jesus* in 1835 that, while the life of Christ has an historical basis, all the supernatural element in it and the accounts of it were simply and purely mythical. (1808-1874).

Strauss, Johann, Austrian musical composer, born in Vienna; is chiefly remembered for his dance music, including numerous waltzes, and the *Radeletsky March*. (1804-1849).

Strauss, Johann, composer and son of the preceding, famous as composer of the *Blue Danube waltz*. His opera *Die Fledermaus* is still popular. (1825-1899).

Strauss, Richard, German musical composer, born in Munich, conducted at the Munich opera house, and afterwards at Berlin. His tone-poems and operas include *Etn Heldenleben*, *Electra*, *Salome*, *Till Eulenspiegel*, and *Ariadne in Naxos*. His musical innovations have exerted considerable influence on later composers. (1864-).

Stravinsky, Igor Fodorovich, Russian composer, "futurist" born at Oranienbaum. He was induced to follow music as a career by Rimsky-Korsakov. His ballets *L'Oiseau de Feu*, *Farushka* and *Le Sacre du Printemps* are his best-known works. (1882-).

Strawberry, trailing plant of the genus *Fragaria*, with soft, sweet, pink fruits. The method of reproduction is by natural rooting of runners. The flower is a small white star-like blossom. The name strawberry is also commonly (and properly) used of the fruit. *Fragaria vesca*, the wild strawberry, of which there are both wood and Alpine varieties, is the origin of the cultivated strawberry; others are *Fragaria virginiana*, the Virginian or scarlet strawberry, and the Chilean strawberry. Perpetually fruiting varieties have recently been much improved and are used for gardens where little space is available. King George V., the Royal Sovereign, Sir Joseph Paxton and the London are all good varieties. Strawberry culture for the markets is extensively carried on in certain counties in the S. of England (q.v.)

WILD STRAWBERRY

like a warm mild climate), particularly in Hampshire. It requires considerable attention as to soil, manure, etc., and in unfavourable seasons the crop may fail. The fruit of the wild strawberry, though similar in all respects to that of the cultivated, never attains the succulence of the cultivated species.

Strawberry Tree. See *Arbutus*.

Street, George Edmund, English architect, born in Essex; he was trained under Gilbert Scott, and became an R.A. in 1871. His works include the Law Courts in London and the nave of Bristol Cathedral. (1824-1881.)

Streptococcus. See *Bacteria*.

Stresemann, Gustav, German politician. He entered the Reichstag at the age of 29 as a National Liberal; throughout the early days of the World War was a supporter of ruthlessness, and in 1917 became leader of his party. In 1918 he founded the People's Party, and in 1923 became Chancellor of Germany. The same year he was made Foreign Minister, a post he held till his death, and his tenure of which was marked by efforts for international peace, notably the Locarno Pact and the entry of Germany into the League of Nations. (1878-1929).

Stress and Strain. The deformation, whether of shape or bulk, which a body experiences when forces are impressed upon it, is termed "strain." The equilibrating system of forces which produces a strain is termed a "stress." Thus, the ratio of stress to strain is a measure of the elasticity of the body. All substances resist changes in volume, and so possess what is termed bulk elasticity, but only solids have elasticity of shape; no fluid, whether liquid or gas, can offer a permanent resistance to change of shape.

Strickland, Sir Gerald Strickland, first Baron, British administrator, born in Malta; after occupying posts in the Maltese administration, became Governor of the Leeward Is. (1902-4), Tasmania (1904-9), Western Australia (1909-13), and New South Wales (1912-17); from 1921 was head of the Constitutional Party in the Malta Legislature, and from 1927 to 1932 head of the Ministry there; ennobled 1928; is proprietor of several Maltese newspapers. (1861-).

Stricture, in medicine, a morbid constriction of the body, as the œsophagus, intestines, or urethra, generally necessitating artificial dilatation with a bougie.

Strike, a withdrawal of workers from their work in order to obtain better conditions of labour for themselves or others. Among great British strikes of the present century were the railway strikes of 1811 and 1819, the transport and dockworkers' strike of 1912, and the miners' strikes of 1921 and 1925. In 1926 a coal miners' strike developed into a General Strike of the members of the leading trades unions, which lasted for 12 days, after which legislation was passed to make general strikes and "sympathetic" strikes of workers in an industry not directly affected by a trade dispute illegal. Picketing during strikes, though if unaccompanied by violence still legal, is now closely regulated by law.

Strindberg, Johan August, Swedish writer; born at Stockholm; accumulated stores of valuable experience during various early employments, which he utilised in his first successful work, *The Red Room* (1879), a satire on social life in Sweden. *The New Kingdom* (1882), equally bitter in its attack on social conventions, got him into trouble,

and after that his life was spent abroad. *Married Life*, a collection of short stories, brought upon him a charge of "outraging Christianity." *The Confession of a Fool*, an autobiographical novel issued in 1887, is his best-remembered work. He was strongly anti-feminist, and his later books display religio-mystical tendencies. (1849-1912).

Stroke, the length of rectilinear motion of the piston or plunger of a steam or other engine; the stroke of a valve is termed its throw. In a four-stroke cycle, one stroke of the piston is required for each of the four stages of induction, compression, power and exhaust; in the 2-stroke cycle, these four stages are completed in two strokes of the piston, thus giving an impulse or working-stroke per cycle every complete revolution of the crankshaft.

Stroke, in medicine, sun conditions sometimes resulting from exposure to the heat of the sun the body does not or cannot dissipate heat so acquired through the skin and glands. It is naturally more frequent in hot climates than in mild (though often in hot climates more care is taken to avoid undue exposure) and the symptoms may vary from a mere headache to delirium. The name "stroke" is also given to a paralytic attack.

Stromboli, one of the Lipari Is., NW. of Sicily; its almost constantly active volcano, whose summit is 3,020 ft. high, is its outstanding feature. Pop. c. 1,000.

Strontium, a metallic chemical element belonging to the same group as calcium, barium, and radium. Symbol Sr, atomic number 38, atomic weight 87.63. It is a hard yellowish substance, of little importance in itself, but certain of its compounds are widely used in pyrotechny for imparting a crimson-red colour to flares. Other strontium compounds are used in the refining of sugar.

Stroud, town of Gloucestershire, England, 10 m. SE. of Gloucester; former centre of the West of England woollen manufacture, and still seat of cloth factories and dyeworks; browsing is also carried on. Pop. 13,250.

Strychnine, a vegetable alkaloid prepared from the seeds of the plant *Strychnos nux vomica* of the order Loganiaceae, native to India and Ceylon, etc. It is colourless, odourless, crystalline, and extremely bitter. It is used in medicine as a stimulant, but if taken in more than a minute quantity is a powerful poison, producing agonizing muscular contractions followed by death.

Stuart Dynasty, a dynasty of finally English kings, Scottish and commenced with

Robert II., who was the son of Marjory, Robert Bruce's daughter, who married Walter, Lord High Steward of Scotland, hence the name, his successors being Robert III., James I., James II., James III., James IV., James V., Mary Queen of Scots, and James VI. in Scotland, the last becoming, on the death of Elizabeth, King of England also as James I.; the line continued to reign over both countries in the persons of Charles I., Charles II., and James II. (VII.), and after his expulsion in 1688 was continued by the "Pretenders," James II.'s

PRINCE JAMES
STUART

son James, the latter's son Charles Edward, and finally Henry Benedict Stuart, Cardinal Duke of York, brother of Charles Edward, whose death in 1807 brought the succession to a close.

Stubbs, William, English historian, born at Knarborough; became a Fellow of Trinity and of Oriel, professor of Modern History at Oxford in 1866, and finally bishop; was author of *Constitutional History of England*, an epoch-making book in three volumes, and editor of a collection of medieval chronicles, with valuable prefaces. (1825-1901).

Stucco, building material of cement or plaster used as a facing material for walls and sometimes ceilings. In vogue in Italy in the 16th Century. It was copied in England later, the Adam brothers using it freely; Nash's Regent Street, London, recently demolished, was a notable example of its use.

Sturdee, Sir Frederick Charles Doveton, British admiral. He entered the navy in 1871, and first saw service in the Egyptian War. At the start of the World War he was made chief of the war staff, and he was in charge of the British vessels in the battle off the Falkland Is. in December, 1914, when the Germans suffered a heavy defeat. At Jutland he was in charge of the 4th battle cruiser squadron. He was created a baronet in 1914, and made an Admiral of the Fleet in 1921. (1859-1925).

Sturgeon, a genus (*Acipenser*) of fishes of the family Acipenseridae, some of them reaching a length of 10 or 12 ft. and a weight of 500 lb. The common sturgeon (*Acipenser sturio*), found in European waters, and the Russian sturgeon, or beluga (*Acipenser huso*) furnish caviar, a foodstuff made from the salted roe. Isinglass is also made from the fish's air bladder. See Fish, Royal.

Stuttgart, capital of Württemberg, Germany, stands amid beautiful vine-clad hills in a district called the "Swabian Paradise," on an affluent of the Neckar, 127 m. SE. of Frankfurt; is a handsome city with several royal palaces, a 16th Century castle, interesting old churches, a royal library, a museum, a splendid royal park, conservatoire of music, picture gallery, and a famous technical school; ranks next to Leipzig as a book mart, and has manufactures of textiles, beer, pianofortes, chemicals, tobacco, and jewellery. Pop. 415,000.

Stye, a small inflammatory tumour of the eyelid, particularly near the inner angle of the eye, forming around the follicle of one of the eyelashes. It may be due to local infection or be a symptom of poor health, and is especially common at puberty.

Styria, province of Austria, NE. of the Carinthia, stretching from the neighbourhood of Salzburg to the Yugoslavian frontier. It is a mountainous district with many fertile river valleys; a large part is under forest, and there is considerable mineral wealth in coal, iron, salt and copper. The capital is Graz. Area, 6,320 sq. m. Pop. 1,015,000.

Styx, among the ancient Greeks the name of the principal river of the nether world, round which it flows sluggishly seven times. All who after death sought to enter the spirit world had to cross it, being taken over in the boat of the celestial ferryman, Charon; Greek bodies were buried with a coin in their mouths to be given to him as payment for his services. In their solemn engagements it was by this river the gods took oath to signify that they would forego their godhood if they swore falsely. The Styx was a branch of the Great Ocean which was supposed to girdle the universe.

Suakim or **Suakin**, a seaport of the Anglo-Egyptian Sudan, on the Nubian coast of the Red Sea; stands on a rocky islet, and is connected with El Kedi on the mainland by a causeway. It is the place of embarkation of African pilgrims to Mecca; there are pearl fisheries, and a trade in ivory, gums, etc. Pop. c. 8,000.

Subconscious, a name applied to mental phenomena supposed to occur "below the threshold of consciousness" and not directly observable by their subject. In the view of orthodox psychologists the subconscious does not reveal any new function of the mind, but merely indicates action on the part of the mind without awareness of the stimuli that lead to the action. The psychoanalytical school prefer to attribute the phenomena in question to the "unconscious" mind, which is supposed to contain memories and impressions produced by inherited earlier racial experience.

Subjectivism, the philosophical doctrine that knowledge of external reality is unattainable, and that the mind can only apprehend that which is contained within itself, which may or may not bear some relation to the content of the outside world.

Sublimation, the change of a solid body into the state of a gas without passing through the liquid stage, owing to the melting point of the solid being, at the pressure acting in the particular case, higher than the boiling-point of the liquid form. In psycho-analysis the term has been adopted to describe the process of transference to other mental fields of the lower urges for sexual satisfaction, self-preservation, power and so forth.

Submarine, a fighting vessel able to move under water; its chief weapon is the torpedo, and observation of the surface is maintained by means of a periscope. The first British submarine was launched in 1801, and they were used extensively in the World War, particularly by Germany, in a ruthless campaign against enemy and neutral shipping. In the World War some submarines were fitted with wireless apparatus and equipped for mine-laying. Modern submarines are submerged by flooding specially constructed ballast tanks fitted with electric pumps for discharging the water again in an emergency. Ocean-going submarines are now built up to over 2,700 tons surface displacement with 6-in. guns. France possesses the submarine with the largest surface displacement as yet completed for any Power (the *Surcouf*); it is equipped with 14 tubes to fire a 21.7 in. torpedo, and has a radius of action of 10,000 miles.

SUBMARINE

Subpoena, a writ commanding the witness, under penalty (*sub poena*) of a fine for failure to do so, unless prevented by serious illness. A witness who has no legal excuse for failure to attend may also be sued for damages. Secondary evidence of the contents of a document may be given on proof that the person possessing the document has been duly served with a writ of *subpoena duces tecum*, requiring him to attend and produce the document in question, and has refused to do so.

Subsidy, in English constitutional history, a tax on property at the rate of 4s. in the pound for land, and 2s. 6d. for goods, first voted in the time of Richard II.; it later came to be fixed sum of £20,000. In 1399 a subsidy on wool and leather was

granted to Richard II. for life. Subsidies were discontinued after 1683. The term also applies to any material assistance by one state to another to secure its assistance against an enemy in war, as when England subsidised Austria against Napoleon. Grants to rulers in protectorates or spheres of influence to secure their good will, as in the case of the British subsidy to the Emir of Transjordan to-day, are also so called. But the term is now mostly used for government grants-in-aid to any industry or commercial concern, e.g., the subsidy to the beet sugar industry, and the grants made to shipping or airways companies for carrying mails.

Succession Acts, the statutes which regulate the succession to the British Crown. They were passed between 1701 and 1709, and settle the succession on the Protestant heirs of the Electress Sophia (q.v.) of Hanover provided they retain the Protestant faith.

Succession Duty, a duty payable of property at death by which a person becomes entitled to gratuitous transfer. It is chargeable on freehold and leasehold property situated in the United Kingdom, and on all personal property not liable to Legacy Duty (q.v.), passing under a will or intestacy, or under some other disposition. The rates of succession duty are the same as for legacy duty, and there are important exemptions. No succession duty is payable where the principal value of all the successions on the same death does not amount to £100.

Succession Wars, the general title of several European wars which arose in the 18th Century consequent on a failure of issue in certain royal lines, most important of which are (1) *War of the Spanish Succession* (1701-1713). The death (1700) of Charles II. of Spain without direct issue caused Louis XIV. of France and the Emperor Leopold I. (the former married to the elder sister of Charles, the latter to the younger sister, and both grandsons of Philip III. of Spain) to put forth claims to the crown, the one on behalf of his grandson, Philip of Anjou, the other for his second son, the Archduke Charles. War broke out on the entry of Philip into Madrid and his assumption of the crown, England and the United Netherlands uniting with the emperor to curb the ambition of Louis. During the long struggle the transcendent military genius of Marlborough asserted itself in the great victories of Blenheim, Ramillies, and Oudenarde, but the lukewarmness of England in the struggle, the political fall of Marlborough, and the Tory vote for peace prevented the allies from reaping the full benefit of their successes. The Treaty of Utrecht left Philip in possession of his Spanish kingdom, but the condition was exacted that the crowns of Spain and France should not be united. The emperor (the Archduke Charles since 1711) attempted to carry on the struggle, but was forced to sign the Treaty of Rastadt (1714), acknowledging Philip king of Spain. Spain, however, ceded her Netherlands, Sardinia, etc., to the emperor, while Gibraltar, Minorca and part of N. America fell to England. (2) *War of the Austrian Succession* (1740-1748) followed on the death (1740) of the Emperor Charles VI. without male issue. His daughter, Maria Theresa, entered into possession of Bohemia, Hungary, and the Archduchy of Austria, but was immediately attacked by the Elector Charles Albert of Bavaria and Augustus of Saxony and Poland, both rival claimants for the imperial crown, while Frederick II. of Prussia seized the opportunity of Maria's embarrassment to annex Silesia. France, Spain, and England were drawn into the struggle, the last in support of Maria, Succession coalesced from side to side, but the

Treaty of Aix-la-Chapelle, which brought the war to a close, left Maria in possession of most of her inheritance save Silesia, which was left to Frederick.

Sucker, a branch which proceeds from the surface, and, as it emerges from the earth, becomes erect, immediately producing leaves and branches, and subsequently sending down roots from its base. A rapidly growing sucker is called a shoot. In gardening suckers should be removed as soon as they appear, though with a few plants, as the raspberry, they are used for propagating.

Sucking Fish, Shark Sucker, or Remora, the common

SUCKING FISH

names of the fish of the order Discopcephali, distinguished by having a flat oval sucker of complicated structure situated on the flat upper surface of the head, by which they attach themselves to sharks and other floating objects. They were formerly supposed to impede the navigation of ships by fastening themselves to the keel.

Suckling, Sir John, English poet, born at Whitton, Middlesex; quitted Cambridge in 1628, and for a time served in the army of Gustavus Adolphus in Germany; returning to England about 1632, he became a favourite at Court; supported Charles in the Bishops' Wars against the Scots; sat in the Long Parliament; was involved in a plot to rescue Strafford, and to bring foreign troops to the aid of the king, but, discovered, had to flee the country; died, probably by his own hand, in Paris; wrote several forgotten plays, a prose treatise on *Religion by Reason*, and miscellaneous poems, amongst which are his charming songs and ballads, his title to fame, (1609-1642).

Sucrose, the chemical name for cane sugar, derived from the sugarcane, or from the root of the sugar-beet.

Sudan, Anglo-Egyptian, a large territory in Africa, in the region of the Nile, extending from the frontiers of Egypt and Libya on the N. to Kenya, Uganda, and the Belgian Congo on the S., and between French Equatorial Africa on the W. and Italian East Africa on the E.; it has a coastline on the Red Sea between Egypt and Eritrea. Egyptian rule gradually spread over the area during the 19th Century, but in 1889 a serious revolt, headed by the Mahdi (q.v.) broke out, ending in the rout of the Egyptian forces under Hicks Pasha and Baker Pasha. An attempt at relief by General Gordon ended with his death at Khartoum, but between 1896 and 1898 an Anglo-Egyptian army under *Kitchener recovered the lost provinces, which since 1899 have been ruled as a condominium under the joint sovereignty of Great Britain and Egypt, the Governor-General being appointed by Egypt with British consent. The majority of the people are Moalems, and many of them nomads; large quantities of cotton are grown; other important exports are gum-arabic, millet, sesame, hides and skins, salt, gold, cattle, dates and fruits. The capital is Khartoum; other towns are Omdurman, Wadi Halfa, Suakin, Port Sudan, and El Obeld. Area 969,000 sq. m. Pop. 5,950,000.

Sudan, French, an African colony of Algeria, Mauritania, the Niger Colony and Libya, including a great part of the desert of the Sahara. Cattle, sheep, camels and asses are raised, and millet, maize, rice, cotton and ground-nuts grown. The capital is Bamako (pop. 25,000); other towns include Kayes, Sikasso, and Timbuktu. Area, 320,000 sq. m. Pop. 3,660,000.

Sudbury, a borough of W. Suffolk, England, on the Stour, close to the Essex border, 58 m. N.E. of London; has three old churches and remains of a 15th Century friary. Pop. 7,000. Also a town of Ontario prov., Canada, in the district of Lake Nipissing, famous for its nickel mines, from which a great part of the world's supply is obtained. Pop. c. 9,000.

Sudermann, Hermann, German playwright, dramatist and novelist, born at Matschen, E. Prussia. His chief plays are *Marriage (Die Ehe)*, produced in 1888; *Sodom's Ende*, 1890; *Helma* (English translation called *Magda*), 1893. A famous novel is *Frau Sorge*, 1888. (1857-1928).

Sudeten Deutsche or Sudeten Germans, the German minority in Bohemia (Czechoslovakia), concentrated chiefly near the German frontier formed by the Sudetic mountain range. They are largely descended from the German colonists invited by the last rulers of the Premyslid dynasty in the Middle Ages. They numbered 3,232,000, or over one-fifth of the total population of Czechoslovakia, and controlled 40 per cent. of its industries. This German minority were bitterly opposed to their inclusion in the new state of Czechoslovakia as provided for by the Treaty of Versailles; hence their deputies to the National Assembly have consistently pursued a policy of obstruction, though later one section, the German Clericals, joined the Government bloc.

Herr Henlein, their present leader, succeeded the trade union extremist, Kaspar, in 1936, the latter's followers disagreeing with the constitutional methods adopted by Henlein. President Beneš, though acknowledging that the Germans had grievances, refused to entertain the idea of giving them national autonomy within the state—an ambition which, however, was brought appreciably nearer realization by reason of the German annexation of Austria in 1938, after which the demands of Henlein were increasingly pressed, with German backing, until they extended to the complete transfer to the German Reich of the Sudeten areas by a specified date, a demand refused by Czechoslovakia, with British and French support; her refusal was countered by a German threat to occupy the areas in question on Oct. 1, 1938—with the risk of a European war. But in the interim a joint pact was signed at Munich, between Germany, Great Britain, France and Italy, for the orderly taking over of the Sudetenland by Germany. The boundaries of admittedly Sudeten areas were to be determined by an International Commission; while, in the case of other areas, plebiscites were to be held under impartial supervision on the Saar model.

Sudetic (Sudeten) Mountains

stretch in irregular broken masses and subsidiary chains for 190 m. across S.E. Germany, separating Czechoslovakia from Saxony and Prussian Silesia, and forming a link between the Carpathians and mountains of Franconia; highest and central position is known as the Riesengebirge (q.v.).

Sudras, the fourth and lowest of the Hindu castes; traditionally sprung from the feet of Brahma.

Sue, Marie-Joseph-Eugene, French novelist, born in Paris; was for some years an army surgeon, and served in the Spanish campaign of 1823. On his father's death (1829) he retired from the army to devote himself to literature. His reputation as a writer rests mainly on his well-known works, *The Mysteries of Paris* (1843) and *The Wandering Jew* (1845), which, displaying little skill on the artistic side, yet rivet their readers' attention by a wealth of exciting incident and plot; was elected to the Chamber of Deputies in 1850,

but the coup d'état of 1858 drove him an exile to Annecy, in Savoy, where he died. (1804-1857).

Suez, the city of Egypt, stands at the edge of the desert at the head of the gulf of the same name and at the S. end of the Suez Canal, 76 m. E. of Cairo, with which it is connected by railway; as a trading place, dating back to the times of the Ptolemies, has had a fluctuating prosperity, but since the completion of the canal has grown greatly in importance; is still for the most part an ill-built and ill-kept town; has a large English hospital and ship-stores. Pop. 50,000.

Suez Canal, a great artificial channel cutting the Isthmus of Suez, and thus forming a waterway between the Mediterranean and the Red Sea; was planned and undertaken by the French engineer de Lesseps, through whose untiring efforts a company was formed and the necessary capital raised; occupied 10 years in the construction (1859-1869), and cost some 86 million pounds; from Port Said on the Mediterranean to Suez at the head of the Red Sea the length is about 103 m., a portion of which lies through Lakes Menzaleh, Ballah, Timsah, and the Bitter Lakes; as widened and deepened in 1882 it has a minimum depth of 28 ft., and varies from 150 ft. to 300 ft. in width; traffic is facilitated by electric light during the night, and the passage occupies about 16 or 17 hours; has been neutralized and exempted from blockade, vessels of all nations in peace or war being free to pass through; now the highway to India and the East, shortening the voyage to India by 7,600 m. An annual toll is drawn of close on three million pounds, the net profit of which falls to be divided amongst the shareholders, of whom since 1875 the British Government has been one of the largest. It is governed by a French directorate, including several English members, with one from the Netherlands. By agreement with Egypt it is guarded by a British force of 10,000 men with the help of an air detachment.

Suffocation, the sensation of choking which ensues on stopping the respiration, impeding the utterance, or whenever the air is denied access to the lungs. It may be produced by strangulation, drowning, choking, or by such diseases as tetanus, which restricts the respiratory muscles, or by false membranes obstructing the larynx.

Suffolk, easternmost county of England, fronts the North Sea between Norfolk (N.) and Essex (S.); is a pleasant, undulating county with pretty woods and eastward-flowing streams (Waveney, Alde, Orwell, Stour, etc.); long tracts of heathland skirt the coast; agriculture is still the staple industry, wheat and beet-sugar the principal crops; it has many fine churches and other antiquities. For administrative purposes it is divided into E. Suffolk (county town, Ipswich; area, 871 sq. m.; pop. 295,000) and W. Suffolk (county town, Bury St. Edmunds; area, 611 sq. m.; pop. 106,100), each with its own County Council.

Suffragan, a bishop with no separate created to assist another bishop (or "ordinary") in the administration of his diocese, in which a special portion is generally put in his care; the term is also used to describe the relation of any bishop to the archbishop who is his superior.

Suffrage, the right of voting in elections for Members of Parliament. The Reform Act of 1832 first enfranchised the 210 occupiers throughout the country and made franchise qualifications everywhere the same; the household franchise was created in 1831; in 1832 women were first admitted to the franchise. Under the present law a person is entitled to be registered as an elector when over 21, and is not legally incapable of exer-

the franchise if he or she has resided for three months in the same constituency or in another constituency, borough or county, contiguous thereto, or occupies business premises of a yearly value of at least £10, or is the wife or husband of a person so qualified. In a University constituency the taking of a degree or its equivalent is the necessary qualification.

Suffragettes, feminists who agitated actively before the World War for the extension of the franchise in England to women. Led by the Women's Social and Political Union, they tried militant methods when peaceful ones failed; the Premier, Asquith, was publicly assaulted, an attempt was made to stop the Derby, women chained themselves up in public places, and pillar-boxes and a church were destroyed. Several leaders were imprisoned and went on hunger strike.

Sufism, the doctrine of the Sufis, a sect of Mohammedan mystics. Their beliefs are those of the mystical followers of all religions, adapted to some extent to their Islamic setting; they are pantheistic in many respects, and their writings, among which are to be numbered many of the higher flights of Persian and Arabic verse, frequently symbolize the mystical union under the form of alcoholic intoxication or female beauty. Sufi schools are especially prominent in Persia and N. Africa; the Persian poets Hafiz, Al-Ghazali and Omar Khayyam were all Sufis. They gave rise to the various Dervish sects of N. Africa.

Suggestion, the process by which an idea brings to the mind another idea by association or natural connexion. In hypnotism suggestion implies the introduction by another person of a belief or impulse into the mind of a subject through the use of words, gestures or the like. The theory of suggestion asserts that all symptoms of so-called trance or hypnotism are results of that mental susceptibility, which all persons possess in greater or less degree, of yielding assent to outward suggestion, and acting in accordance with what they are made to expect, though there may be peculiar physiological or nervous conditions during which the subject's susceptibility to outward suggestion is greater than at ordinary times. The technique of self-suggestion, or auto-suggestion, has made progress in recent times. See *Codé*.

Suicide, the act of killing oneself. In English law suicide is a felony, formerly punished by the forfeiture of the criminal's property to the Crown, and his burial in the highway with a stake through his body. The suicide, unless he is found—as he usually is—at the coroner's inquest to have been in a disturbed mental state at the time of his act, is called *felo de se*, and is deprived of the privilege of Christian burial. An attempt to commit suicide is a common law misdemeanour triable at quarter sessions. If two people make a suicide pact whereby one dies, the survivor is guilty of murder. The number of suicides in England and Wales averages about 5,000 a year; two-thirds of these are males.

Suir, a river of Eire (Ireland), rising in Kerry, Tipperary and enters Waterford Harbour after a course of 100 m., passing Clonmel, Carrick and Waterford.

Sukkur, town in Sind, British India, on the Indus, 98 m. S.E. of Quetta; has rail communication with Quetta, and considerable trade in various textiles, opium, salt-petre and sugar; a great irrigation dam, 2 m. in length, was opened here in 1933. Pop. 38,000.

Suliman, or Sulaiman, Mountains, a bare and rugged range, stretching E. and S. for upwards of 350 m. between Persia almost to the Arabian

forming the boundary between Beluchistan and the Punjab, India.

Sulla, Lucius Cornelius, a Roman of patrician birth; leader of the aristocratic party in Rome, and the rival of Marius (q.v.), under whom he got his first lessons in war; rose to distinction in arms afterwards, but during his absence the popular party gained the ascendancy, and Marius, who had been banished, was recalled. The blood of his friends had been shed in torrents, and himself proscribed; on the death of Marius he returned with his army, glutted his vengeance by the sacrifice of thousands of the opposite faction, celebrated his victory by a triumph of unprecedented splendour, and caused himself to be proclaimed dk 81 B.C. He ruled with absolute power two years after, and then, resigning his dictatorship, retired into private life. (138-78 B.C.).

Sullivan, Sir Arthur Seymour, English musical composer, born in London; completed his musical education at Leipzig; in 1862 composed incidental music for *The Tempest*, then became a prolific writer of all kinds of music, ranging from hymns and oratorios to popular songs and comic operas. His oratorios include *The Prodigal Son* (1868), *The Light of the World*, and *The Golden Legend*; but it is as a writer of light and tuneful operas (librettos by Sir W. S. Gilbert, q.v.) that he is best known. These began with *Cox and Box* (1866), and include *Trial by Jury*, *The Sorcerer* (1877), *H.M.S. Pinafore*, *Patience* (1881), *Mikado* (1885), *Yeoman of the Guard* (1888), and *The Gondoliers* (1889), in all of which he displays great gifts as a melodist, and wonderful resource in clever piquant orchestration; received the Legion of Honour in 1878, and was knighted in 1883. (1842-1900).

SIR ARTHUR SULLIVAN

Sullivan, John Lawrence, American pugilist; born at Boston, Mass.; won the world championship in 1887 by beating Kilrain and held it till defeated by Corbett at New Orleans, 1892. (1856-1918).

Sully, Maximilien de Béthune, Duke of, minister of Henri IV. of France, born at the Château de Rosny, near Mantes, whence he was known at first as the Baron de Rosny. At first a ward of Henry IV. of Navarre, he joined the Huguenot ranks along with him, and distinguished himself at Coutras and Ivry, and approved of Henry's policy in changing his colours on his accession to the throne, remaining ever after by his side as his most trusted adviser, directing the finances of the country with economy, and encouraging the peasantry in the cultivation of the soil. On the death of the king he retired from court, and occupied his leisure in writing his celebrated *Memoirs*, which, while they show the author to be a great statesman, give no very pleasant idea of his character. (1560-1641).

Sully-Prudhomme, René François Armand, French poet, born at Paris; published a volume of poems in 1865 entitled *Stances et Poèmes*, which commanded instant regard, and were succeeded by others which deepened the impression, entitling him to the highest rank as a poet; was elected to the Academy in 1881. (1839-1907).

Sulphates, salts of sulphuric acid. The acid and normal, are known, among the latter being the important minerals gypsum, anhydrite, barites, celestine, glauberite and kieserite. They are mostly crystalline and soluble in water.

Sulphonal, a white crystalline solid prepared by the action of acetone upon ethyl hydrosulphide (ethyl

mercaptan), used as a sleep-producing drug. It is specially valuable owing to the fact that it has no disagreeable after-effects and is unlikely to lead to habit formation.

Sulphur, sometimes popularly known as brimstone, a non-metallic chemical element belonging to the same group as oxygen, selenium, tellurium and polonium. Symbol S; atomic number 16; atomic weight 32.06. The free element is found in many parts of the world, especially volcanic districts, but is mostly obtained from two localities, viz., Sicily and the states of Louisiana and Texas. In Sicily the sulphur is first separated from earthy impurities by melting it and running it off, and is then purified by a process of distillation. When rapidly cooled, the sulphur vapour omits to assume the liquid phase, and passes direct to the solid, in the form of minute powdery crystals ("flowers of sulphur"). If cooled more slowly, the vapour condenses to liquid sulphur, and this is allowed to solidify in cylindrical moulds, forming the so-called "roll sulphur." Sulphur is also obtained to some extent by distilling iron pyrites in the absence of air, and as a by-product in several manufacturing processes, e.g. the coal-gas industry. Sulphur readily burns in air or oxygen, forming sulphur dioxide (q.v.); it also combines directly with many metals to give sulphides. It is widely used industrially, e.g., in the manufacture of sulphuric acid, in making matches, and in vulcanizing rubber.

Sulphur Dioxide, a compound of sulphur and oxygen, formed when sulphur is burned in air or oxygen, and also obtained by roasting many metallic sulphides in a current of air. It is a heavy, colourless, poisonous gas with a characteristic pungent smell of burning sulphur. It may readily be liquefied at ordinary temperatures by the application of slightly increased pressure, and since the liquid is very volatile and absorbs considerable heat when vaporizing, many refrigerators employ it as the working substance. When moist it has mild bleaching properties, and is used to bleach delicate materials (e.g., silk) that would be destroyed by more vigorous bleaching agents such as chlorine. It is also employed as a fumigant, since it quickly kills fungi and the lower forms of animal life; but its principal use is in the manufacture of sulphuric acid (q.v.).

Sulphuretted Hydrogen,

a heavy, colourless, poisonous gas with the characteristic smell of rotten eggs, which indeed contain it, since it is one of the products of the putrefaction of albuminous substances. It is a compound of sulphur with hydrogen. It is an inflammable gas, burning with a blue flame to form sulphur dioxide and water when the supply of air or oxygen is sufficient, but yielding water and free sulphur if the air or oxygen is in inadequate quantity. It is extremely poisonous, and since it is liable to occur in sewers, etc., this fact is of practical significance. Large doses cause a sudden collapse, and death without paroxysms follows in a short time; smaller doses over a more prolonged period produce coma and finally death, but in this case there are frequently convulsive spasms as well. The intoxication and mental excitement of the priestesses at Delphi were due to their inhalation of natural sulphuretted hydrogen given off from crevices in the earth there. Certain spa waters (e.g., Harrogate) contain sulphuretted hydrogen, and are frequented by sufferers from rheumatism, arthritis, neuralgia, skin diseases and bronchitis.

Sulphuric Acid, or **Oil of Vitriol**, is perhaps the most important of industrial chemicals. It is manufactured by two processes, the English

or lead-chamber process, and the German or contact process, the latter giving a purer product at a higher cost. It is used in many branches of the dye industry, in food manufacture, and in electrical accumulators.

Sultan, an Arabic word meaning ruler or Mohammedan sovereign; it was formerly applied particularly to the sovereign of pre-war Turkey. Sultana is the feminine form. Among the many sultans in the British colonial empire are those of Johore and Zanzibar; the ruler of Oman bears the title, and from 1914 to 1922 it was used by the ruler of Egypt.

Sultana, a small, seedless, sun-dried grape, white variety of grapes grown in Asia Minor and exported in great quantities from Izmir (Smyrna).

Sulu Islands, an archipelago of 169 islands in Asiatic waters, lying to the NE. of Borneo, and extending to the Philippines, to which they are politically attached. The trade in pearls and edible nests is mainly carried on by Chinese. Pop. c. 100,000.

Sumac (h),

a tan obtained from the dried leaves and shoots of *Rhus coriaria*, a shrub of the natural order Anacardiaceae, native to S. Europe. It is used especially in preparing morocco leather; also in calico printing. When combined with mordants it produces iron-grey or black and yellow; a brownish yellow is produced by using zinc sulphate.

SUMAC

Sumatra, after Borneo the largest of the East Indian islands, stretches SE. across the Equator between the Malay Peninsula (from whose SW. coast it is separated by the Strait of Malacca) and Java (Strait of Sunda separating them); has an extreme length of 1,115 m.; is mountainous, volcanic, covered in central parts by virgin forest, abounds in rivers and lakes, and possesses an exceptionally rich flora and peculiar fauna; rainfall is abundant; some gold and coal are worked, but the chief products are rice, tobacco, maize, gold, tin, pepper, etc.; the island is under Dutch control. Padang is the capital. Area, 163,100 sq. m. Pop. 7,605,000.

Sumbawa, one of the Dutch Sunda Is., lying between Lombok (W.) and Flores (E.); mountainous and dangerously volcanic; yields quinine, timber, tobacco and rice; the largest town is Bima. Area, 5,400 sq. m. Pop. 182,000.

Sumer, an early name for the country part of Mesopotamia, one of whose chief cities was Ur of the Chaldees, mentioned in the Biblical book of Genesis, and largely excavated in recent years by Sir Leonard Woolley; the Sumerian culture reached great heights c. 3500-2500 B.C.; the language appears to have been a non-Semitic tongue considerably influenced by Semitic elements.

Summary Jurisdiction,

a court in which minor offenders may be tried and sentenced without a jury. It may be held either by a stipendiary magistrate or by two or more Justices of the Peace. A person charged with any offence, other than assault, for which he is liable on summary jurisdiction to more than 3 months' imprisonment may elect to be tried by a jury, and if he does so the charge is treated as an indictable offence. An appeal lies to quarter sessions (q.v.), but only where some statute expressly

gives the right. The convicted person may also apply in writing to the justices to "state a case," for the decision of a Divisional Court, where he believes the conviction to be erroneous in law or in excess of jurisdiction; but he must enter into recognizances (q.v.) to prosecute the appeal.

Summer Time. See Daylight Saving.

Summons, in English legal procedure a document addressed to a person charged with some offence specified in the document, commanding him to appear before justices of the peace to answer the charge. It is served by a constable on the accused personally, or at his last known or usual place of abode. If disobeyed, on proof of its service, the justices may issue a warrant for the arrest of the person concerned.

Sumptuary Laws, laws passed in England and elsewhere in dress, food and luxuries generally; appear in English statutes at various times down to the 18th Century. The food rationing during the World War, though differing in object, was in essence the application of a sumptuary law.

Sumter, Fort, a fort on a shoal in Carolina, U.S.A., 3½ m. from the town; occupied by Major Anderson in the interest of the secession of South Carolina from the Union. The attack on it by General Beauregard on April 12, 1861, was the commencement of the Civil War; it held out against attack and bombardment till the month of July following.

Sun, The, the centre of the solar system, round which the earth and all the planets revolve. It is a globe of incandescent vapour about 700 times as large as all the planets put together; about 870,000,000 miles in diameter; it is 92,500,000 m. from the earth. Its temperature is estimated at 6,000° C.; its surface is marked by dark spots called *sunspots* (q.v.), and by watching these as they move over the sun's disc it was found that it revolves on its axis once in 24 to 33 days. The spectroscopic shows that the sun is composed of hydrogen and a number of vaporized metals. Its luminous exterior surface is called the photosphere; outside this is the reversing layer, and outside this again the reddish chromosphere, observable at total eclipses. Beyond this is the corona, or solar atmosphere.

Sun-Bird, a family (Nectariniidae) of brilliantly-coloured passeriform birds, not unlike humming-birds, found in N. Africa, S. Asia, New Guinea, and Australia. They have long, slender, curved beaks, and the nests of several species are built to hang from the ends of branches of trees.

Sun-Bittern, a family (Eurypygidae) comprising only two known species of birds, found in Central America and Colombia. The chief species is *Eurypyga helias*, a heron-like bird with a black head and white stripe over the eye, the rest of the plumage being variegated black, chestnut, grey, and buff, and the whole speckled, mottled and signposted, producing a coloration of rare beauty. It is native to South America, living by river banks.

Sunda Islands, a name sometimes applied to the long chain of islands stretching SE. from the Malay Peninsula to N. Australia, including Sumatra and Timor, but more correctly designates the islands Bali, Lombok, Sumbawa, Flores, and Sundaewoed I., which lie between Java and Timor, are under Dutch

suzerainty, and produce East Indian products. **Sunday,** the first day of the week, once at the beginning of Christianity for the Jewish sabbath as the weekly day of rest and special devotion. See also *Sunday Closing*.

Sunday Closing. The Lord's Day Observance Act of 1877 forbade tradesmen and workmen from pursuing their ordinary calling on a Sunday; but "works of necessity or charity" were excepted. An Act of 1871 to the effect that no prosecution under the former Act might be begun without the consent of a stipendiary, two justices, or the chief of police, long rendered the law practically nugatory. The opening of places of entertainment on Sunday is governed by the Sunday Observance Act of 1780, though its provisions may be circumvented by admitting the public free and charging only for reserved seats; cinemas may be opened on Sundays only with the permission of the local authority, which must be granted on the demand of a majority of ratepayers at a plebiscite. In 1937 a new Sunday Closing Act regulated the hours during which refreshments, tobacco, and perishable foodstuffs might be sold on Sundays, and forbade the sale of most other articles except in certain districts with a large Jewish population where Saturday closing is general. See also *Permitted Hours*.

Sunday Schools were started in England in 1760 by the Revs. D. Blair and J. Alleine, and were soon copied by churches in all parts of the country; the system of religious education was overhauled and improved by R. Ralke in 1780.

Sunderbunds, or Sundarbans, a great tract of jungle, swamp and alluvial plain, forming the lower portion of the Ganges delta; extends from the Hooghly on the W. to the Meghna on the E., a distance of 165 m.; rice is cultivated on the upper part by a sparse population; the lower part forms a dense belt of wild jungle reaching to the sea, and is infested by numerous tigers, leopards, buffaloes, pythons, and cobras.

Sunderland, county borough and seaport of Durham, England, situated at the mouth of the Wear, 12 m. SE. of Newcastle-upon-Tyne. It includes the ancient township of Monkwearmouth, but as a commercial town entirely developed within the last century, and is of quite modern appearance, with the usual public buildings; owes its prosperity mainly to the neighbouring coalfields, the product of which it exports in large quantities. There are ship-building yards, large ironworks, glass and bottle works, and roperies. Pop. 184,000.

Sundew, the popular name in Britain of the three native species of *Drosera* of the natural order Droseraceae, the best known being *Drosera rotundifolia*, the Common Sundew, a marsh plant, common in bogs and remarkable for its capacity of capturing and absorbing insects, by means of its numerous closely infected tentacles whose glands contain a thick acid secretion.

Sundial, an instrument for measuring time, consisting essentially of a rod on the edge of a piece of metal, called the style, which is placed parallel to the earth's axis, and casts a shadow on a plate called the dial. The plate is graduated to indicate hours and the shadow cast by the sun passing over it indicates the time of day. The sundial indicates "true solar time," the clock mean solar time.

SUN-BIRD

SUNDEW

Sun-Fish, the common name of a N. American family (Centrarchidae) of prettily-coloured nest-building fresh-water fishes, some species being in demand for aquaria. The Truncated sun-fishes of the family Aplocheilichthys are queerly-shaped oceanic fishes having a truncated, almost spherical body, a very small mouth, high dorsal and anal fins and a caudal fin extending the length of the truncated posterior part of the body. At least one species, the Common or Round-Tailed Sun-fish (*Mola mola*) is found in British waters.

SUN-FISH

Sunflower (*Helianthus annuus*), a plant of the order Compositae, bearing a large yellow daisy-shaped flower, and sometimes called turnsol from the ancient belief that its blossoms always turn towards the sun. It is native to Peru, where it was used in religious ceremonies on account of the resemblance of its flower to a sun with golden rays. It reaches a height of 10 to 15 ft., and the flowers may be as much as 1 ft. in width. The seeds are a favourite food of cage-birds and Russian peasants.

Sung, a Chinese dynasty which reigned from 980 to 1280 A.D., with its capital at Kaifeng. It came to an end with the Mongol invasion under Kublai Khan (q.v.). The Sung period was one of the greatest Chinese cultural epochs, especially in painting, and was remarkable for the social experiments of the reformer Wang An-Shih (1021-1086), who inaugurated a kind of State socialism which did not survive him.

Sungari, river of Manchukuo, a tributary of the Amur; rising in the White Crested Mts. on the Korea border, it has a length of 800 m.; it is joined by the Nonni, flowing thence past Harbin to Tungkiang.

Sunn-Hemp (*Crotalaria juncea*), an annual leguminous plant 8 to 12 ft. high, with silvery leaves and yellow flowers; cultivated throughout India for the hemp-like fibres of its stem, which are used in making canvas and ropes. It is also known as Bombay hemp.

Sunnites, the orthodox Mohammedans, a name given to them because they accept the *Sunnah*, i.e., traditional teaching of the Prophet, as of the same authority as the Koran, in the matter of both faith and morals. They are divided into four recognized sects, and include the greater part of the world of Islam except in Persia, which is mostly Shiite (q.v.).

Sunspots, dark, irregular markings upon the sun's disc, showing a distinct periodicity of about 11 years. It has been found that magnetic storms are more frequent at periods of sunspot maximum and that there is a relation between sunspots and the Aurora Borealis. Attempts have been made to connect the sunspot cycle with the variations in the weather.

Sunstroke, or Heatstroke. See Stroke.

Sun-Worship, the worship of the sun, frequently together with that of fire as its earthly symbol, the basis of the religion of the ancient Peruvians, and of first importance among the Zoroastrians of Persia and the Mexican Aztecs. The early Aryan religion was based on sun-worship, and some have traced the origin of the Christian festival of Christmas to a feast in honour of the reviving sun.

Sun Yat-Sen, Chinese statesman. Born near Canton, he became a doctor, and, taking to politics, was a leader of the 1905 rising in his native city.

Afterwards he was an exile in Japan, England, and America, but after the success of the 1911 revolution he became China's first President, resigning the following year. He again retired from the country and was behind revolutions in 1912 and 1915; on the formation of the Cantonese government in 1917 he held the Presidency till 1918; was out of office for three years, but in 1921 was again President; later his party met with reverses at the hands of the northern or Peking government. After his death he became the symbol of Chinese reawakening, and almost an object of worship to the Kuomintang. (1866-1925).

Superannuation, the name given to a pension payable to a public servant on his or her compulsory retirement at a fixed age-limit. In Great Britain contributory superannuation schemes are in force for all established civil servants, for teachers and most other employees of municipal authorities and local bodies, generally providing for the payment of allowances at the rate of one-half or two-thirds of their normal salaries after their retirement at the age of 65 or sometimes 60.

Superheater, an apparatus for superheating steam, i.e., increasing its temperature and volume beyond their saturation values, or increasing its temperature to the amount it would lose on its way from the boiler until exhausted from the cylinder. This is accomplished by passing the steam through a series of small tubes several times across the uptake of the chimney before it enters the steam-pipe. The superheater is used especially for supplying turbines, its value being that it economizes steam and obviates its corrosive action on the pistons and valves. See Steam Engine.

Superior, Lake, the largest fresh-water lake on the globe, lies between the United States and Canada, the boundary line passing through the centre; area, 31,200 sq. m.; length, 410 m.; maximum depth, 1,008 ft.; St. Mary's R., the only outlet, a short rapid stream, carries the overflow to Lake Huron; receives upwards of 200 rivers, but none of first-class importance, largest being the St. Louis; is dotted with numerous islands; water is singularly clear and pure, and abounds with fish; navigation is hindered in winter by shore-ice, but the lake never freezes over. The towns on its banks include Duluth, Marquette, and Superior, the latter in Wisconsin, U.S.A., with a ship-building industry, and a grain and metal trade. Pop. c. 36,000.

Superphosphates, artificial manures obtained by the action of sulphuric acid on phosphate of lime.

Superstition, credulity regarding the supernatural; it is usually, or often, a relic of some magical or religious belief of a past age. The superstition that the number thirteen is unlucky probably derives either from the fact that, including Judas, the number of persons present at Christ's last supper was thirteen, or that thirteen was the traditional number of members of a witches' meeting or coven; that regarding Friday from its being the day of the Crucifixion; and many popular superstitions are found on examination to have similar explanations.

Suprarenals. See Adrenals; Endocrine Glands.

Supreme Council, an organization allied power in the World War after the defeat at Caporetto in November, 1917; it consisted of military and political representatives of the Allies, and met at Versailles with the aim of co-ordinating and unifying plans of campaign. After 1918 it existed for a time to enforce the Peace treaties.

Supreme Court, in England, the Supreme Court of Judicature, constituted in 1875 by the consolidation of the Courts of Queen's Bench (now King's Bench), Chancery, Common Pleas, Exchequer, and the Court for Admiralty, Probate, and Divorce and Matrimonial Causes. There are now two permanent Divisions, the High Court of Justice (divided into the Chancery, King's Bench, and Probate Divorce and Admiralty Divisions), and the Court of Appeal. See *Justice, Royal Courts of, King's Bench; Chancery, etc.* In the U.S.A. the Supreme Court is constituted of a Chief Justice and eight Associate Justices, whose authority extends over all cases of law and equity; all cases affecting ambassadors; admiralty and maritime cases; and interstate controversies. Its appellate jurisdiction extends to most of these heads. It also pronounces on the constitutionality of acts passed by Congress, and is thus the guardian of the Constitution. The functions of the U.S.A. Supreme Court were the subject of considerable controversy in 1935 and thereafter, several of its decisions being adverse to the constitutionality of laws and decrees issued by the Roosevelt government in pursuance of its reconstruction policy; and the President proposed to initiate legislation to modify its constitution and functions, until, an opportunity arising for the making of a new appointment, the balance of opinion in the Court veered round to the President's support.

Surabaya, (Soerabaja), a seaport on the NE. coast of Java, is the headquarters of the military, naval and air forces in the Dutch East Indies; there is a considerable trade in rice, coffee, tobacco, etc. Pop. c. 120,000.

Surat, a city of India, Bombay Presidency, on the Tapti, 14 m. from its entrance into the Gulf of Bombay; chief exports are cotton and grain, and carpets and other textiles are manufactured. The English erected here their first factory on the Indian continent in 1612, and, with Portuguese and Dutch traders added, it became one of the principal commercial centres of India. In the 18th Century the removal of the English East India Company to Bombay drew off a considerable portion of the trade of Surat, which it has never recovered. Pop. c. 110,000.

Surbiton, a borough of Surrey, England, SW. of London, on the Thames opposite Hampton Court Palace. It is a rapidly growing residential suburb of London. Pop. 48,600.

Surcouf, Robert, a French privateer, born in St. Malo, who figured in several notable exploits, capturing the British vessels *Trition* and *Kent* in 1785 and 1800. (1773-1827).

Surd, in mathematics, an irrational quantity, or one incommensurable with unity, and which cannot therefore be expressed accurately as a decimal fraction taken to any number of places. Thus the cube root of 7 or the square root of 6 are surds.

Surety, a person who goes bail for the performance by another of some act, under pain of the payment of a sum of money, and, in case of the other's default, is liable to pay the sum for which he is bound. See also *Recognizance*.

Surface Tension. If a liquid can spread over the surface indefinitely, but it—as with water on a greasy dish—it cannot wet the surface, it tends to form itself into more or less spherical drops. Again, if a liquid is free to take up any shape, it always assumes the form of spherical drops, a fact turned to useful account in making shot by pouring a melted alloy of lead and antimony from a high tower into a cold-water tank at the base. Such

behaviour indicates that a drop of liquid tries to shape itself so as to have the smallest possible surface, a condition fulfilled when it has become spherical. A liquid behaves, therefore, as if it were covered with an elastic "skin," and the strength of this—quite imaginary—skin is a measure of the surface tension of the liquid.

Surgeon, a practitioner of that branch of the healing art in which wounds, fractures, deformities and disorders are treated by manual operation. Until the end of the Middle Ages the profession of surgeon was not distinguished from that of barber, and not until 1745 were the two callings separated. On the establishment of the Royal College of Surgeons in London in 1800, surgery became an art on the same level as medicine. The College gives diplomas of membership and fellowship, but not doctorates. The degree in surgery corresponding to M.D. in medicine is M.S. or M.Ch.—master in surgery.

Surgeons, Royal College of, formed in 1800 and chartered in 1843, has its headquarters in Lincoln's Inn Fields, London; it was built in 1813 and contains the famous Hunterian Museum. The College is the successor of a surgical guild dating back to the 14th Century.

Surgery, manual treatment of injuries or disorders of the body, or operative therapeutics. "Cutting" operations are only a part of surgery; operative intervention more often consists of manipulative treatment. A very high order of dexterity is needed for the many instruments which may be used both in the diagnosis of disease and in its treatment.

There are three main obstacles to the safe performance of operations: bleeding, shock and infection of the wound. To-day bleeding during operations is less than in the average "nose-bleed." Formerly infection was the rule, and in view of the prevailing ignorance of bacteriology it was remarkable that any wounds escaped infection. It was the work of Pasteur on fermentation and putrefaction, applied by Lister (q.v.) to the problem of wound infection, that has wrought the marvellous change in surgical methods and outlook to-day.

Surinam. See *Gulana, Dutch*.

Surplice, a linen robe with wide sleeves worn by officiating clergymen and choristers, originating in the rochet or alb of early times. It is sometimes trimmed at the bottom and sleeves with lace, and is then frequently called a cotta.

Surrey, an inland county of England, in the SE. between Kent (E.) and Hampshire (W.), with Sussex on the S., separated from Middlesex on the N. by the Thames. The North Downs traverse the county E. and W., slope gently to the Thames, and precipitously in the S. to the level Weald. Formerly, and still in part, a beautiful region of hill and heather and adorned with splendid woods, it is rapidly being built over in view of its proximity to London. The Wey and the Mole are the principal streams. Hops are extensively grown round Farnham. The largest towns are Croydon, Sutton and Cheam, Merton and Morden, and Mitcham, all suburbs of London; Kingston-on-Thames is the county town, but the assizes are held at Guildford, where a cathedral is being built. Area, 721 sq. m. Pop. 1,181,000.

Surrey, Henry Howard, Earl of, English Norfolk. Early attached to the court of

SURPLICE

Henry VIII., he attended his royal master at the "Field of the Cloth of Gold," and took part in the coronation ceremony of Anna Boleyn (1533); was created a Knight of the Garter in 1542, and two years later led the English army in France with varying success. Imprisoned along with his father on a charge of high treason, for which there was no adequate evidence, he was condemned and executed. As introducer of the sonnet and originator of blank verse, he deservedly holds a high place in the history of English literature. (1516-1547).

Surrogate, a person appointed to act the deputy of an ecclesiastical judge, most commonly of a bishop or his chancellor; his most important duty is the issuing of licences for marriage.

Surtax, a tax, additional to income tax any person whose total income (including his wife's) exceeds £2,000. Its present maximum rate is 7s. 6d. in the £, plus 10 per cent. of that rate, but the rate is graduated from a minimum of 1s. in the £ plus 10 per cent. on incomes between £2,000 and £2,500. The number of surtax payers in 1936 was about 85,000, and the receipts about £49,000,000.

Surtees, Robert Smith, British sporting novelist. A solicitor in London, he helped to found the *New Sporting Magazine*, wherein in 1831-1834 appeared the hero of *Jorrocks's Jaunts and Jollities*, 1838. His other famous works are *Handley Cross*, 1843; *Ask Mamma*, 1858; *Mr. Facey Romford's Hounds*, 1865. (1803-1864).

Surveying, the measurement of a surface, generally with a view to the production of a map or chart. The principal instruments used are the chain of fixed length, for measuring base lines, from which other distances can be calculated by trigonometry, and the theodolite, a telescope whose motions can be calculated from a circular scale on which it is rotated. Since the development of aviation these methods of surveying have largely given place in the case of large areas to air photography, a number of photographs being taken from different positions and their results incorporated in a scale plan.

Susanna, The History of, a section of the Apocrypha, where it forms part of the book of Daniel, being taken from the Greek Septuagint version; no Hebrew original has been discovered. It is the story of a woman who had been accused of adultery by two elders and condemned to death, but was acquitted on Daniel's examination of her accusers, who were confounded and condemned to death in her stead.

Susquehanna, a river of the U.S.A., formed by the junction of a river of the same name at Northumberland, Pennsylvania, of the North Branch (350 m.) flowing out of Schuylers Lake, central New York, and the West Branch (250 m.) rising in the Alleghany Mts.; flows in a shallow, rapid, partly navigable course S. and S.E. through beautiful scenery to Port Deposit, at the N. end of Chesapeake Bay; length, 150 m.

Sussex, a S. maritime county of England, fronts the English Channel between Hampshire (W.) and Kent (E.), with Surrey on its northern border; is traversed E. & W. by the South Downs, which afford splendid pasturage for sheep, and terminate in Beachy Head; in the N. lies the wide, fertile, and richly-wooded plain of the Weald; chief rivers are the Arun, Adur, Ouse, and Rother, of no great size; is a fine agricultural county, more than two-thirds of its area being under cultivation; was the scene of Cæsar's landing (55 B.C.), of Ælla's, the leader of the South Saxons (whence the name Sussex), and of William the Conqueror's

(1066). It is divided for administrative purposes into East Sussex (county town, Lewes; largest towns, Brighton, Eastbourne and Hastings; area, 829 sq. m.; pop. 547,000) and West Sussex (county town, Chichester; largest towns, Worthing and Bognor; area, 628 sq. m.; pop. 223,100).

Sutcliffe, Herbert William, cricketer, born at Pudsey, playing since 1909. In Yorkshire eleven, 1919, made five centuries; 1922, four centuries. He was a leading batsman, played in the test matches in Australia, 1924, and in subsequent test matches opened the batting with Hobbs. In 1932 he made a score of 313 against Essex. (1894-).

Sutherland, a maritime county of N. Scotland; presents a N. and a W. shore to the Atlantic, between Ross and Cromarty (S.) and Caithness (E.), and faces the North Sea on the S.E., whence the land slopes upwards to the great mountain region and wild, precipitous, loch-indented coasts of the W. and N. There is very little cultivation, but large numbers of sheep and cattle are raised. There are extensive deer forests and grouse moors, while valuable salmon and herring fisheries exist round the coasts; is the most sparsely populated county in Scotland. Dornoch is the county town. There are no other towns of any size. Area, 2,028 sq. m. Pop. 16,100.

Sutlej, the easternmost of the five rivers of the Punjab; its head-waters flow from two Tibetan lakes at an elevation of 15,200 ft., whence it turns NW. and W. to break through a wild gorge of the Himalayas, thence bends to the SW., forms the eastern boundary of the Punjab, and joins the Indus at Mithankot after a course of 900 m.

Sutro, Alfred, British playwright, chiefly famous for *The Walls of Jericho*, *John Gayde's Honour*, and his translations of Maeterlinck. (1863-1933).

Suttee, a Hindu widow who immolates herself on the funeral pyre of her husband; the term is also, though wrongly, applied to the practice itself, which is properly called *satyagraha*. The practice was of very ancient date, but the custom was proclaimed illegal in 1829 under Lord William Bentinck's administration, and it is now very seldom that a widow seeks to violate the law. In 1823, in Bengal alone, 575 widows gave themselves to be so burned, of whom 109 were above 60, 226 above 40, 209 above 20, and 32 under 20.

Sutton and Cheam, a town of Surrey, England, 11 m. S. of London, of which it is a residential suburb. Pop. 85,000.

Sutton Coldfield, a borough of Warwickshire, England, 7 m. N.E. of Birmingham, of which it is a residential suburb. Pop. 33,900.

Sutton-in-Ashfield, a town of Nottinghamshire, England, 12 m. N.W. of Nottingham. The chief industries are mining, cotton thread, silk, and wool manufacturing. Pop. 38,660.

Suture, in anatomy, the joint or seam which unites the bones of the skull. A serrated suture is one in which the two bones concerned have saw-like edges which fit each other. The word is also used of the methods employed for sewing together surfaces of flesh separated by wounds—for which the materials employed are usually catgut, silk, or silver wire.

Suvla Bay, a bay in the Gallipoli Peninsula, on the W. side of the Dardanelles, where British troops under the command of Sir F. W. Stopford landed in August, 1915, in support of the Australian forces acting against the Turks; it was evacuated in the following December.

Svishtov, town of Bulgaria, formerly known as Sistova; it is on the Danube, 33 m. SW. of Ruse (Rustchuk), and has trade in wine, leather and cereals; near by are ruins of a Gothic palace. Pop. 15,000.

Swabia, an ancient duchy in the SW. of Germany, so called from the Suevi, who in the 1st Century displaced the aboriginal Celts; was separated by the Rhine from France and Switzerland, having for capital Augsburg, and is now comprised in Württemberg, Bavaria, Baden, and Liechtenstein.

Swadlincote, urban district of Derbyshire, England, 6 m. SE. of Burton-on-Trent. The manufactures are sanitary earthenware, firebricks, fireclay, ironstone, and Rockingham ware. Pop. 20,600.

Swahili, a people of mixed Bantu and Arab stock occupying Zanzibar and the adjoining territory from Mombasa to Mozambique. They are an enterprising race, and are dispersed as traders, hunters, carriers, etc., far and wide over Central Africa. Their language is the common medium of communication in E. Central Africa, and is an official language in Kenya and Tanganyika.

Swale, a river in the N. Riding of Yorkshire, uniting, after a course of 60 m., with the Ure to form the Ouse.

Swallow, the popular name of the birds of the family Hirundinidae,

distinguished by having long narrow wings, forked tail, short, wide bill, and weak feet. The colour varies from purplish-black to true black, with white or buff beneath. Swallows are found

HOUSE-SWALLOW

over almost the entire world. The summer migrant to England is *Hirundo rustica*, the House-Swallow, which sometimes arrives as early as April; the house-martin and sand-martin are also included under the general name. Sea-Swallow is another name for the Terns (q.v.) of the Laridae family.

Swan, the common name for any species of bird of the genus *Cygnus* of the family Anatidae (ducks). The swan has an exceedingly long, flexible neck, and short legs placed rather far back; the plumage (except in the case of the Black Swan) is mainly white in the adult stage. At least two species, the Whooper or Whistling Swan (*Cygnus musicus*), an Arctic species, and Bewick's Swan (*C. bewicki*), are winter visitants to Britain. The Mute Swan (*C. olor*) with a relatively long and wedge-shaped tail is best known as a domesticated bird. The Swan was formerly considered in Great Britain as a royal bird, none but the king being allowed without special permission to keep one. The birds dwelling on the Thames and other British rivers are still annually examined and marked by their owners, mostly City companies, the process being known as "swan-upping."

Swan, Sir Joseph Wilson, English inventor, born at Sunderland; with his partner, John Mawson, made numerous improvements in photography, introducing the lens cap for half-tones. In 1897 he invented the Swan incandescent electric lamp with strong filament; and also invented an electric safety lamp for miners. (1838-1914).

Swanage, watering place in the Isle of Poole, Dorset, England. It is situated in the district. Pop. 6,300.

Swan River, a river in Western Australia, which was formerly known as the Swan River Settlement. It rises near Narrogin and flows N. and

W. to the Indian Ocean. Fremantle, the ocean port, stands at its mouth, and Perth, the capital of the State, 13 m. upstream.

Swansea, the second town of Wales, in Glamorganshire, and an important seaport, at the entrance of the Tawe into Swansea Bay; has a splendid harbour, with large docks, and exports coal, iron, oil from the neighbouring refineries at Llandarcy, and the products of its great tinplate and steel works. Pop. 164,000.

Swarajists, a political party in India advocating national independence. The word "swaraj" means "government of self," and was originally used as an ethical term for self-control. Politically the term started in a presidential address of Dadabhai Naoroji to the Indian Congress in 1906, but Gandhi was responsible for its adoption by the native party in 1919, and the formation of the Swarajist Party under the leadership of C. R. Das and Pandit Moti Lal Nehru. Complete independence became the party slogan, and non-co-operation with the British one of the methods of securing it. See Indian National Congress.

Swastika, or Fylfot, a cross-like symbol formed of equal arms with rectangular clockwise continuations. It is possibly connected with sun-worship, and is found as a symbol among the people of many early cultures; it plays a large part in Indian Buddhist symbology, and has recently become notorious (in its left-handed or anti-clockwise form) as the symbol of the German Nazis, appearing on the German national flag.

Swatow, a seaport of China, at the mouth of the Han, 225 m. E. of Canton; has large sugar-refineries, factories for bean-cake and grass-cloth; it was a scene of fighting with the Japanese in 1928-29. Pop. 179,000.

Swaziland, a small South African native State to the E. of the Transvaal, governed as a British protectorate; is mountainous, fertile, and rich in minerals; gold and tin are mined, and ground-nuts, tobacco and other crops raised. Capital, Mbabane. Area, 6,705 sq. m. Pop. 157,000, including 2,750 Europeans.

Sweating, a term first used about 1848 to describe the iniquitous conditions of workers employed by subcontractors in the tailoring trade. The term is now used in reference to all trades in cases where the conditions imposed by masters tend to grind the rate of payment down to a bare living wage and to subject the workers to insanitary surroundings by overcrowding, etc., and to unduly long hours. In 1890 an elaborate report by a committee of the House of Lords was published, and led in the following year to the passing of the Factory and Workshops Act and the Public Health Act, while a Parliamentary enquiry in 1906 led to the passing of the Trade Boards Acts, the operation of which has done a great deal to mitigate and repress the evil.

Sweating Sickness, an epidemic of extraordinary malignity which swept over Europe, and especially England, in the 15th and 16th Centuries, attacking with equal virulence all classes and all ages, and carrying off enormous numbers of people; was characterized by a sharp sudden seizure, high fever, followed by a foetid perspiration; first appeared in England in 1485, and for the last time in 1551, though small epidemics occurred later on the continent of Europe.

Swede (*Brassica campestris*), a yellow variety of turnip, distinguished by a thickening near the stem. The leaves are usually bluish-grey in colour, and the root is also tinged with blue. It is widely culti-

vated, mainly as a cattle food for use in combination with dry fodder, owing to its high percentage of water.

Sweden, a kingdom of Northern Europe, occupying the eastern portion of the great Scandinavian Peninsula, bounded W. by Norway, E. by Finland, the Gulf of Bothnia, and the Baltic, and on the N. stretches across the Arctic Circle between Norway (NW.) and Russia (NE.), while its southern serrated shores are washed by the Skager-Rak, Cattagat, and Baltic. From the mountain-barrier of Norway the country slopes down in broad terrace-like plains to the sea, intersected by many rivers and diversified by numerous lakes, of which Lakes Wener, Wetter, and Mälar (properly an arm of the sea) are the largest. Much of it is under forest.

It has three great divisions: (1) Norrland in the N., a wide and wild tract of mountainous country, thickly forested, infested by the wolf, bear, and lynx, and sparsely inhabited by Lapps. (2) Svealand occupies the centre, and is the region of the great lakes and of the principal mineral wealth (iron, copper, etc.), of the country. (3) Gethland, the southern portion, embraces the fertile plains sloping to the Cattagat, and is the chief agricultural district, besides possessing iron and coal.

Agriculture (hay, fodder, sugar beet, potatoes, oats and grain) is the principal industry; mining for iron, silver, copper, arsenic and sulphur, and lumbering, are of first importance. Chief industries are paper manufacture, machinery, wood, porcelain, textiles and matches, etc.; principal exports timber (much the largest), paper, minerals and machinery. Transit is greatly facilitated by the numerous canals and by the rivers and lakes. The national religion is Lutheranism. Government is vested in the king, who with the advice of a council controls the executive, and two legislative chambers which have equal powers, but the members of the one are elected for eight years by provincial councils, while those of the other are elected by universal suffrage for four years.

In the 14th Century the country became an appanage of the Danish crown, and continued as such until freedom was again won in the 16th Century by the patriot king, Gustavus Vasa. By the 17th Century Sweden had extended her rule across the seas into certain portions of Germany, but, selling these in the beginning of the 18th Century, fell from her rank as a first-rate power. In 1814 Norway was annexed, the two countries each enjoying complete autonomy, but the union was dissolved in 1905, and Norway became independent. The capital is Stockholm; other large towns are Göteborg and Malmö. Area, 153,400 sq. m. Pop. 6,267,090.

Swedenborg, Emanuel, Swedish religious leader and scientist, founder of the "New Church," born at Stockholm, attended the university of Uppsala and took his degree in philosophy in 1709; visited England, Holland, France, and Germany; on his return, after four years, was appointed by Charles XII. assessor of the Royal College of Mines; in 1721 went to examine the mines and smelting-works of Europe; from 1716 spent 30 years in the composition and publication of scientific works; from about 1734 became interested in the relation of soul and body, and from 1743 began the publication of the numerous theological works in which his special contributions to religious thought are embodied, including *Heaven and Hell*, *The True Christian Religion*, *Divine Love and Wisdom*, etc. He visited England several times in his later years, and died in London of apoplexy. The religious system founded by him is known as Swedenborgianism (q.v.). (1686-1773).

Swedenborgianism, or Church of the New Jerusalem, the Christian religious system founded to propagate and uphold the teachings of Emanuel Swedenborg (q.v.). It holds that man can place himself in direct communion with the world of spirits, that the Trinity in God is not one of Persons but of operations, and that the revelations made to Swedenborg are the key to the understanding of the Scriptures and the Christian revelation in general. It has a following in Great Britain, the U.S.A., and the Scandinavian countries.

Swedish Drill, system of bodily movements, originated by Pehr Henrik Ling (1776-1838) and designed to promote muscular development. It is the basis of most later systems of physical drill, except those used for military training.

Sweepstake, strictly a lottery (q.v.) proceeds of the sale of tickets are divided among the winners; but the name is often applied to any lottery, especially one held in connection with a sporting event, such as a horse race. Sweepstakes, like other lotteries are illegal in Great Britain; but private sweepstakes are not generally interfered with if the sale of tickets is strictly confined to members of the organisation holding the sweepstake. The Calcutta Turf Club holds annually the well-known "Calcutta Sweep" on the result of the Derby; and in Elre sweepstakes in aid of the country's hospitals are held several times a year under the control of the Government on the results of British races.

Sweetbread, the name given to certain glands of calves and other animals when used as food, the pancreas being known as stomach sweetbread, the thymus as breast sweetbread.

Sweetbriar, or *Eglantina*. See Briar.

Sweet Flag (*Acorus*

calamus), a hardy perennial marsh and riverside plant of the order Araceae, with long sword-shaped leaves and fragrant roots, introduced into Europe from Asia about 500 years ago. Its branching rootstock is a popular remedy for ague and children's complaints.

Sweet Pea (*Lathyrus*

odoratus), an annual plant of the order Leguminosae, bearing sweet-scented flowers of a great variety of colours. It is best cultivated in a light rich soil and should be supported by sticks. The plants are improved if the flowers are gathered at frequent intervals.

Sweet Potato (*Ipomoea batatas*), a perennial plant of the order Convolvulaceae, having white and mauve funnel-shaped flowers and a tuberous root; like the ordinary potato, but longer in shape and sweet to taste. It is cultivated in the United States and parts of the East for food.

Sweet William (*Dianthus barbatus*), a hardy perennial plant, related to the pink, of the order Caryophyllaceae; also known as *Jove's Flower*, or *London Pride*. See also *Dianthus*.

Sweyn, Danish ruler and son of Canute the Great. After conquering part of Norway and Sweden, he raided England in 982 and 994, and after becoming king of Denmark again, invaded Britain, receiving the subjugation of the Saxons and causing Ethelred to flee the country. Died at Gai

SWEET FLAG

The plants are gathered at frequent intervals.

Swift, the common name of a family (Cypselidae) of birds outwardly similar to, but with no other affinities with, the swallow. They are of wide distribution. Nearly all species have four very small toes pointing forward, this resulting in their being awkward on the ground and preferring to cling to walls. The Common Swift (*Cypselus apus*) is a summer migrant to the British Isles from Africa, from May to August. Larger than a swallow and remarkable for its great speed in flight, it has black plumage with a white patch under the chin. The birds' nest soup of the Chinese is made from the nests of a related genus found in the countries round the Indian Ocean.

SWIFT

Swift, Jonathan, Irish satirist, born at Dublin, and educated at Kilkenny and Trinity College, coming to England in 1688, where he became amanuensis to Sir William Temple, remaining in his service with intervals until his death in 1699, mastering the craft of politics, and falling in love with Stella (q.v.); shortly afterwards became secretary to Lord Berkeley, one of the Lord-Deputies to Ireland, and settled in the vicarage of Liscador, West Meath. In 1704 appeared his famous satires, the *Battle of the Books* and the *Tale of a Tub*; various squibs and pamphlets followed, *On the Inconvenience of Abolishing Christianity*, etc., but politics more and more engaged his attention. He turned Tory, attacked with deadly effect, during his editorship of the *Examiner* (1710-1711), the war party and its leader Marlborough, crushed Steele's defence in his *Public Spirit of the Whigs*, and after the publication of *The Conduct of the Allies* was easily the foremost political writer of his time. Disappointed of an English Bishopric in 1713, he reluctantly accepted the deanery of St. Patrick's, Dublin, a position he held until the close of his life; eloquently voiced the wrongs of Ireland in a series of tracts, *Drapier's Letters*, etc., and crowned his great reputation by the publication (1726) of his masterpiece, *Gulliver's Travels*, the most daring, savage and amusing satire contained in the world's literature. "Stella's" death and the slow progress of a brain disease, ending in insanity, cast an ever-deepening gloom over his later years. (1667-1745).

Swilly, Lough, a narrow inlet of the Atlantic, on the coast of Donegal, Eire (Ireland), running in a S. direction between Dunaff Head (E.) and Fanad Point (W.), a distance of 25 m.; is from 3 to 4 m. broad.

Swimming, a method of propelling oneself through the water, while keeping the body afloat. In the breast-stroke, the simplest method, the swimmer lies horizontally in the water, arms and legs stretched out. The arms are moved in a semi-circle so that they are on a level with the shoulders, and then brought together, hands under the chin, elbows into the body. At the same time the legs are widened at the knees and the feet drawn up towards the body. Arms and legs are then shot out simultaneously. Swimming on the back is accomplished by a similar action with the legs, with a swing of the arms backwards in a circular motion. Speed-strokes are the over-arm (developed from the side stroke), the trudgeon, and the Australian crawl. In the last of these the face is submerged, the swimmer periodically turning the head sideways to breathe. The arm-action is circular, while the legs perform the scissor stroke, a quick thrusting of the water with the lower part of the legs,

the knees being together. Swimming as a sport is governed by the Amateur Swimming Association (founded 1869, its authority universally recognised by 1889).

Swinburne, Algernon Charles, English London; educated at Balliol College, Oxford; after some time spent in Florence, his first productions were plays, followed by *Poems and Ballads*; his later *A Song of Italy*, an essay on *William Blake*, *Songs Before Sunrise*, *Studies in Song*, *Studies in Prose and Poetry*, etc. His verse is remarkable for its daring metrical experimentation. (1837-1909).

Swindon, a town in Wiltshire, 77 m. W. of London; it centres upon the works and engineering shops of the Great Western Railway, though the town is still a centre for the local agricultural interest. Pop. 60,200.

Swine Fever, an infectious disease peculiar to pigs, the cause being often traced to unclean conditions in the sty. Symptoms are lassitude and loss of appetite, accompanied by coughing and fever. The infection usually settles in the feet. It must be notified to the local authorities, and infected animals destroyed.

Swinton (1) (and Fandisbury), town of Lancashire, England, 4½ m. NW. of Manchester, of which it is a suburb. It has cotton manufactures and engineering works. Pop. 39,000. (2) urban district of W. Riding of Yorkshire, 5 m. NE. of Rotherham. It has manufactures of glass bottles, stoves and mineral waters. Pop. 13,800.

Swiss Guards. See *Gardes Suisses*.

Swithin, St., bishop of Winchester from 852 to 863; was buried by his own request in Winchester Churchyard, "where passers-by might tread above his head, and the dew of heaven fall on his grave." (On his canonization, a century after, the chapter resolved to remove his body to a shrine in the cathedral, but their purpose was hindered on account of a rain which lasted 40 days from July 15; hence the popular notion that if it rained that day it would be followed by rain for 40 days after. Most European countries have a similar "rain saint.")

Switzerland, a republic of Central Europe, bounded by Germany (N.), France (W.), Italy (S.), and Germany (E.); it is semicircular in shape, having the Jura Alps on its French border, and divided from Italy by the great central ranges of the Alpine system, whence radiate the Swiss Alps—Pennine, Lepontine, Bernese, etc.—covering the E. and S., and occupying with intervening valleys two-thirds of the country; the remaining third is occupied by an elevated fertile plain, extending between the Lakes of Constance and Geneva (largest of numerous lakes), and studded with picturesque hills; principal rivers are the Upper Rhone, the Aar, Ticino, and Inn; climate varies with the elevation, from the high regions of perpetual snow to warm valleys where ripen the vine, fig, almond, and olive.

Nearly a quarter of the land surface is under forest, and one-quarter arable; flourishing dairy farms exist, utilising the fine meadows and mountain pastures which, together with the forests, comprise the country's greatest wealth; minerals are exceedingly scarce. The thrift and energy of its people has skillfully harnessed the inexhaustible motive power of innumerable waterfalls and mountain streams to drive great factories of silk, cottons, watches, and jewellery. The beauty of its mountain, lake, and river scenery has long made Switzerland the mecca for recreation ground of Europe. The Alpine barriers are crossed by splendid roads and railways, including the great tunnels through St. Gothard and the Simplon.

In 1848, after the suppression of the Sonderbund and the existing league of 22 semi-independent states (constituting since 1798 the Helvetic Republic) formed a closer federal union, and a constitution (amended in 1874) was drawn up conserving as far as possible the distinctive laws of the cantons and local institutions of their communes. The President is elected annually by the Federal Assembly (which consists of two chambers constituting the legislative power, the upper chosen by the cantons and the lower directly by the people), and is assisted in the executive government by a Federal Council of seven members. By an institution known as the "Referendum" all legislative acts passed in the Cantonal or Federal Assemblies may under certain conditions be referred to the electors, and this is frequently done.

The languages spoken are French (in Fribourg, Vaud, Valais, Neuchâtel and Geneva), Italian (in Ticino), Romansch (in the Grisons) and elsewhere mainly German, all four being officially recognized: Catholics form about 41 per cent. and Protestants 57 per cent. of the population. There are seven universities. The capital is Bern, the other largest towns being Zürich, Basel, and Geneva. Area, 15,945 sq. m. Pop. 4,066,000. The country is permanently neutralized, and contains at Geneva the headquarters of the League of Nations.

Sword, a long-bladed cutting weapon with a hilt. It has taken various forms in different ages and countries; the straight sword has usually two cutting edges, but curved swords such as the sabre and scimitar have their inner edges only sharpened. The tip is generally pointed, but may be square or rounded, as in the Japanese harikari. In the East, and during the Middle Ages in the West, swords were frequently of beautiful workmanship, the blades being engraved or damascened and the hilts inlaid with gems, precious metals, mother-of-pearl, etc. Swords of romance even received names, as King Arthur's *Excalibur* and Roland's *Durandal*.

Sword Bean (*Canavalia ensiformis*), a cultivated leguminous plant yielding edible pods.

Sword Dance, a European folk-dance, surviving to the present day in various forms. In the English form a ring of five or more men linked by their swords perform steps of great intricacy, culminating in the "look."

Swordfish, the common name of the *Xiphiidae* and sub-order *Scombroideae* which includes the mackerels, bonitos, etc. They are distinguished by the long sword-like projection of the upper jaw, and the large dorsal fin. The *Xiphius gladius*, or Broad-bill, is sometimes found off the British coast. It reaches a length of 15 to 20 ft. The sword-like jaw may reach a length of 3 ft., and is used for stabbing prey; it has been credited with inflicting fatal wounds even on whales, and with being able to pierce the boards of a boat.

SWORDFISH

Sybaris, an ancient Greek city of southern Italy, on the Gulf of Tarentum, founded before 700 B.C., but in 510 B.C. captured and totally obliterated by the rival colonists of Crotona. At the height of its prosperity the luxury and dissipation of the inhabitants was such as to become a byword throughout the ancient world, whence arose the use of the name Sybarite to denote a devotee of sensual pleasure.

Sycamore (*Acer pseudoplatanus*), a common but non-native tree

of the order Aceraceae, introduced to Britain from the Continent in the 16th Century. It may attain a height of 100 ft., with a girth of 20 ft. The bark is smooth and ashen-grey, becoming rough and flaky later; leaves large and shining-green but greyish below, with pointed lobes. The flowers are borne in pendulous tassel-like spikes, and the winged fruits resemble those of the common Maple. The white, finely-grained wood is used for making rollers and bobbins.

SYCAMORE

Sydenham, Thomas, English physician, the "English Hippocrates," born in Dorsetshire. Among his contributions to medical practice were the use of cinchona in the treatment of malaria, the recognition of scarlatina as a complaint distinct from measles, the use of tincture of opium, and researches into the nature of gout, various fevers, etc. (1624-1689).

Sydney, the capital of New South Wales, the oldest and largest city in Australia, is situated on one of the most beautiful harbours (Port Jackson, with an area of 9,000 acres, and 75 m. of foreshore) in the world. The harbour bridge, one of the largest engineering schemes of its kind ever undertaken, links up the N. and S. shores. The city contains many very fine buildings, including the university, art gallery, museums, two cathedrals, libraries, and hospitals. It is a very important railway centre, and the extensive and modern plant for dealing with shipping and storing and loading grain in bulk is second to none in the southern hemisphere. A city underground electric railway is in course of construction. It is the chief station of the Australian navy, and manufactures pottery, clothing, motor cars, metalware, tobacco, etc. Pop. 1,267,400.

Sydney, second city of Nova Scotia, Canada, 275 m. N.E. of Halifax; it has steel works, and is a trading port of importance. Pop. 23,100.

Sydney Mines, town of Cape Breton I., Nova Scotia, 3 m. N. of Sydney, across the harbour. Coal and iron mining are carried on. Pop. 8,000.

Syllogism, a logical argument consisting of three propositions, two (major and minor) being called premises, and that which necessarily follows from them the conclusion, as: Every cow has a tail (major premise); a Manx cat has no tail (minor premise); therefore a Manx cat is not a cow (conclusion).

Sylvester, St. the first Pope of that name, under whose tenure of the Papacy Constantine the Great (c. 312) accepted Christianity and made it the religion of the Roman Empire; medieval legend asserted that the Emperor on the occasion of his baptism made over to him and his successors in the Papacy the temporal rule over the city of Rome, when the imperial capital was changed to Byzantium. He held the Papal throne from 314 to 335.

Symbiosis, the state of two organisms, of different species, who live together to their mutual benefit, as in the case of a lichen, which is composed of a fungus and an alga.

Symbolism, the use of some object, colour, shape or form to represent and bring up in the mind some of the first sight unconnected idea. The chief functions of symbolism are in art and religion; early Christianity developed an elaborate symbolism in which the cross, the lamb, the

monogram IHS, and so on, stood for Christ, and with the rise of the worship of saints each saint tended to have his easily recognisable symbol, as the keys of Peter, the X-shaped cross of Andrew, the man, lion, calf and eagle associated with the four evangelists, etc. The crescent moon has likewise become an accepted Mohammedan symbol, the hammer and sickle that of the Communists, the "Shield of David," or two crossed equilateral triangles that of Judaism, and the swastika that of the German Nazis.

Symbolist School, a school of 19th Century French poets, including Baudelaire, Verlaine, and Mallarmé, who sought to interpret psychological ideas by means of symbols relating the physical to the moral sphere. It originated with Alfred de Vigny in a revolt against the Parnassians who, under Gautier, appealed solely to a sense of beauty and regarded our sympathies as irrelevant.

Symbols, in mathematics, chemistry, and other sciences, are used as a kind of shorthand to convey information which could otherwise be expressed only by a lengthy verbal explanation. In chemistry each element is allotted a symbol with a precise significance, the symbol H, for instance, representing one atom of hydrogen. These symbols when combined indicate compounds, thus H_2SO_4 signifies one molecule, or ultimate particle, of sulphuric acid, consisting of two atoms of hydrogen, one atom of sulphur and four atoms of oxygen. Of the common mathematical symbols, + signifies addition, - subtraction, \times multiplication, \div or $\sqrt{\quad}$ square root, $\sqrt[3]{\quad}$ cube root, = is equal to.

Symonds, John Addington, English man of letters, born at Bristol, author of *The Renaissance in Italy*, and several other works on Renaissance history and art, as well as translations from the Greek poets, and a collection of medieval Latin students' songs; his translation of Benvenuto Cellini's autobiography is particularly noteworthy; was consumptive, and spent his later years at Davos, in the Engadine. (1840-1893).

Symons, Arthur, English symbolist poet, born in Wales of Cornish parents. His first volume of verse, *Days and Nights*, appeared in 1889, and was followed by numerous collections of original poems and of translations from French and Italian writers, including Baudelaire, d'Annunzio, etc. He has also written verse plays and several volumes of criticism. (1865-).

Symphonic Poem, a term first used by the musician Liszt (1811-1886) for orchestral works of no set form but interpreting in music the emotions expressed by a poet in verse; it is now used with a wider application to include most descriptive (or programme) music. Liszt was succeeded by many Slavonic composers, who wrote works interpreting the spirit and scenes of their countries, e.g., Sibelius's *Finlandia*.

Symphony, a musical composition developed from the sonata form, but intended for full orchestra, consisting usually of four contrasted and related movements. It first rose into importance with Haydn, and was developed by Mozart (who wrote 41 symphonies), Beethoven, and Schubert, followed by Tchaikovsky and Brahms. The most famous are Mozart's *Jupiter* and *E flat* symphonies, the 3rd, 5th and 8th of Beethoven's nine, Schubert's *Unfinished Symphony*, and Tchaikovsky's *Patriotic*.

Symposium, or banquet; literally a convivial gathering or drinking together following a dinner, at which intellectual conversation was exchanged or

other entertainment given; and, derivatively, a collection of opinions or articles by different writers on various aspects of some question. The class of composition to which the classic symposium belongs became popular in Greece at an early period. The name became famous as the title of one of the best-known dialogues of Plato.

Synagogue, a Jewish place of worship and prayer. The synagogue probably first arose during the Babylonian captivity, when the Jewish people were cut off from the Temple and naturally met together on the Sabbath, festivals, and other solemn occasions for public worship. It soon grew into a place of study as well, and by the time of Jesus, in spite of the restoration of the Temple worship, local synagogues were firmly established not only in Palestine, but in Rome, Alexandria, Antioch, and wherever Jews were to be found. The chief features of the synagogue are the Ark, or receptacle for the scrolls of the Law; the almemor, or pulpit and reading-desk, and (except in some modern "reformed" synagogues) the gallery for women, who are strictly separated from the male worshippers.

Syncopation, a musical term denoting an alteration of accent by prolonging a sound from a weak place in the bar to a stronger one. The practice, popular in America, was introduced into England about the time of the World War, when it became the basis of subsequent dance music.

Syncope, a temporary stoppage of blood circulation and of respiration, including faintness or possibly unconsciousness and collapse consequent upon the failure of the blood supply to the brain. It may be caused by low blood-pressure, emotional disturbance, or some form of heart disease.

Syncretism, name given to an attempted blending of different, more or less antagonistic, speculative or religious systems into one, such as Catholic and Protestant or Lutheran and Reformed. The name arose from the practice attributed to the ancient Cretans of fighting bitterly among themselves, but willingly combining when necessary against a common enemy.

Syndic, a name applied in Italian cities to an official roughly corresponding to the English mayor. It is also used at Cambridge University for officers appointed from time to time for specific duties, such as the management of the University Press.

Syndicalism, a proposed system of the basis of a federation of trade unions which should take the place of the national State, and eventually itself federate with those of other countries in an international economic ruling body. It was popular in France, particularly before the World War, as an alternative to State socialism, and for a time between 1912 and 1914 played a part in British political philosophy. It is largely based on the theories of Georges Sorel. It advocated direct industrial action by workers to secure governing power in their industries; after a short period of favour in certain Labour circles in England, it tended to be replaced as an ideal by Guild Socialism (q.v.).

Syndicate, in commercial parlance is a name given to a number of capitalists associated together for the purpose of carrying through some important scheme usually having in view the control and raising of prices by means of a "corner."

Synge, John Millington, Irish playwright, born at Rostafarnham, co. Dublin. After studying music in Germany, he lived for some time in Paris and Italy, but induced by W. B. Yeats (q.v.) to return to Ireland, he

produced in 1907 *The Aran Islands*. His plays include *The Playboy of the Western World*, *Deirdre of the Sorrows*, and *The Tinker's Wedding*. (1871-1909).

Synod, name given to any assembly of bishops and clergy in council, and used particularly in the Presbyterian Church of a district or a general assembly.

Synonym, a word whose meaning is identical, or almost so, with that of another word, as "little" and "small," or "sulphur" and "brimstone." The fact that English is a combination of two distinct strains of language, the Teutonic and the Latin, has caused it to be singularly rich in synonyms, and this may well be one of the causes of its high standing as a language for poetry.

Synoptic Gospels, the first three, so called because, as distinct from the fourth, they appear to relate the story of Christ's life from a common standpoint, and to a certain extent to be derived from common sources.

Synovial Fluid, a fluid secreted by the synovial membrane, or lining of the joints and articulations of the higher animals, whose office it is to keep the joints lubricated. The membrane is subject to inflammation, with excessive secretion of the fluid, known as synovitis.

Syphilis, an infectious, contagious and heritable disease generally communicated by sexual intercourse with a person already infected, caused by a micro-organism known as the *Spirochæta pallida*, which enters the mucous membranes or abraded skin surfaces. It may be transmitted by kissing. Its stages are, firstly, the appearance, within three weeks of infection, of a chancre on the genital regions; secondly, ulceration of the mucous membranes, sore throat, enlargement of the lymphatic glands, etc.; thirdly—often after some years—a degenerative tissue formation known as the gumma. The final stage is familiar under the name general paralysis of the insane. In recent years much attention has been devoted to its treatment, the first real advance being made in 1910 by Ehrlich's discovery of salvarsan, followed, 10 years later, by the introduction of bismuth preparations, malarial inoculation, and other methods. Medical attention on the suspected appearance of the first signs is of the highest importance.

Syra (*Syros*), an island of the Cyclades group, in the Egean Sea, 10 m. long by 5 m. broad, with a capital of the same name, called also Hermoupolis, on the E. coast. Area, 52 sq. m. Pop. 30,000.

Syracuse, (1) one of the great cities of antiquity, occupied a wide triangular tableland on the S.E. coast of Sicily, 80 m. S.W. of Messina, and also the small island Ortygia, lying close to the shore; founded by Corinthian settlers about 733 B.C.; amongst its rulers were the tyrants Dionysius the Elder and Dionysius the Younger (q.v.), and Hiero, the patron of Æschylus, Pindar, etc.; successfully resisted the long siege of the Athenians in 414 B.C., and rose to a great pitch of renown after its struggle with the Carthaginians in 297 B.C., but, siding with Hannibal in the Punic Wars, was taken after a two years' siege by the Romans (212 B.C.), in whose hands it slowly declined, and finally was sacked and destroyed by the Saracens in A.D. 878. Only the portion on Ortygia was rebuilt, and this was the modern city, which has relics of its former greatness, and is walled and fortified.

exports fruit, olive-oil, and wine. Pop. 53,000. (2) A city of New York State, U.S.A., 145 m. W. of Albany, in the beautiful valley of Onondaga; it is the seat of a university, and has steel-works, foundries, rolling-mills, etc. Pop. 269,000.

Syr Daria, or *Sartas*, a river of SW. Asiatic Russia. It rises in the Tian-shan Mts., near the Chinese frontier, and flows N.W. for 1,500 m., mainly through the Kazak Autonomous Republic, to empty in the Sea of Aral.

Syria, a former division of Asiatic Turkey, since the World War mandated to France; area, 58,000 sq. m. It comprises a long strip of mountains and tableland intersected by fertile valleys, lying along the E. end of the Mediterranean from the Taurus range in the N. to the Egyptian border on the S., and extending inland (N.E. and E.) to the Euphrates and Arabian desert; to the S. lie Palestine and Transjordan, to the E. Iraq, and to the N. Turkey.

It is divided into the Republic of Lebanon, capital Beirut, pop. 863,000; the Government of Latakia, capital of the same name, pop. 287,000; the territory of Jebel Druze, capital Es-Suweideh, pop. 52,000; the Sanjak of Alexandretta (now called Hatay), and the Republic of Syria, cap. Damascus, pop. 1,697,000. By a treaty between France and Syria signed in 1936 the Syrian state will shortly become independent in perpetual alliance with France; the Sanjak of Hatay becoming an autonomous unit within a Syro-Lebanese federation, subject to arrangements made with Turkey in 1937 and 1938, which secure certain Turkish rights.

The language generally spoken is Arabic; most of the people are Mohammedans. The main occupation is agriculture, wheat, barley, sesame, tobacco, fruits, etc., being grown; there is little mining or manufacturing. Once a portion of the Assyrian empire, it became a possession successively of the Persians, Greeks, Romans, Arabs, and Egyptians, and fell into the hands of the Ottoman Turks in 1516, under whose rule it remained till 1918.

Syringa, or Mock Orange,

a genus (*Philadelphus*) of flowering shrubs, of the order Saxifragaceæ. They bear large white or yellowish-white blossoms, in most species sweet-scented, though there are odourless species. The ordinary garden variety is *Philadelphus coronarius*. Botanically *Syringa* is the name of the genus of plants of the order Oleaceæ, commonly known as Lilac (q.v.).

SYRINGA

Syringe, a hydraulic (*P. coronarius*) expelling liquids in the form of a jet. It consists of a glass or metal cylinder, fitted with an airtight piston, one end of the cylinder having a nozzle through which, by drawing back the piston, the liquid is forced into the cylinder, and expelled again by pressure on the piston.

Sze-Chuan, one of the largest provinces of China, lies in the W. between Tibet (NW.) and Yunnan (SW.); a hilly country, rich in coal, iron, etc., and traversed by the Yangtze-kiang and large tributaries; the capital is Chingtu; opium, silk, tobacco, white wax, being chief exports. Area, 166,500 sq. m. Pop. 53,000,000.

Szeged, a city of Hungary, situated at the confluence of the Maros and Theiss, 118 m. SE. of Budapest, to which it ranks next in importance as a commercial and manufacturing centre; it has a large river shipping trade, and produces leather, cloth, beer, etc. Pop. 139,100.

Szigeti, Josef, Hungarian violinist, born at Budapest; a pupil of Huby. Played in Berlin, Dresden, and London, 1855-1906. Toured and lived in England, 1885-1913. Since 1917, Professor of Music at the Geneva Conservatoire; appeared as the "Prom" concerto, 1937. (1892-1971)

T

Taal, *Afrikaans* or *Cape Dutch*, a form of the Dutch language, spoken in the Union of South Africa; belongs to the Low German group of the Germanic languages. It shows supreme simplification of inflexion, and has adopted a number of English and native words. It is one of the official languages of the Union of South Africa.

Tabard, a sleeveless tunic, embroidered by heralds and kings-of-arms as their official insignia. It was originally worn by knights and nobles over their armour, when without their shields, to indicate their identity. The name is also applied to a similar cloak worn by trumpeters and drummers in the British Household Cavalry as a part of full dress uniform.

Tabard Inn, a famous inn in South-west London, the starting place of the pilgrims in Chaucer's *Canterbury Tales*. In 1666 the inn was rebuilt after the Fire, and was renamed the Talbot Inn, under which name it continued till demolished in 1873.

Tabernacle, a movable structure of the nature of a temple, erected by the Israelites during their wanderings in the wilderness. It was a parallelogram in shape, constructed of boards lined with curtains, the roof flat and of skins, while the floor was the naked earth. It included a sanctuary and a sanctuary of holiness, and contained altars for sacrifice and symbols of sacred import, especially of the Divine presence, and was accessible only to the priests. The name is given nowadays, especially in Wales, to the chapels and meeting-places of certain Nonconformist religious bodies.

Tabes, name used for two wasting diseases, *tabes mesenterica*, a disease of childhood also known as abdominal tuberculosis, and *tabes dorsalis*, or locomotor ataxy, a disease of the nervous system which is one of the later stages of syphilis.

Table Mountain, a flat-topped eminence in the SW. of Cape Province, South Africa, rising to a height of 3,560 ft. behind Cape Town and overlooking it.

Taboo, or *Tabu*, a prohibition of some act or the use of some article or form of speech, either generally or by certain persons only, the violation of a taboo being supposed to entail supernatural punishment or retribution. The system was at its height among the Polynesian and African peoples, and is held by some to have been one of the practices at the root of the development of religion. The word has been adopted to cover any apparently non-rational prohibition of a kindred nature in more highly civilized societies.

Tabor (*tambourin*), a very small drum, hung from the left arm and tapped with a stick, frequently played with the pipe in medieval times.

Tabor, Mount, an isolated cone-shaped hill, 1,800 ft. in height, and clothed with olive-trees, on the N.W. borders of Esdrathon, 7 m. E. of Nazareth. A tradition of the 2nd Century identifies it as the scene of the Transfiguration, and ruins of a church, built by the Crusaders to commemorate the event, crown the summit.

Tabriz, an ancient and important commercial city of Azerbaijan, Iran, 320 m. SE. of Tiflis, 4,500 ft. above sea-level; occupies an elevated site on the Aji, 40 m. E. of its entrance into Lake Urmiah; carries on a flourishing transit trade in carpets, dried fruits, cotton, hides, etc.; has the ruins of the famous "Blue Mosque"; earthquakes have left ruins of many other buildings in the vicinity. Pop. 219,000.

Tacca, a genus of plants with creeping tuberous roots and large divided leaves on long stalks, and bearing flowers in umbels and a berry fruit. The root of *T. pinnatifida* found in Malaya and Polynesia is made into arrowroot by the natives.

Tachometer. See *Speed Indicator*.

Tachylite, a black, brittle basaltic pitchstone found in neighbourhoods which have been exposed to volcanic action.

Tacitus, *Marcus Claudius*, Roman emperor, a descendant of Tacitus the historian, born at Interamna (Terni). He succeeded Aurelian in 275, after having served as consul twice. He was murdered by the troops after holding the throne for a little over six months. (206-276).

Tacitus, *Publius Cornelius*, Roman historian, born presumably in Rome, of equestrian rank, early famous as an orator; married a daughter of Agricola, held office under the Emperors Vespasian, Domitian, and Nerva, and with the younger Pliny conducted the prosecution of *Marius Priscus*. He is best known and most celebrated as a historian, and of writings extant the chief are his *Life of Agricola*, *Germania*, *Histories*, and *Annals*. His *Agricola* is admired as a model biography, while his *Histories* and *Annals* are now extant only in part. (c. 54-120).

Tacking, a term used in the law relating to mortgages. By the doctrine of tacking, any mortgage has priority over other puisne mortgages (i.e., any mortgage after a legal mortgage), even though posterior in date, if tacked to the legal mortgage; but it is essential, for the doctrine to be applicable, that the later advance or loan was made without notice of the earlier or intermediate puisne mortgage or mortgages.

Tacna, capital of a province of same name in Peru, 38 m. N. of Arica, with which it is connected by rail; trades in wool and minerals. It was ceded to Chile in 1883, with Arica, for 10 years, after a war in 1879, but at the end of the period Chile did not restore it, and a long dispute ensued ending only in 1929 with the return of Tacna to Peru, Chile continuing to hold Arica, but paying an indemnity therefor. Area (prov.), 4,930 sq. m. Pop. (prov.) 60,000; (town) c. 17,000.

Tacoma, a flourishing manufacturing town and port of Washington, U.S.A., on Puget Sound; is the outlet for the produce of a rich agricultural and mining district. Exports lumber, fish, and flour, and smelts copper and lead. Pop. 106,800.

Tacsonia, a genus of showy climbing Passion Flower of the order *Passifloraceae* native to tropical America and the W. Indies. There are 25 recognized species, some of which are cultivated in England in sheltered places.

Tactics, the method of carrying on a military or naval campaign in accordance with a given strategical plan

(see Strategy). Modern tactics are based on the mobility of mechanized units, and on the fact that tanks, armoured cars, etc., are able to carry out controlled manoeuvres. Though tactical methods change with the introduction of new weapons, certain general principles remain. Line formation and development of gun fire are important, while the success of tactical manoeuvres depends on the strength of the attacking force, its power of gaining fire superiority, of taking instant advantage of success, and of progressing rapidly from one success to another.

Tadmor. See Palmyra.

Tadpole, the stage in the life of a frog, toad, or other amphibian between the egg and adult conditions; the tadpole is purely aquatic,

breathes by gills, and has a fish-like tail. In the case of the frog and toad tadpoles the tail is absorbed into the body and the gills give place to air-breathing apparatus as the adult stage is reached, but some amphibian tadpoles (e.g., the newt and salamander) retain the tail in maturity, whilst the axolotl (q.v.) or tadpole stage of the amblystoma can live and reproduce itself without ever completing its metamorphosis.

TADPOLE

Tadzhikistan, an autonomous republic of Soviet Central Asia, between Uzbekistan, the Kirghiz Republic, Chinese Turkestan and Afghanistan. The capital is Stalinabad (Dushanbe). Agriculture, cattle breeding, and cotton growing and milling are the chief industries. The valuable mineral deposits are so far little worked. Area, 55,000 sq. m. Pop. 1,333,000.

Tael, a Chinese weight of silver, formerly used as money of account; its weight varied widely in different parts of the country. In 1933 it was superseded as an exchange unit by the silver dollar, equivalent to 0.715 tael (roughly 3s.) of the former Imperial standard of 1908. As an ordinary measure of weight it is equivalent to 1½ oz.

Taff, river of S. Wales, rising in Brecknock Beacons and flowing through the coal and iron country of Glamorganshire to the Bristol Channel at Cardiff. Its length is about 40 m.

Taffeta or **Taffety**, a kind of silk fabric popular in the 16th Century, when it was manufactured in many parts of England. Nowadays the name is taken to mean a mixture of silk and wool.

Taff Vale Judgment, the outcome of an important legal dispute in 1901 between the Taff Vale Railway Co., S. Wales, and its employees after a strike. It was held by the House of Lords that trade union funds were liable for acts committed by individual members of the union, a decision that led in 1906 to the Trade Disputes Act, which reversed the ruling of the House of Lords.

Taft, William Howard, American statesman. He was governor of the Philippine Is. from 1901 to 1904, War Secretary in that year, and in 1908 succeeded Theodore Roosevelt as President of the United States. He stood for re-election in 1912, but was defeated. In 1921 he became Chief Justice of the United States. (1857-1930).

Taganrog, a Russian seaport on the Sea of Azov, an important industrial centre, and an outlet for the products of local agriculture and fisheries. Pop. 150,000.

Tagliamento, a river in Venetia, N. Italy, rising in the Alps and flowing into the Gulf of Venice, 100 m. in length. It was the scene of fighting in the World War, when Italian troops retreating from Caporetto made a stand in November, 1917, before retreating to the Piave.

Tagore, Rabindranath, Indian poet, born in Bengal. In 1913 he won the Nobel Prize for Literature, and in the same year his play *The Post Office* was given a London production. Among his volumes of verse are *Gitanjali* and *The Crescent Moon*; he has also written novels and other plays. In 1915 he received a knighthood, but after 1919 ceased to use his title as a protest against British ruling methods in India. In 1901 he founded at Bolpur the famous school Santiniketan, which has become an institute with the status almost of an international university. (1861-).

RABINDRANATH TAGORE

Tagus, the largest river of the Spanish peninsula, issues from the watershed between the provinces of Guadalejara and Tercel; follows a more or less westerly course across the centre of the peninsula, and, after dividing into two portions, below Salvaterra, its united waters enter the Atlantic by an estuary 20 m. long; total length 666 m., of which 190 are in Portugal; navigable as far as Abrantes.

Tahiti, the principal island of a group in the S. Pacific, called the Society Is., situated 2,000 m. N.E. of New Zealand; are mountainous, of volcanic origin, beautifully wooded, and girt by coral reefs; a fertile soil grows abundant fruit, cotton, sugar, etc., which, with mother-of-pearl, copra, and phosphates, are the principal exports; capital and chief harbour is Papeete (pop. 7,000). The whole group since 1880 has been a French possession. Area, 600 sq. m. Pop. 19,000.

Tailor Bird (*Sutoria*), a genus of birds of the family Sylviidae (Warblers), native to India, notable for the peculiar nest of leaves sewn together with thread to prevent their slipping.

Taine, Hippolyte Adolphe, French critic, and historian, born at Vionzier, in Ardennes; after some years of scholastic drudgery in the provinces returned to Paris, and there, by the originality of his critical method and brilliancy of style, soon took rank among the foremost French writers. In 1854 the Academy crowned his essay on *Levi*; 10 years later he became professor of Aesthetics at the Ecole des Beaux-Arts in Paris, and in 1878 he was admitted to the French Academy. His voluminous writings embrace works on the philosophy of art, essays critical and historical, volumes of travel-impressions in various parts of Europe; but his finest work is contained in his vivid and masterly studies on *Les Origines de la France Contemporaine* and in his *History of English Literature* (1833-1834; Eng. trans. by van Laun), the most penetrating and sympathetic survey of English literature yet done by a foreigner. He was a disciple of Sainte-Beuve. (1828-1893).

Tai-Pings, a name bestowed upon the Chinese who, coming under the influence of Christian teaching, sought to subvert the religion and ruling dynasty of China. He himself was styled "Heavenly King," his reign "Kingdom of Heaven," and his dynasty "Tai-Ping" (Grand Peace). Between 1851 and 1855 the rising assumed formidable dimensions, Nanking being taken

in 1853, but from 1855 began to decline. The religious enthusiasm died away; foreign auxiliaries were called in, and under the leadership of Gordon (q.v.) the rebellion was stamped out by 1865.

Tait, Archibald Campbell, British ecclesiastic, born at Edinburgh, of Presbyterian ancestry; educated at Edinburgh, Glasgow, and Oxford; when at Oxford led the opposition to the Tractarian Movement; in 1842 succeeded Arnold as headmaster at Rugby; in 1850 became Dean of Carlisle; in 1856 Bishop of London; and in 1868, Archbishop of Canterbury. (1811-1882).

Taiwan. See *Formosa*.

Taj Mahal. See *Agra*.

Takoradi, port and wireless station of the Gold Coast, Africa, the only shelter between Sierra Leone and Nigeria for vessels drawing over 30 ft. It was opened in 1928.

Taku, port of Tientsin, in Chih-li province, N. China, by the mouth of the Peiho, captured by the British and French fleets in 1858 and again by allied forces in the Boxer rising of 1900.

Talavera de la Reina, a picturesque old Spanish town on the Tagus, situated amid vineyards, 75 m. S.E. of Madrid; scene of a great victory under Sir Arthur Wellesley over a French army commanded by Joseph Bonaparte and Marshals Jourdan and Victor, July 28, 1809. Pop. 13,500.

Talbot, William Henry Fox, one of the earliest experimenters in photography (called after him Talbotype), born in Chippenharn, which he represented in Parliament; was also one of the first to decipher the Assyrian cuneiform inscriptions. (1800-1877).

Talc, a soft, lustrous, silvery mineral consisting mainly of silica and magnesia found in foliated and granular masses. As "French chalk" it is used for marking, and also has applications in concrete, tile and paint manufacture and as an insecticide.

Talent, a weight, coin or sum of money value among different nations and at different periods. The Attic talent of 60 minas was roughly equivalent to 683 troy ounces, or in monetary value to £243 15s. among the Romans; the great talent was worth £99, and the little worth £75. The Hebrew talent of 3,000 shekels was slightly under 94 lb.

Taliesin, literally the "Radiant Brow," a Welsh bard of the 6th Century, son of Saint Henwg of Caerleon-upon-Usk. His name, regarded by his countrymen with the reverence due to the "Prince of Song," is known to the Saxons, chiefly through the brief and spirited invocation of Gray.

Talisman, a magical figure carved on a stone or a piece of metal, and carried or worn on the person to avert evil, protect from danger, safeguard health, and so on.

Talith, or *Talle*, a garment of shawl form worn by Jewish male worshippers at the synagogue service and at private devotions; it is generally a large square of white linen, fringed and tasseled, with blue stripes.

Talking Films, the development of which introduced talking, music, noises, etc., synchronized with the action in the film; the general exhibition of such films commenced in London in 1928. The original phonofilm system was invented by Lee de Forest, the inventor of the triode wireless valve. Several alternative systems of sound reproduction are in use, but generally the sound track is

carried along the edge of the picture film on a photographic record, which is transformed by means of a photo-electric cell into an electric current, and reproduced acoustically by means of a loud-speaker.

Talleyrand de Périgord,

Charles Maurice, Duke of Benevento, French statesman and diplomatist, born in Paris;

TALLEYRAND

rendered lame by an accident, he was educated for the Church, and made bishop of Autun; chosen deputy of the clergy of his diocese to the States-General in 1789, threw himself with zeal into the popular side, officiated in his pontifical robes at the feast of the Federation in the Champ de Mars, and was the first to take the oath on that side, but on being excommunicated by the Pope, resigned his bishopric, and embarked on a statesman's career; sent on a mission to England in 1792, remained two years an *émigré*, and had to depart thence to the United States, where he employed himself in commercial transactions; recalled in 1795, was appointed Minister of Foreign Affairs; supported Bonaparte in his ambitious schemes, and on the latter becoming Emperor, was made Grand Chamberlain and Duke of Benevento, while he retained the portfolio of Foreign Affairs, shortly after withdrawing from the Ministry; he attached himself to the Bourbons on their return, and, becoming Foreign Minister to Louis XVIII., was made a peer, and sent as ambassador to the Congress of Vienna; went into opposition till the fall of Charles X., and attached himself to Louis Philippe in 1830, retiring from active life four years later. (1754-1838).

Tallinn (formerly *Reval*), capital of Estonia, a flourishing seaport on the S. side of the Gulf of Finland, 232 m. W. of Leningrad; has a castle, fortifications, cathedral, medieval antiquities, etc.; is the seat of a technical university; chiefly engaged in commerce; exports largely oats and other cereals, spirits, cement, timber, etc. Pop. 146,500.

Tallow, the product obtained from fat under steam pressure in iron cylinders. In its pure state it is a stiff white grease, but the commercial product is light yellow and sometimes rancid. It contains glycerol esters of stearic, palmitic and oleic acids. Formerly in great demand for making candles, it is now used for dressing leather, soap-making, and as a lubricant.

Tallow Tree, a tree (*Sapium sebiferum*) of the order Euphorbiaceae, the seeds of which are covered with a waxy substance used in China, to which it is native, for making candles. A similar tree (*Valeria indica*) of S. India, and the *Pentadesma butyracea* of Sierra Leone, are known by the same name.

Tally, a notched stick used in commercial and Exchequer transactions, originating in times when writing was not generally known. The marks, of varying breadth, indicated sums paid; the stick was split longitudinally, and one half retained by the seller and one by the buyer as a receipt. As a means of receipt for sums paid into the British exchequer, the tally was in common use until 1782, and was not entirely abolished till 1830. The burning of the old Houses of Parliament in 1834 was due to the destruction of accumulations of old tally-sticks.

Tally System, a mode of credit-merchant provides a customer with goods, and

receives in return weekly or monthly payments to account. Except in the ready-made clothing industry, it has been generally superseded by the hire-purchase system (q.v.).

Talmud, the standard collection of texts religious law, as developed from the Pentateuch (q.v.). It consists of two parts, the Mishnah and Gemara, the former being a commentary on the matters dealt with in the Mosaic legislation, the latter a commentary on the Mishnah itself. Two versions exist, the Palestinian, compiled about the end of the 4th Century, and the Babylonian, about two centuries later. The portions dealing with law proper are called Halakha, those consisting of illustrative anecdote, history and legend are the Hagadah. In orthodox Jewry the authority of the Talmud is held second only to that of the Old Testament. It has been attacked by Christians at times—quite unfairly—as anti-Christian.

Talus, in Greek legend, a man of brass, the work of Hephaestus, given to Minos to guard the island of Crete. He walked round the island thrice a day, and if he saw any stranger approaching he made himself red-hot and embraced him.

Tamarind, a leguminous tree (*Tamarindus indica*) bearing seed-vessels, the pods of which contain an acid pulp used in medicine for its laxative qualities, and in India in the preparation of a cooling drink. It is grown in most tropical countries, and is also cultivated for the sake of its hard wood, used for cabinet making.

Tamarisk, a small shrub of the order Tamaricaceae, with stiff straight branches, small leaves which give a feathery appearance to the tree, and spikes of rose-coloured flowers blooming in July. The bark is highly astringent. The Common Tamarisk (*Tamarix Gallica*) is found in abundance on the shores of the Mediterranean, and is common in places on the S. and E. coasts of England, and in Cornwall, where it forms a wind-break and serves to bind sand-dunes.

COMMON
TAMARISK

Tambourine, a musical instrument consisting of a wooden hoop with skin or parchment stretched over one side and pairs of cymbals, called jingles, placed in slits round the circumference. It is played by shaking or striking with the knuckles or elbow.

Tambov, a town of European Russia, in the Central Black Soil Area, 308 m. SE. of Moscow. It is a market for grain, horses and cattle. Pop. 102,000.

Tamerlane, or *Tamer*, great Asiatic conqueror, born at Kesh, near Samarkand; the son of a Mongol chief, raised himself by military conquest to the throne of Samarkand (1369), and having firmly established his rule over Turkestan, inspired by lust of conquest began the wonderful series of military invasions which enabled him to build up an empire that at the time of his death extended from the Ganges to the Grecian Archipelago; died whilst leading an expedition against China; was a typical Asiatic despot, merciless in the conduct of war, but in peace-time a patron of science and art, and solicitous for his subjects' welfare. (1336-1405).

Tamil, a Dravidian language spoken in the S. of India and by many of the Indians in Ceylon. It has an extensive literature, and is closely allied to Kanarese, Malayalam and Telugu. The number of speakers of the language in India is some

21,000,000, out of the 72,000,000 who form the whole Dravidian-speaking group.

Tammany Society, or Tammany Hall (so-called from their meeting-place), a powerful political organization of New York City, whose ostensible objects, on its formation in 1805, were charity and reform of the franchise. Its growth was rapid, and from the first it exercised, under a central committee and chairman, known as the "Boss," remarkable political influence on the Democratic side. After the gigantic frauds practised in 1870-1871 on the municipal revenues by the then "Boss," William M. Tweed, and his "ring," the society remained under public suspicion as "a party machine" not too scrupulous about its ways and means, but it regained most of its power under "Boss" Croker, who succeeded in 1886. In recent years its influence has tended to wane before that of other Democratic organisations; a fresh attack was made upon it in 1938, one of its district leaders, J. J. Hines, being charged with bribery and the conduct of lotteries. The name is derived from a celebrated Indian chief who lived in Penn's day, and who has become the centre of a cycle of legendary tales.

Tammuz, a Babylonian deity, mentioned in the Old Testament book of Ezekiel, and generally identified with the Greek Adonis (q.v.), the memory of whose fate was annually celebrated with expressions, first of mourning and then of joy, all over Asia Minor. The tenth month of the Jewish calendar still bears his name. He appears to have been a symbol of the sun, departing in winter and returning as youthful as ever in spring.

Tampa, city, port of entry and popular seaside resort of Florida, U.S.A., the greatest centre for the production of Havana cigars in the U.S.A. It also ships almost phosphate, and is a distributing centre for oil and petrol. The Gandy Tampa Bay bridge, which is partly a viaduct, is 6 m. long. Pop. 101,000.

Tampere, formerly Tammerfors, the chief industrial city of Finland, situated on a rapid stream, which provides power for its textile factories, saw mills, and metal works, 50 m. NW. of Tavastehus. Pop. 61,000.

Tampico, a port of Mexico, on the Panuco, 9 m. from its entrance into the Gulf of Mexico, and almost entirely surrounded by water. Oil, chicole, fruits, asphalt, etc., are exported. Pop. 70,000.

Tamworth, town on the Stafford and Warwickshire border, England, 7 m. SE. of Lichfield. The capital of the old Mercian kingdom, it was destroyed by the Danes in 911. There are coal mines in the neighbourhood, and fireclay is made. Pop. 17,000.

Tana (Tana, or Dembeni), lake in Abyssinia, 1,100 sq. m. in area, and at an altitude of 5,700 ft. above sea-level: is the source of the Blue Nile; a convention as to the use of its waters was one of the points embodied in the Anglo-Italian agreement of 1938.

Tanager (Tanagridae), a family of birds found only in America, of brilliant plumage, living chiefly in forest regions.

There are several genera, and some 350 species are recognized, the commonest being the violet, the Mexican crimson-headed, the white-capped, a summer migrant to the Argentine, and the scarlet (*Piranga erythromelas*), or fire-bird, a song-bird with bright scarlet body and black

TANAGER

tail and wings in the male, and olive-green back with greenish-yellow breast in the female.

Tancred, leader in the First Crusade, and the hero of Tasso's poem, *Gervais de la Liberte*. He fought at Nicosa, Jerusalem, and Ascalon, and was made Prince of Ibelicia by Godfrey of Bouillon. He died at Antioch of a wound received in battle. (1078-1112).

Tang, a dynasty of Chinese monarchs between 618 and 907 A.D., under whom the Chinese rule was extended into Korea, Tibet and Turkestan; it was the golden age of Chinese poetry, and probably saw the introduction of printing and of the use of paper money into the country. The greatest emperor of the house was Tai Tsung (627-650).

Tanganyika, a lake of East Central Africa, stretching between the Belgian Congo (W.) and Tanganyika Territory (E.); discovered by Speke and Burton in 1858; more carefully explored by Livingstone and Stanley in 1871; the overflow is carried off by the Lukuga into the Upper Congo; is girt round by lofty mountains. Its length is 420 m., breadth from 15 to 45 m.

Tanganyika Territory, that portion of the former Colony of German East Africa which, under the Treaty of Versailles, 1919, was mandated to Great Britain—the remaining portions, namely, the districts of Ruanda and Urundi in the NW., and the Kionza area, S. of the Rovuma R., being similarly mandated to Belgium and Portugal respectively. The British mandated territory extends from the Umba R. on the N. to the Rovuma R. on the S., with a coastline of about 500 m.; the N. boundary runs NW. to Lake Victoria, and the W. boundary follows the Kagera R. and along the eastern boundary of Urundi to Lake Tanganyika. The total area is 374,100 sq. m. which includes 20,000 sq. m. of water.

Along the coast lies a plain, varying from 10 to 40 m. in width, behind which the country rises gradually to a plateau constituting the greater part of the hinterland. This plateau falls sharply from a general level of 4,000 ft. to the level of the lakes (Tanganyika, 2,590 ft.; Nyasa, 1,606 ft.), which mark the Great Rift valley extending northwards to Lake Naivasha. The seat of government is Dar-es-Salaam. The most important inland town is Tabora at the junction of the main caravan routes; other towns are Tanga, Bagamoyo, Lindi, Moshi, Bukoba, and Ujiji. The highest point is the extinct volcano Kilimanjaro (19,600 ft.); Mount Meru is 14,960 ft. In the SW. are the Livingstone Mts. (9,000 ft.). Portions of the great lakes of Central Africa are included in the territory.

There are good forest resources, cedar and various hardwoods, ebony and gum copal, bamboo and baobab being plentiful. Gold (Lupa, Geldfield), tin, wolfram, diamonds, salt, mica and phosphates have been mined for export. The government is administered by a British governor, assisted by an Executive and a Legislative Council, the latter having 10 non-official members in addition to 13 official. The British explorer Burton first entered the territory in 1858, and was soon followed by Speke, Livingstone and Stanley. In 1916, General Smuts attacked and defeated the German forces at the foot of Mt. Kilimanjaro and occupied Moshi; in 1917 the Germans were driven across the Rovuma R. into Portuguese East Africa, and the country was in effective British occupation. Pop. 2,565,000 (Europeans 2,300, Asiatics 32,000).

Tangent, in geometry, a straight line touching a circle or the curve of an arc, at a point, but does not cut it.

Tangerine, a small flattened, leop-grown at Tangier; its botanical name is *Citrus nobilis Tangeriana*.

Tangier, a seaport of Morocco, on a small bay of the Straits of Gibraltar; occupies a picturesque site on two hills, but within its old walls presents a dirty and crowded appearance; has a considerable shipping trade; was a British possession from 1662 to 1693, but was abandoned, and subsequently became infested by pirates. It is the capital of the Tangier Zone, since 1912 internationalised, and governed by an international assembly of 27 members through an administrator. Area, 225 sq. m. Pop. 60,000 (including about 17,000 Europeans).

Tangle, name given to various large species of seaweed, of the genus *Laminaria*, especially *Laminaria digitata* and *Laminaria saccharina*; also called tangle-wrack and hanger; they are found off the British coasts. They have long thick solid stems and fronds up to 6 or 8 ft. in length.

Tango, a modern ballroom dance of slow in manner, introduced into Europe from South America (Argentine), and originating in the traditional dances of Moorish Spain.

Tanistry, a method of tenure which prevailed among the Gaelic Celts. According to this custom succession, whether to office or land, was determined by the family as a whole, who on the death of one holder elected another from its number. The practice was designed probably to prevent family estates falling into the hands of an incompetent or worthless heir. The next heir to an estate or chieftainship, under this system, was known as the Tanist, a name which has been adopted in the 1937 constitution of Eire for the Deputy Prime Minister.

Tank, a mechanically-propelled military armoured car, first used during the

World War, capable of negotiating uneven country, and knocking down such natural obstacles as trees. Britain was the first to invent tanks, and put them into action in September, 1916, on the Somme to end the deadlock of trench warfare. They were conspicuously successful at the surprise attack at Cambrai in 1917. The original tanks were heavy machines, but later light tanks were invented. The British Tank Corps, formed in March, 1916, now comprises seven battalions, each containing three "mixed" companies and a section of close-support tanks (a "mixed" company comprises a section of five medium and a section of seven light tanks). Modern strategy favours the operation of medium and light tanks in conjunction. Water was once the only sure defence against tank attack, but the amphibious light tank can cross rivers at a speed of approximately 7 knots, climb banks, and proceed on land, developing over good ground a speed of as much as 40 m.p.h. Each tank is manned generally by an officer, a driver, and seven men. A one-man "crawler" tank has now been invented which enables a machine-gunner to advance against an enemy machine-gun post.

BRITISH
MEDIUM TANK

Tannenberg, a village in E. Prussia, where in August, 1914, the Germans gained an important victory over the Russians. Hindenburg and Ludendorff led the German forces and Semenov the Russians, and the battle proved one of the most decisive of the World War, removing all possibility of a victory for the Allies on the eastern front.

Tannin, or **Tannic Acid**, a whitish solid, soluble in water, which is found in gall-nuts and other parts of oak trees, and is used in tanning, or converting the skins of animals into leather. It has a characteristic astringent taste, and is used in medicine on account of its astringent properties.

Tanning, the process of converting raw hides and skins into leather by adding some agent which prevents the raw material from rotting and renders it elastic. The commonest agent is tannin (q.v.), a soluble vegetable extract which forms insoluble compounds with the gluten and other elements of the skin or hide. Alum and sodium are also used to strengthen the fibrous part of the material against moisture or air. The vegetable tanning extracts in use to-day are mainly valonia, mimosa or South African wattle-bark, chestnut-wood, oakwood, quebracho and gambier. The first stage in the industrial process is "layering," i.e., steeping in tanning liquors to impart firmness; this is followed by "scouring" to remove deposits, and then by drying and finishing.

Tansy (*Tanacetum vulgare*), a perennial plant of the order Compositae; common in hedges and waste ground; bears bright yellow flowers in August. The aromatic and bitter-flavoured leaves are used in folk-medicine, and as a flavouring for confectionery.

Tantalum, a metallic chemical element (symbol Ta; atomic weight 181.4; atomic number 73). It is very resistant to acids, and is used in the manufacture of certain steels. As an electric lamp filament it has been largely replaced by tungsten.

Tantalus, in the Greek mythology, a Lydian king, who, being admitted to the banquets of the gods, incurred their displeasure by betraying their secrets, and was consigned to the nether world and compelled to suffer the constant pangs of hunger and thirst, though he stood up to the chin in water, and had ever before him the offer of the richest fruits, both of which receded from him as he attempted to reach them, while a huge rock hung over him, ever threatening to fall and crush him with its weight.

Taoism, a Chinese philosophical and religious system tracing its origins to Lao-tse (q.v.). Originally it seems to have been a mystical monism, relying on intuition as opposed to Confucian rationalism, but after the introduction of Buddhism into China it was greatly influenced by, and in part coalesced with, that religion. Its priests and devotees later adopted numerous magical and esoteric practices akin to those of the European alchemists, and a rapid degeneration set in. To-day it is impossible to enumerate Taoist adherents separately, as many if not most Chinese frequent impartially Taoist, Confucianist and Buddhist temples and take part in the rites of all three creeds.

Tap, a hole in a vessel or at the end of a pipe through which liquid may be drawn; it is stopped by means of an adjustable plug which controls the amount of the flow, or cuts it off completely when required, the plug being usually manipulated by the turning of a handle.

Tapajos, a river of Brazil, one of the greater affluents of the Amazon; its head waters rise in the Sierra Diamantina, in the S. of Mato Grosso State; has a northward course of over 1,000 m. before it joins the Amazon near Santarem; its lower course is navigable for 150 m.

Tape Machine, a telegraph instrument which receives information issued along relay lines from an exchange centre, and records the words in print on a moving paper tape. It is used principally in newspaper offices for the receipt

of news items issued by press agencies. It is sometimes, and in America generally, known as the "ticker."

Tapestry, cloth patterned with various designs woven in such a way that the horizontal threads (woof) completely conceal the vertical threads (warp), the pattern being formed by the use of woof threads of various colours, which are woven through selected groups of warp threads instead of through all of them, as in ordinary weaving. The word is applied also to embroidery, e.g., the famous 11th Century Bayeux tapestry. The art of tapestry proper dates from early times—in Egypt from the second, in Greece from the first millennium B.C. In Europe the most famous tapestry was made at Arras from about 1300 until its fall in 1477, and the name of the town became a generic name for rich tapestry. Other centres of tapestry-weaving were Brussels (14th to 16th Century), Mortlake, England (16th Century), Gobelins, Paris (17th Century); at the Gobelins factories and at Aubusson the best tapestries of the present day are produced.

Tape Worm (*Cestodes*), an endoparasitic worm found in the alimentary canal of vertebrates, including man. There are many species, segmented and unsegmented, varying in size from a few millimetres to over a yard. In segmented species, the segments or proglottides contain generative organs. The tapeworm attaches itself to the mucous membrane by the suckers and hooks with which the head or scolex is equipped. It is generally introduced into the human digestive system as a result of eating undercooked beef or pork containing the ova or immature stages of the worm.

Tapioca, a farinaceous food obtained from the starch contained in the roots of cassava or manioc. This starch is extracted and dried on hot plates, forming small irregularly-shaped pieces. It is also sold in the form of flour. Tapioca is exported chiefly from Singapore and Brazil.

Tapir, the common name of the ungulate mammals of the family Tapiridae.

Several species are found in S. America, and one, *Tapirus indicus*, in Malaysia. The latter is remarkable for its colouring, the limbs, head and foreparts being deep black, the back, belly and hindquarters white.

TAPIR

It is a large and clumsy animal with long snout, rudimentary tail, and thick smooth skin. Nocturnal in habit, it lives in forests, and is hunted for the sake of its skin.

Tapping, in surgery the operation of fluid which has collected in the cavities or subcutaneous tissue of the body, as, e.g., in the pleura or peritoneum. It is performed by piercing the wall of the cavity with a suitable instrument, and allowing the fluid to exude through a tube or similar medium.

Tar, a viscous resinous substance, the by-product in the destructive distillation at high temperatures of wood (e.g., pine), shale, and coal. It is used in building macadamized roads, and for the preservation of rough outdoor wood-work. By distillation such varied products may be obtained from it as pitch, creosote, paraffin (from shale tar), benzene, phenol, and naphthalene. Wood-tar possesses medicinal properties and is used in skin-ointment.

Tara, Hill of, a celebrated eminence, 300 ft. high, in country near Bire, 7 m. S.E. of Navan; legend points to it as the site of the residence of the High Kings

of Celtic Ireland; St. Patrick is said to have met and defeated the Druids there in argument.

Taranaki, a provincial district of New Zealand, occupying the SW. corner of North I.; remarkable for its dense forests, which cover nearly three-fourths of its area, and for its beds (2 to 5 ft. deep) of titaniferous iron-sand which extend along its coasts, out of which the finest steel is manufactured; the industries are almost entirely agricultural and pastoral. New Plymouth is the capital. Area, 3,750 sq. m. Pop. 78,600.

Taranto, a seaport of S. Italy and headquarters of an Italian naval zone, situated on a rocky inlet between the Gulf of Taranto and the Mare Piccolo, a broad inlet on the E., 72 m. S. of Bari; is well built, and contains various interesting buildings, including a cathedral and castle; is connected with the mainland on the E. by a six-arched bridge, and by an ancient aqueduct on the W.; textile and glove manufactures are carried on, and oyster and mussel fisheries and fruit-growing are important; as the ancient Tarentum its history goes back to the time when it was the chief city of Magna Græcia; was captured by the Romans in 272 B.C., and after the fall of the Western Empire was successively in the hands of Goths, Lombards, and Saracens, and afterwards shared the fate of the kingdom of Naples, to which it was united in 1063. Pop. 118,000.

Tarantula (*Wolf-spider*), a spider (*Lycosa tarantula*) found chiefly in S. Italy, where its bite is reputed to be venomous, causing tarantism, an epidemic disease allied to hysteria in which the patient makes involuntary dance-like movements. Widespread outbreaks of the disease occurred in the 16th and 16th Centuries, the "dancing madness" spreading over a great part of S. Europe. The name "tarantula" is also sometimes erroneously applied to the tropical bird-catching spiders (*g.r.*).

Tarapaca, a maritime province of N. Chile, taken from Peru in 1883; its immense deposits of nitrate of soda are a great source of wealth to the country; silver and guano are also produced; area, 21,250 sq. m. Pop. 80,400. Capital Iquique.

Tarbert, fishing village of Argyllshire, Scotland, on the Mull of Kintyre, 39 m. SW. of Inverary. Above it stand the ruins of a castle built by Robert the Bruce. Pop. 2,080.

Tarbes, an ancient town of France, on the Adour, capital of the dept. of Hautes-Pyrénées, 100 m. SW. of Toulouse; has a fine 12th-Century cathedral and a Government cannon foundry. Pop. c. 30,000.

Tardieu, André, French statesman, originally in the diplomatic service and attaché to the Berlin Embassy, he became professor of modern history at the School of Political Science, Paris, and afterwards at the French Army Staff College. He later took to journalism, and during the World War he was given positions on the staff of Foch and Joffre, but transferred to a line regiment in the trenches where he was wounded and badly gassed. He represented France at the Versailles Peace Conference, was Prime Minister in 1929, 1930, and for a short time in 1932, and later served in the Doumergue non-party government of 1934 as Minister without portfolio. (1876-).

Tare, or *Vetch*, the common name in Britain of the native species (10 in number) of leguminous plants of the genus *Vicia*, *Vicia sativa*, the chief, being found in waste places and much cultivated for horse and cattle forage.

Tare and Tret, deductions usually made from the gross weight of goods. Tare is the weight of the case or covering, boxes suchlike, containing the

goods; deducting this the net weight is left. Tret (a term now practically disused) was an allowance for wastage through dust damage and similar causes.

Tarentum. See Taranto.

Target, or *Targe*, original-Celtic shield; from a resemblance in shape, the name was given to an artificial mark at which archers, and later rifle men, might practise firing. The present-day service target is a wooden frame on which is sketched a canvas background showing the dark silhouette of a head and shoulders; those used by amateur rifle clubs generally show a "bull's eye."

TARGET

Tarifa, Spanish seaport, the most SW. of Gibraltar, derives its name from the Moorish leader Tarif, who occupied it A.D. 710; held by the Moors for more than 500 years; still thoroughly Moorish in appearance, dingy, crowded, and surrounded by walls; its main occupation is fishing. Pop. 12,000.

Tariff, a duty imposed on goods imported from abroad. The idea underlying the system is to raise the price of imported articles, and so afford a margin to home producers to enable them to compete on better terms in the home market. Some tariffs, however, are designed not to give protection to home industries but to raise revenue; in England these include the duties on tobacco, wine, and tea, which were imposed even in the "Free Trade" epoch before 1931, after which a general tariff on all imported articles came into force. See *Protection*.

Tariff Reform, an agitation started by Joseph Chamberlain (*q.r.*) for a reversal of Britain's free trade policy and the imposition of protective duties on imported articles, together with an encouragement of Empire trade by granting preferences. The Tariff Reform League was started in 1903, and in 1906 its proposals became part of the programme of the Conservative Party in the general election, when they were heavily defeated. In 1923 Baldwin sought to reverse that decision, but without success. In 1932, however, in response to the new situation created by the economic crisis of 1931, the free trade policy was abandoned, and a general protective tariff imposed by the Import Duties Act, one of the first measures of the National Government.

Tarn, dept. of S. France, in the former province of Languedoc. Mainly mountainous, there are fertile plains in the W. where cereals, etc., are grown. Cattle and sheep are reared. The capital is Albi. It is watered by the R. Tarn, which flows through picturesque gorges. Area, 2,230 sq. m. Pop. 299,000.

Tarn-et-Garonne, dept. of S. France, part of the old province of Guyenne. It is mainly a fertile plain enclosed by low hills and is watered by the Tarn, Garonne and Aveyron. The capital is Montauban. Area, 1,440 sq. m. Pop. 185,000.

Tarnopol, county of Poland, in the Galicia, area formerly known as Galiçia; area, 8,400 sq. m.; pop. 1,800,400. Also its capital, on the R. Sereth, 80 m. SE. of Lwów, an agricultural centre, largely inhabited by Jews; pop. 30,000.

Taro, a plant (*Colocasia esculenta*) of the order Araceae, found in Japan and Hawaii and elsewhere in the Pacific; was formerly common in New Zealand. Its root, from which flour is made, and its leaves, are common articles of food in Polynesia. Another

allied species, *Colocasia antiquorum*, is cultivated in the tropics for its root which, though poisonous raw, becomes edible when boiled.

Tarpaulin, hempen, jute or linen cloth coated with tar or pitch to make it waterproof. It is used for covering boats and other exposed portions of ships from the weather, to protect deck cargo, and as a covering for goods in course of transport by other methods.

Tarpeian Rock, a precipitous cliff on the W. of the Capitoline Hill at Rome, from which in ancient times persons guilty of treason were hurled. It took its name from Tarpeia, a vestal virgin, who betrayed the city to the Sabine soldiers, then besieging Rome, on condition that they gave her what they wore on their left arm, meaning their golden bracelets. Instead, they flung their shields upon her, visiting her perfidy with merited punishment. At the base of the rock her body was hurled.

Tarpon, a large fish (*Megalops atlanticus*) of the family Clupeidae, attaining when full-grown a length of over 8 ft. It is found chiefly off the coasts of California, Mexico, and Brazil. It is distinguished by a peculiar elongation of the dorsal fin, and the scales are large, 2 to 4 in. in diameter.

TARPON

Tarquinius, name of an illustrious Roman family of Etruscan origin, two of whose members, according to legend, reigned as kings in Rome; *Lucius Tarquinius Priscus*, fifth king of Rome; the friend and successor of Ancus Martius; said to have reigned from 616 to 578 B.C., and to have greatly extended the power and fame of Rome; was murdered by the sons of Ancus Martius. *Lucius Tarquinius Superbus*, seventh and last king of Rome (534-510 B.C.), usurped the throne after murdering his father-in-law, King Servius Tullius; ruled as a despot, extended the power of Rome abroad, but was finally driven out by a people goaded to rebellion by his tyranny and infuriated by the infamous conduct of his son Sextus (the violator of Lucretia); made several unsuccessful attempts to regain the royal power, failing in which he retired to Cumae, where he died.

Tarragona, a Spanish seaport, capital of a province of the same name (area 2,500 sq. m.; pop. 340,000), situated at the entrance of the Francoli into the Mediterranean, 60 m. W. of Barcelona; contains many interesting remains of the Roman occupation, including an aqueduct, still used, and the Tower of the Scipios; possesses also a 12th-Century Gothic cathedral; has a large shipping and transport trade, and manufactures wine, silk, jute, and lace. It was the seat of the manufacture of the well-known liqueur, Chartreuse, during the expulsion of the Carthusian monks from France in the early part of the 20th Century. Pop. 25,000.

Tarshish, a place frequently mentioned generally identified with Tartessus, a Phoenician settlement in the SW. of Spain, near the mouth of the Guadalquivir, which became co-extensive with the district subsequently known as Andalusia; also conjectured to have been Tarsus, and alternatively Yemen.

Tarsier, a small lemur (*Tarsius speciosus*, *tricus*) of the family Tarsiidae, rather larger than a rat, with rounded head, very large eyes in great sockets, and long hind legs; it is of nocturnal and arboreal habit and, with the aid of its sucker-like toes and fingers, can climb and hold on to trees with remarkable

ease. It preys upon lizards, and is found in the East Indian islands.

Tarsus, now *Tarsous*, city of Turkey, ancient capital of Cilicia, on the Cydnus, 12 m. above its entrance into the Mediterranean; legend ascribes its foundation to Sennacherib in 690 B.C.; in Roman times was a famous centre of wealth and culture, rivaling Athens and Alexandria; associated with the meeting of Antony and Cleopatra and the deaths of the emperors Tacitus and Maximinus; here St. Paul was born; it has to-day an export trade in corn, cotton, wax, lilies, etc. Pop. 72,000.

Tartan, woollen cloth woven in coloured stripes crossing at right angles, in various patterns, formerly produced only in the Scottish Highlands, where each clan was distinguished by its own pattern.

Tartar Emetic, or potassium antimony tartrate; clear, shining, rhombic pyramids, soluble in water, very poisonous, and prepared by boiling 5 parts of cream of tartar with 4 parts of antimony trioxide and 50 parts of water. It is used in medicine as an emetic and in dyeing as a mordant.

Tartaric Acid, an organic hydroxy-acid occurring as the potassium salt in grape juice. It is prepared in the form of large white transparent crystals soluble in water, and its salts are used in medicine as purgatives, emetics, etc. It is also used in the preparation of cooling beverages such as sherbet.

Tartar (or Tatar) Republic,

an autonomous republic of the Russian Soviet Federation, lying N. of the Middle Volga Area and watered by the Volga and its tributary, the Kama. Area 26,000 sq. m. Pop. 2,600,000. The capital is Kazan.

Tartars, or, more properly, *Tatars*, a name of no precise ethnological signification, used in the 13th Century to describe the Mongolian, Turkish, and other Asiatic hordes, who under Genghis Khan (q.v.) were the terror of Europe, and now bestowed upon various tribes dwelling in Siberia and other parts of Asiatic Russia and Mongolia. As a geographical name in the Middle Ages Tartary embraced practically the whole of Asia N. of Persia and India, including the western parts of China.

Tartarus, a dark sunless waste in the earth as heaven is above it, into which Zeus hurled the Titans who rebelled against him. The term was subsequently sometimes used by the Greeks to denote the whole nether world, often conceived of as a place of punishment after death.

Tartu (formerly *Dorpat*), second city of Estonia, on the H. Empeach, 150 m. NE. of Riga, with a celebrated university founded by Gustavus Adolphus in 1632; a German Hanse town in the Middle Ages; it fell later to Poland, Sweden, and finally Russia; the treaty of 1920 by which Russia recognized Estonian independence was signed here. Pop. 60,000.

Tashi Lama, or *Panchen Lama*, one of the two principal superiors of the Lamaist faith in Tibet. His authority is purely spiritual, not extending, like that of the Dalai Lama, to secular affairs. He resides at Tashi-Lhunpo, a monastery near Shigatse.

Tashkent, capital of the Uzbekistan S.S.R., on the Chir-Chik, 300 m. NE. of Samarkand; an ancient place still surrounded by its 12 m. circuit of wall; formerly the seat of the Cossack Russian government of Turkestan; carries on a brisk trade, and manufactures silks, leather and porcelain ware. It is the seat of the Central Asiatic State University. Pop. 490,900.

Tasman, Abel Janszoon, Dutch explorer, and discoverer of the island later called Tasmania. He early took to the sea, and in 1642 was placed in command of an expedition sent out by Van Diemen, governor of the Dutch East India Company. In the course of that voyage he discovered Tasmania, New Zealand, and the Fiji Is. In a second voyage in 1644 he discovered the Gulf of Carpentaria. (c. 1600-1659).

Tasmania, an island lying 100 m. S. of Australia, from which it is separated by Bass Strait, forming a State of the Australian Commonwealth. The beauty of its mountain and lake scenery has won it the name of "the Switzerland of the South." Extensive stretches of tableland diversified by lakes—largest Great Lake, 90 m. in circumference—occupy the centre; wide fertile valleys stretch down to the coastal plains, often richly wooded, with lofty eucalyptus and various pine trees. Rivers are numerous, and include the Derwent and Tamar, which form excellent waterways into the interior. Sheep-farming and mining (zinc in particular), and fruit-growing are the principal industries. It has a long, irregular coastline, with many excellent harbours; chief exports are fruit, zinc, copper, and wool and woollen manufactures. It was discovered in 1642 by Tasman, a Dutchman, and first settled by Englishmen in 1803. The aborigines are now completely extinct. It was till 1852 a penal settlement, and received representative government in 1856. It was formerly called Van Diemen's Land after Van Diemen, the Dutch governor-general of Batavia, who despatched Tasman on his voyage of discovery. Area, 26,215 sq. m. Pop. 233,000. The capital is Hobart (pop. 65,000); the second town Launceston.

Tasmanian Devil, or *Ursula Dasyurus* (*Sarcophilus ursinus*), a marsupial found only in Tasmania.

It resembles a small bear, about a couple of feet in length, has a dark brown coat, long tail, and a broad white band across the chest. It is extremely destructive to game and poultry, whence its name.

TASMANIAN DEVIL

Tasman Sea, in width, lying between the New Zealand group and Australia and Tasmania.

Tasso, Torquato, Italian poet, son of Naples, preceding, born at Sorrento, near Naples; educated at a Jesuit school in Naples, he studied law at the university of Padua, and at 18 published his first poem *Rinaldo*, a romance in 12 cantos, the subject-matter of which is drawn from the Charlemagne legends. At the court of Alfonso, Duke of Ferrara, he received the needful impulse to begin his great poem *La Gerusalemme Liberata*. For the court stage he wrote his pastoral play *Amita*, a work of high poetic accomplishment, which extended his popularity, and by 1576 his great epic was finished. In the following year the symptoms of mental disease revealed themselves, and fleeing from Ferrara, he for two years led the life of a wanderer. On return to Ferrara he was placed in confinement for seven years. During these years the fame of his epic spread throughout Italy, and the interest excited in its author eventually led to his liberation. In 1585 he was summoned by Pope Clement VIII., from a homeless and wandering life, to appear at Rome to be crowned upon the Capitol the poet-laureate of Italy, but he died before the ceremony could take place. Voltaire's version of the *Jerusalem Delivered*

is one of the great translations in the English language. (1544-1595).

Tatar. See Tartar.

Tate, Sir Henry, English industrialist and philanthropist, born at Chorley, Lancashire. Employed in a Liverpool sugar-factory, he acquired a machine for cutting loaf-sugar into cubes, 1872; migrated to London in 1880, and built up an extensive sugar-business. He endowed University College, Liverpool, and built the Tate Gallery (q.v.), to which he presented many pictures. (1819-1899).

Tate, Nahum, English poet laureate, born in Dublin, where he was educated at Trinity College; came to London to ply the craft of letters, and in 1690 succeeded Shadwell in the laureateship; he died in the Mint, Southwark, a contemporary refuge for debtors; wrote some dramatic pieces, but is remembered mainly for his metrical version of the Psalms, executed in conjunction with Nicholas Brady, which superseded the older version done by Sternhold and Hopkins. (1632-1715).

Tate Gallery, a British national art collection housed at Millbank, London, and named after Sir Henry Tate, who founded it in 1897, the building costing £80,000. Sir Joseph Duveen added a Turner wing in 1910, and later a further addition to house modern foreign pictures and sculpture, the Gallery having been previously devoted to the works of British artists only. The Gallery occupies the site of the former Millbank Prison.

Tattersall's, the principal London sale-room for horses, at which business of various kinds relating to horse-racing is carried on. It was established at Knightsbridge, London, by Richard Tattersall (1724-1795), an auctioneer, who in 1766 obtained a lease of premises in Hyde Park Corner; the present premises were occupied on the expiry of the lease in 1865. A "Tattersall's ring" is the most select public enclosure at the larger English race-courses.

Tattoo, in its origin the signal for hence, the drum-beat calling soldiers to their quarters at night. In recent years the name has been given to military pageants staged to create popular interest in the Army. This development began at Aldershot soon after the World War, the proceeds being devoted to military charities. Other tattoos have been staged at Wembley and at Tidworth, Salisbury Plain, and they have now become regular annual functions, the scenarios arranged by Captain Oakes-Jones, the historian of the Royal Fusiliers, having been an important contributory factor in their success.

Tattooing, the practice of imprinting designs upon the skin by means of colouring matter, e.g., Chinese ink, cinabar, introduced into punctures made by needles; widely in vogue in past and present times amongst uncivilized peoples, and even to some extent amongst civilized races, especially among sailors; reached a high artistic standard in Japan, where it was resorted to as a substitute for clothing, as well as among many Polynesian races, such as the Maoris and Marquesas Islanders; the Picts ("painted men") of Scotland probably derived their name from the practice. It is now carried out in Europe and America by puncturing the skin with a small machine worked by electric power, and is occasionally resorted to for cosmetic reasons as an alternative to rouge, to conceal soars, etc.

Tauber, Richard, Austrian-Jewish tenor, born at Linz; educated at the Conservatoire, Frankfurt-on-Main; has appeared in musical plays in Vienna, Berlin, London, and New York; produced his own

operetta *Der Singende Traum*, 1934. (1892-).

Tauchnitz, Karl Christopher Traugott, German printer and bookseller, born at Grosspardo, near Leipzig; he opened his own printing works at Leipzig in 1796, and became celebrated for his neat and cheap editions of the Roman and Greek classics; introduced stereotyping into Germany. (1791-1836). The well-known "British Authors" collection was started in 1841 by Christian Bernard, Baron von Tauchnitz, a nephew of the preceding, who established himself as a printer and publisher in Leipzig in 1837. (1816-1895).

Taunton, (1) County town of Somerset, setshire, England, on the Tone, 45 m. SW. of Bristol. Its castle was founded in the 8th Century, and rebuilt in the 12th, and it has associations with Perkin Warbeck. Judge Jeffreys' "Bloody Assize" began here, the town having welcomed Monmouth (q.v.) on his invasion of England. It is noted for its hosiery, glove and silk manufactures, and is also a busy agricultural centre. Pop. 27,200. (2) City in Massachusetts, on the Taunton R., 34 m. S. of Boston, with manufactures of cotton, bricks, locomotives, etc. Pop. 37,300.

Taurus, a range of mountains in Hesse-Nassau, Germany, frequented by tourists. Many of the heights overlook the Rhine, and the vantage points were occupied by fortified castles now in ruins. The mineral springs of Wiesbaden, Homburg, etc., lie among the hills, which attain a height of 2,890 ft.

Taupo, lake in the volcanic region of N. Island, New Zealand. It has an area of 240 sq. m. The town of Taupo, which has hot medicinal springs, lies on the NE. shore.

Taurus (the Bull), the second sign of the zodiac, which the sun enters on April 10; the constellation of that name, which includes the Pleiades (q.v.) and the well-known star Aldebaran, is now situated in the sign Gemini owing to the precession of the equinoxes.

Taurus, Mount, a mountain range of Turkey in Asia, stretching W. for about 500 m. in an unbroken chain from the headwaters of the Euphrates to the Aegean Sea, and forming the S. buttress of the tableland of Asia Minor; in the E. it is known as the Ala Dagh, in the W. as the Bulghar Dagh, the Cilician Gates marking the pass that separates the ranges. The Anti-Taurus is an offshoot of the main range, which, continuing to the NE., unites with the systems of the Caucasus.

Tavernier, Jean Baptiste, Baron, born at Paris, the son of an Antwerp engraver. During the years 1630-1669 as a dealer in jewels he travelled in six journeys over most of India and Persia, returning with stores of valuable information respecting the commerce of those countries. He embodied the results of his observations in his *Six Voyages*, a classic of travel literature; was ennobled in 1669 by Louis XIV. (1605-1689).

Tavistock, a market town of Devon, England, situated at the western edge of Dartmoor, on the Tavy, 11 m. N. of Plymouth. It is one of the old stannary towns, and copper, tin, manganese and arsenic are still found in the neighbourhood. Pop. 5,100.

Tax, a charge levied by the state on the property or income of individuals, or on products, the expenses tax is said to be immediately on the person who it is intended should pay it, as, e.g., income tax, poll tax, property tax; "indirect" when it takes the

form of a general payment on some commodity or is otherwise so framed that the person from whom it is exacted may indemnify himself at the expense of others, as, e.g., excise and customs duties, tariffs, entertainment tax.

Taxation was arbitrary in England under the Norman kings, but gradually became subject more and more to Parliamentary control; since the end of the Stuart epoch the sole right of the House of Commons to regulate taxation has been unquestioned. In selecting methods of taxation the chief requisites are that the tax should yield a maximum return with a minimum of disturbance to the life and business of the nation, and that the cost of collection should not bear too large a proportion to the amount realized. The principal headings of taxation in Great Britain are income and sur-tax, land tax and land duties, estate and legacy duties, customs excise, and stamp duties.

The expression "local taxation" denotes rates or other moneys collected by local authorities to defray the cost of various public services. See also *Income Tax*; *Rates and Rating*.

Taxed Costs, the amount paid by the unsuccessful party to a lawsuit to his opponent to meet the latter's expenses. The order of the court almost invariably directs the costs to be taxed, and the taxing master of the Supreme Court rarely allows the full amount which the successful party has to pay to his own solicitor: the difference between these amounts, or the "extra costs," has to be paid by the winner of the suit. If the court orders that the costs payable should be taxed "as between solicitor and client" a much more liberal allowance is made.

Taxidermy, the art of preparing and preserving the skins of animals for exhibition. In present practice the skin is generally preserved by treatment with saltpetre and burnt alum, or in the case of birds, benzoline; a dummy of the animal, in a suitable attitude, is prepared, over which the skin is stretched, the eyes and mouth being suitably modelled and painted to give a lifelike result.

Taximeter, a device for measuring the distance travelled by a cab, and registering the fare payable. A front wheel of the cab is geared to the instrument, and a second set of time-gearing by clockwork also operates to register time spent in waiting. When the apparatus is working, a flag is raised to indicate that the cab is hired.

Taxodium, a genus of coniferous trees comprising two species, *Taxodium distichum* and *Taxodium mexicanum*, native to the swampy soil of Florida and other parts of the southern United States, and known also as Swamp or Deciduous Cypress. *Taxodium distichum* is a tree of great beauty, with green feathery foliage in spring and rich brown in autumn. In swampy soil hollow protuberances or "knees" supposed to be aerating organs, are sent up from the roots. It is grown in Britain as an ornamental tree for lawns. In America its wood is used in building, and a resin exuded from the bark is sometimes employed as a dressing for wounds.

Tay, a river of Perthshire, Scotland, rises on the northern slope of Ben Lul, on the Argyll border, and flowing 25 m. N.E. under the names Fillan and Dochart, enters Loch Tay, whence it sweeps N., S.E. and E., passing Perth and Dundee, and enters the North Sea by an estuary 25 m. long. It is renowned for the beauty of its scenery, possesses valuable salmon fisheries and has a total length of 120 m. Immediately W. of Dundee it is spanned by the Tay Bridge, consisting of 95 spans, with a total length of 3,440 yds., opened in 1867, its predecessor

dating from 1878, having been destroyed in a storm the year after its opening. *Loch Tay*, one of the finest of Highland lochs, lies at the base of Ben Lawers, stretches 14½ m. N.E. from Killin to Kenmore, and varies from ½ m. to 1½ m. in breadth.

Taylor, Jeremy, English divine and author, born at Cambridge; educated at Caius College; became a Fellow

of All Souls, Oxford; took orders; attracted the attention of Laud, and was appointed to the living of Uppingham; in 1642 joined the king at Oxford and, becoming his chaplain, adhered to the royal cause through the Civil War; suffered much privation, and imprisonment at times. Retiring to Wales, he procured the friendship and enjoyed the patronage of the Earl of Carberry, in whose mansion at Grove he wrote a number of his works; removing to Ireland in 1658, he became after the Restoration Bishop of Down. His works are numerous, the principal being his *Liberty of Prophesying*, *Holy Living and Holy Dying*, *Life of Christ*, and *Ductor Dubitantium*, a work on casuistry. He is considered one of the greatest masters of English prose style. (1613-1687).

JEREMY TAYLOR

Taylor, Zachary, twelfth President of the United States, born in Orange County, Virginia; first saw service in Indian wars on the north-west frontier; in 1836 cleared the Indians from Florida and won the brevet of brigadier-general. Great victories over the Mexicans on the Texan frontier during 1845-1848 raised his popularity to such a pitch that he was carried triumphantly into the Presidency. The questions raised during his term of office were the proposed admission of California as a free state and the extension of slavery into the newly acquired territory. He was popularly known as "Old Rough and Ready." (1784-1850.)

Tchaikovsky, Peter Illich, Russian composer. Born at Votkinsk, he studied law, but at the age of 23 entered the Conservatoire at St. Petersburg, and three years later was a professor at Moscow. He made his London début as a conductor in 1888, and later toured America. The *1812 Overture* and *Symphonic Pathétique* are his most famous works. He wrote several operas, symphonies, concerti, and chamber and piano music. (1840-1893).

Tchekhov, Anton. See Chekhov.

Tchitcherine, Georgy Vasilievitch. See Chicherin.

Tea, a beverage made by infusing the prepared leaves of the tea-plant, *Thea sinensis*, containing tannic acid and theine, an alkaloid stimulant. The plant is cultivated extensively in China, India, and Ceylon. China tea contains a lesser quantity of tannic acid, and is more digestible. The proportion of theine is highest in Ceylon tea, which is therefore more of a stimulant. The young leaves of the plant are picked, exposed to the air, roasted, rolled by hand, and then dried. Green tea is exposed only for a very short time before roasting; black tea for a longer period. The best China teas are Pekoe and Soucheong, while the fullest flavoured Indian teas come from Assam and Darjeeling. Before being placed on the market, teas are generally carefully blended. Many China teas are made fragrant by the addition of flower

— Imported tea was taxed in England in 1860 to 1920, when the tax was repealed, to be reimposed a few years later; in 1938

the duty was at the rate of 8d. per lb. The levying of a duty on tea imported into America in 1787 led to the famous "Boston Tea Party," which ended in the American War of Independence.

Teachers, National Union of, the principal trade union organization of the teaching profession, especially for teachers in state-aided schools in Great Britain; it has existed since 1870, and has a membership approaching 150,000. It was in 1938 concerned in negotiations for affiliation or amalgamation with some or all of the numerous smaller teaching professional associations which include teachers in private and public schools.

has con-
its status
since the World War, largely owing to the revision and increase of teachers' salaries consequent on the Burnham Award of 1925. The qualifications needed by the successful teacher vary according as his or her work is concerned with elementary, secondary, technical or university teaching; but patience, sympathy, resilience, and a natural gift for imparting information are always essential. For secondary teaching a university degree is necessary, followed by the obtaining of a diploma in education, obtainable through the teachers' training departments now established at most universities. For special subjects, such as physical training, domestic science, etc., a period at a specialized training college is necessary. The Board of Education makes grants to promising students of teaching, and numerous scholarships are available for them.

Teak (*Tectona grandis*), a tree of the order Verbenaceae, the many varieties of which grow in India, Burma, Java, Ceylon and Malaya. Burmese teak is almost black, Siamese a deep yellow. The wood is exceedingly strong, weighing some 40 lb. to the cu. ft. It is much used in constructional work where resistance to water and pests is essential, for shipbuilding, and also for ornamental work.

Teal, the common name of a number of small ducks mostly of the genera *Querquedula* and *Nettion*, found about lakes and rivers.

The Common Teal, *Nettion crecca*, frequents Britain and the Continent; it is slightly over a foot in length, the plumage of the male being grey and white in winter, the head chestnut marked with metallic green. The female is a mottled buff spotted with brown on the breast. The plumage of the male in summer resembles that of the female. *Querquedula ciria* is the Garganey or Summer Teal, a summer resident in Britain; *Querquedula discors* the Blue-Winged Teal.

Teasel, name for several plants of the order Dipsacaceae (genus *Dipsacus*) of which *Dipsacus fullonum* (Fuller's teasel) is cultivated in cloth-manufacturing districts for the sake of the awns of the head, which are used for raising the nap of cloths. The *Dipsacus sylvestris*, an English prickly wild plant, grows to a height of 4 ft. or 5 ft.

Technical Education, instruction in any branch of knowledge necessary for the pursuit of a profession or trade. In England provision for technical education was made by the Technical Instruction Act, 1889, by empowering local councils to levy a rate for the purpose. Technical education throughout the country is given in evening and similar schools and in Day Technical Classes and Technical Instruction Courses—mostly controlled by local authorities. State grants are paid

TEAL

according to number of students, of whom about one half are under 17 years of age. The Imperial College of Science and Technology, South Kensington, has a special department where science applied to industry is studied.

Technology, the branch of knowledge dealing with the processes of the industrial arts and crafts, such as engineering, metallurgy, woodwork, etc. It has increased enormously in importance, as modern industrial processes usually demand an intelligent appreciation by the worker of the methods of his work and the relation his part in the production of an article bears to the finished whole. Instruction in the various branches of technology is given at educational institutions, private and public, of various kinds. See **Technical Education**.

Teck, German title, from a castle (now in ruins) crowning an eminence in the Swabian Alps, Germany, 20 m. S.E. of Stuttgart. In 1863, Francis, the son of Duke Alexander of Württemberg, was made Prince, and in 1871 Duke, of Teck. In 1866 he married Princess Mary of Cambridge, whose daughter Mary (q.v.) became the consort of George V. of Great Britain. In 1917 the family renounced connexion with Teck, and took the surname Cambridge—the then Duke, Adolphus (1868–1927) becoming Marquess of Cambridge.

Teddington, town in Middlesex, on the Thames, now part of the borough of Twickenham. It is the point at which the Thames ceases to be tidal, and is the seat of the National Physical Laboratory. Pop. 23,000.

Te Deum, a Latin hymn, so called matins and on occasions of joy and thanksgiving. It is used both in the Roman Catholic and Anglican churches; tradition relates that it was sung in alternate verses by St. Ambrose and St. Augustine at the baptism of the latter, but it was probably actually written in the 3rd Century by Niceta, Bishop of Iconesiana.

Tees, English river, rises on Cross Fell, Cumberland, and flows E., forming the boundary between Durham and York; enters the North Sea 4 m. below Stockton, after a course of about 80 m. The district round the estuary is an important industrial area.

Teeth, the instruments of mastication in man and most vertebrate animals, except birds. Man has 32 teeth in all, 16 in each jaw, the two sides of each jaw being symmetrical, though the teeth of the upper and lower jaws differ a little. Starting from the front of the jaw, the two teeth nearest the centre on each side are the incisors or cutting teeth; the next, the canine or eye tooth; the next two, the bicusps or premolars; and the remaining three, the molars or grinding teeth.

Each tooth consists of (1) the crown, which in the incisors has a chisel-like edge, but which in the bicusps bears two points and in the molars four points in the upper jaw and five in the lower; (2) the fangs, which join the crown at the neck and are buried in a socket made by the jawbone and the mucous membrane of the mouth, the gum. The molars have two or three fangs each, the bicusps one forked fang, and the other teeth one each.

The interior of the tooth is a cavity filled with dental pulp, a delicate tissue abundantly supplied with nerves mainly of the sensory type, and communicating with the gums by means of the fangs. The crown and fangs of the tooth are composed of dentine, a dense calcified substance. The crown is protected with enamel which thins towards the neck. The outer surface of the fangs has a coating of true bone. See also **Dentistry**, **Caries**.

Tegucigalpa, capital of Honduras, situated near the centre of the country at a height of 3,400 ft., in the fertile valley of the Rio Grande, surrounded by mountains; has a cathedral and university. Silver and gold are mined near by. Pop. 35,000.

Teheran, capital of Iran, stands on a plain near the Elburz Mountains, 70 m. S. of the Caspian Sea. The city is largely modernized, and is surrounded by a twelve-gated fortifying wall. There are few buildings of great interest, save for the Shah's palace. Staple industries are the manufactures of carpets, silks, and cottons. Pop. c. 350,000.

Teign, river of Devon, England. Rising on Dartmoor, it flows by a southerly course into the English Channel at Teignmouth, through a wide estuary. Its length is 30 m.

Teignmouth, holiday resort and port of Devonshire, England, on the estuary of the Teign, 12 m. S. of Exeter; there is a trade in china clay and pipeclay. It was twice destroyed by the French, in 1340 and 1690. Pop. 10,000.

Telautograph, a device for reproducing drawings at a distance. An electric current transmits the motions of a pen operated at the transmitting end, and they are reproduced by an electrical device at the receiving end.

Tel-aviv, a Jewish town of Palestine, adjoining Jaffa on the N. It has sprung into being since the World War as the principal urban Jewish centre of the country, with a wealthy Jewish residential quarter, numerous industries, including textile factories and orange-packing establishments. The Palestine Electric Corporation has a power house here with transmission lines to various parts of the country. The Levant Fair is held here. Pop. 140,000.

Telegraph, an instrument for transmitting over a distance signals representing written messages. If

an electric current is passed round a coil of wire wound on an iron core the iron is magnetised so long as the current flows, and the magnet may be used to attract a second piece of iron in opposition to the pull of a spring. The current to the electro-magnet may be sent from a distance, and thus the action of the magnet can be used for sending signals from one station to the other. The current may be sent for longer and shorter intervals to represent dashes and dots by opening and closing a switch at the sending station, and thus completing the electrical circuit.

A.B.C. TELEGRAPH
(1859–1862)

These facts are applied in the electric telegraph, though it is seldom so simple as in the above example. To avoid the expense of providing a large number of wires between a pair of stations, arrangements are made so that signals can be sent and received at the same time by both stations, using one wire only, and even to send a number of signals at the same time. One method of doing this is to use alternating currents of different frequencies for different transmitters, and to have at the receiving station several receivers, each capable of responding to signals of one frequency only. Automatic machines are used, both for setting up the messages and for reception. The operator who is transmitting works at a keyboard, and the messages received are printed on strips of paper by the receiving apparatus.

Tel el-Amarna, ancient city of Egypt, on the right bank of the Nile, about 25 m. S. of Beni-Hasan. Extensive excavations carried on there since 1890 have yielded much information on the Egypt of the 14th Century B.C., many artistic and literary treasures having been brought to light, relating particularly to the times of Amenhotep IV., a religious reformer who instituted a monotheistic sun-cult and built the city.

Tel el-Kebir (the "Great Mound"), on the edge of the Egyptian desert, midway between Ismailia and Cairo, the scene of a memorable victory by the British forces under Sir Garnet Wolseley over the Egyptian forces of Arabi Pasha (Sept. 13, 1882), which ended the war.

Telemachus, the son of Ulysses and his wife Penelope who, an infant when his father left for Troy, was a grown-up man on his return. Having gone in quest of his father after his long absence he found him on his return in the guise of a beggar, and assisted him in slaying his mother's suitors.

Telemeter, or **Range-finder**, an instrument for determining the distances of objects from a given point. When the targets are visible, optical range-finders are employed; for those which are invisible sound telemeter apparatus is used.

Telepathy, the supposed power of communication between mind and mind by means not perceptible to or through the natural sense-organs. The investigations of the Psychical Research Society and other students have accumulated much evidence supporting the possibility of such communication, but no satisfactory explanation of its processes has yet been suggested.

Telephony. The earliest telephone was constructed by Alexander Graham Bell in 1876. In the modern instrument the transmitter contains a hollow box, loosely packed with granules of carbon; its front consists of a thick, electrically conducting diaphragm, and the back of a block of carbon. An electric current passes through the diaphragm, the carbon granules, and the block, and hence to the transmission lines. When the compression waves which constitute sound pass through the air and fall on the diaphragm, each wave forces the diaphragm inwards, compresses the loosely packed granules, and causes a momentary change of the electrical resistance of the transmitter. Each sound wave thus causes a pulse of current to pass to the transmission lines. In the telephone receiver two short iron rods are mounted on the ends of a U-shaped magnet. Wound on the rods are coils of wire which are connected to the transmission lines, and when a current passes round these coils the iron rods become more strongly magnetised, and attract an iron diaphragm which is fixed near them. Hence each sound wave at the transmitter causes a movement of the diaphragm in the receiver, and thus sets up a sound wave in the air near the latter.

Telephotograph, a photograph taken from a distance by means of a camera fitted with a telescopic lens. The original telephoto lens was invented by T. R. Dallmeyer in 1891. Its principle is a suitable combination of a positive and negative lens, and from this results an increase in focal length without a corresponding increase in camera extension. The difference in diameters between the size of the image afforded by the positive lens alone and that of the image afforded by the telephoto lens is called the magnification, and this can be varied according to the ratio of positive to negative.

Telescope, an instrument for magnifying images of distant objects. The first is said to have been constructed in 1608 by a Dutch spectacle-maker, Hans Lippershey. Two years later Galileo observed satellites of Jupiter through a telescope of his own make. The Galilean telescope consists of a convex lens, giving an inverted image of the object, in front of which a concave (diverging) lens is inserted as eye-piece, the eye being placed immediately behind. The effect of the concave lens is to produce a magnified erect virtual image from the rays which were converging to form the real image. In a simple astronomical telescope, the objective is a convex lens which produces a real inverted image of the object; this is viewed through the eye-piece, which is a second convex lens used to magnify the image, which appears inverted and reversed. For terrestrial work, an extra lens is inserted to re-invert the inverted image. In the reflecting telescope the convex lens is replaced by a concave mirror, which forms an inverted image of the object; this image is reflected by a plane mirror to a more convenient spot, where it is viewed through a convex magnifying eye-piece. In the modification introduced by N. Cassegrain, a convex mirror is used instead of the plane mirror for displacing the image, and the latter is viewed by the eye-piece through a hole in the concave mirror. Telescopes with reflecting concave mirrors of over 8 ft. diameter have been made.

Television, the transmission by wireless representations of images and their reproduction at a distance. In 1926 John L. Baird gave the first demonstration of true television by reflecting light from an image on to a photo-electric cell. From then until 1936 the Baird Company carried out research work at the Crystal Palace, and in 1929 began a public television service in conjunction with the B.B.C. Later an extended trial was made of two systems, those of Baird Television, Ltd., and Marconi-E.M.I. Television Company, Ltd. A London Television Station was established at Alexandra Palace, and a complete chain of studios, control room and transmitting equipment was installed by each company, while the B.B.C. provided the sound transmitter and aerials. In addition, the B.B.C. constructed on top of one of the palace towers a television mast, 300 ft. in height, carrying two separate aerial systems, one for vision and one for sound; these are connected to the transmitters by concentric feeders which pass down the mast and along to the transmitting rooms. The station equipment comprises a studio for each system, with an associated control room, and ultra-short-wave television transmitter; and an ultra-short-wave sound transmitter common to both systems. In the receiving set a stream of electrons passes down a cathode ray tube, where they are focused on a point on a fluorescent screen and produce a spot of light, the intensity of which is regulated by the strength of the incoming signals. This spot of light is caused to move across the screen in time with the movements of the scanning apparatus (the process by means of which the scene transmitted is broken into elements which are treated in order is called "scanning") and thus reproduces on the screen the scene transmitted. In 1927 it was decided that the Marconi-E.M.I. system alone should be used for the B.B.C. transmissions.

Telford, Thomas, Scottish engineer, born in Eddle, Dumfriesshire; originally a stonemason, he came to England in 1783 and, as surveyor of public works for Shropshire in 1787, constructed bridges over the Severn, and planned and superintended

the Ellesmere Canal connecting the Dee, Mersey and Severn; afterwards he was entrusted with the construction of the Caledonian Canal, the great road between London and Holyhead (including the Menai Suspension Bridge), and St. Katherine Docks, London; he also planned a nation-wide system of canals for the Swedish Government. (1757-1834).

Tell, William, Swiss legendary hero and patriot, a peasant who flourished in the beginning of the 14th Century; resisted the oppression of the Austrian governor Gessler, and was taken prisoner, but was promised his liberty if with his bow and arrow he could hit an apple on the head of his son, a feat he accomplished with one arrow; he afterwards shot the oppressor and a rising followed, which ended only with the emancipation of Switzerland from the yoke of Austria. The story is the subject of a play by Schiller and an opera by Rossini.

Tellurium, a semi-metallic chemical element belonging to the same group as oxygen, sulphur and selenium. Symbol Te; atomic number 52; atomic weight 127.61. It occurs in small quantities in many copper ores, and is principally used for alloying with lead, which it renders tougher and more resistant to corrosion. In many of its properties tellurium resembles the non-metals, but in its electrical conductivity it is similar to metals.

Telpherage, a system of goods transport, used in factories, yards, etc., in which carriers running on grooved wheels suspended from cables or girders, and carrying an electric motor, are supplied with power from a trolley wire or from the supporting girders.

Telugu, a Dravidian language spoken in southern India by some 26 million people in the Madras neighbourhood. It is allied to Tamil (q.v.).

Tempera, a painting process in which albuminous medium is used instead of oil. It is capable of many combinations which produce results greatly differing in appearance according to its degree of opacity, for it may be opaque or transparent as water-colour; some tempera paintings can hardly be distinguished from fresco, others may be mistaken for oils. The process was popular with Italian renaissance painters, and has been revived in recent times.

Temperance Movement,

the movement, begun in the 19th Century, for reasoned self-control in the consumption of alcoholic beverages. It tended very early to take form in societies whose members were pledged, not to temperance in, but to complete abstinence from, the use of such beverages. It gained little following outside English-speaking and Scandinavian countries, though the complete prohibition (q.v.) of alcoholic drink in the U.S.A. and some Scandinavian countries during and for some time after the World War was largely due to the previous propaganda of "temperance" societies. In England the British and Foreign Temperance Society was founded in 1831, and the London Temperance League in 1851; other active temperance bodies include the Church of England Temperance Society, and the British Women's Temperance Society.

Temperature, the amount of measurable heat in an object. A body is said to have a high or low temperature according as it is capable of conveying much or little heat to adjacent bodies. Temperature is measured by the thermometer (q.v.). The influences affecting the temperature of a part of the earth's surface are mainly latitude and the amount of water vapour present in the atmosphere.

The hottest parts of the earth's surface are generally the interior parts of continents. On high mountains the intensity of solar radiation is greater than in valleys, the temperature of the air diminishing at the rate of about 1°F. for every 300 ft. of ascent. Changes of temperature take place more rapidly over land than over sea. The temperature of the human body in health should be about 98.4° or 98.5° F., tending to be slightly higher in babyhood and old age. A temperature below 97.5° or above 99.0°F. indicates some abnormality of health.

Tempering, the process applied to other articles to impart hardness. It consists in heating them to a known degree, which varies with the purpose for which they are used, and then suddenly cooling them.

Tempest, Marie, English actress, by birth Marie Susan Etherington; born at London. Beginning in musical comedy, she made her debut in 1855 at the Comedy Theatre, London; from 1890 she played frequently in America, and in 1899 turned to ordinary comedy. After 1911 she became known as a producer. (1864-).

Templars, a religious order of knights pilgrims to the Holy Land from Saracen attacks; their name was taken from the fact that their chief house in Jerusalem was close to the site of Solomon's Temple.

Their constitution was drawn up by Bernard of Clairvaux (1128), and later three ranks were recognized—the knights, who alone wore the mantle of white linen and red cross, men-at-arms, and lower retainers, while a grand-master, seneschal, and other officers were created. During the first 150 years of their existence the Templars increased enormously in power; under papal authority they enjoyed many privileges, such as exemption from taxes, tithes, and interdict. After the capture of Jerusalem by the infidels Cyprus became in 1291 their headquarters, and subsequently France. They were subjected at this time to accusations of various kinds of crime, probably owing in part to the great wealth they had accumulated, and measures of the cruellest and most barbarous kind were taken for their suppression by Philip the Fair of France, supported by Pope Clement IV. Between 1306 and 1314 hundreds were burned at the stake, the order scattered, and their possessions confiscated.

Template, or **Templet,** a pattern used consisting of a thin plate of board or metal cut to the shape required for a finished flat object, by which the conformity of the object to that shape may be tested.

Temple, the, of Jerusalem, a building official worship on the same plan and for the same purpose as the Tabernacle (q.v.) but of larger dimensions, more substantial and costly materials, and a more ornate style. Three successive structures bore the name—Solomon's, built by Solomon about 980 B.C., and destroyed by Nebuchadnezzar in 586 B.C.; Zerubbabel's, built in 515 B.C., and pillaged and decorated by Antiochus Epiphanes in 168 B.C.; and Herod's, on the ruins of the former, begun in 16 B.C., finished in A.D. 70, and destroyed by Titus in A.D. 70. The site was later occupied by the mosque, built about A.D. 700 known as the Mosque of Omar or Dome of the Rock.

Temple, Frederick, English divine, born at Santa Maure, in the Ionian Is.; from 1858 to 1869 was headmaster of

KNIGHT
TEMPLAR

Rugby; he supported the disestablishment of the Irish Church, and was elected to the bishopric of Exeter (1869), of London (1885), and in 1896 was consecrated Archbishop of Canterbury. (1821-1902).

Temple, William, British divine, son of the preceding. For four years from 1910 he was headmaster of Repton, and in 1919 became Canon of Westminster, a post he held for two years before being made Bishop of Manchester. In 1928 he became Archbishop of York. (1881-).

Temple, Sir William, English diplomat and essayist, born in London; after a period of Continental travel he went to Ireland, and in 1860 was returned to the Convention Parliament at Dublin; five years later began his diplomatic career, the most notable success in which was his arrangement in 1868 of the Triple Alliance between England, Holland, and Sweden to hold in check the growing power of France; as ambassador at The Hague became friendly with the Prince of Orange, whose marriage with the Princess Mary (daughter of James II.) he negotiated; was recalled in 1871, but after the Dutch War returned to his labours at The Hague, and in 1879 carried through the Peace of Nimwegen; his later years were spent in the enjoyment of his garden, and the pursuit of letters at his villa at Sheen, and, after 1886, at Moor Park, in Surrey, where he had Swift for secretary; is remembered in constitutional history for his scheme (a failure ultimately) to put the king more completely under the check of the Privy Council by remodelling its constitution; was a writer of considerable distinction, his miscellaneous essays and memoirs being notable for grace and perspicuity of style. (1628-1699).

Temple Bar, a gateway in London Fleet Street from the Strand; pressure of traffic caused its removal in 1879; now stands at the entrance to Theobald's Park, Cheshunt, Herts, once a palace of James I.

Temple Church, one of the oldest churches in London, just off the Strand, belonging to the Inner and Middle Temple. Built by the Knights Templar, it was consecrated in 1185, and is modelled on the Holy Sepulchre, like the other round churches (q.v.) in England.

Tempo, the speed at which a piece of music is played or a dance performed. It is indicated in written musical scores by a set of conventional Italian terms ranging from *grave* (very slow) to *presto* (fast).

Tenacity, that force in solid bodies which causes the molecules to cohere. It varies not only in different substances, but even in the same material under variations of temperature. It is measured by the longitudinal stress required to tear the body asunder. The tenacity of metal may be greatly increased in one direction by forging and drawing into wire.

Tenasserim, the southernmost division of Burma, forms a long coastal strip facing the Bay of Bengal and backed by the mountain barrier of Siam; acquired by the British in 1825. The chief town is Moulmein. Area, c. 35,800 sq. m. Pop. 1,620,000.

Tenbury, market town of Worcestershire, shire, England, 22 m. NW. of Worcester, on the Teme, in the midst of hop-gardens and orchards. Its medicinal springs are visited by sufferers from rheumatism, etc. Pop. 1,750.

Tenby, watering-place of Pembrokeshire, Wales, on a rocky site on Carmarthen Bay coast; ruins of its old wall and of a castle still remain; has a fine 13th-Century Gothic church. Fishing is carried on. Pop. 4,100.

Tench (*Tinca tinca*), a fish of the carp family found in most lakes of

Europe, and in ornamental waters and ponds in Britain. It attains a length of 10 to 12 in., and is generally greenish-olive in colour and has small scales and round fins. It feeds on vegetable matter at the bottom of the water. It was formerly credited with great value in the cure of many human ills and with being the physician of other fish.

TENCH

Tender, an offer of money in payment of a debt. It is a defence to an action if the money is brought into court, but the offer must be unconditional, even though under protest, and must be paid in legal tender (q.v.). The exact amount must be produced, as a creditor cannot be compelled to give change. The name is also given to a contractor's offer to execute certain works for a specified payment.

Tendon, cords of dense, white, shining, tough and fibrous tissue attaching muscles and ligaments to the bones.

Tendon, Achilles. See *Achilles Tendon*.

Tendrils, the winding, stem-like or leaf-like growths by which certain climbing plants, such as vines, virginia creeper, clematis, pea, etc., attach themselves to their supports. They are modified stems or leaves.

Tenedos, a rocky but fertile Turkish island in the Egean, 3 m. off the mainland of Turkey in Asia, and 12 m. S. of the entrance to the Dardanelles. From 1920 to 1923 it was in Greek possession. It was the place where the Greek fleet was stationed during the Trojan War. Wine is produced in large quantities. Pop. c. 5,000.

Tenerife, the largest of the Canary Islands, Is. (q.v.), of volcanic formation, with cliff-bound coast; richly fruit-bearing; chief exports, lace, bananas, tomatoes, and wine; capital, Santa Cruz (q.v.); most notable natural feature is the famous Peak of Teneriffe, a conical-shaped dormant volcano, 12,000 ft. in height, at the summit of which there is a crater 300 ft. in circuit; last eruption took place in 1798. Area, 780 sq. m. Pop. 180,000.

Teniers, David, the elder (1582-1649), and David Teniers, the younger (1610-1690), father and son, both famous masters of the Flemish school of painting, and natives of Antwerp; the son carried his father's gift of depicting rural and homely life to a higher pitch of perfection.

Tenison, Thomas, English ecclesiastic; born at Cottenham, Cambridgeshire; after holding country cures, he became rector of St. Martin's-in-the-Fields, London, in 1880, founding a school and library there. In 1891 he became Bishop of Lincoln; he was present at the deathbeds of Nell Gwynn, Mary II., and William III., and crowned Queen Anne. In 1695 he was appointed Archbishop of Canterbury. (1636-1715.)

Tennant, Sir Charles, British merchant, born in Glasgow, and made a fortune in the management of the chemical works established by his grandfather at St. Rollox and in other industrial activities. He was a Member of Parliament for Glasgow and Peebles and Selkirk for a number of years and was made a baronet in 1886. In 1894 he became a trustee of the National Gallery. His own collection of pictures is now known as the Tennant Gallery. His children included the present Countess of Oxford and Asquith and the late Lord Glenconner, who received a barony in 1911. (1823-1906).

Tennessee, one of the central States of the U.S.A., lies S. of Kentucky, and stretches from the Mississippi (W.) to North Carolina (E.). It is divided into three regions with characteristic natural features: the East mountainous, with ridges of the Appalachians, possessing inexhaustible stores of coal, iron, and copper; the centre, an undulating wheat, corn and tobacco-growing country; and the West, with lower-lying plains growing cotton, and traversed by the Tennessee R., the largest affluent of the Ohio. The Tennessee Valley Authority, set up in 1933 to develop the Tennessee R. system in the interests of navigation, flood control and defence, and to generate electric power, has carried out many works of first importance as part of the programme of emergency works undertaken under "N.R.A." (q.v.) after the economic crisis of 1931. Nashville is the capital and largest city; other towns are Memphis, Chattanooga, and Knoxville. Area, 42,020 sq. m. Pop. 2,610,600.

Tenniel, Sir John, English cartoonist, born in London, who, from 1864, week by week, drew the chief political cartoon in *Punch*; illustrations to *Knop's Fables*, *Ingoldsby Legends*, *Alice in Wonderland*, and other works, reveal the grace and delicacy of his workmanship; joined the staff of *Punch* in 1851; was knighted in 1893. (1820-1914).

Tennis, a game derived from handball, in the Middle Ages; rackets did not come into use till the 14th Century. The game had reached England in Chaucer's day, and continued afterwards as a game for the nobility, Henry VIII. being a player. This "real" tennis continues to be played by a few, and is governed by the Tennis, Racquets and Fives Association. The expense of maintaining courts, however, led to the growth of *Lawn Tennis*, a popular variant of the original game started by Major Wingfield in 1874. In 1875 a code of laws was issued for the new game, a court was opened at Wimbledon, and in 1877 the first championship was held there.

The Lawn Tennis Association was formed in 1888, and in 1900 the Davis Cup competition was instituted for international male matches, and soon attracted entries from most European and English-speaking countries, as well as China and Japan. Besides these matches the principal tennis fixtures are the annual championships at Wimbledon, St. Cloud and Forest Hills (U.S.A.) and the Anglo-American women's contests for the Wightman Cup. Of recent years there has been a tendency to play lawn tennis more on hard courts than on grass. Among the players who have helped the phenomenal growth of the game have been H. L. and R. F. Doherty, J. Borotra, N. L. Brookes, W. Tilden, R. Lacoste, F. J. Perry, Mlle. S. Lenglen, Helen Wills Moody, Dorothy Round and Helen Jacobs.

Tennyson, Alfred, English poet-laureate, born at Somersby, Lincolnshire. He left Cambridge without a degree. In 1826 he contributed to a small volume of verse conjointly with his brother, and in 1830 published his own first volume of poems. He produced *The Princess* in 1847, and *In Memoriam* (in memory of his friend Arthur Hallam) in 1850; was in 1851 appointed to the laureateship, and next in that capacity wrote his *Ode on the Death of the Duke of Wellington*. In 1855 appeared his *Maud*, in 1859 the first four of his *Idylls of the King*, which were followed by *Enoch Arden* and the *Northern Farmer* in 1864, and by a succession of other pieces. In 1876 he turned to dramatic art and produced thereafter *Queen Mary*, *Harold*, *The Cup*, *Becket*, and *The Foresters*. He was raised to the peerage in 1884. Held in high esteem by

his own generation, his work has fallen into less repute with the general 20th-Century aversion from Victorianism. (1809-1892).

Tenor, the highest part sung by the male voice, natural male voice, covering about two octaves in compass.

Tenrec, the popular name of the members of a family (the Centetidae) of insectivorous mammals found only in Madagascar and the Comoro Is., including the Spiny Tenrecs (*Centetes*), the Striped (*Hemicentetes*), the Long-tailed (*Microgale*), the Rice (*Oryzoryctes*) and the Aquatic (*Linnosyris*). They are not unlike hedgehogs in appearance, the Spiny Tenrecs being sometimes known as Tailless Hedgehogs. They include some of the largest of the insectivora.

TENRECO

Tent, a structure of canvas, skin, or other fabric easily movable and used as a shelter for nomads, soldiers in the field, holidaymakers in the countryside, etc. The modern tent is generally based on two upright poles, connected by a ridge pole, and fastened to the ground by a system of ropes and pegs.

Tentacle, a long flexible appendage of the head or mouth in many lower animals, used as a touching or grasping organ. It is found in jelly-fish, sea anemones, etc. The arms of the cuttlefish, and the feelers of snails and slugs, are also so called.

Tenure, Land. See *Freehold*; *Land*; *Lease*; *Landlord* and *Tenant*.

Teplice, health resort in Bohemia, Czechoslovakia, finely situated in a valley between the Erzgebirge and Mittelgebirge, 20 m. NW. of Litomerice. Its thermal springs are celebrated for the cure of gout, rheumatism, etc. Pop. 31,000.

Teraphim, small images, a sort of household gods among the Hebrews, consulted as oracles, and apparently the counterpart of the Roman Penates.

Terbium, a metallic element, one of the rare earths. Symbol Tb; atomic number 65; atomic weight 159.2. It has no industrial uses.

Terborch, or **Terburg**, Gerhard, Dutch painter whose portraits and genre pictures are to be found in most of the great European galleries; born at Zwolle; after travelling in Germany, Italy, England and Spain, settled at Deventer, where he became burgomaster. His most famous pictures are a portrait of William of Orange, "Father's Advice," and his "Congress of Munster," 1648, the last in the National Gallery, London. (c. 1617-1681).

Terceira, the second largest of the Azores, rears cattle, and yields grain, oranges, and other fruits; chief town Angra, capital of the group. Pop. c. 50,000.

Terebene, the name given to a disinfectant liquid, a mixture of hydrocarbons, light yellow in colour, made by treating oil of turpentine with sulphuric acid.

Terebinth (*Pistacia terebinthus*), of the order Anacardiaceae, the Chian turpentine tree: is a striking feature in Palestinian landscapes; growing to a height of over 30 ft., with wide-spreading branches. It was apparently an object of worship among the ancient Canaanites.

Teredo, or **Shipworm**, the common name of the bivalve mollusc of the family Terebridae, of wormlike appearance, largely owing to the elongation of the breathing tubes or siphons. They reach a length of about a foot, and cause much destruction by boring into the hulls of wooden

ships, submerged piles, etc., though green-heart timber is impervious to it.

Terence (*Publius Terentius Afer*), Roman comic poet, born at Carthage; brought thence as a slave; educated by his master, a Roman senator, and then set free; composed plays, adaptations of others in Greek by Menander and Apollodorus, depicting Greek manners for Roman imitation in a pure and perfect Latin style, and with great dramatic skill. Six are extant, including *Andria* and *Heautontimorumenos* ("The Self-Tormentor"). His plays are still presented at English public schools, such as Westminster. (c. 195-159 B.C.).

Tereus. See *Philomela*.

Term, an indeterminate period of time; and universities to the periods during which instruction is given; the Oxford terms are Hilary, Trinity, Michaelmas, the Cambridge terms Lent, Easter and Michaelmas; in the law-courts the periods during which courts are in session are the Hilary (January-March), Easter (April-May), Trinity (May-July) and Michaelmas (October-December) terms. The word is also used of the period during which a lease extends.

Terminus, in Roman mythology, a boundaries, whose worship was instituted by Numa (q.v.). His name was afterwards applied to the boundary-posts set up to mark the limits of estates.

Termites, the common name of the soft-bodied insects of the order Isoptera, also called White Ants, though they are not ants at all. They are found in tropical countries, where they live in organized communities, building conical dwellings which may reach a height of 10 or 12 ft. The colony consists of a large "king" and "queen," which are concerned with reproduction, and infertile insects called "soldiers" and "workers," the soldiers having large square heads and projecting mandibles, the workers small rounded heads with concealed mandibles. Termites wreak much havoc to wood, sometimes gnawing away practically the whole timber work of buildings.

Tern, the common name of a group of birds akin to the gull, and included with them in the same family of birds (the Laridae), distinguished from them by their shorter legs, longer wings, and deeply forked tail—whence they are popularly called Sea-Swallows. Five species occur in Britain, viz., the Common (*Sterna fluviatilis*), the Arctic (*S. macrura*), the Little (*S. minuta*), the Sandwich (*S. cantiana*) and the Roseate (*S. dougalli*) all of which are regular summer migrants.

Terni, city of Italy, in Perugia, on the Nera, 50 m. N.E. of Rome. It has an old cathedral and Roman ruins. The fine falls of the Nera give power for its iron and steel and munition works. Pop. 69,000.

Terpenes, a class of colourless hydrocarbons, widely distributed in the essential oils of plants, such as clove, hops, patchouli, rubber and turpentine.

Terpsichore, the Muse of choral song and dancing, and later associated with her.

Terra-Cotta, a composition of fine sand moulded into shapes and baked to hardness. It has been used since classical times for roofing and decorating buildings, as in the case of the London Albert Hall. In Greece it was extensively used for statues, especially the little "Tanagra" figures frequently seen in museums; and it was restored to favour in the Italian Renaissance period by Donatello and della Robbia, among others.

Terrapin, a name given to various American aquatic tortoises,

particularly *Malaclemmys terrapin*, found in salt water in the eastern U.S.A., and largely reared for food purposes. The colour is grey mottled with black.

Terre-Haute,

TERRAPIN

city of Indiana, U.S.A., stands on a plateau overlooking the Wabash, 178 m. S. of Chicago; is situated in a rich coal district, and has numerous foundries and various factories. Pop. 63,000.

Terrier, a small variety of fox and other "earthing" badgers, and other "earthing" snail. It was later developed into a large number of breeds, a group with short legs and long bodies, including the Scotch, the typical variety of this class, with rough and wiry hair; the Skye, with long, silky coat; the Dandie Dimont, Yorkshire and Maltese; and another group with a shorter body and longer legs, including the Welsh, Irish, Airedale and Bedlington breeds. The bull terrier is a cross between the terrier and bulldog. The Airedale is widely used for police work. The fox terrier, perhaps the nearest breed to the original terrier, is one of the most popular at the present day.

Territorial Army ("Territorials"), the auxiliary section of the British army, formed in 1908 by Lord Haldane to take the place of the old "volunteers." Before the World War it was not liable for foreign service, but nevertheless all battalions volunteered and fought on various fronts. After the war the force was reconstituted as the "Territorial Army" with a foreign service obligation, subject in this respect to Parliamentary control. Members attend a fortnight's annual camp, put in a minimum number of drills and undergo courses of instruction. The Territorial Army is, in fact, equipped as a second-line replica of the Regular Army, and is under Regular Army instructors. The authorized establishment in 1938 was approximately 200,000, but the strength was then only 155,000, a deficiency which has since been largely made up. The Territorial Army is entrusted both with coast defences and ground defence against attack from the air. Many of its units have recently been converted into anti-aircraft units.

Territorial Waters, the seas adjacent to a country over which it has an exclusive jurisdiction; the general convention is that territorial rights extend for 3 m. from the coast-line measured from low-water mark. Harbours, estuaries, and land-locked seas belong to the state possessing the shores around them; similarly lakes and land-locked seas not directly communicating with the ocean; but bays and gulfs, if more than 6 m. wide at the mouth, are theoretically free waters. The control of straits is regulated by special rules of international law or in many cases by special treaties.

Terror, Mount, mountain of Antarctica, on Ross I., South Victoria Land. It is an extinct volcano, 10,700 ft. high, and was discovered by Sir James Ross.

Terry, Ellen, (Mrs. James Carew), English actress, born at Coventry; made her debut at the early age of eight, appearing as Mamilus in *The Winter's Tale*, at the Princess Theatre, then under the management of Charles Kean; married in 1864 G. F. Watts, the painter, the marriage being dissolved soon after; during the years 1864-1874 she lived in retirement, but

returning to the stage in 1875 achieved her first great success in the character of Portia; played for some time with the Haecrofts and at the Court Theatre; in December, 1878, made her first appearance at the Lyceum Theatre, then under the management of Henry Irving (q.v.), with whose subsequent successful career her own is inseparably associated. Her ashes were placed in St. Paul's Church, Covent Garden, in 1929. (1848-1928).

Tertiaries, name given to members of the Religious Orders, or lay associates of the Religious Orders of the Roman Catholic Church; the members are not bound by the religious vows, and do not generally live in community, but have a rule of life of their own and share in the good works of the parent Order. Regular tertiaries are those (generally women) who live in community without being bound by the full obligations of the rule of the Order to which they are affiliated.

Tertiary, the third chief division of rocks, lying above the Mesozoic or Secondary and below the Quaternary. It is subdivided into three systems—Eocene, Miocene and Pliocene—to which a fourth, Oligocene, has been interpolated after the Eocene. The early tertiary ages were distinguished by a prodigious outpouring of lavas. Examples are seen in the basaltic plateaux of Antrim and the Inner Hebrides, the Eifel and Bohemia.

Tertullian, Quintus Septimus Florens, one of the Latin Fathers of the Christian Church, born at Carthage, the son of a Roman centurion; trained as a rhetorician; was converted to Christianity, became a priest at Carthage, and embraced Montanist views; wrote numerous works, of which the best-known is his *Apology*, a vindication of Christianity against heathenism. His writings are marked by his particularly strict attitude towards worldly show and pleasure. (c. 155-230).

Teruel, mountainous province of E. Spain, in the S. of Aragon. It is watered by the Tagus, Guadalquivir and (Guadaloupe), and is fertile, corn, vines and fruits being grown. Area, 5,720 sq. m. Pop. 253,000. The capital, Teruel, is a cathedral city, of medieval appearance. Heavy fighting took place in its neighbourhood during the Spanish Civil War, the town passing into rebel hands in 1937, and being again occupied by the rebels in 1938 after a short-lived recapture by the Government. Pop. 12,000.

Test, river of Hampshire, England, rising on the Berkshire-Wiltshire border, and flowing into Southampton Water near Totton, after a course of 39 m. It passes Stockbridge and Romsey.

Test Act, an Act of 1673, since repealed, requiring all officials under the Crown to take the oath of allegiance and supremacy; directed equally against Dissenters and Roman Catholics.

Testament, the name given to each of the Bible; also a written statement in which a person expresses his intentions as to the disposal of his property on his decease. See Will.

Tester, a silver coin used in the 16th Century in Scotland and France, and to some extent in England. Originally the English coin was worth a shilling, though it later depreciated in value to sixpence. The name was also given to the wooden canopy or sounding-board over a bed or a pulpit.

TESTER BED

Test Matches, the international cricket matches played from time to time between England, Australia, and South Africa, and between England and New Zealand and England and the West Indies; those played between England and Australia were inaugurated in 1876-1877; England first met South Africa in 1905; in 1913 a triangular contest between these three was held; the West Indies first met England in Test Matches in 1928, and New Zealand followed in 1929. England v. Australia Test Matches up to 1938 totalled 139. England has won 53 (21 in England; 32 in Australia), Australia 55 (39 in Australia; 16 in England); drawn, 31. England v. South Africa Test Matches total 59. England has won 28 (9 in England; 19 in South Africa); South Africa, 12 (1 in England, 11 in South Africa); drawn, 19. Australia v. South Africa Test Matches total 19. Australia won 14 (9 in Australia; 5 in South Africa, 2 in England); South Africa, 1 (in Australia); drawn, 4. An All-India team toured England for the first time in 1936; of the three Test Matches, England won two, the third being a draw. Of the Test Matches with New Zealand in 1937 England won 1 and 2 were drawn.

Testudo, in ancient Roman warfare, a protection for the heads of foot-soldiers against missiles thrown from above from city walls, etc., formed by holding their shields above their heads so that they overlapped. The name is due to the resemblance of the resulting formation to a tortoise, for which *testudo* was the Latin name.

Tetanus, or Lockjaw, a nervous affection intensely painful and persistent cramp of the muscles of the throat and jaws, spreading down to the larger muscles of the body. As the disease progresses the muscles become more and more rigid, while the paroxysms of pain increase in violence and frequency. Death as a rule results from either sheer exhaustion or failure of breath through the spasmodic closure of the glottis. The disease is due to the action of a microbe, which may find an entrance through any wound or abrasion of the skin. Inoculation with anti-tetanic serum, practised on an enormous scale during the World War, has much reduced the terrors of the disease.

Tetrarch, a Roman governor, originally of the fourth part of a province; but in later usage the title was given to various local rulers, especially in Syria and the neighbouring countries, without regard to the extent of their rule. It was most often used of the members of the family of Herod, several of whom are called by that name in the New Testament.

Tetrazzini, Luisa, Italian soprano singer. Born at Florence, she made an early reputation on the Continent, toured South Africa, and made her London debut in 1908, subsequently appearing very frequently in the U.S.A. She published an autobiography, *My Life of Song*, in 1921. (1871-).

Tettenhall, urban district of Staffordshire, England, 2 m. W. of Wolverhampton, of which it is practically a residential suburb. A battle between the Danes and the British took place here. Lord Wrottesley has his seat at Wrottesley Hall, nearby. Pop. 6,000.

Tetuan, a port of Morocco, on the Martil, 4 m. above its entrance into the Mediterranean and 22 m. S. of Ceuta. It is the capital of the Spanish zone, and as such was a centre of activity in the Spanish Civil War of 1936, many African troops being sent thence to the aid of the rebel forces in Spain. It trades in slippers, dried fruits, linseed, etc. Pop. 56,000.

Teutoberger-Wald, range of forested hills in NW. Germany, in Lippe and along the Hanover-Westphalia border. In a battle here the Germans under Arminius or Hermann, the earliest German national hero, defeated the Romans under Varus in A.D. 9, thus preventing the Romanisation of the interior of Germany.

Teutonic Knights, a religious hood which arose during the period of the Crusades, originally for the purpose of tending wounded crusaders; subsequently became military in character, and besides the care of the sick and wounded included among its objects aggressive warfare upon the heathen. Like the Templars, they acquired extensive possessions, and in the 13th Century undertook the conquest and Christianisation of the heathen Prussians, acquiring much territory in the southern Baltic regions. After 1400 the order began to decline, but as a secularized, land-owning community the knight-hood lasted till 1809, when it was entirely suppressed in Germany by Napoleon.

Teutons, an ancient people of unknown habited the Jutland peninsula in the 3rd Century B.C. In alliance with the Cimbri, between 112 and 100 B.C., they devastated Gaul and threatened the Roman republic. The name was later applied to the German people in general, and especially to their language and the tongues allied to it. The Teutonic family of languages includes three main groups: West Germanic (German, Dutch and Flemish, English, Frisian); East Germanic (the now extinct Gothic); and North Germanic (the Scandinavian tongues).

Teviot, river of Scotland; rising in SW. Roxburghshire, it crosses the county to join the Tweed near Kelso. Its valley (about 40 m. long) is known as Teviotdale. There are salmon and trout fisheries.

Tewfik Pasha, Mohammed, khedive of Egypt from the time of his father's abdication in 1879. Arabi Pasha's insurrection, closed at Tel el-Kebir (q.v.), and the Mahdi's rising and capture of Khartum, occurred during his reign, which witnessed Egypt's steadily increasing prosperity under English rule. (1852-1892).

Tewkesbury, a market town of Gloucestershire, England, at the confluence of the Avon and Severn, 10 m. NE. of Gloucester; possesses a magnificent Norman abbey church; trades chiefly in agricultural produce. Half a mile distant is the field of the battle of Tewkesbury (May 4, 1471), where the Yorkists under Edward IV. crushed the Lancastrians. Pop. 4,500.

Texas, the largest of the United States of America, and fifth in population, in the extreme SW., fronts the Gulf of Mexico for 400 m. between Mexico (W.) and Louisiana (E.). Its surface is very varied, exhibiting rich alluvial valleys and pastoral prairies with arid deserts of sand in the S. Climate in the S. is semi-tropical, in the N. colder and drier. Agriculture and stock-raising are the chief occupations, Texas being the leading cattle-raising and cotton State in the Union; there is an enormous output of petroleum and natural gas. It seceded from the republic of Mexico in 1835, and was an independent State till 1845, when it was annexed to the American Union. Austin is the capital; other large towns are Houston, Dallas, San Antonio, Fort Worth, El Paso, and Galveston. Area, 265,900 sq. m. Pop. 5,825,000.

Texel, an island of N. Holland, situated at the entrance to the Zuider Zee and separated from the mainland by a

narrow strait called the Marsdiep, the scene of several memorable naval engagements between the Dutch and English, as in 1653 and 1673; staple industries are sheep and dairy farming. Area, 70 sq. m.

Textiles, a general name for any woven cotton, or mixtures of these materials, silk and linen being more usually excluded from the common use of the word. Textile manufacture is one of the oldest and most important of the world's industries; it was carried on domestically until the invention of spinning and weaving machinery at the end of the 18th Century began the great movement towards industrialisation known as the Industrial Revolution. The development of local textile machine industries in Eastern countries such as India and China, and the consequent drop in the demand for European goods of the class, has been one of the most important factors in the changes in the nature of world trade that have marked the present century.

Thackeray, William Makepeace, English novelist, born in Calcutta, educated at the Charterhouse and at Trinity College, Cambridge; after leaving college without a degree, travelled on the Continent. On his return he turned to literature, contributing to *Punch*, where the well-known *Snob Papers* and *Jeames's Diary* originally appeared, and to various other journals. In 1840 he produced the *Paris Sketch-Book*, his first published work, but it was not till 1847 that the first of his novels, *Vanity Fair*, was issued in parts, followed in 1848 by *Pendennis*, in 1852 by *Emmond*, in 1853 by *The Newcomes*, in 1857 by *The Virginians*, in 1862 by *Philip*, and in 1863 by *Denis Duval*. In 1852 he lectured in the United States on *The English Humourists of the Eighteenth Century*, and in 1855 on *The Four Georges*, while in 1860 he was appointed the first editor of the *Cornhill Magazine*. He was also the author of a number of ballads and rhymes. (1811-1863).

Thaler, a former German silver coin roughly equivalent in value to 3s. It was superseded in 1871 as a monetary unit by the mark, at the rate of 3 marks to the thaler. The name "Dollar" was in its origin a corruption of thaler.

Thales, philosopher of Greece, and one of the seven sages. He was considered by the ancient Greeks as the founder of philosophical speculation, finding the original principle of the universe in water. He flourished about the close of the 7th Century B.C.

Thalia, one of the three Graces (q.v.), as also of the nine Muses (q.v.), her special field being comedy.

Thallium, a metallic chemical element belonging to the same group as boron, aluminium, gallium and indium. Symbol Tl; atomic number 81; atomic weight 204.39. It was discovered in 1861 by Sir William Crookes. Its principal ores are crocoisite and lorandite. Traces are frequently present in iron pyrites. It is a soft, greyish-white metal which quickly tarnishes in moist air; it is used in making alloys resistant to chemical action. Its compounds are employed as preventives of mildew in the textile industry, and also for increasing the light sensitivity of photographic films.

Thame, river of England, rising in the Vale of Aylesbury to join the Thames near Dorchester, after a course of 30 m. The town of Thame (Oxon.) is on its banks.

W. M. THACKERAY

Thames, the most important river of Great Britain, formed by the junction at Lechlade of four head-streams—the Isis, Churn, Coln, and Leach—which spring from the S.E. slope of the Cotswold Hills; winds across the southern midlands eastwards till in a wide estuary it enters the North Sea; forms the boundary-line between several counties, and passes Oxford, Reading, Windsor, Richmond, London, Woolwich, and Gravesend; navigable for barges to Lechlade, and for ocean steamers to Tilbury Docks; tide is felt as far as Teddington, 80 m.; length about 250 m. See **Thames Conservancy**; **Port of London Authority**.

Thames, river of Ontario, Canada, in the Lakes Peninsula. London is on its banks, and Chatham 15 m. from its mouth in Lake St. Clair. Length, 160 m.

Thames Conservancy, the body entrusted with the conservation of the R. Thames between its source and Teddington Lock, from which point the Port of London Authority is in charge of the stream.

Thane, or **Thegn**, in the Anglo-Saxon community a member of a class intermediate between the nobility and the ceorls or tenant farmers. The title was bestowed at first upon those bound to military service who were not nobles by blood, and subsequently was extended to cover the more important and richer members of the ceorl class. After the Norman Conquest the Saxon thane approximated in social position to the Norman knight, and the name was eventually dropped in favour of the latter, being last used in the reign of Henry II.

Thanet, *isle of*, forms the N.E. corner of which it is separated by the Stour. On its shores, washed by the North Sea, stand the popular watering-places Ramsgate, Margate, and Broadstairs. The north-eastern extremity, the North Foreland, is crowned by a lighthouse.

Thanksgiving Day, a public celebration set apart in the United States annually by Presidential decree as a commemoration of divine goodness and thanksgiving for harvest. It is a public holiday, and is celebrated on the last Thursday in November. The celebration is traceable to the early 17th Century.

Theatre, a playhouse; a building, room, booth, etc., devoted to the representation of dramatic spectacles. The East possessed flourishing theatres in antiquity, but the European theatre derives more from the drama of ancient Greece. The Greek theatre, uncovered, consisted of an *orchestra*, in the centre of which was an altar of Dionysus, and the *auditorium*. Slopes making natural amphitheatres were preferred (as at Epidaurus). Probably not until Roman times was the stage raised.

In the Middle Ages liturgical plays were performed originally in the churchyard. When discouraged by the Church, a secular drama arose, acted in the market-places on platforms, and kept alive by amateur players belonging to town guilds assisted by professional strolling-players. In the 16th Century when the scope of the drama increased, professional actors became more prominent. Plays were acted in the courts of inns, the spectators crowding the galleries, but a fixed theatre soon became necessary.

In 1576 John Burbage, under Elizabeth's patronage, built "The Theatre" in Shoreditch. "The Curtain" followed in 1577. By 1588 Southwark became the centre with "The Rose," "The Swan" (1596), and "The Globe" (1598), the latter built by Richard Burbage. The actors formed companies under the patronage of noblemen.

Many theatres were destroyed under Cromwell, but at the Restoration the tradition was revived, the apron stage was introduced, and women appeared on the stage for the first time; Drury Lane Theatre, London, dates from this epoch.

In spite of the spectacular element, the 18th Century was an age of great actors: Cibber, Doggett, Mrs. Oldfield, later Garrick and Macklin, followed by Mrs. Siddons. Their tradition was taken up by Kemble and Kean, and with scenic elaborations, continued down to Henry Irving and Beerbohm Tree. Ibsen's plays encouraged realistic presentation, but with the development of stage machinery and lighting, both spectacular and realistic drama continued to flourish. A later tendency has been towards simplicity, and small intimate theatres with fixed backdrops have become popular. See also **Repertory Theatre**.

Thebaid, a desert in Upper Egypt in the neighbourhood of Thebes; in the early Christian centuries it was a favourite resort of hermits of both sexes, who formed numerous colonies there, one of them, Paul, being looked upon as the founder of the monastic life.

Thebes, an ancient city of Egypt of Upper Egypt; covered 10 sq. m. of the valley of the Nile on both sides of the river, 300 m. S.E. of Cairo; now represented by imposing ruins of temples, palaces, tombs and statues of colossal size, including the Temple of Memnon and the remains of the avenue of Sphinxes leading from Luxor to Karnak, amid which the humble dwellings of four villages—Luxor, Karnak, Medinet Habu, and Kurna—have been raised. The period of its greatest grandeur extended from about 1600 to 1100 B.C., but some of its ruins have been dated as far back as 2500 B.C.

Thebes, capital of the ancient Greek State of Boeotia (*q.v.*), whose site on the slopes of Mount Teumessus, 44 m. N.W. of Athens, is now occupied by the village of Thiva. Its legendary history, embracing the names of Cadmus, Dionysus, Hercules, Oedipus, etc., and authentic struggles with Athens and Sparta during the Peloponnesian War, its rise to supremacy over all Greece, under Epaminondas, and its destruction by Alexander, who sold all its inhabitants into slavery, have all combined to place it amongst the most famous cities of ancient Greece.

Theft, a popular name for the offence known in legal terminology as *larceny (q.v.)*.

Theism, belief in the existence of a God, especially of a transcendent personal God who actively rules over and by his providence manifests himself in the world.

Thellusson Act, a measure passed in 1806, in 1806 to prevent a testator leaving money to accumulate for more than 21 years after his death, consented by a bequest made by Peter Thellusson in 1787 leaving half a million pounds to accumulate at compound interest for two generations. The Act was modified in 1927 to allow money to be left to the state to accumulate and so applied to the redemption of the National Debt.

Themis, in Greek mythology, the goddess of things; was a daughter of Uranus and Gaia, and the spouse of Zeus, through whom she became the mother of the divinities concerned in maintaining order among gods and men.

Themistocles, Athenian general and statesman; rose to political power on the ostracism of Aristides, his rival; persuaded the citizens to form a fleet to secure the command of the sea against Persian invasion; commanded at Salamis, routed the fleet of Xerxes, and afterwards accomplished the fortification of the city in

spite of the opposition of Sparta, but falling in popular favour was ostracised, and took refuge at the court of Artaxerxes of Persia, where he died. (c. 590-459 B.C.).

Theobald's Park. See *Temple Bar*.

Theocracy, government of a State and under the direction as well as the sanction of Heaven. Examples are the Jewish state under the original Mosaic dispensation, the secular authority of the Papal See, and to a certain extent the government set up in 17th-Century England under Cromwell.

Theocritus, pastoral poet of Greece, born in Syracuse; was the creator of bucolic poetry; wrote *Idylls*, descriptive of the life of the common people of Sicily, in a thoroughly objective, though a truly poetical, spirit. His style was imitated by Virgil, over whom he exercised considerable influence. (c. 310-265 B.C.).

Theodicy, name given to an attempt to vindicate the order of the universe consistently with the presence of evil, and especially to that of Leibnitz, in which he attempts to demonstrate that this is the best of all possible worlds.

Theodolite, a surveying instrument for measuring angles. The transit theodolite, now in general use, consists of a telescope on a movable stand, capable of making a complete revolution either horizontally or vertically, and supplied with graduated circles from which measurements can be read off.

Theodora, consort of the Byzantine Emperor Justinian I. (q.v.); before her marriage in 527 she had followed the professions of acting, dancing, and prostitution. After ascending the throne her morality was unquestioned, and she played a great part with her husband in the rule of the Empire, concerning herself especially with Church affairs. (508-548).

Theodore, or *Kassai*, king of Abyssinia. He won his way to the throne by rebellion, but proved a strong and reforming ruler; his imprisonment of a British consul was followed by General Napier's expedition to Magdala, which fell in 1867; Theodore committed suicide when thus defeated. (1818-1867).

Theodore, bishop of Mopsuestia, Biblical critic, born at Antioch. He wrote commentaries on most of the books of the Bible, eschewing the allegorical method of interpretation, and accepting the literal sense. He held Nestorian views, and his writings were anathematized by Justinian a century after his death. d. about 428.

Theodore, Church historian, born at Antioch. As bishop of the Syrian city of Cyrus he attempted the conversion of the Maronites. He took an active part in the Nestorian and Eutychian controversies, and was deposed by the so-called robber-council of Ephesus, but was reinstated by the Council of Chalcedon in 451. (c. 390-457).

Theodoric, surnamed the Great, founder of the monarchy of the Ostro- or East Goths, son of Theodemir, the Ostrogothic king of Pannonia; was for 10 years during his youth a hostage at the Byzantine Court at Constantinople; succeeded his father in 475, and immediately adopted a policy of expansion; in 493 advanced upon Italy, overthrew Odoacer, and after his murder became sole ruler, and the most powerful of the Gothic kings, with an empire embracing Italy, Sicily, and Dalmatia, besides German possessions; became in after years, as "Dieterich of Bern," one of the great heroes of German legend, and figures in the *Nibelungenlied*. (453-526).

Theodosius I., The Great, Eastern Roman emperor, born in Spain, son of the noted general of the same name, in whose campaigns in Britain and elsewhere he participated. In 379 he was invited by the Emperor Gratian to become emperor in the East, that he might stem the advancing Goths. In this Theodosius was successful; the Goths were defeated, had territory conceded to them, and many became Roman citizens. In 394 he became sole head of the empire, after successfully combating the revolutionaries, Franks, and others. He was a zealous Churchman, and stern suppressor of Arianism. He is remembered among other things for the rebuke administered to him by St. Ambrose in consequence of a massacre of the citizens at Thessalonica which he ordered in consequence of a riot there in 390. (346-395).

Theology, the science which treats of the facts and phenomena of religion, and the relations of man to God. Natural theology is concerned with what may be learnt of these relations by observation and reason; revealed theology with the teachings and deductions based upon supernatural revelation. The subject of moral theology is the relation between ethics or conduct and religion; pastoral theology deals with the duties of the religious teacher or priest and his relations with his flock. Other divisions of the science are speculative and dogmatic theology. Theology is not, of course, an exact science, as its material differs according to the particular religion with which it is concerned.

Theophrastus, Greek philosopher, and successor of Aristotle, and inheritor of his library. His writings were numerous, but only a few are extant, including treatises on plants, stones, and fire, and the popular *Characters*. (c. 370-287 B.C.).

Theorem, in mathematics, a universal proposition capable of proof by pure reasoning, and not merely by induction. In the synthetical method employed in geometry, the principle to be proved is stated before the demonstration is begun; the latter then proceeds by regular argument to a final conclusion confirming the principle originally enunciated.

Theosophy, a mystical philosophico-religious system taught by the Theosophical Society, an organisation founded in New York in 1875 by Madame Helena P. Blavatsky and others; the headquarters were moved four years later to Adyar, near Madras, India, where they still remain. The system is largely based on Buddhist teaching, with indications from other eastern sources; like Buddhism it teaches the doctrine of Karma and rebirth. It claims to incorporate the truths common to all religious systems, and emphasises universal brotherhood and the importance of the spiritual world. The founder was succeeded by Annie Besant (q.v.), who claimed to have discovered a new world teacher in the person of a young Hindu, J. Krishnamurti (q.v.). The society has lost some of its influence through secessions, a group of its former members, claiming that its present teaching is not in accordance with its original system, having broken away.

Theotocopuli, Domenico, called *El Greco*, Cretan painter, resident in Spain. He studied at Venice under Titian, and was much influenced by *Timoteo*. He settled in Toledo c. 1577, and his masterpiece is the "Burial of the Conde de Orgaz," at the church of Santo Thome, in that city. A "St. Jerome" and replica of "Christ on the Mount of Olives" are in the National Gallery, London. (c. 1547-1614).

Therapeutics, in its widest sense the of healing and treating disease; it is generally restricted in practice to the study of drugs and other remedies. Modern medical practice has added several new branches to the art, including thermotherapy, or treatment by heat; ray therapy; electrotherapy; and dietetic therapy, or the study of the values of foods in relation to disease.

Therm, a unit of heat measurement equivalent to 100,000 British Thermal Units; the latter being the quantity of heat required to raise the temperature of 1 lb. of pure water 1° F.

Thermae, the buildings erected in throughout the Roman empire for use as baths; the typical thermal establishment included a tepidarium, or warm room where the bather spent some time before undressing; the apodyterium, or dressing room; and the frigidarium and caldarium, or cold and warm bathing compartments respectively.

Thermidor, the eleventh month of the French republican calendar, covering the latter part of July and the earlier of August. The 9th of Thermidor of the year 2 (July 27, 1794) is remembered as the date of Robespierre's fall.

Thermionic Valve, a valve consisting of a vacuum tube containing two or more electrodes, in which electrons emitted from a heated cathode are attracted to the anode, the thermionic current being able to flow in one direction only. It is of fundamental importance in wireless engineering.

Thermite, a mixture of iron oxide with magnesium ribbon, the mass becomes incandescent and a residue of aluminum oxide with metallic iron is left. It is used for welding iron rails, etc., *in situ*, and in incendiary bombs.

Thermochemistry, that branch of chemistry which deals with the heat changes taking place in chemical reactions. In most chemical changes heat is evolved, and such changes are described as exothermic. More seldom encountered are endothermic changes, in which heat is absorbed. Typical exothermic reactions are the combustion of fuels, while among endothermic reactions may be mentioned the formation of water-gas (q.v.), by the passage of steam over white-hot coke. Its principal law states that the total amount of heat evolved or absorbed in a chemical reaction is in no way affected by the course of the reaction, but depends entirely upon the weight and nature of the original reactants and the final products.

Thermodynamics, the science of the relations between energy, or work, and heat. It has been developed as an elaboration of two laws known as the first and second laws of thermodynamics. The first law is merely a statement of the fact that, when heat is converted into mechanical energy, or the reverse, the total quantity remains unchanged. The second law may be stated as follows: "It is impossible for any self-acting machine, unaided by any external agency, to convey heat from one body to another at a higher temperature." One consequence of the second law is that, although the total amount of energy remains always the same, less and less of it becomes available to our use, since in all natural processes energy of other kinds is being converted into heat energy. This heat energy merely raises the temperature of the surroundings, and cannot then be used again. James Prescott Joule (q.v.) was the first to make quantitative experiments regarding heat.

Thermograph, an instrument consisting of a thermometer whose rise and fall operates a pen which records the movement on a revolving paper drum. It is used to register temperature movements for meteorological purposes.

Thermometer, an instrument for comparing the temperature or "hotness" of one object with that of another. The commonest form consists of a capillary glass tube with a bulb at the lower end and sealed at the top; the bulb and part of the tube are filled with mercury, the rest of the tube being a vacuum. If the temperature rises, the mercury expands and rises up the capillary, while if the temperature falls the mercury contracts and reaches only to a lower level in the tube.

Two main scales of measurement are in use, the Fahrenheit scale, generally used in England for non-scientific purposes, on which the melting-point of ice is called 32°, and the boiling-point of water is called 212°, so that there are 180 Fahrenheit degrees between the two; the Centigrade or Celsius scale, employed on the Continent, and universally adopted in scientific work, on which the melting-point of ice is taken as 0° and the boiling-point of water as 100°. To convert temperatures Fahrenheit into temperatures Centigrade, therefore, it is necessary to subtract 32 and multiply by five-ninths. In certain countries, such as Norway and Sweden, the Réaumur scale is in use; on it the melting-point of ice is 0° and the boiling-point of water is 80°.

Thermopile, a delicate electrical instrument for detecting and measuring small quantities of radiant heat.

Thermopylae (i.e., "the hot gates"), a pass in N. Greece, the only traversable one leading southward into Thessaly, lies 25 m. N. of Delphi, and is flanked on one side by Mt. Ceta, and on the other by the Gulf of Zeïtouni; memorable as the scene of Leonidas's heroic attempt with his 300 Spartans to stem the advancing Persian hordes under Xerxes (480 B.C.); also of Greece's futile struggles against Brennus and the Gauls (279 B.C.), and Philip the Macedonian (207 B.C.).

Thermostat, an instrument for the automatic regulation of temperature. It consists typically of a piece of metal whose expansion or contraction on applying heat or cold cuts off or turns on a supply of electricity, gas, air, hot or cold water, and so on. It is applied in the construction of self-regulating refrigerators, gas-cookers, geysers, and similar apparatus.

Theseus, legendary Greek hero of Attica, and son of Ægeus, king of Athens; captured the Marathonian bull, and slew the Minotaur (q.v.) by the help of Ariadne (q.v.); waged war against the Amazons, and carried off the queen; assisted at the Argonautic expedition, and is famed for his friendship for Perithous, whom he aided against the Centaurs.

Thespis, an Athenian Greek of the 6th Century B.C., supposed to have been the inventor both of tragedy and of the tragic mask as worn by Greek actors.

Thessalonians, Epistles to the, two to the Church at Thessalonica; the first written from Corinth about A.D. 53 to exhort them to beware of lapsing, and comforting them with the hope of the return of the Lord to judgment; the second, within a few months of the first, dealing with the date of Christ's second coming. The former is generally

admitted to be genuinely Pauline; modern critics tend strongly to doubt the authenticity of the second.

Thessaloniki, modern name of the better known as Salonika (q.v.).

Thessaly, Greece, a wide, fertile plain stretching southward from the Macedonian border to the Malac Gulf, and entirely surrounded by mountains save the Vale of Tempe in the N.E. between Mts. Ossa and Olympus; was conquered by Philip of Macedon in the 4th Century B.C., and subsequently incorporated in the Roman Empire, on the break up of which it fell into the hands of the Venetians, and eventually of the Turks (1835), and remained a portion of the Ottoman Empire till 88, when the greater and most fertile part was ceded to Greece, the remainder following in 1919. Modern Thessaly is divided into the two depts. of Larissa and Trikkala, with chief towns of the same names respectively. Area, 5,150 sq. m. Pop. 493,200.

Thetford, market town in Norfolk, England, on the Suffolk border, at the confluence of the Thet and Little Ouse, 31 m. SW. of Norwich. It was the capital of the old East Anglian Kingdom, and a bishop's see before the cathedral was removed to Norwich. Brewing and tanning are carried on. Pop. 4,100.

Thetis, in Greek mythology, the daughter of Nereus and Doris, who being married against her will to Peleus, became the mother of Achilles. She shared with Proteus the power of changing her shape at will.

Thiepval, a village in the dept. of Somme, France, where there was much fighting in the World War during the battle of the Somme; a memorial has been erected to the troops from Ulster, who played a prominent part in it.

Thiers, Louis Adolphe, French statesman and historian, born at Marseilles; studied law at Aix, but turned to journalism, and published in 1827 his *History of the French Revolution*, which established his rank as a writer; took part in the July revolution; in 1832 was elected a deputy for Aix, supporting Louis Philippe; obtained a post in the ministry, and eventually led it; was swept out of office at the revolution of 1848; voted for the presidency of Louis Napoleon, but opposed the *coup d'état*; published in 1860 the *History of the Consulate and the Empire*, a labour of years; entered public life again, but soon retired; at the close of the Franco-Prussian War was responsible for the raising of the indemnity to Prussia; became head of the Provisional Government, and President of the Republic from 1871 to 1873. (1797-1877).

Thing, or Ting, name for a legislative or judicial assembly among the Scandinavians, as in the Danish Landsting (the Lower House), the Norwegian Storting, and the Swedish Landsting or provincial councils.

Third Degree, popular term for the violent means used by the police in America and elsewhere in examining accused persons. The methods adopted are supposed to include prolonged questioning for several hours at a time, deprivation of sleep, statements that other accused persons have confessed and betrayed the examinee, and so forth.

Third International. See International.

Third Party Insurance, a method of indemnification against claims for damages by third parties for injury to themselves or their property. Third-party insurance was made compulsory for drivers of

motor-driven vehicles by the Road Traffic Act of 1936.

Third Republic, the republican government set up in France in 1871 on the fall of the Second Empire, and still in existence. The first French republic was established by the National Convention in 1793, and fell when Napoleon made himself emperor in 1804; the second was instituted in 1848 when Louis Philippe abdicated, and ceased with the institution of the Empire of Napoleon III. in 1852.

Thirlmere, one of the lakes in the Cumberland, 5 m. S.E. of Keswick; since 1885 it has been embanked and enlarged as the source of Manchester's water supply. The water is conveyed to the city by a 105 m. aqueduct.

Thirty-nine Articles, The first drawn up in 1562, state the doctrinal basis of the Church of England. They are appended to the Book of Common Prayer, and all candidates for ordination have to subscribe to them, as does any priest taking a new benefice.

Thirty Years' War, a series of wars arising out of one another in Germany during 1618-1648; at first a quarrel between the Catholic and Protestant states, it developed into a struggle for supremacy in Europe between France and the Hapsburg Empire. It originated in Bohemia, where the Protestants in revolt against the Empire, and aided by Moravians and Hungarians, were suppressed; in 1624 the war was renewed, and Denmark, which had espoused the Protestant cause, was routed; in the third phase, beginning in 1630, the early Swedish successes were not continued, and the Hapsburgs were the gainers. In 1636 the war burst into flame again, but in 1648, when French armies were converging upon Austria, diplomacy brought the war to an end by the Peace of Westphalia, the chief gains of which were the securing of religious tolerance and the recognition of the independence of Switzerland and the United Provinces.

Thisbe. See Pyramus.

Thistle, a general name for various composite plants of the family Cynaraceae, especially of the genera *Carduus* and *Cnicus*, with prickly stems; the Scottish national emblem is the Scotch or cotton thistle, *Onopordon Acanthium*.

Other common species are the lady's thistle (*Carduus marianus*), sow thistle (*Sonchus oleraceus*) and blessed thistle (*Cnicus benedictus*), the last used in medicine as a laxative and tonic. The readiness with which they scatter their seed makes many thistles serious pests to the agriculturist.

Thistlewood. Arthur. See Cato Street Conspiracy.

Thomas, Albert, French statesman, of reformist Socialist views; he was assistant editor of *L'Humanité* from 1904, and entered the Chamber in 1910. In 1916 he became Minister of Munitions, and visited Russia the following year to confer with Kerensky on behalf of the Allies. In 1919 he became Director of the International Labour Office at Geneva. (1878-1932).

Thomas, Ambroise, French musical composer, born at Metz; after a brilliant career of study at the Paris Conservatoire, became professor of Composi-

SCOTCH THISTLE
(*Onopordon Acanthium*)

tion in 1852, and nine years later succeeded Auber as director; a prolific writer in all forms of musical composition, but has won celebrity mainly as a writer of operas, the most popular of which are *La Double Echelle*, *Mignon*, and *Hamlet*; was decorated with the Grand Cross of the Legion of Honour in 1880. (1811-1896).

Thomas, Bertram Sidney, British explorer and orientalist; a civil servant from 1908; he served in the World War in Belgium and Iraq; going to the East he was Wazir and Finance Minister in Muscat and Oman from 1925 to 1930. He crossed the Rub 'al Khali desert in Arabia in 1930-1931, and wrote thereafter books on his experiences. (1892-).

Thomas, James Henry, British politician. He started work when 9 years old, became an engine-driver, and then turned trade union organizer; in 1910 he became President of the National Union of Railwaymen, and was elected Labour M.P. for Derby. He was made a Privy Councillor in 1917, and the same year he was sent on an official mission to the U.S.A. He achieved considerable popularity with industrialists at the price of the enmity of the extreme section of his own party. In 1924 he took office in the Labour government as Colonial Secretary, and in 1929 was again in office as Lord Privy Seal, having special charge of the unemployment problem. He became Secretary of State for Dominion Affairs in 1930, and in 1931 followed J. R. Macdonald (q.v.) into the National Government, resigning his post as Secretary to the National Union of Railwaymen, which body deprived him of his pension rights. In 1935, after the report of a committee appointed to enquire into an alleged leakage of Budget secrets, he resigned from the Cabinet and from Parliament. (1875-).

Thomas, St., the Apostle, is reputed to have preached Christianity in the East, finally settling on the Malabar coast of India, where the old-established Christian church claims descent from him; modern research suggests that the tradition may have some historical foundation. He is represented in art as bearing a spear in his hand, and sometimes an arrow, a book, and a carpenter's square.

Thomas the Rhymer.

See *Rhymer, Thomas the*.

Thomism, the doctrine of Thomas Aquinas (q.v.), particularly in reference to predestination and grace; his followers were called Thomists as opposed to the Scotists who followed Duns Scotus. The revived scholastic philosophy of the present century is sometimes known as Neo-Thomism.

Thompson, Francis, British poet. Trained for the Roman Catholic priesthood, he turned from his studies to medicine, but relinquished it and lived in obscurity for some years until his first volume, *Poems*, was issued in 1893, after he had come to London. His reputation, enhanced by his later volumes, *Sister Songs* and *New Poems*, has much increased since his death from tuberculosis accelerated by the opium-smoking of his early years. (1859-1907).

Thomson, James, British poet, born at Ednam, Roxburghshire; educated and trained for the ministry at Edinburgh University, but went to London in 1795 to push his fortune. His poem, *Winter*, published in the following year, had immediate success. It was followed by the rest of the *Seasons*, and some indifferent plays. The *Masque of Alfred*, with its popular song *Rule Britannia* (1748) was the outcome of his later years of leisure. (1700-1748).

Thomson, James, British poet, generally known as B.V., the initials under which his works were issued, to distinguish him from his namesake; born at Port Glasgow, and brought up in an orphanage; was introduced to literature by Bradlaugh, to whose *National Reformer* he contributed much of his best poetry, including his gloomy yet sonorous and impressive *The City of Dreadful Night*, besides essays. (1834-1882).

Thomson, Sir John Arthur, British biologist, born in Haddingtonshire, lecturer on Zoology at Edinburgh, and professor of Natural History at Aberdeen; among his books are *Outlines of Zoology*, *What is Man?* and many other popular scientific treatises. He was knighted in 1930. (1860-1933).

Thomson, Sir Joseph John, British physicist, scientist; Cavendish professor at Cambridge, 1884-1919, and afterwards Master of Trinity College and professor of Physics. His greatest work was done on the conduction of electricity through gases and the structure of the atom. He carried out experiments to determine the charge and mass of the electron, and devised a method for the analysis of positive rays; received a Nobel prize for physics in 1906, and was President of the Royal Society from 1916 to 1930; O.M., 1912. (1856-).

Thomson, Sir William, Lord Kelvin. See *Kelvin*.

Thomson of Cardington,

Christopher Birdwood Thomson, first Baron, British soldier and Labour statesman. He served as military attaché in Rumania, 1915-1916, and in 1918-1919 was a member of the Supreme War Council. He received a peerage in 1924, when he was made Secretary for Air; an office he again held from 1929 until his death in the conflagration of the airship *R101* near Beauvais, France. (1875-1930).

Thor, or **Thunar**, in Norse mythology, the god of thunder, agriculture and war, the son of Odin (q.v.) and the enemy of the giants, whom he attacked and destroyed with his magic hammer. Thursday takes its name from him. The thunder was his wrath, the fire-bolt from heaven his all-rending hammer. He was the strongest of gods and foe of the chaotic powers.

Thorax. See *Chest*.

Thoreau, Henry David, American author, born at Concord, where his life was mostly spent. The serious occupation of his life was to study nature in the woods around Concord, making daily journal entries of his observations and reflections. His chief works are *Walden*, the account of a two years' sojourn in a hut built by his own hands in the Concord Woods near "Walden Pool," *A Week on the Concord and Merrimack River*, essays, poems, etc. (1817-1862).

Thorium, a metallic chemical element belonging to the same group as titanium, zirconium and hafnium. Symbol Th; atomic number 90; atomic weight 232.13; is mainly extracted from the monazite sand of Brazil and India. It is a silvery white, radioactive metal; its chief compound is thorium oxide, which is the main constituent of gas mantles and is also mixed in small quantity with tungsten to form electric light filaments.

Thorn (*Torun*), Polish town on the Vistula, 115 m. NW. of Warsaw; formerly a member of the Hanseatic League (q.v.); was annexed by Prussia in 1815, and became Polish again in 1919; the birthplace of Copernicus; carries on a brisk trade in corn and timber; it is a fortress and the centre of a military district. Pop. 54,000.

Thorn, in botany, a projection on a plant, an outgrowth of a varying nature according to the plant it is on, being in some cases an epidermal structure, in some cases a specialized branch growth, in some cases a specialized leaf growth, a petiole, root, stipule, etc. The name thorn is also applied to many thorn-bearing plants, especially to those of the genus *Crataegus* of the natural order Rosaceae, in which the thorns are modified branches, and which includes the British

THORN

- A. Honey Locust
B. Blackthorn
C. Blackberry
D. Rose

Thornaby-on-Tees, a borough of Yorkshire, England, in the N. Riding, on the Tees, opposite Stockton. It has iron-foundries, and there are also ship-building yards, engineering works, etc. Pop. 21,200.

Thorndyke, Dame Sybil, British actress, born at Gainsborough, took to the stage at 18, and started by touring America. Later she played at the "Old Vic," London, and built up a reputation as a tragedienne, which reached its height in 1923 with her rendering of Shaw's *Saint Joan*. Although her reputation was made in Shakespearean and Greek tragedy, her versatility is shown by her successful impersonations in comedy. In 1908 she married Lewis Casson, the actor, and was made D.B.E. in 1931. (1885-)

Thorne, market town of Yorkshire, England, in the W. Riding, 10 m. NE. of Doncaster. Barge-building and rope-making are carried on, and peat moss is obtained nearby. Pop. 31,200.

Thorne, Will, British Labour politician, born at Birmingham; he began work in a barber's shop at the age of six. He helped to found the National Union of General and Municipal Workers, 1889, and was its General Secretary, 1889-1934. He has been a member of the Parliamentary Committee of the Trades Union Congress since 1894, and Member of Parliament for West Ham since 1906; member of the West Ham Council since 1890; Mayor of West Ham, 1917-1918; C.B.E., 1930. Wrote *My Life's Battles*, 1925. (1857-)

Thornycroft, Sir John Isaac, British naval architect; born in Rome; son of Thomas Thornycroft, sculptor, and brother of Sir William Hamo Thornycroft. From 1866 he built torpedo boats at Chiswick, constructing them for the British navy from 1877. Removed yard to Woolston, Southampton, 1906. (1843-1928).

Thornycroft, Sir William Hamo, English sculptor, born in London. Among his works were statues of General Gordon (1885), John Bright (1892), and Oliver Cromwell (1899). (1850-1925).

Thorwaldsen, Bertel, Danish sculptor, born near Copenhagen, the son of a poor icelander; studied in Rome, where he learnt to admire the Greek sculptors. Canova encouraged him, and a fine statue of Jason established his reputation; his life henceforth was one of increasing fame and prosperity. Most of his life was passed in Italy. Among his works are many classical subjects, and a colossal group of "Christ and the Twelve Apostles," "St. John Preaching in the Wilderness," and other religious subjects, besides statues of Copernicus and Galileo, and the celebrated reliefs "Night" and "Morning"; bequeathed to his country many of his works, now in the Thorwaldsen Museum. (1770-1844).

Thoth, a god of the ancient Egyptians, roughly corresponding to the Greek Hermes, and inventor of arts and sciences; usually represented as having the body of a man and the head of an ibis or of a dog.

Thothmes, name of four kings of Egypt, of the 18th dynasty, of whom Thothmes I. subdued southern Egypt and campaigned to the Euphrates (reigned c. 1540-1503 B.C.); his son-in-law, Thothmes II., reigned c. 1503-1500 B.C., and was succeeded by Thothmes III., who subdued Syria, which had revolted, and earned fame as a builder, reigning c. 1500-1446 B.C. Thothmes IV., who succeeded Amenophis II., reigned c. 1420-1400 B.C.

THOTHMES III.

Thrace, a region in S.E. Europe, to the E. of the It. Maritima, now divided between Greece, Turkey, and Bulgaria. The name was used by the Greeks, who considered the country's then inhabitants as barbarians. It later became a Roman province. The country is mainly hilly; the vine and tobacco are grown, and there is some cattle-grazing.

Thread, a cord made of several fine threads is a two-ply twist, thicker or stronger threads being made by twisting together two, three or more two-ply threads.

Threats, in law, may, if serious, amount to felonies punishable by penal servitude, or may, if less serious, give ground for application to a court of summary jurisdiction for the guilty person to be bound over to keep the peace. Contracts entered into as a result of unlawful threats may be rendered unenforceable. But threats are not necessarily unlawful in themselves, if they merely amount to declarations of intention to invoke a legal remedy or to follow a course of action which is in itself lawful.

Three Rivers (*Trois Rivières*), city of Quebec, Canada, 95 m. NE. of Montreal; does a considerable trade in lumber, ironware, etc. Pop. 40,000.

Threshing. See *Winnowing*.

Throat, the cavity at the back of the palate, though the word is applied loosely to the larynx (q.v.). The throat or pharynx is the cavity into which the nose, mouth, gullet and larynx all open. Diseases of the throat include laryngitis (q.v.), and pharyngitis, which is generally connected with disturbances of the digestive organs, and also may be due to excessive spirit drinking. What is called "sore throat" is generally a symptom of some more serious complaint, though it may be a mere local inflammation of the tonsils.

Thrombosis, the formation of a blood clot in a vein or artery at a fixed spot. It is generally due to an injury to the lining of the vessel consequent upon inflammation, but a clot may also occur through cancer or anemia. If it occurs in the cerebral vessels, apoplexy is likely to result. The clot is known as a thrombus, and when a thrombus or a part of a thrombus becomes detached in the blood stream the condition known as embolism (q.v.) arises.

Throne, an ornamental chair of state used by a secular ruler or by the Pope; also the official seat of a bishop in his cathedral church. The British throne, King Edward's (the Confessor's) chair in Westminster Abbey, has been constantly used at coronations since Anglo-Saxon times.

Under it is the famous reddish or purplish stone brought from Soone, Scotland, by Edward I. in 1296, on which Scottish kings were crowned.

Thrush, a family (Turdidae) of song birds, with numerous species found in all parts of the world. There are nine sub-families, including the True Thrushes (Turdine), the Redstarts (Ruticollinae) and the Chats (Saxicolinae). The True Thrushes include such familiar British species as the Blackbird, Ring-Ouzel, Fieldfare, Hedge-Sparrow, the Mistle-Thrush (*Turdus viscivorus*), the largest of the British species, and the Common or Song-Thrush (*Turdus musicus*), one of the sweetest and earliest of British songsters, of brown colouring above, whitish-grey below. The Ruticollina sub-family includes, besides the Redstarts, the Common Nightingale. For the various species mentioned see individual species.

Thrush, an inflammatory disease affecting mouth, tongue, and the corners of the lips, occurring in sickly children. It is characterized by white patches on the mucous membrane of the mouth and tongue, and is due to a parasitic fungus or mould.

Thucydides, Greek historian of the Peloponnesian War, born in Athens of a wealthy family; was in Athens during the plague of 430 B.C., fell a victim, but recovered; served as naval commander in 424 in the Peloponnesian War, but for neglect of duty was banished; returned from exile 20 years after. His great achievement is his history, derived from personal observations and oral communication, the materials of which were collected during the war; it was left unfinished at his death, eight books having then been completed, and is recognized as one of the most important historical monuments of the classic world. (c. 471 B.C.-411 B.C.).

Thugs, a Hindu secret society composed of worshippers of the goddess Kali, the wife of Shiva, who, to propitiate her, practised murder, and lived on the spoils of the victims; they were suppressed after 1830. Their method of disposing of their victims by poison or strangling was called Thuggee.

Thulium, a metallic chemical element rare earths (q.v.). Symbol Tm, atomic number 69; atomic weight 168.4. It has no industrial importance.

Thumbscrew, an old steel instrument of torture, which gradually compressed the thumb until the joint was broken. It was popular with Inquisitioners, and with the opponents of the Covenant in Scotland, where it remained in use until 1690.

Thunderstorms, storms caused by violent changes in the electrical condition of the earth and a cloud, or of two clouds, and of the air between them. When a cloud charged with positive electricity floats near the earth, the negative electricity of the earth pulls upon it; if the tension becomes strong enough the resistance breaks down and rapid electrical oscillations take place between them, thus producing lightning (q.v.). The heated particles of matter in the air soon lose their heat, and the air rushes back to fill the vacuum caused by its expansion. This meeting from all sides with great force, produces a sharp clap, and the reverberation of the peal or thunder-roll arises chiefly from the echoes produced by the reflection of the sound from objects on the earth, or from the clouds themselves. Thunderstorms are most frequent and violent in tropical regions. They often occur entirely within the atmosphere, when differently charged clouds approach and discharge.

Thurgau, a ^{canton} of Switzerland, on the N.E. frontier, where Lake Constance for a considerable distance forms its boundary; inhabitants are mainly German-speaking and Protestant; country is hilly but not mountainous, fertile, and traversed by the R. Thur, a tributary of the Rhine; fruit-growing is largely pursued; capital Frauenfeld. Area, 390 sq. m. Pop. 138,000.

Thurible, a vessel to contain incense, hung on chains and capable of being swung to and fro in the hand. It is used in religious services in the Roman Catholic and other churches.

Thuringia (Thuringen), a German Reich, constituted in 1919 by the merging of eight former small states in the Thuringian district, N. of Bavaria and W. of Saxony; it is largely under forest, industry being mainly agricultural. Capital, Weimar. Area, THURIBLE 4,540 sq. m. Pop. 1,680,000.

Thurles, a town of Tipperary, Eire (Ireland), on the Suir, 87 in. SW. of Dublin. Sugar is manufactured. In the vicinity are the fine ruins of Holy Cross Abbey. Pop. c. 5,000.

Thurlow, Edward, Baron, British lawyer and politician, born at Bracon-Ash, Norfolk; called to the bar in 1754; entered Parliament in 1766; became a favourite of George III., and rose through the offices of Solicitor-General and Attorney-General to the Lord Chancellorship in 1778, being raised to the peerage as Baron; lost his position during the Coalition Ministry of Fox and North, but was restored by Pitt, who, however, got rid of him in 1792, after which he seldom appeared in public. (1731-1806).

Thursday, fifth day of the week, named Thor (q.v.), from the Scandinavian god

Thursday Island, a small island in Torres Strait, N. of Australia, belonging to Queensland; has a fine harbour, Port Kennedy, and is the centre of valuable pearl fisheries. Pop. 1,050.

Thurso, a seaport in Caithness, Scotland, at the mouth of the Thurso R., 21 m. NW. of Wick; does a brisk trade in agricultural produce, cattle, and paving stones. Pop. 2,950.

Thurston, Ernest Temple, English novelist and playwright, born at Halesworth. His *Apple of Eden* was written at the age of 18, but not published till 1905. His best-known story is *Sally Bishop*, 1908. *John Chilcote*, M.P., was a play founded on a novel written by his first wife. (1879-1933).

Thyme (*Thymus*), a genus of small-leaved labiate evergreen shrubs bearing

red, white or heliotrope flowers, the two most important species being *Thymus vulgaris* (garden thyme) cultivated for its aromatic odour, and for the essential. Oil of Thyme extracted from it for use as a kitchen flavouring, and Wild Thyme (*Thymus serpyllum*), a common British-wild hill-plant.

WILD THYME

Thymol, a white crystalline solid found in Oil of Thyme, though it is now prepared synthetically. It has a pleasant thyme-like odour and is a moderately powerful antiseptic. For the last purpose, it is made up into an aqueous solution with glycerine and a colouring matter ("glycerine of thymol").

Thymus Gland, a ductless gland situated in the lower part of the neck, which is largest during the first and second years of life, thereafter diminishing until in the adult it has almost disappeared.

Thyroid Gland, a ductless gland at the larynx, consisting of two lobes, producing a secretion called thyroxin, which plays an important part in the growth of the body and the development of the sympathetic nervous system. It is subject to goitre, a condition of abnormal enlargement, and to myxoedema, a disease consequent on its degeneration or failure to function. The condition known as cretinism (q.v.) is also due to unsatisfactory thyroid functioning.

Thyrsus, in Greek religion, an attribute of Dionysus, being a staff or spear entwined with ivy leaves and bearing a cone at the top; carried by the devotees of the god on festive occasions; the cone was presumed to cover the spear point, a wound from which was said to cause madness.

Tiara, the triple crown worn by the authority. It consists of a cap of cloth of gold encircled by three coronets. The name is also given to a jewelled circlet or headdress worn by women as an ornament.

Tiber, the main river of Central Italy, celebrated in ancient Roman history, rises in the Apennines, in the province of Arezzo, Tuscany; rapid and turbid in its upper course, but navigable 100 m. upwards from its mouth; flows generally in a S. direction, and after a course of about 260 m. enters the Mediterranean about 15 m. below Rome.

Tiberias (Tibariyah), a town of Palestine on the W. shore of the Sea of Galilee, lying 680 ft. below the sea level; founded by Herod Antipas in honour of the Emperor Tiberius, whence its name. In the 2nd-4th Centuries it was the headquarters of the Jewish remnant in Palestine and still continues, as of old, to be a favourite place of Talmudic study. Somewhat to the S. are medicinal springs or hot baths. Pop. 9,700.

Tiberius **Claudius Nero**, second Roman emperor, born at Rome; was of the Claudian family; became the stepson of Augustus, who, when he was five years old, had married his mother; was himself married to Agrippina, daughter of Agrippa, but was compelled to divorce her and marry Augustus's daughter Julia, by whom he had two sons, on the death of whom he was adopted as the emperor's successor. After various military services in various parts of the empire, he succeeded Augustus in A.D. 14. His reign was notable for some progressive measures, but was distinguished by acts of cruelty; especially his execution of his minister Sejanus. Given up to debauchery, he was suffocated in a fainting fit by the captain of the Praetorian Guards in A.D. 37, and succeeded by Caligula. (42 B.C.-A.D. 37).

Tibet, a country of Central Asia, nominally a dependency of China, but in effect an independent state under British patronage; comprises a wide expanse of tableland, most of it over 10,000 ft. in height, subject to great extremes of temperature, but during most of the year intensely cold; enclosed by the lofty ranges of the Himalaya and Kuen-Lun Mts., it was practically unvisited by Europeans between the Middle Ages and the 20th Century, but since 1900 has been partially explored; possesses considerable gold and other mineral wealth, and a foreign trade is carried on in woollen cloth (chief article of manufacture); the sheep, yak, and buffalo are bred. Polyandry is prevalent among the people, who are a Mongolian race of fine physique, fond of music and dancing, nearly one-quarter of them priests or monks.

A variation of Mongol Shamanism known as Bon has mingled with Mahayana Buddhism to produce Lamalism, the distinctive religion of the country, and the supreme secular authority is vested in the Dalai Lama, reputed to be a reincarnation of the Buddha, who resides at Lhasa, the capital. Area, 463,000 sq. m. Pop. uncertain, but probably between one and two millions.

Tibia, or **Shinbone**, the inner and usually larger of the two bones of the lower leg, extending from the knee to the ankle. The thigh-bone or femur is united to its larger upper end at the knee joint, while its lower end forms part of the ankle joint.

Tichborne, an estate in Hampshire, England, which, became notorious in the 'seventies through a butcher, from Wagga Wagga, in Australia, named Thomas Castro, otherwise Thomas Orton, laying claim to it in 1866 on the death of Sir Alfred Joseph Tichborne. The "Claimant" represented himself as an elder brother of the deceased baronet, supposed to have perished at sea. The imposture was exposed after a lengthy trial ending in March, 1872, and a subsequent trial for perjury resulted in a sentence of 14 years' penal servitude. Orton, after his release, confessed his imposture in 1895.

Ticino (Tessin), the most southerly canton of Switzerland, lies on the Italian frontier; slopes down from the Lepontine Alps in the N. to fertile cultivated plains in the S., which grow olives, vines, figs, etc. The inhabitants speak Italian, and the canton, from the mildness of its climate and richness of its soil, has been called the "Italian Switzerland." It embraces most of Lakes Lugano and Maggiore, and is traversed by the St. Gothard Railway. The capital is Bellinzona; other towns, Locarno and Lugano. Area, 1,090 sq. m. Pop. 159,000.

Ticino, a river of Switzerland and N. Italy; springs from the S. side of Mount St. Gothard, flows southwards through Lake Maggiore and S.E. through N. Italy, joining the Po 4 m. below Pavia, after a course of 120 m.

Ticks, tiny parasitic animals of the family Ixodidae in the order Acari (which includes the mites (q.v.) also) of the class Arachnida. There are many species, all possessed of a piercing or sucking organ by which they attach themselves to the skin of mammals, birds and reptiles. Some of them are disease-carriers.

Tide, the rise and fall of the ocean, occurring usually twice each lunar day, due to the inequality of the moon's attractive force on the solid and liquid portions of the earth; this produces two simultaneous high tides, one directly under the moon and the other directly opposite to it. * Solar tides are also produced by the attraction of the sun, but these are not strong enough to form tide waves, merely acting as drawbacks to the lunar tides when the moon is in front of, and as aids when the moon is behind, the sun. When both sun and moon are on the same side of the earth, as at new moon, the lunar and solar tides are heaped one on the other and a very high or spring tide is formed; the same happens when they are on opposite sides, as at full moon. In other positions the two forces act against one another; and when they are 90° apart they are diametrically opposed, and a very small tide, called a neap tide, results.

Tidworth, village of Wiltshire, England, land, between Salisbury and Marlborough, on the slope of the Wiltshire Downs. It is the site of an important military camp, where tattoos (q.v.) are sometimes held. Pop. 2,800.

Tien-Shan, a great mountain range of Central Asia, separating Sinkiang from Dzungaria and the Altai regions;

the Syr-Darya, Ili and Tarim rivers take their rise in the system. Highest summit Tengri, 22,500 ft.

Tientsin, an important city and river-port of China, in Chih-li province, on the Pei-ho, 34 m. from the mouth and 70 m. S.E. of Peking, of which it is the port; it became an open treaty port in 1858; there is a University, and a small Italian concession adjoins the town. The city was bombed and captured by the Japanese in July, 1937. Pop. 1,292,000.

Tierra del Fuego, a compact island-group at the southern extremity of the S. American continent, from which it is separated by the Strait of Magellan; the most southerly point is Cape Horn (q.v.). Of the group, Tierra del Fuego, sometimes called King Charles South Land, belongs partly to the Argentine and partly to Chile, to which also belong the other islands, except Staten I., an Argentine possession. Save for a few fertile plains in the N., where some sheep-farming goes on, the region is bleak, barren, and mountainous, with rocky, florid-cut coasts swept by violent and prolonged gales. The inhabitants are mostly nomadic Indians of little culture.

Tiflis (Tbilisi) capital of the Georgian S.S.R., a constituent republic of the U.S.S.R., in the Caucasus, on the Kar, 165 m. S.E. of the Black Sea; is a city of considerable antiquity and note, now mainly a trading centre, but still famous for its silversmiths' work; it is the seat of the Georgian State University. Pop. 408,000.

Tiger, a carnivorous mammal (*Felis tigris*) closely allied to the lion, but with a wider, more massive skull and standing

lower on the limbs. A full-grown tiger measures 5½-6½ ft. and stands from 3-3½ ft. high, the maximum weight being about 500 lb. or more. It is mainly confined to India, Java and Sumatra; but has greatly decreased in numbers in the thickly populated districts of India. The coat is red-fawn and white beneath, with white markings on face and ears, and black transverse stripes on the body. The tiger lives chiefly on various species of deer, wild pigs and antelopes, but it will kill cattle and also eat porcupines, monkeys, etc. It is hunted in India, both on foot and by shooting from elephant-back or from tree-platforms (machans).

TIGER

Tiger Lily (*Lilium tigrinum*), a fine lily with scarlet spotted flowers, indigenous to China, where its bulbs and shoots are an article of food, but now grown in European gardens.

Tigre, a northern region of Abyssinia, containing the towns of Adowa, until 1936 its capital, and Axum, the former religious capital of the country.

Tigris, an important river of Western Asia, mainly in Iraq; rises in the mountains of Kurdistan, flows S.E. to Diarbekir, E. to Til (where it receives the Bitlis) and hence S.E. through a flat and arid country, till, after a course of 1,100 m., it unites with the Euphrates to form the Shatt-el-Arab, which debouches into the Persian Gulf 90 m. lower; is navigable for 500 m. to Bagdad; on its banks are the ruins of Nineveh, Seleucia, and Ctesiphon, and the modern towns of Kut, Rasheed, Samarra and Mosul.

Tilbury, town in Essex, England, on the Thames opposite Gravesend, new part of Thurrock Urban District; it has large docks which can accommodate ocean-going liners, and is the centre of a trade to the Netherlands. Pop. c. 17,000.

Tilden, William Tatem, American law-tennis player; born at Germantown, Pa. Held championships of U.S.A., 1920-1925, 1929. Played continually in Davis Cup matches. Defeated G. L. Patterson for world's championship, Wimbledon, 1920, retaining the title in 1921, and regaining it in 1930, after which he became a professional; professional champion of America, 1931. He is author of many books on tennis. (1883-).

Tile, a piece of baked clay, used for porcelain, glazed or coloured, and often embossed or painted with a design, for decorative purposes, such tiles when painted being known as encaustic tiles. Tiles of baked clay were in ancient times used for preserving written records, especially in Assyria and Babylonia. Roofing tiles are sometimes made with a concave (pantiles) or ridged surface.

Tillett, Benjamin, English Labour leader, born at Easton, Bristol. Began work at the age of 9 in a brickyard, afterwards earning a living as a circus performer, helper on a fishing-smack, and at sea in the Navy and merchant service. In 1887 he organized the Dockers' Union, of which he was General Secretary till its absorption in 1922, and helped to promote the Dock Strike of 1889, in consequence of which he was tried for inciting to violence, but acquitted. Later he undertook organization of dock workers at Antwerp, Hamburg, in the British Dominions, etc.; from 1917 to 1924, and again from 1929 to 1931, was Member of Parliament for North Salford. (1860-).

Tillotson, John Robert, English divine, of a Puritan family; studied at Clare Hall, Cambridge, came under the influence of Cudworth (q.v.), conformed to the Established Church at the Restoration and became King's chaplain and a prebend of Canterbury, till at length he rose to be Dean and Archbishop of Canterbury; was an eloquent preacher, a man of moderate views, and respected by all parties. (1630-1694).

Tilly, Johann Tserklasse, Count of, one of the great generals of the Thirty Years' War (q.v.), born in Brabant; was intended for the priesthood and educated by Jesuits, but abandoned the Church for the army; was trained in the art of war by Parma and Alva, and proved himself a born soldier; reorganized the Bavarian army and, devoted to the Catholic cause, was given command of the Catholic army at the outbreak of the Thirty Years' War, during the course of which he won many notable battles, acting later on in conjunction with Wallenstein, whom in 1630 he succeeded as commander-in-chief of the imperial forces; in the following year he sacked with merciless cruelty the town of Magdeburg, a deed which Gustavus Adolphus was swift to avenge by crushing the Catholic forces in two successive battles—at Breitenfeld and at Lech—in the latter of which Tilly was mortally wounded. (1559-1632).

Tilsit, a manufacturing town of East Prussia, on the Niemen, 85 m. N.E. of Königsberg. Here was signed in 1807 a treaty between Alexander I. of Russia and Napoleon, as the result of which Frederick-William III. of Prussia was deprived of the greater part of his dominions. Chemicals, soap, glass, etc., are manufactured. Pop. 57,300.

Timbuktoo (Timbuktu), city of the French Soudan, situated at the edge of the Sahara, 8 m. N. of the Upper Niger, at the centre of caravan routes which lead to all parts of N. Africa; carries on a large transit trade, exchanging European goods for native produce. It is connected by canal with the Niger R. Pop. 5,600.

Time, the measure of duration or continuous existence without reference to extension in space. Absolute time is unrelated to matter or motion, and is continuous, unlimited, and infinitely divisible. Relative time, by which duration is measured with reference to events, is of several kinds; sidereal time is based on the rotation of the earth with respect to the stars; solar time is based on the same movement with respect to the sun, and as the solar day varies in length both because of the earth's own movement in its orbit and the obliquity of the earth's axis, time as measured by clocks, chronometers, etc., is computed on the basis of an average or mean solar day which is always of the same length, and has no real existence. See also **Standard Time**.

Time, in music, the relative duration of a rest, measured by the rhythmical proportions of the notes, the semibreve being the unit or standard; the minim is half the semibreve, the crotchet half the minim, the quaver half the crotchet, and so on. There are two kinds of time: duple, with 2, 4 or 8 beats to the bar; and triple, with 3 beats.

Times, The, a London daily newspaper founded in 1785 as the *London Daily Universal Register*; it adopted its present name in 1788. Lord Northcliffe acquired control in 1908, but in 1922 a trust was formed to prevent the paper ever again falling completely into private hands. It is England's greatest national paper, and politically it is its traditional policy to give a general support to the Government of the day, irrespective of party. Its notable editors include John Dellar and G. E. Buckle.

Timisoara (Temesvar), city of Rumania, NE. of Belgrade; has a handsome Gothic cathedral and ancient castle; manufactures tobacco, leather, flour, etc. Pop. 90,000.

Timor, Is., 700 m. E. of Java; of volcanic formation, mountainous, wooded, and possessing deposits of various metals, but mainly exports maize, sandalwood, coffee, wax, tortoise-shell, etc.; population consists chiefly of Papuans with Chinese and Malay infiltration. The western portion belongs to Holland, the eastern to Portugal. E. of Timor lies a group of three low-lying islands of coral formation, known as Timor-Laut or Tenimber Is.; a Dutch possession; the largest island is Yamdena. Pop. c. 1,000,000.

Timothy, a convert, associate and deputy of St. Paul, to whom, when bishop of Ephesus, the Apostle wrote two epistles in the interval between his imprisonment and death at Rome. Modern criticism is inclined to doubt or deny their Pauline authorship.

Timur. See *Tamerlane*.

Tin, a metallic chemical element belonging to the same group as carbon, silicon, germanium and lead; it was one of the seven metals familiar to the ancients. Symbol Sn; atomic number 50; atomic weight 118.70. Its chief ore is cassiterite or stannite, which occurs in Malaya, Australia, Bolivia, Cornwall, and a few other localities. The metal is extracted by first roasting the ore to remove impurities such as arsenic and sulphur, and then smelting with powdered coal in a reverberatory furnace. It is a silvery-white metal with a low melting-point (232° C.), and when heated to a low temperature slowly changes to a powdery allotropic modification known as grey tin. Tin is largely used for wrapping cigarettes, chocolate, confectionery, etc. ("silver paper") and in the manufacture of tinplate (g.a.). Alloys of tin include pewter (tin 80 parts, lead 20 parts), solder (g.a.), bronze (copper and tin), and tinman's alloy, an alloy of tin and mercury

formerly used as the reflecting surface in the cheaper sorts of mirrors. The chlorides of tin are used as mordants in the calico-printing industry, while finely divided tin oxide, known as putty powder, is used for polishing glass, etc.

Tinplate is made by dipping thin sheets of iron, which have been given a bright surface by "pickling" in sulphuric acid, into molten tin covered with melted palm oil. The sheet then passes under a partition into molten tin covered with melted fat, and then through rollers to remove superfluous metal. It is chiefly used in motor-car manufacture for wings and under-shields.

Tintagel Head, a rocky headland, 300 ft. high, on the W. Cornish coast, England, 22 m. W. of Launceston; associated with the Arthurian legend as the site of King Arthur's castle and court; 6 m. distant lies Camelot, identified by some with the famous Camelot.

Tintern, village of Monmouthshire, England, on the R. Wye, 6 m. N. of Chepstow, with the ruins of a 12th Century Cistercian abbey, which are much visited by tourists. It is the subject of a poem by Wordsworth. Pop. c. 300.

Tintoretto, nickname of *Jacopo Robusti*, a famous Italian artist, born in Venice; save for a few lessons under Titian he seems to have been self-taught; took for his models Titian and Michelangelo, and came especially to excel in grandeur of conception and in strong chiaroscuro effects. Amongst his most notable pictures are: "Belshazzar's Feast," "The Last Supper," "The Crucifixion," "The Last Judgment," "The Resurrection," etc.; some of these are of enormous size. His "St. George and the Dragon" is in the National Gallery, London. (1518-1594).

Tipperary, a south-midland county of Ireland, in the province of Munster, stretching N. of Waterford, between Limerick (W.) and Kilkenny (E.); possesses a productive soil which favours a considerable agricultural and dairy-farming industry; coal is also worked; the Suir is the principal stream; the generally flat surface is diversified in the S. by the Galtees (3,008 ft.) and Knockmealdown (2,600 ft.) besides smaller ranges elsewhere. The town of the same name (pop. 6,000), 110 m. SW. of Dublin, is noted for its butter market. The county is divided for administrative purposes into two Ridings; co. town of N. Riding, Nenagh; area, 771 sq. m. Pop. 59,400; co. town of S. Riding, Clonmel; area, 872 sq. m. Pop. 78,000.

Tipoo Sahib, son of Hyder Ali, whom he succeeded in the Sultanate of Mysore in 1782; already a trained and successful warrior in his father's struggles with the English, he set himself with implacable enmity to check the advance of British arms; in 1789 invaded Travancore, and in the subsequent war (1790-1792), after a desperate resistance, was overcome and deprived of half of his territories, and compelled to give in hostage his two sons; intrigued later with the French, and again engaged the English, but was defeated and his capital, Seringapatam, captured after a month's siege, himself perishing in the final attack. He was popularly known as "the Tiger of Mysore." (1749-1799).

Tipstaff, an officer of the High Court take to prison any person committed by that court who at the time is present there. The name is often extended to any constable, sheriff's officer, and court crier or usher, and is connected with the staff tipped with metal which was formerly his badge of office.

Tipton, borough of Staffordshire, England, 8½ m. NW. of Birmingham; has collieries, ironworks and other metal industries. Pop. 36,000.

Tiree, an island of the Inner Hebrides, Argyllshire, Scotland, lying W. of Mull, about 12 m. in length, with a varying width up to 5 m. It is flat and fertile, has sandy beaches and a small harbour. The island has numerous lochs containing eels and trout. Marble abounds but is not quarried. Pop. 1,500.

Tirpitz, **Alfred von**, German Admiral, born at Küstrin. He entered the navy at the age of 16, took command of the Baltic Fleet in 1891, became Chief of the Naval Staff in 1892, and Naval Secretary of State in 1897. The building and preparation of the German fleet before the 1914 World War were mainly due to his efforts and foresight. He remained at the head of the Navy Office during the first two years of the War, advocating a ruthless submarine policy, but in 1916 resigned his offices as a result of dispute over its effectiveness and entered political life. (1849-1930).

Tischendorf, **Constantin von**, Biblical scholar, born in Saxony; spent his life in textual criticism; his great work *Critical Edition of the New Testament*. He discovered in 1859 in a monastery at Mt. Sinai the Biblical MS. now known as the Codex Sinaiticus. (1815-1874).

Tissue, any of the cellular structures of the plant or animal body is made up. The tissues of the animal or human body are very varied, including muscular tissue (flesh), adipose (fat), osseous (bone), cartilaginous (gristle or cartilage), epithelial (skin), nervous, and connective. Histology, the special branch of physiology dealing with tissues as such, usually includes the blood and lymph in its scope, as the cell elements contained in these are not markedly different from those of other tissues.

Tisza, or **Theiss**, the longest river of Hungary and largest of the affluents of the Danube; is formed in E. Hungary by the confluence of the White and the Black Tisza, both springing from the south-western slopes of the Carpathians; after a great sweep to the NW. bends round to the S., and flows steadily southward through the centre of Hungary until it joins the Danube 20 m. above Belgrade, after a course of 750 m.; its principal tributary is the Maros.

Tit, or **Titmouse**, a name given to various birds of the family Paridae, including

the Great Tit (*Parus major*), Blue Tit (*Parus caeruleus*), Coal Tit (*Parus ater*), Marsh Tit (*Parus palustris*), Long-tailed Tit (*Aegithalus caudatus*), Crested Tit (*Parus cristatus*), all small, active, insect- and seed-eating birds with rounded tails. All the species mentioned are found in Britain, generally in woods and copses. The Bearded Tit (*Parus hibernicus*), a distant relative of the rest, placed in a family, the Paridae, on its own, prefers marshy and reedy neighbourhoods.

Titanic, a White Star liner, at the time sunk by an iceberg near Cape Rose on April 14, 1912, while on her maiden voyage to America, with a loss of 1,500 lives.

Titanium, a metallic chemical element as carbon, silicon, zirconium and hafnium. Symbol Ti; atomic number 22; atomic weight 47.90. Its chief ores, rutile and ilmenite, are found in the U.S.A., Norway, S. India and Brazil. Titanium and its com-

pounds are used in paint manufacture, dyeing, military operations (smoke-screens), and particularly in the steel industry, where ferro-titanium, an alloy containing about 20 per cent. titanium with 80 per cent. iron, is used in removing undesirable impurities from the crude steel.

Titans, in Greek mythology, sons of strength, and of the dynasty prior to that of Zeus. They made war on Zeus, and hoped to scale heaven by piling mountain on mountain, but were overpowered by the thunderbolts of Zeus, and consigned to a limbo below the lowest depths of Tartarus.

Tithes, an ecclesiastical tax adopted from Jewish practice by the Christian Church. The usual levy was one-tenth of the annual produce of land and cattle. In England tithes were made compulsory about the 9th Century; they were payable to the rector, who was in fact frequently a religious house or even a secular person, whose spiritual duties were performed by a salaried vicar. Continued in England after the Reformation, they were largely commuted into a rent charge by an act of 1836; in 1836, after considerable agitation, a further act provided for their eventual complete commutation, subject to compensation to owners and rating authorities.

Tithonus, in Greek mythology, son of Eos, who begged Zeus to confer on him immortality but forgot to beg also for youth, so that his decrepitude in old age became a burden to him; he was changed into a cicada.

Titian, real name **Tiziano Vecelli**, Italian painter, born at Capodell Cadore, the prince of colourists and head of the Venetian school;

studied at Venice, and came under the influence of Giorgione. He was a master of his art from the very first, and his fame led to his employment all over Italy, Germany, and Spain. His works were numerous, and rich in variety; he was much in request as a portrait-painter, and painted most of the great people he knew. He ranks with Michelangelo and Raphael as the head of the Italian renaissance. Among his best-known works are the "Venus and Adonis," and "Bacchus and Ariadne" in the British National Gallery. (1477-1576).

TITIAN

Titicaca, Lake, a mountain lake, the largest of South America, on the boundary of Bolivia and Peru, at an elevation of 12,500 ft. It is 130 m. in length, 35 m. broad, and 700 ft. at its greatest depth.

Title, right of ownership of property, or the sources of such right. Title to land is established by title deeds, or shares by a certificate, and of property generally, whether real or personal, by devise and bequest, deed of gift, settlement, etc. The word is most commonly associated with contracts for the sale of land. The vendor of land must provide a good title in accordance with the contract. Under the Law of Property Act, 1925, he is bound to deduce a title for a period of 30 years preceding the day of sale; but the "abstract of title," i.e., the history of the title showing the successive steps in its transfer, must go back further than 30 years where necessary to reach a "root" of title, i.e., a point at which it can properly commence. See also *Registration of Title*. For titles of honour, see *Honour*.

Titus, a convert of St. Paul, a Greek by birth, appears to have accompanied St. Paul on his last journey, and to have been

COAL TIT

with him at his death. The New Testament contains an epistle addressed to him in the name of Paul, but its authenticity is a matter of doubt among modern critics.

Titus Flavius Vespasianus,

Roman Emperor, born in Rome, the son of Vespasian, served in Germany and Britain, and under his father in Judaea. On his father's elevation to the throne he continued the operations against the Jews, laid siege to Jerusalem, and took the city in A.D. 70. On his accession to the throne he addressed himself to works of public beneficence, and became the idol of the citizens; but his death was sudden, and his reign lasted only three years. (41-81).

Tiverton, town of Devonshire, Eng. Exe and Loman, 12 m. N. by E. of Exeter; has a lace manufacture, and is the site of the well-known Blundell's school. Pop. 9,600.

Tivoli, a town of Italy, known to the ancients as Tibur, beautifully situated on the Teverone, 18 m. E. of Rome; was much resorted to by the wealthy Roman citizens, and is celebrated by Horace; is full of interesting remains, including those of a villa of the Emperor Hadrian. Pop. c. 15,000.

T.N.T. See Trinitrotoluene.

Toad, a genus (*Bufo*) of amphibians, complete absence of teeth;

the colour is generally brownish, their habit is shy, and they mainly seek their food, which consists of insects, worms, grubs, etc., by night. In spite of former common belief, they are not poisonous to human beings. There are two British species, the Common Toad (*Bufo vulgaris*) and the Natterjack Toad (*Bufo calamita*); about 80 others are known in various parts of the world.

COMMON TOAD

Toad-Flax, a genus (*Linaria*) of hedge Scrophulariaceae. There are some 100 species, including seven found in Britain, of which the most important are the Yellow Toad-flax (*Linaria vulgaris*) resembling the flax plant, with yellow flowers and a long spurred bilabiate corolla, and the ivy-leaved toadflax (*Linaria cymbalaria*), a species found frequently on old walls.

Toadstool. See Fungus.

Tobacco, the name of several solanaceous plants of the genus *Nicotiana*, native to America, but now grown also in S. Central Africa, India, Malaysia, the Balkans, etc., the most important species being *Nicotiana glauca*, the dried leaves of which, made into cigarettes, cigars, snuff, and pipe tobacco, are one of the most important of the world's commercial products. The use of tobacco in the West began in the 16th Century; its introduction into England is attributed to Sir Walter Raleigh. In most modern states taxes on tobacco are one of the chief sources of revenue; in Great Britain the annual return from such taxes is about £75,000,000. World production of tobacco is in the neighbourhood of three million tons annually.

Tobago, one of the Windward Is. (q.v.), the most southerly of the group; a British possession since 1763, politically attached to Trinidad; is hilly, picturesque and volcanic; exports rum, molasses, coconuts, coconuts, and live-stock. Area, 115 sq. m. Pop. 26,000.

Tobit, one of the books of the Old Testament Apocrypha, recounting the story of a Jew of the captivity, Tobit, and

his son Tobias; it is one of the principal sources for the Christian conception of the nature and ministry of angels, Raphael (q.v.) being one of the chief characters. Its date and authorship are quite uncertain, and no Hebrew or Aram. is original is known.

Tobolsk, a town of the U.S.S.R., at the confluence of the Irtysh and Tobol, 2,000 m. E. of Leningrad; it was the first scene of the banishment of the Czar Nicholas II in 1917. Pop. c. 20,000.

Tocantins, one of the great rivers of Brazil, rises in the state of Goyas; flows northwards, and after a course of 1,500 m. enters the estuary of the Para, one of the mouths of the Amazon, 138 m. from the Atlantic; receives the Araguay from the S., an affluent 1,600 m. long.

Toc H, an international organization for Christian social service, which derived its name from the army signalling abbreviation for Talbot House, a soldiers' club founded in Poperinghe in the Ypres Salient by the Rev. P. T. B. (Tubby) Clayton in 1915, and named after Reginald Talbot, a young officer killed in the early days of the war. It is organized in local branches known as "marks," at each of which a "lamp of maintenance" is lighted at every meeting in commemoration of deceased members.

Todhunter, Isaac, mathematician, born at Rye; educated at University College, London, and at Cambridge, where he graduated senior wrangler and Smith's prizeman in 1848; elected Fellow and principal mathematical lecturer of his college (St. John's), and soon became widely known in educational circles by his various and excellent handbooks and treatises on mathematical subjects. (1820-1884).

Todmorden, town of the W. Riding on the Calder, 21 m. N.E. of Manchester; coal abounds in the vicinity, and there are cotton manufactures. Pop. 22,000.

Toga, an outer garment in use among the classical Romans, usually of white wool, like a large blanket, folded about the person in a variety of ways, but generally thrown over the left shoulder and hanging down the back, leaving the right arm free. It was the badge of manhood and Roman citizenship in the days of the republic, but fell into disuse under the Empire.

TOGA

Togo, Heihachiro, Count, Japanese admiral; educated at the Naval College, Greenwich; was in command of the Japanese fleet during the Russo-Japanese War of 1904-1905, and led it to victory at the battle of Tsushima. In 1906 he became an honorary member of the British Order of Merit. (1847-1934).

Togoland, a former German colony in Africa, captured by the Allies in 1914 and in 1919 divided as a mandatory territory between France and Great Britain. French Togoland, which produces cotton, coconuts, copra, and palm products, has Lomé for its capital, an area of 21,900 sq. m. and a pop. of 137,000. British Togoland is governed as part of the Gold Coast Colony; its exports are of similar materials. Area, 12,000 sq. m. Pop. 335,000.

Tokay, a Hungarian town on the Theiss, 150 m. N.E. of Budapest; greatly celebrated for its wines, of which it manufactures over 30 different sorts. Pop. 5,000.

Token, a piece of metal, leather, etc., issued by traders, local bodies, etc., to remedy a deficiency in state coinage. Such tokens were coined in large numbers in the Tudor and Stuart periods in England, and

circulated as readily as "coin of the realm." The name token coinage is given in modern economics to all coins whose value as metal is less than their exchange value, as is the case with practically all modern coinage other than gold.

Tokyo, or **Tokio**, formerly called **Yedo**, capital of the Japanese Empire, situated on a bay of the same name on the S.E. coast of Honshu, and partly built on the delta of the R. Sumida; is for the most part flat and intersected by canals and narrow, irregular streets, and has a finely-wooded riverside avenue 5 m. long; suffered enormous damage in the severe earthquake of Sept., 1923, since when it has been largely rebuilt, many of the buildings in reinforced concrete after the Western style. It is now the third largest city of the world, exceeded only by London and New York. It has few industries; its university is of great importance. Pop. 5,876,000.

Tolbooth, former Scottish name for a burgh gaol, especially the old gaol of Edinburgh, demolished in 1817. A tolbooth was originally a temporary hut of boards erected in a fair or market-place for imprisoning debtors or persons who had infringed some market law.

Toledo, a city of Spain, capital of the kingdom, occupies a commanding site amid hills on the Tagus, 40 m. S.W. of Madrid. Its appearance, both from without and from within, is imposing; it is the see of the primate of Spain, and possesses a noble Gothic cathedral, ruins of the Cid's castle, and remains of the Moorish occupation (712-1085). The manufacture of sword-blades, famous in Roman times, is still carried on near the city. It was occupied in 1936 by the rebel forces in the Civil War. Pop. 25,000 (prov. 509,000).

Toledo, city in Ohio, U.S.A., on the Maumee R., 8 m. W. of Lake Erie; has a large coal trade, and manufactures motor cars, clothing, glass, gloves, etc. Pop. 291,000.

Toleration, or the permission of freedom of worship to those holding religious beliefs other than that favoured by the state, first became a live issue in Great Britain under Elizabeth, with the Puritan secession from the Anglican Church.

Toleration Act, a statute passed in 1689 to relieve all Dissenters, excepting Roman Catholics and Unitarians, from many of the penalties to which they had previously been subject.

Toll, a monetary charge formerly collected at toll-gates set up at intervals on highways and at the approaches of bridges, the sums collected being devoted to their maintenance. A few such toll-gates still remain on private roads in various parts of Great Britain. The name is also often applied to market charges.

Toller, Ernst, German playwright, born at Samitochin; he took a prominent part in the Communist rising in Munich in 1919, being thereafter sentenced to 5 years' imprisonment in a fortress. Among his more famous plays are *Masses and Men*, *No More Peace*, and *The Machine Wreckers*. After the advent of Hitler he was deprived of German nationality and made his home in the U.S.A. (1893-).

Tolstoy, Count Leo Nikolaievich, Russian, born in Tula, of a noble family; served for a time in the army, soon retired from it, and travelled; married, and settled on his estate near Moscow in 1862. His two greatest novels are *War and Peace* (1865-1868) and *Anna Karenina* (1875-1878); but he also wrote many volumes of tracts on social and religious subjects, especially in

defence of the principles of non-resistance and of his personal interpretation of Christian teaching, as well as plays, short stories, etc. (1828-1910).

Toltecs, a people who according to tradition preceded the Aztecs in Mexico; they are specially associated with the ruins at Teotihuacan, a site about 35 m. from Mexico City. According to legend they were the introducers of the arts and culture to Mexico, from whom the Aztecs learned them.

Toluene, a liquid hydrocarbon found associated with benzene in coal-tar and East Indian petroleum. It closely resembles benzene in its chemical and physical properties, and is of great military importance as the raw material from which trinitrotoluene (q.v.) is manufactured.

Tomahawk, a weapon resembling an axe, once in common use among the Indian tribes of North America. It could be thrown a considerable distance with deadly accuracy. Originally it consisted of a stone head, but later a metal head, attached to a wooden handle.

TOMAHAWK.

Tomato (*Lycopersicon esculentum*), an annual of the family Solanaceae, a weak trailing plant, with a soft stem, winged leaves, and yellow flowers, native to S. America and cultivated in most warm countries on account of its fruit. In Britain it grows best when trained against walls. There are many varieties, some with red and some with yellow fruit, which is used for sauce.

Tomb, a grave in the form of a monument, whether cut in native rock, as was frequently done in the Middle East, Egypt, and Persia, or erected over a grave, as with the Egyptian pyramids, and many Greek and Asiatic sepulchral monuments. In Christian times the word has generally been used of a sepulchral monument, frequently incorporating a statue of the deceased person in a church or churchyard.

Tomsk, a town in the Siberian region of the U.S.S.R., on the Tom, 55 m. from its confluence with the Obi; has a university, and is an important depot on the trade-route to China. Pop. 128,400.

Ton, a British measure of weight, divided into 20 cwt., or 2,240 lb. avoirdupois. In the United States and Canada the word is commonly used of the "short ton," of 2,000 lb. or 100 cwtals, the English measure being known as the "long ton." The metric ton, or tonne, is 1,000 kilograms, or 2,204.6 lb.

Tonbridge, market town in Kent on London. It has an old castle and church, carries on brewing and tanning trades, and has a famous public school founded in 1553 by Sir Andrew Judd and endowed by the Skinners Company of London. Pop. 18,000.

Tone, Theobald Wolfe, Irish patriot, born in Dublin; called to the bar in 1789; was active in founding the "United Irishmen," whose intrigues with France got him into trouble and forced him to seek refuge in America, and subsequently France, where he schemed for a French invasion of Ireland; eventually was captured by the English while on his way with a small French squadron against Ireland; was condemned at Dublin, but escaped a death on the gallows by committing suicide in prison. (1763-1798).

Tonga Islands, or Friendly Islands, a group in the South Pacific, in 1900 made a British protectorate; has a native ruler and legislative assembly; bananas and copra are produced. The capital is Nukualofa. Area, 385 sq. m. Pop. 21,000.

Tongue, a fleshy muscular organ in the mouth, covered with mucous membrane, the muscular structure aiding mastication and articulation of speech, while papillae scattered over the mucous membrane render it sensitive to taste. There is a furrow along the middle called the raphe, which often ends in a depression called the foramen cæcum. The tongue is free at the forward end, the hinder end being attached to the hyoid bone and the lower jaw.

Tonic Sol-Fa, a system of notation in vertical lines and dots take the place of notes. It is principally used in giving elementary instruction in singing. It was first used by a teacher in Norwich, a Miss Glover, about 1845, and was taken up by the Rev. John Curwen,

Tonking, Tonkin, or Tonkin, a fertile northern province of Annam (q.v.), ceded to France 1884; is richly productive of rice, maize, coal, tea, perfumes, and castor oil. The capital is Hanoi (pop. 42,000); Halphong is the principal port. Area, 40,500 sq. m. Pop. 3,860,000.

Tonnage, a ship's carrying capacity expressed in cubic tons. The gross tonnage is one hundredth part of the total cubic capacity of all enclosed parts of the ship, expressed in cubic feet; the net tonnage is the gross tonnage less deductions for space occupied by engines, crew's and passengers' quarters, and so forth. The displacement tonnage is the vessel's actual weight in tons when laden and floating at the load draught.

Tonnage and Poundage, the name given to certain duties first levied in Edward II.'s reign on every *ton* of imported wine, and on every *pound* weight of merchandise exported or imported; Charles I.'s attempt to levy these without parliamentary sanction was one of the complaints of his Long Parliament; they were swept away by the Customs Consolidation Act of 1787.

Tonsils, two lymphoid organs placed one on each side of the pharynx (q.v.) between the pillars of the fauces, which secrete a fluid believed to be helpful in respiration. They are subject to inflammation, or tonsillitis, either acute—when it is known as quinsy—or chronic. It is generally caused by bacterial infection, and is mostly an ailment of young persons and commoner in rheumatic subjects than in others.

Tonsure, the cutting off of a part of the hair of the head as a sign of dedication to God. In the Roman Church it takes the form for secular clergy of a small bare patch on the crown, which in the case of monks or religious is so enlarged as to cover almost the whole skull. The ancient Celtic monks shaved the front of the head, and the form of tonsure was one of the points of serious difference between the missionaries sent from Rome by Gregory to evangelize England and the earlier British clergy.

Tontine, a form of joint annuity named after its inventor, the Italian Lorenzo Tonti, by which annuities are paid to a group of persons on the understanding that on the death of any of them an amount equal to his share is divided annually among the survivors, the process being repeated until on the death of the last survivor the tontine completely lapses.

Toole, John Lawrence, English comedian, born in London; made a considerable reputation in the provinces before making his appearance at St. James's Theatre in London in 1864; became the leading low-comedian of his day, and in 1880 took over the management of the Folly Theatre, which he renamed Toole's Theatre; had unrivalled powers of blending pathos with burlesque, and in such characters as Paul

Pry, Caleb Plummer, and Chawles was a special favourite throughout the English-speaking world. (1832-1906).

Toowoomba, a town of Queensland, Australia, 100 m. W. of Brisbane. It is situated in the Darling Downs in an agricultural district. Pop. 23,000.

Topaz, a precious stone found in various colours, blue, white, and especially orange. It is a silicate of aluminium with fluorine. Oriental topaz (yellow) is one of the gems formed from transparent corundum (q.v.). Topazes are found specially in S. America, Ceylon, the Urals and Scotland.

Tope, or **Stupa**, a species of cupola-shaped tumulus surmounted by a finial, in shape like an open parasol, these finials being often placed one upon the top of the other until a great height was reached. They were built originally to house or cover relics of the Buddha, and are found in various parts of India and Ceylon. A famous stupa at Sanchi, Central India, has a height of 42 ft. and a diameter of 105 ft.

Topeka, capital of Kansas, U.S.A., on the Kansas R., 65 m. W. of Kansas City; it has railway workshops, and manufactures of butter, machinery and woollens. Pop. 64,000.

Topiary, in landscape gardening, the art of clipping trees or shrubs into odd or ornamental shapes.

Topiary work was introduced in the Tudor period and increased in popularity during the ensuing two centuries, but has since waned in popularity, though it is often used in laying out formal gardens, particularly Dutch or Elizabethan. Small topiary schemes are suitable for garden frontages, tubs and lawns, while dwarf specimens are effective on steps round lily pools with statuary.

Toplady, Augustus Montague, hymn-writer, born at Farnham, Surrey; became vicar of Broad Hembury, Devonshire, in 1763. An uncompromising Calvinist, he bitterly opposed the Methodists; survives as the author of *Rock of Ages*, besides which he wrote *Poems on Sacred Subjects*, and compiled *Psalms and Hymns*, of which a few are his own. (1740-1778).

Tornado, a whirlwind or violent rotary storm over a small area, especially a storm accompanied by a spiral or funnel-shaped cloud, usually with thunder and rain. The tornado is commonest in the Southern United States and W. Africa; when travelling over sea it usually forms a waterspout.

Toronto, the second city of Canada, and capital of Ontario; situated on a small bay on the NW. coast of Lake Ontario, 315 m. SW. of Montreal; is a spacious and handsomely built city, with a splendidly equipped university, Parliament buildings, a fine technical school and City Hall; with a large shipping and transit trade, its main industries are meat packing, iron and steel founding, all kinds of metal work, and lumbering. Pop. 808,000.

Torpedo, a cigar-shaped steel weapon containing high explosive and a driving mechanism, launched from a surface ship or submarine through a special tube, and designed to propel itself through the water in a direction predetermined by the set of the rudders and a gyroscopic control. When the torpedo strikes a solid object with a sufficiently violent impact, the high explosive is fired by means of a detonating device in the

"nose," and the resulting explosion is of such violence as to be liable to hole even the thickest of armour plate. The first efficient torpedo was designed by Robert Whitehead (1823-1905), an English engineer, and, with numerous improvements and modifications, practically all modern torpedoes are constructed on Whitehead's system.

Torpedo Boat, a small naval vessel armed with torpedo tubes, now superseded by the destroyer (q.v.).

Torpedo-Boat Destroyer.

See **Destroyer**.

Torquay, borough and holiday resort of Devon, S. Devon, England, on Tor Bay, 23 m. S. of Exeter. In caves in the neighbourhood antiquities of great interest have been discovered. It was the landing-place of William of Orange in 1689. Pop. 14,800.

Torque, an ornament worn by ancient Britons, Gauls and Germans. It consisted of a stiff collar, formed of a number of gold wires twisted together, and sometimes of a thin metal plate, generally of gold, and worn round the neck as a symbol of rank and command.

Torque, in mechanics, the movement of a system of forces applied to produce a rotatory motion, or the rotating force in a mechanism. See also **Torsion**.

Torquemada, Thomas de, Spanish inquisitor-general, born at Valladolid; prior of the Dominican monastery at Segovia, he became connected with the Inquisition in 1483, and is notorious for the cruelty with which he exercised the office. (1420-1498).

Torrens, Sir Robert Richard, first born at Cork, Ireland, educated at Trinity College, Dublin. Going to S. Australia in 1840, he became premier and treasurer on the grant of responsible government in 1857, and was in charge of the passage of the Act which laid the foundation of the Australian land registration system. On his return to England he sat in Parliament for Cambridge from 1868 to 1874. (1814-1884).

Torrens Lake, a salt lake of S. Australia, 34 m. N. of Port Augusta. It is about 30 m. long and up to about 20 m. in width. It dwindles at times into a series of shallow, stagnant pools.

Torres Strait, ates Australia, from New Guinea; owing to its numerous islands, shoals, and reefs is exceedingly difficult to navigate; takes its name from the Spaniard Torres, who first sailed through it in 1606. Pearl fishing is carried on.

Torres Vedras, a town of Portugal, 26 m. N. of Lisbon; celebrated for the great lines of defence Wellington constructed in 1810, and behind which he successfully withstood the siege of the French under Massena, thus saving Lisbon, and preparing the way for his subsequent expulsion of the French from the Peninsula.

Torricelli, Evangelista, Italian mathematician and physicist. He succeeded Galileo as professor at the Florentine Academy; discovered the scientific principle of the barometer; which is sometimes called the Torricellian tube, and made notable advances in mathematical and physical science, especially in connection with hydrodynamics; he improved the microscope and telescope. (1608-1647).

Torsion, in mechanics the force with which a twisted wire or similar body tends to return to its original position. The limits of torsion within which the body will return depend upon its elasticity (q.v.). The force of elasticity or torsion

is proportional to the angle through which the body has been twisted. If a wire be twisted by a "couple" (i.e., force) the torque or twist produced is proportional to the moment of the "couple." The result was used by Coulomb (q.v.) in his torsion balance for measuring the repulsion between two electric charges.

Tort, in common law, any actionable wrong caused to person or property, other than a breach of contract or trust or wrong arising out of a personal relationship such as that between husband and wife and excluding also criminal offences. Malice is material only in exceptional cases.

Tortoise, the popular name of a number of reptiles of the order

Chelonina, differing little in form from the turtles and terrapins which are included in the same order, the name tortoise being generally used for the smaller land-dwelling members of the order. The typical land tortoise (*Testudo*) has a dome-shaped shell or carapace, which is covered with horny, mottled plates; the part below the body is called the plastron. Over forty species of tortoises are known; the animal commonly kept as a garden pet is the Greek Tortoise (*Testudo graeca*). The Elegant Tortoise (*T. elegans*) of S. Africa is remarkable for its beautiful colouring. Tortoises have a reputation for longevity, particularly the Giant Tortoises of the Galapagos Is. "Tortoise-shell" is mostly derived from the Hawksbill Turtle. See **Turtle**.

TORTOISE

Torture, the infliction of bodily injury legal evidence or confessions; has always been contrary to the law of England (it is expressly banned in Magna Carta), but was not infrequently employed during the Middle Ages as an exercise of the Crown prerogative. In Scotland the use of certain kinds of torture, such as the thumbscrew, was formerly permissible by law. Torture by the rack and in other ways was in considerable use against Catholics in the Tudor and early Stuart periods; all the conspirators in the Gunpowder Plot, for example, were put to the torture. Torture was finally forbidden by statute in England in 1709, though even this Act permitted the continuance of *peine forte et dure* or pressing by weights in the case of prisoners who refused to plead.

Tory, name given, usually by his opponents, to a Conservative in politics, especially of the more uncompromising school; the name arose in the reign of Charles II., having been adopted from that borne by bands of irregulars who disputed English rule in Ireland.

Toscanini, Arturo, Italian musical conductor, born at Parma. After conducting for several years at Turin, he went to Milan in 1898 to conduct at La Scala, whence he removed to the Metropolitan Opera House, New York, until his return to the Scala in 1921. From 1926 he was guest, and afterwards permanent conductor of the New York Philharmonic Society. In 1930 he was festival conductor at Bayreuth. (1867-).

Tosti, Sir Francesco Paolo, musical composer, born at Ortona, Italy. He studied at Naples, became Court musician in Rome, and in 1880 settled in London and became naturalised; for some time singing-master to the Royal Family, he was knighted in 1898. *Parade and Goodbye* proved the most popular of his many songs. (1846-1916).

Tostig, English statesman, son of Earl Harold II. (q.v.). He was made ruler of the northern parts of England by Edward the Confessor, but his harsh rule led to a rebellion and to his banishment; after Harold's accession he invaded England with Harold Hardrada, King of Norway, but was defeated and slain by Harold of England at Stamford Bridge. (d. 1066).

Totalisator, an automatic system for registering bets and working out the odds on winners according to the extent to which they have been backed. For long in vogue on the Continent and in Australia, the system was introduced in England in July, 1929, and has now been established at practically all race-courses in Great Britain. Tickets for bets of 2s., 10s., 21, and 210 are issued, and after a deduction of 10 per cent. for expenses, the total sum received is divided among the backers of winning and placed horses in accordance with the odds offered.

Totemism, name applied to the various forms of a widespread social-religious system, found among most aboriginal peoples of Africa, America and Australia, by virtue of which their separate tribes or groupings claim a special connection with, and venerate, an animal, plant, or other object, called its "totem," the tribe usually considering itself descended therefrom.

Totnes, market town of Devonshire, England, overlooking the Dart, 29 m. SW. of Plymouth; has interesting Norman and other remains; a centre of agricultural industry. Pop. 4,500.

Tottenham, borough of Middlesex, England, 5 m. N. of London, on the R. Lea. It has numerous small industries, and is very largely a "dormitory suburb" for London workers. Pop. 148,600.

Toucan, the common name for the gaudy-plumaged, ungainly-looking birds of the family Rhamphastidae, with a large though light bill, sometimes 6 or 8 in. in length; found in the tropical parts of South and Central America. The bill is brightly coloured in tints of black, red and yellow, and at its base occupies the whole width of the head. The tongue has a curious feathered appearance, while the food, which consists chiefly of fruit, is swallowed by raising the bill to a vertical position and allowing the food to drop down the throat. There are some 60 known species.

RED-BILLED TOUCAN.

Touchstone, basanite, or Lydian Stone, of velvety-black hue, used for testing the purity of gold and its alloys. If an alloyed metal is rubbed over it, the colour of the streak left behind indicates the nature of the alloy.

Toulon, second naval station of France, 42 m. SE. of Marseilles; lies at the foot of the Pharon Hills, the heights of which are strongly fortified; has an 11th-Century cathedral, and theatre, forts, citadel, 240 acres of dockyard, arsenal, cannon foundry, etc.; here in 1793 Napoleon Bonaparte, then an artillery officer, first distinguished himself in a successful attack upon the English and Spaniards. Pop. 150,000.

Toulouse, city of S. France, capital of dept. of Haute-Garonne, pleasantly situated on a plain and touching on one side the Garonne (here spanned by a fine bridge) and on the other the Canal du

Midi, 160 m. SE. of Bordeaux; notable buildings are the cathedral, the Church of St. Sernin, and Palais de Justice; is the seat of an archbishop, has schools of medicine, law, and artillery, various academies, and a university; manufactures woollens, silks, etc.; in 1814 was the scene of a victory of Wellington over Soult and the French. Under the name of Tolosa it figures in Roman and medieval times as a centre of learning and literature, and was for a time capital of the kingdom of the Visigoths. Pop. 213,000.

Touraine, former province of W. central France, to the E. of Maine, Anjou and Poitou, and to the W. of Orleans. In the 12th and 13th Centuries it was part of the Angevin Empire, but John lost all its strongholds to the French King (Philip Augustus). The modern dept. of Indre-et-Loire corresponds roughly with it. The capital was Tours.

Tourcoing, a thriving textile manuf. town of France, 9 m. NE. of Lille, adjoining Roubaix. It has manufactures of woollen, cotton, silk and linen goods, dyeworks, and sugar refineries. Pop. 78,000.

Tourmaline, a crystalline mineral, used in optical instruments for producing a beam of polarised light; it is composed of silica and alumina, with varying quantities of other minerals; it exists in various colours, and is in some request as a gem-stone.

Tournai (Doornik), a town of Hainault, Belgium, on the Scheldt, 35 m. SW. of Brussels; in the 5th Century was the seat of the Merovingian kings; is now a town of a handsome modern appearance; has a fine Romanesque cathedral and flourishing manufactures of hosiery, linen, carpets, and porcelain. Pop. 38,000.

Tournament, a real or mock fight by knights on horseback in proof of skill in the use of arms and in contests of honour.

Tourniquet, a surgical device for preventing hemorrhage from a wound. It consists of a pad placed against the artery from which the blood is flowing, fixed closely against the limb or affected part by a strap or similar compressing apparatus. In case of need one may be improvised by placing a bandage round the wound and tightening it as much as is necessary by twisting a stick between the bandage and the limb.

Tours, ancient city of France, on the Loire, in dept. of Indre-et-Loire, 145 m. SW. of Paris; is spacious and handsome in appearance, and contains a noble Gothic cathedral, archbishop's palace, Palais de Justice, besides ancient châteaux and interesting ruins; is a centre of silk and woollen manufactures, and does a large printing trade; suffered greatly by the Revocation of the Edict of Nantes and during the Franco-Prussian War became the seat of government in 1870 after the investment of Paris and until its capitulation to the Germans. Pop. 84,000.

Toussaint L'Ouverture, a negro hero of Haiti, born, the son of an African slave, in Breda; took part in the native insurrection of 1791; in 1797 he became a general of brigade in the service of the French, and by gallant soldiiership cleared the English and Spanish out of Haiti; became president for life of the republic of Haiti, and began to work for the complete independence of the island; in 1801, when Napoleon endeavoured to re-introduce slavery, he revolted, but was subdued by a strong French force and taken to France, where he died in prison near Besançon; is the subject of a well-known sonnet by Wordsworth, who designates him the "most unhappy man of men." (1743-1803).

Tower Bridge, crosses the Thames near the Tower of London, E. of London Bridge; its central span measuring 200 ft. can be raised to let vessels through to the Basin; designed by Sir Horacio Jones and Sir J. Wolfe Barry, it cost £1,000,000 and was opened in 1894.

TOWER BRIDGE

Tower Hamlets, a former parliamentary division of London, coterminous with the present metropolitan boroughs of Stepney and Poplar; the name arose from the area having originally consisted of a group of hamlets subject to the jurisdiction of the Lieutenant of the Tower.

Tower of London, a medieval fortress on the bank of the Thames, at the E. boundary of the City of London, used at different times in English history as a royal residence and State prison. The British Crown Jewels are housed there. The nucleus of the buildings is the White Tower, built about 1078, the keep of the original fortress. The corps of Tower wardens, or Beefeaters, with their medieval uniform, are a source of interest to visitors.

Towers of Silence, towers on which the Zoroastrians or Parsis of Iran and India expose their dead bodies, so that the flesh may be removed from the bones by vultures, dogs, or similar agents.

Town, a collection of buildings near to one another, constituting a semi-self-sufficient community with its own trading facilities and, usually, some degree of independent local government. The town in England and most of western Europe developed in the Middle Ages generally around either a religious house or the castle or manor of a feudal landowner, gradually gaining trading and judicial privileges: the growth of towns was generally supported by royal authority as a counterpoise to that of the nobles. The town is not under that name a local government unit in Great Britain. The larger towns which have obtained charters of incorporation or have been incorporated by statute are "boroughs," the others urban districts, save for the smaller country towns which are governed as part of the rural districts in which they are situated.

Town Council, a name commonly given to a borough council, the municipal governing body of a town. It consists in England of a body of elected councillors, a smaller number of co-opted aldermen, and a mayor chosen by the council itself. It has the power of imposing rates and making by-laws for local government purposes, and such other powers as may be accorded to it by general or local statute.

Town Planning, the development in such manner as to secure hygienic and pleasing conditions of living. Garden cities offer an illustration of such ideals. The earliest English legislative effort to enforce some such ideals dates from the Housing and Town Planning Act of 1909; later acts, especially one of 1932, have conferred on local authorities various powers for restricting the number of houses per acre, providing for the proper construction of roads, the prevention of ribbon building, the regulation of sites for shops and factories, the provision of open spaces, etc.

Townshend, Charles, second Viscount, English statesman, born at Raynham, Norfolk; was one of the commissioners who arranged the Scottish Union; accompanied Marlborough as joint-pleni-

potentiary to the Germantown Conference (1709); got into political trouble for signing the Barrier Treaty while acting as ambassador to the States-General; under George I. rose to high favour, became acknowledged leader of the Whigs, passed the Septennial Act, but after 1721 was eclipsed in the party by the greater abilities of Walpole, and after unpleasant rivalries was forced to withdraw from the ministry (1730); gave himself then to agricultural pursuits, and helped to improve the rotation of crops. (1674-1738).

Townshend, Charles, statesman and orator, grandson of preceding; entered Parliament in 1747 as a Whig, and after his great speech against the Marriage Bill of 1753 ranked among the foremost orators of his day; held important offices of State under various ministers, Pitt, Chatham, and Rockingham, and as Chancellor of the Exchequer in 1767 was responsible for the imposition of the paper, tea, and other duties on the American colonies which provoked the War of Independence and led to the loss of the colonies; died when on the point of attaining the premiership. (1725-1787).

Townshend, Sir Charles Vere, British general. He saw service in the Boer War, and during the World War in Mesopotamia, where in April 1915 he began a march up the Tigris to Bagdad, but after several victories over the Turks retired to Kut, where after a five-months' siege he capitulated with his force and was interned till the end of the war. On retiring from the Army in 1920 he entered Parliament for a time. (1861-1924).

Townsville, a port on the N.E. coast of Queensland, Australia. It is situated on Cleveland Bay and is a centre for the export of local products. Pop. 23,800.

Towton, a village of Yorkshire, England, 3 m. S.E. of Tadcaster, where in 1461 Edward IV. at the head of the Yorkists completely routed the Lancastrians under the Duke of Somerset.

Towyn, market town and holiday resort is quarried, and lead mined. Pop. 3,800.

Toxicology, that branch of pathology or medicine which deals with poisons, their chemical action, their effects, and the means of curing their presence, the

seems to go back to the earliest ages, as archaeological finds in Egypt, India, and classical lands have included dolls, animals, etc., not widely different from those in use to-day. The 19th and 20th Centuries, however, have seen a great advance in the variety and skill of construction of toys, which now include model railway trains and tines, steam and motor boats, aeroplanes, engineering sets, miniature motor cars and cycles, and, indeed, small replicas of almost every mechanical device. Dolls are largely made in France and Germany, and toys of various kinds in Switzerland, Germany, Czechoslovakia and Japan.

Toynbee Hall, an institution in London, founded in 1885 for social and educational work among the poor in the district, established in memory of Arnold Toynbee (1832-1883), an economist who took a deep interest in the working classes.

Tracery, in architecture, the ornamental open work formed in the head of a Gothic window by the mullions and diversifying into arches, curves, and flowing lines, intersecting in various ways and enriched with foliations, and later extending from the windows to many other parts of the building. The nature of the tracery varied with the development of the Gothic style, and the Decorated, Perpendicular, and Flamboyant periods of Gothic saw

their name to the particular character of their window and other tracery.

Trachea, or **Windpipe**, a fibrous and muscular tube, the wall of which is rendered somewhat rigid by C-shaped hoops of cartilage embedded in the fibrous tissue, forming the air-passage between the back of the mouth and the lungs. At its lower end it divides into the two bronchi, which connect it directly with the lungs.

Tracheotomy, in surgery, the operation of making an opening in the trachea (q.v.) so that air may obtain direct access to the lower air passages. This operation is sometimes necessary after diphtheria or in cases of tumour in the larynx, where breathing has become dangerously impeded. After the operation tubes are inserted to help breathing, and these must in some cases be worn permanently.

Tractor, any small mobile power-unit used for haulage, farm work, road-construction, etc.

Tractors are generally driven by an internal combustion engine, though for the larger machines steam engines are used, while some are electrically driven.

Tractors are either fitted with wheels or with caterpillar tracks like tanks. In the wheeled variety grips or "spuds" are fixed on the rear wheels, while the front, which are smaller, are made to steer. Tracked machines are steered by braking one track and driving the other.

Trade, commerce or business carried on for purposes of gain. In the commercial sense, trade includes all those departments of business which are concerned with the production and exchange of commodities, but excludes those professions whose services do not result in producing "corporeal" wealth.

Trade Board, a Government department established in 1786, consisting in theory of a President (in the Cabinet), the Lord Chancellor, Archbishop of Canterbury, First Lord of the Treasury, the principal Secretaries of State, Chancellor of the Exchequer, the Speaker, and others. The Board never meets, all its functions, which include supervision of all matters relating to trade and industry, mines, the coastguard, merchant shipping and navigation, bankruptcy, etc., being exercised by the President.

Trade Boards, established under Acts of 1909 and 1919 as part of the negotiating machinery in settling industrial disputes. An Act of 1909 instituted boards for four trades in which sweating conditions obtained, composed of representatives of workpeople and employers with neutral members. To-day there are upwards of forty boards, whose chief duty is to fix minimum wage rates, to be confirmed by the Ministry of Labour, under whose control the boards work.

Trade Disputes Act, a measure passed in 1906 sanctioning peaceful picketing and safeguarding union funds against seizure for damages due from individual members. Its effect was greatly to increase the power of Trade Unions, but it was modified in 1927 by the Trade Unions Act (q.v.).

Trade Marks, marks placed on goods to indicate their origin, composition, certification, or other trade qualification, and identifying them as coming from a certain source. A trader has the exclusive right to use a mark which has become associated with his goods; and a register of Trade Marks is kept at the Patent Office, London. A registered trade mark must comply with certain regulations,

and may not be a word in common use merely descriptive of the articles, nor the mere name of a person or business firm. The legal remedies for infringement are by injunction or action for damages.

Trades Union Congress, the body, initiated in 1868, to which most of the British Trade Unions are affiliated; its executive organ is the General Council, elected annually by the Congress. It is affiliated to the International Federation of Trades Unions, is closely connected with the Labour Party, and supports Research and Publicity Departments. Its constituent unions have a membership of some 3½ millions.

Trade Unions, associations of work-people to secure better conditions of labour. They grew up after the industrial revolution of the 19th Century, and especially after the repeal in 1824 of the Anti-Combination Laws which forbade their existence. In 1871 trade unions were given full legal status, and their funds some measure of protection, but picketing was illegal till 1875. The next step in the growth of the power of unions arose out of the legal decision in Taff Vale Railway Co. v. Amalgamated Society of Railway Servants in 1901, that a union was liable for damage arising from the actions of its agents; this was followed by the 1906 Trade Disputes Act (q.v.), which gave union funds complete immunity from claims for damages. In 1868 the Trades Union Congress (q.v.) was established, and in 1926 this body ordered a general strike in support of the miners, an action which led to some curtailment of union powers by the Trade Unions Act (q.v.). The oldest union is the Amalgamated Society of Engineers, founded in 1850. The number of registered unions in Great Britain is now 535, with a total membership of about 4,275,000, a total income from members, unemployment insurance, and other sources of over £10,000,000, and expenditure of over £8,000,000. Their total funds approximate to £16,500,000. There are, in addition, about 500 unregistered unions in Great Britain and Northern Ireland. Most of the unions are affiliated to the Trades Union Congress (q.v.).

Trade Unions Act, a measure passed in 1927 curtailing the power of trade unions. Its principal clauses were those making general strikes illegal, forbidding intimidation of non-strikers, and making subscription to political funds entirely voluntary by substituting a system of "contracting in" for such subscriptions for the old system of "contracting out" by those who did not want to pay.

Trade Winds, the winds which blow in tropical seas; north of the Equator they have a south-westerly direction and are called the N.E. trades, south of it they blow towards the N.W. and are called the S.E. trades. In the Indian Ocean the main direction is modified according to the season, and they are called monsoons. The *Antitrades* extend from the trade-wind regions to near the poles; they are variable, but their general direction is towards the poles.

Trafalgar, Cape, on the S. coast of Spain, at the N.W. entrance of the Strait of Gibraltar, off which was fought the naval battle in which Nelson lost his life after, inflicting (October 21, 1805) a crushing defeat on the fleets of France and Spain.

Trafalgar Square, a square in Central London, in the City of Westminster, from which radiate the Strand, Northumberland Avenue, Whitehall, Pall Mall, Charing Cross Road and

St. Martin's Lane. It was laid out in the second quarter of the 19th Century, and contains the Nelson Monument, 170 ft. high, with Landseer's lions round the base, and several other statues. It is surrounded by many fine buildings, including the National Gallery, Canada Building, and South Africa House.

Traffic. With the rapid increase of population and multiplication of the mechanically-propelled vehicles road traffic has assumed proportions which necessitate elaborate regulation and control. In 1937 road tax returns showed that there were in Great Britain about 1,600,000 cars, close on 500,000 motor-cycles, 420,000 goods vehicles of all kinds (including over 2,000 electrically propelled), 85,000 taxis and motor hackneys, 11,000 tram-cars and 20,000 horse-drawn vehicles. Road traffic is controlled by the Ministry of Transport and the Police jointly. Improvement in control has been effected in the past decade by the installation of automatic green ("go") red ("stop") and amber (transition) lights; yellow globe-shaped beacons ("Belisha" beacons) for pedestrian crossings; "halt" and "slow" signs at major roads; cross-road, bend, school, and road-junction signs; official tests for motor drivers; one-way roads and roundabouts, and road-railings at specially congested spots. The Ministry has also issued, at the price of 1d., a Highway Code, which contains useful hints addressed to all road-users, coupled with an explanation of the signals given by police constables and by others engaged in the regulation of traffic; and a statement of the signals which should be given by drivers and cyclists to indicate their intentions.

Tragedy, like comedy, arose out of "tragic" or members of the tragic chorus in the old Greek satyr-plays were merely mummers dressed as goatherds, whose performances, given originally in honour of Adrastus, were later transferred to the service of Dionysos (Bacchus). In the age of Aeschylus the satyr-play developed into "tragedy," the comic "satyrol" being replaced by more serious figures and the subject-matter becoming more regularly drawn from the Greek epics. With Aeschylus the name "tragodia" attained to dignity and sublimity, and thereafter became restricted to such themes. The essential idea of tragedy is its "kathartic" element, that of heroic man emotionally doomed from the necessities of his character to ruin at the hands of Fate. Among the world's greatest tragic dramatists are Aeschylus, Sophocles, Shakespeare, Racine, Corneille, Lessing, Schiller, Marlowe, and Ben Jonson.

Traherne, Thomas, English poet, born in Herefordshire; author of *Centuries of Meditations* and of a number of religious poems collected and edited by Bertam Dobell in the 20th Century. (c. 1637-1674).

Trajan, Marcus Ulpius, Roman emperor, born in Spain; his great deeds in arms won him a consulship in 91, and in 97 Nerva invited him to be his colleague and successor; a year later he became sole emperor, ruled the empire with wisdom and vigour, set right the finances, upheld an impartial justice, and set on foot various schemes of improvement; suppressed the Christians as politically dangerous, but without extreme steps; remained above all a warrior and true leader of the legions, and crowned his military fame by his successful conquest of Dacia in 101-106, in commemoration of which he is said to have erected the famous Trajan Column, which still stands in Rome. (c. 53-117).

Trajan's Column, erected by Trajan in the Forum at Rome in memory of his

U.E.

victory over the Dacians, and sculptured with the story of his exploits; is 135 ft. in height, and ascended by 185 steps; was surmounted by a statue of Trajan, for which Pope Sixtus V. substituted one of St. Peter.

Trajectory, in dynamics, the path as a planet, comet, or projectile, under the action of given forces. In geometry, a curve or surface which cuts all the curves or surfaces of a given system at a constant angle.

Trams, road vehicles running on rails. They originated in New York in 1855, and in England, Birkenhead was a pioneer in 1880; London followed in the ensuing year. In 1884 a steam cable tram was tried in London, and this was followed about 1900 by the adoption of electricity; the greater mobility and saving in capital outlay of the motor omnibus has tended to render the tram an obsolete form of locomotion, and in many towns it has been or is being replaced by the petrol omnibus or the trolleybus (q.v.).

LONDON TRAM (1861)

Trance, a condition of suspended consciousness, resembling sleep. It is found most commonly among hysterical subjects, and usually involves reduction of breathing and a weakening of the heart's action. It may last from an hour or two to a period of several weeks. The trance state not infrequently leads to vivid dreams or visions during the period of unconsciousness.

Transcaucasia, an extensive tract of territory attached to the Union of Socialist Soviet Republics, stretching E. and W. between the Caucasus (N.) and Turkey in Asia and Iran (S.). It is included in the three Socialist Soviet Republics of Armenia, Georgia, and Azerbaijan, which, until the new U.S.S.R. constitution of 1937, were federated into the Transcaucasian Federal S.S.R., with an area of 75,000 sq. m. and a pop. of about 6 millions. See separate articles on these countries.

Transcendentalism, name now employed to denote the doctrine of Kant and his school, that there are principles of *a priori* derivation, that is, antecedent to experience, that are regulative and constitutive of not only our thoughts but also our perceptions, and whose operation is antecedent to and sovereign over all our mental processes; such principles are denominated the categories of thought. The name is also employed to characterize every system which grounds itself on a belief in a supernatural basis of which the natural is but the embodiment and manifestation.

Transept, any large division of a building lying across, or in a direction opposite to, the main axis. In a Christian church it consists of two wings thrown out between the nave and choir, so as to give the building a cruciform shape; in some cases a second pair of transepts is found between choir and chancel, so that the building as a whole takes the form of a double-armed Greek or archiepiscopal cross.

Transfiguration, the glorification of Jesus Christ on the Mount of Tabor, recorded in the Gospels of Matthew and Mark. A feast in commemoration of it is kept in the Roman Catholic and some branches of the Anglican Church on August 6th.

Transformer, an electrical circuit consisting of two coils for increasing or decreasing the voltage of an alternating current supply. It is found to be more economical to transmit

2 L

electrical power for long distances at a high voltage and to "step down" the voltage at sub-stations in the neighbourhood where the power is required, thus increasing the current.

Transfusion, the transference of blood from one person to another, resorted to in cases of serious loss of blood or exhaustion. A society exists of persons who have expressed their readiness to allow their blood to be used for transfusion in case of need. It is essential that the person from whom the blood is taken belong to a blood group compatible with that of the person to whom his blood is to be transferred.

Transit, in astronomy, the passage of a heavenly body over the meridian or that of an inferior planet, Mercury or Venus, over the sun's disc. The transits of Venus are important to astronomers for working out the earth's distance from the sun. A transit-instrument is a telescope mounted on a horizontal axis for finding the right ascension of a star.

Trans-Jordan, a country extending to the Gulf of Akaba in the S., and divided from Palestine by the Ra. Jordan and Yarmak and the Dead Sea. There is a local Arab administration under an Emir, Abdullah ibn Hussein (son of the late King Hussein of Hejaz), but the administration generally is under the Mandate of Great Britain, whose High Commissioner in Palestine acts in the same capacity for Trans-Jordan. The northern part is elevated country, 4,000 ft. above sea level, falling on its western margin abruptly to the narrow fertile plain of the Jordan valley, and, at its eastern, more gradually to the grass-lands through which runs the Hejaz Railway, and which merges into the desert. This grass-land strip forms the summer pastures of Bedouin tribes who in the winter move farther E. for pasturage. W. of the railway line are wheat and barley lands, but there are frequent failures of crops. Perennial water is found in the deep lateral valleys, which is used to irrigate the culturable land in the valleys, and the large area of fertile land in the Jordan depression. In the N. are many large villages, but the only towns of any size are Amman (the capital), Salt, Kerak and Irbid. The British Government makes an annual grant-in-aid of £60,000 for the administration. The area is about 34,750 sq. m.; the population is believed to lie between 250,000 and 300,000.

Transmigration, a doctrine taught by the Pythagoreans in ancient Greece and by many Eastern religions, that the human soul or spirit after death passes into some other body, human or animal. See *Metempsychosis*, *Re-incarnation*.

Transmutation of the Elements. One of the main objects of alchemy (q.v.) was to discover some method of changing base metals into gold. Though it was unsuccessful in its quest, which for many centuries indeed appeared ridiculous, the work of M. and Mme. Curie in connection with radium showed that this element was spontaneously disintegrating and continuously emitting another element, a third helium, and finally giving a residue of a third element, viz., lead. With growing knowledge it was realized that the chemical atom is not an indivisible, homogeneous body, but a complex of electrical particles, on whose number and arrangement in its atoms its individuality depends. Hence if a method could be found of altering the electrical architecture of an atom, transmutation would be an experimental fact. Lord Rutherford (1871-1937) and other scientists have shown that by bombarding atoms with electrically charged particles moving at enormous speeds, acci-

dental direct hits can be registered, followed by disintegration of the atoms into new atoms of a different species; thus from nitrogen atoms, as a consequence of such bombardment, Lord Rutherford was able to get hydrogen and helium, and since then many other small-scale transmutations have been effected.

Transpiration, the evaporation of exposed surfaces of plants. It takes place generally by the passage of water through the stomata, or tiny openings in the epidermis of the stems and leaves, and is regulated by guard-cells that close and open. It enables the plant to regulate its temperature and the concentration of mineral salts in its sap.

Transport, Ministry of, a government department established in 1919 to take over the duties of the Board of Trade in connection with road and rail transport. All existing departmental powers in relation to railways, tramways, canals, roads and traffic thereon, bridges, harbours and docks were transferred to it. A separate department dealing with roads is attached to the Ministry. Control of public service vehicles and goods vehicles is exercised through Traffic Commissioners appointed by the Minister. The Ministry is responsible for the testing of applicants for motor driving licences. It also carries out the Government's powers and duties dealing with electricity supply.

Transport and General Workers' Union, a British trade union formed in 1922 by the amalgamation of the National Union of Dock Labourers, the National Union of Vehicle Workers, and certain other unions concerned in the transport industry. In 1935 it had a membership of over 600,000.

Transportation, the exile of a convicted person to a penal settlement. The practice developed from the earlier punishment of banishment or abjuration of the realm. Convicts were at first sent to the N. American settlements, becoming in effect the slaves of the settlers; after the War of Independence Australia was substituted, and later Van Diemen's Land, Norfolk Island, the Cape of Good Hope, and Bermuda. In 1853 penal servitude partly, and in 1857 finally, superseded transportation.

Transubstantiation, the doctrine, since the Council of Trent obligatory upon Roman Catholics, that the bread and wine of the Eucharist is, after consecration by a priest, converted into the body and blood of Christ, the substances of the bread and wine being annihilated, though their appearance or "accidents" remain. The doctrine is held by a party in the Church of England, though the "Roman" doctrine of transubstantiation is condemned by the 39 Articles.

Transvaal, a country at SE. Africa of South Africa, stretching northwards from the Vaal R. and bounded N. by Matabeleland, E. by Portuguese E. Africa and Swaziland, S. by Natal and the Orange River Colony, and W. by Bechuanaland and Bechuanaland Protectorate; comprises elevated plateau, but is mountainous in the E.; has a good soil and climate favourable for agriculture and stock-raising, to which latter industry the Dutch farmer chiefly devotes himself; its chief wealth, however, lies in its extremely rich deposits of gold, especially those of the "Rand," of which it exports more than any country in the world; Johannesburg (q.v.) is the largest town, and Pretoria the seat of Government.

In 1856 the region was settled by Dutch farmers, who had "broke" from Natal (recently annexed by Britain) to escape

British rule. In 1877 the Republic came under the care of the British, by whom the natives were reduced and the finances restored. In 1880 a rising of the Boers to regain complete independence resulted in the Conventions of 1881 and 1884, by which the independence of the Republic was recognized, subject to the right of Britain to control its foreign relations. In 1900, during the South African War, it was annexed by Great Britain, and in 1909 became part of the Union of South Africa (q.v.). Area 110,450 sq. m. Pop. 3,340,000.

Transylvania, a district of Rumania; NE. and S. by the Carpathians, containing wide tracts of forest, and one-half under tillage or in pasture; yields large crops of grain and a variety of fruits, and has mines of gold, silver, copper, iron, etc., though the manufactures are insignificant; the population is mixed, consisting of Rumanians, Hungarians, and Germans; it was united to Hungary in 1868, and formed part of the Austrian Empire till 1919, when it was ceded to Rumania. Area, 24,000 sq. m. Pop. 3,400,000.

Trapani, an ancient seaport of Sicily, Drepanum, in the NW., 40 m. W. of Palermo; presents now a handsome modern appearance, and trades in wheat, wine, olives, etc. Pop. 63,500.

Trapezium, a quadrilateral having parallel. A trapezoid is a quadrilateral none of whose sides are parallel.

Trappists, a name given to Cistercian (q.v.) monks from the Abbey of La Trappe, Orne, France, reformed in the 17th Century by Abbot Armand de Rancé, who gave its monks a rule of extreme strictness, including perpetual silence, hard manual labour, and continual abstinence from flesh food.

Trasimene Lake, an historic lake of Italy; lies amid hills between the towns Cortona and Perugia; shallow and reedy, 10 m. long; associated with Hannibal's memorable victory over the Romans 217 B.C.

Travancore, a native state in S. India, under British protection, between the Western Ghats and the Arabian Sea; it is connected with the Madras Presidency. It is traversed by spurs of the Western Ghats, beyond which, westward, is a plain 10 m. wide, covered with coconut and areca palms. Rice, cardamoms, pepper, tapioca, etc., are produced. The population are mainly Hindus, with a fair number of native Christians. Trivandrum is the capital. Area 7,600 sq. m. Pop. 5,100,000.

Traveller's Joy. See *Clematis*.

Trawling, a method of deep-sea fishing nets in the direction of the tide over the sea-bottom. It is practised largely for fishing cod, haddock, and flat fish. The trawling vessels operating off the British coasts usually stay at sea for several weeks at a time, their catch being removed at intervals by fast-sailing boats.

Treadmill,

a form of punishment formerly involved in a sentence of hard labour. It consisted of a large wheel with steps fixed on its periphery, several such wheels being coupled together when necessary for a number of prisoners: the prisoners tread the steps while the warder regulated the speed.

TREADMILL.

Though occasionally used as a source of power, it was generally a completely aimless activity.

Treason, any breach of the allegiance, faith, or obedience due from a subject to the state. The Treason Act, 1351, makes it treason to compass the death of the king, queen, or their eldest son and heir; to violate the king's wife or eldest daughter unmarried; to levy war, etc.; and other Acts passed in 1703, 1796, and 1816, specify similar acts of treachery, such as contriving acts of violence against the sovereign or the realm. It is also treason to endeavour to prevent the person entitled to the Crown under the Act of Settlement from succeeding to it. High Treason, under the 1351 Act, is punishable by death. The sole conviction within recent times was that of Sir Roger Casement, who was executed in 1916 for treason in Ireland during the World War. Treason-felony under the later acts is punishable by penal servitude.

Treasure Trove, wealth for which no owner is forthcoming; it covers money, plate and bullion. Legally the right of ownership is in the Crown, but on surrender of the property the finder is usually allowed to keep it. Inquests may be held by a coroner on the finding of treasure.

Treasury, the Government department which controls the collection and expenditure of the public revenue. Since the 17th Century the old office of Lord High Treasurer has not been filled, and the office has been placed in Commission under Lords of the Treasury, the titular head being the First Lord, an office usually held by the Prime Minister. The minister actually responsible is the Chancellor of the Exchequer.

Treasury Bills, documents issued in return for money borrowed on short-term loans at low rates of interest; they are generally sold by tender to banks. In 1937 the unfunded internal debt of the nation included over £763,000,000 in Treasury Bills.

Treasury Bonds, securities for money borrowed by the Treasury for a fixed term, usually five years, and repayable at par, though sometimes sold below par. In 1937 the National Debt included over £170,000,000 in Treasury Bonds at various rates of interest payable up to 1942.

Treasury Notes, currency notes first issued by the Treasury in August, 1914, and superseded in 1928 by notes for the same amounts issued by the Bank of England.

Treaty, a contract between two states which are, or claim to be, sovereign, or occasionally, as with the Anglo-Irish Treaty of 1922, between a Sovereign State and a community which aspires to that status. In constitutional law the treaty-making power is the prerogative of the Crown or other chief executive, as is the power to conclude peace. A treaty is not binding on its signatories until it has been ratified by the legislatures or governing bodies of the countries between whom it is made. The Covenant of the League of Nations provides that no treaty between members of the League shall be binding till it is registered with that body.

Treaty Ports, certain ports in China and Manchuria open by treaty to the commerce of European nations. The first of such treaty arrangements was made soon after the war of 1856 between Britain and China. There are 43 such treaty ports, in addition to a number of other places open to international trade.

Trebizond, a city and seaport in the NE. of Asia Minor, in Turkey, capital

of a vilayet of the same name on the Black Sea; it has a considerable export trade for Persian and Armenian produce. Pop. (vilayet) 261,000; (town) 29,700.

Treble, the highest part in vocal music, sung by boys with unbroken voices or by soprano.

Tredegar, town of Monmouthshire, Aberystwyth, on the Sirhowy R. It owes its rise to the iron-works established at the beginning of the 18th Century. Coal-mining is also carried on. Pop. 23,000.

Tree, any woody plant springing from the having knots or branches, and perennial in duration. There are four classes of gymnosperm trees; cycads, or sago-palms, maidenhair trees, gnetums and conifers. The maidenhair is an ornamental tree, and sole survivor of an ancient group; low shrubs, and a few varieties of large, broad-leaved tropical trees constitute the gnetums; the conifers include pine, fir, cypress and monkey-puzzle. Of angiosperm trees monocotyledonous examples are palms, bamboos, banana, dragon-trees, yuccas, and screw-pines. The most typical, abundant and important trees are dicotyledonous, comprising the following families: oak, beech, chestnut; poplar and willow; maple; horse-chestnut; laurel, camphor and sassafras; ash and olive; tulip trees and magnolias; elm, fig and mulberry; leguminous trees, e.g., broom, gorse, acacia; rose, apple, plum, and other trees of the Rosaceae family; cinchona and coffee, and others of the Rubiaceae family; and various herbaceous trees.

Tree, Sir Herbert Beerbohm, British his name with vivid character studies, especially as the curate in *The Private Secretary*, he became lessee of the Haymarket and His Majesty's theatres in London. His chief successes were in Shakespearean revivals and dramatized versions of Dickens' novels; in 1909 he was knighted. (1853-1917).

SIR H. BEER-BOHM TREE

Tree-Creeper

(Certhiidae), a family of small climbing birds with long-curved beaks with which they extract their food, insects, from the bark of trees. The species of the typical genus *Certhia* have long, pointed tail-feathers like the Woodpeckers, all others square tails. Included in the genus *Certhia* is the Common Tree-Creeper (*C. familiaris*) of English woods and coasts. It is about 5 in. long, brown and white in colouring.

Tree Frog, a family (Hylidae) of tailless expanded into discs which enable them to climb trees and shrubs by adhesion to the surface. They are generally found in warm climates; they are not represented in Britain. There is a European species, *Hyla arborea*, bright green above and white below; it is sometimes kept as a domestic pet.

Treforest, a town in Glamorganshire, W. Wales, 1 m. S. of Pontypridd. It contains the South Wales and Monmouthshire School of Mines, established in 1914 for training colliery officials. Pop. c. 15,000.

Treitschke, Heinrich von, German historian and political writer, born at Dresden. After studying at Bonn and Leipzig he became lecturer in history at Leipzig University in 1855, and Professor at Freiburg, 1863. In 1866 he removed to Berlin, and afterwards held appointments at Kiel and Heidelberg; Professor at Berlin from 1874, and member of Reichstag from

1871. His works include a *History of Germany in the 16th Century*. His trenchant writings had considerable influence on German public opinion before the World War. (1834-1896).

Trench, in warfare an excavation to ing force or to resist that of the enemy. In the Russo-Japanese War of 1905 it became evident that trench warfare combined with modern explosives was profoundly modifying military tactics, and in the World War they were the characteristic features of fighting on both Eastern and Western fronts, considerable attention being paid to their preparation, fortification and intercommunication. A line of trenches should follow the natural line of the valley, hill, etc., on which it is constructed, and as far as possible be in a concealed position.

Trenchard, Hugh Montague, first Baron, British soldier and airman. Entering the army at the age of 20, he served in the Boer War and later took an active interest in flying. In 1914 he was in charge of the Central Flying School; in 1918 he was made chief of the Royal Air Force Staff, and in 1922 was made Air Chief Marshal, and Marshal of the Air Force in 1927; he was knighted in 1918, and became a baron in 1930, and viscount in 1936; from 1931 to 1935 he was Commissioner of Metropolitan Police. (1873-).

Trent, an English river, rises in NW. Staffordshire, flows NE. and unites with the Ouse, 15 m. W. of Hull. Stoke-on-Trent, Nottingham and Gainsborough are on its banks. The Humber is the joint estuary of the Trent and the Ouse.

Trent, Council of, an oecumenical council, the eighteenth, held at Trento, whose sittings, with sundry adjournments, extended from December 13, 1545, until December 4, 1563. Its object was to define the position and creed of the Church of Rome in opposition to the doctrines and claims of the Churches of the Reformation.

Trentino, a mountainous region of the Adige flows, the chief town of which is Trento. Before the World War it was part of the Austrian Tyrol, but was restored to Italy by the Treaty of St. Germain. The desire to emancipate the Italian population of the Trentino was one of the chief reasons for Italy's participation in the War. There was heavy fighting in the region, especially in May-June, 1916.

Trento, an Italian town in the Trentino, in a valley on the Adige, 60 m. N. of Verona. It was in Austrian possession from 1814 until after the World War, and was the seat of the Council of Trent (q.v.). Pop. 54,000.

Trenton, capital of New Jersey, U.S.A., on the Delaware R., 57 m. SW. of New York; is the great emporium in the United States of crockery and pottery manufactures, and also produces wire, rubber, tiles, etc. Pop. 122,000.

Trepanning, an operation in surgery whereby portions of the skull are removed by means of an instrument called a trepan, which consists of a small cylindrical saw; it is necessary in the case of operations on the brain.

Trespass, in a wide sense any transgression, whereby portions of the person or property; popularly, any unauthorized entry on to another man's land, or interference with his possession of any chattel. Theoretically, every invasion of property, however slight, is a trespass; but despite the familiar notices "Trespassers will be prosecuted," any action for mere trespass would result only in nominal damages being granted, though the costs of the action might be against the trespasser.

Trevelyan, Sir Charles Phillips, British politician, son of Sir George Trevelyan (q.v.). He entered the House of Commons in 1899, served as parliamentary secretary of the Board of Education under Liberal governments from 1908 to 1914, and was President of the Board of Education in the Labour governments of 1924 and 1929. (1870-).

Trevelyan, George Macaulay, British historian; Regius Professor of Modern History at Cambridge since 1927. His works include *England in the Age of Wycliffe*, *England under the Stuarts*, *Garibaldi and the Making of Italy*, *History of the Nineteenth Century*, *History of England*, and *Lives of Bright and Earl Grey*. (1876-).

Trevelyan, Sir George Otto, British politician and author, born at Rothley Temple, Leicestershire; entered Parliament as a Liberal in 1865; held successively the offices of Parliamentary Secretary to the Board of Admiralty, Chief Secretary for Ireland, Chancellor of the Duchy of Lancaster, with a seat in the Cabinet, and Secretary for Scotland; resigned his seat in 1897; wrote *Life and Letters of Lord Macaulay*, *Early History of Charles James Fox*, *The American Revolution*, etc., characterized by admirable lucidity and grace of style. (1838-1928).

Trevithick, Richard, British engineer, invented a steam engine for road traffic in 1796, and has claims to be considered the inventor of the locomotive as later used on steam railways (1771-1833).

TREVITHICK'S STEAM ENGINE

Trial, a law-court's investigation of and decision in a cause. In Anglo-Saxon times facts in criminal cases were determined by compurgation ("compurgators" swore to a man's good character and credibility) or by ordeal; and wager of battle was a customary mode of trial in civil actions. Criminal cases must be tried before a judge or judges and a jury, except that minor offences may be disposed of summarily. (See *Justices of the Peace*; *Magistrate*; *Summary Jurisdiction*.) Civil actions are tried before a judge or judges; before judge and jury; or before an official referee (q.v.). In Admiralty cases the court is reinforced by nautical assessors. See also *Appeal*. In actions for slander, libel, false imprisonment, malicious prosecution, seduction or breach of promise, either party can secure a trial by jury as of right merely by giving notice; in all other cases the trial will be by judge alone, unless an order be made at chambers for a jury. Trial by jury is never allowed in the Chancery Division.

Triangle, in geometry, a plane figure bounded by three straight lines and having three angles, which together amount to 180 degrees. In a right-angled triangle, one angle is a right-angle and the other two less than a right-angle. An obtuse-angled triangle has one angle greater than a right angle.

Trianon, Treaty of, signed between the Allies and Hungary, June 4th, 1920; under it the Dual Monarchy came to an end, parts of Hungary being assigned to Czechoslovakia, Yugoslavia and Rumania, on the ground of the racial affinities of their populations.

Triassic, the geological strata at the base of the mesozoic; the deposits are chiefly sandstones laid down in inland lakes, where the thick deposits of salts typical of this age were formed, as in Cheshire and parts of Germany; in other parts of Europe the triassic age is represented by

limestones of oceanic origin, e.g. the Eastern Alps.

Tribunes, in ancient Rome officers to preserve their liberties and protect them from the tyranny of the aristocratic party, their institution dating from 493 B.C., on the occasion of a civil tumult.

Trichinopoly, capital of a district of same name in Madras Presidency, on the Kaveri, 58 m. inland; it has an imposing citadel, barracks, hospital, etc.; noted for its cheroots and jewellery. Pop. 143,000.

Trichinosis, a disease caused by a small worm, *Trichina spiralis*, which invades the muscular tissues, setting up inflammation. The disease is, so far as is known, incurable.

Tricolour, the flag of the French Republic, republic, first adopted by the French Revolutionists in 1789, and consisting of three vertical stripes, blue, white and red, the blue next the staff.

Trident, three-pronged fork used by the hands of Poseidon, or Neptune, and Britannia, of sovereignty over the sea.

Triennial Act, a measure passed by in 1641, fixed the life of a Parliament at three years. It was repealed by Charles II, re-enacted in 1694, and finally repealed in 1716 by the Septennial Act, which extended the life of Parliament to seven years. The Parliament Act of 1911 reduced the period to five years.

Trier (Trèves), city of Prussia, Germany, many, beautifully situated on the Moselle, 69 m. SW. of Coblenz; it claims to be the oldest German city, is full of most striking Roman remains, and possesses an interesting 11th Century cathedral, having among many relics the celebrated seamless "Holy Coat," said to have been the one worn by Christ; manufactures woollens, cottons, linens, and wine. Pop. 77,000.

Trieste, an ancient town and seaport of Italy, at the head of the N.E. arm of the Adriatic, 214 m. SW. of Vienna; an imperial free city after 1849; consists of an old and a new town on the level fronting the sea; has a fine harbour and extensive manufactures, embracing ship-building and rope-making. It was occupied by Italy at the end of the World War. Pop. 248,000.

Triforium, in architecture, a gallery a church over the arches at the sides of the nave and choir, and sometimes of the transepts in large churches.

Trigonometry, a branch of mathematics, dealing with the relationships that exist between the angles, sides and area of a triangle, but also including a wide variety of mathematical operations of which the simplest are as follows:—Imagine a right-angled triangle PQR with the right-angle PRQ and two acute angles QPR and PQR; QR is at right-angles to PR, and, as regards the angle QPR, we may call PR the base, QR the perpendicular, and PQ the hypotenuse. Then, of the angle QPR, the ratio QR/PQ is called the sine, the ratio PR/PQ is the cosine, the ratio QR/PR is the tangent, the ratio PR/QR is the cotangent, the ratio PQ/PR is the secant, and the ratio PQ/QR is the cosecant. Whatever the size of the triangle, the numerical values of all these ratios remain constant as long as the angle QPR is the same. By a simple use of the ratios, many everyday problems may be solved, e.g., finding the height of a tree by observing the angle between a line drawn from the observer's position to the base and apex respectively, and then measuring the base line. Similar methods, of a much greater

complex mathematical character, are used to solve difficult problems in surveying, astronomy, aeronomics, etc.

Trillium, a genus of perennial plants of the order Liliaceae, with a pink, purple or white single flower. The best-known species is the Wake Robin, *Trillium grandiflorum*, with white flowers, or rose in another variety of the same species.

Trilobites, extinct marine crustaceans with three-lobed bodies, abundant as fossils particularly in the Lower Palaeozoic; their remains are of great assistance to geologists in assigning dates to fossil strata.

FOSIL
TRILOBITE

Trimurti, a representation of the three Hindu gods, Brahma, Vishnu, and Shiva, in the form of a three-headed body, the head of Brahma being in the centre, of Vishnu on the right, and of Shiva on the left.

Trincomalee, naval station and seaport on the N.E. coast of Ceylon, 110 m. N.E. of Kandy; has barracks, official residences, and a fine harbour, a haven of shelter to shipping during the monsoons, and is strongly fortified. Pop. 10,000.

Tring, market town of Hertfordshire, England, 33 m. N.W. of London. The Grand Junction canal passes through the parish. At Tring Park, near the town, are the Rothschild zoological collections. Pop. 4,400.

Trinidad, the largest of the Windward Antilles (q.v.); lies off the mouth of the Orinoco, 7 m. from the coast of Venezuela; is of great fertility, with a hot, humid, but not unhealthy climate; petroleum, asphalt, cocoa, and sugar are the chief exports; a wonderful pitch lake, despite the immense quantities annually taken from it, shows no perceptible diminution; inhabitants are mainly French; taken by the British in 1797, it forms, with Tobago, a crown colony. There was considerable unrest in 1937 due largely to deteriorated social conditions among wage-earners. Capital, Port of Spain. Area, 1,860 sq. m. Pop. 448,000.

Trinitrophenol. See Lyddite and Picric Acid.

Trinitrotoluene, low crystalline solid used as a military high explosive, made by the action of a mixture of concentrated nitric and sulphuric acids upon toluene (q.v.). It is much less liable to explode accidentally than picric acid or lyddite, but its explosive force is not greatly lower. A mixture of T.N.T. with a quarter of its weight of ammonium nitrate, known as amatol, is the principal high explosive of the British services.

Trinity, the doctrine that in the Godhead the doctrine that in the Godhead there are three persons, respectively designated Father, Son, and Spirit—Father, from whom; Son, to whom; and Spirit, through whom are all things. It is held by most of the organized Christian churches, except some of the more recently founded sects.

Trinity House, a body controlling British shipping, lighthouses, lightships, and pilots, founded in 1514 and having its headquarters on Tower Hill, London. The governing officers, known as Elder Brethren, also sit as assessors with the judges of the Admiralty Court when hearing maritime cases.

Trinity Sunday, the Sunday next after Whit-Sunday, kept in the Roman Catholic and Anglican churches as a feast of the Holy Trinity. The feast was instituted for the whole Church by Pope John XXIII. in 1534.

Tripitaka, (the three baskets), name sacred books of Hinayana Buddhism, originally written in Pali. The three sections are the *Sutta-pitaka* (mainly on discipline), *Vinaya-pitaka* (doctrine) and *Abhidhamma-pitaka* (metaphysics).

Triple Alliance, The, name given to the understanding between Germany, Austria, and Italy reached in 1882, and maintained until 1914, when Italy declined to enter the World War with her two allies.

Tripod, a seat with three legs, especially that on which the priestess of Apollo at Delphi sat when delivering her oracles.

Tripoli, the NW. province of Libya, the Italian possession on the N. coast of Africa, adjoining Tunis on the E. Previously under Turkish domination, it was annexed by Italy in 1912. Much of the coast zone is sub-desert; parts of the hinterland are suited to agriculture, and barley and wheat are grown. Parts are suitable for the culture of dates, oranges and olives. Sponge and tunny fishing are carried on off the coast. The largest town is Tripoli (pop. c. 100,000).

Tripolis, a seaport of Syria, 40 m. N.E. of Beirut; a place of great antiquity, and successively in the hands of the Phoenicians, Crusaders, and Mamelukes; it has many interesting Saracenic and other remains; as a trade centre it is losing importance owing to the growth of Beirut. Pop. c. 37,000.

Tripes, the final Honours examination bridge University, so named because when the undergraduates were admitted to their degrees the University Champion sat on a three-legged stool. Originally used only of the examination in mathematics, the term has been extended to cover the final honours examinations in other subjects, such as Classics and Modern Languages.

Triptych, a picture or carving in a set of three compartments side by side and hinged together, each showing a different subject. Such an arrangement was popular with painters of altar pieces, especially in the Renaissance period.

Trireme, an ancient galley carrying three ranks of oars on

GREEK TRIREME

each side, one above another; it was the common form of warship among Greeks and Romans. The length was often as much as 120 ft., with 150 oarsmen.

Tristan da Cunha, the largest of a group of small islands lying in the S. Atlantic, about 1,300 m. S.W. of St. Helena; 20 m. in circumference; taken possession of by the British in 1817, and utilised as a military and naval station during Napoleon's captivity on St. Helena; now occupied by a small pop. of about 160, who live by fruit and potato growing, fishing, and poultry rearing. The islands are dependencies of St. Helena.

Tristram, or *Tristram*, one of the three heroes of medieval romance, the tale of whose adventures, love for Isolt, and tragic end forms an episode in various versions of the Arthurian legend, and is the subject of an opera by Wagner.

Triton, in Greek mythology, a sea deity, son of Poseidon and Amphitrite, with the upper part of a man and a dolphin's tail; often represented as blowing a large spiral shell; there were several of them, serving as heralds of Poseidon.

Triumph, the processional entry into ancient Rome of a victorious general, the leader he had vanquished being sometimes led in chains, with a representative selection of his troops: thus the Celtic hero, Caractacus, figured in the triumph of Claudius. The victor entered by the Porta Triumphalis, in a chariot drawn by four horses, clothed in an embroidered robe with a laurel-wreath on his brow; and having passed along the Via Sacra and through the Forum, entered the Capitol and offered sacrifice to Jupiter.

Triumvir, one of a board of three officials in ancient Rome, such as the triumvirate formed by Julius Caesar, Pompey, and Crassus, 59 B.C.; later, triumvirates were established with constitutional powers limited to a period of five years.

Troglodytes, a race of ancient or prehistoric cave-dwellers supposed by the classical peoples to have lived in Egypt in former times.

Troilus, a son of Priam, King of Troy, killed by Achilles, to whom he had sent a challenge, after oracles had declared that so long as he lived Troy could not be captured. The story of his love for Cressida is the subject of a play by Shakespeare.

Trojan War, a ten years' war between the Greeks and Trojans, consequent upon the abduction of Helen of Troy by Paris; a legendary version of the struggle is the subject of Homer's *Iliad*; it ended with the fall of Troy. Modern research suggests that the legend enshrines memories of a war between the powers on either side of the Aegean for the control of trade routes.

Troll, in Norse myth, one of a race of supernatural beings at one time held to be giants, but later, in Swedish and Danish mythology, conceived as imps or dwarfs dwelling in caves.

Trolleybus, a road passenger vehicle electric power obtained from overhead wires by "trolley poles," connected with the roof of the vehicle and running along the wires on grooved wheels. Twofold wiring and a double pole is necessary, to provide for reception and return of current. By reason of its greater mobility, the trolleybus is superseding the tram (q.v.) in many English and other cities; the whole tramway system of London is to be replaced by trolleybuses by 1940.

Trollope, Anthony, English novelist; (1790-1863) and his brother, Thomas Adolphus (1810-1892) were also prolific novel-writers. He served in the Post Office, being credited with the invention of the pillar-box. His numerous novels depict the clerical and provincial life of England in his time, among them being *Barchester Towers*, *Framley Parsonage*, and *Dr. Thorne*; he also wrote a life of Thackeray. His reputation has increased considerably in the 20th Century. (1815-1882).

Trombone, a powerful brass musical instrument of the trumpet kind, consisting of a long sliding tube terminating in a bell-shaped mouth, the length of the tube being adjustable by means of a slide so as to produce the required note.

Tromp, Martin Harpensteen van, Dutch admiral, born at Briel; trained to the sea from his boyhood, in 1637 was created lieutenant-admiral, and in two years' time had twice scattered Spanish fleets; defeated by Blake in 1653, but six months later beat back the English fleet in the Straits of Dover, after which he is said to have sailed down the Channel with a broom to his mast-head as a sign he had swept his enemies from the seas; in 1653 Blake renewed the attack and inflicted defeat on him after a three days' struggle; in June and July Tromp was again

defeated by the English, and in the last engagement off the coast of Holland was shot dead. (1597-1653).

Tromsø, port of NW. Norway, on an island at the mouth of the Bals Fjord, occupied in fishing. Pop. 10,300.

Trondhjem, former name of Nidaros, the ancient capital of Norway, on Trondhjem Fjord, 350 m. N. of Oslo; possesses a fine 13th-Century cathedral, where the kings of Norway are crowned; carries on a trade in copper ore, herring and timber. Pop. 54,500.

Troon, a seaport of Ayrshire, Scotland, in the parish of Dundonald, 75 m. S.W. of Edinburgh. It has a safe harbour and two dry docks. Ship-building is carried on. Pop. 8,500.

Tropical Medicine, the branch dealing with diseases peculiar to or generally contracted in the tropics. It has become of great importance owing to the facility with which white men in hot countries contract diseases to which the native races are frequently almost immune, such as malaria, dysentery, yellow fever, trypanosomiasis, etc. Important research work has been carried on at the London School of Tropical Medicine, and at the schools at Liverpool, Paris and Berlin; and the greatest English name in the field of their study is that of Sir Ronald Ross.

Tropics, two parallels of latitude on either side of the Equator at a distance of 23½° therefrom, which mark the limits N. and S. of the area in which the sun cannot be vertically overhead. The northern tropic is called the Tropic of Cancer, the southern that of Capricorn.

Trossachs, a romantic pass in the Perthshire Highlands, 8 m. W. of Callander, stretching for about a mile between Lochs Katrine and Achray.

Trotsky, Lev Davidovich, Russian politician, born at Kherson, his original surname being Bronstein. When 22 he was exiled to Siberia for revolutionary activities, and took a prominent part in the 1905 revolution, after which he had a second period in exile. He escaped to France after a few months, and did not return to Russia till 1917, when he helped to engineer the revolution that overthrew Kerensky (q.v.). Under Lenin he became Commissar for Foreign Affairs and for War, and remained a power throughout Lenin's life-time, but on Stalin's accession to power their difference of views as to the development of the approach to Communism became acute, and Trotsky was first of all exiled to the Turkestan frontier and later banished from Russia, after which he was allowed to reside successively in the island of Prinkipo, France, Norway, and Mexico. His followers, actual and alleged, in Russia were suppressed and in many cases executed, but his great influence outside that country drew round him many left-wing elements who did not agree with Stalin's policy, and by 1938 he was the recognised centre of a "Fourth International" with branches in many countries. (1879-).

Trotting, a sport in which horses race at a trot, pulling a light two-wheeled vehicle. It is very popular in the U.S.A. and Canada, but in Great Britain, although it is followed to some extent at one or two courses, it has not attained great popularity.

Troubadours, a class of poets who flourished in Provence, E. Spain and N. Italy from the 11th to the 13th Centuries, whose songs in the *Langue d'Oc* were devoted to subjects typical and amatory. They were not infrequently men of noble birth and bore arms as knights, and were thus distinguished from the *Jongleurs*, who were strolling minstrels.

Trout, the name of a number of fish of the family Salmonidae, closely resembling the salmon, but smaller, found in lakes, rivers and seas of the temperate and colder regions of the Northern Hemisphere. The common river trout

COMMON TROUT

(*Salmo fario*) is abundant in Britain, and runs usually from 1 to 1½ lb. in weight, though much larger fish are recorded. Its back is mottled with dark red-brown spots on a yellow ground, while the under-parts are silvery-white. There are a number of other species found in the British Isles, both sea- and stream-dwelling, the former visiting inland waters for spawning. They include the Sea Trout (*Salmo trutta*), the Bull Trout (*Salmo erioz*), the Gillaroo Trout (*S. domaticus*), the Loch Leven Trout (*S. leuvenensis*), etc.

Trouvères, a class of ancient poets in Northern France, who like the Troubadours of Southern France were of court standing, but whose poems, unlike those of the Troubadours, were mainly narrative or epic.

Trouville, holiday resort and fishing town of France, in the dept. of Calvados, 10 m. S. of Havre, on the R. Touques opposite Deauville. Pop. 6,500.

Trover, in law an action which lay for a personal chattel, so that the person entitled thereto was deprived of it or of its use. Both action and name are now obsolete, other methods of gaining redress having replaced it.

Trowbridge, a market town of Wiltshire, England, 25 m. NW. of Salisbury; has a fine 15th Century Perpendicular church, in which the poet Crabbe is buried; has woollen and fine cloth manufactures. Pop. 12,000.

Troy, a city of Troas, a territory NW. of Mysia, Asia Minor, celebrated as the scene of the world-famous legend immortalized by the *Iliad* of Homer. The site of the city was identified in 1870 by Schliemann at Hisarlik, where a number of successive settlements have been traced, the sixth of these being the Troy of the Homeric story.

Troy, city of New York State, U.S.A., on the Hudson R., 5 m. above Albany; it manufactures hosiery, underwear and machinery. Pop. 73,000.

Troyes, town of France, capital of the dept. of Aube, on the Seine, 100 m. SE. of Paris; possesses a fine Flamboyant Gothic cathedral, founded in 872, and several handsome old churches; has flourishing manufactures of textile fabrics and trades in agricultural produce; here in 1420 was signed the Treaty of Troyes, making good the claims of Henry V. of England to the French crown. The name "Troy weight" comes from that of the town. Pop. 58,000.

Troy Weight, a system of weights used for dealings in the precious metals; it is based on the troy grain, of which 7,000 make an avoirdupois pound. 24 troy grains make one pennyweight (abbreviated dwt.), and 20 pennyweights one ounce. There is no troy pound.

Truce, a cessation of hostilities by agreement for a fixed time; in international law it is the same as an armistice (q.v.). The Declaration of Brussels and the Hague Conventions contain, however, only very vague provisions on truces, and it appears that if the duration is not agreed upon the belligerents may resume operations at any time, on due warning being given. The bearing of a flag of truce is inviolable, though his immunity is lost on proof positive that he has taken advantage of his position to provoke or commit an act of treachery.

Truck System, the partial or entire payment of wages in goods in place of money; it was common in the early days of the factory system, when works were often situated at a distance from trading centres. The supply of inferior goods and other abuses led to legislation (known as the Truck Acts) forbidding employers to lay down conditions as to the way workmen shall dispose of their wages.

Truffle, a subterranean fungus, especially those of the genus *Tuber*, the commonest being *Tuber aestivum*, black and warty in exterior, found in oak and beech woods in this country. They are highly esteemed by epicures, and are collected in Southern France and in Italy for eating. Pigs and dogs are used to hunt for truffles.

Trujillo, Ciudad, modern name of the capital of the Dominican Republic. It is better known as Santo Domingo.

Trumpet, a brass wind instrument, of tubular shape, with a cup-shaped mouthpiece. It is one of the oldest of musical instruments, and has been used in war and for religious purposes since very early times. The modern trumpet is frequently coiled, and fitted with valves and slides which have considerably increased its compass.

Trumpet Flower, or *Ipomoea*, a genus of fine climbing plants with large tubular flowers. There are 150 species, all native to tropical or hot countries, but some cultivated in England as greenhouse plants.

Truro, episcopal city and seaport of Cornwall, England; exports tin and copper from surrounding mines; its cathedral, consecrated in 1887, was, except for St. Paul's, London, the first built in England since the Reformation. Pop. 11,800.

Trust, an equitable obligation binding a person or persons called the trustee or trustees to deal with property under his control for the benefit of others called the beneficiaries or *cestui que trust*; the trustee himself may be one of the latter, and any beneficiary may take steps to enforce the obligation. A trustee generally has what is called the "legal ownership" of the trust property. An original trustee is generally appointed by the creator of the trust either expressly or by implication. No one can be compelled to act as trustee. Trusts do not fall by a failure of trustees, and if necessary the court will appoint trustees, or new trustees may be appointed by the person, if any, nominated in the trust instrument to do so. Trustees can only invest their trust funds in certain specified securities, and most deeds or wills appointing trustees indicate in what securities the trust may be invested. See also Public Trustee. Charitable Trusts are trusts for the relief of poverty, the advancement of education or religion, or other purposes beneficial to the community, and, unlike a trust for public purposes, there need be no great degree of certainty as to the objects intended to be benefited, provided only the donor manifests a general intention of charity.

Trust, or Combine, a union of business organizations or firms, designed generally to eliminate competition and reduce costs, and thereby to control prices. Commercial trusts figured prominently in American politics before the World War. The Standard Oil Trust, instrumental in making the vast Rockefeller fortune, was the most powerful of such combines. Legislation intended to prevent their formation has been passed in the U.S.A., but without a great deal of success. The name cartel, also in use for such combinations, is taken from the list of prices (*Cartel*) agreed on in common by the combining companies or firms.

Tsar, or *Czar*, a name derived, like *Kaiser*, from the personal name *Cæsar*, used as a title by various Slavonic rulers, including the Russian emperors from Peter the Great to 1917, the medieval rulers of Serbia and Bulgaria, and the modern Bulgarian kings.

Tsarskoye Selo, town in the U.S.S.R., 15 m. from Leningrad, now renamed *Detskoye Selo*; the summer palace of the for er Czars was situated here.

Tsetse-Fly, an African genus (*Glossina*) of dipterous insects, many of which act as carriers of parasites, called trypanosomes, which are responsible for several tropical diseases of animals and man. There are eighteen recognised species, of which two are carriers of the parasite *Trypanosoma gambiense*, responsible for sleeping sickness (g.r.) and most of the others, including *Glossina brevipalpis*, carriers of fly-disease or nagana of cattle, camels, horses, etc.

TSETSE-FLY
(*G. brevipalpis*)

Tsinanfu, capital of Shantung province, China, close to the Yellow R., about 180 m. W. of Kiaochow; it trades in silk and precious stones. Pop. 621,000.

Tsingtao, treaty port of China, on Kiaochow Bay, in the province of Shantung. Leased to Germany before the World War, it was captured in 1914 by a British-Japanese force, and in 1922 was restored to China by Japan. Pop. 515,000.

Tsushima, island of Japan, S. of Korea, from which it is separated by Tsushima Strait, the scene of a Russian naval defeat by the Japanese during the Russo-Japanese War. Area 262 sq. m. Pop. 39,000.

Tuaregs. See *Berber*s.

Tuba, the deepest-toned of the brass wind musical instruments, introduced by Wagner into the orchestra. It is also called the bombardon.

Tuber, in botany, the swollen end of an underground shoot of a plant; root-tubers are swollen adventitious roots. The swollen stems in the rhizome of plants are thus enlarged to allow of a storage of carbon-compounds for renewal of growth, as in the stem tubers of the artichoke and potato.

Tuberculosis, an infective disease produced in man and cattle by a tiny organism, *bacillus tuberculosis*, isolated by Koch in 1882. Tiny nodules or tubercles are formed in the tissues, and the symptoms are cough, feverishness, difficulty in respiration, and gradual wasting. Any tissue may be attacked, but the commonest seats of the disease are the lungs, joints, bones, and intestines. A rapid form ("galloping consumption") and a more gradual chronic form are recognised. Although the disease is probably not hereditary, a predisposition to it is; certain occupations such as coal mining, lack of fresh air, poor nutrition, and many other causes render its onset more likely. Infection is frequently conveyed by the sputum of sufferers. Attempts at tuberculosis prevention are among the most important activities of sanitary authorities, and many local authorities have established clinics and sanatoria for treatment of the disease.

Tübingen, university town of Württemberg, Germany, 18 m. SW. of Stuttgart. Under Melancthon and Reuchlin the old university became a dis-

tinguished seat of learning, and later, during the professorship of Baur (g.c.), acquired celebrity as a school of advanced Biblical criticism. Pop. c. 30,000.

Tudor, the family name of the royal house that occupied the English throne from 1485 (accession of Henry VII.) to 1603 (death of Queen Elizabeth), founded by Owen Tudor, a Welsh gentleman, who became Clerk of the Household, and subsequently the husband of Catherine of Valois, widow of Henry V.; their son, Edmund, Earl of Richmond, married Margaret Beaufort, a direct descendant of Edward III., and became the father of Henry VII.

Tuesday, third day of the week, named after Tiw, an old Saxon god.

Tugela, a river in Natal running eastwards for about 300 m. to the sea near the Drakensberg and ending in the Indian Ocean near Port Durnford. It was the scene of a series of engagements in mid-winter 1899-1900 in the Boer War, Buller making several attempts to cross it to reach Ladysmith, and succeeding after six reverses.

Tuileries, an old royal palace in Paris, of which only the gardens now remain. The palace was built in 1664 on the site of a former tiltyard, whence its name. Louis XVI. lived there after his arrest during the French revolution, as did subsequent rulers, until the palace was destroyed in the fighting during the Commune in 1871.

Tula, capital of a former government of the same name in Central Russia, 107 m. S. of Moscow, a busy centre of firearms, cutlery, and other manufactures. Pop. 200,000.

Tulip, a genus (*Tulipa*) of bulbous plants of the order Liliaceae, most of the

garden varieties, of which there are over 1,000, being derived probably from *Tulipa gesneriana*, native to the Near East, and introduced into Europe in the 16th Century. The flower became extraordinarily popular in the Netherlands, and huge prices were paid for rare specimens by the Dutch about 1630, giving rise to a craze which received the name of "tulipomania." Tulips of the large double variety are very showy flowers, the best being *Imperator rubrorum*, Duke of York, La Candeur, etc. Tulips are suitable for forcing in pots. Their colours, which vary over a very wide range, include rich crimsons bordered with orange, pure white, scarlet and yellow, and crimson pink or scarlet markings.

TULIP

Tulip Tree (*Liriodendron tulipifera*), a tall American forest tree, of the order Magnoliaceae, whose flowers superficially resemble those of the tulip. It grows to a height of over 120 ft., and its light, compact wood is used for many purposes.

Tulle, a town of France, capital of the dept. of Corrèze, 115 m. N.E. of Bordeaux. It is a cathedral city with manufactures of firearms, playing cards, etc. The fine silk fabric which takes its name from it is no longer manufactured here. Pop. 17,000.

Tulsa, city of Oklahoma, U.S.A., 130 m. N.E. of Oklahoma City, in the midst of a great oil-producing region; bricks, trees, pipes, glass, and machinery are among its manufactures. Pop. 141,000.

Tumbrel, a covered cart used for the transport of army stores; the name was also applied to the carts in which prisoners in the French revolution were conveyed to execution, and to the small-stools or ducking-stools in which women accused of nagging were formerly ducked in ponds.

Tumor, any morbid parasitic bodily growth, generally, but not always, accompanied by swelling. Tumors are usually divided into simple and malignant. The latter include cancer (q.v.) and sarcoma (q.v.). Simple tumors may be either tumors of normal tissue or hollow tumors or cysts. Simple tumors may be growths from a gland (adenoma); tumors of fibrous tissue (fibroma); growths on a nerve (neuroma); growths on a bone (osteoma); and so on. Treatment is generally operative, though X-rays and radium may give relief.

Tumulus, an artificial burial mound, and shape, erected by primitive races almost all over the world. Many examples exist in England, especially in the neighbourhood of Wiltshire, a particularly imposing example being Silbury Hill, over 100 ft. in height, near Avebury. Excavations have frequently revealed burial urns, stone coffins, domestic implements, etc.

Tunbridge Wells, spa and resort town in Kent, England, on the Sussex border, popularized by King Charles II.; 34 m. S.E. of London, and 4 m. S. of Tonbridge (q.v.). It has a Pump Room and chalybeate springs. Pop. 33,500.

Tundra, name for the immense tracts of marshland which cover the northern regions of Asia, Europe and America around the Arctic Circle. They are mainly covered with mosses and lichens, with some flowering plants, but in winter are frozen and snow-covered. The scanty population consists of food-gatherers (hunters and fishers). The animal life is mainly reindeer and caribou.

Tungsten, a metallic chemical element belonging to the same group as chromium, molybdenum and uranium. Symbol W; atomic number 74; atomic weight 184.0. Its commonest ore, found in Cornwall and elsewhere, is wolfram or ferrous tungstate, from which the metal is extracted by boiling with hydrochloric acid to get the trioxide, and then strongly heating the latter with carbon. Tungsten is chiefly used in making alloys and special forms of steel, and as the material of the filaments in electric lamps.

Tunis, a country of N. Africa, since 1882 an eastern protectorate of France; forms the Mediterranean to the N. and E., and stretching S. to the Sahara and Tripoli. The inhabitants are mainly Bedouin Arabs, the European population of about 215,000 being mainly French and Italian in almost equal numbers. It presents a hilly, and in parts even mountainous aspect; its fertile soil favours the culture of fruits, olives, wheat, dates and esparto; the exports include grain, marble, phosphate, dates, vegetable oils and wines. The chief towns are Tunis, the capital, a few miles from the ruins of Carthage (pop. 220,000), Sfax, Sousse and Kairouan. Area, 45,000 sq. m. Pop. 2,003,000.

Tunnel, a horizontal or slightly inclined gallery beneath the surface of the ground; generally used for the passage of a railway, road, canal or aqueduct. The method and rate of tunnelling depend mainly on the nature of the soil to be excavated, which is generally ascertained by boring and trial shafts. The roofs and walls are supported by arched masonry or concrete, excepting where the rock will hold without support; this lining is usually carried over the floor so as to form a tubular structure. Drainage is effected by side channels in the floor, or by culvert, all tunnels being constructed with a gradient to allow the water to drain off; a sewer is also constructed down the middle of the tunnel under the surface, having inlets from gullies on either side. Ventilation is

effected by vertical shafts or, in some cases, by fans. The London tube railway tunnels, excavated in clay, are lined with triple segments of iron rings bolted together, thus making of the tube a complete circle. The longest tunnel in England, apart from those of the London tube railways, is the Severn Tunnel, 4½ m. long; the longest in Europe is the Simplon tunnel, in the Alps, 64,970 ft. (over 12 m.) in length.

Tunny, or Tuna (*Thunnus*), a genus of sea fish related to the Mackerels, the most important

species being the Common or Short-finned Tunny (*Thunnus thynnus*), a dark-blue and grey marine edible fish, with a large mouth and conical teeth; useful also for its oil; it sometimes reaches 12 ft. and more in length and weighs up to three-quarters of a ton. It is found in all warm seas, especially the Mediterranean, and, during summer, in British waters. It is caught either by netting and clubbing or by rod and line, when it is one of the largest and best sporting sea fish. The fish was esteemed by the Carthaginians and Romans.

TUNNY

Tunstall, a market town of Staffordshire, England, 4½ m. N.E. of Newcastle-under-Lyme, with coal mines, potteries and ironworks. It is now a part of the city of Stoke-upon-Trent (q.v.).

Tupper, Martin Farquhar, English author, born in Marylebone; wrote some 40 works, all forgotten, but the *Proverbial Philosophy* (1838), though little read now, had a quite phenomenal success, having sold in hundreds of thousands, as well as being translated into various foreign languages. (1810-1889).

Turban, an Eastern male headdress, made by coiling a length of linen, silk, taffeta, muslin, etc., either round a cylindrical cap or directly round the head. In some countries its colour and style vary with the rank or occupation of the wearer. It is a part of the uniform of many Indian military regiments.

Turbine, a device in which steam from a boiler at high pressure is directed by jets, or by guide vanes, against blades fixed to the outer surface of a drum, the energy of the escaping steam causing the drum and its blades to rotate. The steam is allowed to expand in a number of separate stages. The steam from the boiler passes first through jets, or a set of fixed blades, where it expands slightly, and a fraction of its pressure energy is used in setting the steam in motion. The moving steam now falls on a set of moving blades and in passing through them gives up its kinetic energy to the blades. The steam is now allowed to expand in passing through a further set of jets or stationary blades, and is directed against a second set of moving blades, and so on. In this way the expansion of the steam is so controlled that its speed, at all stages, is that required for efficient working. Water turbines work in a similar way, but only one set of moving blades is required in each turbine. If the head of water is low, the rotor may have blades similar to those of the propeller of a ship. For medium heads, up to about 500 ft., the water may be delivered horizontally against the blades of a rotor, whose axis is horizontal and whose blades are upright. The Pelton wheel, used for heads greater than 700 ft., has curved buckets mounted like those of a water wheel, and is driven by jets of water directed into the buckets.

Turbot (*Rhombus maximus*), a large scaly flat fish with scattered tiny tubercles on the left or eyed side, varying in colour from grey to brown. It resists a

weight of over 1 lb. and is a valuable food fish.

Turenne, *Vicomte de* (Henri de la Tour d'Auvergne), Marshal of France, born at Sedan; was trained in the art of war under his uncles Maurice and Henry of Nassau in Holland, and entered the French service in 1630 under the patronage of Richelieu; gained great renown during the Thirty Years' War; during the wars of the Fronde (q.v.) first sided with the "Frondeurs," but subsequently joined Mazarin and the court party; crushed his former chief, Condé; successfully invaded the Spanish Netherlands, and so brought the revolt to an end; was created Marshal-General of France in 1660; subsequently conducted to a triumphant issue wars within Spain (1667), Holland (1672), and during 1674 conquered and devastated the Palatinate, but during strategical operations conducted against the Austrian general Montecuculi was killed by a cannon-ball. (1611-1675).

Turgenev, Ivan, Russian novelist and short story writer; he was the first of the writers of his country to achieve international fame, and was also the inventor of the name "Nihilist" to describe the Russian anarchist movement; he was a keen progressive thinker, and lived for many years in Paris. Among his works are *Smoke*, *Fathers and Sons*, *Virgin Soil*. (1818-1883).

Turin, (Torino), city of N. Italy, and formerly the capital of Piedmont, 80 m. NW. of Genoa; from 1860 to 1865 it was the headquarters of the Italian government. It contains a Renaissance cathedral, royal palace, university, and military academy; its manufactures are mainly of textiles, paper, and earthenware. Pop. 630,000.

Turkestan, a wide region in Central Asia, divided between China and Russia; the Chinese portion forms the province of Sinkiang (q.v.), while Russian Turkestan is included in the Turkmen, Uzbek and Tadzhik Soviet Republics (q.v.). The inhabitants are of mixed Mongol and Aryan race, the former predominating; the chief religions are Islam and Buddhism. A considerable part of the population is still nomad, but under Russian influence the country is being rapidly industrialized and settled.

Turkey, a republic in Western Asia and Eastern Europe, occupying the whole of Asia Minor or Anatolia, and in Europe a part of Eastern Thrace, including the city of Constantinople (Istanbul) and its hinterland. The principal industry is agriculture, wheat, barley, cotton, tobacco, olives, figs and fruits being produced; minerals are not as yet greatly worked. Industrialization is rapidly proceeding, textiles, glass and paper being the main industrial products. The people are mostly Mohammedans, but there is no longer a state religion. Education is rapidly progressing, especially since the adoption of the Latin in place of the Arabic alphabet in 1928. There is a university at Istanbul. The capital is Angora (pop. 123,000); other large towns are Istanbul, Izmir (Smyrna), Adana and Bursa.

Of Central Asian origin, the Turks or Ottomans conquered the Eastern Roman Empire, and captured Constantinople in 1453, spreading later throughout the Balkans, even reaching Hungary. From 1700 parts of the Ottoman Empire broke away; after the Treaty of London that ended the first Balkan War in 1913 the boundary of Turkey in Europe became a line from Enos to Midia, thus excluding Adrianople, which was regained in the second Balkan War; after the World War Turkey was forced to cede Syria, Palestine, Mesopotamia, and all her other Arabian possessions. In 1923 the government, under Mustafa Kemal, was moved to Angora, and the country began to advance rapidly

on Western lines; government is carried on by a National Assembly or Kamutay, with a President. In 1936 Turkey regained the right to militarize the Dardanelles and Bosphorus, which had been forfeited after the World War. Area, 294,500 sq. m. Pop. 18,160,000.

Turkey, a genus (*Meleagris*) of gallinaceous birds, native to N. and Central America, largely bred for food both in the U.S.A. and Britain. The common species is the Mexican Turkey (*Meleagris gallopavo*), from which all domesticated varieties descend; it is bronze-red in colour, with bright red wattles in the male. The Honduras turkey, *Meleagris ocellata*, is remarkable for its beautiful and brilliant plumage and "eyed" tail feathers.

TURKEY

Turkmenistan, a republic of the U.S.S.R., S. of Kazakstan, N. of Iran and Afghanistan, and E. of the Caspian Sea. The population are mainly Turkomans (q.v.) of the Mohammedan faith; agriculture is the main occupation. Cotton, wool, Astrakhan fur, horses and carpets are produced. The capital is Ashkhabad; other towns are Merv and Leninsk. Area, 171,400 sq. m. Pop. 1,269,000.

Turkomans, a nomad Mohammedan race found in Northern Iran and the surrounding countries, especially Turkmenistan (q.v.).

Turks Islands, a group of small West Indian islands, forming with the Caicos Is. a dependency of Jamaica, but geographically part of the Bahamas. The seat of government is Grand Turk. (Pop. 1,600).

Turmeric (*Curcuma longa*), a plant of the E. Indies for the ginger family, cultivated in the E. Indies for the sake of its roots, which contain a resin used as a yellow dye. It is also used as a testing material for alkalis in chemistry, and for a condiment in curries.

Turner, Joseph Mallord William, English landscape painter, born in London; began to exhibit at 15; was elected Associate of the Royal Academy at 24, and made an Academician at 28; in 1808 he became professor of perspective at the Academy. One of the greatest of landscape painters, his work was greatly admired and popularized by Ruskin. A large number of his paintings, remarkable for their vivid colour effects and especially for their sunsets, are in the National Gallery, among them "Ulysses deriding Polyphemus," "The Evening Star," "A Frosty Morning," and "The Fighting Temeraire." (1775-1851).

J. M. W. TURNER

Turnip (*Brassica campestris rapa*), a biennial of the cabbage family (Cruciferae), indigenous to Europe, cultivated as a food plant for both man and animals. The turnip proper is a rounded root, broader than it is long, with lobed root leaves, and a rough and hairy surface. The young two-year shoots called turnip-tops are used as early table greens. The root contains little nutriment, as it is 90 per cent. water.

Turnpike, a barrier on a highway or on a turnpike, which tolls (q.v.) were collected from passengers, vehicles, animals, etc.,

in passage, the receipts being used to pay for the upkeep of the road. The turnpike is now almost extinct, but a few local instances still survive in England.

Turnstone (*Arenaria interpres*), a small, widely distributed shore-bird so called from its habit of turning over pebbles in search of crustaceans and other prey. It is a winter visitor to Britain and breeds in the Orkneys and Shetlands. The plumage is reddish-brown above and white below, the breast, head and neck being strongly marked with black, legs orange.

Turpentine, a mixture of resin and oil secreted in the stems of pine trees and other conifers, such as the Palestinian terebinth. The oil in which the resins are dissolved, known as oil of turpentine, is a colourless fluid used in making paints and varnishes, and in medicine as an irritant. There are several varieties, generally named after their country of origin.

Turpin, Dick, English highwayman, born in Essex, and a hero of popular legend; celebrated in Ainsworth's *Rookwood* for his ride to York though actually the deed with which he is credited was performed by Nevson, a fellow-highwayman. He was hanged at York for horse-stealing. (1706?-1739).

Turquoise, an opaque azure gemstone, a basic aluminium phosphate, blue or green in colour, generally found in slate rock. The trachyte veins of Nishapur in Iran yield a good ornamental variety, and the mineral is also found in the Sinai peninsula, and in New Mexico in the U.S.A.

Turret, a small tower, forming part of a building for ornamental purposes, notably in Tudor architecture. In medieval castles turrets were erected both for observational and defensive purposes. The cylindrical rotating tower of a battleship in which the guns are carried so that they can be ranged in any required direction is also given the name.

Turtle, general name for members of the order Chelonida of the class Reptilia, especially of the marine species of True Turtles of the family Cheloniidae. They have compressed fin-shaped non-retractile feet, with toes enclosed in a common skin, from which only one or two claws project. The most prized is the Green Turtle (*Chelone mydas*) from which turtle soup is made; it sometimes attains a length of 4 ft. The Hawksbill Turtle (*Chelone imbricata*) with a hooked beak is the species whose horny shields furnish much of the tortoise-shell of commerce. *Dermochelys coriacea*, or the marine Leathery Turtle, is the largest, reaching 7 ft. in length; in it the carapace is replaced by a number of small plates embedded in the skin. The Snapper and Alligator Turtles of the family Chelydridae are found in N. America in fresh water.

LEATHERY TURTLE

Turtle Dove (*Streptopelia turtur*), the smallest of the British doves; haunting woods and coverts, it is generally pinkish below and reddish-brown above, with grey neck and head and white-tipped tail feathers. It is a summer visitor to England, arriving about the middle of May. urban district of Lancashire.

Turton, England, 4 m. N. of Bolton. It is chiefly engaged in the cotton industry. Pop. 11,894.

Tuscany, a dept. of Italy, incorporated in the kingdom in 1859, before which it was an independent

grand duchy; lies S. and W. of the Apennines, fronting the Tyrrhenian Sea on the W.; mountainous in the N. and E., but otherwise consisting of fertile dale and plain, in which the vine, olive, and fruits abound; silk is an important manufacture, and the marble quarries of Siena are noted; formed a portion of ancient Etruria (q.v.); the largest town is Florence; other towns are Siena, Arezzo, Pisa, Lucca, and Leghorn. Area, 8,850 sq. m. Pop. 2,975,000.

Tussaud's, Madame, a well-known figures in London, established by a Swiss woman, Madame Tussaud, born in Berne, who brought her collection of waxworks from Paris to London in 1802. The exhibits include politicians, royal personages, criminals, sportsmen, writers and artists, and other public figures of all kinds. The building in which it was housed in Marylebone Road was destroyed by fire in 1925, but has since been rebuilt and the collection replaced.

Tussock, or Tussock Grass (*Dactylis cæspitosa*), a species of tall grass, native to the Falkland Is., which has been introduced into Britain as a fodder plant. In its native islands the stem and shoots are eaten as a human food.

Tutankhamen, a king of Egypt of the 18th dynasty, who flourished about 1350 B.C. The Earl of Carnarvon discovered his tomb at Luxor in 1922, finding his mummy intact and the tomb full of priceless treasures.

Tver (now Kalinin), city and river port of Russia, in the Moscow industrial area, on the Volga, 90 m. NW. of Moscow. Woollens, cotton and leather are made. Pop. 145,000.

Twain, Mark, pen name of Samuel Langhorne Clemens (q.v.).

Tweed, a fabric of wool, or cotton and wool, much used for clothing, and manufactured largely in Ireland ("Donegal" tweeds) and Scotland, especially the Hebrides ("Harris" tweeds). It is frequently woven in two colours from yarns dyed before weaving.

Tweed, a river of Scotland, rises in the S. of Peeblesshire, and flows for 97 m. in a generally north-eastward direction; enters the North Sea at Berwick; it is a favourite resort of salmon fishers.

Twelfth Night, the eve of the feast of the Epiphany, and at one time an occasion for revels, particularly the baking and eating of a so-called Twelfth Cake.

Twickenham, borough of Middlesex, 11½ m. SW. of London; a fashionable resort in the 18th Century; the dwelling-place of Pope, Horace Walpole, Turner, and others. It now includes Teddington and Hampton (q.v.), with Hampton Court Palace. It is the headquarters of the English Rugby Union, on whose ground here international matches are played. Pop. 90,000.

Twins, name given to two individuals produced at a single birth; they may result either from the simultaneous fertilisation of two ova ("uterine twins"), or from the division of a single ovum after fertilisation ("true" or "identical" twins). Twins of the latter variety are always, those of the former not necessarily, of the same sex, and frequently resemble each other very closely in physical and mental characteristics.

Tyburn, a turnpike gate that formerly stood close to the present site of the Marble Arch, London; it was the practice publicly to hang criminals here, after drawing them on a hurdle from Newgate Prison, the last such execution occurring in 1783. The name was derived from that of a small tributary of the Thames, rising in Hampstead and now flowing underground.

Tyler, John, tenth president of the United States, born at Charles City, Virginia; became a barrister; elected vice-president of the United States in 1840, and on the death of Harrison succeeded to the presidential office; showed much independence and strength of mind, exercising his veto on several occasions; the Ashburton Treaty and the annexation of Texas were the principal events of his presidency; made strenuous endeavours to secure peace in 1861, but falling sided with the South, and was a member of the Confederate Congress. (1790-1862).

Tyler, Wat, a tiler in Dartford, Kent, who roused into rebellion the long-discontented and over-taxed peasantry of England by striking dead in 1381 a tax-gatherer who had offered insult to his young daughter. Under Tyler and Jack Straw, a peasant army was mustered in Kent and Essex, and a descent made on London. The revolt was disconcerted by the tact of the young king Richard II. (q.v.), and in a scuffle Tyler was killed by Walworth, Mayor of London. See **Peasants' Revolt**.

Tympanum, the membranous drum of the ear. In music the name is applied to orchestral kettledrums, often in the Italian form *timpano*. In architecture, the triangular or semi-circular space between a door and its pediment, or above a door set in an arch, is called a tympanum; such spaces are frequently ornamented with sculptures in relief or with mosaics.

Tyndale, William, one of the translators of the Bible and a Protestant martyr, born in Gloucestershire; came under the influence of Erasmus while at Cambridge, and in Cologne commenced his version of the New Testament; was engaged upon Old Testament work previous to his martyrdom at the stake. (c. 1490-1536).

WM. TYNDALE

Tyndall, John, Irish physicist, born in Co. Carlow; succeeded Faraday at the Royal Institution; wrote on electricity, sound, light, and heat as well as on the structure and motion of the glaciers; his greatest work was in connection with researches into molecular physics and radiant heat, as well as acoustics; president of the British Association at Belfast in 1874. (1820-1893).

Tyne, river of North England, formed by the confluence near Hexham of the N. Tyne from the Cheviots, and the S. Tyne, which rises on Cross Fell, in E. Cumberland; forms the boundary between Durham and Northumberland, and after a course of 32 m. enters the sea between Tyne-mouth and South Shields.

Tynemouth, county borough and port of Northumberland, England, at the mouth of the Tyne, 9 m. E. of Newcastle. It has shipyards, and exports coal, and is in some favour as a holiday resort. North Shields lies within the borough boundaries. Pop. 67,000.

Tynwald, the legislative body of the Isle of Man, consisting of the Governor, the Legislative Council, and the House of Keys. Its laws take effect only after they have been publicly propagated on the "Tynwald Hill," in English and Manx, on the "Tynwald Day" (July 5) following their signature by the Governor.

Typewriter, a mechanical contrivance for producing letters by the impact of inked types on paper clamped round a cylinder or platen. The essential features are a movement for bringing the type to a common printing centre; an

inking contrivance, whether ribbon or pad; a movement for impressing the type on the paper—generally simply by depressing the different keys, which are usually arranged on levers in a standard layout; and a contrivance for spacing words and lines. The modern typewriter was invented about 1870 in America. The platen is mounted on a carriage which automatically by means of a coiled tension spring moves in the direction of its length; while the platen is made to revolve a certain fixed distance which determines the space between the lines. The letters are generally arranged in three rows, and the numerals, brackets, etc., in one line of keys above these; capital letters are cast on the same lever as the corresponding small letter, the impression of a capital being produced by depressing a shift key.

Typhoid Fever, an infectious disease, also known as low, or enteric, fever, gastric fever, and infantile remittent fever. Its cause is a specific bacillus from discharges of previous typhoid cases. All insanitary conditions in respect of drainage promote the spread of typhoid, and flies may be the means of contamination during an epidemic. Early symptoms are headache, lassitude, insomnia and feverishness; later, abdominal distention, enlargement of the spleen and a rose-coloured eruption on the front of the body.

Typhoon, a hurricane prevalent in the China Sea between July and October, sweeping over the Philippine and Japanese islands and part of the Chinese coast.

Typhus, or Gaol Fever, an acute infectious disease, continuing fever generally lasting some 14 days, greatly impairing the bodily strength and accompanied by severe nervous symptoms, and a peculiar skin eruption of dark red blotches which continues for about four or five days. The fever is accompanied by a nauseous odour and acute blunting of the mental faculties. Improved sanitation seems to have almost stamped it out in Great Britain.

Typography, the art of printing, particularly those branches of it concerned with the designing, setting, and arrangement of type. Type-setting is nowadays generally done by machinery (see **Linotype**, **Monotype**), though hand-setting is still in use for specially-designed works of unusual character. Until the 20th Century there had been little change in type faces since the supersession of "black" or "Gothic" by "Roman" lettering, but in recent years type-designing has been revived as an art, and many new faces have been cut from which linotype and monotype machines are made. Type faces are nowadays measured by the "point" system, 72 points making an inch; thus, eight lines of "8-point" type occupy 1 in. in depth of paper.

Tyrant, in ancient Greece one who usurped or acquired supreme authority in a state at some political crisis, and exercised despotic and irresponsible rule, though not necessarily cruelly. In modern practice the name describes the nature rather than the origin of a ruler's exercise of power, and is applied to one who imposes his will by force without regard to the feelings or rights of his subjects.

Tyrconnel, Richard Talbot, Earl of, soldier who fought against Protestant rule in Ireland; and in support of the Catholic Stuarts; was created an earl and lord-deputy of Ireland, by James II.; fled to France after the battle of the Boyne. (1650-1691).

Tyre, a famous city of ancient Phoenicia (q.v.), about 30 m. N. of Haifa; comprised two towns, one on the mainland, the other on an island opposite; besieged

and captured in 333 A.C. by Alexander the Great, who connected the towns by a causeway, which, by sitting sands, has grown into the present isthmus; its history goes back to the 10th Century A.C., when it was held by Hiram, the friend of Solomon, and sustained sieges by Nebuchadnezzar and others; was reduced by Caesar Augustus, but again rose to be one of the most flourishing cities of the East in the 4th Century A.D.; fell into ruins under the Turks, and is now reduced to a population of a few thousands.

Tyre, a renewable forged flanged steel ring, shrunk on to the rim of a locomotive driving- or coupled-wheel; serves to strengthen the cast wheel centre and provide fresh wearing surfaces for the tread and flange; or a rim-cover of rubber or other material attached to a wheel to lessen the jar. For motor cars and bicycles pneumatic tyres, comprising an outer cover with an inflated inner tube, have long ago superseded "cushion" and solid rubber tyres, such as are still used for perambulators.

Tyrol, a district partly in N. Italy and partly in Austria; traversed by three ranges of the Alps and by the rivers Inn and Adige; it is famed for the beauty of its scenery; inhabited by Catholic Germans and Italians; sheep-farming, mining, and forest, fruit, and wine cultivation are the chief industries; it was the scene of severe fighting in the World War between Italy and Austria, British troops assisting the former; part of it was ceded to Italy in 1919. The Austrian province so

named has an area of 4,680 sq. m., and a population of 350,000; its chief town is Innsbruck.

Tyrone, a central county of Ulster, picturesque, and fertile in the lower districts; a considerable portion is taken up by barren mountain slopes and bog-land; coal and marble are wrought; Omagh is the county town, others being Strabane and Dungannon. Area, 1,218 sq. m. Pop. 127,604.

Tyrrell of Avon, Sir William George Tyrrell, first Baron. Entering the Foreign Office in 1889, he became Private Secretary to Sir Edward Grey from 1907 to 1915, and Permanent Under-Secretary from 1925 to 1928, when he went to Paris as British Ambassador until 1934. On retirement from the diplomatic service he became chief of the British Board of Film Censors. He received the Grand Cordon of the Legion of Honour in 1934. (1866-).

Tyrrhenian Sea, an arm of the Mediterranean, stretching between Corsica, Sardinia, and Sicily on the W., and Italy on the E.

Tyrwhitt, Sir Reginald Yorke, British admiral. He entered the navy at 16 and came into prominence in 1914 as commander of the destroyer flotillas at Heligoland and again at the Dogger Bank. He was knighted in 1917, made a baronet two years later, and in 1921 given command of the 3rd light cruiser squadron in the Mediterranean. He became an Admiral of the Fleet in 1934. (1870-).

U

Ubangi, an African river rising near the Belgian Congo frontier, flowing thence W. and S. to join the Congo near Koulikatville; length about 1,500 m.

U-Boats, German submarines, so called (from the letter U for Unterseeboot) prefixed to their number. They were extensively used in the World War, especially after 1916, and to combat them Q-boats (q.v.) were adopted by the British Navy; in all, some 200 U-boats were sunk. Their main base was at Bruges, entering the sea via Zebrugge, and it was to stop this outlet that the naval raid on Zebrugge was made on April 23, 1918.

Udaipur, or Mewar, native state of Rajputana, India, situated S. of Ajmer-Merwara. Its capital, Udaipur, picturesquely situated beside a lake, has beautiful palaces and other buildings. Area (state), 12,694 sq. m. Pop. (state) 1,567,000; (city) 35,000.

Udall, Nicholas, English playwright, born in Hampshire; he became headmaster of Eton in 1534, but, ejected for scandalous conduct, was appointed headmaster of Westminster school in 1558; he is remembered as the author of *Ralph Roister Doister*, the earliest extant English comedy. (1504?-1558).

Udine, city of N.E. Italy, in a province of the same name, 85 m. N.E. of Venice. It was an Italian army base in the World War, and has a Romanesque cathedral. Pop. 63,100.

Uganda, British protectorate in E. Africa, bordered by the Sudan on the N., Tanganyika Territory on the S., the Belgian Congo on the W., and Kenya on the E. Much of the country is covered with swamp and dense forests, rich in big game. Mt. Elgon rises to over 14,000 ft. on the E.

border, while the snow-capped Ruwenzori range (16,800 ft.) dominates the W. The territory contains Lakes George, Edward and Salisbury, and parts of Lakes Victoria, Edward and Albert; other great natural features include the Ripon and Murchison Falls, the great Semliki, Budonga and other forests and the head waters of the Nile. Cotton is the chief product, and coffee, ivory, hides, tin and sugar are also exported. Entebbe is the British headquarters, while other settlements are Kampala, the native capital, Jinja, Port Bell and Iganga. The territory first came under British influence in 1890 and was declared a protectorate in 1894; there was much trouble with the natives and foreign colonizers before it was finally pacified. Area, 94,000 sq. m. Pop. 3,490,000 (2,000 whites).

Uhlan, originally Polish light cavalry, armed with lance and sword. In 1740 Uhlan regiments were formed in the Prussian army, but after the World War they were reduced to about 40 squadrons, distributed among the German cavalry.

Uist, name of two islands (N. Uist and S. Uist) of the Outer Hebrides, forming part of Inverness-shire; N. Uist is 13 m. in length and 7 m. in average breadth. Pop. 2,800. S. Uist, 7 m. to the S., has a maximum length of 27 m. Pop. 4,200. Crofting, fishing and cattle-rearing are carried on.

Uitlander, a foreigner in the South African Republic of 1893. The majority of the Uitlanders were British subjects, and their grievances, originating in the resolve of the Boer authorities to maintain the Dutch social and political systems, helped to provoke the South African war.

Ukase, an edict issued by the former Czar of Russia, having the force of a law.

Ukraine, republic of the U.S.S.R., bounded N. by the White Russian republic and the Western and Central Black Sea Areas, S. by the Black Sea, E. by the N. Caucasian Area and W. by Poland and Rumania. The richly fertile soil produces chiefly wheat and sugar-beet; there are large coal, iron and manganese mines, and the engineering industries are important. Kiev is the capital, other large towns being Kharkov, Odessa, Dniepropetrovsk, Stalin and Nikolaev. Area, 171,000 sq. m. Pop. 32,000,000.

Ukulele, a four-stringed musical instrument, originating in Hawaii, played by finger-plucking; it resembles a small guitar.

Ulcer, an open sore on the surface of the body, with secretion of pus. Ulcers may be simple sores, due to some local infection or inflammation, or, like gastric ulcers, to digestive disorders; or they may be of the more serious kind, due to cancer, syphilis or other venereal disease, or to cardiac inflammation, such as ulcerative endocarditis.

Ulfilas, or Ulfilas, apostle of the Goths; an Arian, he was made a bishop in 341 and sent to convert the Visigoths, for whom he made a Gothic translation of the Scriptures, a work of unique philological value which only exists now in fragments. (c. 311-383).

Ulianovsk (formerly Simbirsk), town of the U.S.S.R., on the Volga, 120 m. SW. of Samara; it was the birthplace of Lenin, and has a university. Pop. 73,700.

Ullswater, a lake of England, situated in the Lake District, in Cumberland and Westmorland, about 74 m. in length and 4 m. in average breadth. It is famous for its beauty, and much of the land round its shores has been preserved by the National Trust.

Ullswater, James William Lowther, first Viscount, British politician; called to the bar in 1879, he entered Parliament in 1883, and in 1891 became Foreign Under-Secretary; Deputy Speaker in 1895, he became Speaker in 1905, resigning in 1921, when he was made a peer. He was chairman of many commissions, notably of the "Ullswater commission," 1936, which reported on the B.B.C. (1855-).

Ulm, a city and river port of Germany, 46 m. SE. of Stuttgart. It is famed for its cathedral, which for size ranks next to Cologne, as well as for its town-hall. There are textile factories, foundries and breweries. The town is strongly fortified. Here General Mack, with 23,000 Austrians, surrendered to Napoleon in 1805. Pop. 62,500.

Ulster, former province of Ireland, occupying the N. of the country and comprising the counties of Donegal, Antrim, Londonderry, Tyrone, Cavan, Fermanagh, Monaghan, Armagh and Down. It became an English settlement in 1611, and was largely colonised from Scotland. It is the most Protestant part of Ireland, and the most enterprising and prosperous; agriculture, flax-growing and spinning are the chief industries. By the Government of Ireland Act, 1920, Donegal, Cavan and Monaghan were attached to the Irish Free State, and the remaining counties were united as Northern Ireland, with its own constitution. See Northern Ireland; Eire.

Ultramarine, a manufactured form lapis lazuli, of the natural mineral lapis lazuli. The latter has been known since antiquity, but the artificial substance was first prepared by Gmelin in 1828. It is made

by strongly heating kaolin (china-clay) with soda (anhydrous sodium carbonate), sulphur and resin. The product is p. mixed with sulphur, and again heated, when blue ultramarine is formed. Green, violet and red ultramarines are also known; all varieties consist essentially of sodium aluminium silicate, combined with sulphur or a sulphur compound. Blue ultramarine is the familiar "washing blue," and is widely used as a pigment.

Ultramontanism, name given to arrogating supreme power and authority to the Pope in both temporal and spiritual affairs. The term came into general use in France in the 19th Century, in reference to the opinions prevailing in Rome, "on the other side of the mountains (the Alps)."

Ultra-Violet Rays, that part of spectrum beyond the violet end which is invisible to the eye but affects a fluorescent screen and possesses strong chemical properties; these rays are not so penetrating as visible light and are absorbed by glass. They produce the valuable vitamin D in the human body, and so are efficacious in cases of rickets and other deficiency diseases. Artificially, they are produced by mercury vapour lamps and arc lamps.

Ultra Vires. An act performed by a corporate body in excess of its legal powers is said to be *ultra vires*. Thus a company acts *ultra vires* if it undertakes operations which are not contemplated in its Memorandum of Association. An act, though within the powers of the company, may be *ultra vires* the particular person or persons who does it in their name, if he has not been authorized to do so by the company. Acts *ultra vires* are void in law.

Ulysses (Greek, *Odysseus*), chieftain of Ithaca, one of the Greek heroes in the Trojan War. He is less famed for his exploits before Troy than for what befell him in his ten years' wandering during the homeward voyage, as recorded by Homer in the *Odyssey*. His numerous adventures include his stay among the lotus-eaters, his encounter with Polyphemus, the enchantments of Circe, the Sirens, and Calypso, and his triumphant return to his wife Penelope and his son Telemachus.

Umbelliferae, a large family of dicotyledonous

plants, bearing five petalled flowers in umbels (i.e., the flower stalks springing from the head of the main stalk in such a way as to produce a flat or convex flower-head). Many of them are important as human foods. There are some 280 genera and 2,700 species, including the carrot, celery, hemlock, parsley and parsnip. They are mostly native to the temperate regions of the northern hemisphere.

UMBELL

Umbel, a natural earth pigment, consisting chiefly of hydrated oxides of iron and manganese. Raw umbel is calcined to form "burnt umbel," a fine, warm brown colour; it can be ground in water, oil or turpentine and mixes well with other pigments.

Umbrella. The umbrella is of oriental origin, having been used in very early times in Babylon and Assyria and neighbouring countries, essentially as an emblem of royalty. It was introduced into Europe for more practical purposes by James Hanway (1712-1786), the oriental traveller and philanthropist, and at first aroused much ridicule and opposition, especially from

hackney cabmen, who saw in the umbrella a menace to their business.

Umbria, a division of ancient Italy, between Cisalpine Gaul and the territory of the Sabines; inhabited originally by a powerful Latin race, the Umbri, who, after being harried by the Etruscans and Samnites, were subdued by the Romans, 307 B.C.; under Augustus the territory became the sixth region of Italy. The modern Umbria is a dept., covering 3,277 sq. m. and comprising the provinces of Perugia and Terni. Pop. 726,000.

Uncial Letters, large round characters or letters used in ancient MSS., so called as approximating to an inch in size, from Latin *uncia*, the twelfth part of a foot.

Uncle Sam, name given to the United States Government, possibly derived from a humorous translation of the initials U.S.

Unconscious. See Subconscious.

Underground Railways. The first underground railway in London was the Metropolitan line from Paddington to the City, opened in 1855. The first "tube" was that from Stockwell to the City, constructed by Henry Greathead (1844-1896), and opened in 1890; the "Twopenny Tube," so called because at first a uniform fare of twopence was charged, was opened from Shepherd's Bush to the Bank in 1900. In 1938 the mileage of "tube" railways in London, apart from the Metropolitan and District lines, was about 44. Other cities with underground railway systems are Glasgow, Paris, Berlin, New York, Chicago and Madrid; others are projected in Rome, Munich and elsewhere.

Underwriter, the term applied to a member of Lloyd's, who in return for a share of the premium agrees by subscribing or "underwriting" his name to accept a proportion of a risk and to pay his share of the compensation in the event of a loss. The term was originally used in relation to marine insurance, but nowadays underwriters often accept other classes of insurance. See Insurance.

Undine. See Elemental Spirits.

Undset, Sigrid, Norwegian novelist, born at Kalundborg, Denmark; as a clerk in a business house, she had opportunities to observe the lives of her companions, and made use of her experiences in *Frøken Alving*, 1907, and *Jenny*, 1912; her best-known work was *Kristin Lavransdatter*, 1920, a 14th Century historical novel, which was followed by *Olav Audunsson*, 1925, another period novel; later works were *The Wild Orchid*, 1931, *Ida Elisabeth*, 1933, *Saga of Saints*, 1934; she received a Nobel Prize in 1928. (1882-).

Unemployment Insurance, a system originated in Great Britain in 1911 by which workers are insured by the State against unemployment by payment of weekly contributions represented by stamps affixed to a card. The operation of the system has been gradually extended until it covers practically all manual workers, and all employed persons earning not more than £150 per annum. Contributions are also made to the Unemployment Fund by the employer and the State. The present (1935) weekly rates of contribution by the employee in non-agricultural employment are: for males aged 14 to 16, 4d.; 16 to 18, 5d.; 18 to 21, 6d.; 21 to 25, 10d.; for females within the same age limits, 3d.; 3d.; 5d.; 5d.; and 9d. respectively. At the age of 65 the employee's contributions cease. The weekly rates of benefit in non-

agricultural employment are: for females aged 16, 5s.; aged 17, 7s. 6d.; 18 to 21, 12s.; over 21, 15s.; for males at the same ages, 6s.; 9s.; 14s.; and 17s. respectively. Additional benefits are payable in respect of dependents at the rate of 3s. for each child and 9s. for each adult.

Ungulata ("hoofed animals"), an order of mammals, including many of those most useful to man; its main sub-classes are Perissodactyla, including the horse and rhinoceros; Artiodactyla, divided into ruminants (cattle, sheep, goats, deer, camels, giraffes) and non-ruminants (swine, hippopotami); Proboscidea (elephants); and Hydracoeida (coney). There are several other sub-classes containing extinct forms.

Unicorn, a fabulous animal with the limbs of a deer, a lion's tail and, essentially, a single long horn on its forehead; formerly vessels of reputed unicorn's horn were in demand for their supposed efficacy against poison. The unicorn figures frequently in heraldry, and was adopted by James I. as the symbol of Scotland on the royal arms.

Uniform. The use of "political uniforms," such as had been worn by the "Blackshirts" or British Union of Fascists, the Social Credit Party, and other political organizations, was prohibited in Great Britain by the Public Order Act, 1936. The Act, while providing no definition of a uniform, makes it clear that it is not intended to forbid the wearing of simple badges indicating affiliation to a political party, and allows the use of Trade Union insignia and similar regalia on special occasions. It has no application to uniforms which have no political significance, such as those of the Salvation Army or Boy Scouts.

Uniformity, Act of, an Act passed in England in 1662 regulating the form of public prayers and rites to be observed in all churches, which had the effect of driving hundreds of clergymen from the Established Church into the ranks of the Nonconformists.

Union, The name applied in English history to three separate political amalgamations: (1) the Union of England and Scotland in 1603 under one crown, by the accession of James VI. of Scotland to the throne of England on the death of Queen Elizabeth; (2) the Union of the English and Scottish Parliaments in 1707, in one parliament seated at Westminster; and (3) the Union of the British and Irish Parliaments in 1800; this union was in part dissolved by the legislation of 1920-1922 which established the Irish Free State.

Union Day, the day celebrated as a public holiday in South Africa in commemoration of the establishment of the Union of South Africa on May 31, 1910.

Unionists, a British political party started by Lord Hartington in 1885 and recruited from Liberals who were opposed to Home Rule. Known at first as Liberal-Unionists, they eventually joined forces with the Conservatives, and in 1912 the official name of the organisation became the National Union of Conservative and Unionist Associations. The name was retained after Ireland was granted Home Rule.

Union Jack, the national flag of Great Britain, formed by the union of St. George's cross for England (a scarlet cross upon a white field), St. Andrew's cross for Scotland (a white diagonal cross upon a blue field), and St. Patrick's cross for Ireland (a red diagonal cross upon a white

HERALDIC
UNICORN

field). Technically the name should be Union Flag, the Union Jack strictly being the small Union Flag which is flown from the jackstaff of a ship. See *Flag*.

Unitarians, a term applied to those of the Protestant faith who profess belief in one God, denying the Church doctrine of the Trinity and in particular the divinity of Christ, though they acknowledge His paramount importance as a teacher and inspired prophet. In England their ranks were largely increased by the clergy expelled from their livings by the Act of Uniformity, 1662.

United Free Church of Scotland. See *Scotland, Church of*.

United Irishmen, an association of Irishmen founded by Wolfe Tone and others in 1791 for the purpose of agitating for emancipation of Irish Roman Catholics and other religious bodies. The agitation culminated in the rebellion of 1798, after the suppression of which the association came to an end.

United Kingdom, the name given in 1800 to the Kingdom of Great Britain and Ireland, as established by the union of the British and Irish Parliaments (see *Union, The*). This union was dissolved in 1922, and to-day the United Kingdom means Great Britain and Northern Ireland, *i.e.*, the areas represented in the parliament at Westminster.

United Methodists, an English non-conformist body, formed in 1807 by the union of three Methodist denominations—the Methodist New Connexion, the Bible Christians and the United Methodist Free Church—which had seceded at different times from the original Methodist Church. In 1932 the United Methodists and other Methodist seceders were united in the Methodist Church.

United Provinces of Agra and Oudh, province of British India, bounded N. and NE. by Tibet and Nepal, S. by Central India, W. by the Punjab and Rajputana, and E. by Bihar and Orissa. It covers an area of 112,200 sq. m., mainly in the valley of the Upper Ganges and its tributaries; the Himalayas enclose the province on the N. Agriculture and the manufacture of textiles, leather, opium and indigo are carried on; there is an extensive irrigation system, with further schemes in project. Lucknow is the largest city, while other important centres are Cawnpore, Benares, Agra, Allahabad, Bareilly and Meerut; the people are chiefly Hindus. Oudh, annexed in 1856, was joined with the Agra presidency in 1877; and in 1903 the territory was styled the United Provinces; it became a governorship in 1921, and in 1937 autonomous government, by governor and council, was introduced. Pop. 48,409,000.

United States of America (U.S.A.), the greatest state of the New World, occupying an area of 3,026,789 sq. m.—nearly as large as Europe. It is bounded on the N. by the Dominion of Canada, on the E. by the Atlantic, on the S. by Mexico and the Gulf of Mexico, and on the W. by the Pacific, and it extends 3,700 m. from E. to W., and on an average 1,600 m. from N. to S. There are two great mountain systems, the Appalachians on the E., and the Rockies, Cascade range, etc., on the W., which divide the territory into four regions—an eastern, which slopes from the Appalachians to the Atlantic, and is the most thickly populated part; a central, which slopes S. and comprises a vast undulating plain, largely agricultural

and pastoral, formed by the Mississippi Valley; a plateau supported by the Rocky and Cascade ranges, largely a metalliferous region; and the fertile Pacific slope, inclining westward from the Coast range.

The great rivers are in the Mississippi Valley, though there are rivers important both for navigation and water-power on the Atlantic and Pacific slopes. The climate is of every variety, from sub-arctic to sub-tropic, with extremes of temperature and moisture, in consequence of which the vegetation and animal life are immensely varied. The mineral wealth is enormous, and includes, besides large beds of coal, all the useful metals. Large forests of valuable timber still exist in the eastern states, while agriculture, and cotton and fruit-growing are flourishing industries.

As a manufacturing country the United States has built up a commanding position. Its vast resources, exploited to the utmost by the virile population, have brought great wealth, while railways have been developed with enterprise and energy. Non-contiguous territory of the United States includes Alaska, Hawaii, Puerto Rico, the Philippine Is., the Virgin Is., American Samoa, the Pacific island of Guam and the Panama Canal Zone. The capital of the States is Washington, but the largest and most important city is New York. Other cities with a population exceeding 500,000 are Chicago, Philadelphia, Detroit, Los Angeles, Cleveland, St. Louis, Baltimore, Boston, Pittsburgh, San Francisco, Milwaukee and Buffalo.

The population is largely of British, German and Scandinavian descent, but there is a large foreign-born population drawn from all European countries. In 1938 the population was estimated at 129,250,000, including nearly 12,000,000 negroes and over 2,000,000 of other races, the chief being Mexicans, Indians, Chinese and Japanese. The government is a federal republic of 48 states, 1 federal district (District of Columbia, including the city of Washington, the seat of government) and 2 organized territories, *i.e.*, Hawaii and Alaska. The executive power is vested in a President, who is elected for four years, is commander-in-chief of the army and navy, and appoints the Cabinet officers. The legislature consists of a Congress of two houses, a Senate, to which each state elects two members for six years, and a House of Representatives elected every second year by the votes of qualified citizens, the number of representatives for each state being determined by population.

The origin of the United States is to be traced to the colonists, chiefly English and Dutch, who settled on the Atlantic seaboard in the 16th and 17th centuries. Virginia was founded by Raleigh in 1585, and later Jamestown and Maryland were established. In 1620 the celebrated Pilgrim Fathers set up another colony in Massachusetts. Georgia was founded by Governor James Oglethorpe in 1732 as a home for debtors from English jails. The colony of New York was founded by the Dutch as New Amsterdam, while Pennsylvania was settled by the Quakers, led by William Penn. After the middle of the 17th century the English began to take the lead, and for decades they were occupied in meeting good their foothold and repelling the Indians and French, with British military assistance, in the struggle known as the French and Indian war.

After the Peace of Paris, 1763, which ended hostilities, and extinguished French influence, the colonists began to chafe against taxation and trade restrictions imposed by the British Government which they deemed unjust, and in 1775 a revolt broke out which ended eight years later in the victory of the colonists: on July 4, 1776, the Declaration of Independence from British rule had been drawn up by the

13 original colonies; on this the constitution of the new republic was based, with Washington, their victorious general, as first President.

The chief progress now was in the direction of territorial expansion, the greater part of the country being hitherto unexplored. The fertile valley of the Mississippi was settled, and in 1800 the rich agricultural area known as Louisiana, covering a million sq. m., was bought from France. Florida was acquired from Spain in 1822, while New Mexico was annexed after the Mexican War of 1846-48, and by the middle of the 19th Century the continental area of the republic was substantially the same as it is to-day. In 1848 gold was discovered in California, which became the Mecca of thousands.

Meanwhile, agitation had long been on foot for the suppression of slavery, and in 1861, upon the secession of the southern States from the Union, war broke out between the South, or Confederates, and the North, or Federals. After years of bitter fighting and the loss of half a million lives, the North triumphed in 1865 under the leadership of their President, Abraham Lincoln, who was assassinated in the moment of victory. Slavery was ended, but the years of reconstruction following the Civil War were marked by every kind of lawlessness, unrest and political juggling and corruption. In 1898 came the war with Spain over the Spanish maladministration in Cuba, which terminated with the annexation of the Philippine Is. by the U.S.A., and the firm establishment of American interests in Cuba, which was declared an independent republic. It was in this war that Theodore Roosevelt became a national hero, and in 1901 he was elected president, devoting himself with success to the task of suppressing the corruption that was everywhere rife, and to increasing the prestige of his country in world estimation.

During the World War there was much German sympathy in the United States, where the German element is considerable, but in 1917—largely provoked by the loss of American lives in the *Lusitania* outrage—the Americans came in on the Allies' side and materially assisted victory. American diplomats were prominent at the Peace Conference in 1919, and it was President Woodrow Wilson who was instrumental in establishing the League of Nations—of which his country has consistently refused to become a member.

In 1919 the prohibition of liquor became law, and until 1933, when the measure was rescinded, the crimes of violence arising from illicit liquor traffic became a regular feature of the national life; but the outstanding occurrence in post-war U.S.A. was the great financial crisis which began in 1929 and led to an upheaval in social conditions and an almost entire disruption of the financial life of the country, coupled with acute unemployment. In 1933 Franklin Delano Roosevelt, a Democrat and a relation of Theodore Roosevelt, became President and instituted the National Recovery scheme to restore prosperity; in spite of adverse criticism and many set-backs, Roosevelt's measures were in the main effective, and in 1936 he was once more returned to office. In 1937 disastrous floods in the valleys of the Ohio and the Mississippi caused the loss of hundreds of lives and called for relief measures upon an unprecedented scale.

Universalists, a denomination of belief in the final harmony of all souls with God and the ultimate triumph of good over evil in each individual soul; the movement was founded in the United States in 1770 by the Rev. J. Murray as a protest against the doctrine of endless punishment; it was largely developed by Hosea Ballou (1771-1862), under whom it took on a Unitarian aspect; in 1936 there were 500 Universalist churches

in the U.S.A., with a membership of about 55,000.

Universal Language. Many attempts have been made to invent a language comprehensible to people of all nations. Such a language is necessarily artificial. The best known are Volapük, invented by Schleyer in 1880, and greatly improved as *Idiom Neutral* in 1898; Esperanto, invented by Dr. L. L. Zamenhof in 1887, and Ido, a simplified form of Esperanto, devised in 1907. Of these, Esperanto is the best known, and there is a British Esperanto Association in London. A simplified form of English, known as "Basic English," the invention of Mr. C. K. Ogden, in which it is claimed that any idea can be expressed by the use of a small number of English root words, has lately attained some importance as a possible medium of international communication, especially in the East.

Universe, the whole system of created things. Until the 17th Century the earth was regarded as the centre of the universe, with the sun, moon and stars revolving round it. In 1632, however, Galileo showed that the earth moved round the sun, and the work of Newton and Kepler led to the accurate forecasting of the movements of all the planetary bodies. The improvement of the telescope (q.v.) led to the discovery of more and more stars—with the consequent extension of the universe far beyond the bounds of the solar system—and spectroscopy enabled their distances and constitution to be estimated. To-day, astronomers estimate that the universe contains at least 2,000 million stars, the nearest being not less than 25,500,000 million miles from the earth. The stars are themselves suns, and it is probable that a very great many of them are the centres of other solar systems. By many modern astronomers the universe is considered finite but boundless, in the sense that light travels in a curved path, a theory proved by the experiments of Einstein (see *Relativity*). Evidence shows that the material bodies of the universe have been created by a process of evolution, stars being formed by concentration from nebulae, while planets consist of portions thrown off by the stars.

University, a corporation of teachers and students which has a recognized power and authority to grant degrees under certain defined conditions. The earliest European university was that at Salerno in Italy, which was already famous as a medical centre in the 9th Century and endured until 1811; the most ancient existing university is that of Bologna, founded in the 11th Century as a school of law. Oxford University originated about 1167, while Cambridge was probably established, partly as an off-shoot from Oxford, about 1209. Other British universities are those of London, Durham, Manchester, Liverpool, Birmingham, Leeds, Sheffield, Bristol and Reading; the University of Wales has several affiliated colleges, while in Scotland there are universities at St. Andrews, Glasgow, Aberdeen and Edinburgh; Ireland has the University of Dublin and the National University of Ireland; there are numerous universities and university colleges throughout the rest of the British Empire.

Unknown Warrior, a British unknown identity, regarded as typifying the fallen in the World War. His remains were taken from his grave in France and buried in Westminster Abbey on November 11, 1920. King George V, acting as one of the pall-bearers. The United States, France and other countries later adopted the idea and have Unknown Warriors of their own, to whose ashes they pay the same tributes.

Unterwalden, a canton of Switzerland, land, situated S. and E. of Lucerne, consisting of the two "half-cantons," or administrative districts, of Obwalden (capital, Sarnen) and Nidwalden (capital, Stans), with areas of 190 sq. m. and 106 sq. m., respectively; drained by the two rivers Aa, it contains Lakes Sarnen and Lungeren and much forest land. Pop. Obwalden, 19,400; Nidwalden, 16,000.

Upas Tree, a name for the anchor tree (*Antiaris toxicaria*), of the fig (Moraceae) family, a native of Java; it grows to a height of 80 ft. or more before branching; and the bark yields a gum used as an arrow poison; when first discovered by Europeans, it was credited with the sinister power of destroying all animal life for miles around.

Uppingham, market-town of Rutlandshire, 7 m. S. of Oakham. It has a famous public school, founded in 1684. Pop. 2,500.

Uppsala, city of Sweden, on the Sala, 21 m. NW. of Stockholm, the metropolitan see of the Swedish Church and the seat of a celebrated university, founded in 1477. It is rich in historical associations and has memories of Linnaeus and other famous men; its cathedral is one of the finest buildings in Sweden. Pop. 35,200.

Ur, ancient city of S. Babylonia, Iraq, on the Euphrates; the Biblical Ur of the Chaldees, the original home of Abraham; its site is marked by the modern Mugheir, 110 m. W. of Basrah. Excavations by Sir C. L. Woolley and others have traced the 2½-m. circuit of its walls, and the construction of its harbour—it was formerly at the mouth of the river, the Persian Gulf having since receded—and many temples, tombs and inscriptions have been revealed, including the great ziggurat, built on an artificial hill about 2,400 B.C.

STATUETTE FROM THE ROYAL GRAVES AT UR

Uræmia, a condition of the blood generally consequent on kidney disease and the resultant accumulation in the system of toxins normally disposed of by the kidneys. Its symptoms include headache, gastric pains, difficult respiration, convulsions, and often eventual paralysis and coma. It may be a result, and one of the most serious, of nephritis (Bright's Disease) and treatment is the same.

Ural, river of Russia, which rises in the E. of the Urals and forms part of the boundary between Europe and Asia, falling after a course of about 1,600 m. into the Caspian Sea by a number of mouths (q.v.).

Uralite, a form of nugite (q.v.), the crystals of which are composed of hornblende prisms. It occurs in a green porphyritic rock in the Ural Mts. but since it was first discovered has been found in many other rocks.

Urals, mountain range of Russia, extending from the Arctic Ocean to the Caspian Sea, a distance of over 1,500 m., with a maximum height of 3,433 ft.; it is rich in iron, coal, copper, salt and precious metals and stones.

160 m. SW. of Orenburg. Pop. 36,000.

Urania, the muse of astronomy, the daughter of Zeus and Mnemosyne; she is represented with a globe in her hand, to which she points with a small staff.

Uranium, a metallic chemical element belonging to the same group as chromium, molybdenum and tungsten. Symbol, U; atomic number, 92; atomic weight, 238.14; density, 18.7. Uranium is obtained, for the most part, from pitchblende, the most celebrated deposit being at Joachimsthal, Czechoslovakia; it is also found in the Belgian Congo and in Canada, near the Great Bear Lake. Carnotite, an ore occurring in the U.S.A. and elsewhere, is also a valuable source. Uranium is a whitish metal melting at about 1850° C.; and is radioactive, radium being formed during its atomic disintegration. Uranium compounds are used for producing a yellowish-green fluorescent colour in glass, and are also employed in photography and dyeing.

Uranus, the 7th major planet in order of distance from the sun, from which its mean distance is 1,782,800,000 m., and around which it requires over 84 years to revolve. Its diameter is four times that of the earth, and it is accompanied by four moons. It was discovered in 1781 by Herschel, and was at first called Georgium Sidus in honour of George III.

Uranus (Heaven), in Greek mythology, the father of the Titans by Ge (the earth); he hated his children, and after their birth thrust them down to Tartarus, but at the instigation of Ge, Kronos, the youngest born, mutilated Uranus and seized the throne of the Universe.

Urban, the name of eight Popes: **Urban I.**, Pope from 225 to 230; **Urban II.**, Pope from 1088 to 1099, a promoter of the first Crusade; **Urban III.**, Pope from 1185 to 1187; **Urban IV.**, Pope from 1261 to 1264; **Urban V.**, Pope from 1362 to 1370; a reformer and ascetic, he was beatified in 1870; **Urban VI.**, Pope from 1378 to 1389; in his reign the schism in the papacy began which lasted about 50 years; **Urban VII.**, Pope in 1590; and **Urban VIII.**, Pope from 1623 to 1644; founded the College of the Propaganda.

Urban District, an area with government less than those of a municipal borough but greater than those of a rural district council. The constitution of an Urban District Council is provided for by the Local Government Act of 1894; among other duties, it is responsible for the maintenance of drainage, highways, etc. Where the population exceeds 20,000 the Urban District Council is responsible for elementary education.

Ure, river of Yorkshire, England, rising in the Pennines, in the N. Riding, and flowing E. and SE. through Wensleydale to form, with the Swale, the Yorkshire Ouse; its length is about 70 m.

Urea, or Carbamide, a white crystalline solid (melting-point 132° C.) discovered by the French chemist E. M. Rouelle in 1773. It is found in the urine of all mammals, having been formed by the decomposition of proteins. An adult human being excretes about 30 grams (rather more than 1 oz.) of urea daily. Urea was prepared artificially by Wöhler in 1828, and is now manufactured on a large scale (from carbon dioxide and ammonia, and in other ways) for use as a nitrogenous fertilizer, having none of the harmful effects upon soil caused by certain other fertilizers. It is also used in making plastics and in the preparation of several drugs, e.g., veronal.

Urga, or Ulaan Bator Hova, capital of the Republic of Outer Mongolia, situated 170 m. S. of Kialkha. It is the holy city of the Mongols and the seat of the living Buddha, or Bogdo Khan; it has a trade in hides, furs and wool, and a motor service over the Gobi Desert connects it with Kalgan. Pop. 100,000.

Uri, canton of Switzerland, lying S. of Lake Lucerne, with an area of 415 sq. m.; mountainous, with steep valleys, it is almost entirely pastoral; Atdorf is the capital. Pop. 23,000.

Urial (*Ovis vignei*), a wild sheep with heavy curved horns and standing about 3 ft. high. It is found in the Himalayas and in the Punjab.

Uric Acid, an organic acid occurring in urinary calculi and in urine, in which it was discovered by C. W. Scheele in 1776. Its ammonium salt, ammonium urate, is contained in the excrement of birds and reptiles. Uric acid is a white crystalline solid, which on heating decomposes into a variety of products, including urea (q.v.) and ammonia: it is practically insoluble in water and in most other solvents. Uric acid is a member of an important class of compounds known as purine derivatives. Sodium and ammonium urates are deposited in the joints in gouty, rheumatic and arthritic patients, and uric acid salts occur also in the bladder in those suffering from "stone."

URIAL

Urim and Thummim, among the ancient Hebrews, two ornaments kept in a square pouch on the breast of the high priest, who obtained from them oracular responses.

Urine, the fluid secretion of the kidneys of man and the higher mammals, discharged from the bladder. It is waste material, and its chief constituents are urea, uric acid, calcium and magnesium sulphates, etc. Morbid states include aqueous urine, frequent in old age or in nervous ailments, and phosphatic urine, containing an excess of phosphatic salts; albuminuria is a more serious condition, especially if due to lesions of the kidney.

Ursa Major, or the Great Bear, a constellation of the N. hemisphere, also known as the Plough, the Dipper, or Charles's Wain. It consists of seven bright stars, two of which are known as "the pointers," since a line joining them will, if produced, pass close to the celestial pole and the star Polaris.

Ursa Minor, the Lesser Bear, an inclination of which the 2nd magnitude star Polaris, or the pole-star, is situated near the celestial pole.

Ursula, St., virgin saint, daughter of a British king, who is said to have been martyred at Cologne, together with the Eleven Thousand Virgins, her companions, by the Huns; they are commemorated on Oct. 21. The origin of the legend, which has numerous variations, is obscure.

Ursulines, an order of nuns founded in 1535 by St. Angela Merici of Brescia in honour of St. Ursula; they are devoted to nursing and educational work.

Uruguay, republic of S. America. **Uruguay**, former called Banda Oriental; lies between Atlantic and the Uruguay R., and is bounded on the S. by the territory of the Rio de la Plata. Wheat, barley, and maize are the principal crops, but the land is primarily pastoral, and the chief industries are cattle-rearing and sheep-farming, hides, wool, preserved meats, etc., being exported. Montevideo is the capital, other leading towns being Paysandu, Salto and Mercedes. A Spanish possession, Uruguay became subsequently a province of Brazil, but became independent in 1828, a republic being established two years later. Area, 72,153 sq. m. Pop. 2,066,000.

Uses, in law, a term denoting the beneficial interests in lands detached from and opposed to the legal ownership or "seisin." Uses were not recognized at common law; their real origin is unknown, but they were employed by ecclesiastical corporations to evade the Statute of Mortmain of 1279. In 1535 the Statute of Uses was passed to sweep away the "use" and to put an end to the separation of seisin and beneficial interest. Judicial decisions, however, defeated the main object of the statute and restored uses under the now more familiar name of "trusts," and thus brought about the whole modern system of "equitable estates." All modern conveyances are directly or indirectly founded on the doctrine of uses and trusts.

Ushant, island off the W. coast of France, in the dept. of Finistère; steep and rugged, it supports sheep, while potatoes and cereals are grown and there is fishing round the coast. Off here, in the "battle of the 1st of June," 1794, Earl Howe gained a signal victory over the French. Pop. 3,000.

Usk, river of Wales and England, flows through Monmouthshire and flows through Monmouthshire, to join the Bristol Channel at Newport, where there are docks. It is 70 m. in length and is celebrated for the beautiful scenery along its banks, on which stand the towns of Brecon, Abergavenny, Caerleon and Usk.

Uskub, or Skopje, town of Yugoslavia, on the Vardar R., 130 m. NW. of Salonika; it has a citadel, a palace and several mosques, and was a scene of operations in the World War. Pop. 64,700.

U.S.S.R. (Union of Socialist Soviet Republics), official name for the country of Europe and Asia known until 1917 as Russia (q.v.).

Usury, originally the payment of interest as consideration for the use of money, now the exacting of illegal or iniquitous interest. Under the Moslem law usury was forbidden among the Hebrews, but was permitted between a Hebrew and a stranger (Deut. xxiii, 19). Various statutes have been passed regulating rates of interest, and pawnbrokers' charges are still strictly regulated.

Utah, a western state of the U.S.A., situated W. of Colorado and traversed by the Wasatch range, at the foot of which lies the Great Salt Lake. It is watered by the Colorado and Sevier Rs.; grain, fruit and sugar-beet are grown, also vegetables for canning, while cattle and sheep are reared extensively, and the mineral wealth is great. Salt Lake City is the capital. The state joined the Union in 1896; the majority of the people are Mormons. Area, 84,990 sq. m. Pop. 507,800.

Uterus, or Womb, a hollow, pear-shaped muscular organ, about 3 in. long and 2 in. broad, with very thick walls, situated in the cavity of the pelvis and communicating with the vagina. It is the organ in which the ovum is received periodically from the ovaries, through either of the Fallopian tubes, which join the uterus on each side at its broad upper part; and in it, after impregnation, the development of the fertilized ovum into a foetus takes place; in pregnancy it necessarily enlarges considerably. The uterus is subject to various disorders and displacements, which are studied in the branch of medicine known as gynecology.

Utgard (out-yard), in the Norse mythology, a place or circle of rocks on the extreme borders of the world, the abode of the giants, the same as Jötunheim.

Utica, city of the U.S.A., in New York State, 222 m. NW. of New York City; situated on the State Barge Canal, it has a large industry in knitted goods and other textiles. Pop. 101,740.

Utilitarianism, the theory which makes happiness the object of life and maintains that actions are right in proportion as they tend to promote happiness, and wrong as they tend to produce the reverse. The chief advocates of this theory were John Stuart Mill and Jeremy Bentham.

Utopia, an imaginary island described by Sir Thomas More in his *Utopia*, 1516, and represented as possessing a perfect political organisation. It has given its name to all schemes which aim at the like impossible perfection, though often applied to such as are not so much impossible in themselves as impracticable for want of the virtue and courage to realise them. The name is derived from Greek words meaning "nowhere."

Utrecht, city of the Netherlands, the capital of the province of Utrecht, on the Crooked Rhine, 23 m. SE. of Amsterdam. Textiles, machinery, chemicals and glass are manufactured. Here was signed in 1713 the Treaty of Utrecht, which brought to an end the War of the Spanish Succession. The city has a Gothic Cathedral and a University. Pop. 162,000.

Uttoxeter, market town of Staffordshire, England, 14 m. NE. of Stafford. Brewing and the manufacture of agricultural instruments are carried on. Pop. 5,900.

Uvula, a prolongation of the soft palate, at the back of the mouth, consisting of a small mass of tissue covered with mucous membrane.

Uxbridge, town of Middlesex, England, 16 m. W. of London, on the R. Colne and the Grand Union Canal. Brewing, iron-founding and market-gardening are carried on. The abortive conference between Parliament and the Royalists in 1645 was held in the Old Treaty House. Pop. 31,900.

Uzbek Republic, republic of the U.S.S.R., bordered N. by the Kazak republic, S. by Afghanistan, E. by the Kirghiz republic and Sin-Kiang, and W. by the Turkoman republic. Irrigation is well developed, and there are numerous collective farms producing cotton, fruit, wool and silk. Agricultural machinery, cement, paper, leather, and textiles are also produced. Large towns include Tashkent (the capital), Bokhara, Khiva, Andijan and Samarkand. The republic was constituted in 1924 out of parts of Turkestan, Bokhara and Khorezm. Area 66,390 sq. m. Pop. 5,044,300.

Uzbeks, race of Central Asia; of Turkic descent and Moham-medan faith, they are the dominant people in Turkestan and the neighbouring regions, especially in the area forming the Uzbek republic.

Vaal, river of South Africa, which rises in the Drakensberg Mts. in the SE. of the Transvaal, which it separates from the Orange Free State, and after a course of about 750 m. in a SW. direction, joins the Orange R.

Vacation, the fixed periods of cessation from work in law courts and universities. In the High Court there are four vacations: Christmas, Easter, Whitsun and the Long Vacation—the last usually extending through August, September and the first two weeks of October, during which period a vacation judge sits to hear urgent cases.

Vaccine (and Vaccination), a preparation of dead bacteria of the variety responsible for a given disease, injected into the blood-stream of a patient suffering from that disease, or liable thereto, in order to increase his resistance to the complaint. Vaccine therapy is largely successful with such diseases as cholera, plague, typhoid, colitis and tuberculosis, but the immunity is not permanent, its length varying from a few weeks to several years. Vaccination with calf-lymph as a preventive of smallpox is compulsory in Great Britain, every child being required to be so vaccinated within 6 months of birth, either gratis by a public vaccinator or privately at the expense of the parents or guardians; but exemption may be obtained if the latter make a statutory declaration before a magistrate or commissioner for oaths that they conscientiously believe that vaccination would be prejudicial to the health of the child.

Vachell, *Mervyn Annesley*, English novelist, list and playwright, born at Rydenham. Among his better-known novels are *Romance of Judge Ketchum*, *The Hill*, *The Face of Clay*, *Quinnage*. His plays include:—*Quinnage*, *Count X*, *Four Fivers*, *A Woman in Paris*, *This was England*, *Moonville*, *My Pagebondage*. (1861—).

Vacuum, a space entirely devoid of matter; in practice, a perfect vacuum is impossible of attainment, and the term is used in a relative sense to denote a space in which the amount of matter is very small. See *Air-pumps*.

Vacuum Cleaner, an apparatus for removing dirt and dust from floor surfaces, carpets, curtains, etc., a nozzle being passed over the surface or material, and the dirt being removed by suction into a vacuum, and thence passed to a bag. The vacuum is produced either by a small electric motor or by bellows operated by the running wheels which pass the apparatus over the surface to be cleaned.

Vacuum Tube, a glass tube containing gas at a low pressure. Between two electrodes in the tube a discharge of electricity is passed at high potential: the gas then frequently glows in a characteristic way, the reddish-orange glow of neon being familiar from its use in illuminated advertisements. At exceedingly low pressures, cathode rays (streams of negative electrons) are formed, and when these strike the anode (positive electrode) they excite X-rays (q.v.).

Vagrancy was formerly a serious crime in England, an Act of 1535 making it punishable by mutilation and death. To-day it is more leniently and effectively dealt with under the Vagrancy Act of 1824, which repealed the earlier laws and prescribed terms of imprisonment for offenders as "idle and disorderly persons," "incorrigible rogues," etc.; by the establishment of workhouses and casual wards in 1834 the social evils of vagrancy were much reduced.

Valais, canton of Switzerland, situated between the canton of Bern on the N. and Italy on the S., in a wide valley at

the Rhone. Much of it is covered by glaciers, and there are also considerable forests. Cattle-rearing, agriculture and the production of wine are the chief industries. The capital is Sign. Area, 2,021 sq. m. Pop. 136,400.

Valdai Hills, (U.S.S.R.), situated between the Leningrad and Western Areas, with a maximum height of 1,160 ft.

Valence, town in France, on the Rhone, in dept. Drôme, of which it is the capital: it has a Romanesque cathedral, and manufactures confectionery, silks, and furniture. Pop. 35,000.

Valencia, city of Spain, the capital of the fertile province of Valencia, situated near the Mediterranean, 3 m. from the mouth of the Guadalquivir, and 300 m. ESE. of Madrid. An ancient and historic city, formerly the capital of an independent kingdom founded by the Moors, it contains a large Gothic cathedral, with a detached campanile, a picture gallery, and a university with a large library. Silk, cloth, leather, cigars, etc., are manufactured, and much fruit is exported, grown in the fertile huerta surrounding the town. During the Civil War, Valencia was the Government headquarters in 1937. Pop. 352,800.

Valencia, province of Spain, in the E. Mediterranean, with an area of 4,150 sq. m. Irrigation is highly developed, and the celebrated huertas, or gardens—of Moorish origin—produce fruit, especially oranges, grapes and dates, in abundance: rice, wheat, maize and esparto are also grown, and textiles, pottery, leather, iron goods and spirits are made. The capital is the city of Valencia. The province was formerly a part of the kingdom of Valencia, which was founded by the Moors and in 1238 was incorporated in Aragon. Pop. 1,092,400.

Valenciennes, town of France, in the dept. of Nord, standing on the Scheldt, 32m. SE. of Lille: it was once famous for its lace. One of the last battles of the World War was fought here in November, 1918, Canadian troops gaining a notable victory. Pop. 35,000.

Valency, a term used in chemistry to describe the combining capacity of an atom, and also applied to a single unit of this capacity. Thus we say that the valency of potassium is 1, and that it has one valency; or that the valency of oxygen is 2, and that it has two valencies. Hydrogen has the smallest degree of combining power, sharing this characteristic with certain other elements such as chlorine and sodium; hence it is regarded as having one unit of valency, and it is customary to define the valency of other elements as the number of atoms of hydrogen with which one atom of the element in question will combine. Recent research upon the structure of the atom has modified and extended the theory of valency, and the subject is now one of great complexity.

Valentia, 5 m. SW. of Cahirciveen. It is 1 m. long and 3 m. broad, and is the European terminus of the Atlantic submarine cable, also a meteorological station. Pop. 1,500.

Valentine's Day, the 14th of February, on which young people are wont to send love-letters to one another. St. Valentine was a Roman priest and martyr (d. 270), but his connection with "valentines" seems to be fortuitous.

Valentinian I., Roman emperor of the West from 364 to 375, born in Pannonia, of humble birth; distinguished himself by his capacity and valour, and was elected emperor by the troops at Nicæa. His reign was spent in repelling the

inroads of the barbarians; in 368 he crushed the Alemanni and in the same year drove the Saxon pirates out of Britain. He was in the act of upbraiding barbarians when he burst a blood-vessel and died. (A.D. 391-375).

Valerian (*Valeriana*), a genus of herbaceous perennial plants, typical of the natural order Valerianaceae. The commonest British species is the common valerian (*Valeriana officinalis*), also called St. George's herb, and notable for its small pink or white flowers, arranged in terminal clusters. The dried root is used medicinally: it contains a volatile oil with a powerful, unpleasant odour, and is used in hysteria. The plant is highly attractive to cats.

Valetta, city, seaport and capital of tory on the NE. coast of the island, between two bays; the streets are steep, and the harbour is strongly fortified: it contains several fine buildings, a cathedral, the palace of the Grand-Masters of the Knights of St. John, and the hospital of St. John: there are also a university and a large public library. It is an important British naval and military station. Pop. 22,800.

Valhalla, in Scandinavian mythology, the hall of Odin, the heaven of the brave, especially such as showed their valour by dying in battle, the "base and slavish" being sent to the realm of Hela, the Death-Goddess.

Valkyrs, in Scandinavian mythology, the handmaidens of Odin, nine in number, who selected such as were worthy to be slain in battle, and conducted them to Valhalla.

Valladolid, city of Spain, capital of the province of Valladolid, situated 150 m. N. of Madrid. It has a university and a 16th-Century granite cathedral, as well as other old churches; Cervantes lived here, his home being preserved. In the 15th and 16th Centuries the town was the capital of Spain. Pop. 97,000.

Valley, a depression in the earth's surface generally caused by the erosive action of a river, or carved out by glacial action. A rift valley is a similar depression caused by the sinking of a stretch of land between two geological faults: rift valleys are a prominent feature of African topography, one such great valley stretching across the continent from Lake Tanganyika by Lake Itudolf and across Ethiopia to the Red Sea, whence it is continued in Asia along the line of the Jordan. The central Scottish lowlands are also a rift valley formation.

Vallombrosa, pleasure resort of Italy, in a forested valley of the Apennines, 21 m. E. of Florence. Here there was a celebrated Benedictine monastery, founded in 1038, which had numerous out-shoots; it was suppressed in 1806 and is now a forestry school.

Valmy, a village of France, 20 m. NE. of Chalons, where the Prussians, under the Duke of Brunswick, were defeated by the troops of the French Republic under Kellermann, Sept. 20, 1793.

Valois, an ancient county (after 1406 a duchy) of France, in Picardy, which now forms part of the depts. of Oise and Aisne. A succession of the counts and dukes of Valois occupied the throne of France, beginning with the accession of Philippe VI. in 1328 and ending with the death of Henri III. in 1589.

Valparaíso (Vale of Paradise), city of Chile, of which it is the chief seaport; situated 116 m. WNW. of Santiago, at the head of a beautiful semi-circular bay, it is largely built on the steep hills rising from the shore and is celebrated for its scenery. A modern commercial city, with excellent communications, it has a large shipping and export trade. It has suffered repeatedly from severe earthquakes, and was bombarded by a Spanish fleet in 1866 and sacked in the civil war of 1891. Pop. 193,200.

Valves (radio). Wireless valves depend for their action on thermionic emission from a hot filament. A number of electrodes are contained in a glass, metal, or silica vessel, which may be evacuated, or may contain a gas such as helium at low pressure. An electrically heated filament forms one electrode, and round this is a plate or anode, which is maintained at a potential above that of the filament. Between the plate and filament are one or more grids—spirals or lattices of wire. In a triode, one grid only is present. If this is at a potential higher than that of the filament, the electrons which leave the filament are attracted towards the grid, and most of these electrons pass through the grid to the anode. If the potential of the grid is considerably lower than that of the filament, the electrons which leave the latter are forced back to it. Hence the current between the filament and anode increases when the potential of the grid is raised, and decreases to a small value or zero when the grid potential falls.

Vampire, in folk-lore, the ghost of a dead person, fabled to issue from the grave at night and suck the blood of the living as they sleep. The belief is of Slavonic origin, and is still common among the Slavs.

Vampire Bat, the common name of a number of species of bats, including the False Vampires (*Megaderma*) of Asia, Africa and Australia,

BLOOD-SUCKING BAT

and a number of South African species of the genus (*Vampyrus*). There are, however, only three species of bloodsucking bat, all confined to S. America, the two chief being *Desmodus ecaudatus*, confined to Brazil, and *Desmodus rufus*, more widely distributed. They have two of the upper incisors very large and shear-like, meeting in the middle of the jaw and adapted for piercing the skin of their prey. They lurk by day in hollows of trees or holes, and come out at night to attack men and other warm-blooded animals.

Van, town of Asiatic Turkey, capital of a Lake Van, 145 m. SE. of Erzerum. In the neighbourhood are celebrated cuneiform inscriptions. Pop. 22,000.

Vanadium, a metallic chemical element group as niobium and tantalum. Symbol, V; atomic number 23; atomic weight, 50.95. Vanadium was discovered in 1830 by Sefström in a Swedish iron ore, and named in honour of the Scandinavian goddess Vanadis. Vanadium is fairly abundant, and is extracted (mainly in Peru) from the ore patronite, a mixture of vanadium sulphides. It is the hardest known metal, and is added to steel to increase the latter's tensile strength and toughness. Vanadium pentoxide is used as a catalyst in certain industrial operations, e.g., the manufacture of sulphuric acid by the contact process.

Vanbrugh, Isaac, English architect, born at Exeter, his real name being Barnes. Her first stage appearance

was in Shakespeare at Margate; she joined the companies of J. E. Beerbohm Tree, Sir George Alexander, Arthur Boucher; her extensive list of successes includes leading parts in *The Diary*, *Trilwyn*, *of the Wells*, *The Gay Lord Ques*, *The Admirable Crichton*, *Mr. Pin Fusses By Dinner at Eight*, *Viceroy Sarah* (1935), *The Old Maid* (1936). She married, in 1901, Dion Boucicault, who d. 1929. (1878-). Her sister, Violet Vanbrugh, also a talented and popular actress, was married to the late Arthur Boucher; she took part in many plays with her sister, besides creating numerous independent roles, including prominent Shakespearean parts. (1867-).

Vanbrugh, Sir John, English dramatist and architect, born in London of Dutch extraction. In 1685 he entered the army, and in 1690 was arrested in Calais as a spy and imprisoned for two years at Vincennes and in the Bastille. His first comedy, *The Relapse*, 1696, was a great success; later, among others, appeared *The Provok'd Wife*, 1697 (written in the Bastille) and *The Confederacy*, 1705. As an architect, he designed several famous houses and buildings, chiefly in a heavy and pretentious style, including Blenheim Palace and Castle Howard. In 1704 he was appointed Clarenceux clerk-of-arms, and was knighted in 1714. (1684-1726).

Van Buren, Martin, eighth President of the United States, born at Kinderhook, N.Y., the son of a tavern-keeper. He was admitted to the bar in 1803, and in 1812 entered the state senate as a republican; Attorney-General, 1815, he entered the U.S. Senate in 1821; in 1828 he became Governor of New York and the same year Secretary of State; in 1835 he was elected President, setting himself to restore the finances and opposing emancipation; he was not re-elected in 1840. (1782-1862).

Vancouver, city and seaport of British Columbia, Columbia, the chief port of W. Canada, situated on Burrard Inlet, 1,480 m. W. of Winnipeg. It has a splendid harbour, with grain elevators and modern facilities and a huge export trade, and is also the terminus of the Canadian Pacific and Canadian National Railways, and a centre for numerous steamship lines; there are foundries, saw-mills, shipbuilding-yards and breweries, and numerous manufactures; at Point Grey is the University of British Columbia. Pop. 246,600.

Vancouver Island, largest island coast of N. America, belonging to British Columbia, from which it is separated by the Strait of Georgia and Queen Charlotte Sound. It is 285 m. long and from 40 m. to 80 m. wide, is covered with forests and only partially cultivated. It is rich in minerals, including coal, iron and copper, and has extensive fisheries. Victoria, the capital of British Columbia, is on the island, and other towns are Wellington, Port Alberni and Nanaimo. Area, 20,000 sq. m. Pop. 122,000.

Vandals, a former race of Teutonic people inhabiting N. Germany who invaded and settled in various parts of Europe in the early centuries A.D. In 455, under Genseric, they seized and plundered Rome, mutilating and destroying the works of art, so that their name has become a byword for wanton destruction. In 554 they were crushed by Belisarius.

Vanderbilt, Cornelius, American financier and millionaire, born at Stapleton, Staten I. Beginning life as a ferryman, he acquired his fortune by enterprise in steamship navigation and speculating in railway extensions. He endowed Vanderbilt University, Nashville, Tennessee. (1794-1877).

Van Diemen's Land, former name of the island known since 1853 as Tasmania (q.v.).

Vandyck, born at Antwerp: studied under Rubens, whose favourite pupil he was: visited Italy, and devoted himself to the study of the great masters; on his return to Antwerp painted "Christ Crucified Between Two Thieves"; came to England in 1632, and was patronized by Charles I., being knighted, and made court painter: painted the royal family, the King, Queen, and their children, and during the next eight years executed portraits of most of the court personages. His portraits are very numerous, the most celebrated being in England. (1599-1641).

Vane, Sir Henry, English statesman, born at Dabdon, Essex: he entered the diplomatic service, but in 1635, being a strong Puritan, emigrated for a time to New England: on his return, he entered Parliament, took an active part against the Royalists and withstood Cromwell; his opposition to the Protectorate led to his imprisonment for a time; at the Restoration he was beheaded on Tower Hill. (1613-1662).

Van Gogh, Vincent, Dutch painter of school, born in N. Brabant; for a time, in 1878, he was a schoolmaster in England, but returned to Holland to study for the Church; in 1882 he began to study painting, eventually removing to Paris; for a while he was a patient in a lunatic asylum, and on his release shot himself; his works are characterized by convulsive movement and a mastery of vivid colour. (1853-1890).

Vanilla, a genus of climbing orchids

leaves; they attach themselves to trees by means of aerial rootlets. The dried seed-pods of *Vanilla planifolia* constitute the vanilla of commerce, used as a flavouring in confectionery, etc.; it is a native of Mexico, but is also cultivated in Java, Tahiti and elsewhere.

VANILLA PLANIFOLIA

Vannes, town and seaport in Brittany, France, capital of dept. Morbihan; it has a cathedral and a museum of Breton antiquities. Pop. 22,000.

Van Zeeland, Paul, Belgian statesman, born at Soignies; entered the Belgian National Bank in 1922, becoming a director in 1926. In 1928 he became a professor at Louvain University. In 1934 he entered the Belgian cabinet, and the following year became premier, holding that office until 1937, in which year he undertook at the request of Britain and France an international economic mission to enquire into the possibility of overcoming obstacles to international trade, issuing a report at the end of the year. (1899-).

Vaporization. See *Evaporation*.

Vapour, the term applied to a gas only slightly above the temperature at which it condenses into a liquid. Though there is no definite line of distinction between a vapour and a gas, it is generally understood that a vapour is in such a condition that it does not obey the laws (Boyle's and Charles') which describe the behaviour of true gases under changes of temperature and pressure.

Var, dept. of France, in the S.E. of the Alps. The N. and S. are mountainous, and the centre is watered by the R. Argen; silk is cultivated and spun, tobacco and flowers are grown, and silk goods, soap, paper and

pottery are produced. Dragnignan is the capital, and other towns include Toulon, Hyères, Fréjus and Brignoles. Area, 2,333 sq. m. Pop. 398,700.

Vardar, river of the Balkans, rising in S.E. into the Gulf of Salonika, at Thessaloniki, Greece, after a course of about 300 m. Battles were fought on its banks in 1915, and 1918.

Variable Stars, which stars the light of sometimes with exact regularity, sometimes with approximate regularity, and sometimes with apparently complete irregularity. The best known are the "Cepheid variables," the cycle of light-variations in which ranges from about one hour to one year; each individual, however, follows its particular cycle with precision. The reasons for the variations are unknown, but it was discovered by Miss Leavitt (U.S.A.) in 1912 that the time of the cycle of a Cepheid variable is directly proportional to its brilliance—the greater the brilliance the longer the time taken for the cycle of light-variation to complete itself. The importance of this discovery is that all Cepheids of equal length of cycle must be of equal real brilliance; hence if two such stars are of apparently unequal brilliance, this must be because they are at different distances from the earth. In this way, it has been possible to measure interstellar distances in a new, reliable, and very accurate way.

Variation, in biology, a departure from the normal characteristics of a species. According to Darwin, in whose theory of evolution variations play an important part, minute variations take place in all directions round a given mean, and those creatures whose variations render them less fit in the struggle for existence, succumb first. Gradual variations such as these are called continuous variations. When a new characteristic appears, the term "discontinuous variation" is used. Many causes result in variations, such as change of environment, habit or food. Thus a newly acquired climbing habit will develop the limbs beyond their normal capacity, and the increased facility may be passed on to the offspring.

Varicose Veins, a morbid condition in which they become dilated and form hard, knotted swellings. The disease occurs commonly in the lower limbs, and is caused by local obstruction of the circulation of the blood, as by tight garters, the pressure of the womb in pregnancy, etc. The treatment consists of the application of suitable bandages, or an elastic stocking, while the limb must be rested in an elevated position. Varicose veins can now be permanently cured by injection. Varicose veins in the rectum are known as hæmorrhoids, or piles.

Varna, city and fortified seaport of Bulgaria, on a bay in the Black Sea; it has a Greek Orthodox cathedral and carries on a large trade. Here the Turks defeated the Hungarians, led by Hunyadi János, in 1444. Pop. 70,000.

Varnish, a resinous solution with or without colouring matter, applied to surfaces for decorative or preservative purposes. The resins and gums generally used include gum arabic, copal, dragon's blood, kauri, amber, lac, mastic, etc. Oil, turpentine, spirit and cellulose are among the chief solvents or "thinners" employed in varnishes.

Varus, Publius Quinctilius, Roman consul, governor of Germany, appointed by Augustus in 9 A.D.; being attacked by Arminius and overpowered with loss of three Roman legions under his command, he committed suicide; when the news of the disaster reached Rome Augustus was overwhelmed with grief, and in a paroxysm of despair called upon Varus to restore his legions; c. A.D. 9.

Vascular System, the circulatory system in animals, and the higher plants. In the former, the term is applied to the whole system of arteries, veins, capillaries, lymphatics and lacteals connected with the circulation of the blood, the conveyance of nutrient materials, the removal of waste products, etc.

Vatican, the palace of the Pope in Rome, situated on the Vatican Hill, reputed scene of the martyrdom of St. Peter. Over the latter's tomb Constantine founded a basilica in 324, now the famous church of St. Peter, and this was the nucleus of the present vast assemblage of buildings, designed and decorated, in the main, by some of the greatest artists of the Renaissance. The huge Vatican library is full of bibliographical treasures, while the museums and art galleries house some of the world's finest collections.

Vatican City, the capital and all that remains of the Papal States, which at one time covered 16,000 sq. m. in Italy. It is an area of about 1 sq. m. in Rome around St. Peter's, and over it the Pope has full sovereignty, including power to issue coins and stamps and to send diplomatic representatives abroad. The Papal States were seized in 1870 by Italy, and the temporal sovereignty of the Holy See was not again recognized until the signing of the Lateran Treaty with the Italian Government in 1929. Pop. 1,025.

Vatican Council, an ecumenical Roman Catholic Church attended by eminent ecclesiastics under the auspices of Pius IX., which assembled on Dec. 8, 1869, and by a large majority decreed the doctrine of Papal Infallibility.

Vauban, Sébastien le Prestre de, French soldier and military engineer; as Frondeur, he fought under Condé, but was enlisted in the royal service by Cardinal Mazarin. In 1655, he became engineer to King Louis XIV, and in this capacity designed and rebuilt fortresses and defensive works throughout France, besides directing numerous sieges; many of his fortresses stand to-day. He was made a marshal in 1703. (1633-1707).

Vaucluse, dept. of France, in the SE., on the N., and Bouches-du-Rhône, on the S. In parts mountainous, with spurs of the French Alps, it is well watered by the Durance and other streams and irrigation is actively practised. Wheat, potatoes, vegetables, fruit, sugar-beet and other crops are grown, as well as olives and the grape-vine. Silk-spinning and weaving and the manufacture of paper, pottery and tobacco are among the activities. Among the towns are Avignon (the capital), Apt, Carpentras and Orange. Area, 1,381 sq. m. Pop. 245,500.

Vaud, canton of Switzerland, in the SW., covering an area of 1,239 sq. m. between Lakes Neuchâtel and Geneva; it is hilly and in the Diablerets rises to 10,650 ft.; tobacco and the vine are grown, its white wine being celebrated; there are many health-resorts, with a large tourist traffic; the capital is Lausanne, while other centres are Yveroy, Montreux and Château d'Oex. Pop. 321,900.

Vaudeville, a light entertainment sketches interspersed with songs, dances, and perhaps acrobatic feats; also known as a variety show. The name was originally applied to a topical popular song.

Vaudois. See Waldenses.

Vaughan, Henry, Welsh poet, self-styled the "Blurrier" (Latin, *Silvius*, the Welsh); he fought for Charles I. in 1645 and next year published his first poems, which

were followed by *Silva Scintillans*, 1650, *The Mount of Olives*, 1653, and other volumes of poetry, chiefly in a mystical vein reminiscent of George Herbert. (1622-1695).

Vaughan, Herbert, Cardinal, English at Gloucester; educated at Stonyhurst, Downside and abroad, he was ordained in 1854, and became vice-president of the college at Ware; he became Bishop of Salford, 1872, Archbishop of Westminster, 1892, and cardinal, 1893; he helped in the foundation of Westminster Cathedral. (1832-1903).

Vaughan Williams, Ralph, British musical composer. Born at Down Ampney, Gloucestershire, he studied privately at first and then at the Royal College of Music. Three symphonies, the *London*, *Sea*, and *Pastoral*, an opera, *Hugh the Drover*, several songs, including the cycle *On Wenlock Edge*, and a number of hymn tunes are among his compositions. O.M. 1935. (1872-).

Vault, an arched roof or roof-like covering of stone, brick, etc. The barrel-vault, of which the cross-section is an arc of a circle, is the earliest form, while the groined vault is one formed by two barrel-vaults intersecting at right angles; a vault with a semi-circular arch is known as a cylindrical vault. Romanesque vaulting has ribs at the groins, and was superseded by the pointed Gothic ribbed vault.

VAULT

the pointed Gothic ribbed vault. In the vaulting of a Gothic roof the intermediate vault is a mere shell, all the strength being concentrated in the ribs, by which the weight is transferred to the walls and buttresses.

Vauxhall Gardens, a popular London riverside resort opened in 1661 and highly fashionable in the following century for concerts and gallantry; it was closed in 1859, the site being the modern district of Vauxhall.

Vedanta, in Hindu religion, "the end of the Upanishads, the Veda," a term applied to the Upanishads, which conclude the Veda and consist of speculative commentaries upon the Vedic teaching. A Vedanta philosophy was developed which, in general, postulates existence as residing in God alone, upon Whom the individual soul is dependent for all its activities, being devoid of volition of its own.

Vedas, the sacred books of the Hindus, the oldest of which originated not later than 1000 B.C. and probably considerably earlier. They consist of hymns, liturgies and incantations to the gods, and comprise the *Rig Veda*, the *Atharva Veda*, the *Sama Veda* and the *Yajur Veda*, to each of which are attached commentaries in elucidation.

Veddas, an aboriginal race of Ceylon, between Kandy and the E. coast. Their chief characteristics are their low stature (averaging 80½ in.), long black hair, dark skins and flat noses; they are monogamous, but otherwise live very primitively. Their language is a corrupt Sinhalese.

Vega, the bright star in the constellation Lyra, located at a distance of 20.4 light-years from the earth. It is the approximate point towards which the whole solar system appears to be moving.

Vegetable, in common speech, a plant feeding cattle or other animals; the cabbages, potatoes, turnips, onions, carrots, beans, peas, etc. The term vegetable-kingdom, coined by Linnaeus, embraces all plants of whatever affinity, and in his *Systema Naturæ* he classified them into the three tribes, Monocotyledonous, Dicotyledonous and

Acoyledonous, a classification depending on whether the plant has one, two, or no seed-leaves. In Linnæus' description of vegetable life, a plant or vegetable possesses the powers of nutrition, and of reproduction, but though it has life it has no feeling.

Vegetable Marrow (*Cucurbita Pepo ovifera*)

a kind of gourd, widely cultivated as a table vegetable. It is produced by an annual trailing plant, the seeds of which should be sown in April in pots, with mild heat; the seedlings should be planted out towards the end of May, being set a yard apart in a raised bed or refuse heap containing a good layer of half-decayed manure; the young plants should be protected against frost.

Vegetarianism, the practice of from which flesh is excluded. Frequently abstention from meat has been obligatory, chiefly on account of poverty, as in the case of the lower-class Hindus at all times, and also of the peasants of medieval Europe, while many races and sects have eschewed meat on religious and ethical grounds based on the objection to the bloodshed and suffering which meat-eating necessarily involves. The modern vegetarian movement dates from the middle of the last century; its followers base their objections to meat chiefly upon reasons of health, economy, eugenics (racial improvement), ethics, and humanitarianism.

Vehmgerichte, or *Fehmgericht*, a tribunal held in several parts of Germany during the Middle Ages, in connection with a secret organization under sanction of the emperor for the enforcement of justice and punishment of crime. These courts were held in secret places at night, and inspired great terror in the 13th and 14th centuries.

Veins, in anatomy, the blood-vessels that carry the blood from the tissues to the heart. They are devoid of elasticity and have no pulsation, the motion of the blood being secured by pressure of the moving muscles between which they are embedded. The venous blood returned from above the cardiac region is collected in one great vein, the vena cava superior, while all the blood from below enters by the vena cava inferior. The portal vein receives the blood from the intestines, stomach, etc.; the pulmonary vein and its branches return the oxygenated blood from the lungs to the left ventricle of the heart.

Velazquez (*Velazquez*), Diego de Silva, greatest of Spanish painters, born at Seville; studied under Herrera, who taught him to teach himself, so that he was a self-taught artist, and simply painted what he saw and as he saw it. He became court painter to Philip IV. of Spain, and executed numerous splendid portraits of the king and of other royal personages and nobilities. There are examples of his work in the National Gallery, London, and elsewhere, but the best collection is in Madrid. He painted historical, sacred, genre, and landscape as well as portraits. (1599-1660).

Vellum, a fine parchment made from white. Before the general introduction of paper, it was a common writing material, but is now only rarely used, for addresses, charters, etc. It is still employed occasionally for binding books.

Velocity, in mechanics the speed of a particle in a certain direction; as it involves the ideas of both distance and time, it is measured in feet per second, inches per second, or by some similar standard; thus, absolute velocity, that at which light travels in a vacuum, is 186,000 m. per second.

Velvet, a pile fabric in which a series of small silk tufts are embedded in the silk basic texture. In the weaving process the warp is passed over wires, so as to leave rows of loops projecting from the backing; the loops are afterwards cut and form the pile. Velvet is a similar fabric in which, however, the base or backing is of cotton instead of silk.

Vendace, a fish allied to the salmon, of which two species, *Coregonus vandesius* and *Coregonus gracilior*, are found in British waters. The fish—also known as whitefish—is esteemed by epicures.

It is greenish above and silvery white below, about 6 in. in length.

VENDACE

Vendée, maritime dept. of France, on the Bay of Biscay, situated S. of Maine-et-Loire and Loire Inférieure; marshy on the W., wooded on the N., and with an open fertile tract in the middle and S. The chief towns are the capital, Le Roche-sur-Yon, Les Sables d'Olonne, Fontenay-le-Comte and Luçon. In this region, in 1793, a stubborn resistance to the French Revolution broke out and was only suppressed with difficulty. Area, 2,690 sq. m. Pop. 389,300.

Vendetta, a family feud in Corsica, whereby it was the duty of the relative of a murdered man to avenge his death by taking the life of his murderer or a relative of the latter.

Veneer, a thin layer of hard wood, of choice quality, such as mahogany or rosewood, glued on to the surface of an article made of an inferior wood, such as pine. The process of veneering is mainly used in furniture-making.

Veneral Diseases, diseases from infection with micro-organisms generally during sexual intercourse; they are syphilis, gonorrhoea, and soft chancre. Syphilis is one of the chief agents in filling the hospitals for the insane, the proportion due to this cause alone being as high as from 10 to 20 per cent. of all cases. It may also develop into certain organic diseases of the central nervous system, such as general paralysis of the insane and tabes dorsalis, or locomotor ataxia. Local authorities are empowered to provide medical practitioners with facilities for the full (voluntary) examination and treatment of patients. Harm may ensue from persons innocently or unknowingly spreading venereal diseases, hence treatment should be sought in the initial stages, or it may lead to incurable results.

Venezuela, republic of South America, on the Caribbean coast, between Brazil and British Guiana on the E., and S. and Colombia on the W. The surface is largely irregular and mountainous, save in the basin of the Orinoco, which traverses it; there are extensive llanos, or plains, and dense forests; on the llanos large herds of horses and cattle are reared. The agricultural products are cereals, cocoa, sugar, coffee, cotton, tobacco, etc.; the forests yield mahogany, ebony, and rubber; while the mines yield iron, copper, etc., and there are extensive goldfields. The capital is Caracas, while Maracaibo, Valencia, Trujillo, Barquisimeto and San Cristobal are other large towns. The republic was formed in 1830, by secession from Colombia. Area, 352,966 sq. m. Pop. 3,327,800.

Venice, city and seaport of Italy, Adriatic, in a shallow lagoon dotted with some thirty islets. The city is built on piles, and many of the streets are canals traversed by

and motor launches and crossed by It dates from the year 432, when the islands were a place of refuge from the attacks of the Huns, and it took shape as an independent State with magistrates of its own about 697; it derived great wealth from its trade with the East, and during the Medieval and Renaissance periods ranked among the most powerful states in Europe. The chief magistrate, known as the doge, governed with the aid of a Council of Ten. With the discovery of the Cape route to India, 1486, a decline in Venetian prosperity set in which culminated in the republic's becoming an Austrian fief, 1797.

In 1866 the Austro-Prussia, and Venice United Italy; in 1901 at Marghera, on the mainland. Among the finest buildings of Venice, which is a vast museum of beautiful architecture and other works of art, are the doge's palace, St. Mark's Cathedral, with its famous square and library, the Rialto bridge, the scuole, or guild-halls, and scores of magnificent palaces, churches, campanilli and monuments, rich in the productions of some of the world's greatest artists. To-day Venice is an important naval and mercantile port, with shipbuilding yards; separating the city from the open sea is the sand-bank known as the Lido, a fashionable bathing resort. Pop. 284,000.

Venison, the flesh of such wild animals, or game-birds as are taken in the chase (Latin *venatio*, hunting) and used for human food; in modern usage restricted to deer-flesh.

Venizelos, Eleutherios, Greek politician, born in Crete; a lawyer, he entered the Cretan Assembly, and took part in the 1897 rebellion that secured the island's independence. In 1910 he became Liberal Prime Minister of Greece, and helped to form the Balkan League against Turkey. In 1917 he forced King Constantine to abdicate, and brought Greece into the World War on the side of the Allies. Forced to leave Greece in 1920, he was recalled on the expulsion of George II. In 1922 and was elected prime minister, but soon resigned. From 1928 to 1932 he was again in power; in Crete he inspired a revolt against its acting regent, but the revolt was quelled, and he had to flee. (1864-1936).

Ventilation, the introduction of fresh air to and the expulsion of impure air from offices, factories, rooms, ships, etc. Experts agree that a minimum of 2,000 cubic ft. of fresh air an hour should be allowed for every cubic ft. of space, but otherwise the quantum of capacity per person differs with the type of building. Natural ventilation is secured by doors, windows and chimneys, but these may be supplemented by gratings in walls, inlet tubes and cowls for the escape of impure air. Ventilating fans are also suitable in some cases. Artificial ventilation is provided by tunnels and tubes which conduct currents of fresh air propelled by turbine fans, foul air being drawn out along similar ducts by suction. Ventilation of this kind is employed in many city offices and buildings which have no windows. The ventilation of tube railways, steamships and collieries requires special apparatus and technique; vertical or screw blowers are used for removing large volumes of air, and ventilating shafts are also sunk and in the case of tube railways the air is sometimes mixed with oxygen.

Ventnor, town and watering-place of Wiltshire, the Isle of Wight, England, on the S. coast, 12 m. S. of Ryde. Its mild climate is recommended for consumptive, and there are general hospitals. Pop. 6,106.

Ventriloquism, the art of talking in such a manner that the voice appears to come from anywhere

but the mouth of the speaker. It is a form of illusion, aided by the immobility of the lips, which are kept almost closed, and by the gestures and facial expressions of the ventriloquist, by which the attention of his hearers is diverted towards a doll, dummy or other supposed "speaker."

Venus, the Roman goddess of love and beauty (originally a goddess of growth and gardens), and at length identified with the Greek Aphrodite. She was regarded as the tutelary goddess of Rome, where she had two temples.

Venus, an interior planet of the solar system, its orbit being outside that of Mercury and within that of the earth. It is slightly smaller than the earth, having a diameter of 7,700 m., and has a mean distance of 67,900,000 m. from the sun, round which it revolves in 225 days, while its own time of rotation is uncertain; it is the brightest of the heavenly bodies, after the sun and moon, and appears as a morning or evening star, according as it rises before the sun or sets after it. Like the earth, Venus is surrounded by an atmosphere, and heavy clouds also envelop it, so that in the eyes of astronomers it is of all the remaining planets the most likely to support life.

Venus' Fly-Trap, a perennial plant (*Dionaea muscipula*), of the sundew (*Droseraceae*) family, native to N. and S. Carolina. Its leaves, arranged like a rosette, have spike-like processes along their edges; each leaf has also three sensitive bristles which, when touched by an insect, cause the lobes of the leaf to spring together, the insect being imprisoned by the interlocking spikes; it is then digested by an acid secretion.

Venus' Looking-Glass (*Specularia perfoliata*), an annual plant of the Campanula order, found in Europe. It bears bright purple flowers from May to July and has long been cultivated in Britain as a border plant. The name is probably an allusion to the shiny surface of the seeds.

Vera Cruz, city and seaport of Mexico on the Gulf of Mexico, 283 m. E. of Mexico City; regularly built and strongly fortified. It has a fine harbour, and a large export trade. Pop. 71,000.

Verbena, a genus of plants of the family Verbenaceae, most of the 160 species of which are native to tropical and sub-tropical America. The cultivated verbenas, also known as vervain, are favourite plants for ornamental flower-beds, most of them being hybrids. A rich soil is necessary for successful growing. One species, *Verbena officinalis*, is native to Britain, and like Euphrasia was formerly in repute as a cure for affections of the eye. The lemon-scented verbenas with fragrant leaves is not a true verbenas, being referred to the genus *Lippa* of the same order.

VERBENA
OFFICINALIS

Vercingetorix, Celtic chieftain and leader of a revolt against Roman rule in Gaul which was put down by Caesar in 52 B.C. He was led in triumph at Rome by his conqueror, and put to death in 45 B.C.

Verdi, Giuseppe, Italian composer, born at Roncole, Parma. He composed a symphony at the age of 15, and in 1835 was appointed conductor and organist at Busseto. His first opera, *Oberto*, appeared in 1836, but his talent was slow to obtain recognition, until the appearance of his *Le Lombardi* and *Il Trovatore*. His best operas are *Macbeth*, 1847, *Rigoletto*, 1851, *Il Trovatore*, 1853, *La Traviata*, 1853, *Aida*, 1871.

1871, *Otello*, 1887, and *Falstaff*, 1893; he also composed a beautiful *Requiem*, 1874, and other sacred works. (1813-1901).

Verdict, the answer of a jury to the fact in any case, civil or criminal, committed to their examination. In England, in criminal cases, there are two possible verdicts—"guilty" or "not guilty," but in Scotland a verdict of "not proven" may be returned. A verdict may be set aside on the ground of its being against the weight of evidence and a new trial ordered. Verdicts must be unanimous in criminal cases; in civil actions, however, the verdict of a majority of the jury may, by consent of the parties, be accepted.

Verdigris, a basic acetate of copper, is found on copper or brass when left in contact with acids, the atmosphere, etc. The brilliant pigment Paris Green, used as an insecticide, is obtained by boiling verdigris with arsenious oxide and acetic acid.

Verdun, town of France, in the dept. of the Meuse, 35 m. W. of Metz, on the R. Meuse. It has a fine cathedral with beautiful 15th Century cloisters, but is chiefly notable as an important fortress between Paris and the German frontier, and as such was the objective of fierce German assaults in the World War, in which the town was razed. The battle of Verdun, the result of a German attempt to reach Paris at all costs, lasted from Feb. to June, 1916, and was memorable for the heroic defence of the French, under Generals Pétain and Nivelle, in the face of unprecedented enemy bombardments; the German attack was a costly failure, their casualties being 300,000. Pop. 15,000.

Vereeniging, town of the Transvaal, on the Vaal, 50 m. S. of Johannesburg. It is a colliery centre, and has important hardware and engineering industries. The peace treaty closing the Boer War was drawn up here in 1902. Pop. 13,800.

Vergil, Latin poet, born near Mantua, studied at Cremona and Milan, and at 16 was sent to Rome to study rhetoric and philosophy; lost a property he had during the civil war, but recommended himself to Pollio, the governor, who introduced him to Augustus, and he went to settle in Rome. Here, in 37 B.C., he published his *Eclogues*, a collection of 10 pastorals, and gained the patronage of Mæcenas, under whose favour he was able to retire to a villa at Naples, where after seven years he, in 30 B.C., produced the *Georgics*, in four books, on the art of husbandry, after which he devoted himself to his great work the *Æneid*, or the story of Æneas of Troy, an epic in 12 books, connecting the hero with the foundation of Rome, and especially with the Julian family, completing it in 19 B.C. On his deathbed he expressed a wish that it should be burned, and left instructions to that effect in his will. Varius and Tucca, his executors, however, published it at the request of Augustus. (70-19 B.C.).

Verlaine, Paul, French poet, born at Parmans, producing numerous lyrics of much beauty and originality, the first collection being *Poèmes saturniens*, 1866, followed by *Poèmes antiques*, 1869, and *La Bonne Chanson*, 1878. In 1871 he met the poet J. A. Rimbaud, with whom he visited England. The attempted murder of his companion brought Verlaine two years' imprisonment, and after his release he wrote some remarkable religious poetry. (1844-1896).

Vermeer, Jan, Dutch painter, born at his life; he was a pupil of Carel Fabritius, in 1653, and in 1663 (and again in

1670) was one of the heads of the Guild of St. Luke. His pictures are few, but of the finest quality, and are chiefly genre subjects in courtyards and interiors, but include the celebrated "View of Delft"; among his few religious paintings is the masterly "Christ and the Disciples at Emmaus," discovered in 1937. (1632-1675).

Vermicelli, a preparation of wheat flour, made in long slender tubes or worm-like threads, the same in substance as macaroni (q.v.), but the latter is made in larger tubes. It is much used in Italy in soups and also in the same way as macaroni.

Vermilion, a red pigment obtained by grinding cinnabar (q.v.).

Vermin, a term used for any kind of more specifically for certain offensive or mischievous animals, namely, the smaller mammals and certain birds which damage crops, etc., e.g., foxes, polecats, weasels, otters, kites, hawks, rats, mice and voles; and noxious and destructive insects or the like, such as flies, fleas, grubs, lice, etc.

Vermont, state of the U.S.A., situated W. of New Hampshire and N. of Massachusetts; it covers 9,564 sq. m., including large tracts of pastoral and arable land. The state obtains its name from the forested Green Mts., which intersect it longitudinally and rise to 4,400 ft. in Mt. Mansfield. Hay, oats, maize, potatoes and apples are the chief crops, and the production of maple syrup and sugar is important; cattle-raising, dairying and forestry are active industries, and there are large marble and granite quarries; the state was an original member of the Union. Montpelier is the capital, but Burlington, Rutland and Barre are the largest cities. Pop. 359,600.

Vermouth, an alcoholic beverage, consisting of white wine strengthened with spirit and flavoured with wormwood or other aromatic substances.

Verne, Jules, French novelist, born at Nantes. At first he wrote operettas and comedies for the stage, but eventually found an unexplored avenue in a celebrated series of semi-scientific novels, chief among which are *Round the World in Eighty Days*, *Five Weeks in a Balloon*, *Twenty Thousand Leagues under the Sea*, *A Voyage to the Centre of the Earth*, *A Trip to the Moon*, etc. (1828-1905).

Vernet, Claude Joseph, French painter, born at Avignon; he worked at first in Rome, becoming famous as a marine painter, but in 1753 was summoned to Paris by the king to paint the seaports of France, this series being his finest works. (1714-1789). His son, Charles-Horace Vernet, born at Bordeaux, excelled as a battle-painter, especially devoting himself to the portrayal of Napoleon's victories; he was a successful lithographer. (1758-1835). Horace Vernet, son of Charles-Horace, was born at Paris, also became a great military painter; in 1828 he became director of the French school at Rome, and later decorated a salon at Versailles. (1789-1863).

Vernier, Pierre, French geometer, born at Ornans, Franche-Comté, son of a mathematician; employed on commissions by the court of Spain, he later became commandant of the castle of Ornans and director of the mint. He published in 1631 a treatise on the quadrant, in which he gave works of art. Pop. 153,800.

Verona, town of Italy, on the Adige, 62 m. W. of Venice. It is chiefly remarkable for its Romanesque architecture, among examples of which are the basilica of St. Zeno, the splendid cathedral, dating from 1187 and exquisitely ornamented, and several churches. There is a 16th Cen-

tury castle, with a museum and picture-gallery; the fine Roman remains include a great amphitheatre, a theatre, inscriptions and sculptures. The town is rich in Renaissance works of art. Pop. 155,800.

Veronal, a hypnotic or sleep-producing substance chemically known as diethylmalonyl urea. It is a colourless crystalline solid with a slightly bitter taste, and is only slightly soluble in cold water. Although its toxicity is relatively low, an overdose may cause poisoning and death.

Veronese, Paolo, or Paolo Cagliari, Italian painter of the Venetian school, born at Verona. After working in his native town and at Mantua, where he painted his "Temptation of St. Anthony" for the cathedral, he settled in Venice in 1556, where he soon earned distinction, rivaling Titian and Tintoretto. His subjects were mostly scriptural, the most celebrated being the "Marriage Feast at Cana," now in the Louvre. (1528-1588).

Veronica, a genus of shrubs and herbs of the order Scrophulariaceae, with tubular flowers of various colours. About 17 species are indigenous to Great Britain, including *V. Chamaedrys*, the Gernander Speedwell, one of the most charming of our native wild flowers, with blue and white blossoms, their popular name being Speedwell (q.v.). Many species are native to New Zealand, where they are shrubby growths or small trees. The garden varieties of Veronica, which are usually known as Veronica and not Speedwell, are shrubs.

GERMANDER SPEEDWELL

Veronica, St., according to legend, a woman who met Christ on His way to crucifixion, and offered Him her veil to wipe the sweat from His face, upon which the fabric was found to bear the imprint of His features.

Verrocchio, Andrea del, Italian artist, born at Florence. He practised as a painter, sculptor and goldsmith, producing in the last-named capacity many beautiful church furnishings, silver statues, ecclesiastical ornaments, etc. His most celebrated painting is the "Baptism of Christ" at Florence, but he excelled chiefly as a sculptor, among several beautiful works being his bronze "David," the Medici tomb in San Lorenzo, and a terra cotta Madonna, all in Florence. His masterpiece, however, is the great bronze statue of the General, Colleoni, at Venice, perhaps the finest equestrian monument in the world. (1435-1488).

Versailles, town of France, capital of the dept. of Seine-et-Oise, 11 m. by rail SW. of Paris, of which it is virtually a suburb. The seat of the court from Louis XIV.'s time until the revolution, it is renowned for its magnificent palace, set in splendid grounds with elaborate fountains and containing masterpieces of furniture, furnishings and works of art. Here also are the minor palaces known as the Grand and the Petit Trianon. The town was occupied by the Prussians during the siege of Paris, and in the Hall of Mirrors in the palace the Prussian king was proclaimed German emperor. In 1919 the Peace Conference after the World War was held here, the Treaty of Versailles being signed in the Hall of Mirrors. Pop. 66,900.

Versailles, Treaty of, the treaty of peace that officially ended the World War, signed in June, 1919; among its 15 main articles was the establishing of the Covenant of the League of Nations (q.v.). It fixed the frontiers of Germany, Belgium,

Luxembourg, and France, and recognized Czechoslovakia, Poland and other new States. Germany was deprived of colonies, had her fighting forces reduced, accepted responsibility for war crimes, and a heavy load of reparations to be paid both in money and in kind. It was also stipulated that German territory to the W. of the Rhine should be occupied by the Allies for 15 years. A number of provisions, such as the prescribing the trial and punishment of "war-crimeinals," chief of whom was the German Emperor, were found impracticable and were tacitly dropped.

Verse. See Poetry; Prose.

Vertebrates, one of the main subkingdom, comprising those animals which have a brain and spinal cord, the former enclosed in a cranium and the latter within the vertebral column, which consists of a series of bony segments, articulated so that the animal may freely bend its body. In different animals, these segments, or vertebrae, vary considerably in number and in the manner in which they are joined, and in one class the bony spine is replaced by a notochord or gristly, unjointed rod. Vertebrates include creatures as dissimilar in appearance as the chimpanzee, crocodile, ostrich and frog; the following classes: Cyclostomata, including lampreys and hog-fishes, with a notochord; Pisces, or fishes; Amphibia—frogs, salamanders, etc.; Reptilia, including lizards, snakes, turtles, crocodiles, etc.; Aves, or birds; and Mammalia, or mammals, including man.

Vertigo, a sensation of whirling or a tendency to lose equilibrium or consciousness. It is a common symptom of an irregular supply of blood to the brain, and of nervous and general debility, but may also arise from digestive disturbances.

Verulam, Lord, See Bacon, Francis, Lord Albans.

Very Light, a kind of firework fired from in warfare, for momentary illumination, or as a signal or sign of distress.

Vespasian, or Titus Flavius Vespasianus,

VESPASIAN

Roman emperor from 70 to 79, born in the Sabine territory, of humble parentage; he commanded a legion in 43 and campaigned in Britain, Judaea and elsewhere. He was consul in 51, and in 68 governor of Africa; in 70, on the deposition of Vitellius, he was raised to the throne by the army. Of frugal tastes, he restored the finances, reorganized the army and the provincial administration, and gave Rome peace for nine years. (A.D. 9-79).

Vespers, in the Roman Catholic liturgy, the time of evening worship recited usually between the afternoon hours of 4 and 8. It is the last but one of the eight "hours" comprising the daily office.

Vespucci, Amerigo, a Florentine navigator, first of Spain and afterwards of Portugal, four times visited the New World, just discovered by Columbus, which the first cartographers called America, after his name; these visits were made between 1492 and 1500, while Columbus's discovery, as is known, was in 1492. (1461-1512).

Vesta, the Roman goddess of the hearth, identified with the Greek Hestia. As the guardian of domestic life, she had a shrine in every household. Her temple in Rome stood in the Forum; there a sacred

fire, kindled by the rays of the sun, was kept constantly burning, guarded by virgins called Vestals (at first four, but later six in number) whose persons were held sacred as well as their office, since extinction of the fire presaged disaster to the city. The Vestals were treated with the greatest honour and respect, being given the chief seats at public games, etc. They were discharged after 30 years, being then free to marry; but neglect of their duty was severely punished, while the penalty for unchastity was burial alive.

Vestal Virgins. See *Vesta*.

Vestments, ceremonial articles of dress worn by priests or clergymen or their assistants in celebrating divine service. In the Roman Catholic church, a priest when celebrating mass wears over his cassock the amice, alb, girdle, maniple, stole and chasuble; those of higher rank wear additional vestments, such as the gloves, ring and pectoral cross for a bishop. To most of these garments mystical meanings are attached, and the colours, etc., of the vestments vary with different festivals. In the Anglican Church much confusion still reigns in the use of vestments, and, according to individual taste or opinion, celebrants wear various combinations of garments, from the simple surplice and stole to the full vestments of the Catholic Church.

Vestry, the room attached to a church in which the vestments of the clergy are stored and put on. In consequence of the use of this room for parish business, the name is extended to a meeting of parishioners for the conduct of parish business. Before the Local Government Act of 1899 the parish vestries were responsible for much of the local municipal government of England and Wales.

Vesuvius, volcanic mountain of Italy, the bay of Naples, 7 m. ESE. of Naples, about 3,600 ft. in height. It has two summits, the active cone and Monte Somma, the wall of an ancient crater. It erupted disastrously in A.D. 79, when the two cities of Herculaneum and Pompeii were overwhelmed; other serious eruptions were those of 1834 and 1906. There is an observatory on the mountain-side, and the crater can be reached by rope-railway.

Vetch, or *Tare* (*Vicia sativa*), an annual (Leguminosae) with trailing or climbing stems and reddish-purple flowers, extensively cultivated for fodder and growing well on poor soil. There are two varieties, differing slightly in appearance, Spring Vetch and Winter Vetch, the latter being less bulky but more hardy. Wood Vetch (*V. silvestris*), Tufted Vetch (*Vicia cracca*) and Bitter Vetch (*Vicia orobus*) are common British wild plants. The Vetch is not the "tare" spoken of in the New Testament, which is probably the darnel grass (*Lolium temulentum*).

Veterinary Surgeon, one skilled in the profession of treating the diseases of horses, cattle, sheep and other domesticated animals. Statutory recognition of veterinary practitioners was first accorded by the Veterinary Surgeons Act, 1881, but even before that date, qualified veterinary surgeons had been distinguished from others by membership of the Royal College of Veterinary Surgeons, incorporated in 1844. This body examines students and awards diplomas. The degree of Member (M.R.C.V.S.) is awarded to students who pass four examinations covering five successive years; the fellowship (F.R.C.V.S.) is given on passing a special examination after 5 years' practice. The Royal Veterinary College in Camden Town, together with colleges in Edinburgh, Glasgow, Liverpool and Dublin, is affiliated to the Royal College of Veterinary Surgeons.

Veto, the act of a competent person or body in preventing or checking legislation or other legal action by the exercise of his or their prohibitory power. In England, the royal prerogative of assenting to or dissenting from Bills sent up for the royal assent is now reduced to a shadowy veto which, however, has not been exercised since the reign of Queen Anne. In British crown colonies the governor has a power of veto or, as it is called in some colonies such as Ceylon, power of "certification"; the governors-general of Canada, Australia, New Zealand and South Africa have, however, no power of veto.

Viaticum, name given to the Eucharist administered by a priest to a person on the point of death.

Viborg, former name of the town of Finland, land now known as *Vilpuri* (q.v.).

Vicar (Latin *vicarius*, a deputy), originally a deputy appointed by a prebendary or canon of a cathedral to act as his substitute in conducting divine service. Generally, but not invariably, vicars were endowed under laws of Richard II. and Henry IV. with "lesser tithes," the rectors having the "great tithes," but this position was superseded by the Tithe Commutation Acts, 1836, etc.

Vicar-General, the chancellor of a bishop. The vicars-general of the archbishops of Canterbury and York also exercise some provincial functions, and, generally, act for them in confirming bishops of the province. The vicar-general of Canterbury usually institutes incumbents and prorogues Convocation. Under the Act of Supremacy of 1535 Thomas Cromwell was appointed "King's Vicar-general, Vice-regent and principal Commissary."

Vice, an application, once fixed to a carpenter's or engineer's bench, for firmly holding the material that is being worked upon. It usually has a fixed and a movable jaw, the latter being capable of adjustment by means of a screw.

VICE

Vice-Chancellor, a judge of the old-time Equity Courts, subordinate to the Lord Chancellor; the title disappeared in 1873. The acting head of an English university is known as the vice-chancellor.

Vicenza, town of Italy, capital of the province of Vicenza, 43 m. W. of Venice. It has numerous fine buildings, including a basilica, a theatre and several palaces. There is a 13th Century Gothic cathedral. Pop. 69,400.

Viceroy, a ruler acting with royal authority in the place of a sovereign in a colony or province. In the British Empire the Governor-General of India is the only administrator still known as a Viceroy. The office of Lord Lieutenant of Ireland, who was also known as Viceroy, was abolished on the establishment of the Irish Free State in 1922.

Vichy, town and watering-place of Central France, on the Allier, at the foot of the volcanic mountains of Auvergne, 75 m. WNW. of Lyons. Its alkaline springs are much resorted to by invalids, and the water is bottled for export under the familiar name of "Vichy Waters." Pop. 17,600.

Vickers Ltd., a British holding company with interests in a large group of metal, electrical, shipbuilding, carriage-building and armament manufacturing companies in England and abroad; including Vickers-Armstrong, Ltd., Cammell Laird & Co., Ltd., the Metropolitan Carriage and Wagon Co., and the Armstrong-Whitworth securities group.

Vicksburg, city of the U.S.A., in the state of Mississippi, situated on a bluff above the Mississippi R. Fortified by the Confederates in the Civil War, it was after a memorable siege surrendered to General Grant, July 4, 1863. The battlefield is preserved as a national memorial. Engineering, saw-milling, and the manufacture of boxes, furniture, baskets, etc., are carried on. Pop. 23,000.

Victor Emmanuel II., King of Sardinia, and afterwards of united Italy, born in Turin, eldest son of Charles Albert of Savoy-Cavignano; became King in 1849 on the abdication of his father; distinguished himself in the war against Austria, adding Austrian Lombardy and Tuscany to his dominions, and, by the help of Garibaldi, Naples and Sicily, till in 1861 he was proclaimed King of Italy, and in 1871 entered Rome as his capital city. (1820-1878).

Victor Emmanuel III., King of Italy. Succeeding to the throne in 1900 on the death of his father, King Umberto, he governed as a constitutional monarch, and after 1922 passively supported the Fascist régime. It was largely due to him that Italy came into the World War on the side of the Allies. Another important event of his reign was the settlement of the Roman question by the signing in 1929 of the Lateran Treaty between Church and State. He married in 1896 Elena, daughter of Nicholas of Montenegro. In 1936, on the conclusion of the Abyssinian campaign, he was proclaimed Emperor of Ethiopia. (1869-).

Victoria, state of the Commonwealth of South Wales, Australia, lying S. of New South Wales and covering an area of 87,884 sq. m., thus being the smallest state on the mainland. The state is intersected E. and W. by the Dividing Range which forms a watershed between the Murray R. and the sea, and is largely covered with dense forests, especially in the region known as Gippeland; the NW. is characterized by the scrub called mallee. The soil is on the whole fertile, but agriculture partly depends upon irrigation, which is well developed; wheat and other cereals, vegetables, vines and fruit are grown in abundance, while among the mineral wealth are coal (both black and brown), gold, silver, antimony, tin and gypsum. Cattle and sheep are reared in large numbers, and there is a large dairy industry and a heavy export of wool. The larger towns include the capital, Melbourne, Geelong, Ballarat and Bendigo. The region was settled as a convict station in 1788, but there was no real development until about 1834. Melbourne was incorporated in 1842, and in 1851 Victoria, previously a part of New South Wales, became a separate state; about this time the discovery of gold led to rapid development. Pop. 1,520,300.

Victoria, city of Canada, the capital of the S.E. end of Vancouver Island. It contains the provincial parliament buildings, an Anglican cathedral, and an observatory. Fish-canning and the manufacture of soap, machinery, biscuits, boats and clothing are carried on. Pop. 61,200.

Victoria, chief city of the British Island of Hong Kong, China, extending for 5 m. at the base of a range of hills near the harbour. Cotton, sugar and vermilion are manufactured, and there is a naval dockyard. Pop. (including The Peak) 382,000.

Victoria, city and seaport of Brazil, the capital of the state of Espírito Santo. It stands on an island at the head of the bay of Espírito Santo, 300 m. N.E. of Rio de Janeiro, and has an important seaport. It is an important export. Pop. 23,000.

Victoria, Queen of Great Britain and Ireland, born May 24, 1819, at Kensington Palace, the only child of the Duke of Kent, fourth son of George III., who died in 1820, leaving her an infant eight months old; educated with special regard to her prospective destiny as queen, she was proclaimed on the death of William IV., on June 20, 1837, and crowned the following June. In 1840 she married Prince Albert of Saxe-Coburg-Gotha, who died in 1861. Her reign was long and prosperous.

QUEEN
VICTORIA

It witnessed the triumph of British imperialism and the rapid expansion of the empire by conquest and exploration, outstanding military events being the Indian Mutiny, the Crimean War, the Sikh, Afghan and Burmese Wars, the Boxer Rebellion in China, the Zulu and Boer Wars in South Africa, and the campaigns in Egypt and the Sudan, in which General Gordon died. It also saw the fulfilment of the industrial revolution and striking, basic changes and advances in science, literature, politics, communications, religion and social life. Never, perhaps, has any sovereign had such a succession of eminent ministers—Melbourne, Peel, Palmerston, Disraeli, Gladstone, Salisbury. In 1876 the Queen was proclaimed Empress of India; in 1887 she celebrated the jubilee of her accession, and her diamond jubilee 10 years later. She was the mother of four sons and five daughters; William II., emperor of Germany, was one of her grandchildren, and Nicholas II., Czar of Russia, was married to another. After the death of the Prince Consort, Queen Victoria lived mainly in retirement. She died at Osborne, Isle of Wight, on January 22, 1901.

Victoria and Albert, an order of honour for ladies founded in 1852 and enlarged in subsequent years, the abbreviation being V.A. No confirmations have been made since the death of Queen Victoria.

Victoria and Albert Museum, a national museum in South Kensington, London, the foundation stone of which was laid by Queen Victoria in 1859. It is a museum of art, decoration and design, and its magnificent collections embrace architecture and sculpture, ceramics, engravings, etc., metal work, paintings, textiles, woodwork. There is also a large library.

Victoria Cross, a naval and military decoration in the shape of a Maltese cross, instituted by Queen Victoria in 1856 for conspicuous bravery in the presence of an enemy. The ribbon is red (before 1918 it was blue in the case of naval awards).

Victoria Falls, great waterfall of Rhodesia, Central Africa, on the Zambesi R. With a width of over a mile and a depth of from 250 to 400 ft., the water is forced, below the falls, into a channel only 100 ft. wide. The river is crossed by a railway bridge at the Falls.

Victorian Order, an order of merit instituted by Queen Victoria in 1898, "as a reward for personal services to the Queen and her successors." The motto is *Victoria* and the ribbon blue, with red and white edges. The grades are member (M.V.O.); commander (C.V.O.); dame commander (D.C.V.O.); knight commander (K.C.V.O.); knight or dame grand cross (G.C.V.O.).

Victoria Nyanza, or Lake Victoria, Central Africa, on the equator, 250 m. long,

and 150 m. broad, at an elevation of 3,700 ft. above the sea-level; discovered by Captain Speke in 1858, and circumnavigated by Stanley in 1875; is regarded as the head-source of the Nile, whose waters pass out by Ripon Falls.

Victory, Nelson's flagship at the battle of Trafalgar, on which he died. It is now preserved in Portsmouth harbour.

Victory Medal, awarded by the Allied and Associated Powers after the World War to all men who entered a theatre of war

family whose wool is used for the manufacture of a dress fabric called by the same name. The vicuña is found mainly in the high Andean regions of Chile.

Vienna, the capital of Austria, on a southern branch of the Danube. It contains a number of magnificent churches, including St. Stephen's cathedral and the Augustinian church where the hearts of the deceased Hapsburgs are buried; a 14th Century university, the former imperial palace, and the Prater, reputed to be the finest public park in Europe. Its industries are various, including textiles, machinery, scientific instruments, jewellery, chemicals, and foodstuffs. The Congress of Vienna met here in 1814-15 to settle European problems after the Napoleonic wars. Pop. 1,862,000.

Vienne, an ancient town of France, on the Rhône, 19 m. S. of Lyons; was the chief town of the Allobroges in Caesar's time, and possesses relics of its connection with Rome; it manufactures silk and woollen fabrics, paper and iron goods, and has a trade in grain and wine. Pop. 25,000.

Vigny, Alfred, Comte de, French poet of the Romanticist school, born at Loches; entered the army, but left after a few years for a life of literary ease; produced a small volume of exquisitely finished poems between 1821 and 1829, and only one other, *Poèmes Philosophiques*, which was not published till after his death; wrote also romances and dramas, and translated into French Shakespeare's *Othello* and *Merchant of Venice*. (1797-1863).

Vigo, a seaport in Galicia, NW. Spain, on a bay of the same name. It has important fisheries, and carries on a considerable export trade, besides being in favour as a holiday resort. Pop. 53,900.

Vilpuri, town and tourist resort of Völs, on a bay of the Gulf of Finland. It has a large Gothic castle. It was formerly known as Viborg. Pop. 73,000.

Vikings (in an old, or creeks), name given to the Scandinavian seafaring and pirates who from the 8th to the 10th Centuries ravaged the shores chiefly of Western Europe, founding Normandy in NW. France, and

as much of the British Isles, Iceland, and Russia and being the first to reach North America.

VIKING SHIP

Vilayet, (Arabic, *velâ*, a governor), a principal administrative division or province of Turkey, under a *velâ* representing the government and assisted by an elective Council.

Villa, Francisco Pancho, Mexican bandit. His real name was Domingo Arango, and his early days were spent as a cattle thief. In 1910 he assisted a revolution, and in 1914 led his own army in support of Carranza, but soon turned against the government he had helped to place in power, and till 1920 carried on a guerrilla war against it. In 1923 he was shot dead in an ambush. (1868-1923).

Villars, Claude Louis, Duc de, Marshal of France, born at Moulins; one of the most illustrious of Louis XIV.'s generals, and distinguished in diplomacy as well as war; served in Germany under Turfene, and in the war of the Spanish Succession; suppressed the Camisards in the Cévennes, but was defeated by Marlborough at Malplaquet. (1653-1734).

Villers-Cotterets, town of France, of Aisne, 14 m. SW. of Soissons, the birth-place of Dumas the elder. It was taken by the Germans in 1914 and later suffered bombardment. Pop. 5,600.

Villon, François, French poet, born in Paris; his real name Corbueil or De Montcorbier; a student at the university, but of irregular life; had again and again to flee from Paris; was once condemned to death, but set free after four years' imprisonment into which the sentence was commuted; is the author of two poems, entitled the *Petit Testament* and the *Grand Testament*, with some minor pieces. Much of his work has been translated into English by Swinburne, Rossetti, etc. (1431-1485).

Vilna, or Wilno, town of Poland, capital of Wilno province, an old place, with three cathedrals, a palace and a university. It has a large trade in timber and grain. Anciently the capital of Lithuania, it became Russian at the partition of Poland. It changed hands several times during the World War, being left in those of Lithuania. An independent Polish force, however, took it in 1920; it was declared a republic, and later was absorbed into Poland, though Lithuania disputes the ownership, and still looks upon it as her own national capital. Pop. 208,000.

Vimy Ridge, a ridge running N. of Pas-de-Calais, France, near Arras. Captured by the Germans early in the World War, it was attacked twice by French troops in 1916, and was eventually captured by Canadian forces in April, 1917.

Vincennes, an eastern suburb of Paris, in the famous Bois de Vincennes, which contains a large artillery park and training ground for troops. Its ancient castle was formerly famous as a French state prison.

Vincent de Paul, St., Roman Catholic priest, born in Gascony; renowned for his charity. He founded the congregation of the Sisters of Charity, and that of the Priests of the Mission, also known as Lazarists or Vincennes, engaged in mission work and teaching, and instituted the Foundling Hospital in Paris; he was canonised by Pope Clement XII. in 1737. (1576-1660).

Vindhya Mountains, a range of hills, 500 m. in length, forming the N. ramp of the plateau of the Deccan in India, the highest peak of which does not exceed 6,000 ft.

Vindictive, a British cruiser which was used in the attack on the mole at Zeebrugge (Belgium) on April 23, 1918, and which on May 19

the same year was sunk in Ostend harbour to block the channel.

Vine (*Vitis*), a genus of climbing plants with long slender branches, of the natural order Vitaceae, including some 40 species, the most important of which is the grape vine (*Vitis vinifera*), believed to have originated in the Caspian region and now cultivated in the temperate zones of both hemispheres for the sake of its fruit, the grape (q.v.). The vine was cultivated in ancient Egypt, where it was said to have been introduced by Osiris. The great vine-growing regions are situated in the Rhineland, France, Italy, Portugal, and Spain; it is also produced in South Africa, Australia, and California. It is grown in hothouses in Britain. The most formidable pest of the vine is the small insect *Phylloxera vastatrix*, which breeds and lives on the roots and destroys the plant. Two American species of vine, the *Vitis californica* (Summer Grape) and *V. labrusca* (Fox Grape) are not attacked by the *Phylloxera*, and have been introduced to Europe. The chief commercial uses of the fruit are as fresh fruit (the grape), as dried fruit (currants, raisins, sultanas), and for the manufacture of wine.

Vinegar, a sour liquid used as a condiment or preservative, obtained by the acetic fermentation of dilute alcoholic liquids. The chief sources are indicated by the compound names: malt-, wine-, sugar-, and wood-vinegar.

Vinegar Hill, a hill (385 ft.) near Enniscorthy, co. Wexford, Eire, where General Lake defeated and destroyed a body of the Irish on June 21, 1798.

Vinegar Plant, one of the forms of (*Penicillium glaucum*), being the mycelium of a fungus of the nature of dry rot.

Vintage, the produce of the vine for one season; used with reference to the age or year of a particular wine. Generally connoting one of outstanding quality; now, specifically, a wine made from the grape-crop of a certain district and in a good year and kept separate on account of its quality.

Viol, a medieval musical stringed instrument played with a bow, from which the violin and 'cello were developed. The tenor and bass viols were known as the *viola da braccio* and *viola da gamba* respectively. The 3-stringed violin was a development of the tenor and contralto viols.

Viola, the tenor violin, a stringed instrument, somewhat complicated musical instrument, generally about one-seventh larger in size than the violin.

Violet (*Viola*), a genus of perennial fragrant herbs of the family Violaceae, comprising 250 species of cosmopolitan distribution, several being native to Britain, including the Sweet Violet (*Viola odorata*), the Dog Violet (*V. canina*), and the Heartsease or Pansy (*V. tricolor*). Many varieties have been developed in cultivation and for market violets, those especially prized being the Parma and Double violets.

Violin, the most important of the stringed musical instruments, consisting of a chest or body of two thin arched surfaces, called the back and belly, generally made respectively of maple or sycamore and some soft wood such as pine. At the top end is the neck of solid wood, to which is fixed the ebony finger-board, over which pass the four strings, which are fastened at one end to the lower part of the body by a projecting tail-piece, also of ebony, and kept in tune by pegs at the end of the neck. Sound holes are cut in the belly in the shape of an "f" each side of the bridge, which raises the strings above the belly. The sound is

U.S.

produced by drawing a bow of horsehair coated with rosin across the strings, which are tuned in fifths.

The instrument has a wide range of sounds and is capable of limited harmony by means of double stops and bowing in "arpeggio." Famous instruments were the Italian, especially the Cremona violins of Andrea Amati, who made instruments between 1590 and 1546, and Antonio Stradivari (q.v.) (1644-1730). Among the world's greatest players past and present are Paganini, Joachim, Ernst, Sarasate, Ysaye, Kubelik, and Kreisler.

Violoncello, a large bass viola or developed from the 16th-Century *viola da gamba*. It is played with the instrument resting vertically on a wooden peg on the floor between the player's knees, and has a sonorous tone.

Viper, name applied to several venomous serpents of the family Viperidae,

one of which (*Vipera berus*), the adder, is found in Great Britain, being the only British venomous snake. It is brownish-yellow, with zigzag markings and black triangular spots. The bite is generally not fatal. Other vipers are the Daboia, or Russell's Viper, of India and Ceylon; the Horned Viper (*Ceratophis cornutus*) of Arabia and the neighbouring countries; and the Puff Adder (*Bitis arctans*) of Africa.

ADDER

Viper's Bugloss, a plant with a bristly stem, of the genus *Echium* and order Boraginaceae. The *Echium vulgare* or common species is a British plant. The name is due to the old belief that the plant was an antidote to snake bites.

Virchow, Rudolf, German pathologist and anthropologist, born in Pomerania; professor of pathology at Berlin and Wurzburg. He was responsible for many discoveries regarding tuberculosis, inflammation, and other morbid conditions, and was one of the founders of modern sanitary science. (1821-1902).

Virgil. See Vergil.

Virginal, a musical instrument played with a keyboard similar to the clavichord. It was introduced into England in the 16th Century, and had a compass of four octaves.

VIRGINAL

Virginia, one of the United States of America, between Maryland and N. Carolina, so named by its founder Sir Walter Raleigh in honour of Queen Elizabeth; is divided from W. Virginia by the Appalachians. It is well watered; the soil, which is fertile, yields the finest cotton and tobacco, and minerals, particularly coal and iron, are abundant. The capital is Richmond; other towns are Norfolk, Roanoke and Portsmouth. Area, 42,680 sq. m. Pop. 2,421,000.

Virginia, West, formed originally one state with Virginia, but separated in 1861 to join the Federal cause; is a great mining region, and is rich in coal, iron, and timber, its largest cities are Huntington and Wheeling. The capital is Charleston. Area, 24,280 sq. m. Pop. 1,814,000.

Virginia Creeper (*Vitis quinquefolia muralis*), a tender-climbing climber of the vine family native to N. America. It is used in England for covering outside walls. The leaves are digitate and showy, and turn red and orange in autumn before falling.

Virgin Islands, a group of small islands in the West Indies, divided between Britain and the United States. The British group is governed as part of the Leeward Is. (q.v.); the American group, purchased from Denmark in 1916, includes over 100 islands, the three principal being St. Croix, St. Thomas and St. John. Area, 130 sq. m. Pop. 22,000.

Virginium, a chemical element re-discovered in 1930, by Dr. F. Allison of Alabama, to exist in pitchblende, lepidolite and certain other minerals; it was named in honour of the State of Virginia. Symbol Vi; atomic number, 87; atomic weight about 224.

Virgo, the sixth sign of the zodiac, which the sun enters on August 22.

Viscacha, a South American burrowing rodent, akin to the chinchilla, about 2 ft. in length, with a stout, stumpy body.

Viscosity, the property by which liquids or gases resist change in the arrangement of their molecules. Internal friction or viscosity exists whenever two portions of any fluid or gas move with different velocities. It is this viscosity which renders the fall of a mist-drop through the air so slow, causes the waves of the sea to subside, and causes the formation of whirlpools. The viscosity of a fluid is measured by the tangential force per unit area required to maintain a relative velocity of unity between two parallel planes in the fluid at unit distance apart.

Viscount, rank of the English peerage coming below earl and above baron; the title was first bestowed in 1440. The title of viscount is generally given as a courtesy title to the eldest son of an earl.

Vishnu, the Preserver, the second god of the Hindu triad, Brahma (q.v.) being the first and Shiva (q.v.) the third. He is said to have revealed himself in a succession of incarnations or avatars, Rama (q.v.) being the seventh and Krishna (q.v.) the eighth. He is extensively worshipped, and his worshippers, the Vaishnavas, are divided into a great number of sects. He is generally represented in art as a four-armed figure riding upon the Garuda, a man-headed bird.

Visigoths, or Western Goths, a branch of the Goths that settled in the S. of France and in Spain, and for a time conquered Italy.

Vision. Light enters the eye through the cornea, the front transparent portion of the human eyeball, behind which lies the opaque blue or brown iris. The light can pass through the pupil, a hole at the centre of the iris. In a strong light the pupil contracts, but becomes larger when feebly illuminated, thus allowing more of the light falling on the eye to enter it. Behind the iris is a lens, and the light which passes through this falls upon sensitive nerve endings in the retina at the back of the eyeball. When the eye is focused on an object an inverted image, similar to that formed on a photographic plate by a camera, is produced on the retina, and messages are passed from the nerves in the retina to the optic nerve, and thence to the brain. When an object is placed at a given distance from a lens (e.g., a magnifying glass) a sharp image of the object can be formed on a screen placed at an appropriate distance on the other side of the lens, but the image is not sharp unless the distance between the lens and the screen is correctly

chosen. This distance depends upon the distance of the object, so if objects at one distance give sharp images, those at other distances do not. Similarly, if the eye is focused on objects at one distance, objects at other distances do not give sharp images on the retina, and appear blurred and indistinct. Focusing is brought about by altering the thickness of the eye lens. The ability of the eye to do this is called its power of accommodation. This decreases progressively with age, and in a person 70 years of age has almost disappeared.

Visitation of the Virgin

Mary, a festival celebrated on July 2, instituted in the 14th Century by Pope Urban to commemorate the Virgin's visit to Elizabeth, mother of John the Baptist.

Vistula, a central river of Europe, which rises in the Carpathians and after a course of 600 m. through Poland falls into the Baltic at the Frisches Haff near Danzig. It is navigable as far as Cracow, and carries down great quantities of timber, grain, and other produce to the Baltic ports.

Vitamins, discovered by Sir Frederick Gowland Hopkins during the early years of the present century, are complex organic compounds, small quantities of which are necessary to the healthy functioning of the organism. Several are now known, distinguished as vitamins A, B, C, and so on. In cases of malnutrition one or more of them may be absent, or present in insufficient amount, and such diseases as pellagra, scurvy, beri-beri and rickets may supervene in consequence.

Vitamin A, contained in butter, milk, eggs, and richly in the liver oil of the cod and halibut, is necessary for growth, while vitamin D, which occurs like A in fish liver oil, prevents rickets. The original vitamin B has proved to be a mixture of several vitamins (B₁, B₂, B₃, etc.), all of which are soluble in water. B₁, found in the outer layers of cereals, prevents beri-beri; whereas the principal diet consists of polished rice or white bread, the lack of B₁ often causes this disease. B₂ also occurs in green vegetables, tomatoes, yeast, etc. B₃, occurring in eggs, milk and yeast, is necessary for healthy growth and also prevents pellagra; C, found in limes, oranges, lemons, and green vegetables, prevents scurvy; and E, found in cereals and green vegetables, is necessary to fertility.

Vitoria, the capital of Alava, a Basque province in the N. of Spain, famous as the scene of one of Wellington's victories in June, 1813; has a fine old 13th Century cathedral and extensive manufactures. Pop. 43,000.

Vitreosil, the name given to articles made of pure transparent fused silica. Its great advantage over glass or china ware is that it has a remarkably low coefficient of expansion, i.e., it expands or contracts but little when heated or cooled. This means that it can be quickly heated or cooled without cracking; a vitreosil basin, for example, will withstand being heated to a red heat and then suddenly cooled under the cold water tap. The chief use of vitreosil is in chemical apparatus and other scientific instruments. It is very resistant to most acids, but is attacked by caustic alkalis.

Vitriols, an old name for sulphates or the metals they contain. Zinc sulphate, isomorphous with Epsom salt, is known as white vitriol. A solution of white vitriol is used as an eye lotion, and the sulphate is used in making lithopone. Green vitriol is ferrous sulphate obtained by dissolving iron in dilute sulphuric acid, or by the slow oxidation of marcasite. Blue vitriol is copper sulphate. There are also lead, nickel and iron vitriols.

Vittorio Veneto, town in the province of Venetia, Italy, captured in 1917 by the Austrians, and retaken in October, 1918, by the Allies, the battle during which its recapture took place marking the final rout of the Austro-Hungarian forces, which led to the collapse of their resistance.

Vitus (or Guy), St., a Christian saint and martyr of the 4th Century, who is chiefly remembered by the nervous disorder called St. Vitus's dance, named after the practice of dancing in front of his tomb; festival, June 15.

Vivisection, the name given by its opponents to experimentation on living animals in the course of scientific research. Vivisection may only be practised under licence from the Home Office; licences are granted to individuals to conduct experiments at certain places which are liable to governmental inspection. No licence permits every kind of experiment, or the use of every kind of animal, and if the experimenter wishes to do more than operate under a general anæsthetic he must obtain the requisite certificates. A Royal Commission, appointed in 1912, issued a report favourable to vivisection.

Vizier, the chief officer of state in the old Turkish empire. The name was given to the chief minister of the Arabian Caliphs, and adopted by the Ottoman Turks in the 14th Century.

Vladivostok, chief city and seaport of the Far Eastern Area, Siberia, the E. terminus of the Trans-Siberian Railway. It is a naval station with dockyards, a garrison town, and the seat of a university. Pop. 190,000.

Vodka, a Russian and Polish spirituous liquor made from rye or potatoes. "Raw" vodka has an alcoholic content of about 90 per cent., but is diluted for sale to an alcoholic strength of 60 or 40 per cent.

Vogler, Georg Joseph, Abbe, German musical composer, born at Würzburg; distinguished once both as a musical performer and teacher. He is remembered by the poem *Abt Vogler* in Browning's *Dramatic Personæ*. (1749-1814).

Voice, the faculty of uttering audible sounds or the sounds produced by the organs of respiration. In most animals the chief organ is the larynx (q.v.); birds have a special organ, called the syrinx, which is the source of their song. The study of voice production is aided by the laryngoscope (q.v.). The pitch of a voice depends on the size of the larynx and the tenseness and vibrations of the vocal cords, and usually a low or deep voice is produced by a large larynx with long cords. The range of a voice does not often exceed 2½ octaves. Ventriloquial effects result from indrawing the air instead of in the usual manner, by expiration. Aphonia, or the loss of voice, is sometimes due to disease of the larynx or vocal cords, and sometimes to nervous disorders. See also *Aphasia*; *Stammering*.

Volcano, a passage or pipe which affords a deep-seated mineral matter in a state of fusion the means of transmission through the earth's crust, and of egress at its surface; a passive or extinct volcano is one in which this communication is obstructed either by a plug of solidified lava or by accumulations of fragmentary matter. Eruptions may take place without warning, as did that of Vesuvius in 1863, or be heralded by preliminary rumbling and earthquakes shocks, and also sometimes by an unnatural rising and sinking of the sea. The products of eruption are steam and gases, fragmental materials and lava: the gases include carbonic acid, hydrochloric acid, sulphur dioxide, sulphuretted hydrogen, sulphuric

acid, nitrogen and ammonia. The fine ashes, lapilli, pumice, bombs, and scoriæ or cinders ejected are all formed from the lava and have the same composition as the lava from which they are derived. Volcanoes are found in all regions of the globe and seem to follow certain lines, an arrangement which is believed to be owing to the fact that they occur on lines of fissures in the earth's crust. See also *Earthquake*.

Vole, the common name of various species of rodents belonging to the *Microtus* genus of the Muridæ family. The two important British species are Water-Vole or Rat (*Microtus amphibius*) and the Field Vole or Field-Mouse (*Microtus agrestis*), the one a good swimmer, burrowing in river banks and somewhat like the brown rat in colouring though smaller, the other living in meadows and nesting in grass.

BANK VOLE

Volga, a river of European Russia, the longest in Europe. It rises in the Valdai Hills, and after a course of 2,300 m. falls by a delta with 200 mouths into the Caspian Sea. It is navigable almost throughout, providing Russia with 7,200 m. of water-carriage, and has extensive fisheries, especially of salmon and sturgeon. The waters are mostly frozen in winter.

Volstead Act. See *Prohibition*.

Volungs, a race figuring in Norse and German legend, of whom the chief figure was Sigurd or Siegfried, the hero of the *Nibelungenlied*. The Icelandic epic of the race, the *Volungasaga*, was translated into English by William Morris.

Volt, the unit of electrical pressure or electromotive force. It is the pressure which causes a current of one ampère (q.v.) to flow through a resistance of one ohm (q.v.).

Volta, Alessandro, Italian physicist, born at Pavia; made electrical discoveries which laid the foundation of what is called after him voltaic electricity. (1745-1827).

Voltaic Cell, named after Alessandro Volta (1745-1827), its inventor, a device for converting chemical energy into electrical energy. A simple type consists of a plate of zinc and a plate of copper dipping into a vessel containing dilute sulphuric acid. When the plates are connected by a wire, the zinc dissolves in the acid and a current flows in the wire; the energy of the current is derived from the chemical energy of the zinc and acid. Another and better type is the Leclanché cell (q.v.), familiar in the "wet" variety as the battery commonly used for electric bells, and in the "dry" variety as the battery in electric torches, etc.

Voltaire, François Marie Arouet de, French writer and philo-

sopher, born at Paris, son of François Arouet, a lawyer. After writing lampoons, for which he was imprisoned for a year in the Bastille, he produced several plays, later visiting England, where his *Henriade* was issued. Returning to France in 1739, he lived at Paris and Cirey until 1749, when he visited Frederick the Great at Potsdam; most of his later life was spent at Ferney in Switzerland. His works are remarkable for their strong antipathy to priestcraft, and

VOLTAIRE

superstition, and include *Candide*, *Zadig*, and *The Age of Louis XIV.* (1694-1778).

Voltmeter, an instrument for measuring difference of voltage, or electrical potential. Several types are in use, most of them depending on the movement of a piece of soft iron affected by the passage of a current.

Volumes, Gaseous, law of, discovered by J. L. Gay-Lussac (1778-1850) in 1809, states that when gases react together, they do so in volumes which are in a simple numerical ratio to one another, and to the volume of the product if that also is gaseous, the measurement of all the volumes being carried out under identical conditions of temperature and pressure. In 1811 the Italian scientist Avogadro (1776-1856) suggested that equal volumes of all gases at the same temperature and pressure must contain equal numbers of molecules.

Volunteers, in England troops raised on a voluntary basis, first organized on a considerable scale during the Napoleonic era and revived in the middle of the 19th Century. On the formation of the Territorial Force in 1908 they became merged in that body.

Vomiting, expulsion of the contents of the stomach through the mouth; "retching" is the effort to vomit without such expulsion. It is a common symptom of dyspepsia, and frequently occurs in cases of ulcer and cancer of the stomach. It is also a concomitant of many diseases of the brain. Strong impressions of a disagreeable kind made upon the nerves of sense may produce vomiting, e.g., an offensive odour, or some interference with the balancing sense, as in sea-sickness.

Voodoo, name given to a system of prevalent among certain negro races. It has been carried from W. Africa to America, and is said to have revived in recent times in Haiti and other parts of the West Indies.

Vorarlberg, a province of Western Austria, mountainous and mainly pastoral; there is some textile industry in the towns. Capital, Bregenz (pop. 7,750); largest town, Dornbirn (pop. 13,800). Area 1,005 sq. m. Pop. 140,000.

Voronoff, Serge, Russian physician, working in Paris; introduced a method of human rejuvenation by grafting the thyroid gland of the monkey into persons suffering from thyroid deficiency; wrote a number of treatises on medical and physiological subjects. (1866-).

Vortigern, a British prince of the 5th Century who, on the withdrawal of the Romans, invited the Saxons to aid him against the incursions of the Picts, with the result that the former eventually became masters of S. Britain.

Vosges, a range of mountains in the N.E. of France; they separate the basin of the Moselle from that of the Rhine, and reach a height of 4,780 ft.

Vosges, a dept. of E. France, to the W. of the Vosges Mts., watered by the Meuse, Moselle, and other rivers. Grain and potatoes are grown, and cotton and lace manufactured. Capital, Epinal. Area 2,300 sq. m. Pop. 377,000.

Voting, a method of discovering, by means, the numbers of individuals for or against a proposal or particular course of action; particularly as a means of electing candidates to parliament, municipal council, or other office. In politics, voting may also be on a specific question, the usual machinery being the referendum (q.v.), or the plebiscite. Voting by ballot, to ensure secrecy, was first employed in England in 1870, the Ballot Act,

giving statutory recognition to the practice, being passed in 1872. Before a poll commences, the ballot box is shown empty to anybody present desirous of inspecting it, and is then locked and sealed (see *Stelecton*). Open voting by "ayes" and "noes" is customary in Parliament, but if demanded a division may be taken, the members then going into the division lobbies for a formal count by the whips. A vote of confidence is a parliamentary division on the question whether the House is satisfied with the Ministry's conduct of affairs, while a vote of credit is a parliamentary vote of money without specifying the particular purposes for which the money is to be used.

Vow, a solemn promise or engagement, particularly one made to God and confirmed by an oath. Vows still enter largely into the religious system of the Roman Catholic Church, the members of religious orders being bound by vows of poverty, chastity, and obedience, with sometimes additional special vows.

Vryheid, town of Natal, 50 m. N.E. of Dundee, situated in a district rich in coal and iron ore, and other minerals. Cattle and sheep are reared, and there are mineral springs. Pop. (white) 2,000.

Vulcan, the Roman god of fire and an artificer in metals, identified with the Greek Hephaestus (q.v.); had a temple to his honour in early Rome; was fabled to have had a forge under Mt. Etna, where he manufactured thunderbolts for Jupiter, the Cyclops being his workmen.

Vulcanite, a form of hardened rubber, produced by vulcanization, or heating raw rubber with sulphur, under pressure. It is used as an electrical insulator, and for the manufacture of chemical apparatus.

Vulgate, a version of the Bible in Latin which was in two centuries after its completion universally adopted in the Western Christian Church as authoritative for both faith and practice. From the circumstance of its general reception it became known as the Vulgate (i.e., the commonly accepted Bible of the Church), and is the version accepted as authentic to-day by the Roman Catholic Church, under sanction of the Council of Trent.

Vulture (Vulturidae), one of the families into which birds are classified,

this comprising a number of carrion-feeding birds of prey, cowardly, lazy birds that rarely attack their prey while alive, and are credited with great powers of sight and flight in search of their dead or dying food. They are confined to the tropical and sub-tropical parts of the Old World, the species including the Griffin Vulture (*Gyps fulvus*), and the Black Vulture (*Vultur monachus*).

In America there is a corresponding family of birds, the Cathartidae, birds of great size and strong flight, including Condors (q.v.) and Turkey Vultures. Nearly all vultures have the head and neck bare, except for a stubbly down and a ruff round the lower neck. The beak is straight for some distance from the base and then bends sharply downward. The Bearded Vultures, or "Bone-breakers," of S. Europe, Asia and Africa are placed in the Falconidae family.

Vyrnwy, artificial lake of Montgomeryshire, Wales, a reservoir supplying Liverpool with water. It was formed by building a dam across the R. Vyrnwy, a tributary of the Severn. Area, 3 sq. m.

KING VULTURE

W

Wace, Anglo-Norman poet, born in Guernsey; author of two metrical chronicles, *Geste des Bretons*, commonly known as *the Brut*, and *Roman de Rou*, the former an Arthurian romance, the latter recording the fortunes of the Dukes of Normandy down to 1106. (1120-1183).

Wade, George, English general; commanded in Scotland during the rebellion of 1715, has the credit of the construction in 1726-1740 of the military roads into the Highlands, to frustrate any further attempts at rebellion in the north; created field-marshal 1743. (1673-1748).

Wadebridge, seaport and market town of Cornwall, England, 7 m. NW. of Bodmin. Granite and china clay are produced. Pop. 2,500.

Wady, or **Wadi**, an Arabic name for the channel of a stream which is flooded in rainy weather and at other seasons is dry.

Wake, a name formerly applied to the dedication festival of a church, and later to any local festival or holiday; it is used especially in the N. of England for the mass annual holidays customary in the textile and other trades. The watching of a dead body through the night by friends and relatives was called a lyke-wake.

Wages, in economics, the price paid for labour, whether manual, administrative or executive, especially for those kinds of labour which are expended under the capitalist system in production for private profit. Until fairly recent years the fixing of wage rates was left to free competition, but the organisation of workers in trade unions and other causes have now in many cases brought about the fixing of minimum wage rates guaranteed by State action. The so-called Wage Fund Theory of Mill and Adam Smith held that wages were fixed in the long run by the proportion borne by the number of wage-earners to the amount of wealth set aside for the purchase of labour. The "Iron Law of Wages" is the theory that, since a rise in wages leads to an increase in the number of wage-earners, it is necessarily followed by a fall, so that wage-rates cannot permanently improve under the existing system of production. The relation between "nominal wages," the amount earned in actual money, and "real wages," or the amount of necessities of life that can be obtained for those nominal wages, depends upon the cost of living at any given time, so that an increase in nominal is not necessarily also an increase in real wages.

Wagga Wagga, town of New South Wales, Australia, on the Murrumbidgee. Gold-mining and sheep-farming are the chief industries. Pop. 12,300.

Wagner, Wilhelm Richard, German musical composer, born at Leipzig. In 1833 he became chorus-master at Würzburg, and in 1835 conductor of the orchestra of the theatre at Magdeburg, and held the same post afterwards at Riga and Königsberg. His principal works were *Rienzi* (1840), *The Flying Dutchman* (1843), *Tannhäuser* (1845), *Lohengrin* (1850), *Tristan and Isolde* (1859), *The Mastersingers of Nürnberg* (1867), and the *Ring of the Nibelungen* (1876), the composition of which occupied 35 years; this last was performed at Bayreuth in a theatre erected for the purpose in presence of the German Emperor and the principal musical artists of the world. *Parsifal* (1882) was his

last work, the *Libretto*, as in all his other operas, being from his own pen. He married (second wife) Cosima, a daughter of Liszt, in 1870, she surviving him till 1930; by his first wife he had a son, Siegfried (1869-1930), a distinguished composer and conductor, who for many years conducted his father's operas at the annual festival at Bayreuth. (1813-1883).

Wagram, a village 10 m. NE. of Vienna, where Napoleon gained a great victory over the Austrians under the Archduke Charles, on July 5 and 6, 1809.

Wagtail, a genus (*Motacilla*) of birds of the Motacillidae family which

also includes the Pipta. They are found only in the Old World, and are distinguished by their long tails, which are almost constantly in motion, and by their quick graceful running gait. They are terrestrial birds, haunting rivers, meadows and damp ground. British species include the Pied Wagtail (*Motacilla alba*) and the Grey Wagtail (*Motacilla cinerea*), both of which are residents. A number of other species occur as summer migrants or occasional visitors.

WAGTAIL

Wahabis, a Mohammedan sect which arose about 1760 in Central Arabia, whose aims were puritanic and the restoration of Islamism to its primitive simplicity in creed, worship, and conduct. They take their name from Mohammed Abdul Wahab, their founder. Reviving in the present century under Ibn Sa'ud (q.v.), Wahhabism became the standard about which he united many of the Arabian tribes in his state of Saudi Arabia.

Waikato, the largest river in New Zealand, in the North Island, the outlet of the waters of Lake Taupo, the largest lake; has a course of 200 m.

Wailing Wall, The, a wall in Jerusalem, 62 yds. long and 59 ft. high, on the site of, and believed to have once formed a part of, Solomon's Temple. It is one of the most sacred of spots to the Jews, who for centuries have gathered here to bewail the decline from greatness of their nation, especially on the fast of the ninth of Ab, in early August, when the destruction of the Temple is commemorated. The wall abuts on a Moslem mosque, and there have in consequence been frequent riots, notably in 1929, between Jews and Arabs since the city was freed from Turkish rule.

Wakefield, a county borough of Yorkshire, England, 8 m. S. of Leeds. It is the seat of a modern bishopric, and has large woollen and other manufactures. Pop. 59,700.

Walcheren, an island in the province of Zeeland, Netherlands, in the delta formed by the Maas and Scheldt; was the destination of an unfortunate expedition under Lord Chatham, Pitt's brother, sent in 1809 to the help of the Austrians against Napoleon in Antwerp, in which 7,000 of the army composing it died of marsh fever, from which 10,000 were sent home sick, and the rest recalled.

Waldeck, a former state of the German Reich, mainly devoted to cattle-raising, absorbed into Prussia in 1848. Its area was about 450 sq. m., and its pop. 55,000.

Waldenses, or "Poor Men of Lyons," a Christian community founded in 1170 in the S. of France, claiming to revive the practices and beliefs of the primitive church, by Peter Waldo, a rich citizen of Lyons. They were driven by persecution from country to country until they settled in Piedmont under the name of the Vandols.

Wales, smallest and westernmost of the three divisions of Great Britain; is 135 m. in length and from 37 to 95 m. in breadth, and bounded on the N., W. and S. by the sea; it is divided into 12 counties. It is a mountainous country, intersected by beautiful valleys, which are traversed by a number of streams, including the Severn, Usk, Conway, and Clwyd. The N. is more mountainous than the S., Snowdon, the highest point in Great Britain, rising to 3,560 ft. The most fertile tracts are the Vales of Clwyd and Glamorgan. North Wales is notable for both the variety and quality of its scenery; its mild and bracing climate has dotted the coast with seaside resorts. Agriculturally, Wales consists of a great core of moorland or rough hill pasture and a surrounding fringe of land of greater agricultural fertility; almost the only tenants of these hill-pastures are the Welsh mountain sheep. The Vale of Glamorgan is an area of mixed farming. The minerals include coal, iron, copper and some gold. The coalfield of the SW. has given rise to a vast iron industry through the fact of its possessing great beds of ironstone, though these are now worked only to a limited extent. Cardiff is one of the largest coal ports of the world, and Swansea one of the largest oil ports. There are also large slate quarries. There are some small woollen factories in many towns and villages; flannel is the principal fabric. The Welsh University has four colleges, at Cardiff, Aberystwyth, Bangor and Swansea. The Church of England was disestablished in 1920, and the majority of the people are Nonconformists; many of the native inhabitants are pure Celts, being descended from the early Britons; the Welsh language, still spoken in various parts of the country, is a Celtic tongue. From the period of the Saxon invasion and until its final conquest by Edward I. the history of Wales is merely that of a succession of petty wars between rival chieftains. Cadwallon, the most notable of them, was defeated and slain by Oswald of Northumbria in 635; Llewellyn, the last of the Welsh princes, was defeated and slain by the Earl of Mortimer in 1284, and since that time the principality has been incorporated with England. For most administrative purposes the county of Monmouth is included in Wales. Area (excluding Monmouth), 7,374 sq. m. Pop. 2,176,000.

Wales, Prince of, title generally conferred on the eldest son of the English Monarch; first conferred in 1301 on the second son of Edward I. after the subjugation of Wales 17 years before. The title merges in the Crown at the accession of the holder, and is bestowed by creation. On the accession of James I. to the English throne it was preceded by that of Prince of Great Britain and Ireland, which was never used after Prince Henry's death. There is at present (1938) no holder of the title.

Walker, Frederick, British artist, born in Manchester, London. He turned from architecture to pictorial art, designing the woodcuts for Thackeray's *Poems*. His best-known works are "The Harbour of Refuge" and "Vagrants," both in the Tate Gallery, London. (1840-1915).

Walking, in races, must be fair heel-and-toe action, and the foot must come to the ground heel first with the leg straight. Walking races are generally held on oval tracks; but the London to Brighton

race is an instance of a familiar annual walking event on the road, a distance computed at 51 m. 1,607 yds.

Wallaby, name given to the smaller species of Kangaroo belonging to the genera *Macropus* and *Petrogale*. Among the many species are the Yellow-footed Wallaby (*Petrogale xanthopus*), Black-tailed Wallaby (*Macropus ualabatus*) and Brush-tailed Wallaby (*Petrogale penicillata*). All of them are vegetable-feeders, confined to Australia.

Wallace, Alfred Russel, English biologist, born at Usk, Monmouthshire; was devoted to the study of natural history, in the interest of which he spent years (1848-1852) in the valley of the Amazon and 8 years after (1854-1862) in the E. Indian archipelago, returning from the latter expedition with thousands of specimens of natural objects, particularly insects and birds, and during his absence working out a theory in the main coincident with that of natural selection advanced by Charles Darwin (q.v.). (1823-1913).

Wallace, Lew (Lewis), American soldier and writer; served in the Civil War in the Federal forces; governor of New Mexico, 1878-1881; U.S. Minister at Constantinople, 1881-1885; author of *Ben Hur*, among other books. (1827-1905).

Wallace, (Richard) Edgar (Horatio), English novelist; born at Greenwich; left school at the age of 10, becoming successively newsboy, factory-hand, Grimsby trawler's boy, milk-boy; and soldier in 1896, in South Africa. After going through the Boer War as war-correspondent he edited the *Rand Daily Mail*. Later a reporter in London, he published his first book, *The Four Just Men*, in 1906, and thereafter produced a vast number of full-length novels and short stories of "thriller" type, as well as some plays. Died at Beverly Hills, California. (1875-1932).

Wallace, Sir Richard, English art collector; having acquired the valuable collection of his half-brother, the 4th Marquess of Hertford, in the formation of which he had been active, he bequeathed it to the nation; known as the Wallace Collection, it is now exhibited at Hertford House, Manchester Square, London; was created a baronet for his services during the siege of Paris. (1818-1890).

Wallace, Sir William, Scottish patriot and national hero; born in Renfrewshire; was early seized with a desire to free his country from foreign oppressors, and became chief of a band of outlaws combined to defy the authority of Edward I., who had declared himself Lord of Scotland, till at length the sense of the oppression became widespread, and he was appointed to lead a general revolt, while many of the nobles held aloof or succumbed to the usurper. He drove the English from one stronghold after another, finishing with the battle of Stirling (1297), and was installed thereafter guardian of the kingdom. Edward, however, at Falkirk (1298) crushed Wallace and his followers with an overwhelming force, one of the nobles proving traitor and handing Wallace over to the enemy, who carried him off to London and had him hanged, beheaded, and quartered. (c. 1272-1296).

Wallachia, former principality of R. Europe which combined with Moldavia to form Rumania. The Danube bounds it on the W., S. and E., and the Transylvanian Alps border it on the N. The principal towns are Buzarest, Brasila, and

Oralova. It corresponds roughly to the division now known as Muntenia. Area, 20,250 sq. m. Pop. 4,411,000.

Wallasey, a county borough of Cheshire, England, on the Wirral Peninsula, at the mouth of the Mersey, 3 m. NW. of Birkenhead. It is connected by ferry with Liverpool, and is mainly residential. Pop. 98,000.

Wallenstein, Albrecht Wenzel von, army in the Thirty Years' War, born in Bohemia, of a Protestant family, but on the death of his parents was brought up in the Catholic faith; entering the army, he rose in Imperial favour, and became a prince of the Empire, but the jealousy of the nobles procured his disgrace, till the success of Gustavus Adolphus in the Thirty Years' War and the death of Tilly led to his recall, when he was placed at the head of the Imperial army as commander-in-chief; drove the Saxons out of Bohemia, and marched against the Swedes, but was defeated, and fell again into disfavour; was deprived of his command, charged with treason, and afterwards murdered in the castle of Eggra. (1583-1634).

Waller, Edmund, English poet, born at Coleshill, Bucks; he was in great favour at Court; was a member of the Long Parliament; leant to the Royalist side, though he wrote a panegyric on Cromwell, which is considered his best poem; in addition to a number of odes he wrote several lyrics, including the well-known *Go, Lovely Rose*, reviving the heroic couplet form of verse. (1605-1687).

Wallflower (*Cheiranthus cheiri*), a fragrant perennial plant of the order Cruciferae; it was worn by troubadours and minstrels in the Middle Ages as an emblem of constancy. The yellow colour of the wild flower has been developed into many beautiful oranges, yellows, and browns in the cultivated garden varieties. It is remarkable for its delightful odour.

WALLFLOWER

Wall Game, a species of football peculiar to Eton College, where it is played every St. Andrew's Day.

Wallingford, a borough and market town of Berkshire, England, on the Thames, 15 m. NW. of Reading. Pop. 3,100.

Wall of China, The Great, a wall some 1,500 m. in length in NW. China, work on which was begun in 215 B.C. It is described as being 26 ft. wide at the base, 15 ft. at the top, with an average height of 20 ft. Intended for defence against incursions from Mongol nomad tribes, it still acts as a serious obstacle to military forces operating from beyond it, even in the case of the Japanese invasion in 1937-38.

Walloons, name given to the descendants of the ancient Belgae, a race of a mixed Celtic and Roman stock now forming the French-speaking section of the population of Belgium, where they inhabit mainly the provinces of Luxembourg, Namur, Liège and Brabant.

Wallpaper, paper, coloured and often decorated in imitation of tapestry, made for covering the walls of rooms. Both hand-printed and machine-printed papers are made, in a wide range of patterns and qualities. They are measured by the "piece," of 26 ft. by 18 ft.

Walsend, a borough of Northumberland, England, on the Tyne, at the E. end of Hadrian's Wall. Coal-mining.

shipbuilding, metal-working and the manufacture of chemicals are engaged in. Pop. 43,600.

Wall Street, a narrow thoroughfare in the older part of New York, situated between the East R. and Broadway. It contains most of the chief banks, insurance offices, shipping offices, etc., and the stock exchange, metal exchange and other such institutions, and is the hub of the American financial world.

Walmer, a seaside resort of Kent, England, 3 m. S. of Deal, once one of the Cinque Ports. Its castle is the residence of the warden of the Cinque Ports. It has now been incorporated with the borough of Deal. Pop. c. 5,000.

Walney, an island and holiday resort of Lancashire, England, off the Furness peninsula, forming part of the borough of Barrow-in-Furness, with which it is connected by steam-ferry, bridge, and causeway.

Walnut (*Juglans regia*), a large catkin-bearing tree of the order Juglandaceae, probably introduced to Britain by the Romans from Asia Minor. It yields the fruits also so called, which are picked before the shell has formed. The wood is used for furniture and for gun-stocks; an oil expressed from the nuts is used by painters as a dryer.

Walpole, Horace, fourth Earl of Orford, English author, third son of Sir Robert Walpole; born in London, educated at Eton and Cambridge; travelled on the Continent with Gray, the poet, but quarrelled with him, and came home alone; entered Parliament in 1741, and continued a member till 1768, but took little part in the debates; succeeded to the earldom in 1791; his tastes were literary; wrote *Anecdotes of Painting in England*, and inaugurated a new era in novel-writing with his *Castle of Otranto* (1784), also wrote a tragedy *The Mysterious Mother*, but lives mainly by his *Letters*. (1717-1797).

Walpole, Sir Hugh Seymour, English novelist; born at Auckland, N.Z. He came to England at the age of five. His first novel, *The Wooden Horse*, was issued in 1809. Other books, *Maradick at Forty* (1910), *The Duchess of Wrex* (1914), *Jerning* (1919), two sequels, 1923, 1927), *Rogue Herries* (1930); studies of Conrad and Trollope. Knighted, 1937. (1884-).

Walpole, Sir Robert, first Earl of Orford, English Whig statesman, born at Houghton, Norfolk; entered Parliament in 1701, and became member for King's Lynn in 1702; was favoured by the Whig leaders, and promoted to office in the Cabinet; was accused of corruption by the opposite party when in power, and committed to the Tower; on his release after acquittal was re-elected for King's Lynn; in 1715 became First Lord of the Treasury, and in 1721 Prime Minister, which he continued to be for 21 years, but not without opposition on account of his pacific policy; on being driven against his will into an unsuccessful war with Spain, he retired into private life. He stood high in repute for his financial policy; it was he who established the first Sinking Fund, and succeeded as a financier in restoring confidence after the bursting of the South Sea Bubble (q.v.). To his policy in defeating the plans of the Jacobites the Hanoverian dynasty in great part owe their permanent occupancy of the British throne; he governed his parliaments largely by an elaborate and extensive system of bribery on behalf of the government. (1676-1745).

Walpurgis Night, the eve of the witches were reputed to hold high, and offer sacrifices to the devil, their especially on a hilltop in Germany called the Brocken (q.v.).

Walrus (*Trichechus rosmarus*), a large marine mammal of the sub-order Pinnipedia, allied to the eared seal, the hind

feet being capable of being turned forwards beneath the body and used for locomotion on land. It differs in having no external ears and in its massive, clumsy build and in the number and formation of the teeth. The front part of the skull is much swollen, and the muzzle is divided into two lobes by a vertical groove below the nostrils, furnished each side with stout translucent bristles growing from the upper lip. Confined to the northern Arctic regions, it has been mercilessly hunted and its numbers are now much restricted.

WALRUS

Walsall, county borough of Staffordshire, Eng., 8 m. NW. of Birmingham. Saddlery, leather and hardware are made, and there are iron-foundries. Pop. 108,000.

Walsingham, town of Norfolk, Eng., 5 m. SE. of Wells, whose former Augustinian priory contained a statue of Our Lady, once a famous pilgrim shrine. Pilgrimages thither have in recent years been revived. Pop. 1,100.

Waltham, city of Massachusetts, U.S.A., on the Charles R., 10 m. W. of Boston. Watches are manufactured. Pop. 39,200.

Waltham Holy Cross, market Essex, England, on the Lea, also known as Waltham Abbey, with a fine Norman abbey church and powder mills. The cross from which the town takes its name is in the adjoining district of Cheshunt, Herts., and was erected by Edward I. to the memory of Queen Eleanor. Pop. 7,000.

Walthamstow, borough of Essex, England, 8 m. NE. of London, of which it is a residential suburb. Pop. 133,600.

Walton, Isaac, English author, born at Stafford; a linen-draper by profession, until his retirement in 1644. His principal work was the *Complete Angler*, or the *Contemplative Man's Recreation*, which was extended by his friend Charles Cotton, and is a classic to this day. He wrote in addition *Lives of Hooker, Dr. Donne, Bishop Sanderson, Sir Henry Wotton*, and George Herbert, all written, like the *Angler*, in a unique, charming, simple style. (1593-1683).

Walton-on-Thames, residential town of Surrey, England, 5 m. SW. of Kingston, now part of the urban district of Walton and Weybridge. Pop. (of whole area), 28,150.

Walton-on-the-Naze, seaside resort of Essex, England, 7 m. S. of Harwich, now part of the urban district of Frinton and Walton. The ancient town has been engulfed by the sea, and the present town is entirely modern. Pop. (with Frinton) 8,060.

Waltz, a dance in which couples to any in gyrations or revolving motions in three-four time. It is supposed to be of Bohemian origin, and was introduced into Britain early in the 18th Century. In its early years the dance was less dignified and quicker than now. The "Vienna" waltz is a quick dance in strict unbroken time. Among leading waltz-music composers are Richard Strauss, Johann Strauss, Weber, Tchaikowsky, and Gungl. As a musical form the waltz was developed by Gounod, Delibes, Suppé, Chopin, Liszt and Brahms.

Walvis Bay, seaport of SW. Africa, with a small hinterland, a detached portion of Cape Province, but now administered as part of the South-West Africa Protectorate, of which it is the natural harbour. Whale and other fisheries are carried on. Area, 375 sq. m. Pop. 2,000 (600 white).

Wampum, strings of shell-beads used both as money and for ornament, especially for belts, by N. American Indians. Wampum belts were exchanged between tribes as tokens and records of treaties, intertribal negotiations, and similar public events.

Wandsworth, metropolitan borough of SW. London, including Putney, Clapham, Tooting and Streatham. It is mainly residential. Pop. 343,000.

Wanganui, seaport of N. Island, New Zealand, on the Wanganui R., 4 m. from its mouth at New Plymouth. It is the centre of a pastoral district. Pop. 26,000.

Wanstead and Woodford, borough of Essex, England, on the edge of Epping Forest, a residential district of NE. London. Pop. 53,000.

Wantage, market town of Berkshire, England, 10 m. SW. of Abingdon. It is chiefly noted as the birthplace of King Alfred. Pop. 3,800.

Wapiti (*Cervus canadensis*), the N. American representative of the red-deer group, often misnamed elk. Its coat is dark brown on head and neck, creamy-grey on flanks and under-parts blackish. It sometimes weighs as much as 700 lb., and runs to 16 hands in height.

WAPITI

Wapping, district of E. London, Eng., in the borough of Stepney, between the London Docks and the Pool. The Thames Tunnel connects it with Rotherhithe. It is one of the oldest of London suburbs, and is now almost entirely devoted to riverside warehouses.

War, **The World**, the international conflict between the so-called Central Powers, Germany, Austria, Turkey, and Bulgaria on the one side, and the Allies including France, Great Britain, Russia, Japan, Belgium, and Serbia, and later Italy, Rumania, Portugal, China, and a number of other Powers on the other, the latter group being in the later stages assisted by the United States; for the first time in history whole nations and not merely armies were at war, some 30,000,000 men being under arms, and poison gas, aeroplanes, and other scientific aids to fighting were introduced; the total cost in human life approached 10,000,000, while millions more were disabled. The war arose out of the assassination of the Archduke Francis Ferdinand, heir to the throne of Austria, by a Serb at Sarajevo on June 28, 1914; stringent demands for satisfaction were made by Austria, and although Serbia agreed to eight out of ten of them and was willing to refer the other two points to the Hague Conference, Austria, with assurances of German support, broke off relations with Serbia, and formally declared war on July 28. Russia at once mobilized in support of Serbia, and Germany retaliated by declaring war on Russia, whose ally, France, was next brought into the conflict. German troops on August 1 crossed the frontiers of Luxembourg and

Belgium, an action which brought forth an ultimatum from Britain, who was a signatory to the treaty guaranteeing Belgian neutrality. On August 4 Great Britain declared war on Germany, and fighting went on in Flanders, France, Italy, the Balkans, Mesopotamia, East Africa, China, and on the high seas, for four years. Hostilities ended with an armistice on November 11, 1918, on the collapse of the Central Powers and the fall of their governments; and a series of Peace Conferences held at Versailles and elsewhere in 1919 brought the war between the two groups of combatants to an end.

Warbeck, Perkin, an impostor who affected to be Richard, Duke of York, second son of Edward IV., alleged to have been murdered in the Tower, and laid claim to the crown of England in preference to Henry VII. In an attempt to make good this claim he was taken prisoner, and hanged at Tyburn in 1499.

Warbler, small bird of the family Sylviidae; the name is applied specially to the Willow-warbler (*Phylloscopus trochilus*), Grasshopper-warbler (*Locustella naevia*), Reed-warbler (*Acrocephalus scirpaceus*) and Dartford-warbler (*Melospiza undatus*), the last a permanent resident in Britain, the others summer residents. They are greenish-brown birds, with generally a pleasant trilling song. The blackcap, whitethroat and chiff-chaff are related species.

Ward, in law, a person under 21 who, with his property, is under the care of a legal guardian. A minor under the protection of the Chancery Division of the High Court is called a ward in Chancery, or ward of Court.

Ward, Artemus, the pseudonym of C. F. Browne (q.v.).

Ward, Mrs. Humphry (Mary Augusta), English authoress, born at Hobart, Tasmania; a piece of Matthew Arnold; translated Amiel's *Journal*, a suggestive record, but is best known by her romance *Robert Elsmere*, published in 1888, a novel dealing with religious problems. This was followed by *David Grieve*, *Sir George Tresady*, *The Marriage of William Ashe*, dealing with political life, and other stories. (1851-1920).

Ward, Sir Joseph George, New Zealand statesman; born at Melbourne, Australia. He entered the New Zealand Parliament in 1887, becoming Postmaster-General, 1891; Colonial Treasurer, in charge of many departments, 1893; and Prime Minister, 1906-1912. In 1911 he received a baronetcy; he was Minister of Finance in the National Cabinet, 1915; served in the Imperial War Cabinet, and at the Peace Conference in 1919. Premier again, 1928-1930. (1857-1930).

Ward-Mote or **Wardmoot**, in Anglo-Saxon times the court of a burgh which met periodically to transact judicial and administrative business. London's wardmoot was one of the city institutions expressly confirmed to it in the extended charter given by Henry I.

Ward-Room, the mess-room on a liner or battleship, reserved for the use of officers other than the commander, who has his own cabin. The junior officers of a warship below Lieutenant's rank use the gun-room.

War Graves Commission,

The Imperial, a body set up in 1917 to maintain the graves of British soldiers killed in the World War. It sees to the upkeep of cemeteries in all parts of the world where fighting took place, and held itself responsible for the erection of headstones and for the identification of the dead.

Warlock, ^{Peter, name adopted by Philip Heseltine, English musical composer; best remembered for his songs, based on old English folk melodies, and for the *Cappriol Suite*. (1894-1931).}

War Office, the administrative headquarters of the British army, situated in Whitehall, London. The department in its origins is a development of the functions of the private secretary to the commander-in-chief. The Army Council, which is the ruling body, came into existence in 1904 after the abolition of the post of commander-in-chief. It consists of the Secretary of State for War (a Cabinet minister, who presides), the Parliamentary and Permanent Under-Secretaries, the Financial Secretary, the Chief of the Imperial General Staff, the Adjutant-General and Quartermaster-General to the Forces, the Master General of the Ordnance, Director-General of Munitions Production, and the Director-General of the Territorial Army.

Warrant, an instrument giving power to arrest an offender. It is issued by a justice on a written and sworn information and is addressed to the constables of his district. If the offender escapes into another county or borough the warrant may be backed, i.e., endorsed, by a justice of that county or borough. It must be served personally on the accused. A royal warrant is a document issued under the authority of a Secretary of State investing a person or body of persons with authority for a specific purpose. See also *Search Warrant*.

Warrant Officer, officer in the Army appointed, not by commission, but by warrant. In the Navy cadets and midshipmen hold rank by warrant. In the Army Class I and Class II warrant officers are intermediate between non-commissioned and commissioned officers, those of Class I including regimental sergeant-majors, master gunners, bandmasters and others; Class II, regimental quartermaster-sergeants, quartermaster-sergeants and others. The rules which govern the arrest of officers apply also to warrant officers, and they cannot be punished by their commanding officer; but otherwise the provisions of the Army Act apply to them as to non-commissioned officers.

Warranty, in law, a promise made as part of a contract, but not of such vital importance as to constitute a condition of the contract. It differs from the latter in that the party to the contract whose interests are hurt by its non-fulfilment is entitled, not to refuse to be bound by the contract, but only to sue for damages.

Warrington, borough in Lancashire of Liverpool; an old town, but with few relics of its antiquity; manufactures ironware, glass and soap. Pop. 79,200.

Warsaw (*Warszawa*), the capital of Poland, stands on the left bank of the Vistula, 700 m. SW. of Leningrad; is almost in the centre of Europe, and in a position with many natural advantages. It has a university, many technical and other specialised colleges, a cathedral, many churches and fine public buildings, a large trade, and manufactures of almost every kind. It superseded Cracow as the capital of Poland in 1698. Pop. 1,233,000.

Wars of the Roses, a civil war from 1453 to 1496, between the Houses of York and Lancaster, so called from the badge of the former being a white rose and that of the latter being a red. The first battle was that of St. Albans, 1455, and the last Bosworth, 1485. It terminated with the accession of Henry VII., who united in his person the rival claims.

Wart, a small hard conical excrescence on the skin, really a small tumour of hypertrophied cutaneous papillae, often bound together by scaly epithelium. They occur mostly in the young; those found in old people are permanent, and in the nature of epithelial decay.

Wartburg, an old, grim castle once a palace of the landgraves of Thuringia, where Luther was confined by his friends when it was not safe for him outside, and where he worked at his translation of the Bible into German; an inkpot, which he threw at the devil's head when the latter interrupted his work, and the splash produced on the wall by the ink, are still shown.

Wart-Hog, a singularly ugly ungulate family (genus *Phacochoerus*) found in Africa. There are two species,

P. africanus, mainly occurring in E. Africa, and *P. pallasi*, found in the SE. of the continent, both running to a few inches over 2 ft. in height. The wart-hog has an enormous head and lengthy muzzle; the lower part of the face is flat, and below the small eyes extend great warty protuberances. Both jaws are equipped with huge tusks.

WART-HOG

Warwick, the county town of Warwickshire, England, on the Avon, 21 m. SE. of Birmingham. It dates from Saxon times, and possesses a great baronial castle, the residence of the Earls of Warwick, erected in 1394 on an eminence on the bank of the river overlooking the town. It is the seat of several industries, and has a considerable trade in agricultural produce. Pop. 13,500.

Warwick, Richard Neville, Earl of Salisbury, and known as "the king-maker" (q.v.); fought in the Wars of the Roses, and was mainly responsible for securing the accession of Edward IV.; he was slain at the battle of Barnet. (1428-1471).

Warwickshire, a central county of England; is traversed by the Avon, a tributary of the Severn; the N. portion, which was at one time covered by the forest of Arden, is now, from its mineral wealth, one of the busiest industrial centres of England; it contains the birthplace of Shakespeare; Birmingham is the largest town, others being Coventry, Nuneaton, Rugby and Sutton Coldfield. Area, 975 sq. m. Pop. 1,533,000.

Wash, The, an estuary on the E. coast of England, between the counties of Norfolk and Lincoln, too shallow for navigation; large sections are dry at low tide. King John lost his crown jewels when in the course of crossing it.

Washington, an urban district and coal-mining town of Durham, England, on the Wear, 6 m. W. of Sunderland. Pop. 17,700.

Washington, capital of the United States, in the federal district of Columbia, on the left bank of the Potomac, 35 m. SW. of Baltimore; was founded in 1791, and made the seat of the Government in 1800. Its chief building is the Capitol, an imposing structure, where the Senate and Congress sit; near it, 1½ m. distant, is the White House, the residence of the President, standing in grounds beautifully laid out and adorned with fountains and shrubbery. Other notable buildings include Columbia University, various Government offices, including the Post Office and Ministry of Agriculture, and the Lincoln Memorial; the Supreme Court holds its sessions in the City. Pop. 487,000.

Washington, a NW. State of the U.S.A., N. of Oregon; is traversed by the Cascade Mountains, the highest 8,138 ft., and has a rugged surface of hill and valley, but is a great wheat-growing and grazing territory, covered on the W. by forests of pine and cedar; Olympia is the capital. The other chief towns are Seattle, Tacoma and Spokane. Area, 69,197 sq. m. Pop. 1,564,000.

Washington, George, one of the founders and first President of the United States, born in Bridges Creek, Westmoreland Co., Virginia, of a family from the N. of England, who emigrated in the middle of the 17th Century; commenced his public life in defending the colony against the encroachments of the French, and served as a captain in a campaign against them under General Braddock. In the contest between the colony and the mother-country he espoused the cause of the colony, and was in 1775 appointed commander-in-chief. His first important operation in that capacity was to drive the English out of Boston, but, these forces rallying, he was defeated at Brandywine and Germantown in 1777. Next year, in alliance with the French, he drove the British out of Philadelphia, and in 1781 compelled Cornwallis to capitulate in an attack he made on Yorktown, and on the evacuation of New York by the British the independence of America was achieved, upon which he resigned the command. In 1789 he was elected to the Presidency of the Republic, and in 1793 was re-elected, at the end of his second term retiring into private life after paying a dignified farewell. (1732-1799).

Washington Conference,

a conference between the U.S.A., Great Britain, Italy, France and Japan, held at Washington, U.S.A., in 1921, to discuss the limitation of armaments and the problems of the Pacific. It led to a treaty by which the powers concerned agreed to limit their construction of new naval tonnage for some years thereafter.

Wasp, hymenopterous winged insect, with yellow and black barred colouring, belonging to the family Vespidae.

They are divided into social and solitary wasps, the former making paper nests of vegetable matter or sometimes clay. The workers are undeveloped females, the males being all drones, and the colony is formed by a queen wasp laying eggs in the cells. The solitary wasps, usually insect-eating, generally make nests of earth in which to store their food. Wasp nests may be destroyed by fumigation with burning sulphur.

WASP

Wastwater, lake of Cumberland, England, at the foot of Sca Fell. It is about 3 m. long by ½ m. broad, and very deep. Along one side the Scaes rises almost perpendicularly from the water.

Watch, a small timepiece or clock, believed to have been invented at Nuremberg about the beginning of the 16th Century. The essential parts of a watch are the dial, the mainspring which supplies the driving force, the train of four wheels which carry the driving force through pinions to the hands on the dial, and the escapement, which controls all the movements. A good watch should also have a compensation-balance to prevent variations of temperature from affecting its regular movement. In England the principal centres of the watch-making industry are Clerkenwell for hand-made, and Coventry for factory-made, watches; but the greatest centres of watchmaking are the United States and Switzerland.

Watches (nautical), the divisions of a ship's crew's working day. The day begins at noon, and is divided into the following seven watches: afternoon, noon to 4 p.m.; first dog, 4 p.m. to 8 p.m.; last (R.N.) or second (Mercantile Marine) dog, 8 p.m. to 8 p.m.; first, 8 p.m. to midnight; middle, midnight to 4 a.m.; morning, 4 a.m. to 8 a.m.; and forenoon, 8 a.m. to noon. This arrangement allows the crew to keep watches alternately, so that the watch free in the forenoon on one day has the afternoon free on the following day, and the men who have only 4 hours' sleep one night have 8 the next.

Water, or Hydrogen Oxide, is a colourless liquid of density 1 gm. per c.c., boiling at 100° C. under an atmospheric pressure of 760 mm. of mercury, and freezing to a colourless crystalline solid, ice, at 0° C. It is tasteless and odourless, and is essential to all forms of life. When pure it is almost a non-conductor of electricity, but since it is the best known solvent it is very difficult to obtain in a state of chemical purity; water containing even traces of salts, acids or bases conducts current well, and is split up by it into its constituents, hydrogen and oxygen. By weight, water consists of 88.89 per cent. oxygen and 11.11 per cent. hydrogen.

Water, Heavy. Ordinary hydrogen contains about one part in 6,000 of a heavier isotope (see isotopes), called deuterium. This does not differ from hydrogen in the vast majority of its chemical reactions, but has an atomic weight of 2 instead of 1. Ordinary water contains traces of deuterium oxide, and it is to this substance that the name heavy water is given. It differs from ordinary water in its density, its boiling-point and its melting-point. While it is closely similar to water in its chemical properties, there seems to be some evidence that it differs in certain of its physiological actions; it has, for example, been stated to retard the germination of seeds and to kill tadpoles, but experiments have so far failed to prove any effect on the human body.

Water, Softening of. Hard water is water soap, but forms a curdy precipitate. The hardness is due to the presence of soluble calcium and/or magnesium compounds. The principal processes for softening hard water are the lime-soda process and the zeolite process. Bath salts, commonly used for softening water for toilet purposes, consist of uniformly graded washing-soda crystals appropriately tinted and perfumed. Drinking water should not be completely soft, since it is insipid to the taste and apt to dissolve lead from the pipes and so cause lead poisoning; moreover, drinking water is one of the sources of calcium salts for the human body.

Water-Buck (*Cobus ellipsiprinus*), an antelope about 4 ft. in height, found in S. and N. Africa and around the Zambesi. Its hair is coarse, varying from dark grey to brown, with an oval white ring on the hind quarters. The horns run to about 30 in. in length. Heavy in build, it can climb stony ridges with remarkable speed and agility.

Waterbury, a city of Connecticut, U.S.A., 88 m. N.E. of New York, with manufactures of brassware, watches, clocks, and machinery and metal goods of many kinds. Pop. 100,000.

Water-Colour, an artists' colour ground up with water or in glass instead of oil. Such colours are sometimes prepared in the form of small hard cakes, and sometimes in a semi-fluid state in leaden tubes. Among substances which yield good water-colours are indigo (blue violet); gamboge (yellow); cobalt (deep blue); sepia (dark brown); oxide of zinc (Chinese white).

Water Cress (*Nasturtium officinale*), an aquatic plant with succulent leaves, common in brooks and rivulets and cultivated for food, generally in water, though it may be grown in the garden or in frames. Seed should be sown in April. Garden cress (*Lepidium Sativum*) is an unrelated cruciferous plant.

Waterford, county of Munster, Eire (Ireland), mountainous in surface, watered by the Suir and Blackwater, and chiefly devoted to cattle-raising and dairying. Area, 717 sq. m. Pop. 77,000. The county town of the same name, near the mouth of the Suir, has an export trade, carried on from Waterford Harbour, formed by the junction of the rivers Suir and Barrow. Pop. 28,000.

Water-Gas, a mixture of carbon monoxide and hydrogen made by passing steam over white-hot coke. It was first introduced as an industrial fuel by the American Lowe in 1876. Its calorific power is considerably less than that of coal-gas, so that the habit of mixing it with coal-gas became common, an Act of Parliament ruled that the sale of "gas" should be on its heating capacity and not on its volume. Semi-water-gas or power gas is a mixture of carbon monoxide, hydrogen, and nitrogen, made by passing a mixture of air and steam over heated coke. Like water-gas and producer gas, it is widely used as an industrial fuel.

Water-Glass, a silicon compound or by fusing silica with sodium carbonate. It is used in storing eggs, as it excludes the air, and for preserving stone-work.

Water-Hemlock, or Cow-Bane (*Cicuta virosa*), a poisonous, umbelliferous weed found on roadsides and lakesides in Britain; it has white flowers and pinnate leaves.

Waterhouse, Alfred, English architect, born in Liverpool; practised 1853-1865 in Manchester, where he designed the Assize Courts, Town Hall, and Owens College. Afterwards in London, designed the Natural History Museum, City and Guilds Institute, Prudential Assurance offices, and St. Paul's School; at Cambridge, the Union and other buildings; at Oxford, the Union, and the south front and hall of Balliol. (1830-1905).

Water-Lily. See *Nymphaea*; *Nuphar*.

Waterloo, a village in Belgium, 11 m. S. of Brussels, which gives name to a battle in which the French under Napoleon were defeated by an army under Wellington on June 18, 1815.

Waterloo Bridge, a bridge across the Thames from the Strand between Blackfriars Bridge and Charing Cross. The original bridge of 9 arches, opened in 1817, was built by Rennie. In 1926 it was closed, being threatened with collapse, and after considerable controversy the building of a new bridge, to be opened in 1940, undertaken.

Waterloo Cup, popularly called the "Dog Derby," an annual event in coursing; so named from its inception in 1836 by the proprietor of the Waterloo Hotel, Liverpool, in which city it is still run, who awarded the first Cup and himself won the first race.

Water-Mark, in paper-making, a faint translucent design or figure stamped in the substance of a sheet of paper and serving as a trade mark. Among the commonest of such designs used by the earlier manufacturers were the crown, elephant, fan, lion's cap, etc., and some of these have given their names to standard sizes of paper.

Water Melon (*Citrullus vulgaris*), the melon of Scripture, a plant with deeply lobed leaves, yellow flowers, and large round fruit with a spotted rind and black seeds. The flesh may be pink, white, or green. It is cultivated in southern France, China, Japan, and India, and especially in the southern states of the U.S.A. In Britain it needs the protection of a greenhouse or frame, and may be grown from cuttings placed under a bell-glass. Good varieties include Emerald Gem and Blenheim Orange. "Colocynth" or "Bitter Apple" (*O. colocynthus*) is closely related.

Water Ousel. See Dipper.

Water Polo, a ball game played in a water, between 7 players a side—3 forwards, 1 half back, 2 backs and a goalkeeper; the distance between the goals varies from 19 to 30 yds., the width must not be more than 20 yds., and the goals should be 10 ft. across by 3 ft. in height. Only one hand may be used. Play lasts 14 minutes.

Water-Power. It was the discovery of electricity that made water-power so important a factor in the economic life of the world to-day, and but for that discovery, steam-power would have held its place. Prior to steam-power the cumbersome vertical water-wheel, which is still in use, was the chief mover for utilizing the potential and kinetic energy of water. There are several types of water-wheels: overshot wheels, in which the direct weight of the water is delivered to the wheel; undershot, which utilize the kinetic energy of the water; and high-velocity jet wheels. In modern hydro-electric or water-power stations, the water runs through pipes of large diameter from the highest levels into the power station, and impinges at high pressure on to the blades of a turbine (q.v.). Such turbines are cheaper and more compact for the same power than the water-wheel, besides being more efficient and enabling enormous water-power to be generated provided a sufficient weight of water is available.

Water Scorpion, a genus (*Nepa*) insects found in ponds and lakes, which seize their prey with their scorpion-like forelegs. Some varieties swim, others drag themselves along the bottom of ponds. They are remarkable for an appendage resembling a very long tail, which is really a divided tube or breathing apparatus. As the insect rises to the surface the tips of this tube may be seen just above the surface of the water.

Waterspout, a meteorological phenomenon, occurring generally at sea, though sometimes on land in the vicinity of water. It is a cyclonic disturbance caused by the meeting of spiral-wise descending and ascending cones of vapour, the conjunction resulting in a moving pillar which may burst with great violence.

Water-Violet (*Hottonia palustris*), an aquatic plant of the order Primulaceae, also called Featherfoil. It has lilac flowers with a yellow eye, finely-divided leaves, and floats in the water. It is widely distributed in Europe and W. Asia, and is found in Britain.

Watford, borough and market town of Hertfordshire, England, 15 m. NW. of London. Paper-making, printing, brewing and silk-making are carried on. Pop. 64,000.

Watling Street, a Roman road extending from the Kent coast and terminating by two branches in the extreme N. of England after passing through London. The NE. branch to York, and the NW. to Chester. The main London-Crewe road follows much of its line.

Watson, Sir William, English poet, born in Yorkshire; the first poem which procured him recognition was *Wordsworth's Grave*, and his subsequent poems, in especial his *Lachryma Musarum*, a tribute to Tennyson, confirmed his reputation. Among his later productions the most important is a volume entitled *Odes and Other Poems*, published 1894; also wrote a volume of essays, *Excursions in Criticism*. (1858-1935).

Watt, the unit of power in general use for electrical purposes; 746 watts are equivalent to one horse-power; the Board of Trade unit of electrical supply is the kilowatt-hour, i.e., the energy necessary to run an engine of power 1,000 watts for one hour; the power of a circuit in watts is calculated by multiplying the amperes by the volts. In practice the kilowatt, of 1,000 watts, is generally used in electrical work.

Watt, James, British engineer, born at Glasgow, Greenock, son of a merchant; began life as a mathematical instrument

JAMES WATT

maker, opened business in Glasgow under university patronage, and early began to experiment on the mechanical capabilities of steam. When, in 1763, he was engaged in repairing the model of a Newcomen's engine, he hit upon the idea of a separate condenser for the steam, and from that moment the power of steam in the civilization of the world was assured. The advantages of the invention were soon put to the proof and established, and by a partnership on the part of Watt with Matthew Boulton (q.v.) Watt had the satisfaction of seeing his idea fairly launched and of reaping the fruits. (1736-1819).

Watteau, Antoine, French painter and engraver, born at Valenciennes; his pictures were numerous and the subjects almost limited to pseudo-pastoral rural groups; the tone of the colouring is pleasing and the design graceful. Many examples of his work may be seen in the Wallace Collection. (1684-1721).

Wattle. See Acacia.

Watts, George Frederick, English painter, born in London; is distinguished as a painter at once of historical subjects, ideal subjects, and portraits; painted one of the frescoes in the Poets' Hall of the Houses of Parliament and the cartoon of "Caractacus led in Triumph through the Streets of Rome"; by his "Love and Death," "Hope," and "Orpheus and Eurydice" achieved a world-wide fame; he was twice offered a baronetcy, but on both occasions declined. (1817-1904).

Watts, Isaac, English Nonconformist divine, born at Southampton; was for a time pastor of a church in Mark Lane, but after a succession of attacks of illness he resigned and went on a visit lasting 36 years to his friend Sir Thomas Abney, on whose death he resumed pastoral duties as often as his health permitted. He wrote a book on *Logic*, long a university text-book, and a great number of hymns, many of them of wide fame and still in use. (1674-1748).

Watts-Dunton, Theodore, English poet and critic, born at St. Ives, bosom friend of Swinburne, with whom he lived for many years. His influence was exercised chiefly through contributions to the periodicals of the day. Having been early brought into contact with gipsy life, he wrote a romance, *Aylwin*, later editing some of the works of George Borrow. Of his poems, *The Coming of Love* and *Christmas at the Mermaid* are best known. (1832-1914).

Wave Motion is the term used in physics—(a) to denote the regular and periodic motion of material particles, and (b) to describe the method by which radiation is transmitted through the ether. See **Ether**; **Wireless**; **Radiation**.

Waveney, river of E. Anglia, rising in Norfolk, and for most of its course of 50 m. forming the boundary between Norfolk and Suffolk. It joins the Yare near Yarmouth.

Wax, or **Fatty Wax**, is derived from animal or vegetable sources, and is solid at ordinary temperatures but melts to an oily liquid at below 100° C. Production depends on the nature and origin of the wax. If comparatively pure, melting and straining may be all that is required. The crude material of bees-wax is melted and the impurities allowed to settle, the melted wax being run off into moulds. Chinese insect wax is deposited by an insect on tree branches; carnauba wax occurs on the leaves of certain Brazilian trees. Waxes are also obtained from sperm oil and also wool-fat or lanolin (q.v.). Other waxes are used for making candles, polishes and sound records.

Wax Palm (*Copernicia cerifera*), a fan palm of Brazil, the hard wood of which is used for cabinet-making; also (*Cerroylon andicola*), the wing-leaved palm of New Granada, the stem of which is covered with a white waxy substance used for church candles.

Wax Tree (*Ligustrum lucidum*), a small fine shrub of the olive family, indigenous to China, so called because an insect that feeds on the tree deposits a wax on it. *Ligustrum botua*, a native of Japan, is specially grown for the sake of this wax. The *Rhus succedanea*, or Japanese wax tree, is a cashew tree with shining winged leaves and fruit like a small grape, which yields a wax used for candles and night-lights.

Waxwing (*Ampelis* or *Bombicilla garrulus*), a hook-billed bird of the Ampelidæ (Chatterer) family found in the northern half of both hemispheres. It has silky plumage, and the inner quills of the wings are tipped with red horn-like appendages likened to sealing-wax. It is seen in the British Isles sometimes in autumn and winter.

Wayfaring Tree, for the *Viburnum lantana*, of the order Caprifoliaceæ; a small tree growing naturally in the Midlands and southern counties of England. The stems are covered with soft mealy down. The heart-shaped leaves are soft and velvety on the upper side; the flower clusters are like those of the elder.

Wayland the Smith, a figure of folklore, connected with the fabulous Wieland, hero of a Norse saga. A cave in the Vale of White Horse, Berkshire, still bears his name.

Wayleave, a right of way granted by a landowner for a specific purpose; the name is generally used of rights of way granted for working coal-mines, in consideration of a payment in the nature of a royalty.

Ways and Means, Committee of the whole House of Commons, formed at the beginning of the Parliamentary Session, immediately after the close of the debate on the Address to the Crown. Its function is to authorize grants out of the Consolidated Fund and to vote the necessary taxes for the financial year. The Chairman has a salary of £2,500 a year, and acts as Deputy-Speaker in the absence of the Speaker.

Waziristan, an area of the NW. Frontier Province of India, on the Afghan border, inhabited by warlike tribes, especially the Mahsuds and

Waziris, who have shown considerable unrest under British rule. British expeditions have been repeatedly sent against them, especially in 1921 and 1937-8, without securing their complete pacification.

Weald, district of Kent, Surrey and Sussex, England, lying between the North and South Downs. It was once forest-clad and a centre of the iron industry. It is about 120 m. long and 30 m. wide.

Wealth, may be defined as anything which has an exchange value. Though wealth is always estimated in money, political economists use the term as embracing only such things as have utility and can be appropriated to exclusive possession. The science of political economy is mainly concerned with the means of promoting the increase of national wealth. It is difficult to measure the national wealth of any particular country, though a rough idea may be obtained through the income tax returns and also by valuing the total exports and imports. The total wealth of Great Britain has been estimated in recent years at about £20,000,000,000; that of France and Russia is not greatly below this figure, and that of the United States three or four times that of Great Britain.

Wear, river of county Durham, England; rising in the Pennines, it flows mainly E. for 65 m. through the Durham coalfield, past Durham and Chester-le-Street to the North Sea at Sunderland.

Weasel, a small carnivorous animal of the family Mustelidæ. The

common weasel (*Mustela nivalis*) is somewhat smaller than a polecat, but has a longer body. In winter, like stoats, they change their coats of brown for white. Generally found in hedgerows and woods and the swampy margins of rivers or lakes, it is often persecuted by farmers, in spite of its usefulness in destroying vermin and insects.

WEASEL

Weather. The weather at any particular place may be described as the combination of all the atmospheric phenomena existing at one time. It therefore includes the temperature (q.v.), barometric pressure, wind (q.v.), moisture, cloud (q.v.), and electricity of the atmosphere; and a change of weather implies a change in one or more of these elements. The Meteorological Office, now attached to the Air Ministry, collects meteorological observations from ocean and land areas all over the world and obtains daily telegraphic reports upon which gale warnings and forecasts are based; and it also maintains observatories for the study of weather and special stations in various parts of the country for the supply of information on weather to aircraft.

Weaver-Bird, a brilliantly-plumaged Australian bird allied to the finch, of the family Ploceidæ. There are various species, including the white-headed, sociable, masked, and yellow-crowned weaver-bird; the name is suggested by the remarkable "textile" nests they build. Externally they resemble the finch, but have 10 primary quills in the wings and a powerful conical bill.

Weaving, the process of making cloth, flexible fibres and, generally, involving the use of a frame or apparatus called a loom on which the cloth is woven. It is an art of great antiquity, probably one of the first of human inventions, and the products of the looms of Egypt, Phœnicia, and Persia acquired a great reputation. In all kinds of weaving, plain or figured, one system of threads, called

the weft or woof, is caused to pass at right angles over another system, called the warp or web; and the essential motions in weaving are "shedding," "picking," and "beating-up." "Shedding" means that the warp threads are divided to form a passage or "shed" through which the shuttle carrying the weft is propelled; "picking-up" is the operation of passing the shuttle across the loom through the shed or opening between the warp threads; and "beating-up" means placing at the fell or edge of the cloth the pick of weft left in the shed as the shuttle passes across the loom.

Webb, Sir Aston, British architect. Born at London, he became an R.A. in 1903, and from 1919 to 1924 he was President of the Academy. He is best known as designer of the Victoria Memorial at Buckingham Palace, the Admiralty Arch, the Royal College of Science, South Kensington, Christ's Hospital and Dartmouth Naval College. (1849-1930).

Webb, Matthew, British swimmer who in 1875 was the first man to swim the English Channel, and who was drowned in 1883 while attempting to swim through Niagara rapids. (1848-1883). See *Channel Swimming*.

Webb, Sidney. See *Passfield*.

Weber, Karl Maria von, German musical studied at Vienna under Abbé Vogler, and at Dresden became founder and director of the German opera. His first great production was *Der Freischütz*, which established his fame, and was succeeded by, among others, *Oberon*, his masterpiece, first produced in London, where he shortly after died, broken in health. He wrote a number of pieces for the piano. (1786-1836).

Webster, John, English dramatist; he collaborated with Dekker, Masson, and other playwrights, but some four plays are exclusively his own work, the two best the *White Devil* and the *Duchess of Malfi*; by some he has been placed next to Shakespeare as a tragedian. (c. 1580-1625).

Webster, Noah, American lexicographer, born at Hartford, Connecticut, U.S.A.; in his early life he followed journalism as a career, and from about 1808 began to prepare his *Dictionary of the English Language*. He wrote several other works on philology, history, and international law, and was a co-founder of Amherst College. (1758-1843).

Weddell Sea, a large bay of Antarctica, between Coats Land and Graham Land; takes its name from John Weddell, who reached it in 1823. Shackleton visited it in 1915 in the *Endurance*, but the boat was crushed in the pack-ice and abandoned.

Wedgwood, Josiah, English potter, born at Burslem, son of a potter; in 1759 started a pottery on artistic lines in his native place; devoted himself first to the study of the material of his art and then to its ornamentation, in which latter he enlisted Flaxman as a designer, and so a ware known by his name became famous for both its substantial and artistic excellence far and wide in England and beyond. (1730-1795).

WEDGWOOD
VASE

Wednesbury, a town in Staffordshire, shire, 8 m. NW. of Birmingham; manufactures iron-ware. The name of the town has been stated to be derived from a temple to Woden on the site of the present church. Pop. 32,900.

Wednesday, fourth day of the week, named from the ancient Germanic god Woden.

Weed, a wild herb or, indeed, any plant and other useless to man or injurious to crops, pastures, etc. Among the chief British weeds are thistles, docks, charlock, dandelion, meadow saffron, plantain and various species of ranunculuses.

Week, a period of seven days, used from the earliest times as a convenient division of the month, probably originating as a rough approximation to the period between the quarters of the moon.

Weever-Fishes, a genus (*Trachinus*) of marine fishes

of the spiny-rayed family. They bury themselves in the sand, leaving visible only the poisonous spines on their

GREATER WEEVER

backs, which can inflict a very painful wound. Two species, viz., the Greater Weever (*Trachinus draco*) and the Lesser Weever (*T. vipera*) are found on British shores.

Weevil, a name given to various beetles of the family Curculionidae, of which many species exist. They are mostly serious agricultural pests, among the most harmful being the Cotton-boll Weevil of Central America.

Weights and Measures, standard of magnitude, weight and value. Old-time weights and measures were based on natural measures, such as the cubit, while in the Middle Ages, in England, a grain of wheat was adopted as a standard. The Weights and Measures Act of 1878, superseding all previous laws, lays down the legal measures for Great Britain, basing them upon the Standard Yard and the Standard Pound, in the custody of the Standards Department of the Board of Trade. The above are the sole independent standards for weights and measures, the gallon, the capacity standard, being based upon the pound. The use of the Metric System (g.r.) is also legal in Britain.

Wei-Hai-Wei, a town in a deep bay promontory, China, 40 m. E. of Chefoo, and nearly opposite Port Arthur, which is situated on the northern side of the entrance to the Gulf of Pechili. It was leased to Great Britain in 1898, together with the islands in the bay and a belt of land along the coast. Its harbour is well sheltered, and accommodates a large number of vessels. It was restored to China by Great Britain in 1930. Pop. c. 150,000.

Weimar, city in Germany, capital of the state of Thuringia; in a valley on the left bank of the Ilm, 13 m. E. of Erfurt, and famous as for many years the residence of Goethe and the illustrious literary circle of which he was the centre. It has iron, leather, book publishing and other industries. The constitution of the 1919 German republic was drawn up here. Pop. 40,000.

Weir, Sir William Douglas Weir, first Viscount, British industrialist; became Scottish Director of Munitions in 1915-16; Controller of Aeronautical Supplies, 1917-18; Director-General of Aircraft Production, 1918; Secretary for Air, 1918-19. He was knighted in 1917, received a Barony in 1918, and a Viscounty in 1938. (1877-).

Weismann, August, German biologist, the-Main; studied medicine at Göttingen; devoted himself to the study of zoology, the first-fruit of which was a treatise on the *Development of Diptera*, and at length to the variability in organisms on which the theory of descent, with modifications, is based, the

fruit of which was a series of papers published in 1882 under the title *Studies on the Theory of Descent*. His name is chiefly associated with a theory of heredity by continuous transmission of the germ-plasm, a substance of a uniform chemical and molecular composition. (1834-1914).

Welding, joining pieces of metal by soft soldering, brazing, riveting or other methods. Forge welding is done by manual or mechanical hammering or by pressure applied by mechanically operated rolls. The process of electrical resistance is used in welding seams of light gauge steel plate or in the butt welding of mild steel. Gas, blowpipe and oxy-acetylene welding are fusion processes. The modern process of thermit welding involves securing the necessary temperature by a chemical reaction between aluminium and iron oxide. See **Solder**.

Well, a shaft dug or bored in the ground to obtain water, and walled or lined with bricks to prevent the caving in of the sides. See **Artesian Wells**.

Welland, city of Ontario, Canada, on the Welland Canal, which connects lakes Erie and Ontario, and on the Welland R. It is the shipping port of the products of the district, and has numerous manufacturing establishments. Pop. 10,700.

Welland, an English river, rising in Northamptonshire, and flowing through Lincolnshire to the Wash. Length 70 m.

Wellesley, Richard Colley, Marquis of, Irish statesman and administrator, born at Dublin, eldest brother of the Duke of Wellington, his senior by nine years, entered the British Parliament in 1784, was a supporter of Pitt, and in 1797 became Governor-General of India in succession to Cornwallis, and was raised to the English peerage as Baron Wellesley. He proved himself a great administrator, and by clearing out the French and crushing the power of Tipoo Sahib, as well as increasing the revenue of the East India Company, laid the foundation of the British power in India, for which he was raised to the marquissate. He afterwards became Foreign Secretary of State and Viceroy of Ireland. (1760-1842)

Wellesley Province. See **Straits Settlements**.

Wellingborough, town in Northamptonshire, 10 m. N.E. of Northampton, chiefly engaged in the manufacture of boots and shoes. Pop. 26,200.

Wellington, since 1865 the capital of New Zealand, is built round the land-locked harbour of Port Nicholson in North I.; was founded 1840; contains Governor's House, Houses of Parliament, and Government offices; pop. 152,000. The provincial district of the same name, including the southern part of North I., has an area of 10,870 sq. m., and a pop. of 316,000.

Wellington, Arthur Wellesley, first Duke of, born probably at Dublin, third son of the Earl of Mornington,

an Irish peer, educated first at Chelsea, then at Eton, and then at a military school at Angers, in France; entered the army in 1787; sat for a time in the Irish Parliament; went in 1794 to the Netherlands, and served in a campaign there which had disastrous issues; was about to leave the army when he was sent to India, where he distinguished himself

DUKE OF WELLINGTON

in the storming of Seringapatam, and in the command of the war against the Marhattas, which he brought to a successful issue in 1803, returning home in 1805; next year he entered the Imperial Parliament, and in 1807 was appointed Chief Secretary for Ireland. In 1808 he left for Portugal, where he was successful against the French in several engagements, and in 1809 was appointed commander-in-chief of the Peninsular army. In this capacity his generalship became conspicuous in a succession of victories, in which he drove the French first out of Portugal and then out of Spain, defeating them finally at Toulouse on April 12, 1814, and so ending the Peninsular War. Upon his return home he was created a duke, and voted a grant of £400,000. On the return of Napoleon from Elba he was appointed general of the allies against him in the Netherlands, and on June 18, 1815, defeated him in the battle of Waterloo, being rewarded with the estate of Strathfieldsaye, in Hampshire. In 1827 he was appointed commander-in-chief of the army, and in 1828 Prime Minister. As a statesman he was opposed to Parliamentary reform, but he voted for the emancipation of the Catholics and the abolition of the Corn Laws. He died in Walmer Castle on September 1, 1852, and was buried beside Nelson in the crypt of St. Paul's Cathedral. (1769-1852).

Wells, a small episcopal city in Somersetshire, England, 20 m. S.W. of Bath, its bishopric being joined with that of the latter city; it derives its name from hot springs near it, and is possessed of a beautiful cruciform cathedral in the early English style, remarkable for the statues which adorn its west front. Pop. 5,300.

Wells, Herbert George, British novelist. Born at Bromley, of poor parents, he left school at 13 and worked first in the

drapery trade and later as a pupil-teacher; he later obtained a scholarship to the Royal College of Science, South Kensington, where he studied under Huxley and took his B.Sc. with honours. Teaching and journalism then brought him a small income, and in 1895 he published *The Time Machine*, his first novel; *The Invisible Man* and *The War of the Worlds* soon followed, but the public was slow to recognize his merit. His first books were mainly scientific romances like *The War in the Air*; but in 1900 he turned to ordinary romantic novels with *Love and Mr. Lewisham*, followed by *Kipps*, *Tono Bungay*, and *Mr. Polly*. In 1916 *Mr. Brilling Seen It Through* appeared, and marked the start of a third phase of Wells's writing: it preceded *God, the Invisible King*, and a number of other sociological and prophetic tracts in novel form, including *The World of William Clissold*. A fourth stage of his work included an *Outline of History*, *The Work, Wealth and Happiness of Mankind*, and other treatises on popular science, interspersed with further novels. His autobiography appeared in 1934. (1866-).

H. G. WELLS

Welsbach, Karl Auer, Baron von, inventor, born at Vienna. In 1885 he made the first incandescent gas mantle; inventing in 1900 the osmium incandescent electric lamp. He was also the discoverer of the elements praseodymium and neodymium. Received a barony 1901 (1858-1929).

Welsh Calvinistic Methodists, the largest Nonconformist body in Wales, of native growth, originating in the middle of the 18th Century in connection with a great religious awakening;

has an ecclesiastical constitution on Presbyterian lines, and is in alliance with the Presbyterian Church of England; there are some 400,000 communicants, adherents and scholars.

Welshpool, county town of Montgomeryshire, N. Wales, on the left bank of the Severn, 19 m. W. of Shrewsbury, the manufacture of flannels and woollen goods being the chief industry. Pop. 5,600.

Welsh Terrier, a small dog of the usually black and tan in colouring, closely akin to the wire-haired fox terrier.

Welwyn, village in Hertfordshire, Eng., land, 22 m. N. of London, to the south of which was founded in 1920 Welwyn Garden City, a partly residential and partly industrial settlement, in which an attempt was made to combine the amenities of a town with the beauties of rural surroundings; its rapidly growing pop. is 13,000.

Wembley, borough of Middlesex, Eng., suburb of London; in 1924 a mammoth British Empire Exhibition was held here; a sports stadium, built in that year, and capable of holding 100,000 spectators, is the venue of the Association Football Cup Final. Pop. 108,000.

Wen, a cyst in the form of a tumour which but is commonest on the scalp; it grows very slowly, forming by the accumulation of sebaceous matter in a hair follicle or sac.

Wenceslas, hero of a famous carol telling of his goodness to the poor. He is usually assumed to be Wenzel or Wenceslas, king of Bohemia in the 10th Century, who was converted to Christianity and founded several churches in Prague and other parts of the country. While on his way to Mass on Sept. 28, 935, he was murdered by his brother. Buried at St Vitus's cathedral, Prague, he was later canonized.

Wends, a Slav people who, about the 6th Century, invaded and took possession of vacant lands on the southern shores of the Baltic, and extended their incursions as far as Hamburg and the ocean, and to the S. over the Elbe. Their remnants now dwell between the Elbe and the Oder, and are completely Germanized, though traces of their Slav language remain.

Wener, Lake, the largest lake in Sweden, in the SW., 150 ft. above the sea-level and 100 m. long by 50 m. at its greatest breadth; contains several islands, and abounds in fish.

Wenlock, town in Shropshire, England, on the R. Severn, 14 m. from Shrewsbury; it has an old church and timbered guildhall dating back to the 16th Century; is an agricultural centre, and there are coal fields in the district. It includes the towns of Broseley and Ironbridge, and formerly claimed the distinction of being (in area) the largest borough in England. Pop. 14,000.

Wensleydale, district of the N. Yorkshire, in the upper valley of the R. Ure, producing a well-known local cheese. Jervaulx abbey is in the neighbourhood.

Wentworth. See **Strafford**.

Weregeld, or **Wer-Gild**, among the old races a fine, the price of homicide, of varying amount, paid in part to the relatives or community of the person killed and in part to the king or chief.

Werewolf, a person transformed into a wolf, or a being with a literally wolfish appetite, under the presumed influence of a charm or some demonic possession. The origin of belief in this power

(known as lycanthropy) is very old, being associated with the legends of ghouls and vampires. It was once prevalent throughout Europe, and still persists among the peasants of south-eastern Europe.

Weser, a river of Germany formed by the Fulda and the Werra. It has a N.E. course to the North Sea. Length about 450 m.

Wesermünde, a seaport of Prussia at the mouth of the Weser. It has woollen mills and is a fishing port. Pop. 77,500.

Wesley, **Charles**, English hymn-writer, born at Epworth, brother of John Wesley (q.v.), with whom he was associated in the establishment of Methodism. His hymns are highly devotional, and are to be found in all the hymnologies of the Church. (1707-1788).

Wesley, **John**, English religious leader born at Epworth, Lincolnshire. While at Lincoln College, Oxford,

he and his brother Charles, with others, distinguished for their religious earnestness, were nicknamed Methodists; in 1735 travelled to the U.S.A. with some Moravians, whose piety impressed him, and on his return to England was persuaded to a kindred faith; thenceforth preached the immediate connexion of the soul with, and its direct dependence upon, God's grace in Christ alone. This gospel he preached in disregard of all ecclesiastical authority, riding about from place to place on horseback, and finding people wherever he went, especially in Cornwall, ready listeners. He never separated from the Church of England, in spite of his activities. His works included a Journal, Sermons, and many hymns. (1703-1791). See **Methodists**.

JOHN WESLEY

Wesleyan Methodists, the religious body founded on the death of John Wesley (q.v.) to disseminate his doctrines. It made rapid progress, and in 1817 formed a missionary branch. It suffered from many schisms in its earlier years, but in the 20th Century a number of these were healed, the more important branches of the parent body reuniting in 1929 as the Methodist Church (see **Methodists**).

Wessex, a territory in the SW. of England, roughly coterminous with the present counties of Hants, Berks, Wilts, Dorset and Somerset, conquered and occupied by Saxons under Cerdic, who landed at Southampton in 494, known as the West Saxons, and who gradually extended their dominion over territory beyond it till, under Egbert, they became supreme over the other kingdoms of the Heptarchy.

West Bridgford, urban district of Nottinghamshire, England, on the Trent, 14 m. S.E. of Nottingham, of which it is a suburb. It contains the Nottinghamshire County Cricket ground. Pop. 19,200.

West Bromwich, a manufacturing town of the "Black Country," in Staffordshire, England, 5 m. N.W. of Birmingham; has important industries connected with the manufacture of iron ware, as well as brick and machinery works. Pop. 82,000.

Westbury, town of Wiltshire, England, land, 25 m. from Salisbury. The figure of a horse cut here in Bratton Hill is said to mark the scene of an encounter in 890 between King Alfred and the Danes. The main industries are glove, cloth, woollen and brick and tile manufacturing. Pop. 4,000.

Western Australia, the largest of the Australian States, but (except for Tasmania) the least populous, formerly called the Swan River Settlement, 1,500 m. long and 1,000 m. broad, embracing nearly one-third of the Australian continent. Much of it, particularly in the centre, is desert, and the best soil is in the W. and N.E. The discovery of gold about 1892 caused a great inrush of population. In 1890 it received a constitution and became self-governing; it entered the Commonwealth on its formation. Perth, on the Swan R., is the capital, with Fremantle as port; other towns are Subiaco, Kalgoorlie, and Boulder. The principal exports are wheat, wool, gold, timber, hides, and fruit. Area, 975,900 sq. m.; Pop. 458,453. In 1934 a movement for secession from the Australian Commonwealth was confirmed by a referendum of the people, and a petition was presented to the British Parliament praying for its confirmation, but was rejected on the ground that the matter was one for decision by the Federal Government.

West Ham, county borough in Essex, England, immediately adjoining the county of London on the E. and the Thames on the S. The southern part, adjoining the river, is largely occupied by docks and warehouses; industries of all kinds are carried on. Pop. 265,800.

West Indies, an archipelago of islands extending in a curve between N. and S. America from Florida on the one side to the delta of the Orinoco on the other, constituting the summits of a sunken range of mountains which run in a line parallel to the ranges of N. America. They are divided into the Greater Antilles (including Cuba, Haiti, Jamaica, and Puerto Rico), the Lesser Antilles (including the Leeward and the Windward Isles), and the Bahamas. They all lie, except the last, within the torrid zone; they yield all manner of tropical produce, and export sugar, coffee, tobacco, cotton, spices, etc. Cuba and Haiti (q.v.) are independent, Puerto Rico and the Virgin Is. are United States possessions, and the remainder are English, French or Dutch. The name Indies was applied to them because when Columbus first discovered them he believed that he was close upon India, which he had calculated he would find by sailing west. For further details see separate articles.

Westinghouse, **George**, American inventor, born at Central Bridge, N.Y. After serving in the Civil War, and as an assistant engineer in the Navy, 1864-75, he invented the air-brake in 1869, and later was responsible for many devices for railway signalling and for use of alternating electric currents. (1846-1914).

Westland, a provincial district of the South I., New Zealand? Mining, farming and lumbering are carried on, and butter and cheese are manufactured. The chief town is Greymouth. Area, 4,880 sq. m. Pop. 18,700.

Westmeath, an inland county in Leinster, Eire (Ireland); is mostly level and gently undulating; the soil in many parts is good, though little cultivated; the only cereal crop raised is oats, but the herbage it yields supplies food for fattening cattle, which is a chief industry. County town, Mullingar. Area, 681 sq. m. Pop. 54,700.

Westminster, city forming one of the constituent boroughs of the county of London, England, on the N. bank of the Thames, and comprising a great part of the West End of London. Since the removal of the English capital from Winchester under the Normans, it has been the seat of the legislative authority of England. It contains Whitehall, the Houses of Parliament, most of the Government offices,

Buckingham Palace, many of the most important shops of the metropolis, the high-class residential district of Mayfair, and St. James's, the Green and most of Hyde Parks. Pop. 124,000.

Westminster, **Dukes of**, surnamed Grosvenor, of an old Cheshire family. In 1677 Sir Thomas, third bt., married Mary, daughter and heiress of Alexander Davie(s), alderman of London, who had acquired the Manor of Ebury, covering a great part of the area of Westminster. Sir Richard, seventh bt., was made Earl Grosvenor, 1761, and his successor, Robert, created Marquess of Westminster in 1831. Hugh Lupus, third marquess, who until his succession in 1868 had been for over twenty years Liberal M.P. for Chester, was made Duke, 1874 (1825-1899). His son, Hugh Richard Arthur, is the present Duke. (1879-)

Westminster, **Statute of** (1931), the charter of legislative independence of the self-governing British Dominions. It provides that the Colonial Laws Validity Act, 1855, shall not apply to any law passed by a Dominion Parliament; that no Dominion Law shall be void on the ground of repugnance to the law of England; that a Dominion Parliament may make laws having extra-territorial operation; that the United Kingdom Parliament may not legislate for a Dominion except where that Dominion has requested and consented to such enactment. The chief sections of the Statute apply to Australia and New Zealand only if and when their parliaments adopt them, which so far they have not done.

Westminster Abbey, officially the col-
legiate church of St. Peter, Westminster, is

but a part of what was once a great monastic establishment, with farmyards, vineyards and tilled fields around the precinct walls. The church, excluding the seven western bays of the nave, and Henry VII.'s chapel to the E., was built by Henry III. in the 25 years from 1245 to 1270. The chapter house, the portion of the cloister leading to it, and those of its bays which are attached to the S. aisle of the early part of the church, are all parts of Henry III.'s work. The W. bays, the rest of the cloister, and the Abbot's house (now the deanery) were built in the 14th and 15th Centuries. The exterior has been so completely recased as to be in effect a series of modern works. The abbey has been the scene of all coronations since the time of Harold, and is the burial place of most kings of England and of numerous statesmen, poets and others; its most remarkable modern monument is the Tomb of the Unknown Soldier, killed in the Great War, buried in the nave on November 11th, 1920.

Westminster Assembly, a convocation of divines assembled under authority of Parliament, at which delegates from England and Scotland adopted the Solemn League and Covenant (q.v.), fixed the establishment of the Presbyterian form of church government in the three kingdoms, drew up the *Confession of Faith*, the *Directory of Public Worship*, and the Larger and Shorter Catechisms. It held its first meeting on July 1, 1643, and did not break up till February 22, 1648.

Westminster Cathedral, the principal Roman Catholic place of worship in England, near Victoria Station, London, was

WESTMINSTER ABBEY (FACADE)

built (1895-1903) from the designs of J. F. Bentley, in early Byzantine style. The marble and mosaic decoration of the interior, although it has now reached an advanced stage, will not be completed for many years. An outstanding feature of the exterior is the domed brick campanile, 283 ft. in height.

Westminster Hall, a structure the Houses of Parliament at Westminster, built by William II., and roofed and remodelled by Richard II.; was the scene of the trials of Wallace, Sir Thomas More, Strafford, Charles I., Warren Hastings, and others, and till 1883 the seat of the High Court of Justice. Its roof, composed of 13 great timber beams, is one of the largest in the world to be unsupported.

Westminster School, or **St. Peter's College**, London, one of the leading English public schools, was formerly a grammar school attached to the collegiate church of St. Peter, Westminster, and was refounded by Queen Elizabeth in 1561. The silk hats and tail-coats of its taller and elder scholars are a familiar London sight. Famous pupils include Dryden, Gibbon, and Warren Hastings.

Westmorland (i.e., westmoorland), a northern county of England, 32 m. from N. to S. and 40 m. from E. to W.; is in the Lake District, and mountainous; most of the land is under pasture or forest, though crops are grown in the valleys. The county town is Kendal; Assize town, Appleby. Area, 789 sq. m. Pop. 65,400.

Weston-super-Mare, a borough and holiday resort in Somersetshire, England, on the Bristol Channel, looking across it towards Wales. Pop. 32,300.

Westphalia, former duchy of Germany, now a province of Prussia; it was made with other territories in 1807 into a kingdom by Napoleon for his brother Jerome, and designed to be the centre of the Confederation of the Rhine; was assigned to Prussia in 1815, according to the Treaty of Vienna. The chief towns are Münster and Dortmund. The district is very rich in coal and iron. Area, 7,800 sq. m. Pop. 5,040,000.

Westphalia, Treaty of, the treaty signed at Osnabrück and Münster in 1648, closing the Thirty Years' War.

West Point, an old fortress, the seat of the United States Military Academy, on the right bank of the Hudson R., 12 m. N. of New York. It was established in 1802.

Westport, (1) a seaport of Eire (Ireland), in Co. Mayo, 11 m. S.W. of Castlebar. Pop. 3,400. (2) a seaport of the W. coast of the South Island of New Zealand, 40 m. from Greymouth. Pop. 4,040.

West Riding, the most populous of the three ridings or divisions of Yorkshire; Wakefield is the county town. Within the West Riding most of the industries of Yorkshire are carried on at Leeds, Bradford, Sheffield, Huddersfield, Halifax, and other large towns. Area, 2,784 sq. m. Pop. 3,359,000.

West Virginia. See *Virginia*.

Westward Ho! a watering place of Devonshire, England, of great natural beauty. It is named after the title of Charles Kingsley's novel, scenes in which occur in the vicinity. Pop. 800.

Wetter, Lake, one of the largest lakes in Sweden, 70 m. long, 13 m. broad, and 270 ft. above the sea-level. Its clear blue waters are fed by hidden springs; it rises and falls periodically, and is sometimes subject to sudden agitations during a calm.

Wetterhorn (i.e., peak of tempests), a high mountain of the Bernese Oberland, with three peaks each a little over 12,000 ft. in height.

Wexford, a maritime county in Leinster, Eire (Ireland); is an agricultural county, and exports large quantities of dairy produce; its capital of the same name is a seaport at the mouth of the R. Slaney. Area, 914 sq. m. Pop. 94,000.

Wey, a river of England, rising near Alton, Hampshire, and flowing N.E. to Weybridge, near which town it joins the Thames. Length 38 m.

Weybridge, town in Surrey, England, near the junction of the Wey and the Thames; part of the urban district of Walton and Weybridge; near here was Ham House, built by James II. for Catherine Sedley, and also in the neighbourhood are the Brooklands motor-racing track and the London Necropolis, containing the Brookwood Crematorium.

Weygand, **Maxime**, French general, born in Brussels. Serving from 1888 in the cavalry, he became Chief of Staff to Marshal Foch in 1914, retaining that position until 1923. In 1920 he repulsed the Russian forces from Warsaw; in 1923-24 he was High Commissioner in Syria. In 1930 he became Chief of the French General Staff until 1935. (1867-).

Weymouth, borough and holiday resort in Dorsetshire, England, 8 m. S. of Dorchester; has a fine beach and an esplanade over a mile in length. It came into repute from the frequent visits of George III. Pop. (with Melcombe Regis) 31,700.

Whale, any large mammal of the order Cetacea, which is said to be descended from some primitive stock of the carnivora. All species are alike in general appearance, and run from 20 ft. to 60 ft. in length, or even as much as 100 ft. The tail is provided with a horizontal fin, and is known as the "fluke"; the flipper is evolved from the normal mammalian fore-foot, the eyes are minute, and valvular nostrils are situated on the summit of the head. The whale feeds on all kinds of aquatic animals, the food being swallowed without mastication, even when it takes the form of cuttlefish and seals. Whales rise to the surface every few minutes to breathe, but can remain submerged for an hour. Their first act on reaching the surface is to expel the warm air with a whistling sound, called "blowing," and in the cool atmosphere this is condensed into a column of mist several feet high (spouting). Whales are divided into the sub-orders *Mystacoceti*, or whalebone or baleen whales, and *Odonoceti*, or toothed whales. The first sub-order includes Right Finback or Borqual and Humpback; the second, Sperm, Narwhal, White, Bottle-nose, and Killer or Grampus. The whaling industry is mainly in British and Norwegian hands; the threatened extinction of the whale by unregulated slaughter led in 1937 to an International Convention establishing a close season for whales. See also articles on various species.

Whale Island, small island to the E. of Portsmouth, England, where the school of naval gunnery is situated.

Wharfe, a river of the W. Riding of Yorkshire, England, rising S. of Hawes and following a S.E. course to the ocean, which it joins near Cawood.

Wheat (*Triticum vulgare*), an annual corn-grass cultivated from prehistoric times in Europe and Egypt, while, in China, records go back to 2700 B.C. It is now grown throughout the temperate regions of the world and in the Andes of S. America, where it is grown at an altitude of

9,000 ft. It is the most important bread-food of the world, while large quantities of wheat flour are made into starch, and used for dressing woollen fabrics. The plant is represented by numerous varieties; those in which the ripened grain detaches itself naturally from the husk are referred to one species (*T. vulgare*); those in which the ripe grain is closely contained in the husk are distinguished as *spelta* (*T. spelta*).

The wheat grain is oval, and hairy at the apical end, but smooth at the base; the greater part is made up of a mass of endosperm, and this, together with the germ, is covered by the pericarp (fruit coat) and seed coat testa, which jointly form a hard brittle shell, separated in milling from the inner parts as *bran*. The germ consists of tissue densely stored with oily protoplasm, but with no starch; the endosperm contains much starch closely packed. The constitution of the grain varies: "soft" wheat may contain only 10 to 12 per cent. of starch, while in some Russian wheats it may be 17 per cent. The constituents of wheat are broadly water, 13.37; nitrogenous substances, 12.04; fats, 1.91; digestible carbohydrates, 69.07; cellulose and lignin, 1.90; and ash, 1.71.

Wheat Commission, a body set up under the Wheat Act, 1932, to secure to British growers of millable wheat a standard price and a market. The Commission collects from millers and importers of flour "quota payments" in respect of flour milled in or imported into the United Kingdom, and these sums are paid into the Wheat Fund. From the fund the Commission makes "deficiency payments" (the difference between the ascertained average price and the standard price, less administrative expenses) to registered growers in respect of home-grown millable wheat sold by them in accordance with the provisions of the Act.

Wheatear (*Oenanthe oenanthe*), a small passeriform bird, with brownish-grey plumage and black wing tips, found in hilly and open country, in Britain as a summer visitant. It nests in holes in the ground or in walls.

Wheatstone, Sir Charles, British physicist and electrician, born near Gloucester; was appointed professor of Experimental Philosophy in King's College, London, and distinguished himself by his inventions in connexion with telegraphy; the stereoscope was of his invention. (1802-1875).

WHEATSTONE
BRIDGE

Wheeling, second city of West Virginia U.S.A., on the Ohio R., 67 m. SW. of Pittsburgh; is a country rich in bituminous coal; has extensive manufactures; is a great railway centre, and carries on an extensive trade. Pop. 61,700.

Whelk, a carnivorous spiral-shelled sea-snail, the shell being brownish-white or grey, of which there are numerous species. The common whelk (*Buccinum undatum*), found on European coasts, is used as bait and food.

Whigs, name given at the end of the 17th Century to the Covenanters of Scotland, and afterwards extended to the English political party which supported the Hanoverian succession and held "low" views regarding the Church of England. After the

it resounded in 1790 and was applied to Liberals and Radicals by their opponents.

Whin. See Gorse.

Whinchat (*Saxicola rubetra*), a small British bird of the Thrush family, a summer visitor to these islands; it has dark brown and buff plumage with a white stripe over the eye, and frequents heaths and commons.

Whippet, a cross-bred hound type, used for racing and rabbit coursing. It has the markings of a fox-terrier and is a hybrid from the latter and the greyhound. The average weight is about 20 lb. Whippet-racing is a popular sport in many parts of the N. and Midlands of England, especially in mining districts.

WHIPPET

Whip-Poor-Will (*Antrostomus vociferus*), an American bird of the night-jar family, also known as the Virginian night-jar. Its name was suggested by its peculiar nocturnal cry.

Whips, officers of the parliamentary parties appointed to see that there is a full attendance at important debates. The term "whip" is also applied to the notes they send to members, a three-line whip being the most urgent. The whips of the Government party are generally junior ministers, holding office as "Junior Lords of the Treasury."

Whipsnade Zoological Park, a country annexe of the London Zoological Gardens, situated 3 m. from Dunstable and 34 m. from London, and opened in May, 1931, to provide a place where wild animals might be exhibited and observed so far as possible in a close imitation of their natural surroundings.

Whisky (*Whiskey*), distilled alcoholic liquor made from various grains, chiefly in Ireland, Scotland and N. America. The name was originally applied to the spirit obtained from malt in Ireland and Scotland. Scotch and Irish whisky are often distilled from malted barley, and when made in the old-time pot-stills from malt dried over open fires, retain a smoky flavour. In America whisky is distilled from Indian corn or rye. New whisky is colourless and raw-tasting, but becomes mellowed and matured by storing in casks, deriving its colour from the wood of the cask. The alcoholic content varies between 40 and 50 per cent. or over.

Whispering Gallery, a room, or artificial, so shaped that a whisper or other faint sound, produced at a particular point, can be heard at some distant point with remarkable loudness. The effect is usually fortuitous, but can easily be deliberately designed. They are either *focusing*, that is, the sound is brought to a focus after a single reflection; or *conducting*, where the sound is brought from one point to the other by a series of reflections at short intervals. Good examples of each respectively are the Statue Hall or old Chamber of the House of Representatives in the Capitol, Washington, and the dome of St. Paul's Cathedral, London.

Whist, a card game originally introduced in the reign of Henry VIII., and known then by the name of "triumph," whence the term "trump"; later called "ruff" and "honour," and eventually "whisk," softened into "whist," made fashionable about 1730 by Edmund Hoyle, who published a treatise on the game; Henry Jones ("Cavendish") developed the game further in the middle of the last century; it has largely lost its popularity in favour of Bridge (q.v.), though "Whist drives," at which a number of players compete for small prizes, are still favoured.

Whistler, James Abbott M'Neill, American painter and etcher, born at Lowell, Massachusetts; studied military engineering at West Point, and art at Paris, and settled at length as an artist in London; executed some famous portraits, in especial one of his mother (in the Luxembourg Gallery), and a remarkable one of Thomas Carlyle, now at Glasgow. Paintings of his exhibited in the Grosvenor Gallery, London, provoked a criticism from Ruskin, which was accounted libellous, and as plaintiff he got a farthing damages, without costs. Many of his etchings are to be seen in the British Museum. (1834-1903).

Whitby, a seaport and holiday resort in the N. Riding of Yorkshire, England, 5½ m. N.E. of York, is situated at the mouth of the Esk, and looks N. over the North Sea; it has ruins of a Benedictine abbey. Ornaments were formerly made from the "Whitby jet" found in the locality, and there is a fishing industry. The town was shelled by German cruisers in Dec., 1914. Pop. 11,700.

White, Sir George Stuart, English general, entered the army in 1853; won the Victoria Cross twice over; served in the Indian Mutiny, in the Afghan Campaign (1879-1880), in the Nile Expedition (1885), in the Burmese War (1885-1887), and was made Commander-in-Chief in India in 1893. Quartermaster-General in 1898, and distinguished himself by his defence of Ladysmith in the South African War. (1835-1912).

White, Gilbert, English naturalist, born in the village of Selborne, Hants; educated at Oriel College, Oxford, in which he obtained a Fellowship, which he retained all his life; became curate of Selborne, and passed an uneventful life studying the habits of the animals and birds around him, the results of his observations and notes being published in *The Natural History and Antiquities of Selborne* (1789), perhaps the most famous "nature book" in the English language. (1720-1793).

White, Henry Kirke, English minor poet, born at Nottingham; published a volume of poems in 1803, which procured him the patronage of Southey; through overzeal in study undermined his constitution and died of consumption, Southey editing his *Poems*. (1785-1806).

Whitebait, name given to the young of the sprat, herring, and related fishes, which are caught in great numbers in the Thames estuary and other waters, and used as a bait and for food.

Whitechapel, a district of the metropolitan borough of Stepney, immediately E. of the City of London; it is largely inhabited by Jews of German, Polish and Russian origin, occupied in the tailoring, dressmaking and allied trades.

Whitefield, George, founder of Calvinistic Methodism, born at Gloucester; was an associate of Wesley (q.v.) at Oxford, and afterwards as preacher of Methodism both in this country and America, commanding crowded audiences wherever he went, and creating, in Scotland particularly, a deep religious awakening; in 1741 he separated from Wesley on a doctrinal issue. (1714-1770).

Whitehall, thoroughfare in Westminster, London, where are situated the Cenotaph (q.v.), the principal government offices, the Horse Guards, and the banqueting-hall of the old Whitehall Palace, from which Charles I. passed to be executed, and which is now a museum.

Whitehaven, a seaport of Cumberland, England, 38 m. SW. of Carlisle, with coal and hematite iron mines in the neighbourhood; has blast-

furnaces, ironworks, and manufactures of various kinds, with a considerable coasting traffic. Pop. 23,200.

Whitehead, Alfred North, British philosopher, born in the Isle of Thanet; from 1914 was professor of applied mechanics at the Imperial College of Science, and from 1924 Professor of Philosophy at Harvard. Among his works are *Principia Mathematica* (with Bertrand Russell), 1910-13; *Science and the Modern World*, 1925; and *Adventures of Ideas*, 1933. (1861-).

Whitehead, Robert, British engineer, born at Bolton-le-Moors, Lancashire; applied himself to machine invention, and in 1866 produced the torpedo known by his name and adopted by the Admiralty in 1871. (1823-1905).

White Horse, a figure of a horse on removing the turf, and showing the white chalk beneath; the most famous is: one on Bratton Hill, near Westbury, Wilts, alleged to commemorate a victory of King Alfred over the Danes. A similar "horse" is to be seen at Uffington, Berks, near Wantage, where the annual ceremony of "Scouring the White Horse" was formerly held, and others are found in both Wiltshire and Berkshire. Formerly thought to be Saxon work, some at least of them are now recognized as anterior to the Anglo-Saxon conquest of England.

White House, the official residence of the President of the United States, a building of free-stone painted white; it is situated in Washington, D.C.

White Lead,

a compound of lead carbonate and hydrated oxide of lead, used as a pigment.

WHITE HOUSE

White Nile, one of the two streams forming the Nile, which flows out of the Albert Nyanza, and unites with the Blue Nile from Abyssinia near Khartoum.

White Russia, a constituent republic of the R.S.F.S.R., N. of the Ukraine and E. of Poland. It is crossed by the rivers Dnieper, Pripiet and Dvina. The chief town is Minsk. Area, 49,000 sq. m. Pop. 5,439,500.

White Sea, a large inlet of the Arctic Ocean, in the N. of Russia, which is entered by a long channel and branches inward into three bays. It is of little service for navigation, being blocked with ice all the year except in June, July, and August, and even when open encumbered with floating ice, and often enveloped in mists at the same time. Its chief port is Archangel.

Whitethroat (*Sylvia communis*), a small widely-distributed bird of the Warbler family which frequents hedges and bushy localities; its plumage is brown with rufous wings, a pink tinge below, and pure white throat. It utters a loud chattering song as it ascends. *Sylvia curruca*, the lesser whitethroat, is a smaller bird with a lower note.

Whitgift, John, British divine, born at Great Grimsby; was educated at Cambridge, and became Master of Trinity College; escaped persecution under Queen Mary, and on the accession of Elizabeth was ordained a priest; after a succession of preferments, both as a theologian and an ecclesiastic, became bishop of Worcester in 1577 and archbishop of Canterbury in 1583; attended Queen Elizabeth on her deathbed, and crowned James I.; was specially zealous against the Puritans. (1530-1604).

Whiting,

an edible sea-fish, of the family *Gadidae*, differing from the cod in having no barbel. The British species is *Gadus merlangus*. The average weight is about 2 lb.

WHITING

Whitley, John Henry, British politician. Born at Halifax, he was educated at Clifton and London University, and became Liberal M.P. for the town of his birth in 1900; from 1921 to 1928 he was Speaker of the House of Commons, and is also known as the originator of Whitley Councils for the settlement of industrial disputes. (1866-1935).

Whitley Bay, seaside resort in Whitley and Monkseaton urban district, Northumberland, England. It is 2½ m. N.E. of North Shields. Pop. (Whitley and Monkseaton) 27,000.

Whitley Councils, bodies set up in Great Britain for the attempted settlement of labour disputes as a result of the report of a committee presided over by J. H. Whitley (q.v.) in 1917. Such councils, consisting of equal numbers of employers and employees, were set up in several industries after the World War, but the movement for their establishment failed to make the progress expected of it.

Whitlow, a suppurating inflammatory sore, usually in a finger or the thumb, in the terminal joint. It is generally caused by the septic infection of an abrasion or small wound.

Whitman, Walt, American poet and man of letters, born in Long Island, U.S.A., of parents of mingled English and Dutch blood: he served as a nurse in the American Civil War. His verse, written in a rugged semi-prose, is collected as *Leaves of Grass*; he also wrote *Democratic Vistas* (1870), and *Autobiography* (1892). (1819-1892).

Whitstable, coastal town and holiday resort in Kent, England, 6 m. N. of Canterbury; is chiefly famous for its oysters. Pop. 15,500.

Whitsunday, the seventh Sunday after Easter, a festival day of the Church kept in commemoration of the descent of the Holy Ghost.

Whittier, John Greenleaf, the American "Quaker Poet," born at Haverhill, Massachusetts, the son of a poor farmer; worked, like Burns, in the fields and acquired a loving sympathy with Nature, natural people, and natural scenes. Turning to journalism, he became a keen abolitionist and the poet-laureate of abolition. Of his poems *Maud Muller* and *Skipper Iveson's Ride* are well known. (1807-1892).

Whittington, Sir Richard, Lord Mayor of London, born at Pauntley, Gloucestershire; came to London, prospered in business, was elected Lord Mayor three over, and knighted. He is the hero of the nursery tale, *Dick Whittington and his Cat*. (1358-1423).

Whooping, or **Whooping Cough**, infectious disease of the mucous membrane lining the air passages, marked by frequently recurring fits of convulsive coughing, followed by a characteristic loud whoop or indrawing of the breath and often also with vomiting. It mostly attacks children, female more often than male; in infants it is dangerous, but one attack generally gives immunity from a recurrence; it may, however, occur in old age. The cause is believed to be due to a bacillus in the sputum. The catarrhal stage may last a fortnight, the coughing stage from four to six weeks. Bronchitis, pneumonia, and asthma are frequent complications.

Whortleberry,

otherwise bilberry, called in America the huckleberry, the bluish-black fruit of the shrub *Vaccinium Myrtillus*, used for making jelly. The red whortleberry (*Vaccinium Vitis-Idaea*) closely resembles the cranberry, and its berries are sometimes sold as such.

WHORTLEBERRY

Whymper, Edward,

English wood-engraver and mountain-climber, born at Lambeth. He began climbing in Dauphiné in 1862, and made his first ascent of the Matterhorn, attended with loss of four lives, 1865. In 1867 and 1872 he visited Greenland, and in 1888 climbed Chimborazo, Cotopaxi, and other peaks in the Andes, visiting the Canadian Rockies in 1901 and later. He wrote several books on mountaineering, including *Scrambles Amongst the Alps*. (1840-1911).

Wichita, second city of Kansas, U.S.A., on the Arkansas R. It has engineering shops and numerous manufactures. There are oil wells in the vicinity. Pop. 111,100.

Wichita Falls, city of Texas, U.S.A., stands on the Wichita R. It has manufactures of glass, pottery, various food products, and oil refineries. Natural gas is also produced in the neighbourhood. Pop. 43,700.

Wick, county town of Caithness, Scotland, on Wick R., 161 m. N.E. of Inverness, the chief seat of the Scottish herring fishery. Wick proper, with its suburbs Louisburgh and Bonhavan, is on the N. of the river, and Pultneytown on the S.; has a few manufactures, with distilleries and breweries. Pop. 7,500.

Wicklow, a county of Leinster, Eire (Ireland), S. of co. Dublin, with a largely mountainous surface and many holiday resorts on the coast; it is famous for the beauty of its scenery. There is some mineral wealth. The highest peak is Lugnaquilla (3,040 ft.). The county town is Wicklow. Area, 782 sq. m. Pop. 58,500.

Widecombe - in - the - Moor,

village of Devonshire, England, between Dartmoor and the R. Dart, 12 m. NW. of Newton Abbot. It is the site of a famous country fair, commemorated in a well-known folk-song.

Widgeon (*Wigeon*), a genus (*Mareca*) of wild ducks of the family

Anatidae, breeding in swampy and marshy districts. The chief species is the Common Widgeon (*Mareca penelope*), with long pointed wings, short pointed tail and white patch on the lesser wing coverts.

WIDGEON

Widnes, town in Lancashire, England, on the Mersey; with chemical and copper-smelting industries. Pop. 42,000.

Wiener-Neustadt, a town of 14 m. S. of Vienna. It manufactures leather, machinery, and pottery. Pop. 38,800.

Wiesbaden, town in Hesse-Nassau, Germany, 5 m. NW. of Mainz, a watering-place abounding in hot springs, and one of the best-frequented spas in Europe. In 1925 it became the headquarters of the British Army of Occupation on their withdrawal from Cologne, being evacuated in December, 1920. It has a number of fine buildings, including the Kurhaus, and a palace. Pop. 160,000.

Wig, an artificial covering for the head interwoven by a kind of network, and made to imitate the natural hair, or in abundant flowing curls; worn either to conceal baldness or for ornament, theatrical costume, or by judges and barristers as part of their official robes. A full-bottomed wig is one which reaches down to the shoulders and is worn by judges on ceremonial occasions. Wigs did not go out of general use, except by professional classes, until the latter half of the 18th Century.

Wigan, a town in Lancashire, England, 18 m. NW. of Manchester, in the centre of a large coalfield; cotton and iron goods are manufactured. Pop. 84,000.

Wight, *Isle of*, an island in the S. of England, and a separate administrative county, divided from Hampshire by the channel of the Solent. It is quadrangular in shape, is 23 m. in utmost length, and about 14 m. in utmost breadth; is traversed by a range of chalk downs from E. to W. The soil is fertile, especially in the E.; the scenery is rich and varied, and the climate charming. Newport is the county town, others being Ryde, Cowes, and Sandown-Shanklin. Near Cowes is Osborne House, once the summer residence of Queen Victoria. The island contains many popular holiday resorts. Area, 147 sq. m. Pop. 88,400.

Wigtownshire, the most southerly county in Scotland, in the SW. of which the largest town is Stranraer, and the county town Wigtown; it is an agricultural county, and largely pastoral. Area, 487 sq. m. Pop. 29,300.

Wigwam, a hut or cabin of the North American Indians; consisting usually of a rough conical framework of stakes or poles covered over with bark, matting or tanned hides.

WIGWAM

Wilberforce,

Samuel, English prelate, born at Clapham, third son of the succeeding; entered Oriel College, Oxford, at 18, where he distinguished himself by his powers of debate; took holy orders and rose to eminence in the Church; was made Bishop of Oxford in 1845, and of Winchester in 1869; was a High Churchman of the pure Anglican type; equally opposed to Roman Catholicism and Nonconformity; shone in society by his wit and powers of conversation; was killed by a fall from his horse; he was popularly known by the sobriquet of "Soapy Sam." (1805-1873).

Wilberforce, **William**, British philanthropist, born in Hull; attended St. John's College, Cambridge, at 17; represented his native town in Parliament as soon as he was of age. He was early and deeply impressed with the inhumanity of the slave-trade, and to achieve its abolition became the ruling passion of his life. He introduced a Bill for its suppression in 1789, but it was not till 1801 that he carried the Commons with him, and he had to wait six years longer before the House of Lords supported his measure and the Emancipation Act was passed. He retired into private life in 1825, and died three days after the vote of 20 millions to purchase the freedom of the West Indian slaves. He was an eminently religious man of the Evangelical school; author of a *Practical View of Christianity*. (1759-1833).

Wilcox, **Ells Wheeler**, American verse, and for some years had a wide vogue; *Laugh, and the world laughs with you*, is perhaps her best-known poem. (1855-1919).

Wild Cherry, or *Gaan* (*Prunus avium*), a tree of the order Rosaceae, reaching a height of 70 ft.; its bark is dull red, peeling in thin strins and striated with transverse lines; the base of the trunk is ridged with furrows. The leaves are pale green, long and oval; the flowers open and white; the fruit dark-red, heart-shaped, and sweet, with a scanty sticky juice. The wood is used in cabinet and instrument making and for tobacco pipes.

Wilde, **Oscar Fingall O'Flahertie**, Irish writer, born at Dublin; won the Newdigate Prize at Oxford, and embarked on a brilliant literary career, but in 1895 was convicted of homosexual practices, and imprisoned for two years. He died in Paris in poverty three years after his release. As a dramatist his work was distinguished chiefly for brilliant epigrams, his plays including *The Importance of Being Earnest* and *Lady Windermere's Fan*; his poems include *The Ballad of Reading Gaol*, and he also wrote a novel, *The Picture of Dorian Gray*. (1856-1900).

Wilder, **Thornton Niven**, American novelist and playwright, born at Madison, Wisconsin; his best-known works are *The Bridge of San Luis Rey* (1928), *The Angel that Troubled the Waters* (1928) and *The Woman of Andros* (1930). (1897-).

Wilderness, U.S.A., the scene of a two-days' terrible but indecisive conflict in the American Civil War on May 5 and 6, 1864.

Wilfrid, **St.**, English divine; after a visit to Rome at the age of twenty he returned to England to defend Roman customs at the Synod of Whitby (664) against the Celtic bishops. In 688 he became Archbishop of York, but was deposed, and went to Sussex, in whose conversion to Christianity he played a great part. In 705 became bishop of Hexham. (c. 635-709).

Wilhelmina I., Queen of the Netherlands, daughter of William III., on whose decease in November, 1890, she ascended the throne; her mother, a sister of the Duchess of Albany, acted as regent during her minority, and she became of age on August 11, 1898, when she was installed as sovereign amid the enthusiasm of her people; in 1901 she married Prince Henry of the Netherlands, and gave birth to a daughter, Princess Juliana, in 1909. (1880-).

Wilhelmshaven, German naval station, on Jade Bay, in the North Sea, 43 m. NW. of Bremen. Pop. c. 30,000.

Wilkes, **John**, English politician, born at Clerkenwell; was elected M.P. for Aylesbury in 1761; started a periodical called the

North Briton, in which he published an offensive libel, which led to his arrest on an illegal general warrant and imprisonment in the Tower, from which he was released amid general rejoicing among the people. He was afterwards prosecuted for an obscene production and outlawed for non-appearance; he sought an asylum in France, and on his return was elected for Middlesex, but was again committed to prison. This treatment made him the object of popular favour; he was elected Lord Mayor of London, re-elected for Middlesex, and at length allowed to take his seat in the House. The cause of civil liberty owes much to the agitation excited by his case. (1727-1797).

JOHN WILKES

Wilkins, Sir George Hubert, Australian explorer. Born at Mt. Bryan, South Australia, he became a photographer with the Turkish army in the Balkan War of 1912, and in the World War served in the Australian Air Force, after being second-in-command of Stephenson's Canadian Arctic expedition of 1913. He took part in the British Imperial Antarctic expedition of 1920, and Shackleton's last expedition of 1921, and in 1926 led the Detroit Arctic expedition. (1888-).

Will, a legal document providing for the disposal of property after death; only persons of full age (21) can make a will. Every will must be signed at the end by the testator or some other person in his presence and by his direction; and his signature must be either made or acknowledged by him in the presence of at least two witnesses present at the same time, who must attest the will in his presence. Any alteration in a will after execution must be executed in the same way as the will, but it is sufficient if the testator and the witnesses sign their names in the margin or close to the alteration. Alterations insufficiently executed may, however, be validated by a codicil, and a codicil must also be executed like the original will. A will is always revocable. If the testator wishes to change the disposition of his estate, it is better to make a new will, revoking the old one, or to add a codicil to the first. It is usual to appoint two executors, but any number up to four may be appointed. A will operates on property acquired after it has been made; hence it is advisable always to leave to some person or persons "the residue of my estate and effects." A person must be of sound mind if his will is to be valid; but delusions that leave his general understanding unimpaired and not connected with his testamentary dispositions will not invalidate the will. If an executor has not been appointed or will not or cannot act, the residuary legatee nearest of kin to the deceased, or a legatee, is entitled to take out letters of administration. The executor or administrator must take the will to the Probate Registry at Somerset House or to a local District Probate Registry and prove the will. Copies of wills are kept at Somerset House, where there is also a depository for the safe custody of the wills of living persons. By an Act of 1938, following the practice in several of the Dominions, the widow or widower and certain other dependent relatives of a testator who has not made adequate provision for them by will may apply to the Courts for additional provision to be allotted to them from the estate.

Willenhall, town of Staffordshire, England. 14 m. SW. of Lichfield. Its chief industries are brass and iron, founding and the manufacture of locks, bolts, iron boxes, oil stoves, etc., and brickmaking. Pop. 27,700.

Willesden, borough of Middlesex, England, 5 m. NW. of London. It has large railway shops and several industries, but is chiefly a "dormitory suburb" of London. Pop. 100,000.

Willelt, William, English architect, originator of the idea of "daylight saving" (q.v.), which was adopted a year after his death. (1857-1915).

William I., **The Conqueror**, King of England, born at Falaise, Normandy, illegitimate son of Duke Robert III. of Normandy, on whose death he succeeded him; as the cousin of Edward the Confessor, he was nominated by him his successor to the English throne. Harold meanwhile assuming the royal title. He invaded England, defeated Harold at Senlac in 1066, and was crowned king, establishing his power and was crowned over the whole country by 1071. He rewarded his followers with grants of land

and lordships over them, subject to the Crown. The Domesday Book (q.v.) was compiled by his order, and the kingdom brought into closer relation with the Church at Rome, his adviser in church matters being Lanfranc, archbishop of Canterbury (q.v.). He died by a fall from his horse when suppressing rebellion in Normandy, and was buried at Caen. His invasion of England is known as the Norman Conquest. (1027-1087).

William II., **King of England**, surnamed Rufus, born in Normandy, third son of William I.; succeeded his father in 1087; had to face rebellion, headed by Bishop Odo, in favour of his elder brother Robert, Duke of Normandy, which he suppressed with popular aid; he proved a stern and exacting ruler. His energy was great, but was spasmodic; he added Normandy to his dominion by compact with Robert, who went on Crusade, compelled Malcolm of Scotland to do homage for his kingdom, conducted several campaigns against the Welsh, and had a long-continued quarrel with Archbishop Anselm, in defence of the royal prerogative against the claims of the Church. He was accidentally shot while hunting in the New Forest, and buried in Winchester Cathedral. In his reign Westminster Hall was built. (1060-1100).

William III., **King of England**, born at The Hague, son of

William II., Prince of Orange, by Mary, the daughter of Charles I.; during a contest on the part of the United Provinces with Louis XIV. was, in 1672, elected Stadtholder, and by his valour and wisdom brought the war to an end in 1678; married his cousin Mary, daughter of James II.; being invited to England, landed with a large army at Torbay, and on the flight of James to France he and Mary were proclaimed King and Queen of Great Britain and Ireland in 1689. The Scots and the Irish offered resistance in the interest of the exiled monarch, but the former were defeated at Killiecrankie in 1689, and the latter at the battle of the Boyne in 1690. He was an able man and ruler, but his reign was troubled by an interminable feud with France, and by intrigues on behalf of James both at home and abroad. He died by a fall from his horse at Kensington just as a great war with France was impending. He was through life the adversary of Louis, and before his death he had prepared the materials of that coalition which, under Marlborough and Prince Eugene, brought Louis to the brink of ruin. (1650-1702).

WILLIAM III.

William IV., **King of England**, known as the "sailor king," born at Windsor, the third son of George III.; entered the navy in 1779; saw service under Rodney and Nelson, but practically retired in 1789, though he was afterwards promoted to be Admiral of the Fleet, and Lord High Admiral, and continued to take great interest in naval affairs. After living, as Duke of Clarence, from 1792 to 1816 with Mrs. Jordan, the actress, by whom he had 10 children, he married in 1818 Adelaide, eldest daughter of the Duke of Saxe-Meiningen. On the death of the Duke of York in 1827 he became heir-presumptive, and on the death of George IV. in 1830 succeeded to the throne. His reign was distinguished by the passing of the first Reform Bill in 1832, the abolition of slavery in the colonies in 1833, the reform of the poor laws in 1834, and the Municipal Reform Act in 1835. He died at Windsor, and was succeeded by his niece, Victoria. (1766-1837).

William I., German Emperor, born in Berlin, second son of Frederick-William III. of Prussia, and brother of Frederick-William IV., his predecessor on the Prussian throne; took part in the war of liberation that preceded the fall of Napoleon. In 1858 he was appointed regent owing to his brother's incapacity, and on February 2, 1861, he succeeded to the throne. A threat of insurrection after his accession was quashed by the successful war with Denmark, which issued in the recovery of the duchies of Schleswig-Holstein. This provoked a war with Austria, which lasted only seven weeks, and ended with the consent of the latter to the projected unification of the other states, and the establishment of a confederation under the headship of the Prussian king, a unification which was consolidated at the close of the Franco-Prussian War, when, on January 18, 1871, the Prussian king was proclaimed emperor of Germany in the palace of Versailles. (1797-1888).

William II., German Emperor, born Frederick III., whom he succeeded as emperor in 1888, and grandson of the preceding, and through his mother of Queen Victoria.

One of the first acts of his reign was to dismiss Bismarck, and take upon himself full responsibility for the home and foreign policy of the State. Germany remained at peace during the first 26 years of his reign, in spite of his frequent interference in the affairs of other nations, and his asseveration of her claims to a "place in the sun." His responsibility for Germany's part in the World War is a matter on which the future alone can pronounce. In November, 1918, after Germany's collapse, he abdicated and fled to the Netherlands, where he afterwards resided, mainly at Doorn. The threat which had been made by the Allies to call him personally to account for the war was by general consent dropped. (1859-).

William, ex-Crown-Prince of Germany, son of the Emperor William II. (q.v.). He took an important army post on the western front in the World War, was prominent though not successful at the siege of Verdun, and in November, 1918, renounced his right of succession to the throne and fled to the Netherlands. Later he returned to Germany, but made no serious bid for the throne. (1882-).

William the Lion, king of Scotland, grandson of David I., and brother of Malcolm IV., whom he succeeded in 1165, and whose surname is supposed to have been derived from his substitution of the lion for the dragon on the arms of Scotland; was taken captive when invading England at Alnwick Castle in 1174; sent prisoner to Falaise, in Normandy, but liberated on acknowledgment of vassalage to the English king, a claim which Richard I. surrendered on payment by the Scots of 10,000 marks to aid him in the Crusade; was the first king of Scotland to form an alliance with France; died at Stirling after a reign of 49 years. (1143-1214).

William the Silent, Prince of Orange, a cadet of the house of Nassau, the first Stadtholder of the Netherlands; he became leader of the anti-Spanish party, and brought about the Union of Utrecht in 1579, comprising the seven provinces which became the nucleus of the United Netherlands. He was assassinated by Balthazar Gerard at Delft. (1533-1684).

KAISER
WILLIAM II.

Willington, Freeman Freeman-Thomas, first Marquess of, British administrator; entered the House of Commons as a Liberal in 1900; in 1913 became Governor of Bombay and in 1919 of Madras; went to Canada as Governor-General in 1926, and in 1930 was appointed Viceroy of India, an office he held until 1936. (1866-).

Willington, township of Co. Durham, England, in the urban district of Crook and Willington, 4 m. N. of Bishop Auckland. Coalmining is carried on. Pop. (with Crook) 29,590.

Willoughby, Sir Hugh, British Arctic voyager, born in Derbyshire; was sent out in 1553 with three vessels by a company of London merchants on a voyage of discovery, but the vessels were separated by a storm in the North Seas, and not one of them returned. Only Richard Chancellor, the captain of one of them, found his way to Moscow, and opened up a trade with Russia and England. The ships, with the dead bodies of their crews, and the journal of their commander, were found by some fishermen the year after on the coast of Lapland. (c. 1500-1554).

Willow, the common name of a number of trees of the *Salix* genus of the family Salicaceae, applied to all not called osiers or sallows. British species include the Weeping Willow (*Salix babylonica*), a waterside tree with beautiful pendent twigs. It is believed to have flourished around ancient Babylon 3,000 years ago. It was introduced into England, at Hampton Court, about 1690.

WILLOW
(*Salix Pentanora*)

Willow Pattern, a design used in ware, copied from the blue china of Nanking, introduced into England by Thomas Turner, of Caughley, about 1780 or later. It is always blue on a white or bluish-white ground.

Wilmington, largest city and port of Delaware, U.S.A., 25 m. SW. of Philadelphia, with extensive manufactures; as Fort Christina it was an important settlement during the Swedish domination of the district. Manufactures include steamships, machinery and paper. Pop. 106,600. A village of Sussex, England, 9 m. S.E. of Lewes, bears the same name; a prehistoric figure of a man holding a staff in each hand, known as the Long Man of Wilmington, is cut in the chalk cliffs above the village.

Wilson, Sir Henry Hughes, British general. Entering the army in 1884, he saw service in Burma and the Boer War, and in 1914 became assistant chief of staff to French. He was in Russia in 1916, and the following year became military representative on the Versailles War Council. Early in 1918 he became Chief of the Imperial General Staff; knighted in 1915, he was made a field-marshal in 1919. A keen opponent of Sinn Féin in Ireland, he was shot dead outside his London home by Irish rebels and was buried in St. Paul's. (1864-1922).

Wilson, John, Scottish man of letters, better known as "Christopher North," born at Paisley; studied at Glasgow and Oxford; a man of powerful physique and distinguished as an athlete as well as a poet; took up his abode in the Lake district, and enjoyed the society of Wordsworth, Coleridge, and Southey; wrote two poems, the *Isle of Palms* and the *City of the Plague*; was called to the Scottish bar, but never practised; became editor of *Blackwood's Magazine*, and from 1820 to 1851 was professor of Moral

Philosophy in Edinburgh University. His *Noctes Ambrosianae* are characteristic of his abundant humour and judicious criticism. (1785-1854).

Wilson, Woodrow, American statesman and 28th President of the U.S.A., born at Staunton, Virginia; a professor of jurisprudence and allied subjects at several universities, he entered politics as a Democrat, becoming in 1912 governor of New Jersey, and the following year was elected President of the United States. Early in the World War he brought pressure to bear on Germany to make her abandon attacks on non-combatants and, these failing, he was largely responsible for his country's entry into the war in 1917. He came to Europe for the Peace Conference, where his most notable work was the inclusion in the Treaty of Versailles of the League of Nations Covenant; but he was acting without the authority of his legislature, and on his return American participation in the League was rejected. He retired from office in 1921. (1856-1924).

Wilton, market town in Wiltshire, England, 3 m. NW. of Salisbury; was the ancient capital of Wessex, and gave name to the county; its church, erected by Lord Herbert of Lea in 1844, is a rich Lombardic structure, with a campanile 108 ft. high. Pop. 2,400.

Wiltshire, or *Wilts*, an inland county in SW. of England, with Gloucestershire on the N. and Dorset on the S., 64 m. from N. to S. and 37 m. from E. to W.; is largely an agricultural and pastoral county; is flat, rising into hills in the N., and is broken by downs and rich valleys in the S., except on Salisbury Plain; sheep-breeding and dairy-farming are the chief industries, and it is famous for cheese and bacon. It is remarkable for its many prehistoric antiquities, including Stonehenge, Avebury, Silbury Hill, etc. The chief towns are Devizes, Swindon, Salisbury and Trowbridge. The County Offices are at Trowbridge. Area, 1,315 sq. m. Pop. 303,000.

Wimbledon, borough of Surrey, England, 7 m. SW. of London, famous as the headquarters of English lawn tennis; it is mainly residential, and has an extensive and beautiful common. Pop. 68,000.

Wimereux, a town of dept. Pas-de-Calais, France, 2 m. NW. of Boulogne. It was for a time the British headquarters during the World War.

Winthurst Machine, an electrical apparatus for producing large charges of static electricity by friction; named after James Winthurst, inventor. (1832-1903).

Winchelsea, a town and Cinque port in Sussex, England; the old town, dating from Saxon times, was inundated and destroyed by the sea in 1250 and again in 1287; the new town was begun soon after; contains a 14th Century church, ruins of a Greyfriars monastery, and other antiquities. Pop. 700.

Winchester, an ancient city of Hampshire, England, and the county town, 60 m. SW. of London, on the right bank of the Itchen; is a cathedral city, with a noted large public school; was at one time the capital of England; the cathedral dates from the 11th Century, but it has subsequently undergone considerable extensions and alterations; other important buildings are the Hospital of St. Cross, founded 1132, the remains of the castle, and Winchester College (q.v.). Pop. 23,500.

Winchester College, founded in 1394 by William of Wykeham, bishop of Winchester, as "the College of the Blessed Virgin Mary

of Winchester." Wykeham created a double foundation consisting of two colleges, one at Winchester and the other, New College, at Oxford, and the two are still closely associated.

Wind, a current of air produced by difference of temperature, the warm rarified air near the surface ascending and colder air coming in to supply its place. Winds are among the most influential factors in determining climate. Being warm or cold, wet or dry, according to their region of origin, and according to the nature of the surface, sea or land, over which they have passed, it is evident the prevailing winds determine to a large extent both temperature and rainfall. The SW. winds from the Atlantic bring warmth and moisture to Britain. The vapours condensed on the mountains which run along the western sides of the British Isles and Scandinavia fall to the earth in heavy rain. During the condensation a large quantity of latent heat is set free to raise the temperature of the air. Generally speaking, where the prevailing winds are westerly, as in the northern hemisphere, and where currents of warm water are flowing in the same direction from the equator, the cold of winter is greatly mitigated, as is shown by the isotherms bending towards the pole. On the E. coasts of Asia and America, however, the prevailing winds are northerly and cold, so that there is a great difference between summer and winter temperature. Thus it happens that the W. coasts of the great continents enjoy an insular climate, while the E. coasts and inland districts endure the more trying continental climate.

Windermere, a lake on the borders of Westmorland and Lancashire, the largest in England, 10½ m. long from N. to S., and 1 m. broad; is 240 ft. deep and 134 ft. above sea-level. Rydal Mount, Wordsworth's home, is on its banks. It has lately become a trial course for speed-boats.

Windhoek, the administrative capital of South-West Africa. It is situated 5,000 ft. above sea-level, 235 m. from Swakopmund. There are hot springs in the neighbourhood. Pop. 20,300 (6,000 white).

Windlass, a drum for hoisting weights or loads by winding. The simplest kind consists of a horizontal barrel for the hoisting rope, supported in vertical standards and turned by a crank with a handle. The older windlass used on ships for raising the anchor consisted of a large horizontal roller rotated by handspikes, and differed from the capstan chiefly in the plane of its axis. Modern ships use a steam winch on the fore-castle head.

Windmill, a machine for supplying motive power, generally operated by the wind acting on oblique vanes or sails which radiate from a horizontal shaft or air-screw. A modern windmill is a lofty steel-latticed structure with six, instead of the old-fashioned four, radial adjustable vanes, and its revolving wheel carrying the vanes is kept perpendicular to the main direction of the wind by a long tail-piece with a fixed vane, the direction of the tail-piece being at right angles to the plane of the rotating vanes.

Window, an opening in a wall or side of a building, etc., to admit light or air, now usually fitted with sheets of glass, mica or other transparent substance. Experience shows that the greatest quantity of light is obtained for a chamber or room when lighted by a horizontal aperture in the ceiling, as, e.g., in the case of the Pantheon at Rome. *Mullioned* windows are those with vertical divisions between their lights. A *dormer* window is one set in the inclined roof of a house, as exemplified particularly in Jacobean houses. Large circular traceries

windows are a feature of French Gothic architecture; in the earlier period, the tracery is found in wheel form with geometrical patterns at the extremity; in the later, the wheel contains a rich and closely woven flamboyant tracery of great beauty.

Window Tax, a tax levied on houses, graduated according to the number of windows over six which they contained, first imposed under William III. in 1697; bricked-up windows can still sometimes be seen in older houses as relics of the tax.

Windsor,

a town in Berkshire, England, on the right bank of the Thames, opposite Eton, and about 22 m. W. of London, with a castle which from early Plantagenet times has been the principal residence of the kings of England. Pop. 20,300.

WINDSOR CASTLE

Windsor, a town of Ontario, Canada, on the Detroit river, in a fruit-growing district; with a motor-car manufacturing industry. Pop. 63,000.

Windsor, Duke of, the title taken by King Edward VIII. (q.v.) of Great Britain after his abdication in 1936.

Windsor, Royal House of. This name was assumed by proclamation of King George V., July 17, 1917. Comprising all descendants, in the male line, of Queen Victoria, who are subjects of these realms, other than married female descendants, it includes at present, besides King George VI., Edward, Duke of Windsor; the King's daughters Elizabeth (b. 1926) and Margaret Rose (b. 1930); Henry, Duke of Gloucester; George, Duke of Kent, his son Edward (b. 1935), and his daughter Alexandra (b. 1936); Arthur, Duke of Connaught, and his grandson Alastair Arthur, Earl of Macduff (b. 1914). Queen Mary, and others that have married male Windsors, also bear the name.

Windsor Castle, the principal residence of the English royal family, on the banks of the R. Thames at Windsor, Berks. It dates from 1070, when William I. erected a fortress by the riverside, laid out extensive parks around it, and held his court there. It has been repeatedly altered, enlarged and embellished by subsequent monarchs. Edward III. rebuilt the royal palace on a sumptuous scale, enlarged the castle with additional towers, and erected a keep and, near it, a high tower named the Winchester Tower (after William of Wykeham, bishop of Winchester). He also erected the collegiate church of St. George, which underwent a great deal of restoration work in 1936. The famous terraces were added in the reign of Elizabeth. Various parts of the old building were removed by George IV., who built an additional storey and splendid gateway entrances.

Windward Islands, a group of the, belonging to Britain, extending from Martinique to Trinidad. They include Grenada, St. Vincent, St. Lucia and the Grenadines. There is a governor in common, but for other purposes the islands are independently administered. The total area is 522 sq. m. Pop. 181,000.

Windward Passage, a channel leading into the Caribbean Sea, between the islands of Cuba and Haiti.

Wine, the fermented juice of the grape (q.v.). The chief wines in modern use are Spanish and Portuguese (port, sherry and Madeira), French (Bordeaux, Champagne, Sauternes, Burgundy), German (Riesling, Moselle),

Hungarian (Tokay), Italian (Chianti, Marsala) and Australian, South African and American imitations of these vintages are now being produced in large quantities. Wines are usually differentiated by colour, flavour, hardness or softness to the taste, and their quality of being either still or sparkling, and these differences depend on soil and sunshine and the process of manufacture. The stronger contain up to 25 per cent. of alcohol, being often fortified with brandy or other spirit, and the lighter from about 7 or 8 per cent.

Wingfield Sculls, an annual sculling race rowed on the Thames from Putney to Mortlake in July; it is in effect the amateur sculling championship.

Winkelried, Arnold von, Swiss national hero, who on the field of Sempach, 1386, is said to have rushed on the lances of the opposing Austrians, and so opened a way for his compatriots to dash through and win the day. His actual existence is a subject of controversy.

Winnington-Ingram, Rt. Rev. Arthur Foley, English ecclesiastic; serving first as a chaplain to the Bishop of Lichfield, he became rector of Bethnal Green in 1895, a canon of St. Paul's in 1897, and Bishop of London in 1901; from his early days he was actively associated with the High Church party. (1858-).

Winnipeg, formerly Fort Garry, a trading post of the Hudson Bay Co., now the capital of Manitoba, Canada, at the junction of the Assiniboine with the Red R., over 1,400 m. N.W. of Montreal, on the Canadian Pacific R. lway. It is the site of the Manitoba university, and is one of the greatest grain trading centres of the world, manufacturing also lumber, clothing, and other goods. Pop. 215,800.

Winnipeg Lake, a lake in Manitoba, 40 m. N. of the city, 280 m. long, 57 m. broad, and covering an area of over 8,000 sq. m. The Saskatchewan R. and Red R. of the N. flow into it, and the Nelson flows out.

Winnowing, separating grain from wind or a current of air. A winnowing basket was a broad shallow basket with a handle at each end, used in primitive ages for throwing grain into a wind and catching it again when the chaff had blown away. The separating process is nowadays performed by machinery.

Winstanley, Henry, English engineer; builder, in 1696, of the first lighthouse on the Eddystone rock at Plymouth, a timber erection which perished in a storm, with its builder, in 1703.

Winter, the coldest season of the year, beginning when the sun reaches its lowest position in the sky at noon, extending in Great Britain from the end of December to the end of March. It is marked by the absence of leafage from deciduous vegetation, and in the case of many animals by a state of hibernation.

Winter Aconite

(*Eranthis hyemalis*), a low herb with a stout creeping root stock and pale yellow flowers, found in western Europe from Belgium southward.

Winter Cherry

(*Physalis Alkekengi*), a solanaceous plant cultivated in gardens. Its highly coloured inflated calyx is its one attraction, for the cohering sepals so enclose the other organs of the flower as to hide them completely from sight.

WINTER ACONITE

Wintergreen (*Pyrola rotundifolia*), a plant of the order Ericaceae, a small hardy perennial evergreen herb, favoured for partially shady borders or rockeries. *Gaultheria procumbens*, or American Wintergreen, is an aromatic plant with red berries. Oil of wintergreen, distilled from the leaves, is used in medicine for rheumatism and for flavouring; and also in perfumery.

Winter's Bark, the bark of *Prunus winteri*, a S. American evergreen tree of the order Magnoliaceae, somewhat like cinnamon. The bark is used as a tonic and as a remedy for scurvy.

Winterthur, town of Switzerland, in canton Zurich, 17 m. N.E. of Zurich. It has mineral springs and manufactures engines, textiles and wine. Roman remains have been found near. Pop. 54,000.

Wireless Reception. When waves fall on the aerial of a receiving set a high frequency alternating current is produced in the aerial, similar to, but much weaker than, the current in the aerial at the transmitting station (see **Wireless Transmission**). Frequency is of the order of 1,000,000 cycles per second, and the intensity of this current fluctuates with a frequency equal to that of the sound transmitted—a frequency between 50 and 10,000 cycles per second. In the receiving set the current from the aerial is amplified or increased in intensity, and rectified—that is, a current is produced which flows always in the same direction in its circuit, but fluctuates in intensity correspondingly with the current from the aerial. A moving-coil loud speaker contains a coil of wire suspended between the poles of a permanent magnet. The coil is attached to the apex of a cone made of cloth or paper, and if a current is passed through the coil the coil moves, displacing the cone outwards (say). If the current is reversed the coil moves inwards. The movements of the cone cause the compression of the air near it, and a number of such compressions rapidly following each other result in the production of a train of waves perceived by the ear as sound. The current set up in the aerial of the receiving set is too feeble to operate a loud speaker, and must therefore be amplified by means of one or more thermionic valves (see **Valves, Radio**). The action of a valve as an amplifier depends upon the fact that, if a weak alternating current flows in a circuit which includes the filament and the grid, it alters the potential difference between them, and causes comparatively large fluctuations of the current flowing between the filament and the anode.

Wireless Transmission consists in the production in the ether of waves of such a nature that, by their aid, the sounds produced in a broadcasting studio can be reproduced at other places. The nature of the wireless waves may be pictured as follows. If a stone is dropped into a lake, across the surface of which waves are travelling, the stone produces ripples of short wave length. In water the height of the main waves (the vertical distance between a trough and a crest) is greater than that of the ripples, and the two sets of waves travel at different speeds. If, however, we concentrate our attention on the ripples which are travelling in the same direction as the main waves, and imagine them to travel at the same speed as the main waves and to have a height somewhat greater than that of the main waves, we have a picture of the waves sent out by a broadcasting station. The ripples now correspond to the carrier wave (whose wave length is characteristic of the station), and the long waves correspond to modulations of the carrier wave. The wave length of these modulations is deter-

mined by the pitch of the sounds which fall on the microphone at the broadcasting station. The transmitting microphone is, in principle, merely a telephone transmitter (see **Telephone**) by means of which sound waves produce fluctuations of electric current, but it must be carefully designed to ensure that it responds equally well to notes of every pitch over a wide range. The fluctuating current from the microphone is amplified by means of thermionic valves, and is then impressed on a high frequency current produced in an oscillatory circuit. After further amplification the resulting current passes to the transmitting aerial, where it produces ether waves of the type described above.

Wireworm, the larva of various click-beetles, so named from their slenderness and the hardness of the integument; they are often very destructive to the roots of plants. The name is also applied to a liver fluke infesting sheep.

Wisbech, market town in the Isle of Ely, Cambridgeshire, England. An agricultural and fruit-growing centre, it has a shipping trade along the Nene. Ollcake, beer and farm implements are made. Pop. 15,000.

Wisconsin, one of the Central States of the U.S.A., situated between Lakes Superior and Michigan; the surface is chiefly of rolling prairie, and the soil fertile; yields cereals, sugar, potatoes, hops, hemp, and large quantities of lumber from the forests; lead, iron, copper, and silver are among its mineral resources; it abounds in beautiful lakes; the Wisconsin and the Chippewa are the chief rivers, tributaries of the Mississippi; and Madison (the capital), Milwaukee, Racine, and Kenosha are the chief towns. Area, 56,060 sq. m. Pop. 2,939,000.

Wisdom of Solomon, a book of the Old Testament Apocrypha, written at the close of the 2nd or during the 1st Century B.C. by one who knew both the Greek language and Greek philosophy, to commend the superiority to this philosophy of the divine wisdom revealed to the Jews.

Wishaw, industrial town of Lanarkshire, Scotland, on a coalfield, 15 m. S.E. of Glasgow. It has iron and steel works, blast furnaces and railway wagon works. With Motherwell it forms a burgh. Pop. (with Motherwell) 64,700.

Wistaria, a hardy climbing leguminous shrub, with blue, purple, white and mauve flowers. Several species, especially *Wistaria chinensis*, are favourite garden wall shrubs and thrive on any good soil. April and May are the flowering months.

Witch, or **Wych Hazel**, a hardy, flowering shrub, *Hamamelis virginiana*, first introduced into Britain in 1736, with clusters of yellow flowers. Its bark contains a volatile oil which is used in folk medicine as an embrocation for rheumatism and muscular complaints.

Witchcraft, the practices attributed to witches and wizards, or persons who were supposed to have entered into a compact with the devil, and thus to have obtained power to perform various acts of sorcery, usually malevolent, to predict the future, etc. Popular belief in witchcraft prevailed in England throughout the Middle Ages, and was entertained even by learned men. Witchcraft was indictable by common law, and was later made a felony by statute, the penalty for the convicted witch being death. Many hundreds of accused persons,

WISTARIA

mostly women, were put to death as witches, especially in Scotland, where prosecutions continued until well into the 18th Century, many revolting barbarities being practised on the accused.

Witch of Endor, a divining woman Saul, who affected to call up the spirit of Samuel, who foretold the king's defeat and doom.

Witenagemot (assembly of the wise), name given to the national council or Parliament of England in Anglo-Saxon times, through whose decisions the affairs of the kingdom were managed. It consisted of the bishops, royal vassals, and thanes, but historians differ on the point whether the Assembly was actually representative of the people (i.e., freemen) or was mainly a feudal institution.

Witney, market town of Oxon., England, 10 m. W. of Oxford, on the Windrush. Gloves and woollen goods are made, but it is chiefly noted for its blankets. Pop. 5,000.

Wittenberg, a town in Prussian Saxony, on the right bank of the Elbe, 50 m. SW. of Berlin; was the capital of the electorate of Saxony, and a stronghold of the Reformers; is famous in the history of Luther, and contains his tomb; it was on the door of the Schlosskirche there that he nailed his famous 95 theses, and at the Elster Gate burned the Pope's bull. Pop. c. 25,000.

Witwatersrand, district of the Africa, generally abbreviated to "Rand," a ridge of land extending about 40 m. E. and W. and centred at Johannesburg, and the world's richest gold-bearing district.

Woad (*Isatis tinctoria*), a plant of the family Cruciferae. It yields a blue dye obtained from the root-leaves; it is said to have been used by the ancient inhabitants of Britain for staining their bodies.

Wodehouse, **Pelham Grenville**, English humorous author, born at Guildford. Best known through the *Pemith* series (beginning with *Mike*, 1909) and the *Jeeves* series (beginning with *The Inimitable Jeeves*, 1924). He has also written musical comedies, including *Kissing Time*, *The Golden Moth*, etc., and other plays. (1881-).

Woden, the German and Anglo-Saxon name for Odin (q.v.).

Woffington, **Peg (Margaret)**, English actress, born at Dublin, who made her first appearance in 1737, and in London at Covent Garden in 1740, in a style which carried all hearts by storm; she was as charming in certain male characters as in female. Her life-story was the subject of a novel by Charles Reade. (c. 1715-1760).

Woking, town of Surrey, England, 20 m. SW. of London; a railway centre, growing in popularity as a residential outer suburb for Londoners. It has a Mohammedan mosque. Pop. 39,000.

Wokingham, borough of Berkshire, England, 7 m. SE. of Reading, at the edge of Windsor Forest. Its old buildings include the church, almshouses, and the Rose Inn. Pop. 7,300.

Wolf (*Canis lupus*), a carnivorous animal of the family Canidae, of which there are several varieties, differing only in minor particulars. The chief are the European and the Canadian. The latter has finer and denser fur than the former and broader feet. The furry pelts have considerable commercial value, though the hair of the northern varieties is longer and coarser than the southern European. The wolf is some 5 ft. in length and stands about 2½ ft. high, is generally greyish-yellow in colour, has a

drooping tail, pointed upright ears and obliquely-set eyes. The animal hunts in packs, but only attacks man when driven by hunger. It is still found in Europe in the Pyrenees, parts of the Balkan lands, and in Russia and Poland. The prairie wolf or coyote (*Canis latrans*) of the Western U.S.A. is a smaller, reddish animal.

Wolf, Friedrich August, German classical scholar, born near Nordhausen; studied at Göttingen; was professor of Philology at Halle; became world-famous for his theory of the Homeric poems, maintaining that the *Iliad* and the *Odyssey* were originally a body of independent ballads handed down by oral tradition, and gradually collected into two groups, which finally appeared each as one, bearing the name of Homer, who was probably the first to attempt to weave them severally into one. His theory, first made public in 1735, gave rise to a controversy which maintained itself for a long time. (1759-1824).

Wolf, Hugo, Austrian composer; born at Wundschgraz, S. Styria. His whole musical activity was devoted to song composition, his work including settings for Lieder by Goethe, Heyse, Mörike, and other German poets. His later life was clouded by insanity. His reputation has greatly increased since his death. (1860-1903).

Wolfe, **Charles**, Irish poet, author of the *Burial of Sir John Moore*, born in Dublin; became an Irish clergyman; died of consumption. (1791-1823).

Wolfe, **James**, English general, born at Westerham, Kent, son of a lieutenant-general who served under Marlborough; was present at the battles of Blenheim, Fontenoy, Falkirk, and Culloden, and served in the expedition against Robohefort. Pitt appointed him to a command in Canada; here he distinguished himself first at the siege of Louisbourg, and then by the capture of Quebec, where he fell at the moment of victory over the French under Montcalm. (1727-1759).

Wolf-Fish, the common name of the hichadide, allied to the Blennies and included in the same sub-order (Blennioidei). They occur in northern waters, some species growing to 5 ft. in length. At least 3 species occur in British waters, the most important being the Common Wolf-fish (*Anarrhichus lupus*), the thick skin of which, known as "sea-leopard," makes excellent leather and the flesh excellent food, being marketed usually as "Rock salmon," and seldom as the complete fish on account of its ugliness.

WOLF-FISH

Wolf-Hound, a type of dog formerly bred and trained for hunting wolves. There are, and were, two main types, the Russian Borzoi (q.v.), and the Irish Wolf-hound (q.v.).

Wolfram, as ferrous tungstate. It occurs in Cornwall, Spain, Malaya, Australia, Colorado, etc., and is the chief source of the metal tungsten (q.v.).

Wolf's Bane. See *Aconite*.

Wollstonecraft, **Mary**. See *Godwin*.

Wolseley, **Garnet Joseph, first Viscount**, British field-marshal, born in co. Dublin, of a Staffordshire family; entered the army in 1852; served in the Burmese War of 1852-1853, in the Crimean War, where he was severely wounded, in the Chinese War of 1860, and afterwards in Canada; commanded in the Ashanti War in 1878, and

received the thanks of Parliament, with a grant of £25,000, for "courage, energy, and perseverance" in the conduct of it, and after services in Natal, Egypt, and Ireland was made field-marshal in 1894, and commander-in-chief in 1895. (1833-1913).

Wolsey, Thomas, English cardinal, wool-merchant; born at Ipswich, son of a leger, Oxford; entered the Church early, and was promoted to the deanery of Lincoln; subsequently secured one bishopric, after another until his revenue accruing therefrom equalled that of the Crown itself, which he spent partly in display of his rank and partly in acts of munificence; of the latter the founding of Christ Church College at Oxford was one, and the presentation of Hampton Court Palace, which he had built, to the King was another. Under Henry VIII. he obtained the chancellorship of the kingdom, the cardinal's hat and other favours. He refused to sanction his master's marriage with Anne Boleyn, and was driven from power and bereft of all his possessions. Finally, though restored to the see of York, he was arrested on a charge of treason, taken ill on the way to London, and died at Leicester. (c. 1471-1530).

CARDINAL
WOLSEY

Wolstanton, urban district of Staffordshire, England, in the Potteries, near Newcastle-under-Lyme. Here are steel works, cotton mills and engineering works in addition to potteries. Pop. 30,000.

Wolverhampton, a large town in Staffordshire, England, 12½ m. N.W. of Birmingham, in the midst of coal and iron fields; the centre of a group of towns engaged in different kinds of iron manufacture, especially locks and keys, and the metropolis of the Black Country. Pop. 142,000.

Wombat, a group of Australian and Tasmanian fur-bearing, burrowing marsupials all placed in the family Phascogomyidae. They have some resemblance to the rodents and are clumsily built animals with little tail, short ears, etc. There are four species, ranging up to 100 lb. in weight and having a thick woolly coat. They are vegetarian feeders. The flesh is edible.

Wood, the hard fibrous substance which composes the body of a tree and its branches, and is found between the pith and the bark. In dicotyledonous plants, wood is composed of the external albumen or sapwood, and of the duramen or hard wood within. In monocotyledonous plants the hardest part of the wood is nearest the circumference, while the interior is composed of cellular tissue. The word "timber" implies not only standing trees suitable for buildings, etc., but also such trees cut into beams, rafters, boards, and planks. Wood pulp is the principal raw material for papermaking; used also for the manufacture of artificial silk. See also **Mahogany**, **Oak**, **Walnut**, etc.

Wood, Sir Evelyn, British soldier, born in Essex; served in the Indian Mutiny, where he gained the V.C., also in the Ashanti, Zulu, and Transvaal (1880-1881) Wars, and in Egypt in 1882. He was a British general in the Boer War. (1838-1919.)

Wood, Sir Henry Joseph, British musical conductor, born in London; studied under several masters, including Garcia, and at nineteen began to conduct. He conducted the first Queen's Hall Promenade Concerts when only 25, and his name became inseparable from them; he also conducted a Handel Festival, and at leading concerts in England, besides visiting America. He has introduced

the works of many composers, both foreign and native, to the British public. He was knighted in 1911. (1869-).

Wood, Mrs. Henry, (née Wrice), English novelist, born in Worcestershire; her best novels *The Channings* and *Mrs. Halliburton's Troubles*, though her most popular was *East Lynne*. She wrote some 30 books in all. (1814-1887.)

Wood, Rt. Hon. Sir (Howard) Kingsley, British politician, a solicitor by profession. He entered the L.C.C. in 1911 and the House of Commons in 1914; was Parliamentary Secretary to the Ministry of Health, 1924-1929, and to the Board of Education, 1931; Postmaster-General, 1931-1935; Minister of Health, 1935-38; Secretary of State for Air, 1938. (1881-).

Woodbine. See **Honeysuckle**.

Wood Carving, for purposes of practised since very early times, has been reached a specially high level among the negro races of West Africa, whose carvings have been found very suggestive by modern Western practitioners of the art. European wood-carving reached its greatest heights as an art subservient to Gothic architecture, the rood screens, lecterns, pulpits, etc., of many medieval churches reaching a very high level of skilled execution and beauty. The art has also been pursued with success in China and Japan. The most suitable woods for the purpose are oak, mahogany, chestnut, teak, sycamore, and American walnut.

Woodchuck (*Marmota monax*), a small North American burrowing rodent, of the marmot group, about 1½ ft. in length, with a stout body, broad flat head, short stocky legs, and grizzled or black fur, chestnut coloured beneath.

Woodcock (*Sceloporus rusticola*), a game bird of the Plover family, with variously mottled yellow, black, and dusky brown plumage. It is about a foot long, feeds on wet and marshy ground, and hides among thorns and briars, being difficult to distinguish from dead leaves. It is a silent bird, seldom crying when flushed, and has a very swift flight.

Woodcut, an impression on paper, or as a separate broadsheet, from an engraving made in wood. Printing from wooden blocks has been in use in the East for many centuries, being far older than printing from moveable types, and the colour work of Chinese and Japanese wood-engravers is unsurpassed. In the West woodcuts are generally printed in black and white only; the present century has seen a great revival of the art, among whose best known practitioners in Great Britain are Eric Gill, Gwendolen Ravera, Paul Nash and Clare Leighton.

Woodford, district in Essex, England, a rapidly developing residential suburb of N.E. London, part of the borough of Wanstead and Woodford. Pop. (with Wanstead) 53,000.

Wood Green, borough of Middlesex, of London, between Hornsey and Southgate, mainly residential in character. The Alexandra Palace is within the district. Pop. 53,600.

Woodhall Spa, small town and inland resort in Lincolnshire, England, frequented on account of its bromo-iodine springs discovered early last century. Pop. 1,300.

Woodlouse (Oniscoidae), a sub-order of land-living, air-breathing crustaceans with fourteen legs, very prolific in damp places, especially under logs of wood or decaying timber. They are also sometimes known as "slaters." One of the commonest

of the garden species is *Porcellio scaber*. The Pill Woodlouse is so named from its habit of rolling itself up into a ball.

Woodpecker, the common name of *Picidae*, of world-wide distribution. There are nearly 400 species, divided into true woodpeckers, piculets and wrynecks. The best known in Britain are the Great Spotted (*Dryobates major*), Green (*Picus viridis*), and Lesser Spotted (*Dryobates minor*). The woodpecker is brightly coloured in combinations of green, yellow, black and white, with brilliant crimson on crown and back. The Great Spotted Woodpecker has a distinctive call-note made by striking a hollow branch with its bill so rapidly as to give the effect of a drumming sound.

GREEN
WOODPECKER

Wood Pulp. See **Paper**. **Artificial Silk.**

Woodruff (*Asperula odorata*), a small Eur.

rubaceous plant, with small white flowers, found in shaded hedgerbanks and copses throughout Europe except in Spain and Portugal; used in perfumery and to flavour wine.

Wood Spirit, name commonly given to methyl alcohol. See

Methylated Spirit.

Wood-Sorrel (*Oxalis acetosella*), a perennial herb of the geranium (Geraniaceae) order found wild in Britain. It bears white flowers veined with purple or pink from May onwards. The leaves, like those of some other plants, "sleep" at night and in cold weather. The seed pods burst and discharge themselves at the slightest touch.

Woodstock, a small market town in Oxfordshire, England, on the Glyme, 8 m. NW. of Oxford, once a Royal manor, near which is Blenheim Park (q.v.). Pop. 1,500.

Wool, the short, soft hair which grows on sheep and some other animals, such as the alpaca, and some species of goats, which in fineness sometimes approaches fur. Sheep's wool is the most important material of clothing in all cold and temperate climates. Zoologically, there are three distinct types of sheep, but the domestic variety, *Ovis aries*, is the most numerous and yields the best of the commercial wool fibres. Wool is generally classified into short or carding, and long or combing wool, each class being further divided into varieties according to the fineness of the staple—the finest wools being of short, and the coarser of long, staple. Great Britain has exported wool for centuries, and the English sheep produce a good strong combing wool classified in the trade as "lustre," "demi-lustre," "down" and "mountain." The finest carding wools were obtained from Spain, the country whence came the famous merino breed of sheep, the introduction of which into Victoria laid the foundation of the great sheep-rearing industry of Australia; and to-day, Great Britain, though herself rearing a greater number of distinct varieties of sheep than any other country, obtains her chief wool supplies from Australia, New Zealand and South Africa. So far as English-grown wools are concerned, Leicester and Wensleydale are good lustre varieties and are used in making worsted dress fabrics, linings and braids. The Cheviot is the best demi-lustre wool, and is used for overcoats, suits and serges. Down wool (especially Southdown), a fine crimp variety, is the best of all English-grown wools, and is used for hosiery yarns and for high quality woollen cloths. Mountain wools are inferior in quality,

but are useful for making home-spun tweeds and for carpets.

Woolf, Virginia, British novelist, born in London, daughter of Sir Leslie Stephen, married, 1912, Leonard Woolf, publisher. Her chief stories are *Mrs. Dalloway*, *The Voyage Out*, *Night and Day*, *Orlando*, *A Room of One's Own*, and *The Waves*. (1882-).

Woolsack, the seat of the Lord Chancellor, as Speaker of the House, being a large square cushion of wool covered with red cloth, without either back or arms. It is said to have originated in Elizabeth's reign, when wool was a staple commodity.

Woolwich, metropolitan borough of London, England, 9 m. SE. of the City, mainly on the S. bank of the Thames, but with a small detached portion on the N. bank. It contains the chief military arsenal in the country, with a gun factory, ammunition factory, laboratory, etc., and is an important military station and the seat of the Royal Military Academy. Pop. 148,500.

Woolworth, Frank Winfield, American business man and pioneer of the cheap stores associated with his name. He founded his first store at the age of 27 with a capital of under £100; when he died he owned 800 stores in the United States and Canada, besides several in England, and left a fortune of £9,000,000. The Woolworth Building, the New York headquarters of his companies, is 792 ft. high and cost £3,000,000. (1852-1919).

Worcester, the county town of Worcestershire, England, on the left bank of the Severn, 26 m. SE. of Birmingham. It has a small but interesting Gothic cathedral; is famous for its blue porcelain ware and other industries, particularly glove-making; was the scene in 1651 of a victory of Cromwell over the Royalists. Pop. 52,800.

Worcester, second city of Massachusetts, U.S.A., on the Blackstone R., 45 m. SW. of Boston. Its many industries include the manufacture of woollens and silk, firearms, tools, carpets, envelopes, and shoes. Pop. 195,000.

Worcestershire, an agricultural and pastoral English county in the valley of the Severn, the N. part of which is the Black Country, rich in coal and iron mines, and the SW. occupied by the Malvern Hills, while the S. is famous for its orchards and hop-gardens; it has also extensive manufactures at Worcester, Dudley, Kidderminster, Stourbridge, Oldbury, and Hale-owen. Area, 800 sq. m. Pop. 420,200.

Wordsworth, Dorothy, sister of the poet William Wordsworth. She acted as his housekeeper for a long period, and her *Journals*, published after his death, afford much information about him. (1771-1855).

Wordsworth, William, English poet, born at Cockermouth; educated at Hawkshead Grammar School and at St. John's College, Cambridge; travelled in France at the Revolution period and was attracted for a time by republicanism; fell in with Coleridge, visiting Germany in company with him, and on his return settled in the Lake District; married Mary Hutchinson, and received a lucrative sinecure appointment as distributor of stamps in the district; took up his residence first at Grasmere and finally at Rydal Mount. He began his career in literature by publishing, with Coleridge, *Lyrical Ballads*; finished his *Prelude* in 1806, and produced his *Excursion* in 1814, after which followed

WILLIAM
WORDS-
WORTH

a long succession of miscellaneous pieces; he succeeded Southey as poet-laureate in 1843. He is emphatically the poet of external nature. (1770-1850).

Work, in physics, is the result produced by a force acting upon a body so as to move it in the line of direction of the force. It is measured by the product of the magnitude of the force and the distance moved in the direction of the force. In other words work is force multiplied by distance. The unit in which it is usual to measure work is the foot-pound, representing the amount of work done by a force equal to the weight of one pound when the body on which it acts moves one foot in the direction of the force; it is the work done in lifting a mass of one pound through a distance of one foot. Any body or any system of bodies which is capable of doing work is said to have energy (*q.v.*).

Workington, borough and seaport of Cumberland, England, at the mouth of the Derwent, 6 m. N.E. of Whitehaven. Coal and iron are worked, and there are ship-building yards, engineering works, steel works, etc. Pop. 27,700.

Workmen's Compensation.

By the Workmen's Compensation Act, 1925, and the rules made thereunder, employers are liable for compensation to their workmen in cases of injury incurred at their employment, and in the case of certain industrial diseases; in the event of the employee's death his dependants are entitled to compensation in similar circumstances. Compensation is not payable if the injury is due to the serious and wilful misconduct of the worker. Compensation in case of death is by a lump sum; in that of total or partial incapacity by weekly payments of not exceeding thirty shillings. The actual amount of compensation payable in any given case is based upon the worker's previous earnings. The act applies to most wage-earners in receipt of a wage not exceeding £350 per annum.

Works, Office of, the government department in England which controls the royal palaces and parks, government buildings, and a large number of castles and monuments throughout the country that have been acquired for the nation. The department dates from 1832, and is in charge of the First Commissioner of Works, frequently a member of the cabinet.

Workshop, borough of Nottinghamshire, England, 12 m. N.E. of Mansfield. It has remains of a Norman Abbey. Malting and the making of chemicals are carried on. Pop. 27,400.

Worm, popular name for a large number of animals of several classes, with few characteristics in common except their shape. The earthworm is the typical representative of the class Annelida, or bristle worms. The common earthworm (*Lumbricus agriicola*) is formed of rings or annuli, terminating in a pointed head and tapering tail; it has no feet, but on each ring are 4 pairs of minute bristles, forming longitudinal rows, which assist progression. The worm is eyeless and has no gills and apparently breathes through the whole of its skin. It is almost nocturnal and feeds on vegetation. The Lobworm (*q.v.*), or lugworm, is a segmented marine species.

Worms, German town in Hesse-Darmstadt, in a fertile plain on the left bank of the Rhine, 40 m. S.E. of Mainz, with a massive Romanesque cathedral having two domes and four towers. It was here the Diet of the empire was held under Charles V., before which Martin Luther appeared on April 17, 1521. There is an ancient and renowned synagogue, and many manufactures, including tobacco, soap, and machinery. Pop. 51,300.

Wormwood. See *Artemisia*.

Worthing, town and holiday resort in England, on the W. Sussex coast, 10½ m. S.W. of Brighton. Pop. 55,500.

Wounds may be either cuts or incised wounds produced by sharp-edged instruments; stabs or punctured wounds, made by the thrusts of pointed weapons; contused wounds, caused by hard blunt objects; lacerated wounds, in which there is tearing, as by some rough instrument; wounds complicated by poison; and gunshot wounds. Wounds which have severed only muscles and the blood-vessels and nerves connected with them heal more easily than those which affect the tendons; and those made by a sharp weapon heal more quickly than severe bruises. When an artery is severed, bright red blood is ejected by spurts; but a cut vein produces a slower issue of dark blood. Even in the case of an artery, the blood soon tends to flow less freely, and an external coagulum forms which ultimately stops the flow. The severed portions of a vessel should be kept together till they are naturally re-united. In unfavourable cases, tetanus or pyæmia, or both, may result.

Wound-Wort. See *Betony*.

Wrangel, Baron Peter Nicolaiievich, Russian general, born at St. Petersburg. He entered the army, fought in the Russo-Japanese War and held a command in the World War. After the 1917 revolution he became prominent as a leader of the anti-Bolshevik forces, or White Russians, being defeated by the Bolsheviks in 1920. He later became a mining engineer in Belgium. (1879-1928).

Wrangel Island, bare rocky island of the Arctic Ocean, off the coast of the Far Eastern Area of Siberia. It is separated from the mainland by Long Sound. Area, c. 2,000 sq. m.

Wrangler, name given at Cambridge University to those placed in the first class of Part II. of the Mathematical Tripos. The man heading the list was formerly known as the Senior Wrangler, but the names are no longer placed in order of merit.

Wrasse (Labridæ), a family of marine fish, comprising some 500 shallow-water, crab- and shell-fish feeding species found on rocky bottoms. They are mostly characterized by having thick prehensile and telescopic lips. Many are found in tropical waters. The chief British species is the Ballan Wrasse (*Labrus maculatus*).

BALLAN WRASSE

Wrath, Cape, the extreme NW. promontory of Scotland, in Sutherlandshire, a granite cliff, 300 ft. high, surmounted by a lighthouse.

Wrecks, subject to certain restrictions, were formerly Crown property. By the Merchant Shipping Acts, owners of wrecked ships, goods, and cargo, are now entitled to claim their property as against the Crown within a year; but they must satisfy salvage claims. Finders of wreck must deliver their finds to district receivers of wreck. The following things are, in law, wreck: flotsam (things found floating near shore); jetsam (things thrown overboard to save ship); ligan (things tied to a buoy, etc., for preservation). Wreckage unclaimed for a year and a day passes to the Crown.

Wrekin, an isolated hill in Shropshire, England, 2 m. S.W. of Wellington, believed to have been once an active volcano. It is 1,320 ft. high, and there are ancient earthworks on its summit.

Wren, the popular name for any bird of the Troglodytidae family, especially *Anthus troglodytes*, the common wren, widely distributed over the British Isles and the Old World. It is about 4 in. long, has a reddish-brown plumage, slender and rather long bill.

Wren, Sir Christopher, English architect, born at East Knoyle, in Wiltshire; was early distinguished in mathematics and mechanics, and soon became notable for his skill in architecture, and received a commission to restore St. Paul's, London, but on its destruction in 1686 was appointed to design and erect an entirely new structure. For this he had prepared himself by study abroad, and he proceeded to construct a new St. Paul's after the model of St. Peter's at Rome, a work which, as it occupied him from 1675 to 1710, took him 35 years to finish. He died at the age of 90, and was buried in the cathedral with this inscription, "Si monumentum requiris, circumspice" (If you seek his monument, look around.) Many famous London churches, including St. Stephen's, Walbrook, and St. Bride's, Fleet Street, were designed by him, together with Chelsea Hospital, Marlborough House, and part of Windsor Castle. He was one of the founders of the Royal Society. He was knighted in 1672. After being elected to Parliament in 1689 he was unseated. (1632-1723).

Wren, Percival Christopher, English novelist; educated at Oxford; served in French and Indian armies; for a time assistant-director of public instruction in Bombay presidency. Among his works are *The Wages of Virtue*, 1916; *Brave Geste*, 1924; *Beau Sabreur*, 1926; *Mammon of Righteousness*, 1930; *Bubble Reputation*, 1936. (c. 1873-).

Wrestling, an ancient athletic exercise, which remained popular throughout the Middle Ages, but has to-day lost a good deal of its popularity, though in recent years there has been some slight revival of "all-in" wrestling. Greek wrestling involved trying to throw the opponent and the ground struggle, the body being rubbed with oil. Roman wrestling was merely an imitation of later Greek. The modern so-called Græco-Roman form, which obtains in the Olympic Games, requires holds to be above the waist and allows the ground struggle but not tripping. In the catch-as-catch-can or Lancashire style there are both tripping and ground struggle and the match is lost only when both shoulders touch the ground at the same time. Similarly in the Cornwall style, the preliminary hold is made by the catch. The Cumberland style involves a preliminary grip, each wrestler passing his left arm over the right shoulder of his opponent, his right arm under his opponent's left arm and gripping the wrist behind the back; tripping is allowed, and if any part of the person, excepting the feet, touch the ground the match is lost, there being no ground struggle.

Wrexham, town in Denbighshire, North Wales, 12 m. SW. from Chester, in the centre of a mining district, and famed for its breweries. Pop. 23,600.

Wright, Orville, (1871-) and **Wilbur**, (1867-1912), American aero-

nauts; began experiments with a glider in Carolina in 1900, and in 1903 built a machine fitted with a petrol engine; on Dec. 17 that year they flew for 300 yds., the first successful flight ever made. The Wright brothers were thus the real pioneers of aeroplane aviation.

WRIGHT BIPLANE

Wrinkles, creases in the skin such as those produced by age. Senile atrophy of the skin is due to metabolic disturbances, and altered relations of waste and repair, which are characteristic, in varying degree, of all the tissues (q.v.) of the body, and is a degenerative process; the skin, besides being wrinkled, becomes loose, dry and yellowish. Long residence in the tropics is apt to promote wrinkles.

Writers to the Signet, a body of solicitors in Scotland who had at one time the exclusive privilege of practising in and drawing up cases for the supreme courts of the country, and whose privileges are now limited to the preparation of Crown writs.

Writing may be divided into ideographic and phonographic, i.e., into signs representing the things symbolized by words and signs representing sounds. Chinese characters are practically ideographic. Egyptian hieroglyphs and Mexican picture-writing are examples of both kinds blended. The art of writing seems to have been introduced to the Western world about 1,500 B.C. by the Phœnicians, whose writing was probably based on Egyptian. Egyptian writing was of three kinds: hieroglyphic, hieratic (of the priests) and demotic. The Greeks at first wrote from right to left, next alternately from right to left and from left to right; writing from left to right is believed to have been introduced only in Homer's time. Ancient Greek and Roman writing did not separate the words by spaces or by punctuation. Medieval MSS. reveal a variety of styles of writing at different periods. Uncial (characters partly resembling modern capitals) writing is found in 4th-8th Century MSS. Gothic characters in the 13th Century. Both Roman and Medieval MSS. were often illuminated—a luxurious mode of coloured embellishment. The English Court hand, adapted from the Saxon, prevailed from the 16th Century to the time of George II. Prior to the Roman occupation there was probably no writing in Britain.

Writ of Execution, a writ, directed to the sheriff or other proper person, commanding him to take certain compulsory proceedings for the purpose of carrying into effect a judgment of the Court. There are several such writs, e.g., a writ of *fi. fa.* (*fiat facias*), the ordinary form of writ, which authorizes the seizure and disposal of the judgment debtor's goods; writ of attachment of debts, i.e., a writ authorizing the judgment creditor to attach debts owing to the judgment debtor; writ of possession in an action for the recovery of land; writ of sequestration (q.v.).

Writ of Summons, the formal document by which a High Court action is commenced. If the defendant wishes to dispute the claim, he must "enter an appearance," usually within 8 days, otherwise judgment will be given against him. The writ must, before it is issued, be indorsed with a statement of the nature of the claim and the relief or remedy sought. Also, the formal document calling peers to Parliament. Under Magna Carta, the greater barons were to receive a special, the lesser barons a general writ. A baron whose ancestor has been once summoned, and has once sat in Parliament, can claim an hereditary right to be so summoned.

Wryneck, a sub-family (Jyninae) of birds included in the Woodpecker family. There is only one genus (*Jynx*) and only 4 species, having long tails of soft feathers and mottled plumage not unlike that of the Nightjar. One species, the Common Wryneck (*Jynx torquilla*) is a summer visitor to Britain. It nests in holes in trees in woods and hedgerows and occasionally in orchards at the end of April and early May.

Wuchang, city and river port of China, on the Yangtze-kiang, capital of Hu-poh province. Across the river is Hankow. It has a university, and there are cotton mills and iron works. Pop. 800,000.

Wuhu, treaty port of China, in Anhwei province, on the Yangtze-kiang. Steel and cutlery is made, and it has an extensive trade. Pop. 138,000.

Wuppertal, a densely peopled valley in Germany, traversed by the R. Wupper, which after a course of 40 m. enters the Rhine between Cologne and Düsseldorf; the former towns of Elberfeld and Barmen, with several smaller towns, were amalgamated in 1929 to form the large steel-manufacturing town of Wuppertal. Pop. 408,600.

Württemberg, a former kingdom between Baden on the W. and Bavaria on the E.; the Black Forest extends along the W., and it is traversed nearly E. and W. by the Swabian Alps, which slope down on the N. side into the valley of the Neckar, and on the S. into that of the Danube; the soil is fertile, and is in great part under cultivation, yielding corn, vines, and fruits, agriculture being the chief industry of the population; minerals abound, the chief being salt and iron. Stuttgart is the capital; the towns, including Ulm and Heilbronn, are the centres of varied manufactures. Area, 7,530 sq. m. Pop. 2,606,000.

Würzburg, town in Bavaria, Germany, 70 m. SE. of Frankfurt; its principal buildings are the Royal or Episcopal Palace, the cathedral, and the university, with the Julius Hospital, called after its founder, Bishop Julius, who was also founder of the university, which specializes in medical studies; there are varied manufactures, including beer, machinery, scientific instruments, and tobacco. Pop. 101,000.

Wyandottes, a tribe of N. American Indians of the Inghouls stock; were nearly exterminated in 1636, but a feeble remnant of them now occupy a small district in Oklahoma.

Wyatt, Sir Thomas, English poet, courtier and statesman, born at Allington Castle, in Kent, and educated at St. John's College, Cambridge; was a welcome presence at court, a friend of Anne Boleyn, in high favour with the King, and knighted in 1537; did a good deal of diplomatic work in Spain and the Netherlands, and died on his way to meet the Spanish ambassador and convey him to London. He had travelled in Italy, had studied the lyric poets of Italy, especially Petrarch, and, along with Surrey, imported their style and metres, including the sonnet, into English verse. (1503-1542).

Wyatt, Sir Thomas, the younger, British rebel, only son of the preceding; was leader of the rebellion that broke out in 1554 in consequence of the settlement of the marriage between Queen Mary and Philip of Spain, in which, being repulsed at Temple Bar, he surrendered and was committed to the Tower, and executed. (1521-1554).

Wych Elm (*Ulmus montana*), a species of elm with much larger leaves than the common or English elm; it is widely distributed over Europe, particularly in Scotland, whence its alternative name, Scots elm.

Wycherley, William, English dramatist, born in Shropshire, and resident for a time in Paris, being admitted to the circle of the Précieuses, but returned to England at the Restoration, and became a

he succeeded to his paternal estate when he was an old man. (1640-1715).

Wycliffe, Wyclif or Wickliffe, John, the "Morning Star of the Reformation," born at Ripswell, near Richmond, Yorkshire; studied at Oxford, and became Master of Balliol in 1361, professor of Divinity in 1372, and rector of Lutterworth in 1375. He held strong anti-Papal views, and in 1382 was condemned as a heretic and his works burned, though he himself remained unmolested. His greatest work was his translation of the Bible from the Vulgate into the mother-tongue, at which, with assistance from his disciples, he laboured for some 10 or 15 years, and which was finished in 1380. He was struck with paralysis while standing before the altar at Lutterworth on December 20, 1384, and died the last day of the year. His remains were exhumed and burned afterwards, and the ashes thrown into the R. Swift close by the town. (c. 1320-1384).

Wycombe, High, or Chepping, a market town in Buckinghamshire, England, on the Wye, 25 m. SE. of Oxford; has a parish church built in the Norman style in 1273 and restored in 1887, and several well-known schools; has manufactures of chairs, lace, and straw-plait. Pop. 32,700.

Wye, a winding river in S. Wales, Severn on Pimlinmon, and falls into its estuary at Chepstow, 125 m. from its head; rapid in its course at first, it becomes gentler as it gathers volume; barges ascend it as far as Hereford, but a high tidal wave makes navigation dangerous at its mouth. Its beautiful valley is a favourite resort for walkers and holidaymakers.

Wykeham, William, of English divine, born in Wykeham, Hampshire, of humble parentage; was patronized by the governor of Winchester Castle and introduced by him to Edward III., who employed him to superintend the rebuilding of Windsor Castle, and later made him Privy Seal and Lord Chancellor; in 1367 he became Bishop of Winchester, though he fell into disgrace towards the close of Edward's reign; was restored to favour in Richard II.'s reign and once more made Chancellor. In his later years he founded New College, Oxford, built and endowed St. Mary's College, Winchester, and rebuilt much of the cathedral there. (1324-1404).

Wyndham, Sir Charles, English actor; served in the American Civil War as a surgeon; took to the stage, playing first with John Wilkes Booth; appeared in London in 1865; was successful in the management of the Criterion Theatre, where he produced and acted in *Pink Dominoes*, *Wild Oats*, *David Garrick*, *She Stoops to Conquer*, and *The School for Scandal*, among other plays; built Wyndham's Theatre and was associated many years in management with his wife, Mary Moore. (1837-1919).

Wyoming, a north-west state of the U.S.A., chiefly on the eastern slope of the Rocky Mts., an elevated region with a comparatively sparse population. It has a very rugged surface, and abounds in deep cañons and frowning precipices. The lakes are also deep, and there are immense geysers, one, the Great Geyser, throwing up a volume of water 300 ft. high. It is rich in minerals, yields good crops of various grains, rears large herds of horses and cattle, as well as game on its moors, and trout and salmon in its rivers. It includes a number of natural forests and the Yellowstone National Park. There are few manufactures; petroleum is produced in large quantities. Area, 97,550 sq. m. Pop. 225,600.

Wyvern, a heraldic device in shape of a dragon with expanded wings with only two legs and the tail of a scorpion.

were the owners of the property, and Dealer (1617). After an imprisonment for debt,

U.E.

Xavier, *St. Francis*, a Jesuit missionary, styled the "Apostle of the Indies," born at Xavier in the N. of Spain; when a student at Paris, he became acquainted with Ignatius Loyola, and was associated with him in the formation of the Jesuit Society; was sent in 1541, under sanction of the Pope, by John III. of Portugal to christianize India, and arrived at Goa in 1542, whence he extended his missionary labours to the Eastern Archipelago, Ceylon and Japan, in which they were attended with signal success. On his return to Goa in 1552 he proceeded to organize a mission to China, in which he experienced such opposition and so many difficulties that on his way to carry on his work there he sickened and died. He was buried at Goa; beatified by Paul V. in 1619, and canonized by Gregory XV. in 1622; festival, December 3. (1506-1552).

Xebec, a small

three-masted vessel with lateen and square sails, used formerly in the Mediterranean by the Algerine pirates, and mounted with guns.

Xenon, a non-metallic

element belonging to the group of the rare or inactive gases, the other members of which are helium, neon, argon, krypton and radon. Symbol Xe; atomic number, 54; atomic weight, 130.2. It is practically devoid of chemical properties and has so far met with no industrial application.

Xenophanes, Greek philosopher and founder of the Eleatic school, born at Colophon in Asia Minor; set up a philosophical school at Elea in Southern Italy, where he taught monism (q.v.). (c. 540-c. 480 B.C.).

Xenophon, Greek historian, philosopher and military commander, born at Athens; was a pupil and friend of Socrates; joined the expedition of Cyrus against his brother Artaxerxes, and on the failure of it conducted the ten thousand Greeks—"the Retreat of the Ten Thousand"—who went up with him back to the Bosphorus; served afterwards in several military adventures, brought himself under the ban of his fellow-citizens in Athens, and retired to Elis, where he spent 20 years of his life in the pursuits of country life and in the prosecution of literature. The principal of his literary works are the *Anabasis*, an account of the expedition of Cyrus and his own conduct of the retreat; the *Memorabilia*, an account of the life and teaching, and a defence, of his master Socrates; the *Hellenica*, in seven books, an account of 49 years of Grecian history in continuation of Thucydides to the battle of Mantinea; and *Cyropaedia*, being an ideal account of the education of Cyrus the Elder. He wrote pure Greek in a plain, perspicuous, and unaffected style, had an eye to the practical in his estimate of things, and professed a sincere belief in a divine government of the world. (c. 435-354 B.C.).

Xeres. See *Jerez de la Frontera*.

Xerxes, a king of Persia, son of Darius I., whom he succeeded on the throne in 485 B.C. After suppressing a revolt in Egypt, his ambition was directed to subduing Greece. This he essayed to do in 481

with an immense horde of men by sea and land; with his army he crossed the Hellespont by means of a bridge of boats; he was checked for a time at Thermopylae by Leonidas and his five hundred; advancing to Athens, he saw his fleet destroyed at Salamis by Themistocles, and fled by the way he came, leaving Mardonius with 500,000 men to carry out his purpose; but Mardonius was defeated in 479 at Platea. Xerxes was assassinated in 465 B.C. by Artabanus, the captain of his body-guard, after a reign of 20 years.

Xisco, a cardinal and statesman, born in Castile, studied at Salamanca and went to Rome, where he gained favour with the Pope; was made confessor to Queen Isabella, and in 1495 became archbishop of Toledo, and was largely responsible for the policy of Spain from that time until his death. He was made a cardinal in 1507, and after the death of King Ferdinand was regent of Spain until the arrival of Charles V. He was founder of the University of Alcalá. (1436-1517).

Xingu, a river in Brazil, which rises in the heart of the country, and after a course of 1,300 m. falls into the Amazon 210 m. W. of Para.

X-Rays, discovered by Röntgen in 1895-1896, are, like light, heat and electric energy, a type of electro-magnetic radiation of varying, but always very short, wave-length. Even those of longest wave-length are far beyond the lower limit of light-waves, and X-rays are therefore invisible. They have, however, the power of causing a screen covered with barium platino-cyanide, or some other substances, to fluoresce, and this is one method used in investigating them. They have remarkable penetrating powers, being able to pass through thick layers of substances completely opaque to light. Since they act upon a photographic plate, X-ray photographs of such objects as the human body may be taken; in such a photograph the bones, being less permeable by the X-rays than the softer parts of the body, appear dark. To take an X-ray photograph of a soft organ, e.g., the alimentary canal, the organ is, if possible, impregnated with a substance, such as bismuth opaque to the rays.

To generate X-rays, the Coolidge tube is generally used; this consists of a highly evacuated glass bulb containing a tungsten spiral acting as cathode, and an inclined tungsten plate acting as anode. The spiral is kept hot by an electric current passing through it, and the anode and cathode are then connected to a source of high potential, e.g., an induction coil, or a transformer with an appropriate make and break device. Cathode rays (streams of negative electrons) pass from the cathode to the anode, and when they strike the latter X-rays are generated.

Xucar, or *Jucar*, a river of Valencia, Spain, which rises near the source of the Tagus, and after a course of 317 m. falls diminished into the Mediterranean, most of its water having been drained off for irrigation of orange plantations.

Xylonite, a variety of celluloid, made by mixing pyroxylin and camphor under high pressure.

XYLOPHONE, a musical instrument consisting of 27 bars of specially prepared wood arranged in rows over resonators; notes are produced by striking the bars with small hammers.

XEBEC

York, an ancient city of Yorkshire, England, situated at the confluence of the Foss with the Ouse, 188 m. N. of London and 22 m. N.E. of Leeds: is the seat of an archbishop, and a great railway centre. Known among the Romans as Eboracum, it was the centre of the Roman power in the North, many relics of that epoch still remaining. Its cathedral, known as the Minster, is one of the grandest in England. This is built on the site of a church erected as early as the 7th Century, and was finished as it now exists in 1470: it is 524 ft. in length, and the transepts 250 ft., the breadth of the nave 140 ft., the height of the central tower 216 ft., and of the western one 201 ft. There are other buildings of great antiquity, and the Guildhall dates from the 15th Century. Confectionery and glass are manufactured. Pop. 24,000.

York, Duke of, title often borne by the Henry VIII., Charles I., James II., George V. and George VI. are among kings who were once Dukes of York.

York, Duke of (Richard), Protector of England during the incapacity of Henry VI., and the author of the Wars of the Roses, on account of his claiming the throne and disputing the Lancastrian right of succession; he was killed in the battle of Wakefield in 1460.

Yorkshire, the largest county in England, is divided into three Ridings (i.e., thirds for administrative purposes, North, East, and West; the city of York is not included in any of the Ridings, of which the West is the wealthiest and the most populous; contains a large coalfield, and is the centre of the woollen manufacture of the county; the East being mainly agricultural, with ironworks and shipbuilding works, and the North mainly pastoral, with industries connected with mining and shipping. Large towns are York (itself an administrative county), Sheffield, Leeds, Hull, Bradford, Middlesbrough, Huddersfield and Halifax. Area, 6,090 sq. m. Pop. (E. Riding) 483,100; (N. Riding) 467,000; (W. Riding) 3,358,700.

Yorkshire Terrier, a small dog, with straight silky hair reaching to the ground and parted down the middle; bred from the Scotch terrier. The coat is generally blue-grey, with tan underneath and on the head, ears and legs.

Yorktown, a small town in Virginia, U.S.A., on the York R., where Lord Cornwallis surrendered to Washington in 1781, after a siege, thus practically bringing to an end the War of Independence. The town was also the seat of military operations in the Civil War. Pop. 500.

Yosemite Valley, the most re- in the world, in the centre of California, U.S.A., 140 m. E. of San Francisco, 6 m. long and from 1 to 24 m. broad, girt by perpendicular walls thousands of feet deep and traversed by the river Merced in a succession of falls of great height, the whole presenting a scene of mingled grandeur and beauty. It was discovered in 1851, and a national park of 1,140 sq. m. has been established, which includes the valley.

Yoshihito, Emperor of Japan. He succeeded to the throne in 1912. In 1900 he married Princess Sadako. During his reign the westernization of Japan steadily continued, and for the first time the country figured as one of the Great Powers, asserting its complete equality by its defeat of Russia in the war of 1904-5. (1879-1926).

Youghal, a seaport in co. Cork, Eire (Ireland), on the Blackwater, 27 m. E. of Cork; it exports bricks and agricultural produce. Pop. 5,500.

Young, Brigham, American Mormon leader, born at Whittingham, Vermont, U.S.A., son of a small farmer; was baptized into the Mormon community in 1832; became one of the apostles of the Church and a preacher, and finally its head in 1851 after he had led the community from Nauvoo to Utah. He was a talented organizer, did much to encourage commerce and agriculture, and left a large fortune to his 17 widows and 56 children. (1801-1877).

Young, Francis Brett, British novelist; educated at Epsom and Birmingham University. His books include *The Crescent Moon*, 1918; *Jim Redlake*, 1930; *House Under the Water*, 1932; *Far Forest*, 1936. 1884-.

Younghusband, Sir Francis Edward, Anglo-Indian official, born at Marl, Punjab; educated at Clifton and Sandhurst. He entered the Army in 1882, and was transferred to the Indian Political Department, 1890. Explored Manchuria, 1886; travelled to Peking to India via Chinese Turkestan, 1887. Political agent in Chitral, 1893-4; *Times* correspondent with Chitral Expedition, 1895. He accompanied the British Mission to Lhasa in 1902, and has written many books on the East. K.C.I.E. 1904. (1863-).

Young Men's Christian Association, an association founded in London in 1844, for the benefit of young men connected with various dry-goods houses in the City, which gradually spread over the whole world. Its object is the spiritual, moral, social and physical welfare of young men. During the World War it took up canteen and other work among the troops, and so much increased its scope. It is familiarly known as the Y.M.C.A.

Young Plan, a scheme for the settlements (q.v.) named after Owen Young, the American chairman of the international committee of experts which examined the problem in 1928 in Paris; it was adopted at a conference at the Hague in 1929. Besides reducing the total of German indebtedness it set up a Bank for International Settlements, and superseded the Dawes Plan (q.v.).

Youngstown, a city of Ohio, U.S.A., with large factories and allied industries. Pop. 170,000.

Young Women's Christian Association, an organization formed in 1894, to serve the same purposes for women as the Y.M.C.A. (q.v.) does for men. It is worldwide in its operations, though England and the U.S.A. are its principal centres of activity.

Ypres, a town in West Flanders, Belgium, 30 m. SW. of Bruges; was at one time a great weaving centre, and famous for its diaper linen. Its Gothic town hall and cathedral were almost completely destroyed with the rest of the town during the World War, in which the town was almost continuously a seat of operations. The most notable dates were the first battle of Ypres, October 20, 1914, when the German advance was checked, the "decisive" German attack on November 11, 1914, which also failed, the poison gas attack on April 22, 1915, and the other great German defeat on February 14, 1916. The town now contains a memorial to the British dead called the Menin Gate (q.v.). The principal manufactures are textile. Pop. 15,000.

Ypres, Earl of. See French, John Denton Pinkstone.

Yser, a river 55 m. in length rising in the dept. of Nord, France, and flowing through Belgium to the sea at Nieuport. It was the scene of a battle in

October, 1914, when the Germans in an endeavour to capture the coast ports met French and Belgian troops; the Allied forces won, owing largely to their opening the sluice gates and letting in the sea on the advancing Germans.

Ytterbium, a metallic chemical element, ment, one of the rare earth group. Symbol Yb; atomic number 70; atomic weight 173.04.

Yttrium, a metallic chemical element belonging to the same group as scandium and lanthanum. Symbol Y; atomic number 39; atomic weight 88.92.

Yuan, or Manchu dynasty, the line of Mings, rulers of China which succeeded the Mings and endured till the fall of the empire in 1912. They ruled the Chinese as foreign conquerors, reserving most of the government posts for Manchus, and imposing various disabilities on the Chinese; but they encouraged Chinese culture, and adopted Chinese manners in almost every respect. Among the greatest rulers of the line were Kang Hsi (1662-1723) and Chien Lung (1736-1796).

Yucatan, a peninsula in Central America from the Caribbean Sea; it is a flat expanse with a good climate and a fertile soil, yielding maize, rice, tobacco, indigo, etc.; abounds in forests of mahogany and other valuable woods; it bears traces of early civilization in the ruins of temples and other edifices, particularly at Chichen Itza. It forms the two Mexican states of Campeche (Cap., Campeche; area, 19,670 sq. m.; pop. 84,600) and Yucatan (Cap., Merida; area, 23,930 sq. m.; pop. 386,100).

Yucca, a genus of evergreen shrubs, native to America, with white purple-striped scentless flowers. Among the cultivated species is *Yucca gloriosa*, the Adam's Needle or Spanish Bayonet.

Yugoslavia, since 1929 official name of the Kingdom of Serbs, Croats, and Slovenes, consisting of the old kingdoms of Serbia and Montenegro with Croatia, Slavonia, Bosnia, Herzegovina, and parts of the Banat, Carniola, and Styria; formed in December, 1918, after the World War, and recognised by the Treaty of Versailles. Bel-

YUCCA
(*Angustifolia*)

grade is the capital, and other important towns are Zagreb, Subotica, Ljubljana, and Sarajevo. With the Danube as the main waterway and a lengthy coastline on the Adriatic, trade flourishes, maize, wheat, poultry produce, and timber being largely exported. Three-quarters of the inhabitants are engaged in agricultural pursuits. The people are mainly Orthodox (49 per cent.), Roman Catholic (37 per cent.), or Moslem (11 per cent.); education is compulsory and mainly free; the national language is Serbo-Croat. The present Parliamentary constitution dates from 1931. Area, 95,600 sq. m. Pop. 13,934,000.

Yukon, (1) a great river of Alaska, rises in British territory, and after a course of 2,300 m. falls, by a number of mouths forming a delta, into the Behring Sea; it is navigable nearly throughout, and its waters swarm with salmon three months in the year; the chief city on its banks is Dawson. (2) A territory in Canada, formerly part of the NW. Territories, constituted in 1898 on the discovery of gold in the Klondike (q.v.) and other fields; the climate is extremely cold; the population, which reached 27,000 in 1901 at the height of the gold rush, is now only just over 4,000. Area, 207,000 sq. m.

Yule, an old Scandinavian heathen festival held at the winter solstice, whose name has been transferred to many popular observances connected with Christmas, such as the Yule log.

Yung-Ling, a mountain range running N. and S., which forms the eastern buttress of the tableland of Central Asia.

Yunnan, the extreme south-western province of China; is fertile, particularly in the S.; yields large quantities of maize, rice, tobacco, sugar, and especially opium, and abounds in mineral wealth, including gold, silver, mercury, as well as iron, copper, and lead. The population is mainly non-Chinese, consisting of tribes allied to those found in Burma, such as the Tai, Shan and Lolo. The capital is Kunming. Area, 146,700 sq. m. Pop. 11,000,000.

Yvetot, town in the dept. of Seine-et-Marne, with manufactures of textile fabrics, and a trade in agricultural produce, the seignior of which long bore the title of king, "Roi d'Yvetot," a title satirically applied by Béranger to Napoleon, and often employed to denote an insignificant potentate with large pretensions. Pop. 7,000.

Z

Zaghlul Pasha, Saad, Egyptian politician. Educated at Al Azhar University, he took an active part in Nationalist politics before becoming a barrister, and was arrested for the part he played in Arabi Pasha's revolt. In 1906 he became Minister of Education, but was later removed from office and became leader of the opposition, being deported in 1921, but returning to lead the powerful Wafd or home rule party. (1852-1927).

Zagreb, formerly Agram, the capital of Croatia, Yugoslavia. It has a fine Gothic cathedral and a university, and is subject to earthquakes. It is the centre of a wheat and maize-growing district, and tobacco and sugar-beet are also grown. It was here, at the close of hostilities in the World War, that a convention was held in 1918 for

proclaiming Yugoslavia an independent kingdom, the "Triune Kingdom of the Serbs, Croats and Slovenes." Pop. 180,000.

Zaharoff, Sir Basil, Greek financier. Much of his life was spent in England, but his commercial interests, particularly in armaments, had world-wide ramifications. He founded chairs of aviation in England, France, and Russia, as well as one for French literature at Oxford and for English literature at Paris. Amongst the many honours bestowed on him in various countries was the British G.C.B. in 1921. (1850-1936).

Zama, a fortified city of ancient Numidia, 100 m. SW. of Carthage, where Hannibal (q.v.) was defeated by Scipio Africanus, the Second Punic War (q.v.), brought to an end, and the fate of Carthage virtually sealed.

Zambesi, the fourth largest river of Africa as regards both the volume of its waters and the area it drains. Rising on the boundary of Angola and the Belgian Congo, it waters a rich pastoral region, and falls into the Indian Ocean after a course of nearly 1,600 m., in which it drains 600,000 sq. m. of territory. Owing to cataracts and rapids it is only navigable in different stretches: at 900 m. from its mouth it plunges in a cataract known as the Victoria Falls, which rival in grandeur those even of Niagara. The Zambesi bridge, the highest in the world, 12,064 ft. in length, completed in 1934, carries a railway across it from Mutarara to Sena.

Zamora, ancient town of Spain, on the right bank of the Douro, 130 m. NW. of Madrid; now in a decayed state; was a flourishing place in Moorish times: contains interesting ruins; manufactures linens and woollens, and trades in wine and fruits. Pop. 18,000. The province of the same name, of which it is the capital, has an area of 4,100 sq. m. and a pop. of 286,000.

Zamenhof, Lazarus Ludwlg, Polish-Jewish inventor of Esperanto (q.v.), born at Bialystok. By profession an oculist; he practised successively in Warsaw, Kherson, Grodno and again at Warsaw, where he died. His first publication concerning his Universal Language was issued under the pseudonym "Doktoro Esperanto"—hence the name. (1859-1917).

Zangwill, Israel, Anglo-Jewish novelist and dramatist, born in London; wrote novels, essays, plays, and poems. Among his works are *The Bachelor's Club*, *Old Maid's Club*, *Children of the Ghetto*, *Dreamers of the Ghetto*, *The Master*, *Without Prejudice*. He was a leader of the Zionist movement. (1864-1925).

Zante, or *Cephalonia*, one of the Ionian Is., 9 m. off the NW. coast of the Morea, is 24 m. long and 12 m. broad; raises currants, the produce of a dwarf vine, and exports large quantities annually. Area, 270 sq. m. Pop. 40,500.

Zanzibar, a British colony and protectorate in E. Africa, consisting of the island of Zanzibar, with a capital of the same name, and the island of Pemba and a small strip of mainland; has a hot unhealthy climate, and a rich tropical vegetation; its products are cloves, coconuts, betel-nuts, and grain, and the exports ivory, india-rubber, gum, etc.; the natives are mostly Swahili-speaking Negroes, the higher classes Arab Mohammedans under a sultan, who is advised by a British resident. The area of the protectorate is 1,020 sq. m.; pop. 235,000. The capital, Zanzibar, has a pop. of 45,300.

Zara, city of Italy, an ancient seaport, on a promontory on the Dalmatian coast, 129 m. SE. of Trieste. It was founded by the Venetians, and has a spacious harbour; the chief manufactures are glass and a liqueur called maraschino. It was annexed by Italy in 1919 (previously Austrian). Pop. 18,600.

Zaragoza. See *Saragossa*.

Zealand, or *Seeland*, the largest island of the Danish Archipelago, situated between the Cattegat and the Baltic, being 81 m. long and 87 m. broad, with Copenhagen (q.v.) on the E. coast; the surface is nearly everywhere flat, and agriculture and cattle-rearing the chief industries. Area, 2,670 sq. m. Pop. 1,100,000.

Zealand, a province of the Netherlands, consisting chiefly of islands, of which Walcheren (q.v.) is one, constituting a delta as if formed by the Maas and Scheldt; great part of it is reclaimed from the sea. The capital is Middelburg. Area, 690 sq. m. Pop. 254,000.

Zebra, popular name for several fully-striped species of the genus *Equus* (horses). The possession of stripes is inherited from the common ancestor of horses and asses. The

Equus zebra, the Mountain or True Zebra, has pointed assinine ears, an elegant head and very narrow spinal stripes. Grévy's Zebra (*Equus grévyi*), standing 13 hands, is an animal intermediate between the True Zebra and the Quagga. It has expanded round-tipped ears. The name *zebra* is also sometimes applied to some of the Quaggas (q.v.), e.g., the Bonte-quatta, sometimes called Burchell's Zebra.

ZEBCRA (GRÉVY'S)

Zebu, ticated and used principally for draught purposes; is distinguished from the European species by a large fatty hump behind the head. It is also found in China, E. Africa, Madagascar, and the East Indian Is.

Zebulon (*Zabulun*), the tenth son of Jacob, the sixth borne to him by Leah, and the reputed ancestor of the tribe of Israel bearing his name. Their territory was in the northern part of the Holy Land, on the coast.

Zechariah, a Hebrew prophet who in Babylon during the captivity, to have prophesied in Jerusalem at the time of the restoration, and to have contributed by his prophecies to encourage the people in rebuilding the Temple and reorganizing its worship. The Old Testament book under his name, the twelfth of the Minor Prophets, is now considered by critics to fall into three sections, the first eight chapters representing Zechariah's prophecies, the remainder being made up of two separate and later anonymous works.

Zedoary (*Curcuma Zedoaria*), a broad-leaved plant of the natural order Zingiberaceae, grown in the East Indies, and bearing a rhizome used as a food and condiment, resembling ginger.

Zeebrugge, town in Belgium, 7 m. W. of Bruges, of which it is the port. It was the scene of one of the most daring deeds in naval warfare, when on April 23, 1918, H.M.S. *Pindar* fought her way to the mole, stormed it, and held it, while the old cruisers *Intrepid* and *Iphigénie*, laden with cement, were run into the mouth of the canal and sunk there so as to block the fairway. The object was to prevent German submarines reaching the sea from Bruges, which was used by them as a base. Admiral Sir Roger Keyes commanded the attack.

Zeeman Effect, the change in the spectrum of a source of light which occurs when it is placed in a strong magnetic field. If an incandescent element is placed in such a field and the light emitted is examined in the direction of the field, each normal spectral line is seen to give rise to two distinct lines, each circularly polarized (*longitudinal Z.-effect*). If the light is examined in a direction perpendicular to the field, each normal line gives three lines, all of them plane-polarized (*transverse Z.-effect*). It was discovered by a Dutch physicist, Pieter Zeeman, Professor of Physics at Amsterdam, and Director of the Physical Institute, (1865-).

Zeiss, Carl, German optician, born at Weimar, worked under various instrument-makers there and in Stuttgart and Vienna. Opened, 1846, a famous optical instrument factory—known, since 1889, as the Carl Zeiss-Stiftung—at Jena, where he died. (1816-1888).

Zeitgeist (i.e. Time-spirit), a German word applied to the dominant trend of life and thought at any particular period.

Zend-Avesta, the name given to the *Parsses*, ascribed to Zoroaster. A great part of the original collection is lost, the remains consisting of *Gathas*, or ritual hymns, which may contain some parts of Zoroaster's own teaching.

Zenith, name of Arab origin given to the point of the heaven directly overhead, or the pole of the horizon, the opposite point directly under foot being called the Nadir, a word of similar origin. The imaginary line connecting the two passes through the centre of the earth.

Zeno, Greek philosopher, the founder of the Stoic philosophy, born at Citium, Cyprus, originally a merchant; went to Athens, and opened a school of his own in the Stoa, where he taught to extreme old age a gospel called Stoicism, which became extremely popular in the Roman Empire of the first two centuries of the Christian Era. See Stoicism. (342-270 B.C.).

Zenobia, queen of Palmyra, whose ambition provoked the jealousy of the Emperor Aurelian, who led an army against her, and after a succession of defeats subdued her and brought her to Rome to adorn his triumph as conqueror, afterwards presenting her with a domain at Tivoli, where she spent the rest of her days. (A. C. 270).

Zephaniah, a Hebrew prophet who prophesied in the 7th Century B.C., in the interval between the decline and fall of Nineveh and the hostile advance of Babylon. The short book of the Old Testament named after him is a warning of God's judgments on idolaters.

Zeppelin, a rigid dirigible balloon of the type designed and built by Count Ferdinand von Zeppelin (1838-1917),

which started from Lake Constance on August 4, 1908, the name being applied for a time to all types of subsequent airships. Zeppelins were used for air raids on England during the World War. The first such raid, on East Anglia, took place on January 19, 1915; the first on London was on May 31, 1915; on October 19, 1917, there was a raid on East Anglia in which six airships were lost on their return journey. A machine of the same type called *Graf Zeppelin* in 1929 accomplished the first round-the-world light, and a later machine, the *Hindenburg*, after making several flights from Germany to the U.S.A., was destroyed by fire while landing in New Jersey in 1937.

Zermatt, a small village of canton of Uri, Valais, Switzerland, 23 m. S.W. of Brieg, a great centre of tourists and the starting-point in particular for the ascent of the Matterhorn. Pop. c. 800.

Zero, a word of Arab origin signifying a cipher, and employed to denote a neutral point in scale between an ascending and descending series, or between positive and negative.

Zero, Absolute, the point at which all heat is absent from a body. It is equal to 273° below zero on the Centigrade scale.

Zetland, Lawrence John Lumley Dundas, 'Lord Dundas,' 1876-92, and 'Earl of Ionaishay,' 1892-1929; educated at Harrow and at Trinity College, Cambridge. He entered the House of Commons in 1907, and became Governor of Bengal from 1916 to

1922; G.C.I.E., 1917; succeeded his father, 1929; Secretary of State for India since 1935. (1876-).

Zeus, the chief deity of the Greeks, the father of gods and men, the mightiest of all the gods; the son of Kronos and Rhea; by the help of his brothers and sisters dethroned his father, seized the sovereign power, and appointed them certain provinces of the universe to administer in his name—Hera to rule with him as queen above, Poseidon over the sea, Pluto over the nether world, Demeter over the fruits of the earth, Hestia over the social life of mankind; to his dynasty all the powers in heaven and earth were more or less related, descended from and dependent on it. He corresponded to the old Aryan God Dyaus Pitar and the Roman Jupiter. He is represented as having his throne in heaven, and as wielding a thunderbolt in his right hand, in symbol of the jealousy with which he guards the order of the world established under him as chief.

Zidon. See Sidon.

Zimbabwe, a remarkable ruin in Mashonaland, Rhodesia, the remains apparently of some enterprising colony of ancient gold-seekers. It is generally attributed to about the 14th Century A.D.

Zinc, a metallic chemical element becoming and mercury. Symbol Zn; atomic number, 30; atomic weight, 65.38. It occurs naturally as zinc sulphide, or blende, zinc carbonate or calamine, and zinc ferrite. In its commercial form, of about 98 per cent. purity, zinc is known as spelter; the pure metal can be obtained by electrolysis. It is a somewhat hard, bluish-white metal, which dissolves readily in dilute sulphuric or hydrochloric acid, liberating hydrogen from the acid. It is comparatively stable in the air, and is therefore used for protecting iron, so-called galvanized iron being made by dipping iron into molten zinc or by sherardizing, i.e., by heating the iron in zinc dust. It is an ingredient of many alloys, e.g., brass (copper and zinc), and is also largely used in the manufacture of dry cells and batteries. Zinc sulphate, a white crystalline solid known as white vitriol, is used in the calico-printing industry as a mordant, and in the varnish industry. Like all zinc compounds it is poisonous. Many zinc compounds have therapeutic applications; thus zinc ointment contains 10 per cent. of zinc oxide, while a solution of zinc sulphate is a useful antiseptic in cases of conjunctivitis, etc.

Zingiberaceæ, a natural order of perennial herbs, found chiefly in Indo-Malaya. They usually have fleshy rhizomes, and sometimes tuberous roots. There are 35 genera and some 800 species, the typical genus being *Zingiber*, which includes *Zingiber officinale*, the ginger plant. (g.v.).

Zinnia, a genus of annual Compositæ, native to N. America and Mexico. They bear showy red, yellow and white flowers and are grown in England in favourable sunny positions.

Zinoviev, Georgy, otherwise Grigory Evseevich Apfelbaum, Russian revolutionary leader, born at Elisevograd. He joined the Bolsheviks in 1903, and was imprisoned for seditious activity, 1908. He was with Lenin in Switzerland; returned to Russia in 1917, but held back during the Revolution of November. In 1918 he became President of the Leningrad Soviet, and in 1919 of the

ZEPPELIN

ZINNIA
ELEGANS

Third International. He was the alleged author of a letter purported to be sent in September, 1924, to the Russian chargé d'affaires in London, with instructions for revolutionary propaganda, which contributed to the defeat of the Labour Party at the general election of that year. After Lenin's death he was expelled from the Politburo and headship of Third International, 1928; and was executed after trial for complicity in the Kirov murder. (1883-1938).

Zionism, a movement for the re-establishment of a Jewish national state in Palestine, begun at the end of the last century by Theodor Herzl (q.v.). After the World War Zionist activity in Palestine led to the foundation of Tel-Aviv and much of the social and industrial development that took place in the Palestinian Jewish colonies. See *Palestine*.

Zirconium, a metallic chemical element belonging to the same group as titanium and hafnium. Symbol *Zr*; atomic number 40; atomic weight 91.22. The metal itself is of little importance, but its dioxide is used in the manufacture of refractory crucibles and for rendering the lower part of the alimentary canal opaque to X-rays, thus making an X-ray photograph of this region possible. Impure zirconium dioxide is the chief constituent of the precious stone jargon.

Zither, a stringed musical instrument with a flat sounding-board played on a table. It has usually five metal strings passing over frets, which are plucked with a plectrum, and a score or more of other "open" strings plucked with the finger. It is very popular in Bavaria and the Tyrol.

ZITHER

Zodiac, the name given to the heavens extending 8° on each side of the ecliptic, containing twelve constellations, called signs of the zodiac, which the sun traverses in the course of a year. These signs are named: Aries, the Ram; Taurus, the Bull; Gemini, the Twins; Cancer, the Crab; Leo, the Lion; Virgo, the Virgin; Libra, the Balance; Scorpio, the Scorpion; Sagittarius, the Archer; Capricornus, the Goat; Aquarius, the Water-bearer; and Pisces, the Fishes. The sun enters Aries at the spring equinox and Libra at the autumnal equinox, while the first point of Cancer marks the summer solstice, and that of Capricorn the winter.

Zoetrope, an optical toy consisting essentially of a cylinder open at the top with slits in the circumference and a series of pictures, representing the progressive attitudes of a body, which are passed rapidly behind the slits, thus giving an illusion of motion.

Zogu, Ahmed (Zog I.) king of the Albanians, was born at Bourgalet, Mati—head of a ruling family in that district, son of Djalma Pasha Zogu. He fought on the Austrian side during the World War; there after he became Minister of the Interior, 1920; of War, 1921; of the Interior again, 1921-22; and Prime Minister, 1922-24. He was elected President in 1925, and proclaimed King in 1928. (1895-).

Zola, Émile, French novelist of the realistic or naturalist school; born at Paris, of Italian descent; began literature as a journalist, but soon gave himself up to novel-writing. Of his works the chief are *Thérèse Raquin*, *La Fortune des Rougons*, *L'Assommoir*, *Lourdes*, *Rome*, and *Paris*. He distinguished himself by his courage in connection with the Dreyfus affair and his bold condemnation of the sentence under

which Dreyfus was condemned, his protests being largely responsible for the eventual rehabilitation of Dreyfus. (1840-1902).

Zöllner's Lines, parallel lines which seem to diverge or converge, owing to their intersection by numerous oblique lines; named after the German physicist Johann Zöllner. (1834-1884).

Zones, the name given to belts of the earth marked off by the tropical and polar circles, of which the former are 23½° from the equator and the latter 23½° from the poles, the zone between the tropical circles, subject to extremes of heat, being called the Torrid Zone, the zones between the polar circles and the poles, subject to extremes of cold, being called respectively the North Frigid Zone and the South Frigid Zone, and the zones north and south of the Torrid, subject to moderate temperature, being called respectively the North Temperate and the South Temperate Zones.

Zoological Gardens, parks set apart for the care and display of animal specimens from various parts of the world. Most great capital cities have such institutions, the London "Zoo" in Regent's Park containing one of the world's best collections of animals, birds, and reptiles, controlled by the Zoological Society. The gardens were opened in 1827; an auxiliary establishment now exists at Whipsnade (q.v.). Other English Zoological collections exist at Chessington, Surrey, and Tring Park, Herts.

Zoology, the branch of biological study and comparative study of animals. Its chief branches are: Morphology, dealing with form and structure; Comparative Anatomy, which investigates the position and relation of organs and parts; Embryology, which traces development from the ovum to maturity; Physiology, which treats of the organs of nutrition, reproduction and the nervous system; and the classification of animals into natural groups or families. The first to record zoological facts were Aristotle and Pliny, but the science practically began with Linnaeus, who was the first to institute a system of zoological classification, though it has since been superseded.

Zoroaster, Zarathustra, or Zerdusht, Iranian religious reformer, the founder or reformer of the Parsee religion, of whom, though certainly a historical personage, nothing whatever is for certain known except that his family name was Spitama, and that he was born in Bactria. He may have flourished between 1000 and 500 B.C. For his system see *Parsees*.

Zouaves, the name given to a body of light infantry in the French army. They were raised in 1830 from among the Zouavas, a tribe of Kabyle Arabs; but since 1840 they have been almost always men of superior physique specially selected from the ordinary infantry regiments of the line.

Zug, the smallest canton of Switzerland; is 12 m. long by 9 m. broad; is hilly and pastoral in the SE. and has cultivated fields and orchards in the NW.; all but includes Lake Zug, at the NE. of which is Zug, the capital, which carries on sundry industries on a small scale. Area, 93 sq. m. Pop. 34,400.

Zuider Zee (i.e., south sea), a deep inlet of the North Sea, in the Netherlands, which includes the islands of Texel, Vlieland, Terschelling, and Ameland, and was formed by irruptions of the North Sea into a lake called Flevo, in the 12th, 13th, and 14th centuries, when thousands of people were drowned; is 85 m. long and 45 m. broad, and is embraced in a circuit of 210 m.

Large portions of it have already been, and almost the whole is eventually to be, reclaimed for agricultural purposes, so as to form a new province of the Netherlands.

Zululand, a territory to the NE. of Natal, from which it is separated by the Tugela, and of which it was independent till 1898, but is now an integral part. Its area is 10,430 sq. m.

Zulus, a section of the Bantu Negro family which originally occupied the SE. seaboard of Africa from Delagoa Bay to the Great Fish River. They are a race of superior physique and intellectual endowment, and incline to a quiet pastoral life. They were attacked under Cetuywayo by the English in 1879, but after falling upon an English force at Isandhlwana, and cutting it to pieces, were overpowered at Ulundi, and put to rout. See Zululand.

ZULU
SHIELD AND
WEAPONS

Zurich, a northern canton in Switzerland, and the second largest in population; is in the basin of the Rhine, with a well-cultivated fertile soil, and manufactures of cottons and silks, and with a capital of the same name, the largest city in Switzerland, at the foot of the Lake of Zurich; a large manufacturing and trading centre; has a Romanesque cathedral and a university, with silk mills and cotton mills, as well as foundries and machine shops; here Lavater was born and Zwingli was pastor. Area, 670 sq. m. Pop. (canton), 617,700; (city) 312,800.

Zutphen, manufacturing town in the Dutch province of Guelderland, in the neighbourhood of which Sir Philip Sidney fell wounded in a skirmish. The industries are chiefly tanning and textiles. Pop. 19,600.

Zweig, Arnold, German-Jewish novelist, born in Glogau, notable for a series of war-novels, publication of which, upon the rise of Nazism, was transferred to Holland. Chief works, *Der Streit um den Sergeanten Grischa*; *Junge Frau von 1914*; *Erziehung vor Verdun* (1887-).

Zweig, Stefan, Austrian-Jewish author, born at Vienna; began with poetry, 1901. His plays include *Jeremias*, 1917. His principal novel is *Amok*, 1922; he has written *Hves of Marie Antoinette*, *Fouché*, *Rolland*, and *Mary Queen of Scots*. (1881-).

Zwickau, city in Saxony, Germany, 82 m. SW. of Dresden. It is in the midst of rich beds of coal, and manufactures chemicals, glass, earthenware, machinery, etc. Pop. 84,700.

Zwingli, Ulrich, Swiss religious Reformer, born at Wildhaus, in the canton of St. Gall, and founder of the Reformed Church; studied at Berne, Vienna, and Basel, and was appointed pastor at Glarus; met Erasmus at Basel, and gave himself to the study of Greek, and in particular the epistles of St. Paul. Attached to the monastery of Einsiedeln, he, in 1516, attacked the sale of indulgences, and was in 1518 elected to be preacher in the cathedral of Zurich. Adopting anti-Catholic opinions, he held a disputation with the bishop of Constance, which resulted in the abolition of the Mass and the substitution of the Lord's Supper. The movement thus begun spread, and Zwingli met in conference with Luther, but they failed to agree on the matter of the Eucharist, on which point the Lutheran and the Reformed Churches separated. In 1531 the Catholic cantons declared war against the reformers of Zurich and Berne, and the latter were defeated at Cappel, among the dead on the battlefield being Zwingli. (1484-1531).

Zwolle, town in the Dutch province of Overijssel, 50 m. NE. of Amsterdam. It has manufactures of ironware, salt, cotton, etc. Pop. 43,500.

Zygoma, the cheekbone or complete bony arch of the cheek.

Zygophyte, a plant in which sexual reproduction involves the fusion of two similar cells.

Zygospore, in botany, a spore formed in the process of reproduction in some algae and fungi by the union of two similar protoplasmic masses. Zygospores are full of granular protoplasm and are rich in oil-drops as a reserve food.

Zygote, a fertilized egg, or the cell gametes, formed by the union of two gametes.

Zymase, an enzyme occurring in yeast and elsewhere, catalysing the conversion of glucose into alcohol and carbon dioxide.

Zymotic Disease, a term formerly applied to those diseases characterized by symptoms similar to the processes of fermentation; later, applied mainly to the chief fevers and contagious diseases, such as smallpox, malaria, typhoid fever. It has now fallen into disuse.

SUPPLEMENT

WELL-KNOWN CHARACTERS IN DRAMA AND FICTION

Some names not included in the following list, particularly characters in the ancient Greek and Roman mythology, will be found in the body of this book

Abou Hassan, a youth of Bagdad the bed of the caliph Haroun-al-Raschid in the latter's palace, and awakes to believe himself to be the caliph.—*The Arabian Nights' Entertainments*.

Absolute, Sir Anthony, an irascible, domineering, but warm-hearted old gentleman who deludes himself that he is good-tempered; his son is Captain Absolute, who, under the name of Ensign Beverley, woos the heiress Lydia Languish. See **Acres**, **Bob**.—*The Rivals*, Sheridan.

Abydos, **Bride of**, Zuleika, the daughter of Gliafer, the pasha of Abydos; her lover, Sellin, is shot by her father, whereupon Zuleika dies broken-hearted.—*The Bride of Abydos*, Byron.

Acres, **Bob**, a blustering braggart whose courage "oozed out of his fingers' ends" when put to the test; the rival of Beverley (Capt. Absolute) for the hand of Lydia Languish.—*The Rivals*, Sheridan.

Adam, the old retainer who follows Orlando (q.v.) into the Forest of Arden; a type of the loyal, devoted manservant.—*As You Like It*, Shakespeare.

Adams, **Parson**, a country curate with a head full of learning and a heart full of love for his fellows, but in absolute ignorance of the world, which in his simplicity he takes for what it professes to be.—*Joseph Andrews*, Fielding.

Admirable Crichton, **Tha**, a butler in the service of the Earl of Loam, the perfection of an "upper man-servant"; when, with members of the Earl's family, he is wrooked on a desert island it is he who alone rises to the occasion; from being "king" of the island he reverts naturally to his former position on the party being rescued.—*The Admirable Crichton*, Sir J. M. Barrie.

Adverse, **Anthony**, the hero of ingenious,ously contrived adventures in Leghorn, Cuba, Africa, Paris, Mexico and on the high seas during the Napoleonic period.—*Anthony Adverse*, Hervey Allen.

Emilia, the mother of the twins named Antipholus, one of whom married Adriana; parted from her sons by shipwreck, she goes to Ephesus and becomes abbess of a convent there; unknown to her one of the twins is a powerful citizen of Ephesus; the other, with Aegeon, lands in Ephesus later, and all are brought together when the strange story of their lives is unfolded.—*The Comedy of Errors*, Shakespeare.

African Magician, **The**, the wizard who in the story of Aladdin sent the latter into the cave in quest of the wonderful lamp; later he deprives Aladdin of the lamp by a trick and transports its former possessor and his palace to Africa, but is subsequently killed by Aladdin.—*The Arabian Nights' Entertainments*.

Agnes, the daughter of Mr. Wickfield, the solicitor, whom David Copperfield married after the death of Dora (q.v.).—*David Copperfield*, Dickens.

Agravaine, **Sir**, son of King Lot of Orkney, nephew of King Arthur, and brother of Gawain, Gaheris and Gareth; was killed by Lancelot, whom he and others tried to trap in an intrigue with Queen Guinevere.—*Morte d'Arthur*, Malory.

Aguecheek, **Sir Andrew**, an old fop who is the boon companion of Sir Toby Belch (q.v.).—*Twelfth Night*, Shakespeare.

Ahmed, **Prince**, the possessor of the magic tent and the apple of Samarkand which cured all diseases.—*The Arabian Nights' Entertainments*.

Aladdin, the hero of the story of the "wonderful lamp"; on possessing himself of the treasure, he becomes the owner of immense wealth and son-in-law of the sultan; after being deprived for a time of his palace and riches by the machinations of a magician, he regains them and returns home in triumph.—*The Arabian Nights' Entertainments*.

Alasnam, **Prince**, the owner of eight statues, each a precious stone mounted on gold; being told to search for a ninth, he finds it in the person of a beautiful girl, whom he marries; during his quest he carries a magic mirror, the surface of which remains undimmed only when the face it reflects is that of a virtuous woman.—*The Arabian Nights' Entertainments*.

Albert, a young farmer who eventually marries Lotte, the beloved of Werther who in real life is Goethe himself; Albert is his friend Kestner, and Lotte is Charlotte Buff.—*The Sorrows of Werther*, Goethe.

Alceste, the misanthrope, a sincere critic of men and manners, despising frivolity. Against his will he becomes enamoured of the beautiful and coquettish C  lim  ne, whom he openly criticizes and rebukes, though unable to conceal his affection.—*Le Misanthrope*, Moli  re.

Alden, **John**, a son of one of the Pilgrim Fathers in *The Courtship of Miles Standish*, Longfellow.

Ali Baba, **The Forty Thieves**, a poor woodman who learned the magic password, "Open Sesame," which gained him entrance to the robbers' treasure cave and possession of its wealth; through the wit of his female slave, Morgiana, the Forty Thieves are killed.—*The Arabian Nights' Entertainments*.

Alice, the chief character in *Alice's Adventures in Wonderland* and *Through the Looking Glass*.—Lewis Carroll.

Alice-Sit-by-the-Fire, **finds her** children antagonistic to her when she sees them again on her return from life in India. After having been saved from an imaginary "snaf" by her sentimental daughter, she wins their affection.—*Alice-sit-by-the-Fire*, play by Sir J. M. Barrie.

Allan-a-Dale, **or Allen-a-Dale**, a member of Robin Hood's band whom the outlaw befriends and assists in his marriage against the will of the lady's father; as a character figure in Scott's *Ivanhoe*.

Allworthy, an upright and charitable gentleman who rears Tom Jones and discovers the latter to be the natural son of his sister.—*Tom Jones*, Fielding.

Almayer, a solitary Englishman in Malaya, who centres all his ambitions in his half-caste daughter Nina. Crushed and impoverished by repeated reverses, he is unable to recover from his despair at Nina's elopement with a Malayan chief.—*Almayer's Folly*, Joseph Conrad.

Amadis de Gaul, the hero of a romance of chivalry by Garcia de Montalvo; is to Spain and Portugal what in legend Arthur is to Britain and Charlemagne is to France; his lady-love, whom he ultimately marries, is Oriana.

Amaryllis, a favourite name among old-time pastoral poets for a country girl: "To sport with Amaryllis in the shade" (Milton); a character (founded on the Countess-dowager of Derby) in Spenser's *Colin Clout's Come Home Again*. Also used by Virgil and Ovid.

Ambrose, Father, the Abbot of Kennaquhair, otherwise Edward Glendinning, brother of the Knight of Avenel.—*The Abbot*, Scott.

Amelia, the wife of the profligate Captain Booth, a woman of the highest virtues and a model of wifely affection; is accepted as a portrait of the novelist's wife.—*Amelia*, Fielding.

Amory, Blanche, a good-looking girl with superficial accomplishments but selfish at heart; was engaged in turn to Penderennis and Harry Foker.—*Penderennis*, Thackeray.

Ancient Mariner, The, the hero of a poem of the name by Coleridge, relating how, having shot an albatross, he was doomed to wander from place to place repeating the story of his ill-doing as a warning.

Andrews, Joseph, a footman who successfully resists temptation offered him and eventually marries a girl of his own class; a character created to ridicule Richardson's *Pamela*.—*Joseph Andrews*, Fielding.

Antipholus, the name of the twin brothers, sons of Aegeon and Emilia of Syracuse, whose misadventure provides the plot for Shakespeare's *Comedy of Errors*.

Antiquary, The, Jonathan Oldbuck, the laird of Monkburn, a whimsical but good-hearted gentleman of antiquarian tastes who is the central figure in Scott's novel of the name.

Antonio, the *Merchant of Venice* in Shakespeare's play of the name, who is in debt to Shylock the Jew and who is saved from his predicament by the shrewdness of Portia (q.v.).

Aram, Eugene, a schoolmaster of Knaresborough, who, having committed a murder, becomes haunted by remorse until he is driven to kill himself.—*Eugene Aram*, Lord Lytton. Thomas Hood wrote a poem on the same subject.

Aramis. See D'Artagnan.

Arden, Enoch, hero of a poem by Tennyson, son, who, on his return from the sea, after long absence, finds his wife, who believed him dead, married happily to another; he does not disclose himself, and dies broken-hearted.

Arden of Feversham, a landowner who is murdered, after several unsuccessful attempts, by his wife and her lover. Their plot is finally discovered, and they are executed.—*The Tragedy of Mr. Arden of Feversham*, Lillo (after an old play).

Ariel, an airy spirit liberated from bondage by Prospero, Duke of Milan, and a faithful servant to the latter.—*The Tempest*, Shakespeare.

Armida, a beautiful, seductive sorceress who lures Rinaldo among other crusaders from the siege of Jerusalem, entertaining him in her palace.—*Jerusalem Delivered*, Tasso.

Artegall, a prince of Cornwall stolen and brought up by them; marries Britomart (q.v.); is the personification of justice.—*The Faerie Queene*, Spenser.

Artful Dodger, The, John Dawkins, a young pickpocket trained by Fagin the Jew.—*Oliver Twist*, Dickens.

Ashton, Lucy, daughter of Sir William and Lady Ashton and betrothed to the Master of Ravenswood, but forced into marriage with the Laird of Bucklaw, whom she tries to murder.—*The Bride of Lammermoor*, Scott.

Athos. See D'Artagnan.

Audrey, a country girl who attaches herself to Touchstone (q.v.), a type of rustic simplicity and *gaucherie*.—*As You Like It*, Shakespeare.

Autolycus, a witty pedlar. "a snapper-up of unconsidered trifles."—*The Winter's Tale*, Shakespeare.

Babbitt, George F., chief character in Sinclair Lewis's novel *Babbitt*.

Backbite, Sir Benjamin, a conceited and malicious scandal-monger, with an unwarranted reputation as a poet and a wit; the nephew of Crabtree.—*The School for Scandal*, Sheridan.

Bagstock, Major, a retired military officer, red-faced and pompous, with a native servant whom he abuses constantly; refers to himself as "Old Joey," "J. B.," "Old Josh—tough, and devilish sly!"; cherishes an admiration and affection for Miss Tox.—*Dombey and Son*, Dickens.

Balderstone, Caleb, the old butler in the service of the Master of Ravenswood, who resorts to odd shifts to maintain the dignity of the house.—*The Bride of Lammermoor*, Scott.

Balfour, David, a young Scotsman driven to seek his fortune in the world, the hero of *Kidnapped* and *Catriona*, novels by R. L. Stevenson dealing with the Jacobite rebellion.

Banquo, a Scottish thane who is murdered and whose ghost haunts the latter.—*Macbeth*, Shakespeare.

Bardell, Mrs., a landlady in Goswell Street, London, who brings a successful action for breach of promise against Mr. Pickwick, but is subsequently brought to book by her own lawyers, Dodson and Fogg.—*The Pickwick Papers*, Dickens.

Bardolph, a corporal under Sir John Falstaff, a pimply, drunken, swaggering rascal, whose red nose is a continual source of jest with his companions; is a lieutenant in *Henry V.*; like Nym comes to the gallows eventually.—*The Merry Wives of Windsor*, Shakespeare.

Barkis, a carrier who courts David Copperfield's nurse, Clara Peggotty, sending her a message that "Barkie is willin'," and eventually marries her.—*David Copperfield*, Dickens.

Barmecide, a prince who entertains a beggar named Shazabac to a mock feast, and is so pleased with the other's reception of the jest that he finally orders a real banquet to be prepared.—*The Arabian Nights' Entertainments*.

Barton, Amos, a character in George Eliot's *Series of Clerical Life*.
Bassanio, the friend of Antonio (q.v.) and the lover of Portia (q.v.).—*The Merchant of Venice*, Shakespeare.

Beatrice, (1) the niece of Leonato, governor of Messina, the light-hearted, impulsive, and affectionate heroine of Shakespeare's *Much Ado About Nothing*; is in love with Benedick, whom she marries; (2) the daughter of a citizen of Florence named Portinari, with whom Dante fell in love; she was the inspiration of his *Divine Comedy*; (3) Beatrice Cenci, the subject of Shelley's tragedy, *The Cenci*.

Bede, Adam, a village carpenter, a strong friend of Arthur Donnithorne, son and heir of the local squire, but quarrels with him over the love of Hetty Sorrel. When she is tried for murdering the child she has had by Arthur, he stands by her, but later marries Dinah Morris.—*Adam Bede*, George Eliot.

Bedivere, Sir, a knight of the Round Table and King Arthur's butler; at the king's death he throws the latter's magic sword Excalibur into the mere.—*Morte d'Arthur*, Tennyson.

Belch, Sir Toby, the roistering old uncle of the Countess Olivia and companion of Sir Andrew Aguecheek (q.v.).—*Twelfth Night*, Shakespeare.

Belinda, the heroine of *The Rape of the Lock*, by Pope; also the heroine of a novel of the name by Maria Edgeworth.

Bell, Peter, Wordsworth's simple rustic, to whom the primrose was but a yellow flower and nothing more.

Belphebe, the huntress of Spenser's *Faerie Queene*, in whom he depicted Queen Elizabeth; "a Diana among women, cold, passionless, correct, and strong-minded."

Benedick, a young lord of Padua who forgoes his vow of celibacy to woo and marry the fair Beatrice (q.v.).—*Much Ado About Nothing*, Shakespeare.

Ben Hur, the Jewish hero of the novel of the name by Lew Wallace, the scenes of which are laid in the time of Christ.

Beverley, Ensign. See **Absolute**, Captain.

Biron, a merry young lord in attendance on the King of Navarre, who finds subject for jest in almost everything.—*Love's Labour's Lost*, Shakespeare.

Black Dwarf, The. See **Manley**, Sir Edward.

Blakeney, Sir Percy, an English gentleman who assists French aristocrats to escape from the terrors of the Revolution, masquerading under the name of "The Scarlet Pimpernel."—*The Scarlet Pimpernel*, Baroness Orczy.

Bluebeard, a wealthy seigneur of fable, the owner of a castle; marries a beautiful woman, and leaves her in charge of the keys of the apartments in his absence, with strict orders not to unlock any of the doors, an injunction which she fails to respect, and finds to her horror the remains of his former wives locked up in one of them; her disobedience is discovered, and she is to prepare for death, but is rescued as she lies with her head on the block by the timely arrival of her brothers, who at once despatch the husband to his merited doom. The English version is derived from Perrault's *Contes*.

Bobadil, Captain, a blustering but cowardly braggart, remarkable for his boasting and dainty oaths; with nineteen selected warriors like himself, he says, he would annihilate an army by challenging twenty of the enemy at a time—"two hundred a day: five days a thousand," and so on.—*Every Man in His Humour*, Ben Jonson.

Boffin, Nicodemus, "the golden dust-man," John Harmon's foreman, "a broad, round-shouldered, one-sided old fellow," rough in exterior but with a heart of gold; he sacrifices a fortune in favour of his employer's son.—*Our Mutual Friend*, Dickens.

Bois-Guilbert, Brian de, a leader of the Knights Templars, a cruel and unscrupulous man; when the Jewish girl, Rebecca, refuses his advances he carries her off; later, Rebecca being on trial for sorcery, Sir Brian encounters her champion, Ivanhoe, in single combat and is killed.—*Ivanhoe*, Scott.

Bombastes Furioso, the leading character in a farcical tragedy of the name by W. B. Rhodes, (1790) written in burlesque of Ariosto's *Orlando Furioso*.

Bors, Sir, a worthy, high-minded knight of the Round Table, the grandfather of Sir Galahad, to whom is given a vision of the Holy Grail.—*Morte d'Arthur*, Malory.

Bottom, Nick, a weaver of Athens, with his fellows he devises the play *Pyramus and Thisbe* for Duke Theseus; under the spell of Oberon, the Fairy King, he is invested with an ass's head, in which guise Titania, the Fairy Queen, dotes upon him.—*A Midsummer Night's Dream*, Shakespeare.

Bovary, Emma, the wife of a provincial famous of all "realistic" as opposed to "romantic" novels and the type from which all modern "realistic" novels have sprung. She endeavours to relieve her boredom by indulging her longing for romance in various love affairs. Disillusioned and heavily in debt, she finally commits suicide.—*Madame Bovary*, Flaubert.

Bowling, Tom, a naval lieutenant, a qualities.—*Roderick Random*, Smollett. It was this character which suggested Dibdin's well-known song.

Brabantio, a senator, father of Desdemona, a man of haughty, arrogant bearing, and an enemy of the Moor.—*Othello*, Shakespeare.

Bradamant, the "virgin knight" in white armour who marries Rogero the Moor upon his baptism; was the possessor of a magic and irresistible spear; is a character in both *Orlando Innamorato*, Bojardo, and *Orlando Furioso*, Ariosto.

Bradwardine, Baron, a pedantic but brave Scottish nobleman, a Jacobite, whose daughter, Rose, marries Waverley.—*Waverley*, Scott.

Braggadochio, a braggart who is of his borrowed plumes; the personification of exaggeration and boasting.—*The Faerie Queene*, Spenser.

Brand, a priest self-consecrated to teach the need of total renunciation of will. By his constant demand for all or nought he finally causes the people to revolt against him and drive him an outcast to the mountains where he dies.—*Brand*, Ibsen.

Brass, Sampson, a knavish attorney in Dickens' *Old Curiosity Shop*; affected feeling for his clients, whom he fleeced.

Brazenhead, Captain Salomon, "the Great," a 15th Century soldier of fortune who passes through amazing adventures with many love affairs.—*Brazenhead the Great*, Maurice Hewlett.

Breck, Alan, (real name Stewart), the companion of David Balfour in his flight through the Highlands; an ardent Jacobite and "a bonny fechter."—*Kidnapped*, R. L. Stevenson.

Bride of Lammermoor,

See Ashton, Lucy.

Bridgenorth, Major, a Parliamentarian conspirator who, is a neighbour of Sir Geoffrey Peveril; his daughter, Alice, the heroine of the novel, marries Julian Peveril, Sir Geoffrey's son.—*Peveril of the Peak*, Scott.

Bridlegoose, a judge who decides his cases by a throw of the dice.—*Pantagruel*, Rabelais.

Britling, Hugh, a successful and wealthy author, whose easy cultured and amorous life is broken into by the World War, in which he loses his eldest son.—*Mr. Britling Sees It Through*, H. G. Wells.

Britomart, an allegorical character, representing chastity, whose adventures denote the triumph of purity over impurity; meets eventually with Sir Artegal (q.v.), to whom she is married.—*The Faerie Queene*, Spenser.

Brooker, a former clerk of Ralph Nickleby, a felon, who out of revenge steals the latter's son and confines him under the name of Smike in Dotheboys Hall school.—*Nicholas Nickleby*, Dickens.

Brown, Father, a Roman Catholic priest whose intuition and insight into human character, combined with his sense of humour, make him an excellent detector of crime.—*The Innocence of Father Brown* and other stories, G. K. Chesterton.

Brown, Tom, the hero of *Tom Brown's School-days* and *Tom Brown at Oxford*, by Thomas Hughes; a typical healthy-minded, sport-loving, natural boy.

Brownlow, Mr., a benevolent old Oliver when he escapes from Fagin and his associates.—*Oliver Twist*, Dickens.

Bruin, the bear in the beast-epic, *Reynard* (1498).

Bruneild, a masterful princess whom King Gunther surpasses in feats of strength and skill by the aid of his friend Siegfried; the story of her conflict with the latter forms an important part of *The Nibelungenlied*.

Brutus, Marcus, the Roman patriot who conspires against Caesar with Cassius, Casca, and others and stabs the great dictator in the Capitol.—*Julius Caesar*, Shakespeare.

Bucklaw, Laird of, Frank Hayston, to whom Lucy Ashton (q.v.) is married against her will and whom she attempts to murder on her wedding-night.—*The Bride of Lammermoor*, Scott.

Bumble, Mr., the pompous, self-important beadle who becomes master of the workhouse in which Oliver Twist is lodged; his marriage with Mrs. Corney, the matron, turns out badly for him, and eventually he is disgraced.—*Oliver Twist*, Dickens.

Bumppo, Natty, backwoodsman and trapper, alias "Deerslayer" and "Hawk-Eye," "Pathfinder," and "La Longue Carabine," the hero of *The Pathfinder*, *The Pioneers*, *The Deerslayer*, *The Last of the Mohicans*, and *The Prairie*, Fenimore Cooper.

Bunsby, Jack, a ship's captain and friend of Captain Cuttle; he is considered to be an oracle of wisdom, although his speech is laconic; remarkable for possessing "one stationary eye and one revolving one, on the principle of some lighthouses"; eventually marries Mrs. Mastinor, the vixenish landlady of Cuttle.—*Dombey and Son*, Dickens.

Burchell, Mr., the name under which Sir William Thornhill masquerades when he visits Dr. Primrose; he was at first suspected of being the seducer of Olivia, but eventually marries Sophia.—*The Vicar of Wakefield*, Goldsmith.

Buzfuz, Serjeant, the lawyer retained by Dodson and Fogg on behalf of Mrs. Bardell in the action brought against Mr. Pickwick.—*The Pickwick Papers*, Dickens.

Caliban, a deformed and malignant being whose mother is the witch Sycorax; he is servant to Prospero (q.v.).—*The Tempest*, Shakespeare.

Calidore, Sir, a gallant knight (modelled upon Sir Philip Sydney) who is the personification of courtesy; he adventures in quest of the Blatant Beast.—*The Faerie Queene*, Spenser.

Cambyases, a ranting character in a tragedy of the name by Preston (1569), referred to in Shakespeare's *Henry IV., Part I.* ("in King Cambyases' vein").

Camellias, Lady of the (Dame aux Camélias). See Gautier, Marguerite.

Campaigner, The Old, Mrs. Mackenzie, the mother of Rose, Clive Newcome's first wife.—*The Newcomes*, Thackeray.

Candida, the wife of Morell, a clergyman. A poet, Eugene Marchbanks, whom Morell has befriended, claims to understand her and enters into rivalry with him for her affections. Candida's choice is finally with her husband.—*Candida*, Shaw.

Candide, the unfortunate hero of a novel of the name by Voltaire; his attitude towards his accumulation of woes is one of cynical indifference.

Caradoc, Sir, one of the knights of the Round Table, whose pure heart enables him to pass two tests safely.—*Percy's Reliques*.

Carker, James, the head clerk of Mr. Dombey, an evil man who not only brings financial ruin upon his employer, but elopes with the latter's young (second) wife; he is killed accidentally on the railway line.—*Dombey and Son*, Dickens.

Carstone, Richard, a ward of John Jarndyce and concerned in the famous Chancery suit, "Jarndyce v. Jarndyce"; he is a happy and engaging young man, who marries his cousin, Ada Clare, also a ward in Chancery, but after trying several occupations he plunges into the family litigation, loses his estate, and dies soon after.—*Bleak House*, Dickens.

Carton, Sydney, the dissipated "jackal" of Mr. Stryver, the barrister; his great abilities deadened by drink, he cherishes an affection for Lucie Manette, who marries Charles Darnay (Evrémonde), and, by reason of the strong likeness between the two men, he personates Darnay and goes to the guillotine in his stead.—*A Tale of Two Cities*, Dickens.

Casca, one of the conspirators against Caesar; with Brutus, he stabs the dictator in the Capitol.—*Julius Caesar*, Shakespeare.

Cassim, Ali Baba's brother, who enters the treasure cave of the Forty Thieves by stealth, but is imprisoned therein because he cannot remember the password "Open Sesame!" which opens the door; when the Thieves return he is caught and cut to pieces.—*The Arabian Nights' Entertainments*.

Cassio, a Florentine lieutenant under Othello, whose disgrace with the latter leads to the assumed intrigue between Desdemona and Iago.—*Othello*, Shakespeare.

Cassius, a friend of Brutus, and the chief conspirator against Caesar.—*Julius Caesar*, Shakespeare.

Catharick, White, the "Woman in that name by Wilkie Collins.

Caudle, Mrs., famous for her "curtain lectures" to her husband, delivered at night-time for many years.—*The Caudle Papers* (in *Punch*), Douglas Jerrold.

Cedric, a wealthy Saxonthane, lord of Rowena.—*Ivanhoe*, Scott.

Celia, daughter of Duke Frederick, the usurper, who joins her cousin, Rosalind (daughter of the banished duke), in her journey into the Forest of Arden to seek the latter's father; in disguise as a peasant girl is known as Aliena.—*As You Like It*, Shakespeare.

Chadband, Rev. Mr., a hypocritical clergyman, "a large yellow man, with a fat smile," who speaks of himself as a "vessel" and imposes on many of his dupes.—*Black House*, Dickens.

Charmian, one of Cleopatra's women attendants, devoted to her mistress; following the queen's example she kills herself with an asp bite.—*Antony and Cleopatra*, Shakespeare.

Chatterley, Lady, a woman of passionate nature, whose husband is partly paralysed. She conducts an affair with her husband's gamekeeper, and after obtaining a divorce marries him.—*Lady Chatterley's Lover*, D. H. Lawrence.

Cheyne, Harvey N., the son of Harvey Cheyne, an American millionaire; he is washed overboard and rescued by a fishing schooner; he lives with the crew who make a man of him.—*Captains Courageous*, Rudyard Kipling.

Chickweed, Mr., a licensed victualler who pretends frequently that he has been robbed and trades upon the generosity of friends until his fraud is exposed.—*Oliver Twist*, Dickens.

Children of the Mist, of the MacGregor clan; they withstand the soldiers sent in pursuit of Dalgetty.—*The Legend of Montrose*, Scott.

Chriemhild, sister of King Gunther of Burgundy and wife of Siegfried (q.v.); after the latter's death she develops into a vindictive, revengeful woman; as her second husband marries Attila, king of the Huns.—*The Nibelungenlied*.

Christabel, the heroine of Coleridge's beautiful but unfinished poem of the title.

Christian, the hero of Bunyan's *Pilgrim's Progress*, which recounts the story of his journeying from the City of Destruction to the Celestial City; his wife, Christiana, follows him under the guidance of Mr. Greatheart.

Chuzzlewit, Anthony, the miserly brother of Martin Chuzzlewit the Elder and father of Jonas; a Manchester warehouseman in business.—*Martin Chuzzlewit*, Dickens.

Chuzzlewit, Jonas, the profligate son of Anthony, who attempts to murder his father and does so away with Montagu Tigg who discovers his villainy; he marries Mercy Pecksniff, treats her cruelly, and eventually poisons himself while on his way to prison under arrest for murder.—*Martin Chuzzlewit*, Dickens.

Chuzzlewit, Martin, the elder, a rich but eccentric old man who disinherits his grandson, Martin, goes to live with the hypocritical Pecksniff (q.v.), and after the latter's exposure is reconciled to Martin.—*Martin Chuzzlewit*, Dickens.

Chuzzlewit, Martin, the younger, grandson of Martin the Elder; because of a love affair with Mary Graham, quarrels with his grandfather and goes to America, where he loses his money in a swindling land-boom project; returns to find his grandfather apparently in the power

of the Pecksniffs, but is reinstated in the old man's affections and marries Mary.—*Martin Chuzzlewit*, Dickens.

Cinderella (the little cinder-girl), the youngest member of a family who must drudge at home while her elder sisters go to balls, till one day a fairy befriends her and conveys her to a ball, where she is as the centre of attraction, and wins the r. of a prince. On quitting the ball she leaves a slipper behind her, by means of which she is identified by the prince, who finds that hers is the only foot that the slipper will fit, and marries her. The story in one version or another is a very ancient and widespread one, being found in the writings of Aelian and Strabo.

Clärchen, a female character in Goethe's *Egmont*, distinguished by qualities of constancy and devotion.

Clare, Ada, the cousin of Richard Carstone (q.v.) and, like him, a ward in Chancery; she marries Richard, but her happiness is marred by the great "Jarndyce v. Jarndyce" suit.—*Black House*, Dickens.

Claribel, Lewd, "one of the six who contend for Florimel the False.—*The Faerie Queene*, Spenser.

Clarissa Harlowe. See Harlowe, Clarissa.

Claudio, the brother of Isabella and a suitor for Juliet's hand.—*Measure for Measure*, Shakespeare.

Claudio, a Florentine lord who is the lover of Hero, Leonato's daughter.—*Much Ado About Nothing*, Shakespeare.

Claudius, king of Denmark, Hamlet's uncle; having poisoned his brother and married the latter's widow, he is finally killed by Hamlet, whom he has attempted to poison.—*Hamlet*, Shakespeare.

Cleishbotham, Jedediah, the schoolmaster editor of *The Tales of My Landlord*, Scott.

Clementine, The Lady, a lady, accomplished and beautiful, in Richardson's novel, *Sir Charles Grandison*, in love with Sir Charles, who marries another he has no partiality for.

Cleon, the governor of Tarsus, slain with suspicion of having murdered Marina, daughter of Pericles.—*Pericles*, Shakespeare.

Cleveland, Clement, otherwise Vaughan, the pirate, in love with Minna Troil, daughter of Magnus, the udaller.—*The Pirate*, Scott. See *Norna*.

Clinker, Humphry, the hero of Smollett's novel, *Humphry Clinker*, who attracts the notice of Mr. Bramble, marries Mrs. Bramble's maid, and proves to be a natural son of Mr. Bramble.

Clissold, William, son of a company promoter; he becomes a metallurgist in the firm of Romer, Steinhardt, Crest and Co. later being made director. He believes that the eventual rulers of the world are the industrialists and constructive financiers.—*The World of William Clissold*, H. G. Wells.

Clorinda, the daughter of Senapus of Ethiopia; abandoned by her mother for a changeling, she goes to Africa; after many adventures, becomes a leader of the pagan forces, wins the love of Tancred (q.v.), but is slain by him unknowingly.—*Jerusalem Delivered*, Tasso.

Cloten, husband, a base-minded lout who tries to make love to Imogen (q.v.) and is killed in a duel with Guiderius.—*Cymbeline*, Shakespeare.

Codlin, Tom, with Mr. Harris ("Short Trotters"), one of the *Punch* and Judy showmen, "Codlin and Short," who

show kindness to Little Nell and her grandfather.—*The Old Curiosity Shop*, Dickens.

Cogia Houssain, the captain of the Forty Thieves, who is outwitted and killed by Morgiana, Ali Baba's slave.—*The Arabian Nights' Entertainments*.

Colepepper, Captain, a bully of Alastia, the thieves' quarter in London.—*The Fortunes of Nigel*, Scott.

Coningsby, the hero of a novel of the name by Lord Beaconsfield, a representative of the Young England Party.

Constance, a Benedictine nun in love with Marmion, whom she accompanies in disguise as a page; is subsequently immured to her death for violating her vows.—*Marmion*, Scott.

Cophetua, an African king of legend who falls in love with and marries a beggar-girl, as in Tennyson's poem, *The Beggar-Maid*.

Copperfield, David, an only son; after his father's death leads a life of misery under Mr. Murdstone, whom his mother marries, runs away from menial employment and finds a friend in Betsey Trotwood, a great-aunt, at Dover; enters a law office, turns to writing, marries first Dora Spenlow and secondly Agnes Wickfield.—*David Copperfield*, Dickens.

Cordelia, the youngest daughter of King Lear, disinherited by her father, but faithful and forgiving to him in the end.—*King Lear*, Shakespeare.

Corinne, the heroine and title of a book of Mme. de Staël, her principal novel, in which she celebrates the praises of the great men and great masterpieces of Italy; her heroine is the type of a woman inspired with poetic ideas and the most generous sentiments.

Costard, a clown who uses big words and phrases of which he knows not the meaning, in imitation of the court gallants.—*Love's Labour's Lost*, Shakespeare.

Coverley, Sir Roger de, a country gentleman of the time of Queen Anne, as modest, courteous, and benevolent as he is vain and eccentric; he was the creation of Addison in *The Spectator*.

Cratchit, Bob, the hard-working clerk of Scrooge, into whose happy home at Christmas the miserly old man is given a peep by the ghost.—*A Christmas Carol*, Dickens.

Crawley, Sir Pitt, "a cunning, mean, foolish, disreputable old rogue," miserly, vulgar, and litigious.—*Vanity Fair*, Thackeray.

Crawley, Pitt, son of Sir Pitt, very much the grand gentleman, but inclined to priggishness; he succeeds his father in the title, inherits a fortune from an aunt, marries a lady of title, and enters Parliament.—*Vanity Fair*, Thackeray.

Crawley, Captain Rawdon, Pitt's younger brother, a guardsman and "man about town"; he marries Becky Sharp (q.v.), forfeits the fortune that goes to Pitt, and with her lives on his wits, until Becky's intrigue with Lord Steyne brings about their separation; he becomes later governor of Coventry Island, where he dies.—*Vanity Fair*, Thackeray.

Creakle, Mr., a bullying schoolmaster in Dickens' *David Copperfield*.

Cressida, a beautiful Trojan woman plighted to Troilus in favour of Diomed whose prisoner she becomes; her story is told by Chaucer, and by Shakespeare in *Troilus and Cressida*.

Crichton, The Admirable. See Admirable.

Croaker, Mr., the guardian of Miss Richland, a self-martyr; always grumbling and out-at-elbows with the world; his wife is his antithesis.—*The Good-Natured Man*, Goldsmith.

Crummles, Vincent, the good-hearted theatrical company who induces Nicholas and Smike to join him; his wife, a "tragedy queen" lady, is similarly kind and generous; his daughter, Ninetta, is billed as "the Infant Phenomenon."—*Nicholas Nickleby*, Dickens.

Cruncher, Jerry, the "odd-job" porter at Tellson's Bank, who in secret is a "resurrection man"; his wife prays for his reform, and is styled by him his "Aggerawayter" for her constant "flopping."—*A Tale of Two Cities*, Dickens.

Crusoe, Robinson, the hero of the novel of the same title by Defoe, a sailor shipwrecked on a desert island whose ingenuity and resource enable him to make a home there.

Cuttle, Captain, a retired ship's captain with a hook in place of his right hand, a kind-hearted man who befriends Florence Dombey; given to quoting, with a favourite motto: "When found, make a note of."—*Dombey and Son*, Dickens.

Cymbeline, a legendary king of Britain, the father of Imogen (q.v.).—*Cymbeline*, Shakespeare.

Cyrano de Bergerac, a gallant French soldier with an abnormal nose. The chief character in the world-famous play of that name by Edmond Rostand.

Dagonet, Sir, King Arthur's court fool, whose adventures are related by Malory and whom Tennyson introduces in his *Idylls*.

Dalgetty, Dugald, a soldier of fortune with pretensions to scholarship, always ready to sell his sword to the highest bidder.—*The Legend of Montrose*, Scott.

Dandie Dinmont, an eccentric but good-natured farmer who helped Meg Merrilies to frustrate the plot of Glossin and Dick Hatteraick.—*Guy Rannering*, Scott.

Dandin, Georges, a character in one of Molière's comedies illustrative of the folly a man commits when he marries a woman of higher rank than his own, Georges being his impersonation of a husband who has patiently to endure all the extravagant whims and fancies of his dame of a wife.

Dandin, Perrin, a simple citizen in the *Pantagruel* of Rabelais, who seats himself judge-wise on the first stump that offers, and passes offhand a sentence in any matter of litigation; a character who figures similarly in a comedy of Racine (*Les Plaideurs*) and in a fable of La Fontaine.

Darnay, Charles, otherwise Evrémonde in France, the lover of Lucie Manette, whom he is enabled to marry after Sydney Carton (q.v.) has gone to the guillotine in his place.—*A Tale of Two Cities*, Dickens.

D'Artagnan, the dashing swordsman of the three musketeers, Athos, Porthos, and Aramis, the hero of *The Three Musketeers* and *Twenty Years After*, by Alexandre Dumas, and a leading character in other books by the same novelist.

Dedlock, Sir Leicester, a proud and obstinate baronet, whose wife is the mother of Esther Summerson, her child before marriage by a Captain Rawdon; on the eve of the discovery of her secret Lady Dedlock runs away from home and dies miserably.—*Bleak House*, Dickens.

Defarge, Madame, a strong-willed woman and virulent, relentless Revolutionist; her husband, keeper of a wine-shop, is a similarly implacable character.—*A Tale of Two Cities*, Dickens.

Delphine, the heroine of a novel of the same title by Madame de Staël, a girl who, like Corinne, dies of grief from unrequited love.

Demetrius, a youth of Athens in love with Hermia, daughter of Egeus, but eventually united to Helena.—*A Midsummer Night's Dream*, Shakespeare.

Deronda, Daniel, a young Jew of unknown parentage, who passes as the nephew of Sir Hugo Mallinger. Through his friendship with Mirah Cohen and her brother Mordecai, he interests himself in the welfare of the Jews. Afterwards, discovering that he is of Jewish birth, he marries Mirah and goes with her and Mordecai to Palestine.—*Daniel Deronda*, George Eliot.

Desdemona, the daughter of Brabantio, a senator of Venice, who loves Othello the Moor and marries him; she is killed by Othello after Iago has poisoned his mind against her.—*Othello*, Shakespeare.

Diana of the Crossways.

See Merion, Diana.

Dick, Mr. a kindly, half-witted gentleman who is befriended by Betsey Trotwood, David Copperfield's aunt; his peculiar mania concerns the head of Charles I.—*David Copperfield*, Dickens.

Dinah, the coloured cook in the St. Clair household.—*Uncle Tom's Cabin*, Harriet Beecher Stowe.

Dinarzade, the sister of Scheherazade (wife of the Sultan of Persia), who wakes the latter early every morning to relate a story that shall interest the Sultan and postpone his decision to strangle his wife at daybreak.—*The Arabian Nights' Entertainments*.

Dishart, Gavin, the "Little Minister," who by chance meets a gypsy woman, Babbie, during Chartist rioting in Thrums. He marries her in gypsy style over the tongs, but redeems his reputation among his congregation by a magnificent attempt to save the life of Lord Huntly, who had himself hoped to marry Babbie.—*The Little Minister*, Barrie.

Dobbin, Colonel, a soldier and gallant gentleman, awkward in manner, but with truly fine instincts; he worships Amelia Sedley and after her husband's death marries her.—*Vanity Fair*, Thackeray.

Dodson and Fogg, the firm of act for Mrs. Bardell in her breach-of-promise suit against Mr. Pickwick.—*The Pickwick Papers*, Dickens.

Dogberry, an ignorant constable who, with his fellow, Verges, misuses words in a ridiculous manner.—*Much Ado About Nothing*, Shakespeare.

Dombey, Mr., a self-important, money-loving London merchant, the father of Florence and Paul; after the latter's death he becomes harder still in nature and treats his daughter with indifference; the desertion of his second wife and the loss of his fortune humble him at last.—*Dombey and Son*, Dickens.

Don Juan, a reckless libertine who, adventures, is carried off by the Devil; a character in Spanish legend that has inspired dramas by Molière and Corneille, an opera (*Don Giovanni*) by Mozart, and has given the name to a poem by Byron.

Don Quixote, the hero of the satirical romance of the same title by Cervantes; a Castilian gentleman of

means whose head is turned by books of chivalry and who rides out into the world, accompanied by his squire, Sancho Panza, as a knight-errant.

Doone, Lorna, a girl of noble birth, adopted by the lawless Doones in the Exmoor Valley; she is taken from them by John Ridd (q.v.), who marries her.—*Lorna Doone*, Blackmore.

Dora, the daughter of Mr. Spenslow, the proctor, and the "child-wife" of David; she dies young.—*David Copperfield*, Dickens.

Dromio, the name of twin brothers who are servants to the twins, Antipholus, and whose exact resemblance to each other adds to the confusion caused by their masters.—*The Comedy of Errors*, Shakespeare.

Drood, Edwin, the hero of Dickens' last unfinished novel, *The Mystery of Edwin Drood*.

Dryasdust, Rev. Dr., a pedantic character invented by Scott to introduce certain of his novels, the name being used as a synonym for a dull though painstaking historian.

Dulcinea del Toboso, a country wench whom Don Quixote exalts into a peerless beauty as the object of his devotion.—*Don Quixote*, Cervantes.

Durward, Quentin, a brave young archer in the Scottish Guard in France, who saves the life of Louis XI. and carries off the Countess Isabella de Croye from the Duke of Orleans.—*Quentin Durward*, Scott.

Earnshaw, Catherine, the wife of Edward Linton, whom she marries despite the fact that she loves, and is loved by, Heathcliff, her father's adopted son. She dies at the birth of her daughter, Cathy.—*Wuthering Heights*, Emily Brontë.

Edgar, the Master of Ravenswood, the affianced lover of Lucy Ashton (q.v.); after the tragedy of her marriage to Bucklaw he meets his death in a quicksand, according to a prophecy.—*The Bride of Lammermoor*, Scott.

Egeus, the father of Hermia (q.v.).—*A Midsummer Night's Dream*, Shakespeare.

Eglantine, Madame, the prioress of Chaucer's *Canterbury Tales*, a good-natured but ignorant woman who speaks French "after the scole of Stratford-atte-Bowe."

Ekdal, Hjalmar, lives in a mist of self-delusion about his capacities, his position and the identity of his daughter Hedvig, the dispelling of which by the well-meaning Gregers Werle leads to Hedvig's suicide.—*The Wild Duck*, Ibsen.

Elaine, the "illy maid of Astolat" who pines and dies of her love for Lancelot.—*History of Prince Arthur*, Malory; and *Idylls of the King*, Tennyson.

Emile, the hero of a philosophic romance by Rousseau of the same name, in which the author expounds his views on education, and presents his reasons, with his ideal of good education.

Emilia, the wife of Iago, who uses her to procure a handkerchief of Desdemona in order to further his plot; when she later reveals the truth she is killed by Iago.—*Othello*, Shakespeare.

Em'ly, Little, the niece of Daniel Peggotty, giddy and engaged to the latter's nephew, Ham; she is induced to elope with Steerforth, who deserts her, is found after a long search by Daniel Peggotty, and eventually goes with him to Australia. Steerforth was drowned in a shipwreck and Ham in trying to save him.—*David Copperfield*, Dickens.

Enid, daughter of Yniol and wife of Geraint; under suspicion of unfaithfulness she proves her purity and is reunited to her husband.—*Idylls of the King*, Tennyson.
Eric, hero of a book for boys entitled *Eric, or Little by Little*, by F. W. Farrar, Dean of Canterbury.

Erl-King, a mischievous goblin or spirit in German legend, the subject of a ballad by Goethe.

Esmeralda, a gipsy girl of great beauty who dances publicly with a tambourine and a goat; she is shielded from peril in a church by Quasimodo, the hunchback, but eventually comes to the gibbet.—*Notre Dame de Paris*, Hugo.

Esmond, Henry, a chivalrous soldier involved in a plot for the restoration of the Stuarts; pays court to the imperious Beatrix, his kinswoman, but finally marries the latter's mother.—*Henry Esmond*, Thackeray.

Estella, a beautiful girl who is adopted by Miss Havisham; at one time engaged to Pip, she marries the worthless Drummle; she proves to be the natural child of Magwitch the convict.—*Great Expectations*, Dickens.

Euphues, an Athenian noted for his fine taste, wit, and gallantry, the chief character in John Lyly's *Euphues, or the Anatomy of Wit*.

Evangeline, the heroine of Longfellow's poem of the same title, an Acadian (Nova Scotian) girl who is parted from her lover, Gabriel, during the exile of the colonists, and who does not find him until both are old.

Everdene, Bathsheba, the prosperous owner of Weatherbury Upper Farm; she rejects the hand of Gabriel Oak and marries Sergeant Troy. He leaves her and is reported drowned. She engages to marry Boldwood, a farmer, who eventually murders Troy. Bathsheba finally marries Gabriel Oak.—*Far from the Madding Crowd*, Hardy.

Eyre, Jane, the heroine of a novel of the same name by Charlotte Brontë, a governess who marries Rochester, a man of fortune but a misanthrope, after the death of his insane wife in a fire at Thornfield Hall, Rochester himself being blinded and maimed in the attempt to save her.

Fag, the lying servant of Captain Absolute, who "wears his master's wit, as he does his lace, at second-hand."—*The Rivals*, Sheridan.

Fagin, an old Jew, a trainer of thieves and receiver of stolen goods; he is ultimately convicted of complicity in a murder and executed.—*Oliver Twist*, Dickens.

Fainéant, Le Noir, the name borne by Richard Cœur-de-Lion in *Ivanhoe*.

Fair Maid of Perth, Catherine Glover, daughter of a Perthshire glover, whose lover is Smith the armourer, "Hal of the Wynd," a brave youth who survives an Ordeal of Battle and wins her hand.—*The Fair Maid of Perth*, Scott.

Faithful, Christian's companion in his journey to the Celestial City; at Vanity Fair he is taken and burned alive.—*The Pilgrim's Progress*, Bunyan.

Faithful, Jacob, the hero of a tale of the sea, under the same title, by Captain Marryat.

Falkland, a gentleman of high birth who, under provocation, commits a murder for which another suffers the death penalty; his secret is discovered by a servant named Caleb Williams, and when he persecutes the latter for robbery his crime is revealed and he dies in misery.—*Caleb Williams*, Godwin.

Falstaff, Sir John, the droll, boastful and bibulous "fat knight" whose amorous misadventures form the main theme of Shakespeare's *Merry Wives of Windsor*, and who, as soldier and wit, the companion of

Fat Boy, The, otherwise Joe, a lad in the employ of Mr. Wardle, of Dingley Dell, with a voracious appetite and a habit of going to sleep constantly.—*The Pickwick Papers*, Dickens.

Fata Morgana. See Morgan Le Fée.

Fathom, Ferdinand, Count, a heartless friend nor enemy in his villainies, but finds forgiveness in the end.—*The Adventures of Ferdinand, Count Fathom*, Smollett.

Fatima, the last of the wives of Bluebeard (q.v.), who is saved from the fate of the others by the arrival of her brothers.—*Fairy Tales*, Perrault.

Faust, or Dr. Faustus, a magician and astrologer who makes a compact with the Devil to sell his soul in exchange for twenty-four years of unlimited enjoyment; the subject of a tragedy by Marlowe and of a poem by Goethe, in the latter work Faust being represented as a scholar of high attainments, while the Devil, Mephistopheles, is a less crude character than in previous productions.

Fenton, the lover of "sweet Anne Page," a gentleman of breeding who seeks an heiress but marries for love.—*The Merry Wives of Windsor*, Shakespeare.

Ferdinand, the son of Alonso, king of Naples, in love with Prospero's daughter, Miranda.—*The Tempest*, Shakespeare.

Feverel, Richard, brought up in accordance with the system devised by his father, rebels against it, makes a runaway match, but later deserts his wife. They are reconciled, but she dies soon afterwards.—*The Ordeal of Richard Feverel*, Meredith.

Fezziwig, Mr. a kindly, jolly old merchant, a former employer of Scrooge, whom the ghost shows to the latter as presiding at a Christmas Ball; his wife, "one vast substantial smile," is worthy to be his partner in every sense of the term.—*A Christmas Carol*, Dickens.

Fiammetta, the name Boccaccio gave to his *Filocolo* in the *Decamerone* to hide the identity of Maria d'Aquino with whom he was desperately in love.

Figaro, the astute barber and valet who outwits everybody by his cunning.—*Barbier de Seville* and *Mariage de Figaro*, Beaumarchais, two comedies on which were based operas by Mozart, Paisiello, and Rossini.

Finn, Huckleberry, the companion of Tom Sawyer in many amusing adventures in the story of the same name by Mark Twain.

Flanders, Nell, a notorious woman, the story of whose career as thief and convict, with her subsequent reform, is told in *The Fortunes of Moll Flanders*, Defoe.

Flibbertigibbet, a foul fiend who takes bare-lip and squint-eye among other evils, and mows the white wheat.—*King Lear*, Shakespeare. Also the name given to Dickie Sludge, the dwarf, in *Kentworth*, Scott.

Florizel, the young prince, a son of Polixenes, king of Bohemia, who falls in love with Perdita (q.v.).—*The Winter's Tale*, Shakespeare.

Fluellen, a brave, hot-tempered Welsh captain and a pedant, famous for the parallel he draws between Henry V. and Alexander the Great.—*Henry V.*, Shakespeare.

Ford, a gentleman of Windsor whose wife leads Sir John Falstaff on to make himself ridiculous; during this humorous intrigue he assumes the name of Brook and further fools the knight.—*The Merry Wives of Windsor*, Shakespeare.

Forsyte, Fleur, the daughter of Soames Forsyte. She falls in love with Jon Forsyte, the son of her father's first wife by her second marriage with Jolyon Forsyte. When she learns the story of this family complication she and Jon decide to part. She later marries Michael Mont.—*A Modern Comedy*, Galsworthy.

Forsyte, Jolyon, the son of "Old Jolyon," a prosperous tea-merchant, who is the head of the Forsyte family. Young Jolyon marries three times, his third wife being Irene, divorced wife of Soames Forsyte. By her he has a son, Jon.—*The Forsyte Saga*, and *A Modern Comedy*, Galsworthy.

Forsyte, Soames, a lawyer, the son of James Forsyte. He is a man of strong possessive and acquisitive instincts. He divorces his wife, Irene, and later marries Annette, a French girl, the daughter of Mme. Lamotte. By her he has a daughter, Fleur.—*The Forsyte Saga*, Galsworthy.

Forsyte, Swithin, an estate and land agent, the son of Superior Dossott Forsyte. As an elderly bachelor, he lived in Hyde Park Mansions, his chief interest being the care of his health. He was known as "Four-in-hand Forsyte."—*The Forsyte Saga*, Galsworthy.

Fortinbras, prince of Norway in Shakespeare's *Hamlet*.

Forty Thieves. See *All Baba*.

Francesca, a lady of Ravenna, married to the deformed Lanciotto of Rimini, but wooed by the latter's brother, Paolo, both being put to death by Lanciotto when their guilt is discovered; her story is told by Dante, and forms the theme of a tragedy by Silvio Pellico.

Frankenstein, a student who constructs a hideous monster (without name) which is endowed with life but has no "breath of divinity"; in the end it slays its creator.—*Frankenstein*, Mrs. Shelley.

Freischutz, Der, a German archer of legend who, making a compact with the Devil, is given seven balls, six of which will hit with certainty whatever may be his mark, but the seventh to be directed as the Devil wishes.—*Der Freischutz*, an opera by Weber.

Friar Tuck, one of Robin Hood's "merry men" of Sherwood, identified by some with the "curtal friar."

Friday, Man, a young Indian, Robinson Crusoe's servant on his island, so named as having been saved from cannibals on a Friday.—*Robinson Crusoe*, Defoe.

Fudge Family, The, the name of an English family, the four members of which write letters to friends at home describing (in verse) their doings and impressions of Paris, the whole being a delightful satire.—*The Fudge Family*, Tom Moore.

Gabler, Hedda, the hyper-fastidious but intelligent wife of a writer, Tesman; repelled by life and capable only of boredom, she finds interest in dominating Lovborg, a brilliant writer. Finally, having driven him to suicide, she also kills herself.—*Hedda Gabler*, Ibsen.

Gabriel, the son of Basil LaJeunesse, the blacksmith of Grand Pré, in Acadia; he was the betrothed of Evangeline

(q.v.), from whom fate parted him for many years.—*Evangeline*, Longfellow.

Galahad, Sir, a knight of the Round Table, the son of Lancelot and Elaine, the chastest and noblest of the company, whose strength was "as the strength of ten, because his heart is pure"; he was the only knight to achieve the quest of the Holy Grail.—*History of Prince Arthur*, Malory; and *Idylls of the King*, Tennyson.

Galatea, a statue chiselled by Pygmalion which became endowed with life but, after a time of some complexity, reverted to its original form.—*Pygmalion and Galatea*, Sir W. S. Gilbert.

Game Chicken, The, a prize-fighter whom Mr. Toots engages for boxing lessons.—*Dombey and Son*, Dickens.

Gamp, Sarah, a monthly nurse addicted to drink and noted for her frequent allusions to a hypothetical "Mrs. Harris."—*Martin Chuzzlewit*, Dickens.
